Item 4 - Advisory Business

Overview of the Firm

Lofoten Asset Management Ltd (“Lofoten”, the “Firm”, “we” or “our”) is an investment adviser registered with the SEC under the Investment Advisers Act of 1940 (“Advisers Act”), as amended. The Firm was founded in September 2009 and registered with the SEC as an investment adviser in July 2016. Lofoten is based in London, United Kingdom, where it is authorised and regulated by the U.K. Financial Conduct Authority since October 2009.

The Firm is a UK Private limited company which was established under UK law. Lofoten is owned by Willem Vinke and the 9583211 International Pension Trust.

Investment Services

The Firm provides discretionary investment management and advisory services to a select number of pooled investment vehicles and separately managed accounts (the “clients”).

Lofoten does not tailor its advisory services to the individual needs of any pooled investment vehicle investor. Each vehicle is managed in accordance with the stated investment objectives, strategies, restrictions and guidelines found in the relevant confidential private placement memorandum.

Lofoten makes investments for separately managed account clients in accordance with mutually agreed upon written investment guidelines and provides continuous supervision of client portfolios. Lofoten has established procedures and controls to help ensure compliance with each client’s investment guidelines and any client-imposed restrictions.

Assets under Management

As of September 30 2018, Lofoten manages approximately \$1,625,038,937 in discretionary regulatory assets under management.

Item 5 - Fees and Compensation

Funds

Lofoten serves as the investment manager to the EI Sturdza Strategic Europe Value Fund and the EI Sturdza Strategic Global Quality Fund (the “Funds”). Fees relating to the Funds are deducted on a monthly basis in arrears, as detailed in the Confidential Private Offering Memoranda. The Firm reserves the right to negotiate fees. Some investors pay more or less than others depending on certain factors, including but not limited to, the type and size of the account.

Clients will pay other expenses in addition to the fees paid to Lofoten. For example, clients may pay costs such as brokerage commissions, transaction fees, custodial fees, transfer taxes, wire transfer fees and electronic fund fees, and other fees and taxes charged to security transactions which are unrelated to the fees collected by Lofoten.

The Funds shall bear all of its operating costs, which will include (but are not limited to) the fees to E.I. Sturdza Strategic Management Limited (the “Investment Manager”) as well as all other reasonable out-of-pocket administration expenses, including company secretarial fees, legal counsel and independent auditor, and any taxes, fees (including professional advisory

fees, regulatory fees and auditing fees) or other governmental charges levied against the Fund.

Operating and administration costs, charges and expenses also include, but are not limited to:

- Costs of all transactions carried out by it or on its behalf, including analytical expenses and other costs linked to the selection, monitoring and realisation of actual and potential investments including investment related travel expenses;
- Any taxes, fees or other charges levied against the Fund and payable to governments or agencies, including any issue or transfer taxes chargeable in connection with any securities transactions;
- Directors' meetings and remuneration (if any);
- Interest on borrowings;
- Communication expenses with respect to investor services;
- The cost of insurance (if any);
- Litigation and indemnification expenses; and
- The costs and expenses associated with the marketing and promotion of units.

Separately Managed Accounts

Separately managed account clients pay fees as agreed in the relevant investment management agreement. Clients are typically invoiced on a quarterly basis in arrears.

SMA Clients will bear their own operating expenses as set forth in the relevant IMA, including custodial fees and commissions for transactions.

For more information on the Firm's brokerage practices, please refer to Item 12 in this brochure.

Item 6 – Performance-Based Fees and Side-By-Side Management

Performance-Based Fees

Lofoten does not charge performance-based fees for investment management services to its US managed account. There are currently performance fees on its non-US managed account, Strategic Europe Value Fund and Strategic Global Quality Fund.

Side-By-Side Management

Lofoten has adopted policies and procedures to mitigate possible inherent conflicts associated with managing accounts that both charge a performance-based fee and those that charge only an asset-based management fee. Performance-based fee arrangements may create an incentive for the Firm to recommend investments which may be riskier or more speculative than those which would be recommended under a different fee arrangement. Such fee arrangements may also create an incentive to favour higher fee-paying accounts over others in the allocation of investment opportunities.

Lofoten has adopted trading and allocation policies designed to ensure that its side-by-side management of accounts with different types of fees is at all times consistent with its fiduciary responsibilities to its clients, and that no client account is favoured over another. These policies include requirements that all accounts in the same strategy generally be managed the same way, that is, the accounts generally have the same portfolio holdings and must be traded at the same time, regardless of the fee arrangement. Accounts are regularly reviewed by the

compliance department to confirm these policies are closely followed, that buy and sell opportunities are allocated fairly among client accounts.

Item 7 - Types of Clients

Lofoten provides portfolio management services to pooled investment vehicles, including acting as sub-advisor to two Dublin based UCITS funds (EI Sturdza Strategic Europe Value Fund and EI Sturdza Strategic Global Quality Fund), and separately managed accounts.

The minimum investment for each UCITS fund is €/\$1,000. The minimum initial investment for each separately managed account varies depending the terms of the agreement and is at the discretion of the Firm.

Item 8 - Methods of Analysis, Investment Strategies and Risk of Loss

EI Sturdza Strategic Europe Value Fund

Investment Strategy

In order to achieve its investment objective, the EI Sturdza Strategic Europe Value Fund will invest primarily in equities and equity related instruments (including but not limited to common stock and other securities with equity characteristics, such as preferred stocks) all of which shall be listed or traded on a Recognised Exchange. While the primary focus of the Fund shall be in relation to such equities or equity related instruments which relate to companies incorporated or whose principal operations are based in Europe, depending upon prevailing market factors the Fund may also invest in the instruments described above on a global basis to a maximum of 25% of Net Asset Value of the Fund.

The portfolio investments shall be selected from a "bottom-up" stock selection process of companies that the Firm believes to be fundamentally undervalued. The investment approach will be highly selective, focusing on corporate value based on cash flow (operating cash flow, free cash flow and earnings before interest and tax depreciation and amortization "EBITDA") and the quality of the companies' business models, rather than changes in earnings per share. Preference will be given to companies with high free cash flows, high levels of recurring revenue, franchise stocks (typically displaying low capital intensity and high return on capital) and undervalued growth companies. The Firm expects that the portfolio exposure will normally be concentrated in around 25-35 positions.

The Fund shall not invest in companies with a market capitalization below Euro 300 million at the time of purchase.

Material Risk Factors of the EI Sturdza Strategic Europe Value Fund

Investment in Equity and Equity-Related Securities

The Fund may invest in equity and equity-related securities traded on recognized stock exchanges. Equity securities will be subject to risks associated with such investments, including fluctuations in market prices, adverse issuer or market information and the fact that equity and equity-related interests are subordinate in the right of payment to other corporate securities, including debt securities. The value of these securities varies with the performance of the respective issuers and movements in the equity markets generally. As a result, the Fund may suffer losses if it invests in equity securities of issuers where performance falls below

market expectations or if equity markets in general decline or the Fund has not hedged against such a general decline. Futures and options on futures on equity securities and indices are subject to all the foregoing risks, in addition to the risks particularly associated with futures and derivative contracts.

Investors in the Fund must recognize that, due to the inherent characteristics of equity markets, the value of their investment can go down as well as up, and that they may not receive back the monies originally invested. The Fund intends to invest primarily in European markets and, therefore, there is a risk to investors by reason that the Fund is exposed to one particular economic region. In addition, the liquidity in markets can vary and it may not always be possible for the Fund to disinvest or invest in any particular market. A proportion of the Fund's assets may from time to time be held in foreign currencies and therefore at times may be affected by fluctuations of currency markets.

Concentration of Investments

If the Fund invests up to the maximum permitted under the investment restrictions described in the offering memorandum in the securities of single issuers and / or in economic sectors, this concentration and lack of diversification relative to the capital of the Fund could mean that a loss in any one such position or a downturn in a sector in which the Fund is invested could materially reduce the Fund's performance. Thus, any substantial investment by the Fund relative to overall assets in the securities of a single issuer or the concentration of the Fund's investments in a particular industry may increase the level of risk associated with an investment in the Fund.

Investment in Cash and Money Market Instruments

The Fund may invest substantially in deposits with credit institutions and/or in money market instruments. An investment in the Fund is neither insured nor guaranteed by any government, government agencies or instrumentalities or any bank guarantee fund. Shares of the Fund are not deposits or obligations of, or guaranteed or endorsed by, any bank and the amount invested in Shares may fluctuate up and/or down.

Investing in Fixed Income Securities

Investment in fixed income securities is subject to interest rate, sector, security and credit risks. Lower- rated securities will usually offer higher yields than higher-rated securities to compensate for the reduced creditworthiness and increased risk of default that these securities carry. Lower-rated securities generally tend to reflect short-term corporate and market developments to a greater extent than higher-rated securities which respond primarily to fluctuations in the general level of interest rates. There are fewer investors in lower-rated securities and it may be harder to buy and sell such securities at an optimum time. The volume of transactions effected in certain international bond markets may be appreciably below that of the world's largest markets, such as the United States. Accordingly, the Fund's investment in such markets may be less liquid and their prices may be more volatile than comparable investments in securities trading in markets with larger trading volumes. Moreover, the settlement periods in certain markets may be longer than in others which may affect portfolio liquidity.

Securities Lending Risk

As with any extensions of credit, there are risks of delay and recovery. Should the borrower of securities fail financially or default in any of its obligations under any securities lending transaction, the collateral provided in connection with such transaction will be called upon.

The value of the collateral will be maintained to equal or exceed the value of the securities transferred. However, there is a risk that the value of the collateral may fall below the value of the securities transferred. In addition, as the Fund may invest cash collateral received, subject to the conditions and within the limits laid down by the Central Bank of Ireland (“Central Bank”), the Fund investing collateral will be exposed to the risk associated with such investments, such as failure or default of the issuer of the relevant security.

Re-Investment of Cash Collateral

As cash collateral is re-invested, in accordance with the conditions imposed by the Central Bank, the Fund will be exposed to the risk of a failure or default of the issuer of the relevant security in which the cash collateral has been invested or a failure or default of a counterparty to any reverse repurchase agreement.

Key Man Risk

Insofar as the role to provide investment advice and recommendations towards the Fund has been appointed to Lofoten by E.I. Sturdza Strategic Management Limited, and decisions that lead to investment recommendations are focused with a small number of senior individuals within Lofoten. As a result, there will likely be a degree of key man risk arising from the potential loss of knowledge and expertise arising from the departure or inability to act of a key person that possesses significant subject matter, expertise and tenure to provide services towards the Fund on behalf of Lofoten. The Investment Manager therefore has adopted specific policies to address key man risk in the event that such an event arises, which may include the suspension or termination of the relevant investment advisory agreement or discussion with Lofoten regarding the potential closure or winding up of the Fund.

EI Sturdza Strategic Global Quality Fund

Risk of Loss

Investing in the capital markets involves a risk of loss that clients should be prepared to bear. This includes the possibility that your account could go down in value. Stock, bond and derivatives markets fluctuate substantially over time with changes in the economy and demand for particular products or services, which affect the NAV of the funds.

Fund investing involves risk; principal loss is possible. Investors will pay fees and expenses, even when investment returns are flat or negative. Investors cannot influence the securities bought and sold, or the timing of transactions which may result in undesirable tax consequences.

Investment Strategy

In order to achieve its investment objective, the EI Sturdza Strategic Global Quality Fund will invest directly, or indirectly through the use of financial derivative instruments, primarily in equities and equity related instruments (such as common stock and preferred stocks) on a global basis all of which shall be listed or traded on a Recognised Exchange.

The Fund may, in accordance with the requirements of the Central Bank of Ireland, invest up to 10% of its Net Asset Value primarily in ETFs (which may embed derivatives and/or leverage, although any such leverage is expected to be minimal) and other collective investment schemes that are classified as UCITS and non-UCITS open ended collective investment

schemes. Investment in an ETF or collective investment scheme that can itself invest more than 10% of its net assets in other open-ended collective investment schemes is not permitted. The Fund may also invest in non-UCITS closed-ended ETFs and collective investment schemes that are regarded as transferable securities for the purposes of the UCITS Regulations.

The Fund may purchase American Depositary Receipts and Global Depositary Receipts for liquidity purposes and where the Firm feels it is in the best interests of the Fund to do so.

The portfolio investments shall be selected from a "bottom-up" stock selection process of companies that the Firm believes to be fundamentally undervalued. The investment approach will be highly selective, focusing on corporate value based on cash flow (operating cash flow, free cash flow and earnings before interest and tax depreciation and amortization "EBITDA") and the quality of the companies' business models, rather than changes in earnings per share. Preference will be given to companies with high free cash flows, high levels of recurring revenue, franchise stocks (typically displaying low capital intensity and high return on capital) and undervalued growth companies. The Firm expects that the portfolio exposure will normally be concentrated in around 20-30 positions.

The Fund shall not invest in companies with a market capitalization below USD 1 billion at the time of purchase.

Material Risk Factors of the EI Sturdza Strategic Global Quality Fund

The material risks of investing in the Fund are similar to the Lofoten Strategic Europe Value Fund, detailed above, although the Strategic Global Quality Fund invests in securities in other jurisdictions, primarily the United States and Japan, in addition to Europe.

Item 9 - Disciplinary Information

The Firm has not been subject to any disciplinary action, whether criminal, civil or administrative (including regulatory) in any jurisdiction. Likewise, no persons involved in the management of the Firm have been subject to such action.

Item 10 - Other Financial Industry Activities and Affiliations

Lofoten and its employees are not registered, nor have an application pending to register, as a broker/dealer, commodity pool operator, or commodity trading advisor.

Neither Lofoten nor any of its management persons have any other relationship or arrangement that is material to or causes a conflict with the Firm's advisory business or to its clients.

Item 11 - Code of Ethics, Interest in Client Transactions and Personal Trading

Code of Ethics and Fiduciary Duty

We value client trust and place our fiduciary responsibilities to each client first and foremost in all aspects of our business. Lofoten has adopted a Code of Ethics (the “Code”) that complies with SEC Rule 204A-1 under the Advisers Act.

The Firm’s Code, sets forth standards of business conduct for the Firm and its employees and is based on the principle that the Firm has a fiduciary duty to act in the best interests of Lofoten’s clients.

The Code sets forth record keeping requirements and the responsibilities of the Chief Compliance Officer with respect to review of personal securities transactions, personal holdings and trading reports and monitoring compliance with the Code. The Code also outlines policies for sanctioning employees who violate the Code.

Employees must comply with U.S. federal securities laws, certify that they have read and understand the Code and report any violations of the Code to the Chief Compliance Officer.

The Firm’s Code requires all employees to acknowledge that they have read and understand the Code, and reaffirm such acknowledgment at least annually.

A copy of Lofoten’s Code of Ethics will be provided to any client or prospective client free of charge upon request. If you would like to receive a copy, please contact our Chief Compliance Officer at +44 207 952 6630 or info@lofotenam.com.

Personal Securities

Employees are required to submit to the Chief Compliance Officer an initial and annual report listing their reportable securities. Each broker with whom an employee intends to deal must be made aware of the employee’s status as an individual of the Firm who is governed by Lofoten’s internal personal account dealing (“PA dealing”) rules. A standard letter, drafted by compliance, is sent to each broker where an employee account is held. Employees must report all transactions in covered accounts on a quarterly basis. All personal securities transactions, other than those specifically exempted by the Code, are required to be pre-approved by the Chief Compliance Officer, or his delegate. Compliance will perform a reconciliation between their own records and the reported holdings to confirm that all PA dealing has been reported.

Portfolio managers are precluded from placing a deal in any security type, 24hrs either side, of the same transaction being placed for a client. Portfolio managers should not, within a reasonable time-scale, effect a transaction in the opposite direction to a client’s transaction. In addition, where an employee holds a security within one of the client accounts, the employee cannot sell this position whilst it remains in a client account.

Employees are prohibited from trading either in their personal accounts or client accounts on the basis of material non-public information.

Item 12 - Brokerage Practices

As a fiduciary, Lofoten places client’s interests first and foremost. The Firm’s trading policies and procedures prohibit unfair trading practices and seek to avoid any conflicts of interests or resolve conflicts in the client’s favour. The Firm has adopted policies and procedures to meet its fiduciary responsibilities and to ensure its trading practices are fair to all clients and that no client is advantaged or disadvantaged over any other.

Brokerage Discretion and Selection

Lofoten has the authority and discretion to determine the securities and the amounts of securities to be bought or sold for clients' accounts, subject to restrictions the clients have imposed in the relevant investment management agreements.

Lofoten does not select brokers on behalf of its clients. Trade execution is undertaken by an unaffiliated third party, CF Global, who are authorised to use brokers on its approved broker list. Lofoten is not incentivised to direct orders through CF Global. CF Global has trading desks in New York, London and Hong Kong and a significant network of over 200 brokers.

Lofoten has an execution policy and is required to take sufficient steps to obtain the best possible result on behalf of its clients when transmitting orders for execution.

Best Execution

Lofoten, as a fiduciary to its advisory clients, endeavours to seek best execution for client transactions. When determining best execution on a particular trade, Lofoten's considerations include:

- Quality of execution
- The nature and character of the relevant markets on which the transactions will be executed
- The broker's execution experience, integrity and credit-worthiness
- Operational efficiency

CF Global use specialist best-execution software and analytical services provided by third parties in order to achieve best execution based on the considerations detailed above.

Trade Allocation

Lofoten endeavours to act in a manner that it considers fair, reasonable and equitable in allocating investment opportunities among its clients. When the Firm determines that it would be appropriate and feasible for more than one client to participate in an investment opportunity, the Firm may place combined orders for all such clients simultaneously and, if the order is not filled at the same price, the Firm will average the prices paid over a particular trading day or such longer period consistent with the accumulation or disposition of a particular position. Similarly, if an order is placed on behalf of more than one client and the order cannot be fully executed under prevailing market conditions, the Firm may allocate the trade execution among different clients on a basis that the Firm deems equitable and in accordance with its allocation policy.

The Firm anticipates that the substantial majority of its trade executions will be allocated between clients in a pro-rata manner. Where the Firm determines that this pro rata allocation methodology may not be in a client's best interest e.g. due to investment restrictions or the best interests of all clients, the Firm may, in its reasonable discretion, make an adjustment to the pro-rata allocation.

Block Trading of Client Orders

Lofoten generally believes that blocking (aggregation) of client orders is prudent and necessary in order to fulfil Lofoten's fiduciary duty to obtain the most favourable terms for each client. When aggregating client orders, management's considerations include but are not limited to the following:

- No advisory account is favoured over any other account. Clients participating in an aggregated order shall receive an average share price with other transaction costs shared on a pro-rata basis.
- The Firm does not aggregate transactions unless block trading is consistent with the Firm's duty to seek best execution and the terms of the Firm's investment management agreement with each client for which trades are being aggregated.
- Before placing a blocked trade, the Portfolio Manager specifies the participating client accounts and the intended allocation among those clients.
- If the aggregated order is filled in its entirety, it is allocated among clients in accordance with the terms of the order; if the order is partially filled, it is allocated on a pro-rata basis within the same terms of the order.
- The Firm's books and records separately reflect the orders for each client account that are aggregated, as well as the securities bought and sold for and held by that account
- The Firm receives no additional compensation as a result of the proposed aggregation.

Item 13 - Review of Accounts

Account Reviews

Account reviews are performed daily by the Portfolio Manager or a designee. Additional reviews are triggered by various factors including portfolio model changes, changes in client investment objectives, account deposits and withdrawals, volatile markets or notification from the operations team that the price target for individual securities has been reached. Among other things, reviewers evaluate the composition of the portfolios relative to the relevant benchmark and review numerous risk statistics. Lofoten also compiles an internal daily information package which includes a matrix of holdings and values per account across strategies and attribution analysis to conduct holdings based and returns based analysis at the security level.

Lofoten also performs reconciliations of its records of the securities and cash within its client's accounts against the records of the custodians who actually hold the securities and cash. These reconciliations are performed by Lofoten's operations personnel. At a minimum, positions and cash are reconciled on a monthly basis. To the extent any discrepancies are identified through the performance of these reconciliations, our operations personnel will work with both our internal team and the custodian to resolve any such discrepancies. The statements and records of the custodian are the official books and records for the account.

Client Reporting

Lofoten's fund administrator generally provides fund clients with reports not less frequently than quarterly. Client reports include a portfolio appraisal, reconciliation against custodian, and performance returns. Additional or different information will be provided to clients as agreed by Lofoten and the client.

Each custodian is required to provide each separately managed account client with at least quarterly account statements relating to the assets held within the account managed by

Lofoten. Each client should carefully review the qualified custodian's statement upon receipt to determine that it completely and accurately states all holdings in the client's account and all account activity over the relevant period.

In addition to the account statements provided by administrators and custodians to our clients, Lofoten also provides account appraisal reporting to clients on a monthly or quarterly basis. As such, we encourage clients to compare the statements provided to them by Lofoten against those provided to them by the custodians who hold the assets of their accounts, and to report any questions, concerns, or discrepancies to both Lofoten and the custodian promptly. Such questions, concerns, or discrepancies may be communicated to Lofoten by contacting us at the contact information listed on the cover sheet.

Our reporting may vary from custodial statements based on accounting methods, reporting dates, and/or valuation methodologies of certain securities. However, custodian statements reflect the official books and records for the accounts we manage.

In addition to reports tailored to clients, Lofoten issues a variety of general circulation materials for clients and consultants about its investments and investment processes.

Item 14 - Client Referrals and Other Compensation

Lofoten does not have any active third-party marketer arrangements in place. The Firm continues to compensate a legacy agreement in place.

Item 15 – Custody

Lofoten does not accept custody with respect to its separately managed accounts and as an offshore manager to offshore funds, Lofoten is not deemed to have custody of certain fund assets under SEC Rule 206(4)-2.

Item 16 – Investment Discretion

Lofoten is authorized to act on behalf of the client, in such form as may be required by various brokerage firms, banks etc. Lofoten obtains discretionary investment authority from the client through the execution of an 'investment management agreement' at the outset of the advisory relationship. Discretion is exercised in a manner consistent with stated investment objectives for the particular client account pursuant to the fiduciary duty and standard of care that we must discharge.

Throughout the portfolio management process, Lofoten observes the investment policies and limitations imposed by each client.

Item 17 - Voting Considerations

The Firm considers it to be of paramount importance when assessing proxy voting responsibilities on behalf of its clients to recognize the fiduciary responsibility it assumes in acting as investment adviser. The Firm also recognizes the need to exercise its proxy voting obligations with a view of enhancing its clients' long-term investment values. To help achieve

its objectives, it is Lofoten's policy, subject to the considerations described below, to use its best efforts to vote proxies arising on all shares held on behalf of its clients.

Generally, all proxies are evaluated and voted on a case-by-case basis, considering each of the relevant factors set forth above. The Firm, in all cases, will vote for any proposals that we believe will be most advantageous to our clients.

There may be times in which conflicts may arise between the interest of the client and the interest of the Firm. The Firm will always strive to address such conflicts in the best interests of the client. If a perceived material conflict of interest arises in connection with a proxy vote, Lofoten may resolve such perceived material conflicts of interest as follows:

- The Firm may delegate the voting decision for such proxy proposal to an independent third party;
- The Firm may delegate the voting decision to an independent committee of partners, members, directors or other representatives of the client, as applicable;
- The Firm may inform the investors or account of the conflict of interest and obtain consent to (majority consent, in the case of a fund) vote the proxy as recommended by the Firm; or
- The Firm may obtain approval of the decision from Lofoten's Chief Compliance Officer.

If an independent third party or a committee is utilised in making a decision to vote on a proxy, the Firm will submit the proxy to such third party or committee for a decision. The Firm will execute the proxy in accordance with such third party or committee's decision and update Lofoten's proxy recordkeeping.

The Firm does not take positions outside of the portfolios it manages and therefore does not anticipate a situation where there would be a conflict between maximizing long-term investment returns for clients and the interests of the Firm

Upon request, Lofoten will provide investors and separately managed account clients with a copy of the proxy voting policies and a record of all proxy votes cast on behalf of the relevant client.

Item 18 – Financial Information

Lofoten has no financial commitment that impairs its ability to meet contractual and fiduciary commitments to clients, and has not been the subject of a bankruptcy proceeding.

Item 19 – Privacy

Lofoten is committed to maintaining the confidentiality, integrity, and security of our current and prospective clients' non-public personal information and adheres to high standards in order to safeguard such information. As part of this commitment, we have adopted the

following privacy policy concerning the collection, disclosure, maintenance and disposal of our clients' non-public personal information.

Collection of Information

As your investment adviser, Lofoten collects non-public information from you such as:

- Information we receive from you or in applications or other forms, correspondence, or conversations, including, but not limited to, your name, address, phone number, social security number, date of birth, annual income, net worth, and investment history.
- Information about your transactions with us or others, including but not limited to your account number and balance, payment history, parties to transactions, cost basis information, and other financial information.

Disclosure of Information

We will not disclose non-public personal information about you to anyone, except as necessary to carry out transactions you have requested or authorized in connection with our provision of services to you, as required by law, or with your expressed consent. We may disclose information about you to the following types of non-affiliated third parties:

- authorized securities brokers, financial institutions or custodians;
- persons acting in a fiduciary or representative capacity on your behalf;
- attorneys and accountants;
- law enforcement agencies or computer security providers for the purpose of protecting against fraud and unauthorized transactions or in order to maintain the confidentiality of our records; and
- Government agencies, self-regulatory organizations, industry associations and similar bodies in order to fulfil requests, investigations, legal and regulatory requirements.
