**Hillhouse Capital Management Limited
Hillhouse (Beijing) Advisory Limited
Hillhouse Capital Management Pte. Ltd.**

Form ADV, Part 2A – Brochure

This Brochure provides information about the qualifications and business practices of Hillhouse Capital Management, Ltd. (“HCM”) and the affiliates named above (the “Local Entities” and collectively with the Filing Adviser, “Hillhouse” or the “Hillhouse Entities”). To the extent the qualifications and business practices of the Local Entities are substantially similar to those of the Filing Adviser, no specific mention of the Local Entities is made herein.

If you have any questions about the contents of this Brochure, please contact HCM at +852 2179-1988 or at hcminfo@hillhousecap.com.

The Hillhouse Entities are registered with the United States Securities and Exchange Commission (“SEC”) as investment advisers. Registration as an investment adviser does not imply any level of skill or training. The information in this Brochure has not been approved or verified by the SEC or by any state securities authority.

Additional information about Hillhouse also is available on the SEC’s website at www.adviserinfo.sec.gov.

ITEM 2: MATERIAL CHANGES

HCM last filed an annual update to its Brochure on March 31, 2017. While this update to HCM's Brochure contains changes and updates to certain information, HCM does not believe they constitute material changes from the last annual update.

This Brochure also constitutes an initial Brochure for each of the Local Entities. To the extent subsequent updates to this Brochure contain changes and updates that are deemed to be material changes from the last annual update, those changes and updates will be highlighted here.

ITEM 4: ADVISORY BUSINESS

Overview

Hillhouse Capital Management, Ltd. (“HCM”) was founded in June 2005 by Mr. Lei Zhang (张磊), HCM's President and Chief Investment Officer. HCM is a wholly owned subsidiary of Hillhouse Capital Group Limited, which is a wholly owned subsidiary of Hillhouse Capital Group Holdings Limited. Mr. Zhang directly owns 100% of Hillhouse Capital Group Holdings Limited.

Each of Hillhouse Capital Management Limited, Hillhouse (Beijing) Advisory Limited, Hillhouse Capital Management Pte. Ltd. (each, a “Local Entity”) is similarly wholly-owned by Mr. Zhang (generally through privately-held intermediate subsidiaries). The term “Hillhouse” as used in this Brochure refers collectively to HCM and the Local Entities.

HCM serves as the investment adviser to clients organized as privately offered pooled investment vehicles (the “Funds”) and may provide investment advice to certain managed accounts. The Funds and such HCM-advised managed accounts are referred to herein as “clients”. HCM has discretionary authority to manage the Funds, including the authority to determine which investments are bought and sold and the amounts of such investments that are appropriate for each Fund. Any limitation on HCM's authority is described in the clients’ respective governing documents and/or investment management agreements. HCM manages the Funds in accordance with the investment guidelines set forth in the offering documents for each Fund, and in accordance with authority delegated to it under the applicable client’s investment management agreement or governing documents.

HCM maintains service agreements with each of the Local Entities. The Local Entities assist HCM in conducting operations in certain foreign jurisdictions by providing personnel, office locations, and other assistance to HCM (which HCM utilizes in advising its clients). The Local Entities deem HCM to be their client and HCM determines that the Local Entities do not provide continuous and regular supervisory or management services to any third parties.

HCM had approximately \$32,400,006,000 of assets under management as of December 31, 2017, all of which is managed on a discretionary basis.

The amount of assets under management reported in this brochure is lower than the amount of “regulatory assets under management” that HCM reported in Part 1, Item 5 of its Form ADV because Item 5 requires an adviser to report assets under management *inclusive* of any uncalled commitments and *without deducting* any outstanding indebtedness or other accrued but unpaid liabilities. To prevent the appearance of an overstatement of HCM’s assets under management, HCM has calculated assets under management in this brochure *exclusive* of uncalled commitments and *taking into account* certain unpaid liabilities and outstanding indebtedness.

Fund Structure

The Funds include vehicles that focus on traded or more liquid instruments and offer certain opportunities for subscriptions and redemptions throughout the term of the Fund (the “NAV Funds”) and vehicles that focus on investments in illiquid or less-liquid investments and which do not generally allow for subscriptions after a designated capital raise period and where redemptions are not generally expected (the “PE Funds”).

The Funds are generally organized into master-feeder structures. A master-feeder structure is commonly used to accumulate capital raised from both United States (“U.S.”) taxable, U.S. tax-exempt, and non-U.S. investors into one central trading vehicle - a master fund - in order to enhance the critical mass of tradable assets, improve economies of scale under which the fund arrangements operate and enhance operational efficiencies, thereby reducing costs. HCM commonly serves as, or controls or is under common control with an entity that serves as, the general partner of those Funds organized as partnerships. The general partner of any Fund may also act as the general partner of other Funds or the related feeder funds.

Portfolio Management Services

HCM manages the Funds and client accounts on a discretionary or non-discretionary basis subject to investment policies and restrictions established by its clients. HCM consults with each client on its investment objectives and tailors its services and advice to those objectives. For example, certain of HCM’s clients may place limits on its investments.

Investment Philosophy

Hillhouse’s investment philosophy is to seek long-term, risk-adjusted returns through bottom-up analysis and fundamental proprietary research. As part of Hillhouse’s bottom-up analysis, it performs both qualitative and quantitative assessments of potential investments with a particular focus on opportunities upon which it can gain insights and discover value in an ever-changing world. Hillhouse believes that this fundamental research persistence allows it to be a patient, long-term investor.

HCM primarily invests in equity and debt securities, but may invest in a wide range of securities and other financial instruments including, without limitation: share capital; common and preferred stock (privately-placed and exchange-traded); shares of beneficial interest; partnership interests and similar financial instruments; bonds, notes, and debentures (whether subordinated, convertible, or otherwise); commodities; currencies; interest rate, currency, commodity, equity, debt, and other derivative products (including, without limitation, (i) futures contracts (and options on futures contracts) relating to stock indices, currencies, other financial instruments, and all other commodities, (ii) swaps, options, warrants, caps, collars, floors, and forward rate agreements, (iii) spot and forward currency transactions, and (iv) agreements relating to or securing such transactions); equipment lease certificates; equipment trust certificates; loans; accounts and notes receivable and payable held by trade or other creditors; trade acceptances; contract and other claims; executory contracts; participations; mutual funds; money market funds; structured securities; repurchase agreements; obligations of governments and instrumentalities; commercial paper; certificates of deposit; bankers’ acceptances; trust receipts;

choses in action; real estate, including fee interests, leaseholds, mortgages, or other real estate assets; and any other obligations and instruments or evidences of indebtedness of whatever kind or nature; in each case, of any person, corporation, government, or other entity whatsoever, whether or not publicly traded or readily marketable. Some investments that HCM makes for client accounts may have no readily available market.

HCM may also invest client assets in a wide range of markets and exchanges in Asia and throughout the world, including, without limitation, markets in the People's Republic of China (the "PRC"), Hong Kong, U.S., Singapore, Taiwan, Korea, Japan, Indonesia, India, Vietnam, Malaysia, Thailand, Australia, and elsewhere. Clients may also face indirect exposure to all of the instruments and investments listed above through investment in special purpose vehicles and similar entities.

Co-Investments

HCM or its affiliates may also, from time to time, form, sponsor, manage or advise investment vehicles or accounts in connection with a particular strategy or theme, or may establish, sponsor or advise on a transaction-by-transaction basis, an investment vehicle or account through which certain persons may invest alongside or independently of one or more clients (each such vehicle and account, a "Co-Investment Arrangement"). Co-Investment Arrangements may participate in individual investments or a series of related or unrelated investments alongside one or more other clients of HCM and its affiliates. Co-Investment Arrangements may also make investments independently of (and not alongside) other clients of HCM and its affiliates. In addition, certain Funds (and other HCM clients) may from time to time co-invest with each other. HCM's fee and compensation practices for Co-Investment Arrangements are subject to a case-by-case agreement with the applicable investor.

The allocation of co-investment opportunities can be both discretionary or non-discretionary, and HCM takes into account various facts and circumstances deemed relevant for determining allocations relating to co-investment opportunities and establishing co-investment structures. Such factors are likely to include, among others, the strategic value that the potential co-investor may bring to the investment or transaction, whether a potential co-investor has expressed interest in co-investment opportunities, the market or opportunity size, the amount of capital needed for the potential investment, the number of investors that can practically participate in the transaction, HCM's assessment of the potential co-investor's ability to invest in an amount and within the timeframe required by the investment, regulatory or tax considerations in the investment, the portfolio company's preference, and such other factors that HCM may deem relevant. Please see "Investment Allocations" below for additional information relating to investment allocations.

Investment Allocations

HCM faces a number of conflicts in allocating investment opportunities among its various clients, including clients with similar or identical trading and investment programs and clients that have separate and distinct, but overlapping, trading and investment programs. HCM may also face additional conflicts in connection with certain proprietary vehicles owned or controlled by HCM and its affiliates. These conflicts are heightened by the fact that the various Funds and

other clients sponsored, advised or managed by HCM and its various affiliates have different management and incentive fee structures. In some circumstances, HCM may allocate the same or similar trade or investment opportunities among clients and proprietary vehicles. In other circumstances, HCM may allocate investment opportunities to certain clients or to proprietary vehicles and not to other clients. As such, not all of the opportunities that may be suitable for a given client will be presented to such client. In circumstances where investment opportunities fall within the investment programs of more than one client, HCM's policy is to allocate investment opportunities among eligible clients fairly and equitably, to the extent possible, over a period of time subject to any (i) applicable investment parameters, (ii) contractual obligations, (iii) legal, tax, regulatory and other considerations, and (iv) Hillhouse's internal allocation policies.

In an effort to ensure fairness in the allocation of investment opportunities among HCM's clients, HCM has adopted allocation policies and procedures that take into account various factors, including: suitability of the investment for each of HCM's clients; HCM's clients' investment objectives and strategies; lifespan and closing date of HCM's clients; existing portfolio composition and existing holdings; net asset value; liquidity and reserve levels; risk profile; actual or projected future capacity for investment and the timing thereof; eligibility; the portfolio company's preferences; targeted rate of return; stage of development of the prospective portfolio company or other investment; legal, tax, contractual, regulatory or other considerations; cash levels and cash availability; anticipated holding period and remaining investment periods; market exposure; market or opportunity size; currency exposure; and industry sector exposure. To the extent that all or a portion of an investment is deemed inappropriate for HCM's clients, such as but not limited to investments in pooled investment vehicles or similar structures managed by third parties that assess management fees or performance fees/allocation, HCM, its employees and its affiliates may participate in such opportunities as described in Hillhouse's policies and procedures.

ITEM 5: FEES AND COMPENSATION

General

Clients typically compensate HCM, in part, on the basis of asset management fees calculated as a percentage of a client's assets under management, or in certain instances, the funded and unfunded capital commitments of the client. HCM generally deducts or charges asset management fees from or to client accounts on a quarterly basis and such fee rates are individually negotiated with HCM's clients. Asset management fees are generally payable by clients in advance of the beginning of each calendar quarter.

HCM also enters into arrangements to receive performance-based fees/allocation. In such cases, HCM assesses performance-based fees/allocation based on realized and unrealized capital appreciation for HCM's NAV Funds and realized investment profits for HCM's PE Funds. In certain instances, such performance fees/allocation are subject to a hurdle or preferred return. HCM deducts or receives performance-based fees/allocation from NAV Fund accounts annually, or collects them directly from NAV Funds on an annual basis. HCM receives a portion of the realized investment profits of its PE Funds as performance fees/allocation. HCM's fee and compensation practices for Co-Investment Arrangements are subject to a case-

by-case agreement with the applicable client. Performance based fee/allocation rates are individually negotiated with HCM's clients.

HCM believes that its fees are competitive with fees charged by other investment advisers for comparable services. However, comparable services may be available from other sources for lower fees.

The Local Entities are compensated directly by HCM by paying negotiated fees based on the services provided.

None of HCM, any of the Local Entities, nor any of their respective "supervised persons" (as defined in the glossary of terms to the SEC Form ADV) accept compensation for the sale of securities or other investment products, including asset-based sales charges or service fees from the sale of mutual funds.

Performance-Based Compensation

HCM receives performance-based fees and allocations, as described above. HCM negotiates or arranges such fees/allocations with clients before entering into advisory relationships. The receipt of performance-based compensation may create an incentive for HCM to make investments that are riskier or more speculative than those HCM would otherwise make in the absence of such incentive compensation. HCM addresses this conflict by focusing on long-term relationships with its clients and Fund investors, and by managing the Funds in accordance with their governing documents.

HCM charges clients both asset-based fees and performance-based fees/allocations. However, fees and other economic terms can be negotiated on a client-by-client basis and may vary. Charging asset-based fees and performance-based fees/allocations may create a conflict of interest because it creates an incentive to allocate the best-performing assets into client accounts on which HCM charges performance-based fees/allocations. Additionally, the allocation of performance fees and allocations at different rates, or subject to different hurdle rates or preferred returns, may create an incentive for HCM or its affiliates to disproportionately allocate time, services, or functions to accounts or vehicles with higher fees/allocations (or subject to a lower hurdle rate or preferred returns), or to allocate investment opportunities to such accounts or vehicles.

HCM and its advisory affiliates recognize the possibility of such a conflict and address it through Hillhouse's allocation policies and procedures and other relevant measures. Please see Item 4, "Investment Allocations" for additional information on Hillhouse's investment allocation policies and procedures. HCM does not charge performance-based fees where such an arrangement would violate Section 205 of the U.S. Investment Advisers Act of 1940 (the "Advisers Act") pursuant to Rule 205-3 thereunder.

Valuation of Assets

The asset management fees and the performance-based fees/allocations charged to or made by a client may be calculated based on valuations ascribed to the client's holdings. There can be no assurance that the value assigned to an investment held by a PE Fund or a NAV Fund at a certain

time will equal the value that the Fund is ultimately able to realize. HCM addresses this conflict by adhering to its valuation policies and procedures, using a third party to assist in certain valuation processes, engaging a third party valuation agent to review the PE Fund and certain other holdings that do not have readily available market prices, and/or using third-party pricing sources to the extent feasible.

There is no actively traded market for most of the securities owned by the PE Funds and for certain of the securities owned by the NAV Funds. Securities and all other assets for which no market prices are available will be valued at fair market value, as reasonably determined in good faith by the general partner of the relevant Fund.

Expenses and Other Fees

Each client bears its own expenses and HCM's general policy is that it will only assess expenses against client accounts to the extent that such expenses are permissible client expenses under the applicable client agreements. Allocable client expenses generally include: management fees and performance fees/allocations; organizational and administration fees and expenses; taxes; costs incurred in connection with the researching, evaluation, acquisition, monitoring and disposition of investments (whether or not consummated); transaction costs; financing costs; insurance costs; certain regulatory and tax compliance costs; and fees relating to service providers engaged for the client's business and operations, including, without limitation, attorneys, auditors, accountants, valuation services, consultants, and custodians, and such other fees and expenses as are provided for under the arrangement with each client.

Certain expenses may be charged to more than one client, in which case HCM will determine the appropriate allocation of expenses among each client depending on the nature of the expense. Certain expenses may be allocated between clients on a pro rata or NAV basis (as appropriate) while others may be allocated more specifically based on other factors, such as the relevant clients that have incurred the cost or received the benefit arising from the expenses.

Clients will incur brokerage and other transaction costs. Please see Item 12, "Brokerage Practices," below for a discussion of certain brokerage expenses. HCM has no affiliated broker-dealers.

HCM or its affiliates may receive or be eligible to receive other fees or service payments (including directors' fees, transaction fees, break fees, or similar fees) from client portfolio investments, which may be in addition to management fees. As set forth in the governing documents of the applicable client, HCM may, in some circumstances, be obligated to reduce the amount of management fees paid by the relevant client based on such fees received. In addition, HCM may forgo such fees or ensure such fees are received by the applicable client.

Refunds and Fee Waivers

In the event of the termination of a client's advisory contract during a quarterly period, the client, without request, will receive a pro rata refund of the portion of the asset management fee paid in advance for the remaining balance of the quarter. Additionally, HCM assesses a pro rata asset

management fee to any client account created on any date other than the first day of any calendar quarter.

HCM may, in its sole discretion, waive all or part of any fees or expenses payable by or attributable to the Funds, Fund investors, or clients.

Hillhouse and/or its personnel may invest in one or more of the Funds directly or indirectly through vehicles established by Hillhouse for Hillhouse personnel. Hillhouse and/or its personnel are not generally subject to asset management fees or performance-based fees/allocations with respect to their investments in the Funds.

ITEM 6: PERFORMANCE-BASED FEES AND SIDE-BY-SIDE MANAGEMENT

HCM receives performance-based compensation as described in Item 5, “Fees and Compensation” above. As described above, HCM does not engage in side-by-side management practices. The Local Entities do not receive any performance-based compensation from clients, but are compensated for their services pursuant to negotiated contracts with HCM.

ITEM 7: TYPES OF CLIENTS

HCM serves as an investment adviser to pooled investment vehicles whose underlying investors are exclusively “accredited investors” (as defined in Rule 501(a) of Regulation D under the U.S. Securities Act of 1933) and “qualified purchasers” (as defined in Section 2(a)(51) of the U.S. Investment Company Act of 1940). Underlying investors in the pooled investment vehicles HCM advises are generally endowments, foundations, non-profit organizations, pensions, corporates, government entities, family offices, trusts, and other businesses.

HCM may also provide investment advice to one or more individual institutional clients. HCM may manage accounts for endowments, foundations, non-profit organizations, pensions, corporates, government entities, family offices, trusts, and other businesses.

The Local Entities deem HCM to be its client. The Local Entities also provide services to Hillhouse Capital Advisors, Ltd. (“HCA”), an SEC-registered investment advisor affiliated with HCM through common ownership, on a similar basis. Please see Item 10, “Other Financial Industry Activities and Affiliations” below for additional information about HCA.

Minimum Account Size

Certain of the Funds require an initial minimum capital contribution of \$5,000,000 and a minimum subsequent capital contributions of \$1,000,000, but the general partners of such Funds may accept contributions in lesser amounts in their sole and absolute discretion, with an absolute minimum initial capital contribution of \$100,000 (except with respect to certain Funds). HCM generally does not require clients to maintain a minimum investment to continue an advisory relationship, but it does reserve the right to terminate an account based on its size if the account has decreased because of substantial investor withdrawals.

Advisory Agreements

All clients must enter into a written investment management, advisory, or similar agreement before establishing an advisory relationship with HCM. HCM may not assign such agreements without client consent.

ITEM 8: METHODS OF ANALYSIS, INVESTMENT STRATEGIES, AND RISK OF LOSS

Methods of Analysis

Hillhouse's research process employs fundamental, quantitative, and qualitative analysis, including cyclical analysis. Hillhouse focuses on developing a deep, fundamental understanding of investment opportunities through rigorous due diligence and analysis. Hillhouse's bottom-up approach to analysis and research is generally conducted on a company-by-company basis, but may extend to competitors and industries. Hillhouse evaluates the upside and downside of the companies and opportunities identified and monitor them closely. Hillhouse also conducts on-site visits, cross-checks, and detailed financial analysis of investment opportunities. Hillhouse's analysis includes vigilant monitoring that continues the due diligence process after an investment is entered into the client's portfolio. Hillhouse's extensive due diligence process also assists it in discovering and exploring previously unknown investment opportunities.

Sources of Information

Hillhouse incorporates local expertise stemming from grassroots research to generate powerful independent and proprietary views that drive its investment strategy. Hillhouse generally adheres to an exhaustive research framework, including face-to-face communication with management, analysis of publications and other media, site visits, and dialogue with suppliers, customers, and competitors.

Investment Strategies

General Strategy. HCM's investment decisions are based on bottom-up analysis and research. HCM seeks capital appreciation derived from investments in both publicly traded and privately-held equity and debt securities across multiple industries. HCM invests primarily in reasonably priced companies that provide substantial long-term growth prospects. Although Hillhouse monitors macro-economic factors and market trends, Hillhouse generally avoids market-timing strategies and focuses primarily on bottom-up opportunities.

HCM invests globally with a particular focus on companies or assets having substantial relations with Asia. Hillhouse focuses on understanding fundamental risks, uncovering long-term growth potential, and targeting industries that it understands and can monitor.

Short Sale Strategy. In addition to seeking out attractively priced investments, HCM may, from time to time, sell short overvalued companies facing circumstances that Hillhouse believes will result in declining market valuations. Similar to HCM's long investments, the short portfolio is constructed on the basis of intensive bottom-up research. Hillhouse is cognizant of the risks of trading short and monitor exposure carefully.

Risk Factors

Clients should be aware that any investment in securities involves a high degree of risk and is suitable only for investors of substantial means who have no need for liquidity with respect to the amount invested and can afford to lose all of their investment. There can be no assurances that HCM's clients will receive a return of, or on, their capital.

Investors are advised to review the applicable Fund offering materials for a more extensive description of the risks of investing in the Funds.

Investment risks include, but are not limited to, the following:

Risk of Loss. HCM does not guarantee the future performance of any client portfolio, the success of any investment decision, strategy or advice that HCM may employ or provide, or the success of HCM's overall management of any client. Any investment made in connection with HCM's advice or management involves significant risk, including the risk of loss of all or substantially all capital invested. Investors should be prepared to bear the loss of the entire amount of their investment.

International Investments Risk. HCM's investments include equity and debt securities in a number of international jurisdictions including securities with a substantial relationship with Asia. International investments involve a broad range of political, economic, legal, tax, and financial risks. Many of these risks are not typically associated with investments in securities of companies in economies that have developed and been regulated over a longer period. These risks include: (i) less publicly available information; (ii) varying levels of governmental regulation and supervision; and (iii) foreign exchange controls.

Moreover, non-U.S. companies may not be subject to uniform accounting, auditing, and financial reporting standards, practices, and requirements comparable to those applicable to U.S. companies. Further, investing in securities of non-U.S. entities that are generally denominated in non-U.S. currencies and utilization of options on non-U.S. securities involves certain considerations comprising both risks and opportunities not typically associated with investing in securities of the U.S. government or entities organized or domiciled in the U.S. These considerations include changes in exchange rates and exchange control regulations; political and social instability; expropriation; imposition of foreign taxes; less liquid markets and less available information than is generally the case in the U.S.; higher transaction costs; foreign government restrictions; less government supervision of exchanges, brokers and issuers; greater risks associated with counterparties and settlement; difficulty in enforcing contractual obligations; and greater price volatility.

Further, income or proceeds received by a client from sources within some countries may be reduced by withholding and other taxes imposed by such countries. Any such taxes paid by a client will reduce its net income or return from such investments.

Emerging Markets Risk. Investing in an emerging market involves additional risks and special considerations not typically associated with investing in other more established economies or

securities markets. Emerging economies differ from other large economies in many respects, including the level of development, growth rate, and allocation of resources.

Such risks may include: (i) increased risk of nationalization, expropriation of assets or confiscatory taxation; (ii) greater social, economic, and political uncertainty, including war; (iii) higher dependence on exports and the corresponding importance of international trade; (iv) greater volatility, less liquidity, and smaller capitalization of securities markets; (v) greater volatility in currency exchange rates; (vi) greater risk of inflation; (vii) greater controls on foreign investment and limitations on repatriation of invested capital and on the ability to exchange local currencies for U.S. dollars; (viii) increased likelihood of governmental decisions to cease support of economic reform programs or to impose centrally planned economies; (ix) differences in auditing and financial reporting standards, which may result in the unavailability of material information about issuers; (x) less extensive regulation of the securities markets; (xi) longer settlement periods for securities transactions and less reliable clearance and custody arrangements; (xii) less protection through registration of assets; (xiii) less developed corporate laws regarding fiduciary duties of officers and directors and protection of shareholders and other interest holders; and (xiv) less developed laws regarding internal controls designed to ensure the accuracy of financial reporting and third-party attestation of the effectiveness of those controls.

Moreover, the value of HCM's investments may be adversely affected by uncertainties associated with international political developments. Changes in political, economic, and social conditions and government policies in the PRC and elsewhere in Asia may have a substantial detrimental impact on HCM's clients' investments. These changes may include: (i) promulgation of new laws, regulations, and economic policies; (ii) changes in the interpretation or enforcement of laws or regulations; (iii) introduction of measures to control inflation or stimulate growth; (iv) changes in the rate or method of taxation; and (v) the imposition of additional restrictions on currency conversion and remittances abroad.

Availability of Suitable Investment Opportunities and Investment Risk. For Hillhouse's investment strategies to be successful, it must be able to identify and select appropriate investment opportunities. Additionally, Hillhouse competes for investment opportunities with operating companies, financial institutions, and other institutional investors, including private equity, hedge, and other investment funds, which may negatively impact Hillhouse's ability to take advantage of suitable investment opportunities. Successful implementation of the investment strategy adopted by Hillhouse requires accurate assessments of general economic conditions, the detailed analysis of individual companies or industries, the relationship between a security and its derivatives, the risk correlation between a wide variety of investments, and the future behavior of other financial market participants. Even with the most careful analysis, the direction of the financial markets is often driven by unforeseeable economic, political, and other events and the reaction of market participants to these events. HCM's clients should be aware that the value of their investments and the return derived from them may fluctuate. There can be no assurance that HCM's strategy will be successful and an unsuccessful strategy may result in significant losses to HCM's clients' investments. Further, there can be no assurance that the investments HCM chooses will achieve HCM's clients' investment objectives. Additionally, though investments are monitored in accordance with HCM's policies, as well as risk management policies and restrictions in prospectuses or investment advisory agreements, there can be no guarantee that losses will be avoided at all times. There is a risk that HCM's clients'

investments will be lost entirely or in part. Past performance should not be construed as an indication of the future results of an investment that HCM monitors, recommends, or trades for its clients.

Strategy Risk. Fundamental analysis, by itself, does not attempt to anticipate market movements. This presents a potential risk and, although Hillhouse considers overall market conditions in its investment strategies, the price of a security may move up or down along with the overall market regardless of the economic and financial factors considered in evaluating the investment. Likewise, Hillhouse's long-term growth strategy may not take advantage of short-term gains that could be profitable. If Hillhouse's predictions are incorrect, a security may decline sharply in value before client investments are sold.

Equity Risk. Because of the nature of Hillhouse's investment strategies, clients are subject to the risk that prices will fall over short or extended periods of time, and clients could lose all, or a substantial portion, of the value of their investments.

Business Risk. Investments made by HCM's clients may report poor results and industry and/or economic trends and developments could have a greater impact on certain companies in comparison to the market as a whole. The prices of these companies' securities may decline in response.

Liquidity Risk. Some companies or investments in which HCM's clients invest may not be well known, may have few shares outstanding, may have contractual or regulatory restrictions on disposal, or may be particularly susceptible to political and economic events. Securities issued by such companies may be difficult to buy or sell and the value of such securities may rise and/or fall substantially before such securities may be bought or sold.

Market Risk and Disruptions. The price of a security may decline in response to certain tangible and intangible events and conditions, including, but not limited to: conditions directly involving the issuers of the securities; general economic conditions; overall market changes; local, regional, or global political, social, or economic instability; governmental responses to economic conditions; and currency, interest rate, and commodity price fluctuations. Such events are beyond Hillhouse's control and may be independent of a security's particular underlying circumstances. Further, the global financial markets have undergone and may further undergo pervasive and fundamental disruptions that have led to extensive and unprecedented governmental intervention. Such intervention has, in certain cases, been implemented on a sudden and "emergency" basis. This has substantially limited the ability of market participants to continue to implement certain strategies or manage the risk of their outstanding positions. In addition, as one would expect given the complexities of the financial markets and the limited time frame within which governments have felt compelled to take action, these interventions may be perceived as unclear in scope and application and such perceptions can contribute to general uncertainty in the markets. Clients may incur major losses in the event of disrupted markets and other extraordinary events in which historical pricing relationships (on which HCM may base its advice) become materially distorted. The risk of loss from pricing distortions is compounded by the fact that in disrupted markets many positions become illiquid, making it difficult or impossible to close out positions against which the markets are moving. Market disruptions may from time to time cause dramatic losses for HCM's clients, and such events can

result in otherwise historically low-risk strategies performing with unprecedented volatility and risk. It is impossible to predict what additional interim or permanent governmental restrictions may be imposed on the markets and/or the effect of such restrictions on Hillhouse's strategies.

Derivative Instruments Risk. HCM may invest client assets in derivative instruments. The prices of derivative instruments, including futures and options, are highly volatile. Payments made pursuant to swap agreements may also be highly volatile. Price movements of futures and options contracts and payments pursuant to swap agreements are influenced by, among other things: interest rates; changing supply and demand relationships; trade, fiscal, monetary and exchange control programs and policies of governments; and national and international political and economic events and policies. The value of futures, options and swap agreements also depends upon the price of the assets underlying them. In addition, such instruments are subject to counterparty risk. Certain options and other custom instruments are subject to the risk of non-performance by the counterparty, including risks of creditworthiness of the counterparty, market risk, liquidity risk, and operations risk. If a counterparty's creditworthiness declines, the value of any agreements with such counterparty can be expected to decline, potentially resulting in loss. In connection with exchange-listed or centrally-cleared instruments, clients are subject to the risk of failure of any of the clearing houses or clearing members through which their positions are cleared.

Short-Selling Risk. HCM may engage in short-selling securities on behalf of its clients, which involves: (i) selling securities which may or may not be owned by the short seller; and (ii) borrowing them for delivery to the purchaser, with an obligation to replace the borrowed securities at a later date. Short-selling allows a client to profit from a decline in market price to the extent such decline exceeds the transactions costs and the costs of borrowing the securities. A short sale creates the risk of a theoretically unlimited loss, in that the price of the underlying security could theoretically increase without limit. This would in turn increase the cost to the client of buying those securities to cover the short position. There can be no assurance that a client will be able to maintain the ability to borrow securities sold short. In such cases, the client can be "bought in" (i.e., forced to repurchase securities in the open market to return to the lender). There also can be no assurance that the securities necessary to cover a short position will be available for purchase at or near prices quoted in the market. Purchasing securities to close out a short position can itself cause the price of the securities to rise further, thereby exacerbating the loss. In addition, short-selling activities are subject to restrictions imposed by other foreign governmental and regulatory authorities and various securities exchanges. Such restrictions may inhibit or prevent HCM from entering into a short position on behalf of a client.

Interest Rate Fluctuations Risk. The prices of some of the financial derivative instruments in which HCM may invest client assets may be sensitive to interest rate fluctuations. Unexpected fluctuations in interest rates could cause the corresponding prices of HCM's clients' long and short positions to move in directions that were not initially anticipated. Additionally, interest rate increases generally will increase the costs of borrowing. To the extent that interest rate assumptions underlie the hedge ratios implemented in hedging a particular position, fluctuations in interest rates could invalidate those underlying assumptions and expose HCM's clients to losses.

Investment Regulations Risk. The laws and regulations of various jurisdictions related to securities markets, investment advisers, and pooled investment vehicles have undergone substantial change in recent years, and such change may continue in the foreseeable future. The effect of regulatory change on HCM and its clients, while impossible to predict, could be substantial and adverse.

At present, the securities market and the regulatory framework for the securities industry in the PRC is at an early stage of development. The China Securities Regulatory Commission (“CSRC”) is responsible for supervising the national securities markets and producing relevant regulations. Additionally, such investment regulations allow CSRC and the PRC State Administration of Foreign Exchange (“SAFE”) considerable discretion, which may result in uncertainty as to how this discretion may be exercised. Such investment regulations may be varied in the future and may negatively impact HCM and its clients. Investment quotas and currency matters may be subject to review from time to time by CSRC and SAFE.

Stock Connect and QFII Programs. Access to securities and other investment instruments that are traded on exchanges within PRC (such investments, “A Share Investments”) is restricted under Chinese laws and regulations. HCA’s clients may invest in A Share Investments through the Shanghai – Hong Kong Stock Connect or the Shenzhen – Hong Kong Stock Connect programs (“Stock Connect”) or Qualified Foreign Institutional Investor (“QFII”) programs, each of which involves particular risks and considerations, including suspension or limitations on trading and custody risks, among others. HCA’s clients may also seek to invest in or obtain exposure to A Share Investments through other means, subject to compliance with applicable laws and regulations, which may give rise to similar or other risks and considerations.

PRC Laws and Regulations Risk. The PRC legal system is based on written statutes. Since 1979, the PRC government has been developing a comprehensive system of commercial laws and considerable progress has been made in the promulgation of laws and regulations dealing with economic matters, such as corporate organization and governance, foreign investment, commerce, taxation, and trade. Therefore, some degree of uncertainty exists in connection with whether existing laws and regulations will apply to certain events or circumstances and, if so, the manner of such application. Precedents on the interpretation, implementation, and enforcement of PRC laws and regulations are somewhat limited and the binding nature of decisions of PRC courts may vary. The administration of PRC laws and regulations may be subject to a certain degree of discretion by executive authorities. In particular, as mentioned above, new investment regulations have a shorter operating history. Because these laws, regulations, and legal requirements are relatively recent, their interpretation and enforcement involve significant uncertainty. In addition, PRC laws governing business organizations, bankruptcy, and insolvency may provide less protection to security holders than that provided by the laws of other countries.

PRC Enterprise Income Tax. According to the Enterprise Income Tax Law of the PRC of March 16, 2007 (the “Enterprise Income Tax Law”), dividends, interest, rents, royalties, capital gains, and other income from PRC sources recognized by non-PRC tax resident enterprises are generally subject to PRC withholding tax at a rate of 20%. The implementation rules of the Enterprise Income Tax Law of December 6, 2007 reduced the rate of withholding tax imposed

by the Enterprise Income Tax Law from 20% to 10% for PRC-sourced income recognized by non-PRC tax resident enterprises.

HCA's clients access A Share Investments on Stock Connect, through third-party derivative products, or through a structured investment vehicle that has been formed in connection with a QFII quota/license held by an affiliate of Hillhouse. According to the Notice on Issues relating to Withholding Tax of Dividends and Interests Paid by a Resident Enterprise to a Qualified Foreign Institutional Investor, issued on January 23, 2009 (the "QFII Withholding Tax Notice"), PRC tax authorities confirmed that QFIIs will be subject to withholding tax of 10% on dividends and interest they derive from the PRC (subject to reduction by applicable tax treaties). PRC resident enterprises who distribute dividends or pay interest to QFIIs withhold this 10% withholding tax, which can be expected to adversely affect returns in respect of any A Share Investments made through the QFII quota/license. QFIIs may apply for refund of any withholding income tax overpaid if the QFII is eligible for tax treaty rate of lower than 10%, subject to the agreement of the mainland China tax authorities. Interests derived from government bonds issued by the finance authority of the State Council and local government bonds approved by the State Council shall be exempt from the mainland China income tax.

Caishui [2014] No.79 (Notice on Temporary Exemption of Enterprise Income Tax on Income from Transfer of Equity Investment Assets Including Shares Within China by QFII and RQFII) has provided a provisional exemption from PRC withholding tax for capital gain income derived by QFIIs from transfers of shares of PRC enterprises. Caishui [2014] No.79 was issued on October 31, 2014 and became effective on November 17, 2014.

In such conditions, it is likely that QFIIs will not be subject to PRC withholding tax on capital gains derived after November 17, 2014. Meanwhile, Caishui [2014] No.79 has stipulated that any capital gains derived by QFIIs from transfers of shares before November 17, 2014 shall be taxable and any unpaid tax shall be collected.

However, Caishui [2014] No.79 has not set an expiry date for such provisional exemption from PRC withholding tax on capital gains. Hence there is no guarantee that it may not be replaced or abolished by follow up regulations and capital gains will become subject to PRC withholding tax in the future.

Client investments made through A Share Investments may be materially adversely impacted if such a tax is imposed in the future or with respect to prior transactions, in particular in light of the notice.

In relation to capital gains realized from the disposal of PRC debt securities, the PRC tax authorities have verbally indicated, on numerous occasions, that such gains are non-PRC sourced income and hence not subject to PRC withholding income tax. However, there is no specific written tax regulation to confirm the same. In practice, the PRC tax authorities have not actively enforced the collection of PRC withholding income tax on gains realized from the disposal of PRC debt securities. Should the PRC tax authorities decide to levy tax on such gains in the future, QFII investments may be materially adversely impacted.

PRC Stamp Duty. A PRC stamp duty is generally imposed on the purchase and sale of shares of PRC publicly traded companies at a rate of 0.1% of the purchase/sales consideration. According to regulations effective from September 18, 2008, the purchase of shares of PRC-listed companies will not be subject to stamp duty and only the selling party will be subject to stamp duty. A Share Investments made by the Funds may be subject to stamp duty on each sale made in PRC-listed shares, which may adversely affect investment returns.

PRC Value-added Tax (“VAT”) Risk. Pursuant to a tax circular issued by certain PRC tax authorities on March 23, 2016 (the “VAT Circular”), VAT pilot programs will be rolled out nation-wide to other sectors and the provision of service and transfer of immovable property or intangible property will be subject to VAT in lieu of business tax effective on May 1, 2016. The VAT Circular specifically provides that QFIIs are exempt from VAT with respect to gains derived from their securities trading activities in China. Furthermore, another VAT circular issued by the PRC tax legislator on June 30, 2016 came into effect retroactively on May 1, 2016 (the “Interbank VAT Circular”) and further clarifies that income derived by a foreign institution (including a QFII) which is duly recognized by the People’s Bank of China from the interbank local currency market (i.e. interbank bonds market) shall be exempted from VAT. Therefore, once the conditions set forth by the Interbank VAT Circular are satisfied, a QFII will also be exempt from VAT for its income from certain interbank transactions. Pursuant to the VAT circular, interest income from PRC bond issuers should technically be subject to 6% VAT. Interest received from government bonds and local government bonds are exempt from VAT.

Securities Markets Risk. The PRC securities markets, including the Shanghai Stock Exchange and Shenzhen Stock Exchange, are undergoing a period of growth and change that may lead to difficulties in the settlement and recording of transactions and in interpreting and applying the relevant regulations. In addition, there is regulation and enforcement activity in the PRC securities markets that may not be equivalent to markets in countries that are members of the Organization for Economic Co-operation and Development (“OECD”), including the U.S. There may not be regulation and monitoring of the PRC securities markets and activities of investors, brokers, and other participants equivalent to that in certain OECD markets. Client investments may be disrupted if changes are adopted in any applicable laws or regulations such that it becomes illegal for the issuers to issue certain instruments. Such changes, if implemented, may cause HCM’s clients to suffer substantial losses.

Trading Volumes and Volatility Risk. Some emerging markets have lower trading volumes than many OECD exchanges and the market capitalizations of listed companies are small compared to those on more developed exchanges. The listed equity and debt securities of many companies in emerging markets are accordingly materially less liquid, subject to greater dealing spreads, and experience materially greater volatility than many securities in OECD countries. Government supervision and regulation in emerging markets may be considered less developed than in some OECD countries. Emerging market stock markets have, in the past, experienced substantial price volatility and no assurance can be given that such volatility will not occur in the future.

Currency Risk; Liquidity and Exchange Controls. Changes in currency prices may adversely affect the base currency value of a client’s portfolio investments and gains and losses on the sale of portfolio investments. Clients may also incur costs in converting investment proceeds from one currency to another. At present, renminbi and certain other relevant currencies are restricted

currencies and are not freely convertible. HCM's clients may be exposed to exchange control risk in connection with their investments. Relevant authorities may change the current exchange control such that it may adversely impact the liquidity of HCM's clients' investments and an active secondary market may not be developed or maintained.

Nature of Investment. Certain clients may invest in companies that are experiencing or are expected to experience severe financial difficulties, which difficulties may never be overcome. Clients may also make investments in companies in a conceptual or early stage of development that may not have a proven operating history on which to judge future performance. Such investments are considered highly speculative and may result in the loss of the relevant clients' entire investment. Since certain clients may only make a limited number of investments and since many of HCM's investments may involve a high degree of risk, poor performance by a few of its investments could significantly reduce the total returns to such clients.

Third Party Involvement. The Funds may co-invest in portfolio companies with one or more third parties. Such investments may involve risks in connection with such third-party involvement, including the possibility that a third-party co-investor may have financial, legal, or regulatory difficulties, resulting in a negative impact on such investment; may have economic or business interests or goals which are inconsistent with the relevant Funds; or may be in a position to take or block action in a manner contrary to such Funds' investment objectives. In addition, the Funds may, in certain circumstances, be liable for the actions of such third-party co-investors. In circumstances where a management group is included as a third-party co-investor, such third party may receive compensation arrangements relating to such investments, including incentive compensation arrangements.

Reliance on the Management of Portfolio Companies. Although it is Hillhouse's intention to ensure that portfolio companies have strong management teams, there can be no assurance that any portfolio company's management team will be able to operate successfully. With respect to early-stage or recently developed investment opportunities, Hillhouse may have limited ability to evaluate the management of such companies based on past performance, and such companies may rely more on individual members of the management team than would be the case for more established companies. Instances of fraud and other deceptive practices committed by the management teams of portfolio companies in which a client has an investment may undermine Hillhouse's due diligence efforts with respect to such companies. If such fraud is discovered, it could materially adversely affect the valuation of a client's investments and may contribute to overall market volatility that could negatively impact a client's investments.

Uncertainty of Financial Projections. Projected operating results provided by companies or generated internally will normally be based primarily on management or internal judgments. In all cases, projections are only estimates of future results that are based upon assumptions made at the time that the projections are developed. There can be no assurance that the projected results will be obtained, and actual results may vary significantly from the projections. General economic conditions, which are not predictable, can have a material adverse impact on the reliability of projections.

Additional Capital Requirements of Portfolio Companies. Certain of the clients' portfolio companies or pooled investment vehicle holdings, especially those in a development, acquisition,

or “platform” phase, may require additional financing to satisfy working capital requirements or acquisition strategies. Following its initial investment in a company, a client may be called upon to provide additional capital to, or have the opportunity to increase its investment in, an investment opportunity. Although clients may make a follow-on investment, there is no assurance that those clients and their co-investors (if any) will provide all necessary follow-on capital. The amount of such additional financing will depend upon the maturity and objectives of the particular portfolio company. Each such round of financing (whether from a Fund or other investors) is typically intended to provide enough capital to reach the next major corporate milestone. If the funds provided are not sufficient, a portfolio company may have to raise additional capital at a price unfavorable to the existing investors, including the relevant client, or there may be severe penalties for a failure to fund required contributions. In addition, a client or such other investor may make additional debt and equity investments or exercise warrants, options or convertible securities that were acquired in the initial investment in a portfolio company in order to preserve the Fund’s proportionate ownership when a subsequent financing is planned, or to protect the investor’s investment when such portfolio company’s performance does not meet expectations. The availability of capital is generally a function of capital market conditions that are beyond the control of an investor or any portfolio company. There can be no assurance that a portfolio company will be able to predict accurately the future capital requirements necessary for success or that additional funds will be available from any source.

Bridge Financings. From time to time, a client may lend with respect to an investment or a potential investment on a short-term, unsecured basis in anticipation of a future issuance of equity or long-term debt securities. Such bridge loans would typically be convertible into a more permanent, long-term security. However, for reasons not always in such client’s control, such long-term securities may not be issued and such bridge loans may remain outstanding. In such event, the interest rate on such loans may not adequately reflect the risk associated with the unsecured position taken by that client.

Controlling Interests. Because of its equity ownership, representation on the board of directors and/or contractual rights, a client may often be considered to control, participate in the management of, or influence the conduct of portfolio companies. The designation of Hillhouse’s professionals as directors and exercise of control over a portfolio company may impose additional risks of liability for environmental damage, product defects, pension and other fringe benefits, failure to supervise management, violation of fiduciary duties, violation of laws and governmental regulations (including securities laws), and other types of liability, for which the limited liability generally afforded to Investors may be ignored. If these liabilities were to arise, a client may suffer a significant loss, exposing the assets of such client to claims by a portfolio company, its other security holders, its creditors, or governmental agencies, which may exceed the value of such client’s initial investment in that portfolio company.

Difficulty of Bringing Suit. The ability of a client to bring suit against a portfolio company or its directors, executive officers, or other shareholders may be limited. Portfolio companies are likely to be organized under the laws of countries other than the U.S., their directors and officers are likely to reside outside of the U.S., and substantially all of their assets may be located outside of the U.S. As a result, it is likely that a client will be unable to effect service of process within the U.S. upon such entities or their directors and officers. Even where an entity is successfully

sued in the U.S., enforcement of the judgment in certain jurisdictions is impossible and in other jurisdictions may be difficult.

Disclosure of Shares and Short Swing Profit Rule. Under PRC disclosure of interest requirements, clients investing in A Share Investments via Stock Connect or the QFII program may be deemed to be acting in concert with other funds managed by HCA and certain of its affiliates or a substantial shareholder or client of HCA, and therefore may be subject to the risk that the relevant client's holdings may have to be reported in aggregate with the holdings of other funds or clients should the aggregate holding trigger the reporting threshold under PRC law, which is currently 5% of the total issued shares of the relevant PRC listed company. This may expose clients' holdings to the public and may adversely impact the performance of such clients.

In addition, subject to the interpretation of PRC courts and PRC regulators, the operation of the PRC short swing profit rule may be applicable to clients' investments with the result that where the holdings of such clients (possibly with the holdings of other investors deemed as concert parties of the clients) exceed 5% of the total issued shares of a PRC listed company, the clients may not reduce their holdings in such company within six months of the last purchase of shares of such company. If clients violate the rule and sell any of their holdings in such company in the six month period, they may be required by the listed company to return any profits realized from such trading to the listed company. Moreover, under PRC civil procedures, the clients' assets may be frozen to the extent of the claims made by such company.

Local Intermediary Risk. Client transactions may be undertaken through local brokers, banks, or other organizations, and the clients will be subject to the risk of default, insolvency, or fraud of such organizations. Such local brokers, banks, and other organizations are subject to various laws and regulations in various jurisdictions that are designed to protect their customers in the event of insolvency. However, the practical effect of these laws and their application to clients' assets are subject to substantial limitations and uncertainties. There can be no assurance that any money advanced to such organizations will be repaid or that the clients would have any recourse in the event of default. The collection, transfer, and deposit of bearer securities and cash expose clients to a variety of risks including theft, loss, and destruction.

ITEM 9: DISCIPLINARY INFORMATION

To Hillhouse's knowledge, after due inquiry, none of HCM, its affiliates (including any Local Entity), or any of their respective management personnel has been involved in, or subject to, any disciplinary events or legal actions that would be material to a client's or prospective client's evaluation of HCM's advisory business or the integrity of Hillhouse's management.

ITEM 10: OTHER FINANCIAL INDUSTRY ACTIVITIES AND AFFILIATIONS

None of HCM, any Local Entity, or any member of their management is registered, or has an application pending to register, as a broker-dealer, a registered representative of a broker-dealer, a futures commission merchant ("FCM"), a commodity pool operator ("CPO"), a commodity trading advisor ("CTA"), or an associated person of a registered FCM, CPO, or CTA. HCM and certain of its affiliates act as CPOs for certain of its clients, but they are exempt from registration with the Commodity Futures Trading Commission ("CFTC") pursuant to CFTC Rule 4.13(a)(3)

under the U.S. Commodity Exchange Act, as amended. This exemption is based primarily upon the clients' limited commodity interest trading. Unlike registered CPOs, HCM and its relevant affiliates are not required to deliver to investors disclosure documents or certified annual reports contemplated by CFTC rules applicable to registered CPOs. Likewise, HCM and certain of its affiliates act as CTAs for some of their clients, but are exempt from registration as CTAs and therefore are not required to satisfy certain requirements contemplated by CFTC rules applicable to registered CTAs.

Certain members of Hillhouse's management constitute and/or serve as the directors of general partners of certain of the Funds, such as HCM, Gaoling Fund GP, Ltd., Hillhouse Fund II GP, Ltd., Hillhouse Fund III GP, Ltd., HCM UB Co-Invest GP, Ltd., and HHCDR GP, Ltd. Hillhouse is also under common control with HCM, Gaoling Fund GP, Ltd., Hillhouse Fund II GP, Ltd., Hillhouse Fund III GP, Ltd., HCM UB Co-Invest GP, Ltd., and HHCDR GP, Ltd. Such relationships create a potential conflict of interest, which Hillhouse seeks to address in a number of ways, including by disclosing the terms of the relevant partnership agreement to the clients' Fund investors.

HCM and the Local Entities are under common control. All qualifying Hillhouse personnel are treated as "access persons" by HCM within the meaning of Rule 204A-1 under the Advisers Act, and are subjected to Hillhouse's Code of Ethics. Please see Item 11, "Code of Ethics, Participation or Interest in Client Transactions, and Personal Trading" below for additional information about Hillhouse's Code of Ethics.

HCM is also affiliated through common ownership with HCA. HCA is an SEC-registered investment advisor that provides investment advice with respect to A Share Investments, including securities permitted to be acquired by persons licensed as a QFII by the CSRC or purchased through the Stock Connect programs. HCA's focus on A Share Investments into the China public equities market places unique limits on its investment advice and requires that HCA follow a substantially less diversified strategy than HCM and limits HCA to a unique client base. HCA's investment advisory clients are limited to investing in A Share Investments. HCA's advice is provided on a discretionary and non-discretionary basis.

HCM's clients may not have QFII licenses and, therefore, are precluded from investing directly in A Share Investments as QFII license holders. However, a structured investment vehicle has been formed in connection with a QFII quota/license held by an affiliate of HCM and HCA, thereby permitting certain HCM clients access to A Share Investments through a QFII quota/license. As a result, a portion of HCM's assets under management are invested in such structured investment vehicle. This structured investment vehicle is advised by HCA as to the investments of the relevant QFII Investment. There are no additional charges or fees incurred by the structured investment vehicle for HCA's services.

In addition, HCM may access A Share Investments through third-party derivative products or a limited number of securities covered by the Stock Connect program. Likewise, many companies that list A Share Investments also offer other classes of securities in jurisdictions or on exchanges outside of the PRC ("Parallel China Shares"). Consequently, HCM's clients and investors in the Funds may obtain exposure to A Share Investments through direct ownership, derivative instruments, Parallel China Shares, investing in other classes of securities issued by

companies that also issue A Share Investments, or other arrangements, subject to availability of the aforementioned products. HCM and HCA may, in some instances, follow the same strategies with respect to A Share Investments or similar securities, although there is no obligation for HCM and HCA to act at the same time or in the same manner. Therefore, investment results may differ as between HCM's clients and HCA's clients. To address these potential conflicts of interests, Hillhouse has adopted policies and procedures, including a Code of Ethics. Please see Item 11, "Code of Ethics, Participation Interest in Client Transactions, and Personal Trading," below for additional information about Hillhouse's Code of Ethics.

HCM and HCA use shared personnel for certain services, including personnel of the Local Entities. Shared personnel may include back office personnel as well as professionals who provide portfolio advice. Such shared personnel may have conflicts of interest in allocating their time and resources between HCM and HCA. Different performance or management compensation structures or incentives may apply to shared personnel, which may also create a conflict of interest. Hillhouse has adopted policies and procedures, including a Code of Ethics, to address these potential conflicts of interests.

Different performance and management fees may be charged for substantially similar products HCM manages or advises, which may also create a conflict of interest. Please see Item 5, "Fees and Compensation" above for information regarding how HCM is compensated by its clients, the potential conflict of interest created by allocating investment opportunities among clients, and how HCM addresses the potential conflict of interest.

HCM does not recommend or select other investment advisers for its clients. None of HCM, HCA, or any Local Entity receives compensation, directly or indirectly, from any of the others for any recommendation of the other. In addition, none of HCM, HCA, or any Local Entity, directly or indirectly, pays or receives compensation to or from third parties in connection with recommending advisory services.

Other conflicts not discussed above may arise in connection with HCM's advisory business.

ITEM 11: CODE OF ETHICS, PARTICIPATION OR INTEREST IN CLIENT TRANSACTIONS, AND PERSONAL TRADING

General Code of Ethics

Hillhouse expects its employees to be responsible for maintaining the highest ethical standards when conducting business. In keeping with these standards, Hillhouse's employees must always place its clients' interests ahead of their own. Moreover, Hillhouse's employees should adhere to the spirit as well as the letter of the law and be vigilant in guarding against anything that could inappropriately skew their judgment.

Pursuant to Rule 204A-1 under the Advisers Act, Hillhouse has adopted a Code of Ethics (the "Code") which sets forth standards of business and personal conduct for all Hillhouse employees, and addresses conflicts of interest that may arise from personal trading by employees or gifts and entertainment received or provided by employees. The Code sets forth, among other things, standards for the purpose of deterring wrongdoing and promoting: (i) honest and ethical

reporting; (ii) full, fair, accurate, timely, and understandable disclosure in reports and documents; (iii) compliance with applicable laws, rules, and regulations; (iv) prompt internal reporting of violations of the Code; and (v) accountability for adherence to the Code. Clients or potential clients may obtain a copy of the Code free of charge by writing to Hillhouse's Chief Compliance Officer at the address on the cover page of this brochure.

Interest in Client Transactions

Clients of HCM and its affiliates (such persons, the "Other Hillhouse Investors") may hold investments similar to or the same as those made or proposed to be made by other of HCM's clients. Investments held by Other Hillhouse Investors may be in the same or similar securities as those held by HCM's other clients, but acquired at different times, at lower or higher prices or valuations, and on different terms than those upon which HCM's clients acquire an investment. The different prices paid for, or terms of, securities held by the Other Hillhouse Investors may create conflicts of interest. Hillhouse has adopted an aggregation and allocation policy to help assure investment opportunities are recommended or allocated in a fair and equitable manner. As described more fully in Item 5 under "Fees and Compensation," Hillhouse takes various factors into account in making recommendation and allocation decisions.

Please see Item 5, "Fees and Compensation," and Item 10, "Other Financial Industry Activities and Affiliations," above for a discussion of the potential conflict of interest created by allocating investment opportunities among client accounts and how Hillhouse addresses the potential conflict of interest.

Personal Trading

The Code is designed to assure that the personal securities transactions, activities, and interests of Hillhouse's employees do not interfere with their judgment in advising Hillhouse's clients. Hillhouse discourages its employees from personal trading due to the conflicts of interest (real and apparent) that such trading may present. Employees must seek pre-clearance for all reportable personal securities transactions and provide post-trading details of all approved personal trades. Employees also must provide Hillhouse with detailed information regarding their reportable personal securities holdings, which they must update on a quarterly basis. Although employees are not prohibited from personal trading, employees are prohibited from short-term trading or speculation, and employees must present any investment opportunities suitable for any investment strategy of Hillhouse's clients to such clients prior to engaging in any transaction related thereto for personal benefit. To minimize the risk of potential conflicts of interests, employees and their immediate family members may not, directly or indirectly, make personal trades in any security, company, asset, or investment product (i) located in or having a substantial business relation to Asia, or (ii) under research, traded in, or contemplated to be traded in by Hillhouse, in each case without the consent of the Chief Compliance Officer.

Service on Boards of Directors

Representatives of HCM, HCA, or their other affiliates (including the Local Entities) may, from time to time, serve on the boards of directors of portfolio and other companies. A Hillhouse representative serving as a director for a company has fiduciary duties to the company, as well as

to Hillhouse's clients. These separate fiduciary obligations may create conflicts of interest that must be mitigated to ensure the Hillhouse representative serving as director does not breach his or her fiduciary obligations. In addition, if Hillhouse obtains material, non-public information by virtue of a representative serving as a director of a company, Hillhouse may be precluded from trading or making a recommendation with respect to the securities of such company. Hillhouse has adopted internal policies and procedures to address conflicts of interest that may arise in connection with service on the board of directors of a company.

Other Business Ventures

Hillhouse, its affiliates, and its clients may engage in other business ventures to the extent not prohibited by agreements with its clients, independently or with others, including ventures involving investing in securities or managing or participating in other investment funds, or pursuing co-investments with Hillhouse's clients, or otherwise investing in portfolio companies independently of its clients. Other ventures undertaken by Hillhouse and its affiliates may be competitive with its clients. Conflicts of interest may arise as a result of such activities, including in allocating management time, services or functions and allocating investment opportunities.

In addition, as discussed above, HCM and its affiliates may provide investment advisory services to co-investment arrangements or portfolio companies, and may also invest directly or indirectly in investment opportunities. Hillhouse recognizes the potential for conflicts in these situations and relies upon its allocation and other internal policies and procedures to ensure fair and equitable allocation of investment opportunities, and to address other potential conflicts of interest.

Other conflicts not discussed above may arise in connection with the management and operation of HCM's clients.

ITEM 12: BROKERAGE PRACTICES

HCM has discretionary authority to invest client assets under its management and thereby direct trades. HCM chooses various brokers for more efficient and/or less expensive transactions, or for non-financial relationship reasons. HCM endeavors to select brokers that provide the best execution for securities transactions so that a client's total costs or proceeds in each transaction are the most favorable under the circumstances ("Best Execution"). In selecting brokers to effect portfolio transactions, HCM considers various factors, including, without limitation: price; quality of execution, including the reliability, promptness, level of accuracy and confidentiality in executing orders; extensiveness of the broker's distribution network; commission rates or other transaction costs; HCM's access to the broker's trading desk; the broker's familiarity with HCM's investment practices; and the value of certain brokerage or research services. HCM does not consider whether it receives referrals from a broker-dealer or third party in selecting a broker.

Directed Brokerage

Clients may sometimes request that HCM use a particular broker-dealer to effect transactions in recognition of services the clients receive from the broker-dealer or from a third party. Agreement to any such request by a client must be pre-approved by Hillhouse's Chief

Compliance Officer. A client's direction of brokerage services may cost the client more money and may prevent the client from receiving the most favorable execution of the client's transactions.

Soft Dollar Arrangements

Hillhouse may enter into arrangements whereby Hillhouse receives research or other products or services (other than execution) from a broker or other third party in connection with client securities transactions, known as "soft dollar benefits." These soft dollar benefits would be received in connection with commission fees paid to those brokers to execute client transactions. These research products and services would be intended to provide Hillhouse with valuable research and services that Hillhouse would otherwise have to produce or purchase from third parties with its own funds.

Any transaction in which soft dollar benefits are being received will be carefully evaluated to determine that the transaction complies with HCM's duty to seek Best Execution. However, as a result of any soft dollar benefits Hillhouse receives, HCM may have an incentive to select or recommend a broker based on receipt of soft dollar benefits.

Section 28(e) of the Securities Exchange Act of 1934 establishes a safe harbor allowing investment managers to use client funds, by way of commission dollars, to purchase certain "brokerage and research" services. Pursuant to this safe harbor, the brokerage and research services must provide HCM with lawful and appropriate assistance in the performance of its investment decision-making responsibilities. Further, HCM will make a good faith determination that the amount of commissions paid by clients is reasonable in light of the value of the brokerage or research services received. This means that clients may pay commissions to a broker in an amount greater than the amount another broker might charge.

Hillhouse believes that the products or services it may obtain through soft dollar arrangements would benefit all of its relevant client accounts, rather than benefitting just one account. Hillhouse currently does not require soft dollar benefits to be allocated proportionately to the amount of soft dollar benefits generated by each client account. Therefore, it is possible that such soft dollar benefits may provide a benefit to some clients who have not generated a proportionate share of commissions used to pay for these benefits. However, it is also possible that clients may benefit from these arrangements to a greater extent than the commissions they generated.

Hillhouse has instituted certain procedures governing soft dollar benefits. Soft dollar benefits may be received from a broker in consideration of directing transaction business on behalf of a client to the broker only if:

- The soft dollar products or services fall within the Section 28(e) safe harbor;
- The soft dollar products or services are of demonstrable benefit to Hillhouse's clients;
- Hillhouse seeks to affirm that the soft dollar product or service assists in the investment decision-making process and the commissions paid are reasonable in relation to the products or services received;
- Transaction execution is consistent with Best Execution standards and brokerage rates are

- not in excess of customary full-service brokerage rates;
- Disclosure is made to clients of Hillhouse's practices for receiving the soft dollar products or services; and
- The client(s) has consented in writing to the receipt of soft dollar products or services.

Trade Aggregation

HCM generally aggregates its client orders when doing so will result in a better overall price for its clients' trades and as otherwise consistent with the terms of its allocation policies. Aggregation or "bunching" describes a procedure whereby an investment manager combines the orders of two or more clients into a single order for the purpose of obtaining better prices and lower execution costs. Aggregation opportunities generally arise when more than one client is capable of purchasing or selling a particular security based on investment objectives, net asset value, available cash, lifespan of HCM's clients and other factors. HCM will not aggregate orders among clients of HCM and/or its affiliates where such activity is inconsistent with or is prohibited by local law, regulations or exchange rules.

ITEM 13: REVIEW OF ACCOUNTS

HCM reviews and evaluates its clients' investment objectives and performance on a quarterly basis. HCM also reviews strategies to ensure compliance with investment objectives and restrictions. Reviews are primarily conducted by the relevant portfolio manager and may periodically be conducted by an Investment Committee that is comprised of Hillhouse's Chief Investment Officer and other senior members of Hillhouse's research team.

Client Reports

Fund investors receive an annual report containing audited financial statements following the end of the Fund's fiscal year. Fund investors also receive relevant tax information for the Fund in which they are invested. In addition, HCM's third-party administrator delivers to investors an unaudited statement of an estimate of the account and account balance(s) and any capital contributions or withdrawals since the preceding month-end generally within 30 days after the end of each calendar month for HCM's NAV Funds and within 60 days after the end of each calendar quarter for HCM's PE Funds, or as soon thereafter as is reasonably possible. These written financial statements and reports typically do not include a listing of portfolio investments.

ITEM 14: CLIENT REFERRALS AND OTHER COMPENSATION

Neither Hillhouse nor a related person of Hillhouse, directly or indirectly, compensates any person for client referrals. Should Hillhouse determine to enter into a solicitation arrangement for client referrals, Hillhouse will disclose the arrangement in writing as required by Rule 206(4)-3 under the Advisers Act and will comply with all other applicable requirements of the Rule.

No person, other than HCM's clients, provides HCM with an economic benefit for providing advisory services to its clients. Please see Item 12, "Brokerage Practices," above for a discussion

of certain soft dollar benefits that HCM may receive in connection with certain brokerage relationships.

A related person of Hillhouse may, from time to time, serve as a director on the board of a public or private company in which one or more of HCM's clients invest. Hillhouse may receive director's fees in connection with such service. Item 11, "Code of Ethics, Participation or Interest in Client Transactions, and Personal Trading," further describes Hillhouse's process for addressing conflicts of interest created by its related persons serving as directors.

ITEM 15: CUSTODY

HCM may be deemed to have custody over certain of its clients' assets under Rule 206(4)-2 of the Advisers Act (the "Custody Rule") because of its authority to access client assets and its role as a general partner of a Fund. The term "custody" is defined under the Custody Rule as holding, directly or indirectly, client funds or securities, or having any authority to obtain possession of them. HCM does not physically hold client assets. Instead, HCM maintains client securities and funds with a "qualified custodian" in accordance with the Custody Rule. Client funds and securities are held with a bank, broker-dealer, or other independent, qualified custodian. Hillhouse's Chief Compliance Officer is responsible for ensuring that any qualified custodian with custody of client assets is properly qualified. Further, HCM may satisfy the audit provision of Rule 206(4)-2 under the Advisers Act - the Custody Rule - through an annual audit of the relevant clients. Where required, audited financial statements are prepared and delivered to underlying investors in accordance with the Custody Rule. Item 13, "Review of Accounts" above describes the content and frequency of other reports delivered to underlying investors.

ITEM 16: INVESTMENT DISCRETION

HCM serves as investment adviser to the Funds pursuant to written investment management agreements. Pursuant to HCM's existing Fund agreements, HCM has discretionary authority to manage assets on behalf of the Funds, including authority to determine which investments are bought and sold and the amounts appropriate for each client. Any limitation on HCM's authority is described in the written investment management agreements and/or the Funds' governing documents. HCM only purchases and sells securities or other financial instruments consistent with the Funds' objectives. Hillhouse's Chief Investment Officer, in consultation when appropriate with Hillhouse's Chief Compliance Officer, is primarily responsible for ensuring that the securities or other financial instruments recommended are consistent with the respective Fund's investment objectives.

HCM also may enter into written investment management or advisory agreements with managed account clients on a discretionary or non-discretionary basis. Hillhouse's Chief Investment Officer, in consultation when appropriate with Hillhouse's Chief Compliance Officer, is primarily responsible for ensuring that client investments are consistent with the relevant client's investment objectives and, in any event, the approval of both such officers will be required for HCM to assume discretionary authority to manage a client's investments. Certain of HCM's clients may place limits on HCM's investment advice.

Further, before new clients are accepted, Hillhouse's Chief Investment Officer and Hillhouse's Chief Compliance Officer will jointly assess and approve HCM's management of such client investments.

ITEM 17: VOTING CLIENT SECURITIES

Hillhouse has and will accept proxy voting authority to vote client securities. This creates a potential conflict of interest because of the possibility of Hillhouse voting client securities to further its own interests at the expense of its clients' interests. Hillhouse takes seriously its responsibility to exercise proxies on behalf of clients and have adopted written policies and procedures to do so in a manner consistent with Rule 206(4)-6 promulgated under the Advisers Act. These policies and procedures are reasonably designed to ensure that proxies are voted in the best interest of Hillhouse's clients, which generally means voting proxies with a view to enhancing the value of client securities.

The financial interest of Hillhouse's clients is the primary consideration in determining how proxies should be voted. Further, as the decision to invest in a company normally represents confidence in the company's management, Hillhouse will typically give serious consideration to management recommendations. Hillhouse will generally support management recommendations regarding internal operations and those without significant economic effects. Conversely, management proposals that are likely to have significant economic effects, involve management interests or where Hillhouse lacks confidence in the management team will be subject to greater scrutiny on a case-by-case basis. The following is a brief summary of principles, rather than rules, that reflect the long-term approach that guides (but does not obligate) Hillhouse's investment and proxy voting decisions regarding common proxy proposals.

1. Board of Directors: Hillhouse will generally support resolutions that promote the effectiveness of boards in acting in the best interest of shareholders. Hillhouse generally supports the election of a majority of independent directors.
2. Auditors and Auditor Compensation: Where all members of a company audit committee are independent, Hillhouse will generally support the election of directors, the appointment of auditors, and the approval of the auditor compensation recommended by the board of directors.
3. Changes in Capitalization: Hillhouse recognizes the need for the management of a company to have flexibility to issue or repurchase shares to meet changing financial conditions. Hillhouse will generally support changes in capitalization when a reasonable need for change is demonstrated. Hillhouse is, however, aware that new shares may dilute the ownership interest of shareholders, and Hillhouse will not generally support changes resulting in excessive dilution of existing shareholder value.
4. Corporate Restructuring, Mergers, and Acquisitions: Hillhouse believes proxy votes dealing with corporate reorganizations are an extension of the investment decision. Accordingly, Hillhouse will analyze such proposals on a case-by-case basis, weighing heavily the views of its research analysts that cover the company and its investment professionals managing the portfolios in which the stock is held.

5. Management Compensation: Hillhouse's goal is to support compensation arrangements that are tied to long-term corporate performance and shareholder value. These arrangements should better align management's interests with those of shareholders and should induce management to purchase and hold equity in the company. Stock option plans that are overly generous or excessively dilutive to other shareholders generally will not be supported.
6. Other Issues: Hillhouse will address business issues specific to a company or those raised by shareholders of a company on a case-by-case basis with a focus on the potential impact of the vote on value for its clients.

Procedurally, Hillhouse will take reasonable measures under the circumstances to obtain knowledge of meetings and other events giving rise to solicitation of proxies, assure that proxies are received in sufficient time for Hillhouse to take action, vote proxies, and return the proxies to the parties soliciting them in time to be counted. Clients may direct (in certain cases) the vote of Hillhouse in a particular solicitation, obtain information from Hillhouse about how it voted clients' securities, and obtain a copy of Hillhouse's proxy voting policies and procedures by writing to Hillhouse Capital Management, Ltd., Attn: Chief Compliance Officer, at the address on the cover page of this Brochure.

If a Hillhouse representative serves on the board of directors for a portfolio company in which a client invests, unique conflicts of interest in relation to proxies may exist. In such circumstances, Hillhouse's Chief Compliance Officer or its designee will undertake a review prior to any vote by the proxy recipient to determine whether a material conflict of interest exists between the applicable Hillhouse representative and the interests of the client, or between the Hillhouse representative and the client and company shareholders. In the event a material conflict of interest is identified, the Chief Compliance Officer or his or her designee will take such steps as he or she deems necessary to determine how to vote the proxy in the best interests of the relevant client. In each instance, when exercising their voting discretion, Hillhouse representatives will seek to avoid any direct or indirect conflict of interest between the client(s) and their voting decisions.

ITEM 18: FINANCIAL INFORMATION

There is no financial condition that is reasonably likely to impair HCM's ability to meet its contractual commitments to clients.
