Item 4 Advisory Business

A. Description of Advisor Firm.

TrueRisk Capital Management LLC is a Limited Liability Company that was formed in May 2017 and is requesting registration as an investment advisor with the Securities and Exchange Commission ("SEC"). The parent company of the firm is TrueRisk Labs Inc. and David Wilson is the majority shareholder of TrueRisk Labs Inc. For a more complete description of our services, see Item 4B.

B. Description of Advisory Services Offered

TrueRisk Capital Management LLC ("TrueRisk" or "Advisor") has created a proprietary technology platform to provide non-discretionary portfolio construction, analytics and investment discovery and recommendation tools to visitors ("Clients") using its web site located at www.trueriskcapital.com.

Clients normally begin by creating a risk profile which is a quantitative mathematical function representing their risk tolerance, constructed via a sophisticated series of risk/reward decisions. The algorithm begins with the Client's stated investment amount, and bases each question on the combination of preceding answers to pinpoint that Client's risk tolerance to within a reasonable margin of error.

Based on the outcome of the risk profile the client selects the corresponding investment strategy, namely, Turing, Shannon, McCarthy and Neumann. The Turing Strategy is our aggressive long/short equity strategy for long-term capitalization. The Shannon Strategy is a long only, moderate equity strategy for long-term capitalization. The McCarthy Strategy is a long/short portfolio suitable for conservative investors looking for a market neutral investment strategy. The Neumann strategy is a long/short portfolio appropriate for moderate investors. These strategies are sophisticated proprietary algorithms to predict security performance, increase diversification and constrain portfolio risk to the Client's personal risk profile. Each strategy offers varying degrees of risk tolerance to meet the Client's personal risk profile.

At no time are any of the product's calculations or services based on subjective information about a particular security, but rather on a Client's inputs, as well as market data about the historical return and volatility of securities, provided by third party vendors. The securities that will be included in a Client's portfolio include Exchange Traded Funds (ETFs).

Once a Client's investment strategy is selected, they make the determination if they want to implement the investment strategy within the portfolio. If the Client elects to implement the investment strategy, the Client will then open an account with Interactive Brokers an unaffiliated broker dealer firm named on TrueRisk's site. The Client is under no obligation to implement any recommendation as provided and if a Client does implement these recommendations, they will have the sole power to determine when to implement them. TrueRisk does not implement any investment recommendations on behalf of Clients nor will it provide portfolio management services to Clients. TrueRisk will also not provide securities custodial or other administrative services for Clients.

TrueRisk does provide the name of Interactive Brokers, an unaffiliated broker dealer on its site for Clients to consider and use as they deem appropriate for their individual needs. At no time does TrueRisk claim to endorse, analyze or recommend any broker dealer who is included within its site.

TrueRisk strongly recommends that users of this tool should not make any investment decision without consulting your personal financial advisor, and conducting your own research, including the careful review of annual reports, quarterly reports, and other public filings of the issuer. Further, Clients who use this site are strongly encouraged to conduct their own research into any broker dealer named on the site, including but not limited to consulting with independent tax, legal or financial adviser as necessary.

C. Clients Tailored Services and Client Imposed Restrictions

The TrueRisk web site is designed to allow each Client who decides to use its site to include their individual risk tolerance to determine their own investment portfolio based upon their individual needs. TrueRisk helps the Client to design such a portfolio by providing the Internet tools for this purpose.

D. Wrap Fee Programs

TrueRisk does not provide portfolio management services to wrap fee programs.

E. Assets Under Management

TrueRisk does not manage Client assets, therefore does not have assets under management.

Item 5 Fees and Compensation

A. & B. Method of Compensation and Fee Schedule and Client Payment of Fees

Clients who use our site, before the investment strategy is deployed will complete the account opening paperwork with the custodian, Interactive Brokers, to establish the Client account. The Client account will be charged a quarterly fee, in advance, based on the investment strategy they have selected. The annual fee for each investment strategy is as follows:

Investment Strategy	Annual Fee
Shannon Strategy	1.25%
McCarthy Strategy*	2.00%
Neumann Strategy*	2.00%
Turing Strategy*	2.00%

**These strategies are also charged a performance fee as outlined in Item 6.*

Clients who use this site are strongly encouraged to conduct their own research into any broker dealer, including but not limited to consulting with independent tax, legal or financial adviser as necessary.

Our advisory fee will be automatically deducted from the Client account on a quarterly basis by the qualified custodian, Interactive Brokers. The Client will give written authorization permitting the Advisor to be paid directly from their account held by the custodian. The custodian will send a quarterly statement to the Client outlining the fee calculation and the amount withdrawn from the Client account

C. Additional Client Fees Charged

Clients should be aware that by utilizing the services of any third parties mentioned on our site, Client may incur brokerage commissions, account opening fees, transaction fees, custodian fees, investment adviser fees and other related costs and expenses that will be incurred directly by the Client and billed directly to the Client's account.

D. Prepayment of Client Fees

TrueRisk's management fee is payable in advance. Upon termination, any fees paid in advance will be prorated to the date of termination and any excess will be refunded to the Client.

E. External Compensation for the Sale of Securities to Clients

TrueRisk does not accept compensation for the sale of securities. Our only compensation for this Internet service is as described in Item 5A&B and Item 6.

Item 6 Performance-Based Fees and Side-by-Side Management

Clients who select the McCarthy, Neumann and/or Turing strategy will be charged an advisory fee and a performance fee. Those Clients are Qualified clients, as defined by Rule 205-3 of the Investment Adviser's Act. Qualified clients must meet the following requirements: (a) have at least \$1,000,000 invested with the adviser; or (b) have a net worth (together with assets held jointly with a spouse) of more than \$2,100,000 (excluding the person's primary residence) at the time the Client elects to invest in any of the above mentioned strategies. Suitability will be determined through due diligence inquiries and a questionnaire determined to be appropriate in the circumstances by TrueRisk. The custodian, Interactive Brokers, will also perform due diligence inquiries to confirm the Client meets the Qualified client requirements. TrueRisk, at its sole discretion, may reject any Client application where the above financial standards are not met and/or where it reasonably believes the investor lacks the necessary financial sophistication, who purport to not fully understand TrueRisk's method of compensation and the nature of its risks, or who are otherwise deemed to be unsuitable for such an arrangement.

TrueRisk will receive a Performance Fee based upon any gains obtained in the Client's account for the calendar year. The Performance Fee will be subject to a "high water mark" to ensure that the firm will not receive the Performance Fee unless, and only to the extent that, there are cumulative gains in the Client's account during the calendar year. The Performance Fee will be 20%.

There is an inherent conflict of interest when a firm charges performance-based fees to some accounts and advisory fees based on a percentage of assets under management to other accounts, in that an advisor is incented to favor the accounts from which it will earn higher compensation. To mitigate this conflict, the firm provides its advisory services to all Client accounts, including those Clients who are not charged a performance fee. These services include evaluation of investor suitability and adhering to the investor risk profile when recommending an investment strategy and Client communications that are the same for all Clients. In addition, the firm maintains trading policies and a Code of Ethics that are intended to deliver consistency, that no one Client is favored over another.

Another conflict of interest concerning accounts with performance-based fees is that the Advisor is incented to use higher risk investments than called for by the Client risk profile. Such investments may generate higher returns, which in turn would generate higher performance-based fees for the Advisor. TrueRisk has a fiduciary obligation to its Clients to put the interest of their Clients first over and above the interest of the firm and its supervised persons. In addition, TrueRisk attempts to further mitigate this conflict by maintaining suitability and employing trading policies and procedures designed to assist the Advisor in further meeting its fiduciary obligations to adhere to the Clients agreed upon risk profile.

Item 7 Types of Clients and Minimum Account Size

TrueRisk does not individually advise Clients. Therefore, it does not have a minimum account size.

Prior to receiving personalized investment recommendations from TrueRisk, individuals are required to open a user account. To open a user account, a prospective Client is required to provide TrueRisk with:

- Identifying information (name, email address and password);
- The amount of money the Client has to invest;
- Agreement to TrueRisk's terms of service; and
- Agreement to TrueRisk's privacy policy and access to this Brochure

Some of TrueRisk's informational services are accessible prior to registering an account, to allow prospective Clients to understand the service prior to opening a user account. Such services do not involve the provision of investment advice.

The Advisor requires that Clients who invest in the McCarthy, Neumann or Turing strategies be aware that they will be charged an advisory fee and a performance fee as outlined in Item 6. These Clients will be qualified Clients by investing either \$1,000,000 in the strategy or that they have a net worth of more than \$2.1 million.

Item 8 Methods of Analysis, Investment Strategies and Risk of Loss

A. Methods of Analysis and Investment Strategies

As described in Item 4B above, TrueRisk formulates and provides Clients with investment advice via its web site. After capturing a Client's personal risk tolerance, the service provides the Client with an investment strategy to match their own risk tolerance.

Our investment strategies are created as a culmination of years of research and development by quantitative analysts, academics and portfolio managers developed by our parent company, TrueRisk Labs Inc.

This technology uses proprietary artificial neural networks that are at the core of the predictive analytics engine. This allows us to provide our Clients with unique insights into how financial markets are expected to move in three month, six month and one year time horizons. It is an artificial intelligence ("AI") that consumes and analyzes vast tracts of data in a way no human analyst could, and without the handicapping factor of human emotion entering into predictive risk/return analytics. Advanced quantitative fundamental analysis models to categorize stocks on the basis of growth expectations and valuation, as determined by a company's financial statements. Core fundamental indicators such as return on assets, return on equity, enterprise value to earnings before interest, taxes and amortization (EBITA), price to earnings ratio, and free cash flow are considered to reveal which companies are deeply discounted and poised for growth.

These strategies also implement a robust quantitative risk mitigation strategy that revolves around diversification. Dynamic position sizing, pyramiding, and profit booking extract the maximum profit out of a move while considering levels of volatility and portfolio risk.

Our predictive analytics system is driven by adaptive, machine learning algorithms that analyze the behavior of retail investors, institutional analysts, historical pricing patterns in quantitative, fundamental and crowd-sourced data sets to generate expected risk, return and growth metrics.

The investment strategies that TrueRisk will suggest to Clients will include long term purchases of securities held at least for one year; short term purchases for securities sold within a year; trading of securities sold within 30 days, short sales, and margin transactions.

Clients need to be aware that investing in securities involves risk of loss that clients need to be prepared to bear. Clients are strongly encouraged to conduct their own analysis of the recommendations generated by TrueRisk's proprietary technology.

B. Investment Strategy and Method of Analysis Material Risks

During our research phase described in 8A, we utilize Fundamental, Technical and Cyclical analysis as a part of our process. Fundamental analysis of businesses involves analyzing its financial statements and health, its management and competitive advantages and its competitors and markets. Fundamental analysis is performed on historical and present data but with the goal of making financial forecasts. There are several possible objectives; to conduct a company stock valuation and predict its probable price evolution; to make a projection on its business performance; to evaluate its management and make internal business decisions and to calculate

its credit risk. The risk assumed is that the market will fail to reach expectations of perceived value.

Technical analysis is a method of evaluating securities by relying on the assumption that market data, such as charts of price, volume and open interest can help predict future (usually short-term) market trends. Technical analysis assumes that market psychology influences trading in a way that enables predicting when a stock will rise or fall. The risk is that markets do not always follow patterns and relying solely on this method may not work long term.

Cyclical analysis of economic cycles is used to determine how these cycles affect the returns of an investment, an asset class or an individual company's profits. Cyclical risks exist because the broad economy has been shown to move in cycles, from periods of peak performance followed by a downturn, then a trough of low activity. Between the peak and trough of a business or other economic cycle, investments may fall in value to reflect the uncertainty surrounding future returns as compared with the recent past. The risks with this strategy are two-fold 1) the markets do not always repeat cyclical patterns and 2) if too many investors begin to implement this strategy, it changes the very cycles they are trying to take advantage of.

C. Security Specific Material Risks

Every type of investment involves risk. Risk refers to the possibility that you will lose money (both principal and any earnings) or fail to make money on an investment.

Generally speaking, risk and potential return are related. This is the risk/return trade-off. Higher risks are usually taken with the expectation of higher returns at the cost of increased volatility. While an investment with higher risk has the potential for higher return, it also has the greater potential for losses or negative returns. The school of thought when investing suggests that the longer your investment time horizon is the less affected you should be by short-term volatility. Therefore, the shorter your investment time horizon, the more concerned you should be with short-term volatility and higher risk.

TrueRisk will utilize Exchange Traded Funds (ETFs) within the investment strategies. Here are some of the risks of investing in ETFs and with investing, in general.

Exchange-Traded Funds (ETFs). ETFs are typically investment companies that are legally classified as open end mutual funds or UITs. However, they differ from traditional mutual funds, in particular, in that ETF shares are listed on a securities exchange. Shares can be bought and sold throughout the trading day like shares of other publicly-traded companies. ETF shares may trade at a discount or premium to their net asset value. This difference between the bid price and the ask price is often referred to as the "spread." The spread varies over time based on the ETF's trading volume and market liquidity, and is generally lower if the ETF has a lot of trading volume and market liquidity and higher if the ETF has little trading volume and market liquidity. Although many ETFs are registered as an investment company under the Investment Company Act of 1940 like traditional mutual funds, some ETFs, in particular those that invest in commodities, are not registered as an investment company.

Margin Accounts. Client should be aware that margin borrowing involves additional risks. Margin borrowing will result in increased gain if the value of the securities in the account go up, but will result in increased losses if the value of the securities in the account goes down. The custodian, acting as the client's creditor, will have the authority to liquidate all or part of the account to repay any portion of the margin loan, even if the timing would be disadvantageous to the client. For performance illustration purposes, the margin interest charge will be treated as a withdrawal and will, therefore, not negatively impact the performance figures reflected on the quarterly advisory reports.

Short Selling Risk

Short selling is highly risky. Short selling stocks may generate unlimited losses while the upside is capped, as the price of a stock can in theory rise infinitely but cannot drop below zero. Over the long term, stock prices overall tend to rise rather than fall. As a result, short selling is against the overall direction of the market. Shorting stocks also involves using borrowed money, which creates leverage risk. This strategy is also subject to the risk of inaccurate timing. Even if the price of a stock falls substantially eventually, the price could rise in the near term, leading to losses for the short sellers.

It is important to note that no methodology or investment strategy is guaranteed to be successful or profitable. Investing in securities involves the risk of loss that clients should be prepared to bear.

Item 9 Disciplinary Information

Clients should be aware that neither TrueRisk nor its management person has had any legal or disciplinary events, currently or in the past.

Item 10 Other Financial Industry Activities and Affiliations

A. Broker-Dealer or Representative Registration

TrueRisk is not a broker-dealer nor is its management person a registered representative of a broker-dealer.

B. Futures or Commodity Registration

Neither TrueRisk nor its management person are registered, or have an application pending as a futures commission merchant, commodity pool operator, or a commodity trading advisor, or as an associated person of the foregoing entities.

C. Material Relationships Maintained by this Advisory Business and Conflicts of Interest

David Wilson, is the majority shareholder of TrueRisk Labs Inc., the parent company of TrueRisk Capital Management, LLC. TrueRisk Labs Inc. will provide research and consulting services online to TrueRisk Capital Management LLC and other entities that may elect to utilize its services. Advisory Clients of TrueRisk Capital Management LLC are not solicited for the services of TrueRisk Labs Inc., however advisory Clients need to be aware that as a result of his

ownership interest in both entities, Mr. Wilson will receive compensation for services performed through each entity. He spends approximately 25% of his time on activities related to TrueRisk Labs Inc.

D. Recommendation or Selection of Other Investment Advisers and Conflicts of Interest

TrueRisk does not recommend or select other investment advisers for clients. Therefore, this question is not applicable.

Item 11 Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

A. Code of Ethics Description

TrueRisk is registering with the SEC and maintains a Code of Ethics pursuant to SEC rule 204A-1. TrueRisk has adopted a Code of Ethics that sets forth the basic policies of ethical conduct for all managers, officers, and employees of the adviser. In addition, the Code of Ethics governs personal trading by each employee of TrueRisk deemed to be an Access Person and is intended to ensure that securities transactions effected by Access Persons of TrueRisk are conducted in a manner that avoids any conflict of interest between such persons and clients of the adviser or its affiliates. TrueRisk collects and maintains records of securities holdings and securities transactions effected by Access Persons. These records are reviewed to identify and resolve conflicts of interest. TrueRisk maintains a code of ethics, which is available upon request to dwilson@trueriskcapital.com.

B. Investment Recommendations Involving a Material Financial Interest and Conflicts of Interest

Neither TrueRisk nor its related person recommend to individual Clients or buys or sells for Client accounts, securities in which TrueRisk has a direct material financial interest. TrueRisk does not have investment authority to purchase any securities on behalf of Clients. Once a recommendation has been generated by the Client by utilizing the Internet service offered by TrueRisk, it is in the sole discretion of the Client whether or not to engage the services of a broker for the execution of such portfolio. However, TrueRisk related person may purchase securities for his own accounts which may, in certain instances, be the same securities as those recommended to Clients. As previously stated, TrueRisk has implemented a Code of Ethics to ensure the ethical conduct of its Access Persons, which is available upon request to dwilson@trueriskcapital.com.

C. Advisory Firm Purchase of Same Securities Recommended to Clients and Conflicts of Interest

As previously stated above, TrueRisk does not buy securities for its own account so no conflict exists at the firm level.

Access Persons may own securities which are also owned by Clients. TrueRisk requires that its Access Persons follow its basic policies and ethical standards as set forth in its Code of Ethics.

TrueRisk has adopted a Code of Ethics that sets forth the basic policies of ethical conduct for all managers, officers, and employees of the adviser. In addition, the Code of Ethics governs personal trading by each employee of TrueRisk deemed to be an Access Person and is intended to ensure that securities transactions effected by Access Persons of TrueRisk are conducted in a manner that avoids any conflict of interest between such persons and Clients of the adviser or its affiliates. TrueRisk collects and maintains records of securities holdings and securities transactions effected by Access Persons. These records are reviewed to identify and resolve conflicts of interest.

D. Client Securities Recommendations or Trades and Concurrent Advisory Firm Securities Transactions and Conflicts of Interest

See the response to Item 11C above.

Item 12 Brokerage Practices

A. Factors Used to Select Broker-Dealers for Client Transactions

As previous stated, a Client visiting our site who chooses to invest in the recommended investment strategy, must open an account with Interactive Brokers an unaffiliated broker dealer firm named on the site. The inclusion of the broker dealer's name on the site should not be construed by the Client as a recommendation or endorsement of that particular broker dealer by TrueRisk to the Client. Further, Client's should be aware that TrueRisk has not performed any review, analysis or comparison of broker dealers that are named on the site. **Clients are strongly encouraged to research the named broker dealer and the services they provide prior to engaging their services.**

Research and Other Soft Dollar Benefits.

TrueRisk does not receive research or other products or services from a broker dealer or any third party.

Brokerage for Client Referrals.

TrueRisk does not have Clients, therefore does not receive Client referrals from any broker dealer or third party as a result of the firm naming that broker dealer on its web site.

If the firm permits a client to direct brokerage, describe your practice.

Not applicable to TrueRisk.

B. Aggregating Securities Transactions for Client Accounts

TrueRisk does not execute Client transactions. Therefore, aggregating securities transactions is not applicable to the firm.

Item 13 Review of Accounts

A. Indicate whether your firm periodically reviews client accounts or financial plans. If you do, describe the frequency and nature of the review and the titles of the supervised persons who conduct the review.

TrueRisk does not have Client accounts nor does it prepare financial plans. Therefore, TrueRisk does not have any Client accounts to review. This question is not applicable to the firm.

B. If the firm reviews client accounts on other than a periodic basis, describe the factors that trigger a review.

As stated above, TrueRisk does not have Client accounts. Therefore, this question is not applicable to the firm.

C. Describe the content and indicate the frequency of regular reports the firm provides to clients regarding their accounts. State whether these reports are written.

TrueRisk does not have Client accounts and therefore does not provide any written reports to Clients who select to utilize its web site.

Clients who utilize the site will be provided with log in credentials to access the site of Interactive Brokers for automated monthly performance reports, as well as other services, should they choose to do so. Clients will not be charged for this monthly performance report.

Item 14 Client Referrals and Other Compensation

A. Economic Benefits Provided to the Advisory Firm From External Sources and Conflicts of Interest

TrueRisk does not have any other arrangements in place whereby it receives any economic benefits from external sources.

B. Advisory Firm Payments for Client Referrals

TrueRisk does not currently have any such arrangements.

Item 15 Custody

TrueRisk does not have custody of Client assets. Therefore, this question is not applicable.

Item 16 Investment Discretion

TrueRisk does not have discretionary authority over Client accounts.

Item 17 Voting Client Securities

TrueRisk does not have Clients and therefore does not vote proxies on behalf of Clients. TrueRisk does not have the authority to vote Client securities.

Item 18 Financial Information

A. Balance Sheet

TrueRisk does not require or solicit prepayment of more than \$1,200 in fees per client, six months or more in advance. Therefore, a balance sheet is not included with this Brochure.

B. Financial Conditions Reasonably Likely to Impair Advisory Firm's Ability to Meet Commitments to Clients

TrueRisk is not currently aware of any financial condition that is reasonably likely to impair its ability to meet contractual commitments to its Clients.

C. Bankruptcy Petitions During the Past Ten Years

Neither TrueRisk nor its management person have been the subject of a bankruptcy petition.

Privacy Policy

TrueRisk Capital Management LLC

Effective: November 13, 2017

Our Commitment to You

TrueRisk Capital Management LLC ("TrueRisk") is committed to safeguarding the use of your personal information that we have as your Investment Advisor. TrueRisk (referred to as "we", "our" and "us" throughout this notice) protects the security and confidentiality of the personal information we have and make efforts to ensure that such information is used for proper business purposes in connection with servicing your account. Our relationship with you is our most important asset. We understand that you have entrusted us with your private information, and we do everything we can to maintain that trust.

We do not sell your non-public personal information to anyone. Nor does Truerisk provide such information to others except for discrete and proper business purposes in connection with the servicing of your account as discussed below.

Details of our approach to privacy and how your personal non-public information is collected and used are set forth in this privacy policy.

The Information We Collect About You

You typically provide personal information when you electronically sign up for an account on our website. This information may include the following:

Social security or taxpayer identification number	Date of Birth
Name, address and phone number(s)	Assets and liabilities
Email address(es)	Income and expenses
Account information (including other institutions)	Investment activity
	Investment experience and goals

In addition, we may collect non-public information about you from the following sources:

- Information we receive on Brokerage Agreements, Managed Account Agreements and other Subscription and Account Opening Documents;
- Information we receive in the course of establishing a customer relationship including, but not limited to, applications, forms, investment questionnaires;
- Information about your transactions with us or others

Information about You That Antigravity Investments Shares

TrueRisk works to provide products and services that benefit our customers. We may share non-public personal information with non-affiliated third parties (such as brokers and custodians) as necessary for us to provide agreed services and products to you consistent with applicable law. We may also disclose non-public personal information to other financial institutions with whom we have joint business arrangements for proper business purposes in connection with the management or servicing of your account. In addition, your non-public personal information may also be disclosed to you, persons we believe to be your authorized agent or representative, regulators in order to satisfy TrueRisk's regulatory obligations, and is otherwise required or permitted by law. Lastly, we may disclose your non-public personal information to companies we hire to help administrate our business. Companies we hire to provide services of this kind are not allowed to use your personal information for their own purposes and are contractually obligated to maintain strict confidentiality. We limit their use of your personal information to the performance of the specific service we have requested.

To repeat, we do not sell your non-public personal information to anyone.

Information about Former Clients

TrueRisk does not disclose, and does not intend to disclose, non-public personal information to non-affiliated third parties with respect to persons who are no longer our clients.

Confidentiality and Security

Our employees are advised about the firm's need to respect the confidentiality of our customers' non-public personal information. Additionally, we maintain physical, procedural and electronic safeguards in an effort to protect the information from access by unauthorized parties.

We'll keep you informed

We will publish notice of our privacy policy on our website for as long as you maintain an ongoing relationship with us. Periodically we may revise our privacy policy, and will update our website with a revised policy if the changes materially alter the previous privacy policy. We will

not, however, revise our privacy policy to permit the sharing of non-public personal information other than as described in this notice. You may obtain a copy of our current privacy policy by contacting us at (203) 858-5149.
