This Brochure provides information about the qualifications and business practices of Quorum Investment Counsel, LLC. If you have any questions about the contents of this Brochure, please contact us at (305) 372-1611 or via email at info@quorumRIA.com. The information in this Brochure has not been approved or verified by the United States Securities and Exchange Commission ("SEC") or by any state securities authority.

Quorum Investment Counsel, LLC ("Quorum") is a Registered Investment Adviser. Registration of an Investment Adviser does not imply any level of skill or training. The oral and written communications of an Adviser provide you with information that you may use to determine whether to hire or retain them.

Additional information about Quorum is also available on the SEC's website at www.adviserinfo.sec.gov. You can search this site by using a unique identifying number, known as a CRD number. The CRD number for Quorum is 281497. The SEC's web site also provides information about any persons affiliated with Quorum who are registered, or are required to be registered, as Investment Adviser Representatives of Quorum.

Item 2 – Material Changes

Since our last filing on November 7, 2016, we have no material changes to our Form ADV Part 2A, however, we have made the following non-material change:

- Changed our Florida suite number
- Changed our California office address

We will ensure that you receive a summary of any material changes to this and subsequent Brochures within 120 days of the close of our business' fiscal year which is December 31st. We will provide other ongoing disclosure information about material changes as they occur. We will also provide you with information on how to obtain the complete Brochure. Currently, our Brochure may be requested at any time, without charge, by contacting us via email at info@quorumria.com or phone at (305) 372-1611.

Item 4 – Advisory Business Introduction

Our Advisory Business

Quorum (“we”, “us”, “our”) is a Registered Investment Adviser (“Adviser”) which offers investment advice regarding securities and other financial services to our clients. We are registered through and regulated by the United States Securities and Exchange Commission (“SEC”).

We provide investment advice through Investment Adviser Representatives (“IAR”) associated with us. These individuals are appropriately licensed, qualified, and authorized to provide advisory services on our behalf. In addition, all advisors are required to have In addition, all IARs are required to have a college degree, professional designation, or equivalent professional experience.

Founded in 2009, Quorum originally operated under the name, Calibre Wealth Management, LLC. Perry Gregoriou serves as the Chief Investment Officer and Managing Member. Quorum’s team of professionals consists of Jenna Gregoriou and Jessie Ebert. Jessie Ebert serves as the Chief Financial Officer. Jenna Gregoriou serves as Director of Marketing. We provide asset management services to individuals, high net worth individuals, trusts, estates, corporate pension and profit-sharing plans, charitable organizations, foundations, endowments, corporations, and small businesses.

Quorum is an investment counseling firm that was founded in order to empower the rational investor. Our goal to provide objective investment advice in order to help our clients avoid the pitfalls of speculation and achieve superior investment outcomes.

We are committed to the precept that by placing the client’s interests first, we will add value to the asset management process and earn the client’s trust and respect. We value long term relationships with our clients whom we regard as strategic partners in our business.

Services

We provide asset management services with an emphasis on well diversified portfolios that are designed to successfully manage risk and help build and preserve your wealth.

We do not participate in wrap fee programs.

Asset Management

Asset management is the professional management of securities (stocks, bonds and other securities) and assets (e.g., real estate) in order to meet your specified investment goals. With an Asset Management Account, you engage us to assist you in developing a custom-tailored portfolio designed to meet your unique investment objectives. The investments in the portfolio account may include mutual funds, stocks, bonds, equity options, futures, etc.

We will meet with you to discuss your financial circumstances, investment goals and objectives, and to determine your risk tolerance. We will ask you to provide statements summarizing current investments, income and other earnings, recent tax returns, retirement plan information, other assets and liabilities, wills and trusts, insurance policies, and other pertinent information.

Based on the information you share with us, we will analyze your situation and recommend an appropriate asset allocation or investment strategy. Our recommendations and ongoing management are based upon your investment goals and objectives, risk tolerance, and the investment portfolio you have selected. We will monitor the account, trade as necessary, and communicate regularly with you. Your circumstances shall be monitored in quarterly and annual account reviews. These reviews will be conducted in person, by telephone conference, and/or via a written inquiry/questionnaire. We will work with you on an ongoing basis to evaluate your asset allocation as well as rebalance your portfolio to keep it in line with your goals as necessary. We will be reasonably available to help you with questions about your account.

We will:

- Review your present financial situation
- Monitor and track assets under management
- Provide portfolio statements, periodic rate of return reports, asset allocation statement, rebalanced statements as needed
- Advise on asset selection
- Determine market divisions through asset allocation models
- Provide research and information on performance and fund management changes
- Build a risk management profile for you
- Assist you in setting and monitoring goals and objectives
- Provide personal consultations as necessary upon your request or as needed.

You are obligated to notify us promptly when your financial situation, goals, objectives, or needs change.

We offer three distinct model portfolio strategies:

GARP: Growth at a Reasonable Price (CAPITAL APPRECIATION)

The objective of this portfolio discipline is to outperform the S&P500 stock average over a market cycle. The approach taken to this strategy is to blend both Value and Growth styles in order to mediate equity style-specific cyclical volatility. Employing a proprietary quantitative decision support system, Quorum weights Growth-oriented and Value-tilted factors (adjusted for stock specific risk) to evaluate the relative attractiveness of competing equity securities within each sector. Sector weights are generally neutral versus the S&P though adjustments may be made depending on overall sector valuations. The GARP stock sell discipline is influenced by additional idiosyncratic factors such as litigation and other concerns such as tax cost basis and position concentrations. The portfolio is populated with an average of 48 equally weighted positions though certain outperforming positions may be held until they reach up to 10% of the value of the portfolio. Every effort is made to minimize portfolio turnover. Portfolios may differ as to position weighting depending on the time of the portfolio's initiation.

STRATI: Strategic Income (TOTAL RETURN)

The objective of this strategy is to generate income and capital gains in excess of the Barclay's Aggregate Bond Index. Our approach to income generation is also based on a proprietary quantitative decision

support system which is agnostic as to security type and weighs income flows overgrowth in cash flows over time. Security types with the highest cash-flow generation are evaluated on a risk-adjusted basis. The risk is evaluated based on credit as well as interest rate factors. Projected growth in cash flows is a secondary emphasis in an effort to mediate the effects of potentially rising interest rates. The portfolio holds a minimum of 20 positions and averages 32 positions. The portfolio is traded in a manner to minimize turnover and potential tax consequences. Portfolios may differ in terms of positions weights depending on the time of their initial investment.

EVED: Event Driven Portfolio Strategy (UNCORRELATED RETURN)

The objective of this strategy is to produce consistent absolute returns that are independent of any specific market. To achieve this objective, we attempt to exploit persistent market inefficiencies in various securities that result from events that impact the capital structure of a corporation. Such events include Initial Public offerings (IPOs), Secondary Offerings, Spin-Offs, Recapitalizations, Special Dividends, Share Repurchases, etc. This strategy relies on automated monitoring of SEC filings and news events to provide actionable trading opportunities. The portfolio is composed of core positions represented by securities held as portfolio positions for 1 month or longer, and satellite positions that are traded in a period of less than a month. This strategy employs leverage from time to time. All security types are considered however futures contracts or Credit Default Swaps are expressly excluded from the universe of securities. Unlike our traditional strategies, this strategy entails a high level of turnover and is best employed in a tax-advantaged account. This strategy also levies performance fees in addition to base fees.

You shall have the ability to impose reasonable restrictions on the management of your account, including the ability to instruct us not to purchase certain mutual funds, stocks or other securities. These restrictions may be a specific company security, industry sector, asset class, or any other restriction you request.

Under certain conditions, securities from outside accounts may be transferred into your advisory account; however, we may recommend that you sell any security if we believe that it is not suitable for the current recommended investment strategy. You are responsible for any taxable events in these instances. Certain assumptions may be made with respect to interest and inflation rates and the use of past trends and performance of the market and economy. Past performance is not indicative of future results.

If you decide to implement our recommendations, we will help you open a custodial account(s). The funds in your account will generally be held in a separate account, in your name, at an independent custodian, and not with us. We recommend using Pershing, LLC ("Pershing"), Charles Schwab & Co., Inc. ("Schwab"), and Fidelity Institutional Wealth Services ("Fidelity").

You will enter into a separate custodial agreement with the custodian which authorizes the custodian to take instructions from us regarding all investment decisions for your account. You will be notified of any purchases or sales through trade confirmations and statements that are provided by the custodian. These statements list the total value of the account, itemize all transaction activity, and list the types, amounts, and total value of securities held. You will at all times maintain full and complete ownership rights to all assets held in your account, including the right to withdraw securities or cash, proxy voting and receiving transaction confirmations.

We may also provide you with periodic performance statements. These statements give you additional feedback regarding performance, educate you about our long-term investment philosophy, and describe any changes in current strategy and allocation along with the reasons for making these changes.

We manage assets on a discretionary basis, which means you have given us the authority to determine the following with/without your consent:

- Securities to be bought or sold for your account
- Amount of securities to be bought or sold for your account
- Broker-dealer to be used for a purchase or sale of securities for your account
- Commission rates to be paid to a broker or dealer for your securities transaction.

We also manage accounts on a non-discretionary basis which means we cannot trade in your account without your express permission.

Trading may be required to meet initial allocation targets, after substantial cash deposits that require investment allocation, and/or after a request for a withdrawal that requires liquidation of a position. Additionally, your account may be rebalanced or reallocated periodically in order to reestablish the targeted percentages of your initial asset allocation. This rebalancing or reallocation will occur on the schedule we have determined together. You will be responsible for any and all tax consequences resulting from any rebalancing or reallocation of the account. We are not tax professionals and do not give tax advice. However, we will work with your tax professionals to assist you with tax planning.

Consulting

We may provide limited complementary consulting services to our asset management clients on non-investment related matters such as comprehensive financial planning, estate planning, business planning, and insurance.

We will work with you, in a consulting capacity, to create an Investment Policy Statement (IPS) that will serve as the roadmap to guide your wealth management program. Your IPS will incorporate many different aspects of your financial status into an overall plan designed to meet your goals and objectives. We will create a formal IPS and deliver it to you upon completion. We use your specific investment objectives and goals to create your customized IPS. We will create a formal IPS and deliver it to you upon completion.

We obtain information from a wide variety of publicly available sources. We do not have any inside private information about any investments that are recommended. All recommendations developed by us are based upon our professional judgment. We cannot guarantee the results of any of our recommendations. Choosing which advice to follow is your decision.

We are available during normal business hours either by telephone, fax, email, or in person by appointment to answer your questions.

Assets Under Management

As of December 31, 2015, we provided asset management services for 70 accounts, managing total assets of \$95,524,179.66; which entailed 66 discretionary accounts with assets under management of \$70,916,729.75 and 4 nondiscretionary accounts with assets under management of \$24,607,449.91.

Item 5 – Fees and Compensation

We provide asset management services for a fee.

Either party may terminate the relationship with a thirty (30) day written notice. Upon termination of any account, any prepaid fees that are in excess of the services performed will be promptly refunded to you. Any fees that are due, but have not been paid, will be billed to you and are due immediately.

Asset Management Fee Schedule

Our minimum account opening balance is \$1,000,000 with a minimum fee of \$20,000 per year. Under certain circumstances, advisory fees and account minimums may be negotiable based upon prior relationships as well as related account holdings. The fee charged is based upon the percentage of the market value of the portfolio. Multiple accounts of immediately-related family members, at the same mailing address, may be considered one consolidated account for billing purposes. Fees are charged quarterly, in advance. Payments are due and will be assessed on the first day of each quarter, based on the ending balance of the account under management for the preceding quarter and will be calculated as follows:

Percentage	Portfolio Size (AUM)
2.00%	\$0-\$1,000,000
1.50%	\$1,000,001-\$2,000,000
1.25%	\$2,000,001- \$5,000,000
1.00%	\$5,000,001-\$10,000,000
0.65%	\$10,000,001+

No increase in the annual fee shall be effective without prior written notification to you. We believe our advisory fee is reasonable considering the fees charged by other investment advisers offering similar services/programs.

Our fees will not be based upon a share of capital gains or capital appreciation of the funds or any portion of your funds.

Your account at the custodian may also be charged for certain additional assets managed for you by us but not held by the custodian (i.e. variable annuities, mutual funds, 401(k)s).

The fees we charge can be deducted directly from your account at the custodian. We will instruct the custodian to deduct the fees from your account at the end of the quarter. This fee will show up as a deduction on your next account statement from the custodian.

All recommendations developed by us are based upon our professional judgment. We cannot guarantee the results of any of our recommendations.

Third Party Fees

Our fees do not include brokerage commissions, transaction fees, and other related costs and expenses. You may incur certain charges imposed by custodians, third party investment companies and other third parties. These include fees charged by managers, custodial fees, deferred sales charges, odd-lot differentials, transfer taxes, wire transfer and electronic fund fees, and other fees and taxes on brokerage accounts and securities transactions. Mutual funds, money market funds and exchange-traded funds (ETFs) also charge internal management fees, which are disclosed in the fund's prospectus. These fees may include, but are not limited to, a management fee, upfront sales charges, and other fund expenses. Certain strategies offered by us may involve investment in mutual funds and/or ETFs. Load and no load mutual funds may pay annual distribution charges, sometimes referred to as "12(b)(1) fees". These 12(b)(1) fees come from fund assets, and thus indirectly from clients' assets. We do not receive any compensation from these fees. All of these fees are in addition to the management fee you pay us. You should review all fees charged to fully understand the total amount of fees you will pay. Services similar to those offered by us may be available elsewhere for more or less than the amounts we charge. Our brokerage practices are discussed in more detail under Item 12 – Brokerage Practices.

Item 6 – Performance Based Fee and Side by Side Management

We may charge a performance-based fee (fees based on a share of capital gains, or capital appreciation of, the assets of a client) for Qualified Clients if you elect to use the Event Driven Strategy. If the performance of your investment exceeds the equivalent of an annualized 2.00% rate (the "Hurdle Rate") at the end of each calendar quarter, we will assess a performance fee of 20% on that part of your investment return, which exceeds the Hurdle Rate.

If the value of your investment has decreased at the end of a calendar quarter, we will not charge a performance fee in respect of any subsequent increases until such increases have caused your investment to exceed its previous highest value (its "High Water Mark"). In the event that you make subsequent deposits or withdrawals, we will adjust the High Water Mark to reflect those deposits or withdrawals.

You may become our client any time throughout the calendar quarter, and we will assess and charge our performance fee, if any, at the end of that calendar quarter, with a timeframe starting from when you began the performance-based fee relationship with us. We will adjust all performance fees payable on a pro-rata basis to reflect any deposits or withdrawals made within a calendar quarter.

Although performance fees are typically payable at the end of the calendar quarter, payments can be advanced in the event that you make a withdrawal during the calendar quarter. If you decide to terminate

your performance-based fee relationship with us at any time during the calendar quarter and not at the end of the calendar quarter, we will assess and charge our performance fee, if any, at that point in time of the calendar quarter and not at the end of that calendar quarter. Though the High Water Mark may increase or decrease at any time during the remaining calendar quarter subsequent to such a termination of the performance-based fee relationship, we will not subsequently recalculate the performance fee at the end of that quarter and we will not pay any associated refund due to the possibility of the High Water Mark then increasing further and negating any such performance fee calculated prior to the end of the quarter.

We offer performance-based fee accounts to qualified clients only. Non-qualified clients have the option to utilize our asset management services that do not contain performance-based features. Qualified clients are generally defined as clients having, at least, \$1,000,000 under management of an investment adviser immediately after entering into the advisory contract, or if the adviser reasonably believes the client has a net worth of more than \$2,000,000 (excluding his/her primary residence at the time the contract is entered into). In measuring clients' assets for the calculation of performance-based fees, we shall include realized and unrealized capital gains and losses.

Performance-based fee arrangements may create an incentive for us to recommend investments which may be riskier or more speculative than those which would be recommended under a different fee arrangement. Such fee arrangements also create an incentive to favor higher fee paying accounts over other accounts in the allocation of investment opportunities. We have procedures designed and implemented to ensure that all clients are treated fairly and equally, and to prevent this conflict from influencing the allocation of investment opportunities among clients.

Item 7 – Types of Client(s)

We provide asset management services to individuals, high net worth individuals, trusts, estates, corporate pension and profit-sharing plans, charitable organizations, trusts, foundations, endowments, corporations, trusts, and small businesses.

Our minimum account opening balance is \$1,000,000 which may be negotiable based upon certain circumstances.

Item 8 – Methods of Analysis, Investment Strategies and Risk of Loss

Methods of Analysis

We use Fundamental Analysis and Technical Analysis as part of our overall investment management discipline; the implementation of these analyses as part of our investment advisory services to you may include any, all or a combination of the following:

Fundamental Analysis

Fundamental analysis is a technique that attempts to determine a security's value by focusing on the underlying factors that affect a company's actual business and its future prospects. Fundamental analysis is about using real data to evaluate a security's value. It refers to the analysis of the economic well-being of a financial entity as opposed to only its price movements.

The end goal of performing fundamental analysis is to produce a value that we can compare with the security's current price, with the aim of figuring out what sort of position to take with that security (underpriced = buy, overpriced = sell or short).

Technical Analysis

Technical Analysis is a technique that attempts to determine a security's value by developing models and trading rules based upon price and volume transformation. Technical analysis assumes that a market's price reflects all relevant information so the analysis focuses on the history of a security's trading behavior rather than external drivers such as economic, fundamental and news events. The practice of technical analysis incorporates the importance of understanding how market participants perceive and act upon relevant information rather than focusing on the information itself. Ultimately, technical analysts develop trading models and rules by evaluating factors such as market trends, market participant behaviors, supply and demand and pricing patterns and correlations.

As with other types of analysis, the predictive nature of technical analysis can vary greatly; models and rules are often modified and updated as new patterns and behaviors develop. Past performance is not an indicator of future return.

Investment Strategies

In order to perform this analysis, we use many resources, such as:

- Morningstar
- Financial newspapers and magazines (e.g. Wall Street Journal, Forbes, etc.)
- Annual reports, prospectuses, filings
- Company press releases and websites

The investment strategies we use to implement any investment advice given to you include, but are not limited to:

- Long term purchases -securities held at least a year
- Short term purchases - securities sold within a year
- Trading -securities sold within 30 days
- Short sales
- Margin Transactions
- Option writing, including covered options, uncovered options or spreading strategies

Risk of Loss

We cannot guarantee our analysis methods will yield a return. In fact, a loss of principal is always a risk. Investing in securities involves a risk of loss that you should be prepared to bear. You need to understand that investment decisions made for your account by us are subject to various market, currency, economic, political and business risks. The investment decisions we make for you will not always be profitable nor can we guarantee any level of performance.

A list of all risks associated with the strategies, products and methodology we offer are listed below:

Alternative Investment Risk

Investing in alternative investments is speculative, not suitable for all clients, and intended for experienced and sophisticated investors who are willing to bear the high economic risks of the investment, which can include:

- Loss of all or a substantial portion of the investment due to leveraging, short-selling or other speculative investment practices
- Lack of liquidity in that there may be no secondary market for the fund and none expected to develop
- Volatility of returns
- Absence of information regarding valuations and pricing
- Delays in tax reporting
- Less regulation and higher fees than mutual funds.

Bond Fund Risk

Bond funds generally have higher risks than money market funds, largely because they typically pursue strategies aimed at producing higher yields of the risks associated with bond funds include:

- Call Risk - The possibility that falling interest rates will cause a bond issuer to redeem—or call—its high-yielding bond before the bond's maturity date.
- Credit Risk — the possibility that companies or other issuers whose bonds are owned by the fund may fail to pay their debts (including the debt owed to holders of their bonds). Credit risk is less of a factor for bond funds that invest in insured bonds or U.S. Treasury bonds. By contrast, those that invest in the bonds of companies with poor credit ratings generally will be subject to higher risk.
- Interest Rate Risk — the risk that the market value of the bonds will go down when interest rates go up. Because of this, you can lose money in any bond fund, including those that invest only in insured bonds or Treasury bonds.
- Prepayment Risk — the chance that a bond will be paid off early. For example, if interest rates fall, a bond issuer may decide to pay off (or "retire") its debt and issue new bonds that pay a lower rate. When this happens, the fund may not be able to reinvest the proceeds in an investment with as high a return or yield.

Fundamental Analysis Risk

Fundamental analysis, when used in isolation, has a number of risks:

- There are an infinite number of factors that can affect the earnings of a company, and its stock price, over time. These can include economic, political and social factors, in addition to the various company statistics.
- The data used may be out of date.
- It is difficult to give appropriate weightings to the factors.
- It assumes that the analyst is competent.
- It ignores the influence of random events such as oil spills, product defects being exposed, and acts of God and so on.

Exchange Traded Fund ("ETF") Risk

Most ETFs are passively managed investment companies whose shares are purchased and sold on a securities exchange. An ETF represents a portfolio of securities designed to track a particular market segment or index. ETFs are subject to the following risks that do not apply to conventional funds:

- The market price of the ETF's shares may trade at a premium or a discount to their net asset value;
- An active trading market for an ETF's shares may not develop or be maintained; and
- There is no assurance that the requirements of the exchange necessary to maintain the listing of an ETF will continue to be met or remain unchanged

Mutual Funds Risk

The following is a list of some general risks associated with investing in mutual funds.

- Country Risk - The possibility that political events (a war, national elections), financial problems (rising inflation, government default), or natural disasters (an earthquake, a poor harvest) will weaken a country's economy and cause investments in that country to decline.
- Currency Risk -The possibility that returns could be reduced for Americans investing in foreign securities because of a rise in the value of the U.S. dollar against foreign currencies. Also called exchange-rate risk.
- Income Risk - The possibility that a fixed-income fund's dividends will decline as a result of falling overall interest rates.
- Industry Risk - The possibility that a group of stocks in a single industry will decline in price due to developments in that industry.
- Inflation Risk - The possibility that increases in the cost of living will reduce or eliminate a fund's real inflation-adjusted returns.
- Manager Risk -The possibility that an actively managed mutual fund's investment adviser will fail to execute the fund's investment strategy effectively resulting in the failure of stated objectives.

- **Market Risk** -The possibility that stock fund or bond fund prices overall will decline over short or even extended periods. Stock and bond markets tend to move in cycles, with periods when prices rise and other periods when prices fall.
- **Principal Risk** -The possibility that an investment will go down in value, or "lose money," from the original or invested amount.

Stock Fund Risk

Overall "market risk" poses the greatest potential danger for investors in stocks funds. Stock prices can fluctuate for a broad range of reasons, such as the overall strength of the economy or demand for particular products or services.

Technical Analysis risk

- Technical analysis is derived from the study of market participant behavior and its efficacy is a matter of controversy.
- Methods vary greatly and can be highly subjective; different technical analysts can sometimes make contradictory predictions from the same data.
- Models and rules can incur sufficiently high transaction costs.

Overall Risks

Clients need to remember that past performance is no guarantee of future results. All funds carry some level of risk. You may lose some or all of the money you invest, including your principal, because the securities held by a fund goes up and down in value. Dividend or interest payments may also fluctuate, or stop completely, as market conditions change.

Before you invest, be sure to read a fund's prospectus and shareholder reports to learn about its investment strategy and the potential risks. Funds with higher rates of return may take risks that are beyond your comfort level and are inconsistent with your financial goals.

While past performance does not necessarily predict future returns, it can tell you how volatile (or stable) a fund has been over a period of time. Generally, the more volatile a fund, the higher the investment risk. If you'll need your money to meet a financial goal in the near-term, you probably can't afford the risk of investing in a fund with a volatile history because you will not have enough time to ride out any declines in the stock market.

Item 9 – Disciplinary Information

Registered Investment Advisers are required to disclose all material facts regarding any legal or disciplinary events that would be material to your evaluation of us or the integrity of our management. We do not have any information to disclose concerning Quorum or any of our IARs. We adhere to high ethical standards for all IARs and associates.

Item 10 – Other Financial Industry Activities and Affiliations

The IARs of Quorum do not participate in any other business activities or have any outside affiliations at this time.

Item 11 – Code of Ethics, Participation or Interest in Client Accounts and Personal Trading

General Information

We have adopted a Code of Ethics for all supervised persons of the firm describing its high standards of business conduct, and fiduciary duty to you, our client. The Code of Ethics includes provisions relating to the confidentiality of client information, a prohibition on insider trading, a prohibition of rumor mongering, restrictions on the acceptance of significant gifts, the reporting of certain gifts and business entertainment items, and personal securities trading procedures. All of our supervised persons must acknowledge the terms of the Code of Ethics annually, or as amended.

Participation or Interest in Client Accounts

Our Compliance policies and procedures prohibit anyone associated with Quorum from having an interest in a client account or participating in the profits of a client's account without the approval of the CCO.

The following acts are prohibited:

- Employing any device, scheme or artifice to defraud
- Making any untrue statement of a material fact
- Omitting to state a material fact necessary in order to make a statement, in light of the circumstances under which it is made, not misleading
- Engaging in any fraudulent or deceitful act, practice or course of business
- Engaging in any manipulative practices

Clients and prospective clients may request a copy of the firm's Code of Ethics by contacting the CCO.

Personal Trading

We may recommend securities to you that we will purchase for our own accounts. We may trade securities in our account that we have recommended to you as long as we place our orders after your orders. This policy is meant to prevent us from benefiting as a result of transactions placed on behalf of advisory accounts.

Certain affiliated accounts may trade in the same securities with your accounts on an aggregated basis when consistent with our obligation of best execution. When trades are aggregated, all parties will share the costs in proportion to their investment. We will retain records of the trade Order (specifying each participating account) and its allocation. Completed Orders will be allocated as specified in the initial

trade order. Partially filled Orders will be allocated on a pro rata basis. Any exceptions will be explained on the Order.

We have established the following restrictions in order to ensure our fiduciary responsibilities regarding insider trading are met:

- No securities for our personal portfolio(s) shall be bought or sold where this decision is substantially derived, in whole or in part, from the role of IAR(s) of Quorum, unless the information is also available to the investing public on reasonable inquiry. In no case, shall we put our own interests ahead of yours.

Privacy Statement

We are committed to safeguarding your confidential information and hold all personal information provided to us in the strictest confidence. These records include all personal information that we collect from you or receive from other firms in connection with any of the financial services they provide. We also require other firms with whom we deal with to restrict the use of your information. Our Privacy Policy is available upon request.

Conflicts of Interest

We act in a fiduciary capacity. If a conflict of interest arises between us and you, we shall make every effort to resolve the conflict in your favor. Conflicts of interest may also arise in the allocation of investment opportunities among the accounts that we advise. We will seek to allocate investment opportunities according to what we believe is appropriate for each account. We strive to do what is equitable and in the best interests of all the accounts we advise.

Item 12 – Brokerage Practices

Factors Used to Select Custodians

In recommending a custodian/broker-dealer, we look for companies that offers relatively low transaction fees, access to desired securities, trading platforms, and support services. We may recommend clients use Pershing, Schwab, and Fidelity as the qualified custodians for their accounts when utilizing our asset management services.

Soft Dollars

Pershing, Schwab, and Fidelity may provide us with certain brokerage and research products and services that qualify as "brokerage or research services" under Section 28(e) of the Securities Exchange Act of 1934 ("Exchange Act"). These research products and/or services will assist the IARs in its investment decision making process. Such research generally will be used to service all of the IAR's clients, but brokerage commissions paid by the client may be used to pay for research that is not used in managing the client's account. The account may pay to a broker-dealer a commission greater than another qualified broker-dealer might charge to effect the same transaction where the IAR determines in good faith that the commission is reasonable in relation to the value of the brokerage and research services received.

Because soft dollar benefits could be considered to provide a benefit to the adviser that might cause the client to pay more than the lowest available commission without receiving the most benefit, they are considered a conflict of interest in recommending or directing custodial and third party managerial services. Quorum mitigates these conflicts of interest through strong oversight of soft-dollar arrangements by the Chief Compliance Officer, in order to assure the soft dollar benefits serve the best interests of the client.

There may other benefits from recommending Pershing, Schwab, and Fidelity such as software and other technology that (i) provide access to client account data (such as trade confirmations and account statements); (ii) facilitate trade execution and allocate aggregated trade orders for multiple client accounts; (iii) provide research, pricing and other market data; (iv) facilitate payment of fees from its clients' accounts; and (v) assist with back-office functions, recordkeeping and client reporting.

Other services may include, but are not limited to, performance reporting, financial planning, contact management systems, third party research, publications, access to educational conferences, roundtables and webinars, practice management resources, access to consultants and other third party service providers who provide a wide array of business related services and technology with whom Quorum may contract directly. Quorum may receive seminar expense reimbursements from product sponsors which may be based on the sales of products to their clients.

Soft dollar benefits may be proportionally allocated to any accounts that may generate different amounts of the soft dollar benefits.

Best Execution

We have an obligation to seek best execution for you. In seeking best execution, the determinative factor is not the lowest possible commission cost but whether the transaction represents the best qualitative execution, taking into consideration the full range of a broker-dealer's services, including the value of research provided, execution capability, commission rates, reputation and responsiveness. Therefore, we will seek competitive commission rates, but we may not obtain the lowest possible commission rates for account transactions.

Brokerage for Client Referrals

In selecting and/or recommending broker-dealers, we do not take into consideration whether or not we will receive client referrals from the broker-dealer or third party.

Directed Brokerage

Clients are permitted to use the custodian of their choosing. Not all advisory firms permit you to direct brokerage. If you elect to select your own broker-dealer or custodian and direct us to use them, you may pay higher or lower fees than what is available through our relationships. Generally, we will not negotiate lower rates below the rates established by the executing broker-dealer or custodian for this type of directed brokerage account, unless we believe that such rate is unfair or unreasonable for the size and type of transaction. In all instances, we will seek best execution for you.

Trading

Transactions for each client account generally will be effected independently, unless we decide to purchase or sell the same securities for several clients at approximately the same time. We may (but are not obligated to) combine or “batch” such orders to obtain best execution, to negotiate more favorable commission rates or to allocate equitably among our clients’ differences in prices and commission or other transaction costs. Under this procedure, transactions will be price-averaged and allocated among our clients in proportion to the purchase and sale orders placed for each client account on any given day.

Item 13 – Review of Accounts

Reviews

Reviews will be conducted at least annually. Reviews will be conducted by the Chief Compliance Officer. You may request more frequent reviews and may help set thresholds for triggering events that would cause a review to take place. Generally, we will monitor for changes and shifts in the economy, changes to the management and structure of an equity or company in which client assets are invested, and market shifts and corrections.

Reports

You will be provided with account statements from the Custodian reflecting the transactions occurring in your account at least quarterly. These statements may be written or electronic depending upon what you selected when you opened the account. You will be provided with confirmations for each securities transaction executed in the account. You are obligated to notify us of any discrepancies in the account(s) or any concerns you have about the account(s).

Item 14 – Client Referrals and Other Compensation

We do not receive any economic benefit from someone who is not a client for providing investment advice or other advisory services to our clients nor do we directly or indirectly pay any compensation to another person if they refer clients to us.

Item 15 – Custody

We do not have physical custody of any accounts or assets. However, we may be deemed to have custody of your account(s) if we have the ability to deduct your advisory fees from the custodian. We use Pershing, Schwab, and Fidelity as the custodians and/or broker-dealers for all your accounts. You should receive at least quarterly statements from the broker-dealer or custodian that holds and maintains your investment assets. We urge you to carefully review such statements and compare this official custodial record to the account statements that we may provide to you. Our statements may vary from custodial statements

based on accounting procedures, reporting dates, or valuation methodologies of certain securities. If you notice any discrepancies, please contact Quorum.

We send information to your custodian to ask them to debit your fees and to pay the fees to us. You authorized the custodian to pay us directly at the onset of the relationship.

Item 16 – Investment Discretion

We usually receive discretionary authority from you at the beginning of an advisory relationship to select the identity and amount of securities to be bought or sold. This information is described in the Advisory Agreement you sign with us. In all cases, however, this discretion is exercised in a manner consistent with your stated investment objectives for your account.

When selecting securities and determining amounts, we observe the investment policies, limitations and restrictions you have set. For registered investment companies, our authority to trade securities may also be limited by certain federal securities and tax laws that require diversification of investments and favor the holding of investments once made.

Prior to assuming discretionary authority, clients must execute the Advisory Agreement. Execution of the Advisory Agreement grants us the authority to determine, without obtaining specific client consent, both the amount and the type of securities to be bought and sold to help achieve the client account objectives.

Item 17 – Voting Client Securities

We shall vote proxies in accordance with our Proxy Voting Policy, a copy of which is available upon request via email at info@quorumria.com. However, the client shall maintain exclusive responsibility for all legal proceedings or other type events pertaining to the account assets, including, but not limited to, class action lawsuits. We shall monitor corporate actions of individual issuers and investment companies consistent with our fiduciary duty to vote proxies in the best interests of its clients. Although the factors which we will consider when determining how we will vote differ on a case by case basis, we may, but are not limited to, include the following: a review of recommendations from issuer management, shareholder proposals, cost effects of such proposals, effect on employees and executive and director compensation. With respect to individual issuers, we may be solicited to vote on matters including corporate governance, adoption or amendments to compensation plans (including stock options), and matters involving social issues and corporate responsibility. With respect to investment companies (e.g., mutual funds), we may be solicited to vote on matters including the approval of advisory contracts, distribution plans, and mergers. We shall maintain records pertaining to proxy voting as required pursuant to Rule 204-2 (c)(2) under the Advisers Act. Copies of Rules 206(4)-6 and 204-2(c)(2) are available upon written request. In addition, information pertaining to how we voted on any specific proxy issue is also available upon written request. If a material conflict were to occur, the Adviser will opt out of voting proxies for the client.

Item 18 – Financial Information

We are required to provide you with certain financial information or disclosures about our financial condition. We have no financial commitment that would impair our ability to meet any contractual and fiduciary commitments to you, our client. We have not been the subject of any bankruptcy proceedings.

In no event shall we charge advisory fees that are both in excess of twelve hundred dollars and more than six months in advance of advisory services rendered.
