March 12th, 2020

This wrap brochure provides information about the qualifications and business practices of Nations Financial Group, Inc. ("NFGI"). This information should be considered before participating in one of our programs. If you have any questions about the contents of this wrap brochure, please contact us at 319-393-9541 or compliance@nationsfg.com. The information in this brochure has not been approved or verified by the United States Securities and Exchange Commission or by any state securities authority.

Additional information about NFGI also is available on the SEC's website at www.adviserinfo.sec.gov. You can search this site by a unique identifying number, known as a CRD number. Our firm's CRD number is 44181.

NFGI is a Registered Investment Adviser. **Registration as an investment adviser does not imply any level of skill or training.**

Item 2 Material Changes

The material changes since the last annual Brochure dated 03/25/2019 include:

- Item 4 – Addition of NFGI Portfolios – Equity and Tactical.
- Item 9 – Included information from Part 2 regarding industry affiliations, brokerage services, cash sweep program, non-purpose loans, and conflicts.

The above is only a summary and does not purport to identify every change to the Brochure since the last annual update. Additional information about each change referred to above may be found in the applicable section of the Brochure. Clients are encouraged to read the Brochure in detail and contact Nations Financial Group, Inc. (NFGI) with any questions.

Item 6	Portfolio Manager Selection and Evaluation	18
Item 7	Client Information Provided to Portfolio Managers	19
Item 8	Client Contact with Portfolio Managers	20
Item 9	Additional Information	20

Item 4 Services Fees and Compensation

Nations Financial Group, Inc. is a SEC-registered investment adviser with its principal place of business located in Iowa. Nations Financial Group, Inc. began conducting business in 1999. We are considered a fiduciary according to the Investment Advisors Act of 1940. As a fiduciary, it is our responsibility to provide fair and full disclosure of all material facts and to act solely in the best interest of each of our clients at all times.

We sponsor the NFGI Wrap Program (the "Program"), a wrap fee program. A wrap fee program is an advisory program under which a specified fee or fees not based directly on transactions in the Client's account is charged for advisory services, which includes portfolio management or advice on the selection of investments, and the execution of Client transactions.

NFGI WRAP PROGRAM

The NFGI Wrap Program is a discretionary or non-discretionary, investment program in which your Investment Adviser Representative (IAR) or Third-Party Manager provides a broad range of investment recommendations based on your investment objectives, financial circumstances, and risk tolerance. As a minimum criterion for providing these services, NFGI requires the Portfolio Managers to possess satisfactory past business experience, plus any required industry examinations and registrations.

Most types of securities are eligible for purchase in the NFGI Wrap Program account including, but not limited to, common and preferred stocks, exchange-traded products, closed end funds, fee-based unit investment trusts, corporate and government bonds, certificates of deposit, options, structured products, certain mutual funds whose shares can be purchased at net asset value, cash, variable annuities, and certain wrap class alternative investments, such as REITs, hedge funds and managed futures. Collectively, these are referred to as "Program Assets."

Hedge funds and managed futures are not suitable for all investors. Hedge funds are complex investment vehicles that often use leverage and other speculative investment practices, such as short sales, options, derivatives, futures and illiquid investments that may increase the risk of investment loss. Managed futures are speculative investments that are subject to a significant amount of risk. This Brochure is not a solicitation, recommendation or invitation to invest in alternative investments and is intended solely to disclose the availability of alternative investments within NFGI's Wrap Program.

While new-issue CDs are an eligible Program Asset, the yield of new-issue CDs takes into account a sales concession in order to compensate the brokerage firms that sell the CDs. For certain advisory accounts, the underwriter retains this sales concession. The Firm Broker Dealer may retain the concession, but the IAR does not receive the sales concession, the sales concession has an impact on the overall yield paid to you. Since we charge an advisory fee on all eligible assets within an advisory Account, you are effectively charged both the sales concession (retained by the underwriter) and the advisory fee on the CD. These charges reduce the overall yield on the CD and, in some cases; this may result in a negative yield. You should be aware that you could obtain the same CDs without being subject to the advisory fee if you purchase it in a non-advisory brokerage Account.

The NFGI Wrap Program account may not be used for market timing strategies or similar activities for mutual funds or any extreme trading activity that the Firm, in its sole discretion, deems detrimental to the interest of average fund shareholders or contrary to the policies or interest of mutual fund companies with whom the Firm, or Clearing Agent maintains relationships. The Firm or Clearing Agent, in its sole direction, or by direction of the fund company, reserves the right to reject any transactions or to assess a redemption fee for any partial or full liquidation execution in which the account trading appears to be

inconsistent with the fund's prospectus. Furthermore, the Firm will cooperate, when asked by a fund company, to aid in its attempt to identify and impede the efforts of the IAR and investors engaging in market timing or extreme trading activity. If the fund company notifies the Firm to reject or cancel a trade for any reason, NFGI reserves the right to cancel such trade without prior notice to the Client. The Firm will not be held accountable for any losses resulting from market timing activities or any action taken under its market timing policies. In addition, the frequency of mutual fund transactions and exchanges is subject to any limits established by the applicable mutual funds and the Firm.

INDIVIDUAL PORTFOLIO MANAGEMENT

The IAR acts as the Portfolio Manager and provides continuous advice regarding the investment of your funds based on your individual needs. Through personal discussions, goals and objectives based on your particular circumstance are established, we identify your personal investment objective and create and manage a portfolio based on that objective. During our data-gathering process, among other things we determine your individual objectives, time horizons, risk tolerance, and liquidity needs. As appropriate, we also review and discuss your prior investment history.

We manage your funds on a discretionary or non-discretionary basis. Clients funds managed on a discretionary basis: These portfolios are managed primarily by utilizing stocks, bonds, covered options, variable annuity products, ETF's and mutual funds. In the discretionary accounts, the Investment Adviser Representative (IAR) primarily makes all investment decisions with or without consulting you. This discretion is only granted after receiving written approval from you via the contract. The IAR's discretion will solely relate to trading and will not allow the IAR to withdraw or journal your assets. Specific investment recommendations will vary depending on the individual IAR that you are working with. Client funds managed on a non-discretionary basis: These portfolios are managed primarily by utilizing stocks, bonds, covered options, variable annuity products, ETF's and mutual funds. The non-discretionary accounts investment recommendations will be presented to you by the IAR; however, the final investment decisions will be made by you. Specific investment recommendations will vary depending on the individual IAR that you are working with.

Account recommendations are guided by but not limited to your stated objectives, risk tolerance, time horizon, restrictions and guidelines, as well as tax considerations.

You may impose reasonable restrictions on investing in certain securities, types of securities, or industry sectors.

Because some types of investments involve certain additional degrees of risk, they will only be implemented/recommended when consistent with the Client's stated investment objectives, tolerance for risk, liquidity and suitability.

Portfolio Managers may use third-party research to assist in developing your portfolio. When seeking to anticipate trends and identify undervalued securities with sound fundamentals, Portfolio Managers may also use a security selection and portfolio modeling process that incorporates fundamental, technical and statistical analyses of historical data. Due to any number of factors, including timing of deposits, investment selection process or investment needs, certain Clients may receive different execution prices and investment results.

NFGI 401K PORTFOLIOS

We offer 5 portfolios to be used inside 401k's, when we work in a discretionary manner under a 3(38) arrangement. These mutual fund models are designed to fit the objectives of investors from Aggressive (typically 100% equities) to Conservative (typically 20% equity/80% income).

These mutual fund models are built to have a diversified strategy. Internal expenses are considered in these strategies. The portfolios may contain a large percentage in index funds to help keep the internal expenses down. However, index funds may not be used at all times.

The sections below cover NFGI 401K Portfolios:

- NFGI Aggressive
- NFGI Moderate Aggressive
- NFGI Moderate
- NFGI Moderate Conservative
- NFGI Conservative

The **NFGI Aggressive** strategy is for investors who are characterized as seeking long-term capital appreciation as their primary investment goal, with a long-term time horizon, little need for current income and a higher risk tolerance allowing for the potential of considerable volatility and interim periods of substantial loss of capital in exchange for potential higher longer-term returns. Risk levels are expected to be consistent with a broadly diversified all-equity portfolio. With an emphasis on long-term capital appreciation, exposures to small- to mid-cap and developed and emerging market international equities could represent the majority of the overall asset allocation.

The **NFGI Moderate Aggressive** strategy is for investors that are characterized as seeking significant growth of capital and income with a higher tolerance for risk. The dual mandate, greater risk tolerance and longer-term time horizon allow these investors to pursue higher-risk and generally more aggressive strategies that may offer higher potential returns. Diversified equities typically represent the majority of the blend. In addition to seeking income through dividend-paying equities, and fixed income exposure is generally maintained to enhance income yield and diversification

The **NFGI Moderate** strategy is for investors that are characterized as seeking both income and capital appreciation while incurring moderate levels of risk. Investors seek to balance potential risk with their goals for current income and moderate growth of capital. Based on these combined goals and risk considerations, both diversified fixed income and equities will typically account for significant portions of the overall asset allocation

The **NFGI Moderate Conservative** strategy is for investors that are characterized as having the dual objectives of generating both capital appreciation and current income while maintaining risk levels that are consistent with a more conservative investment approach. Based on overall risk considerations, these investors seek growth of assets to meet financial goals and protect purchasing power, while, relative to more aggressive mandates, maintaining safety of principal. As such, they are willing to accept lower potential returns in exchange for lower risk. Based on the combined risk, return and yield objectives, the asset allocation for these investors generally maintains the majority of assets in diversified fixed income investments, but with a complementary allocation to broadly diversified domestic and international equities.

The **NFGI Conservative** strategy is for investors that place emphasis on income generation versus capital appreciation. While the growth of assets and the maintenance of purchasing power remain considerations and are reflected in measured risk-taking, these objectives are constrained by both the income-generation objective and a greater emphasis on maintaining safety of principal. Based on these combined goals, these investors are expected to remain predominately invested in fixed income investments, including relatively moderate allocations to high yield and emerging market bonds, complemented by a moderate allocation to equities.

NFGI PORTFOLIOS

We offer portfolios to be used in a discretionary manner for Clients. These mutual funds, ETP, and equity models are designed to fit the objectives of investors from Aggressive (up to 100% equities) to Conservative (typically 30% equity/70% income). The **Asset Allocation** models are built to have a diversified strategy. The **Equity and Tactical** models focus may not be on diversification but rather to a primary investment goal or strategy.

NFGI Portfolios – Asset Allocation is a discretionary investment advisory program that offers a broad array of mutual funds or ETPs that invest in and across different investment asset classes and employ varied approaches to investment management. We have created a number of portfolios based on due diligence and asset allocation that we believe are appropriate for a number of different investment objectives. Based on your investment objectives, financial circumstances and risk tolerance, your IAR will recommend one of the models that will be managed on a discretionary basis.

The combination and allocation strategy of the selected mutual funds or ETPs in a Portfolio is based on our determination of the appropriate target asset allocation and/or risk/return profile for your investment objective and risk tolerance. The investments and allocations may be modified from time to time based upon changes in asset allocation guidance or our assessment of factors impacting individual positions or particular combinations. Additions to and withdrawals from your account will generally be allocated based on the target allocation you selected.

Fluctuations in the market value of assets, as well as other factors, will affect the actual allocation at any given time. We will generally rebalance the account annually, unless market conditions indicate we should do so more frequently. You may also request us to rebalance your account as necessary.

The sections below cover NFGI Portfolios – Asset Allocation:

- NFGI Aggressive (MF or ETP)
- NFGI Moderate Aggressive (MF or ETP)
- NFGI Moderate (MF or ETP)
- NFGI Conservative (MF or ETP)

NFGI Aggressive - Aggressive investors are characterized as seeking long-term capital appreciation as their primary investment goal, with a long-term time horizon, little need for current income and a higher risk tolerance allowing for the potential of considerable volatility and interim periods of substantial loss of capital in exchange for potential higher longer-term returns. Risk levels are expected to be consistent with a broadly diversified all-equity portfolio. With an emphasis on long-term capital appreciation, exposures to small- to mid-cap and developed and emerging market international equities will typically represent the majority of the overall asset allocation.

NFGI Moderate Aggressive - Moderate Aggressive investors are characterized as primarily pursuing growth of principal and being willing to tolerate volatility consistent with the maintenance of a primarily equity portfolio in pursuit of this objective. These investors do not need their portfolios to provide current income but will look to non-equity exposure as a means to reduce risk and further enhance diversification. Based on these objectives, the asset allocation for these investors will remain predominately in diversified domestic and international equities, while relying on fixed income securities to moderately temper the overall risk level. Within equities considerable exposure will be maintained in asset classes with relatively higher longer-term growth potential, including mid- and small-cap stocks and emerging markets.

NFGI Moderate - Moderate investors are characterized as seeking both income and capital

appreciation while incurring moderate levels of risk. Investors seek to balance potential risk with their goals for current income and moderate growth of capital. Based on these combined goals and risk considerations, both diversified fixed income and equities will typically account for significant portions of the overall asset allocation

NFGI Conservative - Conservative investors are characterized as having the dual objectives of generating both capital appreciation and current income while maintaining risk levels that are consistent with a more conservative investment approach. Based on overall risk considerations, these investors seek growth of assets to meet financial goals and protect purchasing power, while, relative to more aggressive mandates, maintaining safety of principal. As such, they are willing to accept lower potential returns in exchange for lower risk. Based on the combined risk, return and yield objectives, the asset allocation for these investors generally maintains the majority of assets in diversified fixed income investments, but with a complementary significant allocation to broadly diversified domestic and international equities.

NFGI Portfolios - Equity and Tactical is a discretionary investment advisory program that offers a broad array of mutual funds, ETPs, and individual equity positions that invest in and across different investment asset classes and employ varied approaches to investment management. These strategies may not be diversified and may have higher volatility than more diversified portfolios. Based on your investment objectives, financial circumstances and risk tolerance, your IAR will recommend one or more of the models that will be managed on a discretionary basis.

The portfolios may be derived from outside research providers and the portfolios may materially be modified. Additions to and withdrawals from your account will generally be allocated based on the target allocation you selected.

Fluctuations in the market value of assets, as well as other factors, will affect the actual portfolio allocation at any given time. These accounts may contain higher turnover levels and you should consider possible tax consequences before investing in these strategies.

The sections below cover NFGI Portfolios – Equity:

- NFGI Value
- NFGI Equity Total Return

NFGI Value - The Value strategy uses the following criteria to select stocks to create a portfolio, the criteria would include: Free Cash Flow levels, Net Profit Margin levels, Return on Equity levels, Retained Earnings level, and Liquidity.

This strategy may not be diversified and will primarily be equities only. Investors should be seeking long-term capital appreciation as their primary investment goal, with a long-term time horizon, little need for current income and a higher risk tolerance allowing for the potential of considerable volatility and interim periods of substantial loss of capital in exchange for potential higher longer-term returns.

NFGI Equity Total Return - The strategy is designed for long-term total return and looks for holdings that have a current yield at least equal to or greater than that of the S&P 500. The company must not have cut its regular dividend in the last five years at the time of entry into the model portfolio and that dividend must be secure based on our research.

This strategy may not be diversified and will primarily be equities only. Investors should be seeking long-term capital appreciation as their primary investment goal, with a long-term time

horizon, little need for current income and a higher risk tolerance allowing for the potential of considerable volatility and interim periods of substantial loss of capital in exchange for potential higher longer-term returns.

The sections below cover NFGI Portfolios – Tactical:

- NFGI OTC Long/Short
- NFGI Interest Rate Long/Short
- NFGI Income
- NFGI Growth
- NFGI Low Duration

NFGI OTC Long / Short - This strategy is designed for investors looking to potentially enhance their portfolios investment performance. Based on our tactical research this strategy will use ETFs that either can be invested in the Nasdaq 100, Treasury ETFs, Cash or an inverse of the Nasdaq 100.

This strategy is not diversified and will have higher levels of turnover which investors should consider the tax implications. Investors should be seeking long-term capital appreciation as their primary investment goal, with a long-term time horizon, little need for current income and a higher risk tolerance allowing for the potential of considerable volatility and interim periods of substantial loss of capital in exchange for potential higher longer-term returns.

NFGI Interest Rate Long / Short - This strategy is designed for investors looking to potentially enhance their portfolios investment performance. Based on our tactical research this strategy will either be invested in a Government Bond Fund, Cash or an inverse of Government Bond fund.

This strategy is not diversified and will have higher levels of turnover which investors should consider the tax implications. Investors should be seeking long-term capital appreciation as their primary investment goal, with a long-term time horizon, little need for current income and a higher risk tolerance allowing for the potential of considerable volatility and interim periods of substantial loss of capital in exchange for potential higher longer-term returns.

NFGI Income Portfolio - This strategy is designed for investors that want to participate in active management investment strategies inside of income-oriented sectors. Our research looks at using market and economic data with the performance of the financial markets to identify investment opportunities throughout the different sectors of Income investing.

This strategy is not diversified and will have higher levels of turnover which investors should consider the tax implications. Investors should be seeking long-term capital appreciation as their primary investment goal, with a long-term time horizon and a higher risk tolerance allowing for the potential of considerable volatility and interim periods of substantial loss of capital in exchange for potential higher longer-term returns.

NFGI Growth Portfolio – This strategy is designed for investors that want to participate in active management investment strategies with inside of all equity and income sectors. Our research looks at using market and economic data with the performance of the financial markets to identify investment opportunities throughout the different sectors of Income investing.

This strategy is not diversified and will have higher levels of turnover which investors should consider the tax implications. Investors should be seeking long-term capital appreciation as their primary investment goal, with a long-term time horizon and a higher risk tolerance allowing for the

potential of considerable volatility and interim periods of substantial loss of capital in exchange for potential higher longer-term returns.

NFGI Low Duration Portfolio – This strategy is designed for investors that want to participate in active management investment strategies but are not comfortable investing in higher growth-oriented portfolios. In addition to the traditional income sectors such as short-term government, municipal and corporate bonds, the Low Duration Portfolio also includes sectors such as global bonds and high yield investments.

This strategy is not diversified and will have higher levels of turnover which investors should consider the tax implications. Investors should be seeking long-term capital appreciation as their primary investment goal, with a long-term time horizon and a higher risk tolerance allowing for the potential of considerable volatility and interim periods of substantial loss of capital in exchange for potential higher longer-term returns.

NFGI WRAP PROGRAM FEE SCHEDULE

NFGI Wrap Program accounts are charged an all-inclusive fee that covers advisory, execution and reporting services. Billed quarterly in advance, the standard NFGI Wrap Program, fee schedule is based on program eligible assets:

Total Account Value	Annualized Fee
All Assets	2.50%*

*NFGI's 401K Portfolios offered as a 3(38) manager the fees will range from .10-.30%

*Discounts and tiers may be applied by the Investment Adviser Representatives (IARs)

Fees for advisory services are negotiable, thus vary from Client to Client. The fees you pay for advisory services will vary based on a number of factors including but not limited to; the specific IAR that is providing the service, the geographic location of the Client and IAR, the types of securities being managed, the account size, special service requests you may have and specific account related service requests of the Client.

The specific asset-based fees are documented in the advisory contract and/or fee schedule that you sign prior to providing services.

Accounts may hold assets that are considered non-billable or below the line. These may include assets held away but shadow posted in the account or certain mutual funds that have yet to convert to an advisory or lower cost share class.

NFGI believes its advisory services are competitively priced, however you may be able to receive similar services at a lower price elsewhere. Fees for consulting services will vary according to each IAR and their services provided.

Certain fee discounts may be provided to friends and family members of the IAR.

In addition to sponsoring this wrap fee program, NFGI has entered into an agreement with Wells Fargo Advisors ("WFA"), pursuant to which WFA provides advisory and/or other services with respect to the

Programs. Clients with advisory accounts described herein are Clients of NFGI. NFGI is not related to or affiliated with WFA or Wells Fargo Clearing Services (the "Clearing Agent"). Unless otherwise specified, the Clearing Agent will maintain custody of Client assets. Clearing Agent qualifies as a "qualified custodian" as described by Rule 206(4)-2 of the Investment Advisers Act. WFA and Clearing Agent each reserves the right to reject and not provide services to any Client or with respect to any Client account for any reason.

WFA provides advisory and other services to NFGI with respect to the following programs: *Personalized UMA*, *Fundsource*, and *Fundsource Fundamentals*. Please review the appropriate WFA Disclosure Documents for a complete description of each program. The fees for these programs should not exceed 2.5%.

WFA does not provide advisory services to NFGI with respect to Private Investment Management (PIM), Private Advisor Network (PAN), Asset Advisor, and CustomChoice. NFGI provides advise to client regarding the selection of advisory programs, WFA provides certain non-advisory services (such as: custody, execution services, billing and reporting) which enable NFGI to offer these programs.

Private Investment Management ("PIM")

With PIM, our IARs (called Portfolio Managers) provide investment advisory and brokerage services to your account on a discretionary basis. As a minimum criterion for providing advisory services, NFGI requires our Portfolio Managers to possess satisfactory past business experience, plus any required industry examinations and registrations. Based on your investment objectives and individual needs, your Portfolio Manager will have discretion to manage your assets to an appropriate investment strategy.

Portfolio Managers may use third-party research to assist in developing security selection models for PIM. When seeking to anticipate trends and identify undervalued securities with sound fundamentals, Portfolio Managers may also use a security selection and portfolio modeling process that incorporates fundamental, technical and statistical analyses of historical data. Due to any number of factors, including timing of deposits, investment selection process or investment needs, certain Clients may receive different execution prices and investment results.

Annual fees charged under these programs are billed quarterly in advance and are deducted directly from your accounts pursuant to the PIM ADV. When fees are negotiable, the negotiating factors include the complexity of your financial situation, securities positions held in the account, and the amount of assets under management.

The maximum annual fee charged in PIM equity and fixed income accounts shall not exceed 2.50% annually. Fees charged on accounts are negotiable.

Private Advisor Network

Through Private Advisor Network ("PAN"), our IAR will assist you in identifying an outside investment adviser to perform investment advisory services with respect to your assets. NFGI's services include matching personal and financial data provided by you with a roster of investment advisers, periodic evaluation and comparison of account performance, and continuing investment performance and objectives.

Your IAR will provide information on investment advisers that appears to meet your needs. Screening criteria may include the investment adviser's past record, management style, location, size of account, etc. With the assistance of your IAR, you may then choose one or more investment advisers to manage your assets.

All accounts are managed by the outside investment adviser(s) selected by you. Neither NFGI nor WFA has discretionary trading authority with respect to such accounts. Information collected by NFGI regarding PAN advisers is believed to be reliable and accurate but NFGI does not necessarily independently verify it on all occasions. NFGI does not assume responsibility for the conduct of investment advisers that Clients select, including their performance or compliance with laws or regulations.

Private Advisor Network accounts are charged an all-inclusive fee that covers, advisory, execution, custodial and reporting services. Billed quarterly in advance, the standard Private Advisor Network fee schedule is based on program eligible assets. The Fee Schedule does not include the investment adviser fees of the third-party investment manager. You pay for the services of the investment adviser separately. You authorize us to pay the separate investment advisory management fee invoiced by the adviser by debiting the Client account accordingly. It is your responsibility to determine if any such invoice from the investment adviser is proper or if the amount of fees charged is accurate. You may revoke NFGI's authorization to pay the investment adviser fee at any time by written notice.

The annualized fee charged under the Private Advisor Network typically ranges from 1.00% to 2.00% for equity and balanced accounts and 0.50% to 1.00% for fixed income accounts with fees being negotiable on accounts above \$2,000,000. Fees charged by outside investment advisers selected are billed and collected separately from the annual fee retained by us.

The total fee should not exceed 2.50%

Asset Advisor and CustomChoice

With Asset Advisor and CustomChoice, our IARs (called Portfolio Managers) provide investment advisory and brokerage services to your account on a non-discretionary basis. As a minimum criterion for providing advisory services, NFGI requires our Portfolio Managers to possess satisfactory past business experience, plus any required industry examinations and registrations. Based on your investment objectives and individual needs, your Portfolio Manager will recommend to an appropriate investment strategy.

Portfolio Managers may use third-party research to assist in developing security selection models for Asset Advisor and CustomChoice. When seeking to anticipate trends and identify undervalued securities with sound fundamentals, Portfolio Managers may also use a security selection and portfolio modeling process that incorporates fundamental, technical and statistical analyses of historical data. Due to any number of factors, including timing of deposits, investment selection process or investment needs, certain Clients may receive different execution prices and investment results.

Annual fees charged under these programs are billed quarterly in advance and are deducted directly from your accounts pursuant to the Asset Advisor and CustomChoice ADV. When fees are negotiable, the negotiating factors include the complexity of your financial situation, securities positions held in the account, and the amount of assets under management.

The maximum annual fee charged in Asset Advisor accounts shall not exceed 2.50% annually. Fees charged on accounts are negotiable.

The standard fee schedule under the Custom Choice Program is as follows:

- First \$250,000 of assets – 1.75%
- Next \$750,000 of assets – 1.50%
- Over \$1,000,000 of assets – 1.15%

HOW FEES ARE CHARGED

Asset Based - You will pay NFGI for its services and for the services of your IAR in advance on a quarterly basis, or as otherwise agreed upon between the parties and stated in the fee schedule. The initial fee will be immediately charged once the account is under agreement and funded. The fee will be prorated for the number of days in the partial quarter the account is under agreement by using the opening balance. Thereafter all account's quarterly fees will be charged in advance during the first month of the quarter and will be based on the ending account balance of the prior quarter. NFGI's fee will be debited from the account on payment date which is on or about the fifteenth business day of the month. Should you make a deposit or withdrawal during any quarter, the account may be charged or credited back a partial advisory fee. To determine whether a partial fee is applicable (generally on the 3rd week of the month); the net additions/withdrawals from the prior month are used to calculate a prorated fee on the amount. Should the prorated fee be a positive or negative \$40 or more, it will be debited from or credited to the account. Generally, deposits to accounts can increase fees charged and withdrawals from an account can reduce fees paid.

Fee schedules may be amended from time to time by NFGI upon thirty (30) days written notice to you. Any fee schedule charges previously in effect shall continue until the next billing cycle.

You may pay the aforementioned fees from outside funds provided that your IAR is notified in advance and outside funds are sufficient to pay the fees are paid to NFGI on or prior to payment date. You authorize NFGI to request a withdrawal of fees from the account. You will be notified of the quarterly fee on the statement that comes from the account custodian.

In some cases, the account value in which the fee is based may differ from the statement value on the custodian issued statement. This will generally occur in instances where the account has accrued interest or dividends past ex-date that have yet to post to the account.

For eligible securities purchased previously in a brokerage account and subsequently moved into an advisory account, these securities will be included in the calculation of fees for services and are in addition to any previous brokerage charges paid.

Accounts may hold assets that are considered non-billable or below the line. These may include assets held away but shadow posted in the account or certain mutual funds that have yet to convert to an advisory or lower cost share class.

You should be aware that program fees charged may be higher or lower than those otherwise available if you were to select a separate brokerage service and negotiate commissions in the absence of the extra advisory service provided.

You should consider the value of these advisory services when making such comparisons. The combination of custodial, advisory and brokerage services may not be available separately or may require multiple accounts, documentation and fees. You should also consider the amount of anticipated trading activity when selecting among the programs and assessing the overall cost. Advisory programs typically assume a normal amount of trading activity and, therefore, under particular circumstances, prolonged periods of inactivity or asset allocations with significant fixed income or cash weightings may result in higher fees than if commissions were paid separately for each transaction.

A portion of the fees or commissions charged for the programs described here will be paid to the IARs in

connection with the introduction of accounts as well as for providing Client-related services within the programs. This compensation may be more or less than an IAR would receive if you paid separately for investment advice, brokerage, and other services, and may vary, depending on the program or services offered.

Should you have a question on your quarterly fee you should contact NFGI at 1-800-351-2471.

Account Termination

Client signed agreements shall remain in full force and effect until NFGI receives written notice from you of its termination or until NFGI receives notice from the court or legally appointed person(s) in case of the Client's death or adjudicated incompetence. You have the right, within five (5) days of execution, to terminate the Client Agreement without penalty. In the event of cancellation of Client Agreements, fees previously paid pursuant to the fee schedule will be refunded on a pro rata basis, as of the date notice of such cancellation is received by the non-canceling party, less reasonable start-up costs.

If you choose to terminate your advisory agreement, we can liquidate your account if you instruct us to do so before removal from any program. If so instructed, we will liquidate your account in an orderly and efficient manner. We do not charge for such redemption; however, you should be aware that certain mutual funds impose redemption fees as stated in their fund prospectus. Any trade instructions given after termination of the agreement will be subject to applicable brokerage expenses like commissions. You should also keep in mind that the decision to liquidate security issues or mutual funds may result in tax consequences that should be discussed with your tax advisor.

We will not be responsible for market fluctuations in your account from the time of notice until complete liquidation. All efforts will be made to process the termination in an efficient and timely manner. Factors that may affect the orderly and efficient liquidation of an account might be size and types of issues, liquidity of the markets, and market makers' abilities. Should the necessary securities' markets be unavailable, and trading suspended, efforts to trade will be done as soon as possible following their reopening. Due to the administrative processing time needed to terminate an advisory account, termination orders cannot be considered market orders. It may take several business days under normal market conditions to process your request.

If an advisory agreement is terminated, but you maintain a brokerage account with us, your mutual fund shares may be exchanged for shares of another series of the same fund since they may no longer be eligible for the share class they are in. You are subject to the customary brokerage charges for any securities positions purchased or sold in your account after the termination of program services.

GENERAL INFORMATION

Product Fees (mutual funds / ETPs): All fees paid to NFGI for investment advisory services are separate and distinct from the fees and expenses charged by money markets, mutual funds and/or ETPs to their shareholders. These fees and expenses are described in each fund's prospectus. These fees generally include a management fee, other fund expenses, and a possible distribution fee. If the fund also imposes sales charges, you may pay an initial or deferred sales charge. You could invest in a money market, mutual fund directly, without our services. In that case, you would not receive the services provided by our firm which are designed, among other things, to assist you in determining which money market, mutual fund or ETPs are most appropriate to your financial condition and objectives. Accordingly, you should review both the fees charged by the funds and our fees to fully understand the total amount of fees to be paid by you and to thereby evaluate the advisory services being provided.

Certain funds make multiple no-load, institutional, advisory, or load-waived share classes available for

purchase through investment advisory programs. These share classes may be available only through NFGI wrap programs and have different and lower shareholder servicing, sub-accounting, investment management and 12b-1 fees and charges from other shares classes offered by those Funds. As a result, some Clients may have purchased these lower-cost institutional share classes, while others may have purchased a non-institutional share class.

IAR's have the availability to utilize mutual funds that offer various share classes, including those within the same fund. Varying share classes include but are not limited to shares designated as Class A Shares and Class I Shares. Generally, I Shares are reserved for institutional investors and therefore are not always available for your account. As a result of the different expenses of the mutual fund share classes, it is generally more expensive for you to own Class A Shares than Class I Shares (or other share classes).

You generally do not pay a transaction charge for Class A or C Share mutual fund transactions; however, the share class can be more expensive to you over time because of the ongoing 12b-1 fee. You should discuss and understand these additional indirect expenses borne as a result of the mutual fund fees.

NFGI or our service providers will collect such fees directly or indirectly from some or all of the mutual funds in which you invest, and we may pay any such fees it receives to NFGI IARs if they were accrued while the position was not in our advisory program. The amount of the fees we or your IAR receive will vary, depending on the percentage paid pursuant to a fund's Rule 12b-1 plan.

Most of the mutual funds we include on our advisory program platform do not pay us 12b-1 fees. Any 12b-1 fee payments we do receive for program approved eligible mutual funds held in advisory accounts are credited back to the account. 12b-1 fees received from non-eligible mutual funds will not be credited back to the account. These fees will be shared with the IAR. Receipt of the fees creates a conflict. NFGI monitors all transactions to help ensure the appropriate shares classes are offered. In addition, periodic position reviews are completed to ensure funds paying 12b-1 are not charged an advisory fee.

Third Party Management Fees: Clients participating in separately managed account programs will be charged various program fees in addition to the advisory fee charged by our firm. Such fees may include the investment advisory fees of the independent advisers, which may be charged as part of a wrap fee arrangement. In a wrap fee arrangement, you pay a single fee for advisory, brokerage and custodial services. The portfolio transactions will be executed without commission charges in a wrap fee arrangement. In evaluating such an arrangement, you should also consider that, depending upon the level of the wrap fee charged by the firm, the amount of portfolio activity in the account, and other factors, the wrap fee may or may not exceed the aggregate cost of such services if they were to be provided separately. We will review with Clients any separate program fees that may be charged.

Additional Fees and Expenses: In addition to our advisory fees, Clients are also responsible for the fees and expenses charged by custodians and imposed by broker dealers, including, but not limited to, custodial annual account or product fees and any transaction charges imposed by a broker dealer with which an independent investment manager effects transactions for the account(s).

The fee does not include certain dealer markups or markdowns, odd lot differentials, transfer taxes, exchange fees, execution fees (foreign and/or domestic) when applicable, fees for trades executed away from the custodian, and any other fees required by law. Cash balances in an Account may be invested in money market mutual funds including, as permitted by law, those with which we have agreements to provide advisory, administrative, distribution, and other services and for which we receive compensation for the services rendered. In a low interest rate environment, the yield that you earn on cash and cash alternatives, including cash sweep funds, CDs and money market funds may not offset advisory fees. In

some instances, the effective yield of the investment may in fact be negative.

Non-brokerage-related fees, such as IRA fees, are not included in the wrap fee and may be charged to your account separately. As more fully described in the fee schedules above, the fees you are charged may be different, depending on the asset type invested by the account.

Your IAR may suggest that you use other products and services that NFGI offers, but that are not available through the program you select ("Excluded Assets"). Excluded Assets are not charged a program fee and are not considered a part of the program or program services. We generally recommend that you hold these Excluded Assets in a separate brokerage account. If an excluded fund purchased for or transferred into your account later becomes eligible for the program, program fees will apply to that fund. You will incur any usual and customary brokerage charges and fees imposed on transactions in Excluded Assets which may include (i) any dealer markups and odd lot differentials and transfer taxes; (ii) charges imposed by broker-dealers and custodians other than WFA and its affiliates and fees for other products and services that we and our affiliates may offer; (iii) offering discounts, commissions and related fees in connection with underwritten public offerings of securities; (iv) margin interest and operational fees and charges; (v) IRA fees; and (vi) any redemption fees, exchange fees and or similar fees (among which SEC fees are included) imposed in connection with mutual fund transactions whereby NFGI or your IAR may receive additional compensation on these Excluded Assets.

ERISA Accounts: In some instances, NFGI will be deemed to be a fiduciary to advisory Clients that are employee benefit plans pursuant to the Employee Retirement Income and Securities Act and the Internal Revenue Code that include among other things, restrictions concerning certain forms of compensation. To avoid engaging in prohibited transactions, NFGI will only charge fees for investment advice about products for which our firm and/or our related persons do not receive any commissions or 12b-1 fees, or conversely, investment advice about products for which our firm and/or our related persons receive commissions or 12b-1 fees, however, only when such fees are used to offset NFGI's advisory fees.

Advisory Fees in General: Clients should note that similar advisory services may (may not) be available from other registered (or unregistered) investment advisers for similar or lower fees. You could also invest on your own in a security or a portfolio directly without being charged an investment advisory fee for services. You should be aware that investment advisory program fees charged may be higher or lower than if you elected to execute transactions on a commission basis for each transaction in a brokerage account. You should consider the value of these investment advisory services when making such comparisons. The combination of custodial, investment advisory and brokerage services may not be available separately or would require maintaining multiple accounts, documentation and fees. You should also consider the amount of anticipated volume of trading activity when selecting among the investment advisory programs when assessing the overall costs. Investment advisory programs typically take into consideration certain volume of trading activity and therefore, under particular circumstances, prolonged periods of inactivity or asset allocations with significant fixed income or cash positions may result in higher investment advisory fees being paid overtime than if you paid a commission separately for each transaction.

Limited Prepayment of Fees: Under no circumstances do we require or solicit payment of fees in excess of \$1200 more than six months in advance of services rendered.

Changes in Fee Schedules: All fees are subject to change with 30-day written notice to the Client(s).

Risk in the Use of Margin: To the extent margin is used in your account, you should be aware that the margin debit balance does not reduce the market value of eligible program assets. If you use margin to purchase additional securities, your total value of eligible program assets increases and therefore your

asset-based fee will increase. In addition, you will be charged margin interest on the debit balance in your account.

The increased asset-based fee that you pay will provide an incentive for your IAR to recommend the use of margin. However, we intend to make all recommendations independent of such considerations and based solely on our obligations to consider your objectives and needs. Please note that using margin is not suitable for all investors; the use of margin increases leverage in your account and therefore increases its risk. Additionally, if margin is used in your account, the firm may receive additional compensation. The IAR will not share in this compensation. Please see the Margin Disclosure Statement and the General Account Agreement and Disclosure Document provided at the time establishing margin for more details on the risks of margin use.

If your advisory account is used as collateral for a non-purpose loan, your IAR and NFGI may receive additional compensation as a result of the loan. This additional compensation will provide your IAR an incentive to recommend the use of a loan to you using your advisory account as collateral. However, we intend to make all recommendations independent of such considerations and based solely on our obligations to consider your objectives and needs.

Additional Considerations Associated with Pledging Advisory Accounts: In addition to the risks mentioned above, with respect to investment advisory account(s) that are pledged or otherwise used as collateral for margin or any other securities-based lending product, the exercise of our rights and powers over the assets in your advisory account(s), including the disposition and sale of any and all assets pledged as collateral may be contrary to your interests and the investment objective of your advisory account(s). Any recommendation to use margin or a securities-based lending product, as well as the related compensation that we or our affiliate may receive, could create conflicts of interest between you and us or, if applicable, our affiliate. For example, such recommendation to use margin or a securities-based lending product could result in a situation in which we are required to liquidate securities your IAR or money manager would otherwise not sell, and which may not otherwise be in your best interests to sell, to satisfy a maintenance call. We or a third-party money manager will seek to manage your advisory account(s) as agreed under your advisory client agreement and applicable client profile provided that, if a maintenance call takes place, we or your money manager may not be able to manage your advisory account(s) consistent with our or the money manager's overall strategy. Any action taken by us, or an affiliate, against the assets in your advisory account(s) pursuant to the use of margin or a securities-based lending product will not constitute a breach of our fiduciary duties as an investment advisor to you under your advisory client agreement and applicable client profile. In addition, the costs associated with using margin or a securities-based lending product, including the costs associated with a maintenance call, are not included in your fees for any program services and may result in additional compensation to us and the IAR

Item 5 Account Requirements and Types of Clients

MINIMUM ACCOUNT REQUIREMENTS

Participation in this program is subject to certain minimum account requirements. Under certain circumstances the minimum account size may be waived.

Program Name	Minimum Account Size
Individual Portfolio Management	\$25,000
NFGI Portfolios	\$25,000
NFGI 401k Portfolios	\$25,000

Personalized UMA	\$25,000 to \$250,000
PAN	\$100,000 subject to Manager's minimum
PIM	\$50,000
Asset Advisor	\$25,000
CustomChoice	\$25,000
FundSource	\$25,000
Fundamentals	\$10,000

IF APPLICABLE: Grandfathering of Minimum Account Requirements: Pre-existing advisory Clients are subject to NFGI's minimum account requirements and advisory fees in effect at the time the Client entered into the advisory relationship. Therefore, our firm's minimum account requirements will differ among Clients.

Types of Clients

Most NFGI clients are retail clients, such as individual and joint owners, revocable and irrevocable trusts, individual retirement accounts, self-directed 401(k) participant accounts, Section 529 Plan accounts, and custodial accounts. NFGI also manages assets held in corporate, 401(k), and defined benefit plan accounts, among others.

Opening an Account

You are required to execute a written agreement with NFGI specifying the particular advisory services in order to establish a client arrangement with NFGI. In addition, you will be required to establish a brokerage account.

Item 6 Portfolio Manager Selection and Evaluation

Portfolio Manager Selection

NFGI and/or the IAR act as the portfolio manager(s) for accounts in the Individual Portfolio Management, NFGI Portfolios, NFGI 401k Portfolios, PIM, Asset Advisor and Custom Choice programs. NFGI's advisory services are always provided based on your individual needs. This means, for example, that when we provide asset management services, you are given the ability to impose restrictions on the accounts we manage for you, including specific investment selections and sectors. We work with you on a one-on-one basis through interviews and questionnaires to determine your investment objectives and suitability information.

We will not enter into an investment adviser relationship with a prospective client whose investment objectives may be considered incompatible with our investment philosophy or strategies or where the prospective client seeks to impose unduly restrictive investment guidelines.

As previously disclosed, NFGI also recommends the services of independent managers to provide asset management services to our Clients based on your individualized needs. A portion or all of the Client's assets will then be managed by the independent manager based upon the stated investment objectives of the Client.

The recommendation of an independent manager is contingent upon that manager passing our due diligence requirements. NFGI will not recommend the use of an independent manager unless the manager is registered or exempt from registration as an investment adviser in the Client's home state. We evaluate independent managers based on information provided by that manager, including descriptions of its investment process, asset allocation strategies, sample portfolios, and the independent manager's disclosure brochure(s). We also analyze performance, risk characteristics and management style. We

may also rely on the due diligence reports provided by our clearing firms and other sources.

Investment managers are selected by the Client after a profile interview is completed with the prospective Client. A manager is selected whose discipline style and manner is most compatible with the Client's objective. Manager review is performed at least annually.

Circumstances under which an asset manager might be removed include (but are not limited to) poor performance, significant departure from the manager's stated investment discipline, or material changes in the organization. Similarly, NFGI may, as an alternative, recommend changing managers for any of the foregoing or other reasons, including a Client's dissatisfaction.

NFGI and its IAR may have a conflict of interest when recommending use of an outside manager or not. Depending on the manager or program pricing the IAR or NFGI may generate more revenue when not choosing to use an outside manager. However, in some cases more revenue may be earned when outsourcing. NFGI and our IAR always strive to recommend the selection that is in the best interest of the Client.

Portfolio Performance Reporting

Performance reporting is available for Clients in the program. Use of these reports is determined by you and the IAR. Performance information may also be provided directly to you by certain investment managers. NFGI does not conduct reviews of the performance reports provided by outside managers, nor do we engage any third-party to conduct such reviews. Accordingly, the information being reported may or may not be calculated on a uniform and consistent basis.

Voting Client Proxies

NFGI does not vote proxies or consider any other corporate actions on your behalf. We shall have no obligation or authority to take any action or render any advice with respect to the voting of proxies solicited by or with respect to issuers of securities held by you. You retain the authority and responsibility for, and we shall be expressly precluded from rendering any advice or taking any action with respect to, the voting of any such proxies. Certain accounts may permit you to direct proxy ballots to a designated third-party (such as your attorney) or another outside vendor.

Accounts managed by an outside sub-advisor not affiliated with NFGI may allow you to grant that sub-advisor the right to vote proxies. Other than these style accounts, you will receive proxies directly from the account custodian or investment transfer agent. Although we do not vote your proxies, feel free to contact your IAR if you have a question about a particular proxy. Likewise, NFGI does not advise or act for you in any legal proceedings, including class actions or bankruptcies, or notify you of such events, involving securities purchased for or held in your account. You (or your legal agent) then have the sole responsibility for taking or not taking any action regarding these legal matters.

Item 7 Client Information Provided to Portfolio Managers

The IAR is responsible for developing an initial financial risk profile of the Client. Prior to opening an account, we assist in determining your profile for the Program by obtaining the appropriate information.(personal, financial, goals, needs, risk tolerances, etc.) Initial investment strategy is jointly determined based on an assessment of the information provided by the Client.

While we provide you with periodic reminders, it remains the Client's responsibility to advise us of any changes to the information previously provided that might impact the ongoing suitability of any prior determined investment strategy and/or objectives. We will promptly communicate any reported changes to the Client's portfolio manager.

Your IAR will directly contact you at least annually to verify that there has been no change in your financial circumstances and/or investment objectives and determine whether you wish to impose any reasonable restrictions on the management of the account(s). Any such changes or requests are communicated in writing to the Client's portfolio manager, who is responsible for implementing appropriate adjustments to the portfolio.

Item 8 Client Contact with Portfolio Managers

Your contact for information and consultation regarding your program accounts is your IAR. In certain instances, your IAR may coordinate a response with the outside manager (if applicable) or arrange for you to consult directly with the outside manager. There are no restrictions placed on your ability to contact and consult with your portfolio managers. You are encouraged to contact your IAR whenever you have questions about the management of your account(s).

Item 9 Additional Information

Disciplinary Information

We are required to disclose any legal or disciplinary events that are material to a Client's or prospective Client's evaluation of our advisory business or the integrity of our management.

Our firm and our management personnel have no reportable disciplinary events to disclose.

All legal and disciplinary events for NFGI and its IARs can be accessed on the FINRA website at www.finra.org/brokercheck or the SEC website at www.adviserinfo.sec.gov.

Other Financial Industry Activities and Affiliations

NFGI is not and does not have a related company that is a (1) investment company or other pooled investment vehicle (including a mutual fund, closed- end investment company, unit investment trust, private investment company or "hedge fund," and offshore fund), (2) futures commission merchant, commodity pool operator, or commodity trading advisor, (3) banking or thrift institution, (4) accountant or accounting firm, (5) lawyer or law firm, (6) pension consultant, (7) real estate broker or dealer, or (8) sponsor or syndicator of limited partnerships.

NFGI is also a FINRA registered broker/dealer engaging in securities sales and services. Also, in conjunction with the broker/dealer, NFGI offers discount brokerage services under the name of Frontier Investment Services. R. Scott Bennett, the principal executive officer of the firm is also the President of NFGI.

Since NFGI is registered as an investment adviser and a broker/dealer, our registration as a broker/dealer is material to NFGI's advisory business because a majority of our advisory accounts are held with NFGI's broker/dealer. Depending upon the securities registrations held by each IAR, they offer a variety of securities and investments to their clients, including, but not limited to, mutual funds, Section 529 college savings plans, annuities, individual stocks and bonds, options, limited partnerships, UITs, real estate investment trusts, alternative investments, and a variety of other securities and insurance products approved for sale by NFGI. The majority of NFGI's principal executive officers and supervisors are each individually registered with NFGI's broker/dealer. As discussed in Part 2 - Item 5. Fees and Compensation, and Item 12. Brokerage Practices, NFGI's relationship as a broker/dealer presents a variety of material conflicts of interest with its clients. NFGI has a separate, fully disclosed clearing arrangement with Wells Fargo Clearing Services. This fully disclosed agreement states the

responsibilities of each party.

IARs, acting in their separate capacities as registered representatives of NFGI, may make offers to buy and sell, for commissions, general securities products such as stocks, bonds, mutual funds, exchange-traded funds, alternative investments, and variable annuity and variable life products to advisory clients. As such, some IARs suggest that advisory clients implement investment advice by purchasing securities products through a commission based NFGI account in addition to an advisory account. In the event that you elect to purchase or sell these products through NFGI, NFGI and your IAR, in the capacity as a NFGI registered representative, will receive the normal and customary commission compensation in connection with the specific product purchased. This presents a conflict of interest, as it gives the NFGI registered representative an incentive to recommend investment products on the compensation received, rather than on your needs. NFGI does not require its IARs to encourage you to implement investment advice through NFGI. You are free to implement investment advice through any broker-dealer or product sponsor you select. However, you should understand that, due to certain regulatory constraints, an IAR must place all purchases and sales of securities products in commission-based brokerage accounts through NFGI or other NFGI approved institutions.

NFGI is also an insurance general agency under common ownership. Some of our investment adviser representatives are insurance agents of NFGI and some are independently licensed as insurance agents. In these capacities, NFGI and our IARs may recommend insurance products in connection with investment advisory services. You are not obligated to purchase any insurance products through NFGI or through our IARs acting in their individual capacity as an insurance agent. However, when you do purchase such products, commissions for the sale of insurance products from various, unaffiliated, insurance companies are received by NFGI and/or IAR. Implementing and purchasing of any insurance product is solely at your discretion.

Third Party Investment Advisors

As described in Part 2 - Item 4 – Advisory Business and Item 5 – Fees and Compensation, we have formed relationships with independent, third-party investment advisors. When we refer clients to a third-party investment advisor through our programs, we will receive a portion of the fee charged. Therefore, we have a conflict of interest in that we will only recommend third party investment advisors available through our programs.

Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

NFGI and our supervised persons may buy or sell for their personal accounts investment products identical to those recommended to clients. Section 204A-1 of the *Investment Advisers Act of 1940* (Act) requires us to establish, maintain and enforce a Code of Ethics, which we have done. We are considered a fiduciary according to the Act and have a fiduciary duty to our clients. As a fiduciary, it is our responsibility to provide fair and full disclosure of all material facts and to act solely in the best interest of each of our clients at all times. This fiduciary duty is considered the core underlying principle for our Code of Ethics which also covers Insider Trading and Personal Securities Transactions Policies and Procedures. We require all supervised persons to conduct business with the highest level of ethical standards and to comply with all federal and state securities laws at all times. At least annually, all supervised persons will sign an acknowledgement that they have read, understand and agree to comply with our Code of Ethics. We have the responsibility to make sure that the interests of all clients are placed ahead of our interests or our supervised person's own investment interest. Full disclosure of all material facts and conflicts of interest will be provided to you before any services are conducted. We must conduct business in an honest, ethical and fair manner and avoid all circumstances that might negatively affect or appear to affect our duty of complete loyalty. This disclosure is provided to give you a summary of our Code of Ethics. However, if you wish to review the Code of Ethics in its entirety, we will provide a copy

promptly upon request.

You may request a copy by email sent to compliance@nationsfg.com, calling us at 319-393-9541 or contacting your IAR.

Principal Transactions - Principal transactions are generally defined as transactions where an adviser, acting as principal for its own account or the account of an affiliate, buys a security from or sells a security to an advisory client as opposed to carrying out trades through another broker-dealer. NFGI executes client orders for certain types of securities on a principal basis in advisory accounts managed by NFGI.

It is NFGI's policy that no additional compensation, outside of the normal advisory fee, will be charged to an advisory client account due to the implementation of the principal transaction. NFGI has adopted policies and procedures to ensure that, to the extent it engages in any principal transactions, such transactions comply with Section 206(3) of the Advisers Act, which requires prior notice of and consent to a principal transaction, on a transaction-by-transaction basis. Disclosure will generally come directly from the broker-dealer or custodian. NFGI, as a broker-dealer, facilitates the principal transaction.

Personal Trading - It is the expressed policy of NFGI that no IAR may purchase or sell any security prior to a recommended or discretionary transaction(s) being implemented for an advisory account, thereby preventing such IAR(s) from benefiting from transactions placed on behalf of advisory accounts.

We may aggregate our IAR trades with Client transactions where possible and when compliant with our duty to seek best execution for our Clients. In these instances, participating Clients will receive an average share price and transaction costs will be shared equally and on a pro-rata basis. In the instances where there is a partial fill of a particular batched order, we will allocate all purchases pro-rata, with each account paying the average price. Our IAR's accounts may be included in the pro-rata allocation.

Review of Accounts

The IARs are in charge of providing all investment advice and conducting ongoing reviews of all accounts for their respective client accounts. NFGI IAR's are also in charge of selecting and/or recommending third party investment advisers to their respective clients. Therefore, you will need to contact your IAR for the most current information and status of your accounts.

Your investment adviser representative regularly reviews your accounts, preferably quarterly but no less often than annually. More frequent reviews may be triggered in the event of changes in market conditions, your financial situation, personal situation, money manager personnel, management style, fund closures, or as agreed upon between you and the IAR.

Your investment advisory accounts are reviewed by the IAR and at times NFGI to analyze if the account is being managed in accordance with your chosen investment objective, that the account is properly balanced, if it is being managed according to a specific asset allocation model, and to verify the accuracy of account holdings and fee deductions.

For accounts managed by third party investment advisers, the third-party investment adviser is responsible for managing the account and will conduct reviews and the IAR will monitor the performance of the third-party investment advisor.

Financial Information

NFGI does not require or solicit prepayment of more than \$1,200 in fees per client, six months or more in advance. Therefore, we are not required to include a balance sheet for our most recent fiscal year. We are not subject to a financial condition that is reasonably likely to impair our ability to meet contractual commitments to clients. Finally, we have not been the subject of a bankruptcy petition at any time.

Brokerage Practices

Clients wishing to implement NFGI's investment advisory advice are free to select any broker-dealer or Investment Adviser they wish. However, when you decide to implement advice through our IARs, you will be required to establish an account through a trading platform that is approved by NFGI. NFGI allows its IARs to manage accounts through a couple of different arrangements. The ultimate decision to recommend or require a certain NFGI approved custodian is typically made by the IAR but must be agreed to by you. Accounts managed by NFGI are separate accounts, which means that you will have direct ownership of the account and must establish the account in your name. Broker-dealers approved for use by NFGI and recommended by IAR are registered with the SEC and a member of FINRA/SIPC.

As previously stated, most IARs are also Registered Representatives of NFGI. These dually registered IARs are restricted by certain FINRA rules and policies from maintaining client accounts at or executing client transactions in such client accounts through any broker-dealer or custodian that is not approved by NFGI. It should be noted that not all investment advisers require their clients to use specific or particular broker-dealers or other custodians required by the investment adviser. This presents a conflict of interest because the fees charged by NFGI and the approved custodians can be higher or lower than those charged by other broker-dealers and custodians.

Accounts Established through Wells Fargo Clearing Services (WFCS)

If you wish to have your IAR implement advice through an investment management program that uses WFCS, then NFGI, must be used. IARs who are also Registered Representatives of NFGI are required to use the services of NFGI and NFGI's approved custodians. NFGI serves as the introducing broker-dealer. All brokerage accounts established through NFGI will be cleared and held at WFCS. NFGI is not related or affiliated with WFCS.

Using WFCS is based on the fact that NFGI has established clearing agreements with WFCS as its preferred clearing broker-dealer and qualified custodian. The decision to use WFCS is based on past experiences, minimizing commissions and other costs as well as offerings or services WFCS provide that NFGI and clients require or find valuable. Other services include, but are not limited to, account custody, trade execution services, clearing services, access to information and account information look-up services for Registered Representatives and clients, record-keeping services, exception reporting and access to various financial products, including institutional share class mutual funds. These mutual funds can be purchased for investment advisory accounts at no cost to NFGI, the IAR or the client. Clients should be aware, however, that some share classes with lower expense ratios may be available at different custodians.

NFGI's clearing relationship with WFCS provides NFGI's broker/dealer with substantial economic benefits by using itself as the broker/dealer and WFCS as the clearing firm for its advisory accounts, or recommending WFCS programs, rather than an unaffiliated broker/dealer. Additionally, NFGI receives additional good standing benefits from WFCS when total NFGI account values at WFCS maintain certain thresholds. NFGI also participates in a cash sweep program with WFCS as described below. This program creates substantial financial benefits for NFGI and WFCS when recommending clients hold cash. This additional compensation received by NFGI in its broker/dealer capacity creates a significant conflict

of interest with clients because NFGI has a substantial economic incentive to use WFCS as its clearing firm for trade execution and custody over other firms that do not or would not provide these incentives to NFGI.

Additionally, by using itself as the broker/dealer for its accounts, NFGI may be unable to achieve the most favorable execution for client transactions, which may cost clients more money. Further detailed discussion of the substantial economic benefits NFGI receives from its relationship with WFCS can be found in Part 2 - Item 12 and in Item 14. Client Referrals and Other Compensation below. Clients are urged to read and consider the contents of this Brochure carefully and to inquire about NFGIs and the IARs various sources of compensation and conflicts of interest in making a fair and reasonable assessment of the fees and charges clients will pay for the services rendered by NFGI and their IAR.

Cash Sweep Programs

WFCS offers a FDIC cash sweep program ("Program"). The Program is the core account investment vehicles used to hold your cash balances while awaiting reinvestment for eligible accounts. The cash balance in your eligible NFGI accounts will be deposited automatically or "swept" into interest-bearing FDIC-insurance eligible Program deposit accounts ("Deposit Accounts") at one or more FDIC-insured financial institutions including WFCS' affiliate Wells Fargo Bank. The Program creates financial benefits for NFGI and WFCS. We will receive revenue sharing from WFCS in connection with the Program (equal to a percentage of all participants' average daily deposits at the Program Banks). Amounts will vary but in no event will this revenue sharing be more than 1.0% on an annualized basis as applied across all Deposit Accounts. The amount of fee received will affect the interest rate paid to customers by the Program Bank. From time to time, if the fee increases, you will receive notification of any such change.

The Program Banks use Program Deposits to fund current and new lending and for investment activities. The Program Banks earn net income from the difference between the interest they pay on Program Deposits and the fees paid to us and the income they earn on loans, investments, and other assets.

As noted above, the Program Banks may pay rates of interest on Program Deposits that are lower than prevailing market interest rates that have been paid on accounts otherwise opened directly with the Program Bank. Program Banks do not have a duty to provide the highest rates available and may instead seek to pay a low rate. Lower rates will be more financially beneficial to a Program Bank. There is no necessary linkage between bank rates of interest and the highest rates available in the market, including any money market mutual fund rates. By comparison, a money market mutual fund generally seeks to achieve the highest rate of return (less fees and expenses) consistent with the money market mutual fund's investment objective, which can be found in the fund's prospectus.

WFCS also provides a cash sweep money market fund for those accounts ineligible for the Program.(such as government accounts, insurance companies, banks and credit unions) Like the Program, WFCS will share in revenue with NFGI and the same conflicts exist.

The revenue received by NFGI may be greater than revenues generated by sweep options at other brokerage firms and may be greater than other core account investment vehicles currently available to you or possible core account investment vehicles that we have used in the past or may consider using in

the future. This creates a conflict for NFGI, because of the fees and benefits described above, the Program may be more profitable to us than other available sweep options, if any. Even though these payments are not shared with your IAR, the receipt of these additional payments create a conflict of interest because of the increased compensation to NFGI. This revenue sharing with NFGI may be eliminated or compressed based on declining interest rates.

Should you wish to not participate in this program you can either 1) choose no sweep option, with the cash held in the WFCS account earning no interest, where funds are available upon request; or 2) trading into another possibly uninsured cash position or money market fund where funds are not immediately available. Returns to you for these other options can be higher or lower than the Program. You can discuss these options with your IAR

It is important to understand that the cash balance held in your account at WFCS that is not in the Program is not FDIC insured. However, it is covered by SIPC up to certain limits. For more information about SIPC coverage, please visit www.sipc.org. Not all broker-dealers offer FDIC insured bank deposit sweep vehicles or have the same access and features.

Visit the below for more information regarding the Program:

<https://www.wellsfargoclearingservicesllc.com/disclosures/cash-sweep-program.htm>

WFCS Non-Purpose Loan Program

Clients can choose to participate in WFCS non-purpose loan program. In this program, WFCS will qualify a client who would benefit from having an alternative for accessing credit for financial needs in the form of a non-purpose loan. NFGI and the IAR receives revenue for a client's participation in this program. The receipt of these additional payments creates a conflict of interest because of the increased compensation to NFGI. Clients are not required to use this loan program and can work directly with other banks to negotiate loan terms or obtain other financing arrangements.

Additional Information For Recommendation of WFCS

The general requirement to use WFCS is based on the fact that we have established a clearing agreement with First Clearing as our clearing broker/dealer and qualified custodian. The decision to use WFCS is based on past experience, minimizing commissions and other costs as well as offerings or services WFCS provides us that we and our clients may require or find valuable such as online access. You may pay commissions to us and/or WFCS that are higher than those obtainable from other broker/dealers in return for products and services offered through us and WFCS and fee structures of various broker/dealers are periodically reviewed to ensure clients are receiving best execution. Accordingly, while we will consider our rates competitive, they will not necessarily be the lowest possible commission rates for your account transactions.

Through the relationship with WFCS, we receive economic and non-economic benefits, which creates conflicts of interest. These benefits include, but are not necessarily limited to:

- a dedicated service group and a Relationship Manager dedicated to NFGI accounts on the WFCS platform

- receipt of duplicate client confirmations and bundled duplicate statements, access to Online Access (through which clients may access their account information over the internet)
- availability of third-party research and technology
- access to a trading desk
- access to block trading which provides the ability to aggregate securities transactions
- allocate the appropriate share amount to client accounts
- the ability to have advisory fees directly debited from client accounts (in accordance with federal and state requirements)
- electronic download of trades, balances and position information
- access to InfoMax
- access to an electronic communications network for client order entry and account information.
- access to general oversight and monitoring tools
- educational conferences and events

The decision to use WFCS is also directly related to NFGI participation in advisory programs sponsored by Wells Fargo. Wells Fargo Advisors and First Clearing are trade names for the parent company WFCS. Not all Registered Investment Advisors require their clients to direct brokerage to a custodian, and the benefits detailed above create a conflict of interest for NFGI to recommend this custodian instead of another. By directing brokerage to this custodian, NFGI may be unable to achieve most favorable execution of client transactions, and this practice may cost you more money.

NFGI receives certain benefits which create a conflict for it to recommend WFCS. These conflicts include incentive payments predicated on maintaining asset levels with WFCS, margin debit balance and bank, sponsorships of NFGI conferences, reduced internal account administration fees, shared revenues from lending activities to NFGI accounts, and the FDIC sweep conflict detailed above. While clients may receive beneficial rates at WFCS, there is a conflict for NFGI to recommend lending activities for its clients through WFCS.

Accounts Established through Charles Schwab & Co.

We also may recommend that our Clients use Charles Schwab & Co., Inc. (Schwab), a FINRA-registered broker-dealer, member SIPC, as the qualified custodian. We are independently owned and operated and not affiliated with Schwab. Schwab will hold your assets in a brokerage account and buy and sell securities when we instruct them to. While we may recommend that you use Schwab as custodian/broker, you will decide whether to do so and open your account with Schwab by entering into an account agreement directly with them. We do not open the account for you. Even though your account is maintained at Schwab, we can still use other brokers to execute trades for your account, as described in the next paragraph.

For our Clients' accounts Schwab maintains, Schwab generally does not charge you separately for custody services but is compensated by charging you commissions or other fees on trades that it executes or that settle into your Schwab account. For some accounts, Schwab may charge you a percentage of the dollar amount of assets in the account in lieu of commissions. In addition to commissions or asset-based fees Schwab charges you a flat dollar amount as a "prime broker" or "trade away" fee for each trade that we have executed by a different broker-dealer but where the securities

bought or the funds from the securities sold are deposited (settled) into your Schwab account. These fees are in addition to the commissions or other compensation you pay the executing broker-dealer. Because of this, in order to minimize your trading costs, we have Schwab execute most trades for your account.

Schwab Advisor Services (formerly called Schwab Institutional) is Schwab's business serving independent investment advisory firms like us. They provide us and our Clients with access to its institutional brokerage – trading, custody, reporting and related services – many of which are not typically available to Schwab retail customers. Schwab also makes available various support services. Some of those services help us manage or administer our Clients' accounts while others help us manage and grow our business. Here is a more detailed description of Schwab's support services:

Services that Benefit You. Schwab's institutional brokerage services include access to a broad range of investment products, execution of securities transactions, and custody of Client assets. The investment products available through Schwab include some to which we might not otherwise have access or that would require a significantly higher minimum initial investment by our Clients. Schwab's services described in this paragraph generally benefit you and your account.

Services that May Not Directly Benefit You. Schwab also makes available to us other products and services that benefit us but may not directly benefit you or your account. These products and services assist us in managing and administering our Clients' accounts. They include investment research, both Schwab's own and that of third parties. We may use this research to service all or some substantial number of our Clients' accounts, including accounts not maintained at Schwab. In addition to investment research, Schwab also makes available software and other technology that:

- provide access to Client account data (such as duplicate trade confirmations and account statements);
- facilitate trade execution and allocate aggregated trade orders for multiple Client accounts;
- provide pricing and other market data;
- facilitate payment of our fees from our Clients' accounts; and
- assist with back-office functions, recordkeeping and Client reporting.

Services that Generally Benefit Only Us. Schwab also offers other services intended to help us manage and further develop our business enterprise. These services include:

- educational conferences and events
- technology, compliance, legal, and business consulting;
- publications and conferences on practice management and business succession; and
- access to employee benefits providers, human capital consultants and insurance providers.

Schwab may provide some of these services itself. In other cases, it will arrange for third-party vendors to provide the services to us. Schwab may also discount or waive its fees for some of these services or pay all or a part of a third-party's fees. Schwab may also provide us with other benefits such as occasional business entertainment of our personnel.

Accounts Established at TD Ameritrade

We may also recommend that client open accounts in the TD Ameritrade Institutional program. TD Ameritrade Institutional is a division of TD Ameritrade, Inc. ("TD Ameritrade"), member FINRA/SIPC. TD

Ameritrade is an independent [and unaffiliated] SEC-registered broker-dealer. TD Ameritrade offers to independent Investment Advisers services which include custody of securities, trade execution, clearance and settlement of transactions. NFGI receives some benefits from TD Ameritrade through its participation in the program. (Please see the disclosure under Part 2 - Item 14 and below.)

For our Clients' accounts TD Ameritrade maintains, TD Ameritrade generally does not charge you separately for custody services but is compensated by charging you commissions or other fees on trades that it executes or that settle into your TD Ameritrade account. For some accounts, TD Ameritrade may charge you a percentage of the dollar amount of assets in the account in lieu of commissions.

There is no direct link between NFGI's participation in the program and the investment advice it gives to its Clients, although NFGI receives economic benefits through its participation in the program that are typically not available to TD Ameritrade retail investors. These benefits include the following products and services (provided without cost or at a discount): receipt of duplicate Client statements and confirmations; research related products and tools; consulting services; access to a trading desk serving Advisor participants; access to block trading (which provides the ability to aggregate securities transactions for execution and then allocate the appropriate shares to Client accounts); the ability to have advisory fees deducted directly from Client accounts; access to an electronic communications network for Client order entry and account information; access to mutual funds with no transaction fees and to certain institutional money managers; and discounts on compliance, marketing, research, technology, and practice management products or services provided to NFGI by third party vendors. TD Ameritrade may also have paid for business consulting and professional services received by NFGI's related persons. Some of the products and services made available by TD Ameritrade through the program may benefit NFGI but may not benefit your accounts. These products or services may assist NFGI in managing and administering your accounts, including accounts not maintained at TD Ameritrade. Other services made available by TD Ameritrade are intended to help NFGI manage and further develop its business enterprise. The benefits received by NFGI or its personnel through participation in the program do not depend on the amount of brokerage transactions directed to TD Ameritrade. As part of its fiduciary duties to Clients, NFGI endeavors at all times to put the interests of its Clients first. Clients should be aware, however, that the receipt of economic benefits by NFGI or its related persons in and of itself creates a potential conflict of interest and may indirectly influence NFGI or IAR's choice of TD Ameritrade for custody and brokerage services.

No services provided to NFGI should be considered as soft dollar arrangements. NFGI receives no additional services or non-cash compensation for directing brokerage or advisory business to any broker dealer or custodian.

A transaction or execution fee may be imposed by broker-dealers such as Charles Schwab & Co. TD Ameritrade or by NFGI through WFCS, but NFGI believes the services gained by these custodians or dealers justify the cost. However, receiving such services may create a conflict of interest for NFGI should NFGI mark up the execution charges and referring Clients to any other custodian may result in higher reporting or overhead cost to NFGI.

Best Execution

As a fiduciary, NFGI owes a fiduciary duty to its clients to obtain best execution of their transactions. That duty puts forth that an investment adviser generally must execute securities transactions in such a manner that the total cost or proceeds in each transaction is the most favorable under the circumstances. However, clients must understand that best execution does not necessarily mean the lowest available price. Instead, the totality of the arrangement and services provided by a broker-dealer must be examined to determine a qualitative measure of best execution. Based on these principles, commission and fee structures of various broker-dealers are periodically reviewed by the compliance department in order to evaluate the execution services provided by NFGI and all the unaffiliated broker-dealers and custodians used by NFGI. Accordingly, while NFGI does consider competitive rates, it does not necessarily obtain the lowest possible commission rates for client account transactions. Therefore, the overall services provided by NFGI and all the unaffiliated broker-dealers and custodians are evaluated to determine best execution.

You should consider that in light of NFGI's limited approved trading platforms for your accounts and the fact that only some of the approved trading platforms accommodate the investment strategy recommended by the your IAR, that IARs are limited in their ability to obtain the best execution price and lowest execution costs for each transaction or the product with the lowest internal expenses. Not all investment advisers restrict or limit the broker-dealers their clients can use. Some investment advisers permit their clients to select any broker-dealer of the client's own choosing. Therefore, clients can pay higher commissions or trade execution charges through the trading platforms approved by NFGI than through other platforms for investment advisory accounts.

Trade Aggregation

Transactions implemented by NFGI for client accounts are generally affected independently, unless an IAR decides to purchase or sell the same securities for several clients at approximately the same time. This process is referred to as aggregating orders, batch trading or block trading and is used by an IAR when the IAR believes such action proves advantageous to you. When the IAR aggregates client orders, the allocation of securities among client accounts will be done on a fair and equitable basis. Typically, the process of aggregating client orders is done in order to achieve better execution, to negotiate more favorable commission rates or to allocate orders among clients on a more equitable basis in order to avoid differences in prices and transaction fees or other transaction costs that might be obtained when orders are placed independently. While there is more than one process for allocating, generally the transactions will be averaged as to price and will be allocated among the IAR's clients in proportion to the purchase and sale orders placed for each client account on any given day. It should be noted, NFGI does not allow IAR to receive any additional compensation or remuneration as a result of aggregation.

Because NFGI does not require IARs to aggregate trades, not all trades are aggregated even when there is an opportunity to do so. When trades are not aggregated, you will not always see the effects of lower commission per share costs that often occurs as a result of aggregating trades and as a result, pay a higher transaction cost than could be received elsewhere. Finally, it should be noted that NFGI does not aggregate mutual fund transactions.

Research and Other Soft-Dollar Benefits

NFGI does not use commissions to pay for research and brokerage services (i.e., soft-dollar transactions). Research, along with other products and services other than trade execution, are available

to NFGI on a cash basis in accordance with the terms of NFGI's clearing agreements with WFCS. Certain product sponsors, including WFCS, Schwab, and TD, provide us with other economic benefits as a result of sales activities directed to the sponsors, including but not limited to, financial assistance or the sponsorship of conferences and educational sessions, marketing support, incentive awards, payment of travel expenses, tools to assist us in providing various services to you such as reporting programs and portfolio analysis and directing brokerage transactions in our capacity as a broker/dealer.

Trade Errors

It is NFGI's policy to ensure trading errors are handled and corrected in a timely manner in the best interests of the client affected by the error. Specifically, when NFGI or an IAR causes a trade error to occur in your account that results in a loss, NFGI works with the relevant broker-dealer or custodian in order to reimburse any costs paid by you, and make whole your transaction as it should have originally taken place/or not taken place. If the trade error results in a gain and NFGI executed the transaction, NFGI will keep that gain to offset future losses. The retained gain is not shared with the IAR or account owners.

The same standard as above applies to accounts held with Schwab other than if the gain is more than \$100, Schwab will donate the gain to charity. If the gain is less than \$100, Schwab will keep the gain to minimize and offset its administrative time and expense.

All trade errors should be corrected within a reasonable period of time following discovery of the error. NFGI will not use commissions from client accounts to correct trade errors. It is the strict policy of NFGI that IARs are not permitted to make payments to clients or to client accounts.

Principal Trades and Agency Cross Transactions

Even though we may be permitted by contract and by law to do so, as a matter of policy, we do not generally execute principal trades or agency cross transactions in our advisory accounts with the exception of the Private Advisor Network Program. In the Private Advisor Network Program, principal trades may be permitted in non-IRA and non-ERISA (Employee Retirement Income Security Act of 1974) Accounts. Although in some instances, we may be able to provide a more favorable market price to you if we participate in a principal trade or an agency cross transaction with your accounts, we do so only when consistent with our obligations to provide best execution, due to regulatory requirements when executing such transactions. Therefore, you will generally not have access to new issues or syndicate offerings in these Accounts. You may make such purchases in a retail brokerage account, and you should be aware that they will be subject to the customary fees and commissions charged in such accounts.

Client Referrals

NFGI and its investment adviser representatives may enter into arrangements as and/or with individuals ("Solicitors") who will refer clients that may be candidates for investment advisory services. In return, we agree to compensate or be compensated as the Solicitor for the referral. Compensation to the Solicitor is dependent on the client entering into an advisory agreement with NFGI. Compensation to the Solicitor may be an agreed upon percentage of the investment advisory fee or a flat fee, depending on the type of advisory services IAR provides to the referred client and the agreed upon compensation arrangement between us and the Solicitor. Our referral program will be in compliance with federal and state regulations

(as applicable). The solicitation/referral fee is paid pursuant to a written agreement retained by both NFGI and the Solicitor. The Solicitor will be required to provide the client with a copy of our Part 2 and a Solicitor Disclosure Document at the time of solicitation. The Solicitor is not permitted to offer any investment advice on behalf of NFGI.

Arrangements with Financial Institutions

NFGI has established and will continue to establish marketing arrangements with banks, credit unions and other financial institutions. In certain circumstances, investment advisory services of NFGI are also marketed through these banks, credit unions and other financial institutions, provided that such marketing is done in compliance with applicable SEC and state regulations. Further, some IARs conduct business from and/or are affiliated with a bank or other financial institution. As a result of these marketing agreements, the financial institution receives compensation representing payment for the use of the facilities and equipment of the financial institution(s), in the form of program support or rent payment and/or a portion of advisory fees or securities commissions paid to the IAR/Registered Representatives for sales to customer/members of the financial institution.

These relationships create compliance issues relative to consumer protection.

The joint guidelines of regulators of the depository institution call for, at a minimum, both written and verbal disclosure at or prior to the time securities products are purchased or sold that such securities products:

- Are not insured by the Federal Deposit Insurance Corporation (FDIC), or any other federal or state deposit guarantee fund or other government agency;
- Not endorsed or guaranteed by the bank or credit union or their affiliates;
- Are not deposits or obligations of the depository institutions and are not guaranteed by the depository institutions;
- Investments and securities are subject to investment risks, including possible loss of principal invested.

Other compensation

At times, NFGI will receive compensation or reimbursement for costs associated with IAR education, seminar or conference events from product sponsors or custodians. Any benefits received are not based directly on the production or use of specific services or products. Firm policy requires that any such compensation or reimbursement be pre-approved by the Firm and not paid directly to any IAR.

NFGI and IARs may also receive compensation from a third-party vendor for referring prospective Clients. In which the NFGI and the IAR may share in the fees resulting from investment advisory services provided by third party vendor. The arrangement is documented, and a solicitor's statement is provided to the Client.

As mentioned previously, as a broker dealer, NFGI will receive additional compensation as a share in interest charged relating to margin or cash/money market/bank sweep balances.

As a broker dealer and registered representative, NFGI and IAR will receive additional compensation through commissions or trails through sales of investment, insurance, or bank vehicles through NFGI's Broker Dealer and Agency. The receipt of this compensation can affect the judgment of the IAR when recommending these products to their clients.

Clients can choose to participate in WFCS non-purpose loan program. In this program, WFCS will qualify a client who would benefit from having an alternative for accessing credit for financial needs in the form of a non-purpose loan. NFGI and the IAR receives revenue for a client's participation in this program. The receipt of these additional payments creates a conflict of interest because of the increased compensation to NFGI. Clients are not required to use this loan program and can work directly with other banks to negotiate loan terms or obtain other financing arrangements.

As a broker dealer, NFGI receives concessions through its clearing relationships aimed to assist in new business development or recruitment. New IAR's can directly or indirectly receive benefit from these concessions. These concessions present a conflict of interest in that NFGI and the new IAR have a financial incentive to recommend that you maintain your account with certain custodians. However, to the extent that NFGI or the IAR directs Clients to the custodian for such services, it is because NFGI and the IAR believe that it is in that Client's best interest to do so. Any concession or benefits received are not based on any contests or specific products. Clients should be aware, however, that the receipt of concessions by NFGI or its related persons in and of itself creates a potential conflict of interest and may indirectly influence NFGI or IAR choice of custody and brokerage services.

In addition, as disclosure above, NFGI participates in TD Ameritrade's institutional customer program and NFGI may recommend TD Ameritrade to Clients for custody and brokerage services. There is no direct link between NFGI's participation in the program and the investment advice it gives to its Clients, although NFGI receives economic benefits through its participation in the program that are typically not available to TD Ameritrade retail investors. These benefits include the following products and services (provided without cost or at a discount): receipt of duplicate Client statements and confirmations; research related products and tools; consulting services; access to a trading desk serving Advisor participants; access to block trading (which provides the ability to aggregate securities transactions for execution and then allocate the appropriate shares to Client accounts); the ability to have advisory fees deducted directly from Client accounts; access to an electronic communications network for Client order entry and account information; access to mutual funds with no transaction fees and to certain institutional money managers; and discounts on compliance, marketing, research, technology, and practice management products or services provided to NFGI by third party vendors. TD Ameritrade may also have paid for business consulting and professional services received by NFGI's related persons. Some of the products and services made available by TD Ameritrade through the program may benefit NFGI but may not benefit its Client accounts. These products or services may assist NFGI in managing and administering Client accounts, including accounts not maintained at TD Ameritrade. Other services made available by TD Ameritrade are intended to help NFGI manage and further develop its business enterprise. The benefits received by NFGI or its personnel through participation in the program do not depend on the amount of brokerage transactions directed to TD Ameritrade. As part of its fiduciary duties to Clients, NFGI endeavors at all times to put the interests of its Clients first. Clients should be aware, however, that the receipt of economic benefits by NFGI or its related persons in and of itself creates a potential conflict of

interest and may indirectly influence NFGI or IAR's choice of TD Ameritrade for custody and brokerage services.

We also receive an economic benefit from Schwab in the form of the support products and services it makes available to us and other independent investment advisers that have their Clients maintain accounts at Schwab. These products and services, how they benefit us, and the related conflicts of interest are described above (*see Brokerage Practices*). The availability to us of Schwab's products and services is not based on us giving particular investment advice, such as buying particular securities for our Clients. Clients should be aware, however, that the receipt of any economic benefit by NFGI or its related persons in and of itself creates a potential conflict of interest and may indirectly influence NFGI or IAR's choice of custody and brokerage services.
