Item 8 Methods of Analysis, Investment Strategies and Risk of Loss

Methods of Analysis –

Plan Confidence uses a proprietary scoring methodology created by Reddark Technologies, Inc. known as the “Reddark Score” to review the available investment options for each Client. The Client will then complete a questionnaire that reviews the risk tolerance, age, other available assets and other information necessary to be assigned to an **Asset Allocation Model**.

- A. Asset Allocation Model Selection** - is the implementation of an investment strategy that attempts to balance risk versus reward by adjusting the percentage of each asset in an investment portfolio according to the investor's risk tolerance, goals and investment time frame. The client will also state whether they prefer a **Strategic Asset Allocation – based on Modern Portfolio Theory**; or a **Tactical Asset Allocation – based on Momentum Investing**.

I. Strategic Asset Allocation – based on Modern Portfolio Theory

Strategic Asset Allocation - A portfolio strategy that involves setting target allocations for various asset classes, and periodically rebalancing the portfolio back to the original allocations when they deviate significantly from the initial settings due to differing returns from various assets.

Modern Portfolio Theory (MPT) is a mathematical framework for assembling a portfolio of assets such that the expected return is maximized for a given level of risk, defined as variance. Its key insight is that an asset's risk and return should not be assessed by itself, but by how it contributes to a portfolio's overall risk and return. The Strategic Asset Allocation Models will be reviewed monthly.

If the client chooses a strategic model, they will have the option of choosing which Morningstar Categories they prefer not to receive any recommendations on. Once this process has been completed, the appropriate asset allocation model will be “overlaid” over their available investment options and the final output will display the recommended percentage of each investment to use. Proxy investments will be assigned for any missing asset categories. The client will be notified when and why a proxy is being used in their recommendations.

- a. Five MPT Models
 - i. Income Only – 100% Fixed Income/Cash
 - ii. Conservative – 20% Equity & 80% Fixed Income/Cash
 - iii. Moderate – 50% Equity & 50% Fixed Income/Cash
 - iv. Balanced – 65% Equity & 35% Fixed Income/Cash
 - v. Aggressive – 100% Equity

- b. Two or more Institutional Firm Model Allocations are reviewed Quarterly (Mar, Jun, Sep & Dec)
 - i. All Morningstar “blend” categories are removed (only growth and value equity strategies will be used)
 - ii. A “consensus” or “average” of allocation categories created.

II. Tactical Asset Allocation – based on Momentum Investing

Tactical Asset Allocation (TAA) is a dynamic investment strategy that actively adjusts a portfolio's asset allocation. The goal of a TAA strategy is to improve the risk-adjusted returns of passive management investing.

Momentum Investing is a system of buying securities that have had high returns over the past three to twelve months, and selling those that have had poor returns over the same period. The Tactical Asset Allocation Models will be reviewed daily.

- a. Only S&P 500 Category used for model
- b. S&P 500 index via www.stockcharts.com
- c. (If necessary) Model Change uploaded to go “live” the following trading day at 9am CDT.

B. Investment Strategies for Future Dollars (money that has not been added to the account yet). A **Dollar Cost Averaging Methodology (DCA)** will be used. DCA is the technique of buying a fixed dollar amount of a particular investment on a regular schedule, regardless of the share price. More shares are purchased when prices are low, and fewer shares are bought when prices are high.

- a. Reviewed Monthly
- b. One to Three Morningstar Asset Classes selected - Utilize an Asset Class that is believed to remain flat or decrease in value over the next 30-60 days.

Risk of Loss – There are risks inherent in all financial decisions and transactions. PLAN CONFIDENCE CORPORATION cannot guarantee the current or future performance of investment recommendations, client accounts performance, or the success of any investment decision or strategy that PLAN CONFIDENCE CORPORATION may recommend to a client.
