Item 4. Advisory Business

Eurizon SLJ Capital Limited (“Eurizon” or the “Firm”) is an asset management company based in London, United Kingdom. The firm was established in July 2016 as a joint venture between Eurizon Capital SGR S.p.A. (65% stake) and two individuals, Stephen Li Jen and Fatih Yilmaz (35% stake). Eurizon Capital SGR S.p.A. is an investment adviser based in Milan, Italy, and is a subsidiary of Intesa Sanpaolo SpA, an Italian banking group. Mr. Jen and Mr. Yilmaz are founding partners of SLJ Macro Partners, a London-based asset manager whose operations were incorporated into Eurizon. Mr. Jen serves as Eurizon’s Chief Executive Officer and Co-Chief Investment Officer and Mr. Yilmaz serves as Co-Chief Investment Officer. Both are also Eurizon Board members.

Eurizon provides discretionary investment management services to private funds and separately managed account clients with a particular focus on currency management and macro research. The Firm uses macroeconomic and cyclical analysis models as the basis of its investment perspective and top-down, medium term tactical decisions (asset, country and asset allocation). This approach is supported by fundamental analysis on listed companies as well as the development and implementation of quantitative models. Eurizon is authorized and regulated by the UK Financial Conduct Authority and only provides services to professional and institutional clients.

As of February 28, 2018, Eurizon managed approximately \$505,914,029 of assets under management on a discretionary basis. The firm does not manage any assets on a non-discretionary basis.

Item 5. Fees and Compensation

The Firm currently advises UCITS sub funds (the “Funds”). Each of the Funds has a management fee and a performance fee component, the specifics of which vary based on the share class of the Funds and are fully described in applicable governing and offering documents for each of the Funds.

Eurizon also provides advisory services to separately managed accounts. These clients are also typically charged a management fee and a performance fee. The fees are subject to negotiation and are fully described in the respective investment management agreement for each account.

Certain employees of Eurizon and its affiliates may have investments in the Funds and pay management and performance fees.

Item 6. Performance Based Fees and Side-by-Side Management

As noted in Item 5 above, the Funds and separately managed accounts are charged performance based fees. These performance fees could potentially incentivize Eurizon to make riskier investments than would be the case in the absence of such fees. The Firm has a well-defined investment process designed to minimize this potential conflict.

Since Eurizon manages client accounts with different compensation structures on a side-by-side basis, the Firm has a potential conflict and incentive to favor certain higher fee-paying accounts over lower fee-paying accounts. Eurizon believes that the nature of its investment strategy and its well-defined investment process minimize this potential conflict. In addition, the Firm has adopted allocation policies and procedures designed to minimize potential side-by-side management conflicts.

Item 7. Types of Clients

As described above, Eurizon provides discretionary investment advisory services to the Funds and to separately managed accounts.

For the managed accounts, the firm reserves the right to waive the minimum initial investment amount as well as the subsequent minimum increments.

Separately managed account clients are typically limited to institutions and other professional investors.

Item 8. Methods of Analysis, Investment Strategies and Risk of Loss

Methods of Analysis and Investment Strategies

Eurizon provides discretionary investment management services to private funds and separately managed account clients with a particular focus on currency management and macro research. The Firm uses macroeconomic and cyclical analysis models as the basis of its investment perspective and top-down, medium-term tactical decisions (asset, country and asset allocation). This approach is supported by fundamental analysis on listed companies as well as the development and implementation of quantitative models.

Eurizon employs a multi-faceted risk management framework, with multiple risk management measures, as part of its portfolio management process. Risk management guidelines are defined at a centralized level for affiliated companies to Eurizon. Risk management plays an active role, both in the phase preceding the application of investment strategies, by defining risk budgeting policies and the fund management style, and in the phase following strategy application, by monitoring the risk profile.

The firm closely monitors market exposures and the associated degree of volatility on a daily basis.

As part of its portfolio management process, the firm also monitors compliance with the investment objectives and restrictions set forth in the applicable governing documents of the Funds and the separately managed accounts.

Risk of Loss

The investment strategies pursued by Eurizon as summarized above will be subject to normal market fluctuations and other risks inherent in investing in securities. There can be no assurance that any appreciation in the value of investments will occur. The value of investments and the

income derived from them may fall as well as rise and investors may not recoup the original amount they invest.

The descriptions contained below are a brief overview of associated risks related to Eurizon's investment strategies; however, they are not intended to serve as an exhaustive list or a comprehensive description of all risks and conflicts that may arise in managing the client accounts. The Funds' governing and offering documents and the separately management accounts' investment management agreements contain a more detailed discussion of the associated risks of the firm's investment strategy.

General Investment Risks

An investment in the strategies is highly speculative and involves a high degree of risk due to the nature of the investments and the investment strategies and trading strategies to be employed. An investment in the strategies should not in itself be considered a balanced investment program. Investors and clients should be able to withstand the loss of their entire investment.

Non-U.S. Exchanges and Markets

Eurizon engages in trading on non-U.S. exchanges and markets. Trading on such exchanges and markets involves certain risks not applicable to trading on United States exchanges and is frequently less regulated. For example, certain of such exchanges may not provide the same assurances of the integrity (financial and otherwise) of the marketplace and its participants as do United States exchanges.

Economic and Market Conditions

The success of the strategies will be affected by general economic and market conditions, such as interest rates, availability of credit, credit defaults, inflation rates, economic uncertainty, changes in laws, trade barriers, currency exchange controls, and national and international political circumstances (including wars, terrorist acts or security operations). These factors may affect the level and volatility of investments' prices and the liquidity of the investments. Volatility or illiquidity could impair the strategies' profitability or result in losses.

Derivatives Risk and Volatility

Eurizon' investment strategies may involve the purchase and sale of relatively volatile instruments such as derivatives. Price movements of forward contracts, futures contracts and other derivative contracts are influenced by, among other things, interest rates, changing supply and demand relationships, trade, fiscal, monetary and exchange control programs and policies of governments, and national and international political and economic events and policies. Fluctuations or prolonged changes in the volatility of such securities, therefore, can adversely affect the value of investments.

Counterparty Risk

Clients will be subject to the risk of the inability of any counterparty to perform with respect to transactions, whether due to insolvency, bankruptcy or other causes.

Liquidity

In extreme market conditions, it may be difficult for an investor or client to realize an investment at short notice without suffering a discount to market value. In such circumstances the investor may suffer a delay in realizing his investment or may incur a dilution adjustment. Depending on the types of assets invested in, there may be occasions where there is an increased risk that a position cannot be liquidated in a timely manner at a reasonable price.

Leverage

A proportion of the strategies' capital may be leveraged. While leverage presents opportunities for increasing the capital return, it has the effect of potentially increasing losses as well. Any event which adversely affects the underlying vehicles would be magnified to the extent the capital is leveraged. The cumulative effect of the use of leverage in a market that moves adversely to the underlying investment vehicles could result in a substantial loss to capital that would be greater than if capital were not leveraged.

Item 9. Disciplinary Information

Eurizon does not have any disciplinary information to disclose.

Item 10. Other Financial Industry Activities and Affiliations

As mentioned previously, Eurizon Capital SGR is an investment adviser based in Milan, Italy, and a subsidiary of Intesa Sanpaolo SpA., and is considered a controlling person of Eurizon, and is therefore an affiliate of the firm. Eurizon believes that potential conflicts of interest arising from this affiliation are minimal and mitigated by Eurizon's compliance policies and procedures.

The firm currently advises UCITS sub funds belonging to the same umbrella fund promoted by Eurizon Capital S.A, a related company based in Luxembourg. Eurizon believes that potential conflicts of interest arising from this affiliation are minimal and mitigated by Eurizon's compliance policies and procedures.

Eurizon has no affiliations with any broker-dealer.

Item 11. Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

Eurizon has adopted a Code of Ethics policy which, among other things, contains provisions designed to (i) prevent improper personal trading by employees; (ii) prevent improper use of material, non-public information about securities recommendations made by Eurizon or securities holdings of advisory clients and (iii) identify conflicts of interest, including monitoring of gifts and entertainment issues that could arise involving Eurizon or its personnel.

A copy of the firm's Code of Ethics shall be provided to any investor or prospective investor upon request.

Item 12. Brokerage Practices

Best Execution

Eurizon maintains approved counterparties with whom orders are typically placed. The Firm generally has discretion to choose a counterparty for executing orders, but is under an obligation to take all sufficient steps to obtain the best possible result for its clients when executing orders, taking into account the execution factors (price; costs; speed; likelihood of execution and settlement; size, nature or any other consideration relevant to the execution of an order).

On a periodic basis, the list of approved counterparties will be reviewed for, among other things, whether the counterparties are providing best execution for Eurizon's clients. Based on this periodic best execution review, Eurizon will modify the list of counterparties to the extent appropriate.

The typical factors that are considered to determine the manner in which an order will be executed include the following:

- Price
- Costs
- Size and nature of the order
- Speed
- Quality of back-office
- Counterparty risk
- Together with any other consideration relevant to the execution of the order, such as availability of liquidity, and the market impact of the order.

In determining the relative importance of these factors, the firm will take into account the nature of the order, the characteristics of the financial instruments to which the order relates and the characteristics of the available execution venues, and will exercise its discretion to determine which of these factors, or combination of them, will be most relevant to achieve best execution.

Trade Errors

Eurizon will seek to detect trade errors prior to settlement and promptly correct and mitigate any trade error losses. Certain trade errors will be borne by the Funds in absence of a finding of gross or willful negligence on the part of the firm. To the extent that a trade error is caused by a counterparty of the Funds, such as a broker or agent, the firm will seek to recover any related trade error losses from such counterparty. The firm in its sole discretion may offset any trade error income with trade error losses.

Commissions and Research

The firm has not entered into any soft dollar or client commission sharing agreements. To the extent that Eurizon uses investment research obtained from third parties, it will do so consistent with guidance from the SEC and the European Commission regarding acceptable methods to pay for investment research under legislation in the European Union known as the Markets in Financial Instruments Directive (MiFID II), which went into effect on January 3, 2018.

Item 13. Review of Accounts

The Firm reviews the investments in the strategies on an ongoing basis and will provide reports to investors and clients as set forth in the organizational and offering documents of the Funds as well as in the investment management agreements for the separately managed accounts.

Item 14. Client Referrals and Other Compensation

Eurizon has not engaged third parties to solicit investors.

Item 15. Custody

The cash and securities of the Funds and the separately managed account clients are held by third party custodians and Eurizon does not have actual custody any cash or securities. However, Eurizon may be deemed to have constructive custody of the Funds organized in the U.S. because an affiliate acts as general partner of the Funds. Accordingly, where applicable, the Firm will comply with the “audit exception” to the SEC’s custody rule and deliver audited financial statements to investors in the Funds within 120 days of the Funds’ fiscal year end.

Item 16. Investment Discretion

Eurizon has discretionary authority to manage the assets of the Funds and the separately management accounts in a manner consistent with the stated investment objectives and guidelines of the Funds’ organizational and offering documents and the investment management agreements.

Item 17. Voting Client Securities

Eurizon has adopted policies and procedures regarding its voting responsibilities for proxies, which will govern the voting process. A copy of such policies and procedures will be available upon request, as well as a record of all votes cast on behalf of the Firm’s clients.

Item 18. Financial Information

Eurizon has never filed for bankruptcy and is not aware of any financial condition that is likely to impair its ability to provide services to clients.
