SEC File No. 801-7571

This wrap fee program brochure ("Brochure") provides information about the qualifications and business practices of Robert W. Baird & Co. Incorporated ("Baird") and Baird Family Wealth Group ("FWG"), a team within Baird's Private Wealth Management department. Clients should carefully consider this information before becoming a client of FWG. If you have any questions about the contents of this Brochure, please contact FWG at the toll-free phone number listed above. The information contained in this Brochure has not been approved or verified by the United States Securities and Exchange Commission or by any state securities authority. Additional information about Baird is available on the SEC's website at www.adviserinfo.sec.gov.

Material Changes

Baird Family Wealth Group ("FWG"), a team within the Private Wealth Management department of Robert W. Baird & Co. Incorporated ("Baird"), updated its Form ADV Part 2A wrap fee program brochure (the "Brochure") on March 19, 2020. The following summary discusses the material changes that FWG has made to the Brochure since March 22, 2019, the date of the last annual update to the Brochure.

- Baird's parent company has completed its acquisition of J.J.B. Hilliard, W.L. Lyons, LLC ("Hilliard Lyons"), a financial services firm that is registered with the SEC as an investment adviser and broker dealer, and Hilliard Lyons Trust ("HLT"), a Kentucky-chartered trust company. ***The operations of Hilliard Lyons were merged into Baird on October 19, 2019. Hilliard Lyons has ceased operations as a separate company and Baird has assumed the operations of Hilliard Lyons. HLT continues to operate as a separate entity affiliated with Baird.*** Due to its affiliation with HLT, Baird has a financial incentive to favor HLT investment products and services. See the Section of the Brochure entitled "Additional Information—Other Financial Industry Activities and Affiliations—Certain Affiliations" for more information.
- Baird has renamed the Client Selected Managers Service to the Baird SMA Network Program and has made the dual contract feature of the Client Selected Managers Service its own program named the Dual Contract Program. As a result, clients participating in the Client Selected Managers Service will now participate in the Baird SMA Network Program, and clients participating in the Client Selected Managers Service through a dual contract arrangement will now participate in the Dual Contract Program. There have been no changes to the managers that manage client accounts or a how client accounts are managed as a result of those changes. However, Baird has modified the level of initial and ongoing review performed by Baird on the managers and their SMA Strategies made available under the Baird SMA Network and Dual Contract Programs. Managers under the Baird SMA Network Program and Dual Contract Program are subject to an initial review by Baird that considers the manager's assets under management, regulatory and compliance history, and certain other limited qualitative and quantitative factors deemed relevant by Baird. The ongoing review is generally performed on an annual basis and is generally limited to changes in the managers' assets under management in the SMA Strategy and a review of the SMA strategy in comparison to a relevant peer group or benchmark. The level of review performed by Baird on managers in those Programs, is significantly less than that performed by Baird with respect to managers and their strategies included on the Baird Recommended Managers List. See the Section of the Brochure entitled "Services, Fees and Compensation—SMA Services" and "Portfolio Manager Selection and Evaluation—Selection and Evaluation" for additional important information.
- In certain circumstances, clients that are part of the same household may include their eligible Advisory Accounts in the same Goal Management Plan (a "Household Goal Management Plan"). It is the client's sole responsibility to notify FWG that the client is part of a household so that FWG is aware of the client's eligibility for a Household Goal Management Plan. It is also the client's sole responsibility to notify FWG whenever the client ceases to be part of a household if an Account is part of a Household Goal Management Plan.
- Baird updated the schedule of the Portfolio Fees charged by investment managers that manage client accounts. See the Section of the Brochure entitled "Services, Fees and Compensation—Advisory Fee" for more information.
- Baird will include cash and cash equivalent balances in a client's Account when calculating a client's asset-based Advisory Fee. Baird has adopted internal policies that monitor the percentage of cash or cash equivalents in an Account for sustained periods of time. These internal policies are designed to inform FWG Consultants and their clients who hold large cash balances in their Accounts for sustained periods that those Accounts are holding large cash balances and that there may be other investment or account options for their cash.

- Baird has updated information about how it benefits from Advisory Fees, how FWG Consultants are compensated and related conflicts of interest. See the Section of the Brochure entitled “Services, Fees and Compensation—Advisory Fees—Advisory Fee Payments to Baird, FWG Consultants and Investment Managers” for more information.
- Baird has updated information about how it selects portfolio managers under the programs, the level of initial and ongoing research, evaluation, monitoring and review performed by Baird, if any, and related conflicts interest. See the Sections of the Brochure entitled “Portfolio Manager Selection and Evaluation—Selection and Evaluation” and “Portfolio Manager Selection and Evaluation—Portfolio Management by FWG, Baird and Related Persons” for more information.
- Baird updated information about Baird’s regulatory assets under management. See the Section of the Brochure entitled “Portfolio Manager Selection and Evaluation—Selection and Evaluation—Advisory Business” for more information.
- Baird updated the description of the Baird Recommended Portfolio and has ceased offering the Baird Value Focus Portfolio. Baird also makes available to clients certain Automated Quantitative Analysis (“AQA”) Portfolios, the Baird Rising Dividend Portfolio and certain strategies offered by HLT. See the Section of the Brochure entitled “Portfolio Manager Selection and Evaluation—Methods of Analysis, Investment Strategies and Risk of Loss—Investment Strategies and Methods of Analysis—Methods of Analysis—Certain Model Portfolios” for more information.
- Baird updated information about risks associated with the use of non-recommended products, or Available Investment Products, and recent events, such as those associated with COVID-19, trade disagreements, Brexit and other geopolitical events. See the Section of the Brochure entitled “Portfolio Manager Selection and Evaluation—Methods of Analysis, Investment Strategies and Risk of Loss—Principal Risks” for more specific information.
- In June 2019, Baird, without admitting or denying the findings, consented to the sanctions and to the entry of findings of FINRA that between late April 2013 and early July 2013 it published research reports about an issuer without disclosing that the research analyst who authored the reports was engaged in employment discussions with the issuer that constituted an actual, material conflict of interest and that the failure to disclose the research analyst’s employment discussions with the issuer in the research reports made those reports misleading. Baird was censured and fined \$150,000.
- Baird updated information about Baird’s affiliates. See the Section of the Brochure entitled “Additional Information—Other Financial Industry Activities and Affiliations” for more information.
- Baird updated information about the compensation that Baird and FWG Consultants receive related to client mutual fund investments, trust services referral arrangements, client use of margin, and Baird’s Securities Based Lending Program, third party payments that Baird and FWG Consultants receive, and other conflicts of interest. See the Section of the Brochure entitled “Additional Information—Code of Ethics, Participation or Interest in Client Transactions and Personal Trading—Participation or Interest in Client Transactions” for more specific information.
- Baird changed the terms of its Cash Sweep Program. The Cash Sweep Program provides clients the opportunity to earn income on available cash balances held in their Accounts. Baird’s Cash Sweep Program consists of two features whereby, with some exceptions, cash in a client’s Accounts will be automatically deposited or swept in an account maintained at one or more participating banks (the “Bank Sweep Feature”), until the client’s aggregate cash balances in deposit accounts at the banks reach the applicable aggregate FDIC insurance limit, with any excess cash automatically invested in shares of one or more money market mutual funds Baird makes available in the program (the “Money Market Fund Feature”). In addition to the asset-based Advisory Fee paid by the client on the assets swept or invested in the Cash Sweep Program, Baird receives compensation from each bank or money

market fund on those same assets for certain administrative, accounting and other services that Baird provides to the bank or money market fund and for maintaining the Cash Sweep Program and making it available to clients. As a result, Baird receives two layers of fees on client assets swept or invested in the Cash Sweep Program: the Advisory Fee, which compensates Baird for the investment advice, trading and custody services provided to clients related to those assets, and the compensation paid by the banks or money market funds related to those assets, which compensates Baird for the services it provides to the banks and funds and for Baird's efforts in maintaining the Cash Sweep Program. The compensation that Baird receives from the Cash Sweep Program gives it a financial incentive to recommend that clients sweep or invest cash balances through the Cash Sweep Program. A client should understand that the Cash Sweep Program is an ancillary account service and it is not an, nor is it part of any, Advisory Service or investment advisory service. Baird does not act as investment adviser or a fiduciary to a client in connection with the Cash Sweep Program. However, a client should note that the amount of a client's Advisory Service Account dedicated to cash and cash equivalents is part of the overall investment allocation advice provided to the client and thus the amount of such cash and cash equivalents included in the calculation of the Advisory Fee for the client's Account. Clients should have already received more specific information about the changes to the Cash Sweep Program. A complete description of the modified Cash Sweep Program is available on Baird's website at www.rwbaird.com/cashsweeps.

A client should note that the foregoing summary only discusses material changes made to the Brochure since March 22, 2019. The updated Brochure contains changes that are not listed above.

Services, Fees and Compensation

This Brochure describes some of the investment advisory services that Robert W. Baird & Co. Incorporated ("Baird") offers to its clients through Baird Family Wealth Group ("FWG"), a team within Baird's Private Wealth Management ("PWM") department. Baird and FWG offer other investment advisory services not described in this Brochure. Separate brochures describe those other investment advisory services and discuss the agreements, fees and potential conflicts of interest for each service.

This Brochure also references other documents where you may find additional information. Many of those documents are available on Baird's website at www.rwbaird.com/disclosures.

If you would like to request a brochure for another investment advisory service provided by Baird, or if you would like a paper copy of any of the other documents referenced in this Brochure, please contact an FWG Consultant or call Baird toll-free at 1-800-792-2473.

The information contained in this Brochure is current as of the date above and is subject to change at Baird's discretion. Please retain this Brochure for your records.

The Client-Baird Fiduciary Relationship

Baird is registered with the Securities and Exchange Commission ("SEC") as an investment adviser under the Investment Advisers Act of 1940, as amended (the "Advisers Act"). FWG and Baird are deemed to have a fiduciary relationship with a client when providing the investment advisory services that are described in this Brochure. That means that FWG and Baird are required to act in the best interest of the client when providing investment advisory services. From time to time FWG and Baird may engage in certain business practices or may receive compensation or other benefits that create a potential for conflict between the interests of clients and the interests of FWG and Baird. FWG and Baird generally address potential conflicts of interest by disclosing them to clients through documents provided to clients, including, without limitation, this Brochure, Brochure supplements that contain information about individuals providing investment advice to clients, and the agreements clients enter into with FWG and Baird. In addition, Baird has adopted internal policies

and procedures for FWG and Baird that require them to: provide investment advice that is suitable for advisory clients (based upon the information provided by such clients); make full disclosure of all potential, material conflicts of interest; act with utmost care and good faith in dealings with advisory clients; and seek to obtain "best execution" of advisory client transactions. The specific business practices that create potential conflicts of interest with clients and additional measures used by FWG and Baird to address them are discussed in other sections of this Brochure.

A client should note that registration as an investment adviser does not imply a certain level of skill or training.

Summary of FWG's Services

This Brochure describes certain investment advisory programs and services that FWG and Baird offer to clients ("Services") and applies to each advisory account advised by FWG ("Account"). The investment advisory services offered under the Services generally include investment advice and consulting services, which are provided by Baird PWM's home office investment professionals or FWG, and, depending upon the Service that a client selects, the Service may include portfolio management. The Services consist of:

- certain consulting services ("Consulting Services");
- discretionary services, whereby a client gives FWG or Baird (including Baird PWM's home office investment professionals or the client's FWG Consultant) full discretionary authority to manage the client's Account ("Discretionary Services");
- non-discretionary services, whereby FWG or Baird provide investment advice and recommendations but the client retains full authority with respect to the management of the client's Account ("Non-Discretionary Services"); and
- separately managed account ("SMA") programs and services, whereby investment managers, which may include third party investment managers unrelated or related to Baird ("Other Managers") or Baird, manage the client's

Account according to a strategy (each, an "SMA Strategy") with full discretionary authority, and FWG and Baird provide additional consulting services to the client (collectively, "SMA Services").

Depending on their particular needs or objectives, clients may use one or more of these Services.

The Consulting Services include: Financial Planning; Risk Analysis; Asset Allocation and Investment Strategy Development; Consolidated Reporting; and Additional Consultant Services described below. The Discretionary Services include: FWG Investment Management. The SMA Services include: FWG Recommended Managers; Baird SMA Network ("BSN"); and Dual Contract ("DC"). The Additional Consultant Services are only provided to certain clients upon request by a client and agreement to do so by FWG. FWG primarily provides Consulting Services and recommends the FWG Investment Management Service and FWG Recommended Managers Service to clients when appropriate. FWG will infrequently recommend the other Services when FWG believes it is appropriate for a particular client.

Generally, FWG provides clients with analysis and recommendations on investment managers and strategies. Investment strategies typically may include either public or private securities, private placements, limited partnerships, institutional mutual funds and exchange traded funds ("ETFs"). Often these investment managers or strategies may be affiliated with external custodians. FWG will assist clients in evaluating custodians and negotiating custodial fees, trading commissions, as well as, investment management fees.

The SMA Services are generally offered under a "single contract" arrangement. Under a single contract arrangement, a client enters into an advisory agreement with FWG and Baird, and Baird, in turn, enters into a subadvisory or similar agreement with the investment manager on the client's behalf. This type of arrangement is frequently referred to as a single contract arrangement because there is only one contract between the client and FWG and Baird; the client does not have an agreement directly with the client's investment manager. Under the Dual Contract Program, a client has a "dual contract"

arrangement, meaning the client has two contracts; one contract with FWG and Baird and another contract with the client's investment manager.

Baird has engaged an overlay management firm, Envestnet Asset Management, Inc. (the "Overlay Manager") to provide certain subadvisory services to clients that participate in certain SMA Services. The SMA Services make available two types of SMA Strategies: (1) manager-traded strategies, whereby the manager itself manages a client's Account and conducts the trading to implement the SMA Strategy selected by the client (a "Manager-Traded Strategy"); and (2) model-traded strategies, whereby the manager does not manage a client's Account (a "Model Provider") but instead provides a model portfolio ("Model Portfolio") to an overlay management firm, which may include the Overlay Manager and Baird (each, an "Implementation Manager"), that in turn manages a client's Account and conducts the trading to implement the SMA Strategy selected by the client (a "Model-Traded Strategy"). If a client selects a Model-Traded Strategy, the Model Provider will provide the Model Portfolio and updates to the Implementation Manager, and the Implementation Manager will manage the client's Account with full discretionary authority according to the strategy selected by the client. Otherwise, if the client selects a Manager-Traded Strategy, the investment manager will directly manage the client's Account with full discretionary authority as more fully described below.

Baird is also registered with the SEC as a broker-dealer under Securities Exchange Act of 1934, as amended (the "Exchange Act"). FWG and Baird provide the Services described in this Brochure under a "wrap fee" arrangement. This means that in addition to the investment advisory services that FWG and Baird provide in connection with each Service, Baird, in its capacity as broker-dealer, also provides clients with trade execution, custody and other standard brokerage services for a single fee ("Advisory Fee"). *A client should note that the client may incur costs in addition to the Advisory Fee. See "Additional Service Information—Trading for Client Accounts" and "Other Fees and Expenses" below for more information.*

Each Service is designed to address different investment needs of clients. All of the Services discussed in this Brochure may not be appropriate

for every client. For example, the Services may not be appropriate for clients who have low or no trading activity, who maintain their accounts invested in high levels of cash, who do not want ongoing professional investment advice or account monitoring, who tend to execute transactions without the recommendation or advice of an advisor, which are commonly referred to as “unsolicited” transactions, or who intend to utilize an investment strategy, product or solution that is not available in a Service.

Some Services offer clients the ability to pursue alternative investment strategies (“Alternative Strategies”) or other non-traditional or complex investment strategies that involve special risks not apparent in more traditional investments like stocks and bonds (collectively, “Complex Strategies”). Similarly, some Programs offer clients the ability to invest in non-traditional or real assets (“Non-Traditional Assets”). Some Programs also offer the ability to invest in investment products that pursue Alternative Strategies (“Alternative Investment Products”) or other Complex Strategies (collectively, “Complex Investment Products”). The use of certain strategies and investment products involves special risks, and a client should not engage in a strategy or purchase an investment product unless the client understands the related risks. See “Additional Service Information—Complex Strategies and Complex Investment Products” and “Portfolio Manager Selection and Evaluation—Methods of Analysis, Investment Strategies and Risk of Loss—Principal Risks” below for more information.

Certain Services make available asset allocation investment strategies. Asset allocation strategies involve investing in one or more categories of assets, such as equity securities, fixed income securities, Non-Traditional Assets, Alternative Investment Products and cash, and one or more subcategories of assets, called asset classes. Asset allocation strategies have varying investment objectives and investment strategies. Some asset allocation strategies use strategic investment strategies, which involve investing accounts in accordance with a predetermined target allocation to different asset classes. Some asset allocation strategies use tactical investing, which typically involves tactically and actively adjusting account allocations to different asset classes based upon the manager’s perception of how those asset classes will perform in the short-

term. Some asset allocation strategies involve the use of both strategic and tactical investment strategies, sometimes referred to as dynamic strategies. Asset allocation strategies may be implemented using a variety of investment types, such as individual securities, mutual funds and exchange traded products (“ETPs”), including ETFs and exchange traded notes (“ETNs”). The amount allocated to an asset class or investment type varies by strategy, and some strategies may have little or no allocation to one or more asset classes or types of investments described above. See “Portfolio Manager Selection and Evaluation—Methods of Analysis, Investment Strategies and Risk of Loss—Investment Strategies and Methods of Analysis—Investment Strategies—Asset Allocation Strategies” below for more information.

The Services make available investment products and services that are not related to Baird. Some Services make available investment products and services offered by parties related to Baird, including: Baird Advisors and Baird Equity Asset Management, investment management departments of Baird; Riverfront Investment Group, LLC (“Riverfront”) and Strategas Asset Management, LLC (“Strategas”), investment managers that may be deemed to be affiliated with Baird; Hilliard Lyons Trust (“HLT”), a trust company that may be deemed to be affiliated with Baird; and mutual funds offered by Baird Funds, Inc. (the “Baird Funds”), which is affiliated with Baird. For more information about these and other related parties, see “Additional Information—Other Financial Industry Activities and Affiliations” below.

FWG clients typically work with an FWG Consultant to determine the services that are appropriate given their financial goals and circumstances. However, it is a client that ultimately selects the Service and investment strategy that is most appropriate for the client.

A client that wishes to participate in a Service will enter into a client relationship agreement or other investment advisory agreement with FWG and Baird (“advisory agreement”). The client’s advisory agreement will contain the specific terms applicable to the services selected by the client, fees payable by the client, and other terms applicable to the client’s advisory relationship with FWG and Baird. A client should note that the client’s advisory relationship with FWG and Baird does not begin until they enter into the applicable

advisory agreement with the client, which occurs when Baird PWM's Home Office has accepted the client's advisory agreement and determined that all of the client's paperwork is in order. See "Account Requirements and Types of Clients" below for more information.

As mentioned above, Baird, in its capacity as broker-dealer, also provides FWG clients with trade execution, custody and other standard brokerage services. For this reason, a client will also enter into a client relationship agreement or other account agreement with FWG and Baird ("account agreement") if the client has not already done so. The client's account agreement authorizes FWG and Baird to execute trades for, and perform related brokerage and custody services to, the client's Account.

Each Service has different structures, administration, types and levels of service, and fees and expenses. In particular, a client should note that the investment advisory services provided by FWG and Baird, including the depth of initial and ongoing research, evaluation, monitoring and review of the investments in a client's Account, varies by Service and the investments selected for the Account.

The foregoing discussion of the Services is only a summary. More specific information about the Services and the particular investment advisory services that FWG and Baird provide in connection with each Service are further described below and in the client's advisory agreement. Clients are encouraged to review this Brochure and their advisory agreement carefully.

Consulting Services

Financial Planning

The Financial Planning Service includes a comprehensive development of a "financial framework" that is based upon an analysis of the client's cash flow. Generally, this service includes tax and estate planning review and coordination with the client's external professional providers.

Risk Analysis

When performing risk analysis services, FWG seeks to analyze and review with a client the risks identified in the financial planning process described above. FWG seeks to minimize investment risk through an asset allocation and investment strategy.

Asset Allocation and Investment Strategy Development

Using a variety of tools, including the financial framework, FWG will develop and recommend a long-term, strategic asset allocation and investment strategy appropriate for the client's risk and return objectives. Investment strategies may involve the use of different equity styles or strategies, such as: large cap growth, large cap value, mid cap growth, mid cap value, small cap growth, small cap value, international and emerging market equities strategies; different fixed income styles or strategies, such as short or intermediate, taxable and tax-exempt bond, international and emerging market bond, and high yield bond strategies; different Non-Traditional Asset strategies, such as real estate and real estate fund and commodity strategies; and Alternative Strategies, which may include the use of hedge funds, funds of hedge funds, private equity funds, funds of private equity funds, and managed futures.

Consolidated Reporting

Clients of FWG generally receive a performance report and asset allocation report each quarter. Generally, this report covers all accounts and asset classes specified in the advisory agreement. For the convenience of clients of FWG, reports may include information, usually related to client's personal assets, that is provided by the client and is not covered by the advisory agreement. If a third party reporting company is used, Baird, FWG or the client may pay an additional fee to the third party for this service. FWG provides analysis of both performance and asset allocation decision to the client on a quarterly basis.

Additional Consultant Services

FWG offers the following additional consultant services.

Investment Policy Statement. FWG will assist a client in preparing an Investment Policy Statement reflecting the client's investment objectives, policies, constraints, and risk profile. The Investment Policy Statement is designed to provide guidance to the client's investment manager(s). The Investment Policy Statement is a product of information and data provided by the client; therefore, the client is responsible for review and final approval of the Investment Policy Statement. The client is solely responsible for

determining whether the Investment Policy Statement accurately reflects the client's investment objectives, policies, constraints, and risk profile.

Asset Allocation Report. FWG provides to a client or its fiduciaries an Asset Allocation Report which identifies one or more investment portfolios for the client (in terms of risk and return) based on certain information requested by FWG and provided by the client. The client is solely responsible for determining whether the information taken into account by FWG in formulating an Asset Allocation Report is accurate and complete.

Investment Manager Search Report. FWG provides to a client an Investment Manager Search Report that lists investment managers with investment philosophies and investment strategies believed to be consistent with the client's investment objectives, policies, constraints, and risk profile, as specified by the client to FWG. FWG does not assume responsibility for the client's choice of any investment manager or for any investment manager's performance when providing this service to the client, nor is FWG responsible for an unaffiliated investment manager's compliance with applicable law or for matters beyond FWG's reasonable control.

Investment Manager Search Interviews. FWG coordinates client interviews with a select number of investment managers listed on the Investment Manager Search Report. The interviews enable the client to gain additional information regarding such investment managers' respective investment philosophies, policies and business operations.

Past Performance Reviews. FWG provides to a client a Past Performance Review which, based on information supplied by the client, includes the historical performance of the client's portfolios and compares various aspects of such performance to one or more benchmark indices. Account data will be derived from information provided by the client or its agent(s) for the agreed upon time period. FWG is not responsible for verifying information supplied by the client or its agent(s).

Performance Monitoring Reports. FWG will periodically provide to a client written

Performance Monitoring Reports which include calculations of the performance of the client's Account(s) over various time periods and compare various aspects of such performance to one or more benchmark indices.

Discretionary Services

FWG Investment Management Service

Under the FWG Investment Management Service, a client grants full discretionary authority and management of the client's Account to Baird and the client's FWG Consultant.

In the FWG Investment Management Service, a client's FWG Consultant seeks to meet the client's particular investment needs by developing a customized investment strategy based upon guidelines that are jointly established by the client and the client's FWG Consultant. At the commencement of services, the client's FWG Consultant reviews the client's investment objectives and risk tolerance using the Consulting Services described above. Based upon that review and other information provided by the client, the FWG Consultant makes a subsequent recommendation to the client as to which investment style the FWG Consultant believes is best suited for the client. A client makes the final decision as to which investment style is chosen for the client's Account. More specific information as to how the client's FWG Consultant will manage the client's Account is provided to the client in connection with the opening of the Account.

An FWG Consultant typically recommends or selects for client accounts investments in mutual funds and ETFs that pursue the strategies described under the heading "Consulting Services—Asset Allocation and Investment Strategy Development" above. However, from time to time, an FWG Consultant may make direct investments in various types of securities, including, but not limited to, equity securities, fixed income securities, Non-Traditional Assets and certain Alternative Investment Products. All or a portion of the assets in a client's Account may be held in cash or cash equivalents, including securities issued by money market mutual funds or may be deposited in interest-bearing bank accounts. Additional information about the types of investments an FWG Consultant may use for client accounts is contained under the heading "Additional Service Information—Permitted

Investments” below. For more information about the FWG Investment Management Service, see “Portfolio Manager Selection and Evaluation—Methods of Analysis, Investment Strategies and Risk of Loss—Investment Strategies and Methods of Analysis—FWG Investment Management Service” below.

Baird may remove any FWG Consultant or strategy from the Service at any time and transfer day-to-day management responsibility of a client’s Account to another FWG Consultant or Baird Financial Advisor at any time without providing prior notice to, or obtaining the consent of, a client.

Important Information about FWG Investment Management Service Accounts. *FWG Consultants may invest client accounts in illiquid securities and Complex Investment Products. These types of investments involve special, sometimes significant, risks and are not appropriate for all clients. A client should understand those risks before investing in those products. See “Additional Service Information—Complex Strategies and Complex Investment Products” and “Portfolio Manager Selection and Evaluation—Methods of Analysis, Investment Strategies and Risk of Loss—Principal Risks” below for more information.*

Mutual funds and ETFs affiliated with Baird are available to clients under the FWG Investment Management Service. This presents a conflict of interest. For more information, see “Additional Information—Other Financial Industry Affiliations and Activities” below.

SMA Services

FWG Recommended Managers Service

The FWG Recommended Managers Service is a program whereby a client provides Baird and the client’s FWG Consultant with discretionary authority to appoint investment managers to manage the client’s Account with full discretionary authority and to terminate or replace investment managers for the client’s Account. The FWG Recommended Managers Service is designed for a client who wishes to have the client’s Account managed by investment managers that are monitored by FWG and Baird on an ongoing basis.

Under the FWG Recommended Managers Service, FWG and Baird determine the investment

managers (“FWG Recommended Managers”) and their strategies (“FWG RM Strategies”) eligible to participate in the Service through an initial and ongoing evaluation process.

For more specific information about the managers and SMA Strategies made available through the FWG Recommended Managers Service and the level of initial and ongoing research, evaluation, monitoring and review performed by Baird on those managers and SMA Strategies, see “Portfolio Manager Selection and Evaluation—Selection and Evaluation—FWG Recommended Managers Service” below.

FWG Recommended Managers have varying investment objectives, styles and strategies, and they may invest a client’s Account in various types of securities, which will be chosen by the FWG Recommended Manager and which may include mutual funds, ETFs or other investment products affiliated with the manager or Baird.

Clients are urged to review the FWG Recommended Manager’s Form ADV Part 2A Brochure, which should contain additional important information about the FWG Recommended Manager, including information about the FWG Recommended Manager’s strategies, the types of investments the FWG Recommended Manager may use for a client’s Account, and the risks associated with investing in an FWG RM Strategy. Such brochures are available upon request.

Some of the services provided under the FWG Recommended Managers Service will be provided to a client by an FWG Consultant assigned to the client’s Account. A client, typically working with an FWG Consultant, initially selects the FWG Recommended Manager and FWG RM Strategy for the client’s Account. Thereafter, whenever Baird or the client’s FWG Consultant deems it necessary, Baird or the client’s FWG Consultant will replace an FWG Recommended Manager or FWG RM Strategy with another FWG Recommended Manager or FWG RM Strategy for the client’s Account.

If a client participates in the FWG Recommended Managers Service, the client authorizes and directs FWG and Baird to appoint FWG Recommended Managers to serve as sub-adviser to the client’s Account and to otherwise manage

the client's Account in accordance with the terms of the FWG Recommended Managers Service. The client also authorizes and directs the FWG Recommended Managers to manage the client's Account with full discretionary authority in accordance with the FWG RM Strategy selected.

Certain FWG RM Strategies are only made available through Implementation Managers. The FWG RM Strategies offered through Implementation Managers consist of Manager-Traded Strategies and Model-Traded Strategies. If an FWG RM Strategy offered through an Implementation Manager is selected for a client's Account, the client authorizes and directs FWG and Baird to appoint the Implementation Manager to serve as sub-adviser to the client's Account. If a Model-Traded Strategy offered through an Implementation Manager is selected for a client's Account, the client authorizes and directs the Implementation Manager to manage the client's Account with full discretionary authority in accordance with the selected FWG RM Strategy. If a Manager-Traded Strategy offered through an Implementation Manager is selected for a client's Account, the client authorizes and directs the Implementation Manager to appoint the applicable FWG Recommended Manager as sub-adviser, and the client also authorizes and directs such FWG Recommended Manager to manage the client's Account with full discretionary authority in accordance with the selected FWG RM Strategy.

If a Model-Traded Strategy offered through an Implementation Manager is selected for a client's Account, the Implementation Manager will typically implement the Model Portfolio as proposed by the Model Provider. However, since the Implementation Manager has discretionary authority over the client's Account, the Implementation Manager may implement the Model Portfolio differently than proposed by the Model Provider if the Implementation Manager determines such action to be necessary and in the client's best interest. A client should note that FWG and Baird do not monitor or ascertain whether a third party Implementation Manager is fully and faithfully implementing the Model Portfolio on a continuous basis. The client should periodically discuss the Account's performance with the client's FWG Consultant.

Certain managers of Model-Traded Strategies offered through the Overlay Manager have adopted trade rotation policies that allow them to

send Model Portfolio updates to the Overlay Manager after they have implemented the Model Portfolio updates for client accounts managed by them or after they have otherwise completed trading for those accounts. As a result, the performance of an FWG client Account pursuing a Model Portfolio strategy offered by those Model Providers will differ, perhaps in a materially negative manner, from the performance of other client accounts managed by those Model Providers. See "Additional Service Information—Trading for Client Accounts—Trading Practices of Investment Managers" below for more information.

If a client's Account is managed by an Other Manager under the FWG Recommended Managers Service, the client should understand that, notwithstanding the discretionary authority granted to Baird and the client's FWG Consultant under the Service: Baird and the client's FWG Consultant do not manage the Account and do not otherwise have any influence over the Other Manager's investment decisions or securities selections, and therefore, Baird and the client's FWG Consultant are not responsible for the decisions made by the Other Manager; and Baird and the client's FWG Consultant do not provide any recommendation or investment advice regarding the purchase or sale of investment products made for the client's Account.

From time to time, FWG or Baird may remove investment managers from the FWG Recommended Managers Service, and FWG or Baird may select a replacement manager to manage the client's Account. In such event, FWG or Baird, at the direction of the client's replacement manager, or the client's replacement manager may sell all or a portion of the securities or other investments in the Account that were managed by the prior manager and the replacement manager will reinvest the cash proceeds of those sales. Sales of securities or other investments could result in adverse tax consequences for the client.

If FWG or Baird terminates an investment manager from the FWG Recommended Managers Service, a client authorizes FWG and Baird to invest, with full discretionary authority, the assets in the client's Account previously managed by the terminated investment manager in other securities, including, but not limited to, mutual funds and ETPs. FWG's and Baird's discretionary

authority to make such other investments will continue until a replacement investment manager is selected or alternative arrangements are made for the management of the client's assets.

A client who prefers to continue using an investment manager that has been removed from the FWG Recommended Managers Service, or who directs or otherwise requests that a particular investment manager not recommended by FWG be selected to manage the client's Account, will need to move to another Service, such as the BSN Program. See "Baird SMA Network Program" below for more information. Clients who elect to do so will no longer receive the same level of rigorous ongoing monitoring, evaluation, or review of that investment manager from FWG or Baird.

Important Information about Affiliated Managers. *The FWG Recommended Managers Service makes available to clients investment services that are offered by Baird Advisors and Baird Equity Asset Management, investment management departments of Baird. Baird has a potential conflict of interest to the extent Baird would advise a client to select investment products offered by those Baird Departments. For more information, see "Additional Information—Other Financial Industry Affiliations and Activities" below.*

Baird SMA Network Program

The BSN Program is a program whereby a client independently selects an investment manager to manage the client's Account with full discretionary authority according to a strategy selected by the client. The BSN Program is designed to accommodate a client who wishes to independently select an investment manager not available in the FWG Recommended Managers Program to manage the assets in the client's Account.

Under the BSN Program, Baird determines the investment managers ("BSN Managers") and their strategies ("BSN Strategies") eligible to participate in the Program through a significantly less rigorous evaluation process compared to the FWG Recommended Managers Service. However, a client should note that FWG and Baird do not make any recommendation to clients regarding any BSN Strategy or any representations regarding a BSN Manager's qualifications as an

investment adviser or abilities to manage client assets.

For more specific information about the managers and SMA Strategies made available through the BSN Program and the level of initial and ongoing research, evaluation, monitoring and review performed by Baird on those managers and SMA Strategies, if any, see "Portfolio Manager Selection and Evaluation—Selection and Evaluation—Baird SMA Network and Dual Contract Programs" below.

A client should only participate in the BSN Program if the client wishes to take more responsibility for monitoring the client's Account, the FWG Recommended Managers Program does not contain an SMA Strategy that meets the client's particular needs, and the client understands the risks of doing so.

BSN Managers have varying investment objectives, styles and strategies, and they may invest a client's Account in various types of securities, which will be chosen by the BSN Manager and which may include mutual funds, ETFs or other investment products affiliated with the manager or Baird.

Clients are urged to review the BSN Manager's Form ADV Part 2A Brochure, which should contain additional important information about the BSN Manager, including information about the BSN Manager's strategies, the types of investments the BSN Manager may use for a client's Account, and the risks associated with investing in a BSN Strategy. Such brochures are available upon request.

Some of the services provided under the BSN Program may be provided to a client by an FWG Consultant assigned to the client's Account, and the client's FWG Consultant may provide his or her own advice and recommendations about BSN Managers.

If a client participates in the BSN Program, the client authorizes and directs Baird to appoint the BSN Manager selected by the client to serve as sub-adviser to the client's Account. The client also authorizes and directs the BSN Manager to manage client's Account with full discretionary authority in accordance with the BSN Strategy selected by the client.

Certain BSN Strategies are only made available through the Overlay Manager. The BSN Strategies offered through the Overlay Manager consist of Manager-Traded Strategies and Model-Traded Strategies. If a client selects a BSN Strategy offered through the Overlay Manager for the client's Account, the client authorizes and directs FWG and Baird to appoint the Overlay Manager to serve as sub-adviser to the client's Account. If a client selects a Model-Traded Strategy offered through the Overlay Manager for the client's Account, the client authorizes and directs the Overlay Manager to manage the client's Account with full discretionary authority in accordance with the BSN Strategy selected by the client. If a client selects a Manager-Traded Strategy offered through the Overlay Manager for the client's Account, the client authorizes and directs the Overlay Manager to appoint the applicable BSN Manager as sub-adviser, and the client also authorizes and directs such BSN Manager to manage the client's Account with full discretionary authority in accordance with the BSN Strategy selected by the client.

If a client selects a Model-Traded Strategy offered through the Overlay Manager for the client's Account, the Overlay Manager will typically implement the Model Portfolio as proposed by the Model Provider. However, since the Overlay Manager has discretionary authority over the client's Account, the Overlay Manager may implement the Model Portfolio differently than proposed by the Model Provider if the Overlay Manager determines such action to be necessary and in the client's best interest. A client should note that FWG and Baird do not monitor or ascertain whether the Overlay Manager is fully and faithfully implementing the Model Portfolio on a continuous basis. The client should periodically discuss the Account's performance with the client's FWG Consultant.

Certain managers of Model-Traded Strategies offered through the Overlay Manager have adopted trade rotation policies that allow them to send Model Portfolio updates to the Overlay Manager after they have implemented the Model Portfolio updates for client accounts managed by them or after they have otherwise completed trading for those accounts. As a result, the performance of an FWG client Account pursuing a Model Portfolio strategy offered by those Model Providers will differ, perhaps in a materially negative manner, from the performance of client

accounts managed by those Model Providers. See "Additional Program Information—Trading for Client Accounts—Trading Practices of Investment Managers" below for more information.

If a client's Account is managed by an Other Manager under the BSN Program, the client should understand that: FWG and Baird do not manage the Account and do not otherwise have any influence over the Other Manager's investment decisions or securities selections, and therefore, FWG and Baird are not responsible for the decisions made by the Other Manager; FWG and Baird do not provide any recommendation or investment advice regarding the purchase or sale of investment products made for the client's Account; and FWG and Baird only provide the client with certain consulting services, which may include the client's FWG Consultant's assistance with determining the client's financial needs, investment goals and investment restrictions and periodically reviewing the manager's performance. FWG and Baird do not undertake to provide any other consulting or investment advisory services under the BSN Program unless FWG and Baird agree to do so in writing.

A client that participates in the BSN Program is strongly encouraged to contact the client's FWG Consultant or BSN Manager on a periodic basis to discuss: the Account and its investment performance; the BSN Manager's investment philosophy and style (to determine if the BSN Strategy remains appropriate for the client); any potential conflicts of interest; and any investment restrictions the client may wish to impose or change. A client should also periodically check the registration status, disciplinary events and other information regarding the BSN Manager, described on the manager's Form ADV, which is available on the SEC's website at www.adviserinfo.sec.gov.

The BSN Strategies and BSN Managers made available under the BSN Program are subject to change or removal at any time in Baird's sole discretion. Under the terms of the BSN Program, FWG and Baird cannot appoint a replacement manager or otherwise manage a client's Account assets. Given the terms of the BSN Program, upon the withdrawal or removal of an investment manager from the BSN Program, a client's BSN Program Account will be automatically removed from the BSN Program and the Account will become an unmanaged brokerage account, unless

the client provides contrary instructions to FWG. See "Portfolio Manager Selection and Evaluation—Selection and Evaluation—Baird SMA Network and Dual Contract Programs" below for further information.

Important Information about the BSN Program. *Portfolios managed by Baird PWM's home office investment professionals and investment managers affiliated with Baird are available to clients under the BSN Program. This presents a conflict of interest. For more information, see "Additional Information—Other Financial Industry Affiliations and Activities" below.*

The BSN Program is designed to accommodate a client who wishes to independently select an investment manager that is not available in the FWG Recommended Managers Service to manage the client's Account. The client assumes ultimate responsibility for monitoring the client's BSN Program Account and the BSN Manager's performance. A client's appointment and continued retention of a BSN Manager to manage the client's Account are based ultimately upon the client's independent review of the BSN Manager and the BSN Manager's services. The client ultimately determines that the BSN Strategy to be used in managing the client's Account is consistent with the client's stated investment objectives and financial needs and risk tolerance. Once retained by the client, a BSN Manager will only be removed from managing the client's BSN Program Account upon the manager's withdrawal, removal from the BSN Program, or the client's direction to do so. A client should carefully consider the foregoing when deciding to participate in the BSN Program and also consider whether another Service, such as the FWG Recommended Managers Service, may be more appropriate for the client.

Dual Contract Program

The DC Program is a program whereby a client independently selects an investment manager to manage the client's Account with full discretionary authority according to a strategy selected by the client. The DC Program is designed to accommodate a client who wishes to independently select an investment manager not available in the FWG Recommended Managers Service or BSN Program to manage the assets in the client's Account.

Under the DC Program, Baird determines the investment managers ("DC Managers") and their strategies ("DC Strategies") eligible to participate in the Program through a significantly less rigorous evaluation process compared to the FWG Recommended Managers Service. However, a client should note that FWG and Baird do not make any recommendation to clients regarding any DC Strategy or any representations regarding a DC Manager's qualifications as an investment adviser or abilities to manage client assets.

For more specific information about the managers and SMA Strategies made available through the DC Program and the level of initial and ongoing research, evaluation, monitoring and review performed by Baird on those managers and SMA Strategies, if any, see "Portfolio Manager Selection and Evaluation—Selection and Evaluation—Baird SMA Network and Dual Contract Programs" below.

A client should only participate in the DC Program if the client wishes to take more responsibility for monitoring the client's Account, the FWG Recommended Managers Program does not contain an SMA Strategy that meets the client's particular needs, and the client understands the risks of doing so.

DC Managers have varying investment objectives, styles and strategies, and they may invest a client's Account in various types of securities, which will be chosen by the DC Manager and which may include mutual funds, ETFs or other investment products affiliated with the manager or Baird.

Clients are urged to review the DC Manager's Form ADV Part 2A Brochure, which should contain additional important information about the DC Manager, including information about the DC Manager's strategies, the types of investments the DC Manager may use for a client's Account, and the risks associated with investing in a DC Strategy. Such brochures are available upon request.

Some of the services provided under the DC Program may be provided to a client by an FWG Consultant assigned to the client's Account, and the client's FWG Consultant may provide his or her own advice and recommendations about DC Managers.

Under the DC Program, DC Managers are offered to clients through a dual contract arrangement, and a client will need to enter into a separate agreement with the DC Manager in addition to the advisory agreement the client enters into with FWG and Baird. A client participating in the DC Program is solely responsible for negotiating the client's agreement with the client's DC Manager, and neither FWG nor Baird will participate or advise a client regarding the terms of such an agreement, the advisability of entering into such an agreement, or the retention of the client's DC Manager unless FWG and Baird agree to do so in writing.

If a client's Account is managed by an Other Manager under the DC Program, the client should understand that: FWG and Baird do not manage the Account and do not otherwise have any influence over the Other Manager's investment decisions or securities selections, and therefore, FWG and Baird are not responsible for the decisions made by the Other Manager; FWG and Baird do not provide any recommendation or investment advice regarding the purchase or sale of investment products made for the client's Account; and FWG and Baird only provide the client with certain consulting services, which may include the client's FWG Consultant's assistance with determining the client's financial needs, investment goals and investment restrictions and periodically reviewing the manager's performance. FWG and Baird do not undertake to provide any other consulting or investment advisory services under the DC Program unless FWG and Baird agree to do so in writing.

A client that participates in the DC Program is strongly encouraged to contact the client's FWG Consultant or DC Manager on a periodic basis to discuss: the Account and its investment performance; the DC Manager's investment philosophy and style (to determine if the DC Strategy remains appropriate for the client); any potential conflicts of interest; and any investment restrictions the client may wish to impose or change. A client should also periodically check the registration status, disciplinary events and other information regarding the DC Manager, described on the manager's Form ADV, which is available on the SEC's website at www.adviserinfo.sec.gov.

The DC Strategies and DC Managers made available under the DC Program are subject to change or removal at any time in Baird's sole

discretion. Under the terms of the DC Program, FWG and Baird cannot appoint a replacement manager or otherwise manage a client's Account assets. Given the terms of the DC Program, upon the withdrawal or removal of an investment manager from the DC Program, a client's DC Program Account will be automatically removed from the DC Program and the Account will become an unmanaged brokerage account, unless the client provides contrary instructions to FWG. See "Portfolio Manager Selection and Evaluation—Selection and Evaluation—Baird SMA Network and Dual Contract Programs" below for more information.

Important Information about the DC Program. *Other investment management departments of Baird and managers affiliated with Baird are available to clients under the DC Program. This presents a conflict of interest. For more information, see "Additional Information—Other Financial Industry Affiliations and Activities" below.*

The DC Program is designed to accommodate a client who wishes to independently select an investment manager that is not available in the FWG Recommended Managers Service or BSN Program to manage the client's Account. The client assumes ultimate responsibility for monitoring the client's DC Program Account and the DC Manager's performance. A client's appointment and continued retention of a DC Manager to manage the client's Account are based ultimately upon the client's independent review of the DC Manager and the DC Manager's services. The client ultimately determines that the DC Strategy to be used in managing the client's Account is consistent with the client's stated investment objectives and financial needs and risk tolerance. Once retained by the client, a DC Manager will only be removed from managing the client's DC Program Account upon the manager's withdrawal, removal from the DC Program, or the client's direction to do so. A client should carefully consider the foregoing when deciding to participate in the DC Program and also consider whether another Service, such as the FWG Recommended Managers Service, may be more appropriate for the client.

Other SMA Strategy Information

Certain SMA Strategies are available through multiple Services. The overall cost of an SMA

Strategy and the types and levels of service provided to a client in connection with an SMA Strategy will vary depending upon the particular Service selected by the client. A client should ask the client's FWG Consultant whether an SMA Strategy is available through multiple Programs and, if so, the client should discuss with the FWG Consultant the different costs of the Services and the types and levels of service provided in connection with the Services. A client is solely responsible for selecting the Service in which the client's Account will participate.

Additional Service Information

Investment Discretion

Investment Selection and Trading Authorizations

A client retains complete discretion over investment selection and trading decisions with respect to assets in a client's Non-Discretionary Service Accounts, and FWG and Baird will only execute transactions for such Accounts pursuant to the client's instruction or authorization.

If a client's Account participates in a Discretionary Service, the client's advisory agreement provides Baird and the client's FWG Consultant, as applicable, discretionary authority to manage the assets in the client's Account in accordance with the terms of the Service selected by the client.

If a client's Account participates in the FWG Recommended Managers Service, the client's advisory agreement provides Baird and the client's FWG Consultant discretionary authority to appoint investment managers to manage the client's Account and to terminate or replace investment managers for the client's Account for any reason without prior notice to the client. If FWG or Baird terminates an investment manager from management of a client's FWG Recommended Managers Service Account, the client's advisory agreement provides FWG and Baird discretionary authority to manage the assets in the client's Account until a replacement investment manager is selected or alternative arrangements are made for the management of the client's assets.

If a client's Account participates in an SMA Service, the client's advisory agreement provides the investment manager selected to manage the client's Account, which may include an Implementation Manager, discretionary authority

to manage the assets in the client's Account in accordance with the terms of the SMA Service selected by the client.

If a client grants discretionary authority over the client's Account to FWG, Baird, the client's FWG Consultant or the client's investment manager, the client's advisory agreement authorizes FWG, Baird, the client's FWG Consultant and the client's investment manager, as applicable, to manage the client's Account and to make investment decisions for the client's Account, with the authority to determine the amount, type and timing for buying, holding, exchanging, converting and selling securities and other assets for the client's Account, subject to the terms of the Service selected by the client. The client's advisory agreement also grants to FWG, Baird, the client's FWG Consultant and the client's investment manager, as applicable, complete and unlimited trading authorization and appoints them as the client's agents and attorneys-in-fact to manage the assets in the client's Account on the client's behalf, subject to the terms of the Service selected by the client. Pursuant to such authorization and powers of attorney, FWG, Baird, the client's FWG Consultant and the client's investment manager may, in their sole discretion and at the client's risk, purchase, sell, exchange, convert and otherwise trade the securities and other assets in the client's Account, as well as arrange for delivery and payment in connection with the above, and act on the client's behalf in all matters necessary or incidental to the handling of the client's Account without prior notice to the client. Such trading authorizations and powers of attorney, whether granted to FWG, Baird, the client's FWG Consultant or the client's investment manager, shall remain in full force and effect until terminated by the client, the client's investment manager, FWG or Baird.

Orders for the purchase and sale of securities in a client's Discretionary Service Accounts will generally be executed by Baird, in its capacity as broker-dealer, as further described under the heading "Trading for Client Accounts" below, unless Baird's duty to seek to obtain best execution otherwise requires or unless the client has provided other instructions to Baird in writing. FWG and Baird do not have discretionary authority over the assets in a client's SMAs that are managed by an Other Manager and cannot purchase or sell such assets without the consent of the client or such Other Manager. The

investment manager for a client's SMAs may initiate securities transactions through Baird, in its capacity as broker-dealer, as further described under the heading "Trading for Client Accounts" below, subject to the manager's duty to seek to obtain best execution, or unless a client has provided other instructions in writing. Baird, as broker-dealer, will rely upon any such instructions of any investment managers selected to manage the client's Account.

If a client participates in an SMA Service, the client authorizes FWG and Baird to share client's information with the Overlay Manager and any Other Manager or Implementation Manager managing the client's Account. The client also authorizes and directs FWG and Baird to transmit to the Overlay Manager and any such Other Manager or Implementation Manager any instructions that the client may provide to FWG or Baird to the extent necessary to carry out the client's instructions.

Client Investment Restrictions

The Discretionary and the SMA Services offer a client the ability to impose reasonable investment restrictions on the management of an Account, including the designation of particular securities or types of securities that should not be purchased for the client's Account, but a client may not require that particular funds or securities (or types) be purchased for the client's Account. Reasonable investment restrictions requested by a client will apply only to those assets over which FWG, Baird or a client's investment manager has discretion.

FWG may also offer clients a socially responsible investing ("SRI") service, which assists a client in restricting investments to those that are consistent with the client's social investment guidelines or objectives. Clients electing the SRI service generally bear the cost of the SRI service as it is generally included in the Advisory Fee.

In the event that a client's Account is restricted from investing in certain securities, FWG, Baird or the client's investment manager, as applicable, will select such other replacement securities, if any, as they deem appropriate. Accounts with investment restrictions may perform differently from accounts without restrictions and performance may be poorer. In addition, in the event there is a change in the classification or

credit rating of a security held in the client's Account, a client's investment restrictions may force FWG, Baird or the client's investment manager to sell such security at an inopportune time, possibly negatively impacting Account performance and causing the client's Account to realize taxable gains or losses, which could be significant. A client should also be aware that, if the client's Account holds any investment vehicle (such as a mutual fund or ETF), any investment restrictions the client places on the client's Account may not flow through to the securities owned by that investment vehicle.

Should a client wish to impose or modify existing restrictions, or the client's financial condition or investment objectives have changed, the client should contact the client's FWG Consultant.

Affiliated Investment Products

FWG, Baird and Baird's affiliates may use the discretionary authority granted to them by a client to invest the client's Account in investment products affiliated with Baird or that pay fees to Baird or to any of its affiliates for investment advisory or other services they provide. In addition, if the client participates in cash sweep services provided by Baird, short-term cash balances in the client's Account may be invested in one or more money market mutual funds and individual deposit accounts offered by Baird, its affiliates, or a third party. Baird and its affiliates may receive fees or other compensation related to such cash balance investments made by the client.

By signing an advisory agreement with FWG, a client consents to FWG, Baird and Baird's affiliates investing all or a portion of the client's Account in investment products or in bank deposit accounts that pay advisory or other fees to Baird or its affiliates ("affiliated investment products"). The amount of fees received by Baird and its affiliates is generally described in the prospectus or other offering or disclosure documents for the investment product or deposit account. Additional information is also available on Baird's website at www.rwbaird.com/disclosures. FWG, Baird and Baird's affiliates will use their discretionary authority to invest the client's Account in affiliated investment products when they determine it to be in the client's best interest to do so. Generally, the criteria used by them in deciding to invest in affiliated investment products are the same as

those used in deciding to invest a client's assets in investment products unaffiliated with Baird. For more information about the criteria used by FWG and Baird, clients should review the section of the Brochure entitled "Portfolio Manager Selection and Evaluation" below. For more information about the criteria used by Baird's affiliates, clients should review the affiliate's Form ADV Part 2A Brochure. A client's consent may be revoked at any time.

Other Managers may use the discretionary authority granted to them by a client to invest the client's Account in investment products affiliated with the Other Manager or that pay fees to the Other Manager or to any of its affiliates for investment advisory or other services they provide.

By signing an advisory agreement with FWG, a client consents to each Other Manager managing client's Account investing all or a portion of the client's Account in investment products that pay advisory or other fees to the Other Manager or its affiliates. Each Other Manager is responsible for providing to the client information about the amount of fees received by the Other Manager and its affiliates and the criteria used by the Other Manager in deciding to invest in products affiliated with the Other Manager. A client should contact the Other Manager and review the Other Manager's Form ADV Part 2A Brochure for more information. A client's consent may be revoked at any time.

Investment Policy Statements

FWG and Baird will not review, monitor, accept or adhere to an investment policy statement or similar document that was not prepared by FWG or Baird, unless they otherwise specifically agree to do so in writing. Adherence to any such investment policy statement or similar document is solely a client's responsibility.

Conversion, Exchange or Sale of Certain Investments

By participating in a Service, a client authorizes FWG and Baird to convert or exchange any shares of investment funds, such as mutual funds, ETFs, closed-end funds, unit investment trusts ("UITs"), Complex Investment Products, and other similar investment pools (collectively, "Investment Funds") held in the client's Account to a class of shares of the same fund, such as advisory class

shares, institutional class shares, financial intermediary class shares, or another class of shares primarily designed for use in advisory programs (collectively, "Advisory Class Shares"), to the extent made available by the mutual fund or other Investment Fund in accordance with policies established by Baird from time to time, including, without limitation the Mutual Fund Share Class Policy that is described below.

A client should understand that, the client may not hold Advisory Class Shares in a non-Advisory Account and that the client may not be able to hold certain Advisory Class Shares in an account held at another firm. Upon the termination of a Service for an Account or the closure of an Account for any reason, FWG and Baird may convert or exchange the Advisory Class Shares held in the Account to an appropriate non-Advisory Class Shares issued by the same fund, or, if an appropriate non-Advisory Class Shares is not available, FWG and Baird may redeem or sell such Advisory Class Shares.

Trading for Client Accounts FWG's and Baird's Trading Practices

Placement of Client Trade Orders

FWG and Baird will select the broker-dealers that will execute trade orders for Non-Discretionary Accounts and with respect to Accounts that are managed directly by FWG or Baird unless the client has provided instructions to FWG to the contrary. As investment adviser, FWG and Baird have an obligation to seek "best execution" of client trade orders. "Best execution" means that they must place client trade orders with those broker-dealers that they believe are capable of providing the best qualitative execution of client trade orders under the circumstances, taking into account the full range and quality of the services offered by the broker-dealer, including the value of the research provided (if any), the broker-dealer's execution capabilities, the cost of the trade, the broker-dealer's financial responsibility, and its responsiveness to FWG and Baird. It is important to note that FWG's and Baird's best execution obligation does not require them to solicit competitive bids for each transaction or to seek the lowest available cost of trade orders, so long as they reasonably believe that the broker-dealer selected can be reasonably expected to provide clients with the best qualitative execution under the circumstances.

Because a client does not pay commissions to Baird when Baird, acting as broker-dealer, executes a client's trade orders, and because a client may incur commission costs in addition to the Advisory Fee if trade orders were to be executed by another broker-dealer firm, clients generally receive a cost advantage whenever Baird executes client transactions. For this reason, and given Baird's execution capabilities as broker-dealer, FWG expects that Baird will generally execute trade orders, as broker-dealer, for Non-Discretionary Accounts and the client's Accounts that are directly managed by FWG or Baird.

However, in some instances, circumstances may arise that may require FWG or Baird, in compliance with their best execution obligations to a client, to place a client's trade order with a firm other than Baird. If they place trade orders for the client's Account for execution by a firm other than Baird, and the other firm imposes a commission or equivalent fee on the trade (including a commission imbedded in the price of the investment), the client will incur trading costs in addition to the Advisory Fee.

Trade Aggregation, Allocation and Rotation Practices

FWG and Baird may aggregate contemporaneous buy and sell orders for the accounts over which they have discretionary authority (a practice also known as bunching trades or block transactions). This practice may enable them to obtain more favorable execution, including better pricing and enhanced investment opportunities, than would otherwise be available if orders were not aggregated. Using block transactions may also assist them in potentially avoiding an adverse effect on the price of a security that could result from simultaneously placing a number of separate, successive or competing, client orders.

FWG and Baird generally aggregate buy and sell orders when executing trades for client account assets under their direct discretionary management when they have the opportunity to do so. When utilizing block transactions, FWG and Baird generally aggregate a client's trade orders with trade orders for clients who are participating in the same Service and pursuing the same model portfolio or strategy. In some cases, FWG or Baird may aggregate a client's trade orders with trade orders for other advisory clients who are not

participants in the Services described in this Brochure. However, FWG and Baird determine whether or not to utilize block transactions for a client in their sole discretion and FWG's and Baird's decision is subject to their duty to seek best execution. In determining the amount to be allocated to an account, if any, FWG and Baird take into consideration account specific investment restrictions, undesirable position size, account portfolio weightings, client tax status, client cash positions and client preferences.

All advisory clients participating in a block transaction will receive the same execution price for the security bought or sold. Average prices may be used when allocating purchases and sales to a client's Account because such securities may be purchased and sold at different prices in a series of block transactions. As a result, the average price received by a client may be higher or lower than the price the client may have received had the transaction been effected for the client independently from the block transaction.

The amount of securities available in the marketplace, at a particular price at a particular time, may not satisfy the needs of all clients participating in a block transaction and may be insufficient to provide full allocation across all client accounts. To address this possibility, Baird has adopted trade allocation policies and procedures that are designed to make securities allocations to discretionary client accounts in a manner such that all such clients receive fair and equitable treatment over time. If a block transaction cannot be executed in full at the same price or time, the securities actually purchased or sold by the close of each business day will generally be allocated pro rata among the clients participating in the block transaction. However, FWG may also make random allocations to client accounts in certain circumstances, such as when Baird deems a partial fill for the total block order to be low. Adjustments may also be made to avoid a nominal allocation to client accounts.

When FWG is not able to aggregate trades, FWG generally uses a trade rotation process that is designed to be fair and equitable to its advisory clients over time. However, a client should be aware that FWG's trade rotation practices may at times result in a transaction being effected for the client's Account that occurs near or at the end of the rotation and, in such event, client's trade orders will significantly bear the market price

impact, if any, of those trades executed earlier in the rotation, and, as a result, the client may receive a less favorable net price for the applicable trade.

Notwithstanding the foregoing, if an aggregated trade order involves fixed income securities, FWG and Baird may allocate the securities based on the needs of client accounts. In addition, FWG and Baird will at times place aggregated trade orders for fixed income securities prior to determining how the aggregated trade order will be allocated to client accounts. In those instances when an aggregated trade order for fixed income securities is placed prior to determining client allocations or when such trade order is only partially filled, FWG or Baird will seek to allocate trades in manner intended to be fair and equitable to applicable clients over time. Furthermore, when a trade order for fixed income securities is only partially filled, FWG and Baird may place orders for other fixed income securities that have similar characteristics, such as issuer name, structure, credit rating, or market sector.

Because FWG and Baird are unable to buy or sell any security for a client's Non-Discretionary Accounts without the client's authorization, FWG and Baird generally do not aggregate or bunch trades for those Accounts with the same or similar trades for other client accounts. Because similar orders for the client and FWG's or Baird's other clients may be placed and filled at different times, the client may buy or sell securities at prices that are different from the prices obtained by other clients who received the same or similar advice from FWG or Baird.

Directed Brokerage Arrangements

In some cases, a client may direct FWG to use a particular broker-dealer for execution of the client's trade orders (a "directed brokerage arrangement"), and FWG may agree to the arrangement. This may occur when a client's Account is held at another broker-dealer firm and a client directs FWG to execute trades through such firm, or when a client's retirement account or other account is maintained on a platform operated and managed by a third party unaffiliated with FWG or Baird and trades must be executed through that platform. A client should understand that FWG and Baird consider such arrangements to be directed brokerage arrangements. A client should also understand

that if the client has a directed brokerage arrangement, FWG and Baird may be unable to achieve best execution for the client's transactions. A client should note that any costs related to the directed brokerage arrangement are not included in the Advisory Fee and that the client will be solely responsible for monitoring, evaluating and reviewing the arrangement with the directed broker-dealer and paying any commissions or markups or markdowns or other costs imposed by the directed broker-dealer. A client should also note that FWG generally will not aggregate the client's directed brokerage trade orders with orders for other FWG clients. As a result, a client's transaction costs may be higher because the client will not benefit from any volume discounts or other reduced transaction costs that FWG may obtain for its other clients. A client should further note that FWG generally will not include such client trade orders in its trade rotation process and that FWG will generally place the client's trade orders with the directed broker-dealer after FWG completes its trading for other FWG client accounts. The client's trade orders will significantly bear the market price impact, if any, of those trades executed earlier in FWG's rotation. As a result, the client may receive a less favorable net price for the trade.

If a client directs FWG to use a particular broker-dealer, and if the particular broker-dealer referred the client to FWG or if the particular broker-dealer refers other clients to FWG or Baird in the future, FWG and Baird may benefit from the client's directed brokerage arrangement. Because of these potential benefits, FWG and Baird may have an economic interest in having the client continue the directed brokerage arrangement. The benefits that FWG and Baird receive conflict with the client's interest in having FWG or Baird recommend that the client utilize another broker-dealer to execute some or all transactions for the client's Account.

Before directing FWG to use a particular broker-dealer, a client should carefully consider the possible costs or disadvantages of directed brokerage arrangements.

Cross Trading Involving Advisory Accounts

From time to time, when FWG and Baird believe that each respective transaction is consistent with the client's best interest, FWG, acting as investment manager, may cause (or in the case

of Non-Discretionary accounts, recommend) the sale of securities from the account of an advisory client while at or about the same time causing (or, in the case of Non-Discretionary accounts, recommending) the purchase of the same securities for the account of another FWG advisory client. Such transactions may have the benefit of reducing transaction and market impact costs.

In such cases, because Baird is acting as investment adviser for both buyer and seller, Baird is subject to potentially conflicting interests in causing (or recommending) the transactions. Also, because Baird is acting as investment adviser for both buyer and seller, transaction prices may be determined more by reference to market information or dealer indications for the securities involved, and less through the type of independent arms-length negotiation that might otherwise occur. Baird has adopted internal policies and procedures that require FWG and Baird to obtain approval of Baird's Compliance Department before affecting a cross trade.

Trade Error Correction

It is Baird's policy that if there is a trade error for which FWG or Baird is responsible, FWG or Baird will take actions, based on the facts and circumstances surrounding the error, to put the client's Account in the position that it would have been in as if the error had not occurred, including by adjusting or reversing the transaction, entering an offsetting transaction, or other methods that may be deemed appropriate by Baird. Errors caused by FWG or Baird will be corrected at no cost to client's Account, with the client's Account not recognizing any loss from the error. FWG and Baird may net gains and losses from a single error event involving more than one transaction in a security or transactions in multiple securities. The client's Account will be fully compensated for any losses incurred as a result of an error event. If the trade error results in a gain, the gain may be retained by Baird but such gain is not given to or shared with any FWG or Baird associate.

FWG and Baird offer many services and, from time to time, may have other clients in other programs trading in opposition to a client. To avoid favoring one client over another client, Baird attempts to use objective market data in the correction of any trading errors.

If a client's Account is managed by an Other Manager, the client should review the Other Manager's Brochure and contact the Other Manager for information about how the Other Manager corrects trade errors.

Trading Practices of Investment Managers

If a client's Account or a portion thereof is managed by an investment manager, the client should note that, like Baird, such investment manager has a duty to seek best execution for the client's Account.

Investment managers may participate in other wrap fee programs sponsored by firms other than Baird. In addition, investment managers may manage institutional and other accounts not part of a wrap fee program. In the event an investment manager purchases or sells a security for all accounts using a particular SMA Strategy offered by the investment manager, the investment manager may have to potentially effect similar transactions through a number of different broker-dealers. In some cases, to address this situation, investment managers may decide to aggregate all such client transactions into a block trade that is executed through one broker-dealer. This practice may enable the investment manager to obtain more favorable execution, including better pricing and enhanced investment opportunities, than would otherwise be available if orders were not aggregated. Using block transactions may also assist the investment manager in potentially avoiding an adverse effect on the price of a security that could result from simultaneously placing a number of separate, successive or competing client orders. However, as it pertains to FWG clients, this practice may result in "trading away" from Baird, which is more fully described below.

Alternatively, an investment manager may utilize a trade rotation process where one group of clients may have a transaction effected before or after another group of the investment manager's clients. A client should be aware that an investment manager's trade rotation practices may at times result in a transaction being effected for the client's Account that occurs near or at the end of the investment manager's rotation and, in such event, client's trade orders will significantly bear the market price impact, if any, of those trades executed earlier in the investment manager's rotation, and, as a result, the client

may receive a less favorable net price for the trade. Additional information regarding an investment manager's trade rotation policies, if any, is available in the investment manager's Form ADV Part 2A Brochure.

Certain Model Providers have adopted trade rotation policies that allow them to send Model Portfolio updates to the Overlay Manager after they have implemented the Model Portfolio updates for client accounts managed by them or after they have otherwise completed trading for those accounts. The Overlay Manager has provided to Baird a list of Model Providers that have such trade rotation policies, which list is available on Baird's website at www.rwbaird.com/disclosures. An FWG client should understand that an Account pursuing a Model Portfolio strategy offered by those Model Providers will have trades executed for the client's Account at the end of the Model Provider's trade rotation on a regular and consistent basis. As a result, trade orders for such an Account will significantly bear the market price impact, if any, of those trades executed earlier in the Model Provider's rotation and the performance of the Account will differ, perhaps in a materially negative manner, from the performance of client accounts managed by the Model Provider. In addition and for the same reasons described above, the performance of a Model Portfolio, as reported by the Model Provider, will differ, perhaps in a materially negative manner, from the actual performance realized by FWG client Accounts pursuing the Model Portfolio strategy. FWG and Baird do not make or control any investment manager's trade rotation policies, and they do not monitor, evaluate or review any investment manager's compliance with the manager's trade rotation policies or whether such trade rotation policies result in inequitable performance of client Accounts. A client selecting a Model Portfolio offered by such a Model Provider is urged to obtain a copy of the Model Provider's Form ADV Part 2A Brochure and review the description of the Model Provider's trade rotation policy contained in that document. A copy of a Model Provider's Brochure can be obtained by contacting an FWG Consultant. A client should also monitor the performance of an Account pursuing such a Model Portfolio strategy and compare that performance with the performance reported for the Model Portfolio by the Model Provider. A client should discuss questions about Account performance or the Model Provider's

trade rotation policy with the client's FWG Consultant.

Because a client does not pay commissions to Baird when Baird, acting as broker-dealer, executes a client's trade orders, and because a client generally would incur trading costs in addition to the Advisory Fee if trade orders were to be executed by another broker-dealer firm, clients generally receive a cost advantage whenever Baird executes FWG client transactions. For this reason, and given Baird's execution capabilities as broker-dealer, investment managers may determine that placing trade orders for the client's Account with Baird is the most favorable option for the client. However, investment managers may place a client's trade orders with a broker-dealer firm other than Baird if the manager determines that it must do so to comply with its best execution obligations. This practice is frequently referred to as "trading away" and these types of trades are frequently called "step out trades". A client's trade order so executed is then cleared and settled through Baird in what is frequently referred to as a "step in".

In some instances, step out trades are executed by the other firm without any additional commission or markup or markdown, but in other instances, the executing firm may impose a commission or a markup or markdown on the trade. If a client's investment manager places trade orders for the client's Account with a firm other than Baird, and the other firm imposes a commission or equivalent fee on the trade (including a commission imbedded in the price of the investment), the client will incur trading costs in addition to the Advisory Fee.

Some managers have historically placed nearly all client trades with broker-dealer firms other than Baird for execution. Some managers have placed nearly all or all client trades resulting from changes to their model portfolios or strategies with firms other than Baird. Similarly, some managers have frequently placed client trade orders for fixed income, foreign and small cap securities with firms other than Baird. In some cases, the other executing broker-dealer firm imposes a commission or markup or markdown (which is embedded in the price of the security) for executing the trade. As a result, these types of managers and their strategies could be more

costly to a client than managers that primarily place client trade orders with Baird for execution.

A list of managers that have informed Baird that they have traded away from Baird during 2018 - 2019 and general information about the additional cost of those trades (if any) is available on Baird's website at www.rwbaird.com/disclosures. The information about each manager provided on Baird's website is based solely upon the information provided to Baird by such manager. Baird has not independently verified the information, and as a result, none of Baird or any of its affiliates or associates makes any representation as to the accuracy of any such information.

A client should contact the client's FWG Consultant or investment manager if the client would like to obtain specific information about trade aways and the amount of commissions or other costs, if any, the client incurred in connection with step out trades.

A client should note that each investment manager is solely responsible for ensuring that it complies with its best execution obligations to the client. A client should review the manager's trading for the client's Account because FWG and Baird do not monitor, review or evaluate whether the manager is complying with its best execution obligations to the client. A client should review the manager's Form ADV Part 2A Brochure, inquire about the manager's trading practices, and consider that information carefully, before selecting a manager. In particular, the client should carefully consider any additional trading costs the client may incur before selecting a manager to manage the client's Account.

A client should note that the client's advisory agreement permits FWG and Baird to trade as principal on orders received from Other Managers. See "Trade Execution Services Performed by Baird—Principal Transactions" below for more information.

Trade Execution Services Performed by Baird

If Baird provides trade execution services for a client's Account, Baird will generally act as agent when routing client trade orders for execution. However, Baird may cross trades between client accounts or may act as principal for its own account in certain circumstances to the extent

permitted by applicable law as is more fully described below.

A client should understand that certain securities, such as securities traded over-the-counter and fixed income securities, are primarily traded in dealer markets. When Baird purchases or sells these types of securities for client accounts, it generally does so through broker-dealer firms acting as a dealer or principal. Dealers executing principal trades typically include a markup, markdown or spread in the net price at which transactions are executed. A client bears such costs in addition to the Advisory Fee.

Agency Cross Transactions

In certain circumstances and to the extent permitted by applicable law and regulation, Baird and FWG Consultants may effect "agency cross" transactions with respect to a client's Account. An "agency cross" transaction is a transaction in which Baird or its affiliates act as broker for the party or parties on both sides of the transaction. As compensation for brokerage services, Baird may receive compensation from parties on both sides of an agency cross transaction, the amount of which may vary. FWG Consultants may receive compensation from Baird related to agency cross transactions. Therefore, Baird and FWG Consultants may have a conflicting division of loyalties and responsibilities. However, in all cases, Baird and FWG Consultants will seek to obtain the best execution for each respective advisory client and will effect agency cross transactions only in accordance with the requirements of Rule 206(3)-2 under the Advisers Act. Furthermore, Baird will comply with additional regulations applicable to retirement accounts.

Where applicable, a client's advisory agreement discusses agency cross transactions and authorizes Baird and FWG Consultants to effect agency cross transactions for a client's Account. **A client's authorization to Baird and FWG Consultants to effect "agency cross" transactions is given pursuant to Rule 206(3)-2 under the Advisers Act and may be revoked at any time by the client in client's sole discretion by notifying the client's FWG Consultant in writing.**

Principal Transactions

Subject to the requirements of applicable law, Baird and FWG Consultants may execute transactions for a client's Account while acting as principal for Baird's own account. Baird and FWG Consultants act as principal when they sell a security from Baird's inventory to a client or they purchase a security from a client for Baird's inventory. Baird and FWG Consultants also act as principal when they sell new issue securities to clients in securities offerings underwritten by Baird. Baird also acts as principal in riskless principal transactions. Riskless principal transactions refer to transactions in which Baird, after having received a client's order, executes an identical order in the marketplace to fill the client's order while acting as principal.

Baird may realize profits from principal transactions with a client based on the difference between the price Baird paid for the security and the price at which Baird sold the security, which may include a markup, markdown or spread from the prevailing market price, an underwriting fee, selling dealer concession, or other incentive to execute the transaction. FWG Consultants may receive compensation from Baird related to principal trades of securities underwritten by Baird. Any compensation received by Baird or an FWG Consultant in a principal transaction is in addition to the Advisory Fee paid by the client. Principal trades also allow Baird to sell securities from its account that it deems undesirable and to buy securities for its account that it deems desirable. Thus, in trading as principal with a client, Baird and FWG Consultants will have potentially conflicting division of loyalties and responsibilities regarding their own interests and the interests of the client. This potential compensation may give Baird and FWG Consultants an incentive to recommend a transaction in which Baird and FWG Consultants act as principal over other transactions. Nonetheless, Baird and FWG Consultants have a fiduciary duty to act in the client's best interest and to seek best execution for advisory clients. Baird addresses this conflict through disclosure in this Brochure. Furthermore, Baird has adopted internal procedures that require Baird and FWG Consultants, when acting in a principal capacity, to disclose all material information regarding Baird's interest in the transaction, and obtain the client's approval of the transaction prior to settlement.

A client's advisory agreement discloses, where applicable, the possibility of Baird's role in potential principal transactions, and each transaction confirmation sent to FWG clients discloses the capacity in which Baird served in the transaction and whether Baird is a market maker in each security the client bought or sold.

To the extent permitted by applicable law and regulation, if a client's Account participates in a Non-Discretionary Service or other non-discretionary service, or if the Account is managed by an Other Manager, the client's advisory agreement provides Baird and FWG Consultants with a blanket authorization to act as principal for Baird's own account in selling any security to, or purchasing any security from, the client's Account. With this authorization, Baird and FWG Consultants may effect any and all principal transactions with the client's Account without having to provide specific written disclosures or obtain written client consent prior to completion of each proposed principal trade, subject to the requirements of an exemptive order issued by the SEC to Baird (Rel. No. IA-4596) and other applicable law and regulation. **This authorization to enable Baird and FWG Consultants to trade as principal with a client's Account may be revoked at any time by the client in client's sole discretion by notifying the client's FWG Consultant in writing.**

Complex Strategies and Complex Investment Products

Some Services offer clients the ability to pursue Alternative Strategies or other Complex Strategies that involve special risks not apparent in more traditional investments like stocks and bonds. Complex Strategies may be pursued in multiple ways, including by investing in alternative mutual funds, ETFs, hedge funds, managed futures, private equity funds and SMAs managed by third party managers. Some Complex Strategies invest in Non-Traditional Assets, such as real estate, commodities (which may include metals, mining, energy and agricultural products), currencies, movements in securities indices, credit spreads and interest rates, and venture capital and buyout investments in private companies. Some Complex Strategies engage in the use of margin or leverage or selling securities short ("short sales"). Some Complex Strategies invest in derivative

instruments such as options, convertible securities, futures, swaps, or forward contracts. Complex Investment Products generally engage in one or more Complex Strategies. Additional information about Alternative Strategies and Complex Strategies is contained under the heading "Portfolio Manager Selection and Evaluation—Methods of Analysis, Investment Strategies and Risk of Loss—Investment Strategies and Methods of Analysis—Alternative Strategies and Complex Strategies" below. Additional information about Complex Strategies and Complex Investment Products, generally, is provided below.

Non-Traditional Assets

Non-Traditional Assets, such as commodities, currencies, securities indices, interest rates, credit spreads, and private companies, may be used for diversification purposes. They may also be used to try to reduce market and inflation risk. The performance of Non-Traditional Assets may not correspond to the performance of the stock markets generally, and investments in Non-Traditional Assets will generally impact an account's returns differently than more traditional investments like stocks or bonds. Non-Traditional Assets are subject to risks that are different from, and in some instances, greater than, other assets like stocks and bonds. Non-Traditional Assets are generally more difficult to value, less liquid, and subject to greater volatility compared to stocks and bonds.

Margin and Leverage

Margin

Margin involves borrowing money from a firm, such as Baird, to buy securities. If a client wishes to pay for securities by borrowing part of the purchase price from Baird, a client must open a margin account with Baird, and Baird will provide the client with a margin loan. The securities purchased on margin are used as Baird's collateral for the margin loan. The value of the collateral in the margin account must be maintained at a certain level relative to the margin loan for the duration of the loan. If the securities in the client's Account decline in value, so does the value of the collateral supporting the margin loan, and as a result, Baird may take action, such as issue a margin call and sell securities in the Account.

Leverage

Leverage generally attempts to obtain investment exposure in excess of available assets through the use of borrowings, short sales and other derivative instruments. While leverage can potentially enhance returns, it can also exacerbate losses if changes in the markets, or the values of the investments subject to the leverage, are adverse to the strategy being pursued. The use of leverage may also increase an Account's volatility.

Short Sales

Short selling attempts to benefit from an anticipated decline in the market value of a security. To affect a short sale, a client sells a security the client does not own. When a client sells a security short, Baird borrows the security from a lender and makes delivery to the buyer on the client's behalf. Because short sales involve an extension of credit from Baird to the client, a client must use a margin account. A client must also eventually purchase the same shares sold short and return them back to the lender. It is possible that the prices of securities that a client sells short may increase in value, in which case the client may lose money on the short position. Short selling thus runs the risk of loss if the price of the securities sold short does not decline below the price at which they were originally sold. This risk of loss is theoretically unlimited, as there is no cap on the amount that the price of a security may appreciate.

Clients should note that investment managers managing a client's Account or investment products in the client's Account may also engage in short sales. Thus, a client's Account will be subject to short sales risks if the investment manager managing the client's Account or an investment product in the client's Account engages in short sales.

Options and Other Derivative Instruments

Derivative Instruments

Derivatives instruments, such as options, convertible securities, futures, swaps, and forward contracts are financial contracts that derive value based upon the value of an underlying asset, such as a security, commodity, currency, or index. Derivative instruments may be used as a substitute for taking a position in the underlying asset. Derivative instruments may also

be used to try to hedge or reduce exposure to other risks. They may also be used to make speculative investments on the movement of the value of an underlying asset. The use of derivative instruments involves risks different from, or possibly greater than, the risks associated with investing directly in securities and other traditional investments. Investing in derivatives also generally involves leverage. Derivatives are also generally less liquid, and subject to greater volatility compared to stocks and bonds.

Options

Options transactions may involve the buying or writing of puts or calls on securities. In some cases, Baird may require clients to open a margin account to engage in options trading.

With a call option, the purchaser has the right to buy, and the seller (writer) the obligation to sell, the underlying security or index at a predetermined price (i.e. the exercise or strike price) prior to expiration of the option. The premium paid to the seller (writer) for the option is in consideration for the underlying obligations imposed on the seller should the option be exercised. With a put option, the purchaser has the right to sell, and the seller has the obligation to buy, the underlying security or index at the exercise price prior to expiration of the option.

In buying a call option, the purchaser expects that the market value of the underlying security or index will appreciate, which would enable the purchaser of a call to buy the underlying security or index at a strike price lower than the prevailing market price. The purchaser of the call option makes a profit if the prevailing market price is greater than the sum of the strike price plus the premium paid for the option. The seller of a call option earns income in the form of the premium received from the purchaser for the option and expects that the market value of the underlying security or index will depreciate such that the option will expire without being exercised. The seller of a call option makes a profit if the prevailing market price of the underlying security or index is less than the sum of the strike price plus the premium received.

In buying a put option, the purchaser expects that the market value of the underlying security or index will depreciate, which would enable the

purchaser of a put to sell the underlying security or index at a strike price higher than the prevailing market price. The purchaser of the put option makes a profit if the prevailing market price is less than the sum of the strike price and the premium paid for the option. The seller of a put option earns income in the form of the premium received from the purchaser for the option and expects that the market value of the underlying security or index will appreciate such that the option will expire without being exercised. The seller of a put option makes a profit if the prevailing market price of the underlying security or index is greater than the difference between the strike price and the premium.

In purchasing a put or call option, the purchaser faces the risk of loss of the premium paid for the option if the market price moves in a direction opposite to what the purchaser had expected. In selling or writing an option, the seller faces significantly more risk. A seller of a call option faces the risk of significant loss if the prevailing market price of the underlying security or index increases above the strike price, and a seller of a put option faces the risk of significant loss if the prevailing market price of the underlying security or index decreased below the strike price.

Clients should note that investment managers managing a client's Account or investment products in the client's Account may also engage in options transactions. Thus, a client's Account will be subject to options risks if the investment manager managing the client's Account or an investment product in the client's Account engages in options transactions.

Complex Investment Products

Complex Investment Products typically invest primarily in Non-Traditional Assets or engage in one or more Complex Strategies. Complex Investment Products include Alternative Investment Products, such as hedge funds, funds of hedge funds, private equity funds, funds of private equity funds and managed futures, but also include other investments pursuing Complex Strategies, including but not limited to, exchange or swap funds, leveraged funds, inverse funds, and other special situation funds, structured certificates of deposit and structured notes ("structured products"), ETNs, business development companies ("BDCs"), real estate

investment trusts ("REITs"), and master limited partnerships ("MLPs").

In addition, a client should be aware that more traditional investments, such as mutual funds, ETFs, UITs and variable annuities may also pursue Complex Strategies, thereby making them Complex Investment Products. A client should carefully review the prospectus or other offering document for each investment and understand the strategy being pursued before deciding to invest. More detailed information about mutual funds, ETFs, UITs and variable annuities is available on Baird's website at www.rwbaird.com/disclosures.

Additional Important Information

The use of Complex Strategies or Complex Investment Products is not appropriate for some clients because they involve special risks. A client should not engage in those strategies or invest in those products unless the client is prepared to experience significant losses in the client's Account. This is especially true for short selling, which can result in unlimited losses as there is no limit to the amount borrowed securities can rise in value. See "Portfolio Manager Selection and Evaluation—Methods of Analysis, Investment Strategies and Risk of Loss—Principal Risks" below for more information. Before using those types of strategies or products, a client is strongly urged to discuss them with the client's FWG Consultant and any investment manager managing the client's Account. A client should also carefully review the client's agreements with Baird and related disclosure documents, which the client should have received when opening the Account. Additional information about Complex Strategies and Complex Investment Products is provided under the heading "Portfolio Manager Selection and Evaluation—Methods of Analysis, Investment Strategies and Risk of Loss—Investment Strategies and Methods of Analysis—Investment Strategies—Alternative Strategies and Complex Strategies" below and on Baird's website at www.rwbaird.com/disclosures.

A client assumes responsibility for engaging in Complex Strategies and investing in Complex Investment Products. If a client determines that the client no longer wants to engage in those strategies or invest in those products, the client is responsible for notifying the client's FWG Consultant and any investment manager

managing the client's Account. FWG and Baird are not responsible for any losses resulting from any Other Manager's failure or delay in implementing any such instructions.

The use of Complex Strategies or Complex Investment Products has a unique impact upon the calculation of a client's asset-based Advisory Fee. See "Advisory Fees—Calculation and Payment of Fees" below for more information. A client should also understand that Baird and the client's FWG Consultant may have a financial incentive to use, or recommend the use of, Complex Strategies or Complex Investment Products or to increase, or recommend the increase of, margin loans. See "Additional Information—Code of Ethics, Participation or Interest in Client Transactions and Personal Trading" below.

As a creditor, Baird may have interests that are adverse to a client. Neither FWG nor Baird will act as investment adviser to a client with respect to the liquidation of securities held in an Account to meet a call on a margin loan. Any such sale of assets will be executed in Baird's capacity as broker-dealer and creditor and may, as permitted by law, result in executions on a principal basis.

Permitted Investments

Under the Discretionary and Non-Discretionary Services, Baird determines the asset categories and investment products that clients may access for investment ("Permitted Investments"). Permitted Investments vary by Service. Although Baird determines the Permitted Investments under those Services, the level of initial and ongoing evaluation, monitoring and review that FWG and Baird perform on Permitted Investments varies. For more information, see the descriptions of each Service under "Services, Fees and Compensation" above and under "Portfolio Manager Selection and Evaluation—Methods of Analysis, Investment Strategies and Risk of Loss—Investment Strategies and Methods of Analysis" below.

FWG or Baird may add Permitted Investments or restrict client access to a Permitted Investment at any time in their sole discretion.

Some Permitted Investments contain restrictions that limit their use, and clients will not be permitted to purchase or hold such investments

outside of an Account. See "Account Requirements and Types of Clients" below for more information.

FWG Investment Management Service.

Permitted Investments for the FWG Investment Management Service generally include, but are not limited to, the following types of investments:

- equity securities, including, but not limited to, common stocks, American Depositary Receipts ("ADRs"), and ordinary shares, including whether exchange-traded, or over-the-counter traded;
- fixed income securities, including but not limited to, debt securities issued by domestic and foreign corporations and other entities; preferred stocks, asset-backed securities (including mortgage-backed securities and collateralized mortgage obligations ("CMOs")); convertible debt securities; obligations issued by U.S., state, or foreign governments or their agencies, instrumentalities, or authorities, such as securities issued by the U.S. Treasury, federal government agencies or federal government-sponsored enterprises ("Agency securities"), or foreign governments; municipal securities; money market mutual funds; certificates of deposit ("CDs") (primary or secondary); commercial paper;
- rights or warrants on equity securities, written covered call equity options;
- open-end mutual funds shares that Baird has selected for use in the Service, which generally includes only those funds with which Baird has a selling agreement and only those funds that are no-load, load-waived, or that were purchased through Baird and at least 24 months has elapsed since a front-end sales charge (load) or commission was imposed;
- closed-end funds, ETFs, and UITs that have cost structures designed for use in fee-based investment advisory programs;
- BDCs, publicly-traded REITs and MLPs (which may be organized as limited liability companies ("LLCs"));

- ETNs, leveraged funds, inverse funds, and other special situation mutual funds, and exchange or swap funds;
- certain hedge funds, funds of hedge funds, private equity funds, funds of private equity funds, funds of real estate, structured products, and managed futures that Baird has selected for use in the Services; and
- cash and cash equivalents.

The types of investments that are not permitted for the FWG Investment Management Service generally include, but are not limited to:

- Class B or Class C shares offered by mutual funds or any other class of mutual fund shares that impose a contingent deferred or level sales charge (back-end or level load);
- UITs that impose an initial or deferred sales charge (load);
- put options;
- all annuities and insurance products;
- commodities, futures or options on commodities, and commodity pools; and
- private investment funds and Complex Investment Products that Baird has not selected for use in the Services.

SMA Services. Investment products under the SMA Services are selected solely by the investment manager providing services to the client. *The investment products used by an investment manager may include products that Baird does not permit to be used in connection with the FWG Investment Management Service described above.* A client should review the investment manager's Form ADV Part 2A Brochure for more information.

Consulting Services. From time to time, FWG may advise clients with respect to, or may manage, certain assets such as private REITs, real estate investments, and insurance products held by custodians other than Baird even though those assets may not be eligible for Accounts held at Baird. Any such arrangement will be set forth in the client's advisory agreement.

Unsupervised Assets

Under certain circumstances, FWG and Baird, in their sole discretion, may accept a client request to place a non-Permitted Investment into a client's Account. In most cases, a non-Permitted Investment is an "unsupervised" asset, meaning that FWG and Baird do not manage or provide investment advisory services regarding such asset. FWG and Baird, in their sole discretion, may also designate an asset that is otherwise eligible for a client's Account as "unsupervised" under certain circumstances, such as when a client acquires an asset in an unsolicited transaction, transfers an asset from an account held at another firm, or continues to hold an asset against FWG's or Baird's recommendation. If a client holds an unsupervised asset in an Account, the client should understand that the unsupervised asset may not be included in performance reports provided to the client and that FWG and Baird do not manage, provide investment advice, or otherwise act as an investment adviser with respect to the unsupervised asset, even if the unsupervised asset is included in account statements or performance reports provided to the client. Baird may impose additional fees upon Accounts holding unsupervised assets. See "Other Fees and Expenses" below for more information. A client should also understand that holding an unsupervised asset in an Account creates a risk that the asset will be inadvertently included in the calculation of the client's Advisory Fee and may increase the risk of trade errors, overinvestment, and negative Account performance. A client should consult the client's FWG Consultant for further information.

Special Considerations for the Services

SMA Clients

Clients participating in an SMA Service, grant their investment manager the discretion to sell investments from time to time and or invest in securities in order to avoid the recognition of capital gains and in order to recognize taxable losses. Any such tax management by an investment manager is done at the manager's discretion, and there is no guarantee the manager will do so. A client should understand that some investment managers do not provide tax management. A client should discuss tax management needs and expectations with the client's FWG Consultant and manager prior to investing.

Third Party Information

When providing services to a client, FWG and Baird rely on information provided by third parties and other external sources believed to be reliable, including, but not limited to, information provided by investment managers. FWG and Baird assume that all such information is accurate, complete and current. FWG and Baird do not conduct an in-depth review of, or verify, such information, and they do not guarantee the accuracy of the information used. See "Portfolio Manager Selection and Evaluation—Performance Calculation" and "Portfolio Manager Selection and Evaluation—Methods of Analysis, Investment Strategies and Risk of Loss—Methods of Analysis" below for more information.

Goal Management

FWG and Baird make available to clients an optional goal management service ("Goal Management"). Goal Management provides clients the ability to set a single, overall investment objective for all or a portion of assets selected by the client with the flexibility of using multiple, eligible Advisory Accounts that may have different investment strategies or objectives. If a client elects to have Baird implement a plan of Goal Management (a "Goal Management Plan") using two or more eligible Advisory Accounts ("Goal Management Accounts"), the Goal Management Accounts, taken together, will be managed or advised by Baird and client's FWG Consultant in such a way so as to seek to achieve a single, overall goal or investment objective ("Goal Management Objective") chosen by the client. Each individual Account included in a Goal Management Plan will also be managed or advised by Baird and client's FWG Consultant in accordance with the terms of the applicable Advisory Program or Service and any investment strategy or objective applicable to the Account. However, to the extent consistent with the terms applicable to an Account included in a Goal Management Plan, each individual Account included in the Goal Management Plan may be managed or advised in any manner believed by Baird or the client's FWG Consultant to be necessary or appropriate for the Goal Management Accounts, taken together, to seek to achieve the Goal Management Objective.

The Goal Management Objectives that Baird makes available to clients as part of Goal Management include: (1) All Growth; (2) Capital

Growth; (3) Growth with Income; (4) Income with Growth; (5) Conservative Income; and (6) Capital Preservation. A description of those objectives is contained under the heading "Portfolio Manager Selection and Evaluation—Methods of Analysis, Investment Strategies and Risk of Loss—Investment Strategies and Methods of Analysis—Investment Strategies—Asset Allocation Strategies" below.

In certain circumstances, clients that are part of the same household may include their eligible Advisory Accounts in the same Goal Management Plan (a "Household Goal Management Plan"). It is the client's sole responsibility to notify FWG that the client is part of a household so that FWG is aware of the client's eligibility for a Household Goal Management Plan. It is also the client's sole responsibility to notify FWG whenever the client ceases to be part of a household if an Account is part of a Household Goal Management Plan. Failure to do so could have a materially negative impact on applicable Accounts.

An Account will be removed from a Goal Management Plan: (1) upon request or consent of the client, (2) if the Account ceases to be an eligible Advisory Account, (3) in the event the Account is part of a Household Goal Management Plan, if the client notifies FWG that the client ceases to be a member of the applicable household, or (4) upon written notice from Baird that it is no longer able to manage the Account according to the Goal Management Plan.

Given the nature of Goal Management, a client enrolling Accounts in a Goal Management Plan should understand that each Account enrolled in a Goal Management Plan may not be invested in a manner such that the individual Account alone would be able to achieve the Goal Management Objective. It is likely that one or more Accounts included in a Goal Management Plan, taken alone, will be managed or advised differently and will be subject to greater or enhanced risks than would be the case if the Account alone had the same objective as the Goal Management Objective. Such enhanced risks include, without limitation, market risks, investment objective and asset allocation risks, capitalization risks, investment style risks, illiquid securities and liquidity risks, concentration risks, frequent trading and portfolio turnover risks, Non-Traditional Assets and Complex Strategies risks, and Complex Investment Product risks.

A client should note, particularly if the client elects to include eligible Advisory Accounts in a Household Goal Management Plan, that: if an Account is removed from a Goal Management Plan for any reason, including if the client ceases to be a member of the same household, the Service and strategy for the Account removed from the Goal Management Plan will remain unchanged unless a change is requested by the client; further, the Account removed from the Goal Management Plan will not be allocated assets from other Accounts included in the Goal Management Plan unless the client and all other applicable clients, if any, consent and direct Baird to do so and then only to the extent permitted by applicable law; and FWG and Baird will have no liability for implementing a Goal Management Plan as requested by the client.

Investment Objectives

Generally, every Account will have one of the investment objectives described below.

All Growth. An All Growth investment objective typically seeks to provide growth of capital. Typically, an Account pursuing an All Growth investment objective will experience high fluctuations in annual returns and overall market value. Under normal market conditions, such an Account generally invests nearly all of its assets in equity securities. Such an Account may also hold other types of investments.

Capital Growth. A Capital Growth investment objective typically seeks to provide growth of capital. Typically, an Account pursuing a Capital Growth investment objective will experience moderately high fluctuations in annual returns and overall market value. Generally, under normal market conditions, such an Account will primarily invest in a mix of equity securities and fixed income securities, with a significantly higher allocation to equity securities. Such an Account may also hold other types of investments.

Growth with Income. A Growth with Income investment objective typically seeks to provide moderate growth of capital and some current income. Typically, an Account pursuing a Growth with Income investment objective will experience moderate fluctuations in annual returns and overall market value. Generally, under normal market conditions, such an Account will primarily invest in a mix of equity securities and fixed

income securities, with a bias towards equity securities. Such an Account may also hold other types of investments.

Income with Growth. An Income with Growth investment objective typically seeks to provide current income and some growth of capital. Typically, an Account pursuing an Income with Growth investment objective will experience moderate fluctuations in annual returns and overall market value. Generally, under normal market conditions, such an Account will primarily invest in a mix of fixed income securities and equity securities, with a bias towards fixed income securities. Such an Account may also hold other types of investments.

Conservative Income. A Conservative Income investment objective typically seeks to provide current income. Typically, an Account pursuing a Conservative Income investment objective will experience relatively small fluctuations in annual returns and overall market value. Generally, under normal market conditions, such an Account will primarily invest in a mix of fixed income securities, cash and equity securities, with a significantly higher allocation to fixed income securities. Such an Account may also hold other types of investments.

Capital Preservation. A Capital Preservation investment objective typically seeks to preserve capital while generating current income. Typically, an Account pursuing a Capital Preservation investment objective will experience relatively small fluctuations in annual returns and overall market value. Under normal market conditions, such an Account generally invests nearly all of its assets in a mix of fixed income securities and cash. Such an Account may also hold other types of investments.

Opportunistic. An Opportunistic investment objective typically seeks to provide long term growth through capital appreciation and/or income by utilizing an active management style that shifts the percentage of assets held in various categories to take advantage of market pricing anomalies, strong market sectors, the current interest rate environment and/or other macro-economic trends to achieve growth while accounting for a client's specific short, intermediate and long term investment and/or cash flow needs. Depending upon the investment

strategy used, an Account pursuing an Opportunistic investment objective could experience high fluctuations in annual returns and overall market value. The types of investments in which such an Account may invest will also vary widely, depending upon the particular investment strategy used.

Goal. A Goal investment objective indicates that the Account is a Goal Management Account that is part of a Goal Management Plan and the Account will be managed or advised in accordance with the applicable Goal Management Objective.

For information about the risks associated with the investment objectives described above, see the section of the Brochure entitled "Portfolio Manager Selection and Evaluation—Methods of Analysis, Investment Strategies and Risk of Loss—Principal Risks—Risks Associated with Certain Investment Objectives and Asset Allocation Strategies" below.

Custody Services

Certain Services may require clients to custody their account assets at Baird. If Baird is the custodian of a client's assets, Baird will provide certain custody services, including holding the client's Account assets, crediting contributions and interest and dividends received on securities held in a client's Account, and making or "debiting" distributions from the Account. Information about account statements and performance reports, if any, that FWG and Baird provide to clients is contained under the heading "Services, Fees and Compensation—Consulting Services" above and "Additional Information—Review of Accounts" below.

As custodian, Baird may hold a client's Account assets in nominee or "street" name, a practice that refers to securities and assets being registered in Baird's name or in a name that Baird designates, rather than in a client's name directly. Baird will be the holder of record in those instances.

Baird may utilize one or more subcustodians to provide for the custody of a client's assets in certain circumstances. For instance, Baird utilizes subcustodians to maintain custody of certain client securities that are traded on foreign exchanges.

Baird maintains a Cash Sweep Program that is intended for clients who want to earn interest and receive FDIC insurance protection on their cash over short periods of time while awaiting investment. If a client participates in Baird's Cash Sweep Program, uninvested cash in the client's Accounts will be automatically deposited or swept into one or more FDIC-insured deposit accounts at participating banks (the "Bank Sweep Feature") or, under certain conditions, will be automatically invested in shares of a money market mutual fund that Baird makes available in the program (the "Money Market Fund Feature"), subject to the terms and conditions of the program. Each deposit account at a bank constitutes a direct obligation of the bank and is not directly or indirectly an obligation of Baird.

Baird generally receives compensation in addition to the Advisory Fee when clients participate in the Cash Sweep Program, which presents a conflict of interest in that such compensation gives Baird an incentive to encourage clients to participate in the Cash Sweep Program and to maintain cash balances in the program. See "Additional Information—Code of Ethics, Participation or Interest in Client Transactions and Personal Trading—Participation or Interest in Client Transactions—Other Interests in Client Transactions—Cash Sweep Program" below for more information. Please see www.rwbaird.com/cashsweeps for more detailed information on the Cash Sweep Program, Baird's conflicts of interest, and cash equivalent alternatives to the Cash Sweep Program.

The Bank Sweep Feature seeks to provide FDIC insurance protection for client cash balances up to an aggregate deposit limit determined under the program. Any deposits, including CDs, that a client maintains, directly or indirectly through an intermediary (such as Baird or another broker), with a bank participating in the Cash Sweep Program in the same capacity with the bank will be aggregated with the client's cash balances deposited with the bank under the Cash Sweep Program for purposes of calculating the \$250,000 FDIC insurance limit. Total deposits exceeding \$250,000 at a bank may not be fully insured by the FDIC. *A client is responsible for monitoring the total amount of other deposits that the client has with a bank outside the Cash Sweep Program in order to determine the extent of deposit insurance coverage available. Baird is not responsible for any insured or uninsured portion*

of a client's deposits at a bank. Cash invested in a money market mutual fund under the Money Market Fund Feature is not FDIC insured, but is protected by Securities Investor Protection Corporation (SIPC) coverage up to applicable limits.

FWG and Baird in their sole discretion may accept certain clients whose assets are held by another custodian that is acceptable to FWG and Baird in their sole discretion (a "third party custodian"). A client who uses a third party custodian does so at the client's risk. A client should understand that FWG and Baird do not monitor, evaluate or review any third party custodian unless they otherwise agree to do so in writing. The client should also understand that the client will pay a custody fee to the third party custodian in addition to the Advisory Fee. Baird may also impose additional fees on Accounts with assets held by a third party custodian due to the increase in resources needed to administer those Accounts. Further, such third party custody arrangements may limit the Services made available to the client. In addition, a client should understand that: (a) each third party custodian has exclusive control over the investment options made available to client Accounts on the custodian's platform; (b) FWG and Baird have no authority or ability to add to, or remove from, a custodian's platform any investment option; (c) any advice given by FWG or Baird with respect to the Account is inherently limited by the options available through a custodian's platform; (d) FWG or Baird may have provided different investment advice with respect to the Account had they not been limited to the investment options made available through the custodian's platform; and (e) certain investments, such as mutual fund shares, could be more or less expensive than if the investment was obtained from Baird or another firm. A client should further note that FWG and Baird may not provide performance review or reporting for Accounts held by third party custodians. In addition, a client who uses a third party custodian is not eligible for cash sweep services offered by Baird. Clients using a third party custodian are encouraged to establish appropriate cash sweep arrangements.

A client who uses a third party custodian authorizes FWG and Baird to give instructions to the client's custodian for all actions necessary or incidental to the purchase, sale, exchange, and delivery of securities held in the client's Account. Also, the client will receive account statements

directly from the client's selected custodian. A client should carefully review those account statements and compare them with any statements provided by FWG or Baird. A client should note that the prices shown on a client's Account statements provided by the custodian could be different from the prices shown on statements and reports provided by FWG or Baird due to a variety of factors, including the use of different valuation sources and accounting methods (e.g., trade or settlement date accounting) by the custodian and Baird.

Mutual Fund Share Class Policy

Most mutual funds offer different share classes. While each share class of a given mutual fund has the same underlying investments, those share classes have different fees, costs and investment minimums, and they provide different levels of compensation to Baird. In an effort to provide clients with appropriate low cost mutual fund investment options for their fee-based investment advisory accounts, Baird has established a mutual fund share class policy ("Share Class Policy") for certain FWG-directed Services, including FWG Investment Management (the "Share Class Policy Services"). Typically, only one share class of a given mutual fund family will be made available for purchase by clients in the Share Class Policy Services pursuant to the Share Class Policy (the "Approved Share Class"). When selecting the Approved Share Class for a mutual fund family, Baird endeavors to select the share class with the lowest expense ratio, based upon the average expense ratio of the class across all mutual funds in the mutual fund family, that are widely available for trading on the mutual fund trading platform of Charles Schwab & Co., Inc. ("Schwab"). In selecting the share class for a mutual fund family to be made available for purchase by clients in the Share Class Policy Services, Baird considers a number of factors, including the number of funds within the fund family that offer the share class, client positions in and demand for those funds, and the availability of the share classes and funds for purchase on the Schwab mutual fund trading platform. Generally, share classes designed for retirement plans and those that pay a distribution (12b-1) fee to Baird will not be permitted in those Services, or, if such share classes are permitted and the client's Account is subject to an asset-based fee arrangement, Baird will either: (1) rebate the distribution (12b-1) fees to a client if

the client is paying an asset-based Advisory Fee on such investment; or (2) exclude such fund shares from the calculation of the client's asset-based Advisory Fee (sometimes referred to as "unbillable assets") for such period of time that Baird collects and retains the distribution (12b-1) fee as further described under the heading "Additional Information—Code of Ethics, Participation or Interest in Client Transactions and Personal Trading—Participation or Interest in Client Transactions—Investment Product Selling or Servicing—Mutual Funds" below. Clients should note that the Approved Share Class for a mutual fund family is based upon the average expense ratio for the class across all mutual funds in the fund family and not on a fund-by-fund basis. Further, the expenses of every mutual fund can and will vary over time. Therefore, while Baird has endeavored to select the lowest cost share classes as described above, in some instances, the Approved Share Class is not the least expensive share class for a particular mutual fund. Clients may be able to obtain a less expensive share class in other Programs or at another firm.

Baird receives certain compensation from mutual fund families in the form of distribution (12b-1) fees, shareholder servicing fees, transfer agency fees, networking fees, accounting fees, marketing support payments, revenue sharing and administration fees. The amount of compensation paid to Baird generally varies based upon the share class of the applicable mutual fund purchased by clients. Because the compensation that Baird receives from certain mutual funds is based upon share class purchased by clients, Baird has a financial incentive to make available to clients those share classes that provide Baird greater compensation, which, in many instances, would cause clients investing in those share classes to incur higher ongoing costs relative to other share classes made available by the fund families. This presents a conflict of interest. Baird addresses this conflict through the Share Class Policy described above and through disclosure in this Brochure. For more information about the compensation that Baird receives from mutual funds, see "Additional Information—Code of Ethics, Participation or Interest in Client Transactions and Personal Trading—Participation or Interest in Client Transactions—Investment Product Selling and Servicing—Mutual Funds" below.

Shares of mutual funds held in client Accounts that do not meet the requirements of the Share Class Policy will generally be converted to the applicable Approved Share Class subject to certain restrictions. The Share Class Policy is subject to change at Baird's discretion without notice to clients. Additional information about the Share Class Policy is available on Baird's website at www.rwbaird.com/disclosures. Baird has begun implementing the Share Class Policy, but, given the large number of fund families and share classes offered, Baird anticipates that it will take some time before the Policy is fully implemented.

Client Responsibilities

A client is responsible for providing information to FWG and any investment managers managing client's Accounts reasonably requested by them in order to provide the services selected by the client. FWG and investment managers will rely on this information when providing services to the client. A client is also responsible for promptly informing FWG and any investment managers managing client's Accounts of any significant life changes (e.g., change in marital status, significant health issue, or change in employment) or if there is any change to the client's investment objectives, risk tolerance, financial circumstances, investment needs, or other circumstances that may affect the manner in which the client's assets are invested. None of Baird, FWG, or any investment manager managing a client's Account is responsible for any adverse consequence arising out of the client's failure to promptly inform FWG and any such investment manager of any such changes. Since investment goals and financial circumstances change over time, a client should review the client's participation in a Service with the client's FWG Consultant at least annually.

Legal and Tax Considerations

FWG and Baird do not provide legal or tax advice to clients in connection with the Services.

Additional laws, regulations and other conditions apply to retirement accounts, which include employee pension benefit plan accounts that are subject to the Employee Retirement Income Security Act of 1974, as amended ("ERISA") and individual retirement accounts ("IRAs") that are subject to the Internal Revenue Code of 1986, as amended ("IRC") (collectively, "Retirement Accounts"). Each owner, trustee, named fiduciary,

responsible plan fiduciary, or other fiduciary acting on behalf of a Retirement Account ("Retirement Account Fiduciary") should understand that FWG and Baird do not provide legal advice regarding Retirement Accounts. A Retirement Account Fiduciary is urged to consult with his or her own legal advisor about the laws and regulations that may apply to Retirement Accounts.

The investment strategies used for a client's Account and transactions in a client's Account, including liquidations, redemptions, and rebalancing transactions, may cause the client to realize gains or losses for income tax purposes. In addition, a client's Account may be invested in investment products classified as partnerships for U.S. federal income tax purposes, which may result in unique tax treatment, including Schedule K-1 reporting. In addition, when held in a client's Retirement Account under certain circumstances, such investments may produce unrelated business taxable income which may result in a current-year income tax obligation to the client. FWG does not provide any tax advice in connection with any of the Services. A client should discuss the potential tax implications of the client's investment strategies, investment products, and transactions with the client's tax advisor. If a client wishes for FWG to implement a particular investment strategy for tax purposes, and FWG agrees to implement such strategy, neither FWG nor Baird will be responsible for the development, evaluation or efficacy of any such strategy.

Advisory Fee

Fee Options and Fee Schedule

A client's advisory agreement will set forth the actual compensation the client will pay to Baird. In most instances, a client pays an ongoing Advisory Fee based upon the value of assets in the client's Account (an "asset-based fee"), although other options, such as a flat fee, are available.

Asset-Based Fee Arrangement

FWG generally offers one asset-based fee arrangement: a tiered fee schedule.

Under a tiered fee schedule, the asset-based fee will vary for different segments of client assets, gradually decreasing as the Account balance increases. For example, a client with an Account

value of \$75 million may pay one rate on the first \$25 million of assets in the Account, a lower rate on the next \$25 million of assets in the Account and a still lower rate on the remaining \$25 million of assets. Use of a tiered fee schedule will result in a blended asset-based fee rate.

The typical asset-based fee varies depending upon the Service and the fee option selected by the client. Fee options and rates may also differ among different Accounts held by the same client, depending on the services selected for an Account.

All new client Accounts paying an asset-based fee are generally subject to a unified advice fee arrangement ("Unified Advice Fee Arrangement"), which is described below. Some existing client accounts are subject to a legacy wrap fee arrangement ("Legacy Wrap Fee Arrangement") described further below.

Unified Advice Fee Arrangement

Under a Unified Advice Fee Arrangement, the asset-based Advisory Fee is comprised of an advice fee ("Advice Fee") and, for some Services, an additional portfolio fee ("Portfolio Fee"). The Advice Fee covers certain investment advisory, brokerage and custody services provided by FWG and Baird. The Portfolio Fee covers portfolio management and other services provided by Baird and the manager to the client's Account, which may include departments or affiliates of Baird. If a client has a Unified Advice Fee Arrangement, the client's Advisory Fee rate will be equal to the sum of the applicable Advice Fee rate and the applicable Portfolio Fee rate, if any.

Clients with a Unified Advice Fee Arrangement generally choose a tiered fee schedule for the Advice Fee portion of the Advisory Fee.

Tiered Advice Fee Schedule

The following fee schedule sets forth the maximum tiered Advice Fee rates for the Services.

| Tiered Advice Fee Schedule | |
|--|------------------------|
| <u>Value of Assets</u> | <u>Annual Fee Rate</u> |
| On first \$25 million (\$0 - \$25 million) | 0.80% |

Tiered Advice Fee Schedule

| <u>Value of Assets</u> | <u>Annual Fee Rate</u> |
|---|------------------------|
| On next \$25 million (\$25 - \$50 million) | 0.60% |
| On next \$50 million (\$50 - \$100 million) | 0.40% |
| Over \$100 million | 0.20% |

Portfolio Fee Schedule

The Portfolio Fee rate varies by Service, investment vehicle, and the type of investment strategy or style being pursued by the Account. The following fee schedule sets forth the maximum Portfolio Fee rates or range of rates for the Services.

Portfolio Fee Schedule

| <u>Service</u> | <u>Annual Fee Rate or Range of Rates</u> |
|---|--|
| FWG Investment Management | 0.00% |
| FWG Recommended Managers | |
| Equity SMA Strategies | 0.28% - 0.55% |
| Balanced SMA Strategies | 0.28% - 0.60% |
| Fixed Income SMA Strategies | 0.18% - 0.35% |
| Global and International SMA Strategies | 0.28% - 0.60% |
| Alternative SMA Strategies | 0.35% - 0.60% |
| Baird SMA Network (BSN) | |
| Equity SMA Strategies | 0.35% - 0.60% |
| Balanced SMA Strategies | 0.35% - 0.60% |
| Fixed Income SMA Strategies | 0.25% - 1.25% |
| Global and International SMA Strategies | 0.35% - 0.60% |
| Alternative SMA Strategies | 0.35% - 0.60% |
| Fund Strategist Portfolios | 0.02% - 0.50% |
| HLT Strategies | 0.35% - 0.45% |
| Dual Contract (DC) | |
| Equity SMA Strategies | 0.20% - 1.80% |
| Balanced SMA Strategies | 0.10% - 1.70% |
| Fixed Income SMA Strategies | 0.12% - 1.25% |
| Global and International SMA Strategies | 0.20% - 1.70% |
| Alternative SMA Strategies | 0.20% - 0.96% |

Portfolio Fee Schedule

| <u>Service</u> | <u>Annual Fee Rate or Range of Rates</u> |
|----------------------------|--|
| Fund Strategist Portfolios | 0.02% - 0.50% |

The Portfolio Fee rates are current as of the date of this Brochure. A client's actual Portfolio Fees could be higher or lower than the amounts shown above if Baird adds new investment managers to the Services with higher or lower fees or if Baird and a manager renegotiate the amount of the subadvisory fee.

Legacy Wrap Fee Arrangements

Unlike a Unified Advice Fee Arrangement, under a Legacy Wrap Fee arrangement, the client pays one Advisory Fee for investment advisory, brokerage and custody services provided by Baird and for portfolio management and other services provided by Baird and the manager to the client's Account, if any. For more specific information about the fee that applies to an existing Account, a client should refer to the paperwork the client received when opening the Account or the client may contact the client's FWG Consultant.

Flat or Hourly Fee Arrangement

Under a flat fee or hourly fee arrangement, the applicable fee may be determined according to a fixed asset-based or hourly fee rate or may be a fixed dollar amount. Specific services may each have their own, separately stated flat fee, or several services may be grouped together under a single flat fee. Some services may entail a flat fee per usage. Flat fees are negotiable and vary by client. The details of flat fee arrangements, including fee amounts, the billing schedule, and the services covered, will be included in the client's advisory agreement.

Service Account Minimums

The minimum asset value to open an Account in a Service is set forth in the table below.

| <u>Service</u> | <u>Asset Level</u> |
|---------------------------|--------------------------|
| Consulting Services | Negotiable |
| Baird SMA Network | \$100,000 ⁽¹⁾ |
| Dual Contract | \$100,000 ⁽¹⁾ |
| FWG Investment Management | \$50,000 |

Account Minimum

| <u>Service</u> | <u>Asset Level</u> |
|--------------------------|--------------------------|
| FWG Recommended Managers | \$100,000 ⁽¹⁾ |

(1) Investment managers typically have an account minimum of \$100,000. However, each investment manager sets its own minimum account size requirements, which can range from \$25,000 to more than \$1,000,000. As a result, some investment managers may not be available to clients with smaller accounts.

A client's Account may also be subject to a minimum quarterly Advisory Fee that will be set forth in the client's advisory agreement regardless of the value of the assets in the client's Account. In addition, if a third party custodian has custody of the client's Account assets, Baird may impose Account requirements different than those set forth above, including but not limited to higher minimums, and it may impose additional fees due to the increase in resources needed to administer the Account.

A client is encouraged to periodically review with the client's FWG Consultant the client's Advisory Fee and the services provided to determine if the services and fees continue to meet the client's needs.

Calculation and Payment of Fees

Baird will calculate a client's Advisory Fee by applying the applicable fee rate to the value of all of the assets in the client's Accounts, including cash and its equivalent and including all assets held by any third party custodian.

If requested by a client and approved by Baird, a client's Advisory Fee may be determined by also including the aggregate value of assets in certain other Advisory accounts held by a client and certain members of the client's household or family (a "household fee arrangement"). A client should note that Retirement Accounts may not be included in a household fee arrangement to the extent a prohibited transaction under ERISA or the IRC may result. The terms of any such household fee arrangement will be set forth in the client's advisory agreement.

A client should note that it is client's sole responsibility to inform the client's FWG Consultant that client's household or family has two or more Advisory accounts that are eligible

for a household fee arrangement. FWG and Baird do not perform an independent analysis or determination as to whether any client Accounts are eligible for a household fee arrangement. By agreeing to a household fee arrangement, each client subject to such household fee arrangement consents to FWG and Baird providing to each other client subject to such household fee arrangement, in FWG's or Baird's sole discretion, information about the aggregate level, or range, of household assets used for fee calculation purposes. As a result, each such client should understand that the other clients included in the household fee arrangement may be able to ascertain the amount of the client's assets at Baird.

For purposes of calculating a client's asset-based Advisory Fee, the value of a client's assets is generally determined by Baird. Baird generally relies upon third party sources, such as third party pricing services when valuing Account assets. In some instances, such as when Baird is unable to obtain a price for an asset from a pricing service, Baird may obtain a price from its trading desk or it may elect to not price the asset. Obtaining a price from its trading desk may present a conflict of interest. In some cases, Baird obtains prices from the issuers or sponsors of investment products in the client's Account when prices are not otherwise readily available. This frequently occurs with respect to the valuation of Complex Investment Products. If the assets in the client's Account are held by a custodian other than Baird, Baird may also use valuation information provided by the client's third party custodian in determining the value of the assets in the client's Account.

Neither FWG nor Baird conducts a review of valuation information provided by third party pricing services, issuers, sponsors, or custodians, and they do not verify or guarantee the accuracy of such information. FWG and Baird do not accept responsibility for valuations provided by third parties that are inaccurate unless they have a reason to believe that the source of such valuations is unreliable. Valuation data for investments, particularly Complex Investment Products, may not be provided to Baird in a timely manner, resulting in valuations that are not current. The prices obtained by Baird from third party pricing services, issuers, sponsors and custodians may differ from prices that could be obtained from other sources. Values used for fee-

calculation purposes may vary from prices received in actual transactions and are not firm bids, offers or guarantees of any type with respect to the value of assets in an Account, and the Advisory Fee for some securities may be calculated based on values that are greater than the amount a client would receive if the securities were actually sold from the client's Account.

As mentioned above, Baird will include cash and cash equivalent balances in a client's Account when calculating a client's asset-based Advisory Fee. Baird has adopted internal policies that monitor the percentage of cash or cash equivalents in an Account for sustained periods of time. These internal policies are designed to inform FWG Consultants and their clients who hold large cash balances in their Accounts for sustained periods that those Accounts are holding large cash balances and that there may be other investment or account options for their cash.

If a client maintains a balance in the client's margin account with Baird, such balance has no bearing on the asset-based Advisory Fees charged on client's Account. In other words, the margin balance (i.e., the outstanding amounts of the margin loan a client owes to Baird) in client's Account will not be applied to reduce the client's billable Account value in calculating the Advisory Fee. For purposes of determining the asset-based Advisory Fees imposed on an open short sale position, a client will be charged on the market value of the underlying securities sold short rather than on the difference between the price at which the underlying securities were sold and the current value of those securities. For purposes of determining the asset-based Advisory Fees on options, the absolute value of the current market price of the option will be used.

The Account value used for the Advisory Fee calculation may differ from that shown on a client's Account statement or performance report due to a variety of factors, including the client's use of margin, options, short sales, and other considerations. If a client has assets held by a third party custodian, the prices shown on a client's Account statements provided by the custodian could be different from the prices shown on statements and reports provided by Baird. See "Services, Fees and Compensation—Additional Service Information—Custody Services" above for more information.

A client's Advisory Fees are payable in accordance with the terms of the client's advisory agreement. Typically, Advisory Fees are payable on a calendar quarterly basis, in advance. The initial billing period begins when the client's advisory agreement is accepted by Baird and the Account is opened by Baird (the "Opening Date"). The initial Advisory Fee payment will be adjusted for the number of days remaining in the then current quarter. The initial Advisory Fee will be based on the value of assets in the client's Account on the Opening Date. The period which such payment covers shall run from the Opening Date through the last business day of the then current calendar quarterly billing period. Thereafter, the quarterly Advisory Fees shall be calculated based upon the Account's asset value on the last business day of the prior calendar quarter and shall become payable on the first business day of the then current calendar quarter.

A client's Advisory Fees and other charges will be automatically deducted from the client's Account, unless the client requests, and FWG and Baird agree, to an alternate arrangement, such as having Baird issue the client an invoice for the Advisory Fees ("direct billing"). A client should understand that the client's Advisory Fees and other charges relating to the client's Account may be satisfied from free credit balances and other assets in the client's Account. If free credit balances in a client's Account are insufficient to pay the Advisory Fees or other charges when due, FWG, Baird and any investment manager managing the client's Account may sell investments from the client's Account to the extent they deem necessary and appropriate, in their sole discretion, to pay the client's Advisory Fees and other charges.

If a client's Account is subject to direct billing, the client is required to pay each bill within 30 days of the date of the invoice. FWG and Baird may automatically deduct a client's Advisory Fees and other charges from the client's Account as described above in the event that Baird does not receive payment from the client within 30 days of the date of the invoice. FWG or Baird may rescind a direct billing arrangement with a client at any time. Direct billing may not be available for Retirement Accounts.

To the extent permitted by applicable law, FWG or Baird may modify a client's existing fees and other charges or add additional fees or charges by

providing the client with 30 days' prior written notice.

If FWG, Baird or the client terminates the client's advisory agreement or the client's participation in a Service, a pro-rated refund from the date of termination through the end of the applicable billing period will generally be made to the client in the client's affected Accounts. FWG and Baird will not implement a decrease in the client's fee rate during a billing period or otherwise reimburse or adjust Advisory Fees during any such period for asset value appreciation or depreciation in a client's Account during such period. For example, if a client's Account is subject to a tiered or breakpoint fee schedule and the asset levels of the Account move into a new tier or cross a breakpoint during such period, no rebate or fee adjustment will be made. However, FWG and Baird, in their sole discretion, may make fee adjustments in response to asset fluctuations in a client's Account occurring during a billing period that result from contributions to, or withdrawals from, the client's Account.

The minimum asset value in order to retain the services of FWG is \$25 million, and a minimum annual Advisory Fee of \$150,000 may be assessed to a client regardless of the level of assets advised by FWG. FWG may waive the minimum asset value or minimum Advisory Fee at its discretion. The minimum Advisory Fee is subject to change upon notice to the client.

The Advisory Fee and minimum account value are negotiable in certain instances and may vary based upon a number of factors, including but not limited to the size and nature of the assets in the client's Account, the client's particular investment style or objective, and any particular services requested by the client. In some instances, clients may pay a higher fee than indicated in the fee schedule above. The fees paid by a client may differ from the fees paid by other clients based on a number of factors, including but not limited to the factors identified above.

The fee schedule set forth above is the current fee schedule for the Services. Each Service has had other fee schedules in effect, which may reflect fees that are lower or higher, as the case may be, than those shown above. As new fee schedules are put into effect, they are made applicable only to new clients, and fee schedules

applicable to existing clients may not be affected. Therefore, some clients may pay different fees than those shown above.

Obtaining Services Separately

FWG generally does not offer the Services to clients on an unbundled basis. In other words, the Services do not permit clients to pay for services, such as investment advice, trade execution, and custody separately. However, Baird offers brokerage accounts and other services to clients, and certain services provided to a client in connection with a particular Service may be available to a client outside of the Service separately. Thus, a client's participation in a Service could cost the client more or less than if the client purchased each service separately. A number of factors bear upon the relative cost of each Service. In comparing the Services to brokerage accounts or other services, a client should consider a number of factors, including, but not limited to:

- whether a client prefers to have ongoing monitoring, investment advice or professional management of the client's investments, which are provided to Service Accounts, or whether the client does not want or need such services;
- whether the types of investment strategies, products and solutions the client seeks are available;
- whether there are limitations on the types of securities and other investments available for purchase and whether those limitations are significant to the client;
- whether the nature and level of transaction services, account performance reporting, or other ancillary services the client wants are available;
- whether the client prefers to pay an ongoing Advisory Fee for continuous advice or pay commissions on a transaction-by-transaction basis;
- the relative costs and expenses of a brokerage account and a Service Account, which will vary depending upon:
 - the fee or commission rate the client negotiates;

- the size of the client's account;
- the level of trading activity and size of trade orders;
- applicable account fees and charges;
- the client's use of third party managers who charge their own fees for managing accounts in addition to FWG's Advice Fee; and
- the amount of the client's account invested in investment products that have additional internal ongoing operating fees and expenses (e.g., Investment Funds).

A client should review other account types and programs with the client's FWG Consultant to determine whether they are more appropriate or should be used in addition to a Service.

Advisory Fee Payments to Baird, FWG Consultants and Investment Managers

FWG and Baird and Baird's affiliates and associates benefit from the Advisory Fees and charges clients pay for the services described in this Brochure.

Baird retains the entire Advisory Fee paid by clients, except as further described below. With respect to the FWG Recommended Managers Service, Baird SMA Network Program and Dual Contract Program, Baird pays the manager (including Implementation Managers, if any) a subadvisory fee as compensation for the manager's services as further described below.

For client Accounts subject to a Legacy Wrap Fee Arrangement, Baird pays the manager out of the Advisory Fee paid by the client. The amount of the Advisory Fee paid to a particular manager varies based upon, among other factors, the Service selected by a client, the investment strategy and other services sought by a client, the subadvisory fee Baird negotiated with the manager, the manager's investment style or strategy, the level of services provided by the manager, and the size of a client's Account. The range of subadvisory fees paid to investment managers (which includes amounts paid to an Implementation Manager, if any) out of the Advisory Fee is set forth in the table below.

Legacy Wrap Fee Arrangements
Portion of Advisory Fee Paid to Investment Managers

| <u>Investment Style or Strategy</u> | <u>Range of Annual Subadvisory Fee Rates</u> |
|-------------------------------------|--|
| Equity Strategies | 0.20% - 1.80% |
| Balanced Strategies | 0.10% - 1.70% |
| Fixed Income Strategies | 0.12% - 1.25% |
| Global and International Strategies | 0.20% - 1.70% |
| Alternative Strategies | 0.20% - 0.96% |

The portion of Advisory Fees paid to investment managers could be higher or lower than the amounts shown above if Baird adds new investment managers to the Services with higher or lower fees or if Baird and a manager renegotiate the amount of the subadvisory fee.

For client Accounts subject to a Unified Advice Fee Arrangement, Baird pays the manager out of the Portfolio Fee paid by the client. The Portfolio Fee rates are set forth under "Fee Options and Fee Schedules—Unified Advice Fee Arrangement—Portfolio Fee" above. The amount of the Portfolio Fee paid to a particular manager varies based upon the same factors described above for Legacy Wrap Fee Arrangements. However, Baird, in many instances, retains a portion of the Portfolio Fee when a client's Account is managed by an affiliated or unaffiliated investment manager. The maximum portion of the Portfolio Fee retained by Baird in those instances is equal to an annual rate of 0.10% of the value of a client's Account. Such amounts are retained by Baird for the services it provides.

As the portion of the Advisory Fee or Portfolio Fee paid to an investment manager increases, the portion of the Advisory Fee or Portfolio Fee that is retained by Baird decreases. Thus, Baird (but not FWG) has an incentive to recommend or favor investment managers that are paid less, because Baird will receive a higher portion of the Advisory Fee or Portfolio Fee.

In addition, Baird has an incentive to favor related managers over other investment managers because the entire Advisory Fee is retained by Baird and affiliated investment managers. For more information about related managers, see "Additional Information—Other Financial Industry

Activities and Affiliations" below. Given the nature of the Advisory Fee, Baird also has an incentive to recommend or select investment managers that trade less frequently with or that trade away from Baird because Baird will incur lower trading costs with respect to such managers and such relationships will be more profitable to Baird.

An FWG Consultant is primarily compensated on a monthly basis based upon a percentage of the FWG Consultant's total production each month, which primarily consists of the total advisory fees and transaction-based fees paid to Baird by the FWG Consultant's customers and clients and any other fees Baird earns on advisory and brokerage accounts held by those customers and clients, including trail fees paid by third parties. The percentage of the FWG Consultant's total production paid to the FWG Consultant is tiered and will increase as the total amount of the FWG Consultant's production increases, meaning that, as the total amount of the FWG Consultant's production increases, the rate of compensation that Baird pays to the FWG Consultant also increases. This means that FWG Consultants have an incentive to generate revenues to increase their total production and move up to the next percentage tier. FWG Consultants generally also receive deferred compensation or bonuses based on various criteria, including net new assets they gather, performing certain wealth management activities, such as financial planning, and their total production levels. FWG Consultants who achieve certain production thresholds are eligible for professional development conferences, business development coaching, reimbursements, awards and recognition trips to attractive destinations. FWG Consultants are also eligible for bonuses for achievement of professional designations depending on an FWG Consultant's total production level. Thus, FWG Consultants have an incentive to generate financial and other plans and charge higher fees for advisory accounts.

Given the structure of their compensation, they also have an incentive to recommend that a client transfer the client's accounts to Baird, establish new accounts with Baird (including IRA rollovers) and add more money into the client's accounts. In addition, most FWG Consultants are shareholders of Baird Financial Group, Inc. ("BFG"), Baird's parent company, and thus benefit financially from Baird's overall success. The number of shares of BFG stock that an FWG Consultant may purchase

is based in part on the FWG Consultant's total production level. FWG Consultants generally receive compensation for referrals to certain affiliated managers and products and for referrals to a limited number of other firms. They also generally receive non-cash compensation and other benefits from Baird and from sponsors of investment products with which Baird does business. Such non-cash compensation and other benefits may include invitations to attend conferences or educational seminars, payment of related travel, lodging and meal expenses, reimbursement for branch and client events, and receipt of gifts and entertainment. Receipt of such compensation and benefits provides FWG Consultants an incentive to favor investment products and their sponsors that provide the greatest levels of compensation and benefits. FWG Consultants generally receive recruitment bonuses and/or special compensation from Baird when they join Baird from another firm that are generally based on amounts of asset gathered or transferred to Baird. The compensation is intended to compensate FWG Consultants for the significant effort involved in transitioning their business and customers and clients from the prior firm. This compensation provides FWG Consultants who have left another firm additional incentive to recommend that customers and clients of the prior firm become customers and clients of Baird. Additional information about referral and non-cash compensation and other financial incentives provided to FWG Consultants is provided under the heading "Additional Information—Code of Ethics, Participation or Interest in Client Transactions and Personal Trading—Participation or Interest in Client Transactions" below.

The compensation paid to FWG Consultants related to Accounts subject to a Legacy Wrap Fee Arrangement is inversely related to the amount of the Advisory Fee, if any, paid to other investment managers managing such Accounts. This creates an incentive for them to recommend or favor investment managers that are paid less, because they will receive higher compensation. From time to time, Baird FWG Consultants outside of FWG may refer their clients to FWG Consultants. In those instances, the FWG Consultant generally shares a portion of his or her compensation with the referring Baird Financial Advisor.

Baird addresses these conflicts through disclosure in this Brochure and by adopting internal policies

and procedures for FWG and Baird and their associates that require them to provide investment advice that is suitable for advisory clients (based upon the information provided by such clients).

Other Fees and Expenses

In addition to the Advisory Fee described above, a client of FWG will incur other fees and expenses. A client is responsible for bearing or paying, in addition to the Advisory Fee, the costs of all:

- markups, markdowns, and spreads charged by Baird in a principal transaction with a client or charged by other broker-dealers that buy securities from, or sell securities to, the client's Account (such costs are inherently reflected in the price the client pays or receives for such securities);
- front-end or deferred sales charges, redemption fees, or other commissions or charges associated with securities transferred into or from an Account;
- underwriting discounts, dealer concessions or similar fees related to the public offering of investment products;
- extra or special fees or expenses that may result from the execution of odd lot trade orders (i.e., "odd-lot differential");
- electronic fund fees, wire transfer fees, fees for transferring an investment between firms, and similar fees or expenses related to account transfers (including any such fees imposed by Baird);
- currency conversions and transactions;
- securities conversions, including, without limitation, the conversion of ADRs to or from foreign ordinary shares;
- interest, fees and other costs related to margin accounts, short sales and options trades;
- fees related to the establishment, administration or termination of Retirement Accounts, retirement or profit sharing plans, trusts or any other legal entity, including, without limitation, the calculation and payment of unrelated business income tax ("UBIT");
- fees imposed by the SEC or securities markets, including transaction fees imposed by electronic trading platforms, which fees may be imbedded

in the price the client receives for the security;
and

- taxes imposed upon or resulting from transactions effected for a client's Account, such as income, transfer or transaction taxes, or any other costs or fees mandated by law or regulation.

If the client's Account is custodied at Baird, the client is also responsible for all applicable account fees and service charges Baird may impose in connection with the client's agreements with Baird. A schedule of fees and service charges is available on Baird's website at www.rwbaird.com/disclosures.

Certain investment products, such as mutual funds and other Investment Funds, and annuities, have their own internal fees and expenses that are borne either directly or indirectly by their holders, including a client. These fees and expenses may include investment management fees, distribution (12b-1) fees, shareholder servicing fees, transfer agency fees, networking fees, accounting fees, marketing support payments, administration fees, custody fees, expense reimbursements, and expenses associated with executing securities transactions for the investment product's portfolio ("ongoing operating expenses"). These ongoing operating expenses are separate from, and in addition to, the Advisory Fees. As a result of making investments in these types of products, a client should be aware that the client is paying multiple layers of fees and expenses on the amount of the client's assets so invested—the ongoing operating expenses and the Advisory Fee. A client is also responsible for any redemption fees, surrender charges or similar fees that the investment product, annuity, or its sponsor may impose on the client. A client should review the prospectus or other applicable offering documents for each investment product or annuity in which the client invests for further information.

In addition to the Advisory Fee, a client will also be responsible for paying the fees charged by each investment manager selected by the client under the Dual Contract Program. If a client directs PAM or Baird to pay the client's DC Manager's fee out of the client's Account, and PAM or Baird agree to do so, PAM and Baird will not be responsible for verifying the calculation or accuracy of such fee.

Clients who use a custodian other than, or in addition to, Baird will pay the other custodian's fees and expenses in addition to the Advisory Fee. In addition, if a third party custodian has custody of the client's Account assets, the Account is subject to any applicable set-up, maintenance and administrative fees established by Baird. Baird may waive such fees in its discretion.

A client may also be assessed other trading costs in addition to the Advisory Fee if client trades are executed through another firm. Please see "Services, Fee and Compensation—Additional Service Information—Trading for Client Accounts" above for more information.

If a client holds an unsupervised asset in the client's Account, the client may be charged a commission, markup or markdown in connection with its purchase or sale. The cash proceeds from the sale of an unsupervised asset that remain in a client's Account are considered non-Permitted Investments subject to the asset-based Advisory Fee. If an asset becomes an unsupervised asset during a quarterly billing period, that asset will be excluded for purposes of determining the asset-based Advisory Fee beginning at the start of the next quarterly billing period, and no portion of the asset-based Advisory Fee paid by a client in advance for the quarter will be refunded or rebated to the client. Additionally, unsupervised assets in an Account are subject to any applicable set-up, maintenance and administrative fees established by Baird. Baird may waive such fees in its discretion.

Clients who have Accounts managed by FWG may also have other accounts with Baird that are not managed by FWG. Those accounts may be subject to fees, commissions or other expenses that are entirely separate from the payment of fees and expenses for the services provided by FWG.

Compensation Received by FWG and Baird

The individual who recommends a Service to a client, including an FWG Consultant, receives compensation from Baird that is based upon the amount of the Advisory Fee paid by the client. The amount of the compensation may be more than what the individual would receive if the client participated in other Baird investment advisory services or paid separately for investment advice, brokerage, and other services. Accordingly, the individual may have a financial incentive to

recommend a Service over other programs or services offered by Baird. However, when providing investment advisory services to clients, FWG and Baird are fiduciaries and are required to act solely in the best interest of clients. Baird addresses this conflict through disclosure in this Brochure and by adopting internal policies and procedures for FWG and Baird and their associates that require them to provide investment advice that is suitable for advisory clients (based upon the information provided by such clients). For more specific information about Baird's compensation and other benefit arrangements and how Baird addresses the potential conflicts of interest, please see the sections "Services, Fees and Compensation—Additional Service Information" and "Services, Fees and Compensation—Advisory Fee—Advisory Fee Payments to Baird, FWG Consultants and Investment Managers" above, and "Additional Information—Other Financial Industry Activities and Affiliations" and "Additional Information—Code of Ethics, Participation or Interest in Client Transactions and Personal Trading" below.

Account Requirements and Types of Clients

Opening an Account

A client that wishes to engage FWG will enter into an advisory agreement with FWG and Baird. The client's advisory agreement will contain the specific terms applicable to the services selected by the client, Advisory Fees payable by the client, and other terms applicable to the client's advisory relationship with FWG and Baird.

In addition to the investment advisory services that FWG and Baird provide in connection with each Service, Baird, in its capacity as broker-dealer, also provides clients with trade execution, custody and other standard brokerage services. For this reason, a client will also enter into a client account agreement with Baird if the client has not already done so. The client account agreement is a brokerage agreement that authorizes Baird to execute trades for, and perform related brokerage and custody services to, the client's Account.

After a client has signed and delivered an advisory agreement to Baird, the agreement is subject to review and acceptance by the client's FWG Consultant, his or her Regional Director or PWM Supervision department supervisor (or his or her respective designee), and Baird PWM's Home

Office. The agreement and Baird's advisory relationship with a client will become effective when the client's paperwork is accepted by Baird PWM's Home Office and following such acceptance Baird has delivered to the client written confirmation of the Account's enrollment in the applicable Service. A client should understand that the advisory agreement will not become effective, and Baird will not provide any advisory services to the client, until such time that Baird has accepted the advisory agreement. Baird may delay acceptance of the advisory agreement and the provision of advisory services to the client for various reasons, including deficiencies in the client's paperwork. Once it has become effective, the agreement shall continue until it is terminated in accordance with the terms described in the advisory agreement.

The terms of a client's agreements and this Brochure apply to all Accounts that a client establishes with FWG, including any Accounts that a client may open with Baird in the future. Some of the information in those documents may not apply to a client now, but may apply in the future if a client changes services or establishes other Accounts with FWG. FWG will generally not provide a client another copy of the agreements or this Brochure when a client changes services or establishes new Accounts unless the client requests a copy from FWG. Therefore, a client should retain those documents for future reference as they contain important information if a client changes services or establishes other Accounts with FWG.

Certain Account Requirements

Minimum Account Size

Each Service has a minimum account size and may have a minimum Advisory Fee, which are described in the section entitled "Services, Fees and Compensation—Advisory Fee" above. FWG or Baird may remove an Account from a Service and immediately terminate the advisory agreement with respect to an Account upon written notice to the client if the client fails to maintain the required minimum asset levels in an Account or if the client fails to otherwise abide by the terms of a Service as determined by FWG or Baird in their sole discretion.

Account Contributions and Withdrawals

A client may fund an Account with cash and with securities that FWG, Baird and the client's

investment manager, if any, deem to be acceptable in their sole discretion. Funds deposited or transferred to a client's SMAs from another Baird account and funds deposited or transferred to a client's SMAs from outside of Baird will not be available for investment by the client's investment manager until the next business day and therefore the investment of such funds, at the discretion of the manager, will occur no earlier than the next business day.

Some FWG Consultants will invest, or recommend investing, cash contributions made to an Account over a period of time. This method of investment is sometimes referred to as dollar cost averaging. The goal of this method of investment is to reduce the risk of making large purchases of securities at an inopportune time or price. A client should note that, if dollar cost averaging is used to invest cash in the client's Account, the returns for the Account could, depending upon market and other conditions, be lower than the returns that could have been obtained had all the cash in the Account been fully invested upon contribution to the Account. In addition, a client should note that, when dollar cost averaging is used, the amount of cash in the client's Account will be included in the value of the Account for fee calculation purposes.

When a client funds an Account with securities, including when a client changes Services for an Account or changes investment managers for an Account within the same Service, the client should understand that FWG's, Baird's or the client's investment manager's review of securities used to fund the Account may delay investing. In addition, FWG, Baird or the client's investment manager, if any, may determine that the securities contributed to the Account may not be appropriate for the client's strategy, and FWG, Baird or the investment manager, if any, may sell, or recommend the sale of, such securities. Further, an investment manager may be removed from the management of a client's Account and a replacement investment manager may be appointed. In such event, Baird, at the direction of the client's replacement manager, or the client's replacement manager may sell all or a portion of the securities or other investments in the Account that were managed by the prior manager and the replacement manager will reinvest the cash proceeds of those sales. Any such sale could result in adverse tax consequences for the client. A client should note that securities transferred into an Account may be

subject to the Advisory Fee immediately upon its transfer into the Account, even if the client paid a commission or front-end sales charge on the security prior to its transfer into the Account. In addition, if the securities are subject to deferred sales charges or redemption fees, the client will be responsible for paying those charges and fees. To the extent permitted by applicable law, certain funding transactions may be handled by Baird on a principal basis, and such transactions are not considered investment advisory services of FWG, Baird or the client's investment manager.

If an asset transferred to an Account is a non-Permitted Investment under the terms of the applicable Service, FWG, Baird or the client's investment manager may sell the asset or transfer it into a separate brokerage account. Alternatively, they may designate such asset as an unsupervised asset as further described under "Services, Fees and Compensation—Additional Service Information—Unsupervised Assets" above.

A client is responsible for notifying FWG and any investment manager managing the client's Account of any contributions made into the Account and instructing FWG and any investment manager to liquidate positions in the event the client wishes to withdraw assets from the Account. FWG and Baird have no responsibility to invest cash deposits (other than complying with a client's cash sweep instructions) or liquidate positions with respect to an Account managed by an Other Manager, and they are not responsible for any losses that may result from a client's failure to notify FWG and any investment manager managing the client's Account regarding deposits or withdrawals.

A client may also incur additional expenses and liabilities, including tax related liabilities, when transferring assets out of an Account or Baird's custody. See "Termination of Accounts" below.

Liens and Use of Account Assets as Collateral

As security for the full and complete payment when due of any debts and other obligations that a client owes to FWG and Baird, and to the extent permitted by applicable law or regulation, all assets in a client's Account held at Baird will be subject to a first priority security interest, lien and right of setoff in favor of Baird. Baird may sell assets in an Account to satisfy the lien. As a

secured party, Baird may have interests that are adverse to a client. Neither FWG nor Baird will act as investment adviser to a client with respect to such sale of assets held in an Account. Any such sale of assets will be executed in Baird's capacity as broker-dealer and creditor and may, as permitted by law, result in executions on a principal basis. A client should review the client's agreements for more information.

All of the assets in a client's Account must be free and clear from any security interest, lien, charge or other encumbrance (other than a security interest, lien, charge or other encumbrance in favor of Baird) and must remain so for the duration of the client's relationship with Baird, unless Baird otherwise specifically agrees in writing.

If a client wishes to obtain loans secured by assets in the client's Account (commonly referred to as "securities based lending") and FWG and Baird agree to the arrangement, the client should understand that the lender may exercise certain rights and powers over the assets in the Account, including the disposition and sale of any and all assets pledged as collateral for the loan to meet a collateral call, which may occur without prior notice to the client. A collateral call could have adverse tax consequences, disrupt a client's investment strategy, and have an adverse impact on the Account's performance. A client should be aware of these and other potential adverse effects of securities based lending and collateralizing Accounts before deciding to do so.

A client is required to disclose the terms of the client's agreements with Baird to any lender seeking to use Account assets as collateral. A client must promptly notify FWG and Baird of any default or similar event under the client's collateral arrangements.

A client should understand that neither FWG nor Baird will provide advice on or oversee a securities based lending or collateral arrangement and they will not act as investment adviser or a fiduciary to the client with respect to the liquidation of securities held in the client's Account to meet a collateral call. Any such liquidation will be executed in Baird's capacity as broker-dealer and may, as permitted by law, result in executions on a principal basis.

In some instances, FWG or Baird may refer a client to a third party lender under Baird's Securities Based Lending Program that pays FWG and Baird a referral fee. See "Additional Information—Code of Ethics, Participation or Interest in Client Transactions and Personal Trading—Participation or Interest in Client Transactions—Other Interests in Client Transactions—Securities Based Lending Program" below for more information.

Securities purchased on margin are used as Baird's collateral for the margin loan. Clients that have a margin account should review the section "Services, Fees and Compensation—Additional Service Information—Complex Strategies and Complex Investment Products" above for additional information.

Electronic Delivery of Documents

By signing an advisory agreement, a client consents to the electronic delivery of documents that FWG or Baird may deliver to the client. The term of the consent to electronic delivery is indefinite but a client may revoke the consent at any time by notifying FWG.

Termination of Accounts

FWG or Baird may remove an Account from a Service and immediately close an Account upon written notice to a client if the client fails to abide by the terms of the Service. FWG or Baird may also remove an Account from a Service at any time upon written notice to a client if the client fails to maintain the required minimum asset levels in such Account.

Upon the termination of an Account's enrollment in a Service, FWG, Baird and, if relevant, any other investment manager managing such Account, shall have no obligation to act as investment adviser to such Account. If such Account is custodied at Baird, the Account shall be converted to and designated as a brokerage account. FWG, Baird, and, if relevant, any other investment manager managing such Account, shall be under no obligation to recommend any action with regard to, or to liquidate the securities or other investments in, such Account. After an Account is removed from a Service, it is the client's exclusive responsibility to issue instructions, in writing, regarding the management of any assets in such Account.

If Client's assets are liquidated in connection with a closure of an Account, the client will generally be charged commissions in accordance with Baird's standard commission schedule then in effect.

A client may incur significant expenses and liabilities, including tax-related liabilities for which the client will be solely liable, if the client closes an Account, terminates an advisory agreement, or transfers assets out of Baird's custody. FWG and Baird will not be liable to a client in any way with respect to the termination, closure, transfer or liquidation of the client's Accounts.

Some of the investments offered in connection with the Services contain restrictions that limit their use, and such investments may be unavailable for purchase or holding outside of an Account. For example, certain Investment Funds held in an Account may only be available to a client through an FWG Service or may not be held at another firm. If such restrictions apply and the client terminates a Service or closes an Account, the Client will be required to sell or redeem such Investment Funds or exchange them for other Investment Funds that may be more costly to the client or have poorer performance. A client should consider restrictions applicable to investments carefully before participating in a Service. A client should contact the client's FWG Consultant for specific information as to how Account closure, termination of an agreement, or asset transfers might impact the assets in the client's Accounts.

The client's advisory agreement will survive any event that causes the client's FWG Consultant to be unable to provide services to the client (either on a temporary or permanent basis), including if the client's FWG Consultant ceases to be employed by Baird. In any such event, Baird will continue to provide services to the client and will as promptly as practicable assign another FWG Consultant or Baird Financial Advisor to the client's Accounts (either on a temporary or permanent basis) and the client will be notified of any such change.

Types of Clients

FWG offers the Services primarily to: high net worth individuals and their families and businesses. FWG also provides services to other types of current or prospective clients, including, but not limited to: pension and profit sharing

plans; trusts; estates; charitable organizations; and corporations or other business entities.

Portfolio Manager Selection and Evaluation

The persons providing portfolio management services to clients vary by Service. Information about how Baird may select and evaluate portfolio managers is further described below.

Selection and Evaluation

FWG Recommended Managers Service

When recommending or selecting other investment managers to manage a client's Account in the FWG Recommended Managers Service, FWG typically utilizes managers included on Baird's Recommended Managers List described under the heading "Methods of Analysis, Investment Strategies and Risk of Loss—Investment Strategies and Methods of Analysis—Methods of Analysis—Certain Recommended Lists—Baird's Recommended Managers List" below. Although in some circumstances, FWG may select a manager to manage a client's Account that is not included on Baird's Recommended Managers List.

FWG will select or replace, or recommend the selection or replacement of, a particular manager based upon the client's particular goals and circumstances and the client's selected asset allocation and investment strategy. Before selecting or recommending a manager to a client, FWG performs its own quantitative and qualitative analysis of the manager, focusing on the manager's performance and factors FWG believes will help a manager repeat historical performance such as the investment process and personnel, organizational and investment structure. FWG also focuses on the risk and investment style relative to other investment strategies already in a client's portfolio. FWG generally relies upon Baird's Advisory Research group to provide periodic review and evaluation of managers on Baird's Recommended Managers List. To the extent a manager is not on Baird's Recommended Managers List, FWG will perform periodic review and evaluation of the manager using its own quantitative and qualitative analysis described above. FWG will remove a manager from management of a client's Account when the manager is removed from Baird's Recommended

Managers List or if FWG determines that removal is in the client's best interest.

Clients should note that an investment manager managing the client's Account under the FWG Recommended Managers Service may not be on Baird's Recommended Managers List. A client should understand that FWG and Baird do not perform any due diligence or ongoing monitoring, evaluation or reviews of investment managers except to the extent FWG otherwise specifically agrees to do so in writing.

If a Model-Traded Strategy offered through an Implementation Manager is selected for a client's Account, a client should note that FWG and Baird do not monitor or ascertain whether a third party Implementation Manager is fully and faithfully implementing the Model Portfolio on a continuous basis.

A client assumes ultimate responsibility for client's selection of an Other Manager under the PAM Recommended Managers Program (including any third party Implementation Manager). PAM and Baird assume no responsibility for the client's termination of an Other Manager (including any third party Implementation Manager), the Other Manager's investment decisions, performance, compliance with applicable laws or regulations, or for any other matters involving or affecting the Other Manager.

Baird SMA Network and Dual Contract Programs

Clients participating in the BSN Program or the DC Program should note that the level of initial and ongoing review performed by FWG and Baird on the managers and their SMA Strategies made available under those Programs, including SMA Strategies offered by any Baird department or any manager affiliated with Baird, is significantly less than that performed by FWG and Baird with respect to managers and their strategies eligible for the FWG Recommended Managers Service.

BSN and DC Managers are subject to an initial review by Baird that considers the manager's assets under management, regulatory and compliance history, and certain other limited qualitative and quantitative factors deemed relevant by Baird. The ongoing review is generally performed on an annual basis and is generally limited to changes in the managers' assets under

management in the SMA Strategy and a review of the SMA strategy in comparison to a relevant peer group or benchmark.

The BSN and DC Programs are designed to accommodate a client who wishes to independently select an investment manager not available in the FWG Recommended Managers Service to manage the assets in the client's Account. A client should note that FWG and Baird do not make any recommendation to clients regarding any BSN Strategy or DC Strategy or any representations regarding a BSN Manager's or DC Manager's qualifications as an investment adviser or abilities to manage client assets.

The Overlay Manager may provide review and ongoing evaluations of certain BSN Managers that it makes available through the BSN Program. Clients should review Overlay Manager's Form ADV Part 2A Brochure for more information, which is available upon request, or contact their FWG Consultant for more information.

FWG and Baird do not monitor or ascertain whether the Overlay Manager is fully and faithfully implementing Model Portfolios under the BSN Program on a continuous basis.

SMA Strategies offered under the BSN and DC Programs are subject to certain risks. See "Portfolio Manager Selection and Evaluation—Methods of Analysis, Investment Strategies and Risk of Loss—Principal Risks—Available Investment Product Risks" below for more information.

A client should only participate in the BSN or DC Programs if the client wishes to take more responsibility for monitoring the client's Account, the FWG Recommended Managers Program does not contain an SMA Strategy that meets the client's particular needs, and the client understands the risks of doing so.

A client should note that the client's appointment and continued retention of an investment manager to manage the client's Account in connection with the BSN and DC Programs are based ultimately upon the client's independent review of the investment manager and the investment manager's services. Once retained by the client, an investment manager will only be removed from managing the client's Account upon

the investment manager's withdrawal, removal from the Program, or the client's direction to do so.

A client assumes ultimate responsibility for client's selection of an Other Manager under the BSN or DC Programs (including any third party Implementation Manager). FWG and Baird assume no responsibility for the client's termination of an Other Manager under the BSN or DC Programs (including any third party Implementation Manager), the Other Manager's investment decisions, performance, compliance with applicable laws or regulations, or for any other matters involving or affecting the Other Manager.

Portfolio management services under the BSN and DC Programs may be provided by Baird PWM's home office investment professionals or an investment management department of Baird if the client selects a model portfolio or an SMA Strategy offered by them. In order to provide portfolio management services under the those Programs, Baird requires that Baird associates meet all applicable requirements set forth by applicable law and regulations of self-regulatory organizations, such as the Financial Industry Regulatory Authority, Inc., exchanges, and governmental agencies.

FWG Investment Management Service

Portfolio management services under the FWG Investment Management Service are provided by Baird and FWG Consultants.

In order to provide portfolio management services, Baird requires that FWG Consultants and other Baird associates meet all applicable requirements set forth by applicable law and regulations of self-regulatory organizations, such as the Financial Industry Regulatory Authority, Inc., exchanges, and governmental agencies.

Oversight of the Services

The Investment Advisory Oversight Committee ("IAOC") of Baird, which includes members of Baird's Asset Management, PWM Sales Management, Investment Solutions, Asset Manager Research, Compliance, Legal, and Risk Management Departments, oversees the standards and implementation of the Services.

The IAOC delegates its day-to-day oversight responsibilities to the applicable Regional Director and Baird's PWM Supervision, Investment Solutions and Compliance Departments to monitor the Services. The applicable Regional Director, along with Baird's PWM Supervision and Compliance Departments and other designees, provide periodic review of the performance of FWG Consultants providing portfolio management services under the FWG Investment Management Service. Performance information is provided to the IAOC or a subcommittee or delegate thereof.

Performance Calculation

As part of Baird's selection and evaluation of portfolio managers, Baird calculates the investment performance of:

- FWG and Baird associates acting as portfolio managers under the FWG Investment Management Service;
- Managers on Baird's Recommended Managers list that directly manage client accounts; and
- Managers on Baird's Recommended Managers list that provide Model Portfolios.

When Baird calculates a manager's investment performance, Baird generally uses composites of the manager's client accounts to calculate the manager's performance. A composite is an aggregation of client accounts managed by the manager that are representative of a particular investment strategy, style, or objective. Examples of composites include large cap growth, all cap value, balanced (which includes equity and fixed income securities), and fixed income. Composites may be further broken down to separate taxable and non-taxable portfolios. Fixed income composites may be categorized by portfolio duration.

When calculating composite performance, Baird seeks to utilize calculation methods that adhere to Global Investment Performance Standards (GIPS®) recommendations. Baird calculates composite performance generally using the following principles:

- A total return calculation is used in reporting.
- Current market value including accrued income is used.

- Trade date accounting is used in deriving valuations.
- Monthly returns are calculated using the Modified Dietz calculation.
- Returns for periods greater than a month are calculated by geometrically linking the monthly returns. Returns for periods greater than one year are annualized.
- Reporting is net of fees at the total portfolio, but gross of fees for individual investment categories (e.g., equity or fixed income).

No independent third party reviews the composite performance information calculated by Baird to verify its accuracy or compliance with presentation standards.

To the extent Baird selects or reviews other portfolio managers participating in the Programs, Baird does not calculate investment performance information for such managers. Baird obtains investment performance information for those managers directly from the managers (including the Overlay Manager) or from other external sources that Baird believes to be reliable. A client should understand that: Baird does not recalculate the performance provided by such managers or external sources; neither Baird nor any independent third party reviews the performance information provided by such managers to verify its accuracy or compliance with presentation standards unless otherwise stated in writing; those managers may not calculate performance on a uniform or consistent basis; and Baird does not guarantee the accuracy of information provided by such managers or any external source.

A client should note that Baird does not generally present its investment performance calculations to clients. The information that FWG or Baird provides to clients about portfolio managers from time to time may not be calculated by FWG or Baird but may be calculated by the managers themselves or derived from external sources. FWG and Baird do not audit or verify that investment performance information presented to clients that is calculated by managers or external sources is accurate. In addition, a client should note that such investment performance information may not be calculated on a uniform or consistent basis or reviewed by any independent

third party. A client should ask the client's FWG Consultant for more information.

Portfolio Management by FWG, Baird and Related Persons

Portfolio management services under the FWG Investment Management Service are provided by FWG Consultants. Portfolio management services under the FWG Recommended Managers Service, the BSN Program or Dual Contract Program could be provided by an investment management department of Baird or a manager affiliated with Baird should a client select such a manager. Such arrangements create a potential conflict of interest because Baird and its affiliates may receive higher aggregate compensation if clients retain affiliated managers instead of retaining unaffiliated managers.

When Baird selects managers, or otherwise determines manager availability or eligibility, for the Baird Recommended Managers List, BSN Program or the Dual Contract Program, affiliated investment managers are subject to the same selection and review processes, if any, that Baird applies to unaffiliated investment managers participating in each respective Service, which processes are further described under the heading "Portfolio Manager Selection and Evaluation—Selection and Evaluation" above.

The FWG Investment Management Service exclusively offers portfolio management by FWG and Baird. The processes, if any, used by Baird for selecting and reviewing those portfolio managers is described under the headings "Portfolio Manager Selection and Evaluation—Selection and Evaluation" above and "Portfolio Manager Selection and Evaluation—Methods of Analysis, Investment Strategies and Risk of Loss—Investment Strategies and Methods of Analysis" below. A client should note that the processes and standards used by Baird in determining whether to make affiliated investment options available under the FWG Investment Management Service differ from those processes and standards used by Baird in determining whether to make non-affiliated investment options available under other Services. Baird approves, and continues to make available, affiliated investment options under the FWG Investment Management Service that would not be approved for, or would have been removed from, such other Services. This presents a conflict

of interest because Baird has a financial incentive to maximize the number of affiliated investment options it makes available under the FWG Investment Management Service due to the fact that, by increasing investment options, Baird will likely attract more client assets and thereby increase Baird's revenues. A client participating in the FWG Investment Management Service should monitor the client's Account performance and periodically discuss the performance of such Account with the client's FWG Consultant.

When providing investment advisory services to clients, FWG and Baird are fiduciaries and are required to act solely in the best interest of clients. Baird addresses these conflicts through disclosure in this Brochure and by adopting internal policies and procedures for FWG and Baird and their associates that require them to provide investment advice that is suitable for advisory clients (based upon the information provided by such clients). For more specific information about these potential conflicts and how Baird addresses them, please see the sections "Additional Information—Other Financial Industry Activities and Affiliations" and "Additional Information—Code of Ethics, Participation or Interest in Client Transactions and Personal Trading" below.

Advisory Business

Baird is an employee-owned wealth management, capital markets, asset management, and private equity firm formed in the State of Wisconsin in 1919.

Baird is owned indirectly by its associates through several holding companies. Baird is owned directly by Baird Financial Corporation ("BFC"). BFC is, in turn, owned by Baird Holding Company ("BHC"). BHC is owned by Baird Financial Group, Inc. ("BFG"), which is the ultimate parent company of Baird. Associates of Baird own substantially all of the outstanding stock of BFG.

Baird offers various investment advisory services to clients, including services not described in this Brochure. The investment advisory services Baird offers include: portfolio management and analysis; analysis and recommendations regarding asset allocation and investment strategies; research, analysis and recommendations regarding investment managers and individual securities; investment consulting;

financial planning; investment policy development; and account performance monitoring. Baird also offers clients execution of brokerage transactions and administrative services, including maintaining custody of account assets. Clients may also negotiate other services with Baird. Baird offers its services separately or in combination with other services. FWG and Baird tailor advisory services to the individual needs of clients. For more information about the services offered by FWG and Baird, please see "Services, Fees and Compensation" above.

Subject to the agreement of FWG, a client may impose reasonable restrictions on the securities or types of securities to be held in the client's Account. Please see "Services, Fees and Compensation—Additional Service Information—Investment Discretion" above for more information.

Baird participates in wrap fee programs not described in this Brochure and it provides portfolio management services in connection with those programs. Baird receives a portion of the wrap fee for providing portfolio management services under those wrap fee programs.

As of December 31, 2019, Baird had approximately \$188.2526 billion in regulatory assets under management, approximately \$138.5221 billion of which was managed on a discretionary basis and approximately \$49.7305 billion of which was managed on a non-discretionary basis.

Performance-Based Fees and Side-By-Side Management

FWG does not advise any client accounts that are subject to performance-based fee arrangements.

Baird advises client accounts not participating in services described in this Brochure that are subject to performance-based fee arrangements. Performance-based fee arrangements involve the payment of fees based upon the capital gains or capital appreciation of a client's account. Any such fee arrangements are made in compliance with applicable provisions of Rule 205-3 under the Advisers Act. Performance-based fee arrangements present a potential conflict of interest for Baird (but not FWG) with respect to other client accounts that are not subject to performance-based fee arrangements because

such arrangements give Baird an incentive to favor client accounts subject to performance-based fees over client accounts that are not subject to performance-based fees.

In addition to complying with its fiduciary duties by disclosing this conflict of interest to clients through this Brochure, Baird generally addresses potential conflicts of interest posed by performance-based fee arrangements by periodically monitoring the holdings and performance of performance-based fee accounts and comparing them to accounts not subject to a performance fee that are also managed using a similar strategy in an attempt to detect any possible inequitable treatment. Baird also attempts to minimize potential conflicts of interest posed by performance-based fee arrangements through internal trade allocation procedures that are designed to make securities allocations to discretionary client accounts in a manner such that all such clients receive fair and equitable treatment over time.

Methods of Analysis, Investment Strategies and Risk of Loss

Investment Strategies and Methods of Analysis

Investment Strategies

The investment styles, philosophies, strategies, techniques and methods of analysis that FWG, Baird, Baird PWM's home office investment professionals, and Other Managers use in formulating investment advice for clients vary widely by Service and the person providing the advice. A brief description of commonly used strategies is provided below.

Equity Strategies

Equity strategies generally have an objective to provide growth of capital and primarily invest in equity securities, such as common stocks. However, these strategies may also invest in other types of investments, such as fixed income securities and cash. Equity strategies may invest in companies of all market capitalization ranges or may focus on any combination of specific capitalization ranges, such as large cap, mid cap or small cap companies. Equity strategies may be combined with other strategies described below, such as growth, value, income, economic industry or sector focused, international, global, or geographic region or country focused strategies.

Fixed Income or Bond Strategies

Fixed income or bond strategies generally have one or more of the following objectives: (1) provide current income; or (2) preservation of capital. These strategies primarily invest in fixed income securities, such as corporate bonds, municipal securities, mortgage-backed or asset-backed securities, or government or agency debt obligations. However, these strategies may also invest in other types of investments, such as equity securities or cash. Fixed income strategies may invest in debt obligations having any credit rating, maturity or duration, or they may focus on specific credit ratings, maturities or durations, such as investment grade, non-rated, or high yield ("junk") bonds, or bonds having short-term, intermediate-term or long-term maturities. Fixed income strategies may be combined with other strategies described below, such as economic industry or sector focused, international, global, or geographic region or country focused strategies.

Balanced Strategies

Balanced strategies generally have one or more of the following objectives: (1) provide current income; (2) growth of capital/principal or income; or (3) preservation of capital. These strategies primarily invest in a mix of equity, fixed income securities and cash. Balanced strategies may invest in companies of all market capitalization ranges and in investments having any credit rating, maturity or duration, or they may they may focus on specific capitalization ranges, credit ratings, maturities or durations as described above. Balanced strategies may be combined with other strategies described below, such as economic industry or sector focused, international, global, or geographic region or market focused strategies.

Value Strategies

A value strategy typically invests primarily in equity securities of value companies, which are those that the investment manager believes are out of favor with investors, appear underpriced by the market relative to their earnings or intrinsic value, or have high dividend yields. This strategy is subject to investment style risks.

Growth Strategies

A growth strategy typically invests primarily in equity securities of growth companies, which are

those that the investment manager believes exhibit signs of above-average growth relative to peers or the market, even if the share price is high relative to earnings or intrinsic value. This strategy is subject to investment style risks.

Income Strategies

An income strategy typically invests primarily in income-producing securities, such as dividend-paying equity securities and fixed income securities. This strategy may invest in a combination of investment grade and high yield bonds. This type of strategy may also invest in yield- or income-producing, Non-Traditional Assets.

Economic Industry or Sector Focused Strategies

Economic industry or sector focused strategies primarily invest in companies in one or more economic industries or sectors, such as the telecommunications, technology, industrial, materials, or financial sectors. *These strategies alone generally are not intended to satisfy a client's entire portfolio diversification needs. These strategies are subject to concentration risks because they generally are not diversified or they may invest in a limited number of securities.*

International Strategies

Generally, international strategies primarily invest in securities issued by foreign companies, which may include companies in developed and emerging markets. International strategies may invest in companies of all market capitalization ranges and in investments having any credit rating, maturity or duration, or they may they may focus on specific capitalization ranges, industries or sectors, geographic regions, credit ratings, maturities or durations.

Global Strategies

Generally, global strategies invest in a mix of securities issued by U.S. and foreign companies, which may include companies in developed and emerging markets. Global strategies may invest in companies of all market capitalization ranges and in investments having any credit rating, maturity or duration, or they may they may focus on specific capitalization ranges, industries or sectors, geographic regions, credit ratings, maturities or durations.

Geographic Region or Country Focused Strategies

Geographic region or country focused strategies primarily invest in companies located a particular part of the world, such as Latin America, Europe or Asia, in a group of similarly-situated countries, such as developed or emerging markets, or one or more specific countries. *These strategies alone generally are not intended to satisfy a client's entire portfolio diversification needs. These strategies are subject to concentration risks because they generally are not diversified or they may invest in a limited number of securities.*

Tactical and Rotation Strategies

Tactical strategies typically tactically and actively adjust account allocations to different asset classes based upon the manager's perception of how those asset classes will perform in the short-term. Similarly, rotation strategies typically actively adjust account allocations to different market sectors based upon the manager's perception of how market sectors will perform in the short-term. Tactical and rotation strategies are often driven by technical analysis or methodologies and typically involve underweighting and overweighting account allocations to certain asset classes or market sectors relative to an applicable long-term strategic asset allocation, benchmark index or the market generally. *These strategies often will be focused or concentrated in one or more asset classes or market sectors from time to time, and it is likely that they will have limited or no exposure to one or more asset classes or market sectors. For that reason, tactical and rotation strategies are often subject to concentration risk. Because the decision-making for tactical and rotation strategies is based upon the manager's short-term market outlook, accounts pursuing these strategies often experience higher levels of trading and portfolio turnover relative to other strategies.*

Alternative Strategies and Complex Strategies

Alternative Strategies and other Complex Strategies may invest in a wide range of investments, which may include equity securities, fixed income securities, Non-Traditional Assets, Alternative Investment Products and cash. Alternative Strategies and other Complex Strategies generally involve the use of margin, leverage, short sales and derivative instruments. Many Alternative Strategies and other Complex Strategies have no substantive restrictions on the

types of investments that may be used. Examples of Alternative Strategies and other Complex Strategies include the following.

- Relative Value Strategies. Relative value strategies generally involve the purchase of traditional assets, such as stocks and bonds, and Non-Traditional Assets and the use of short sales and derivative instruments in an attempt to exploit price differences among securities that share similar economic or financial characteristics.
- Long/Short Strategies. Long/short strategies generally involve the purchase of securities believed to be undervalued and selling short securities believed to be overvalued. They may also involve the use of Non-Traditional Assets, leverage and derivative instruments.
- Market Neutral Strategies. Market neutral strategies generally involve the purchase of securities and selling securities short in similar dollar amounts in an attempt to produce returns that are independent of general market performance. They may also involve the use of Non-Traditional Assets, leverage and derivative instruments.
- Statistical Arbitrage Strategies. Statistical Arbitrage is based on the theory that stocks have a tendency to return to a short-term trend line. This type of strategy typically involves the "systematic" or automated trading of securities based upon where a security is relative to its trend line.
- Convertible Arbitrage Strategies. Convertible arbitrage involves the purchase and short sale of multiple securities of the same company. The strategy is implemented by purchasing securities believed to be undervalued and selling short securities believed to be overvalued. Often, the strategy involves the purchase of a convertible bond issued by a company and selling short that company's common stock. This strategy may involve the use of a wide range of derivative instruments.
- Fixed Income Arbitrage Strategies. Fixed income arbitrage strategies generally seek to profit from interest rate, credit spread and other arbitrage opportunities by investing in fixed

income securities, interest rate instruments and derivative instruments.

- Private Credit/Floating Rate Bond/Floating Rate Corporate Debt Strategies. Private credit strategies invest in floating rate bonds, also known as floating rate corporate debt, floating rate loans or floating rate bank loans. The interest payments on floating rate bonds are determined by a reference interest rate, such as the federal funds rate, which is periodically reset. Floating rate bonds are not issued by a company directly to the public. Instead, financial institutions provide loans to companies that need funding. The loans are then combined and repackaged for sale to investors.
- Capital Structure Arbitrage Strategies. Capital structure arbitrage generally involves investing in multiple levels of a single company's capital structure, often taking long and short positions in a company's debt or equity in order to capitalize on perceived mispricings resulting from market inefficiencies or different pricing assumptions. This type of strategy typically involves the use of derivatives and structured products.
- Absolute Return, Total Return and Real Return Strategies. Absolute return, total return and real return strategies generally involve the purchase of traditional assets, such as stocks and bonds, and Non-Traditional Assets in an attempt to generate performance that has low correlation to the major equity markets over a complete market cycle. They may also involve the use of derivative instruments.
- Event-Driven Strategies. Event-driven strategies generally involve the use of Non-Traditional Assets, short sales and derivative instruments in an attempt to seek arbitrage opportunities, particularly those triggered by corporate events (such as mergers, restructurings, and liquidations). These strategies typically involve the assessment of if, how and when an announced transaction will be completed.
- Merger Arbitrage/Special Situations Strategies. Merger arbitrage strategies involve the purchase and sale of securities of companies involved in corporate reorganizations and business combinations, such as mergers,

exchange offers, cash tender offers, spin-offs, leveraged buy-outs, restructurings and liquidations. These strategies often involve short selling, options trading, and the use of other derivative instruments.

- Distressed Strategies. Distressed strategies generally involve the purchase of securities in companies that are in financial distress, or companies that are entering into or are already in bankruptcy. They may also involve the use of short sales and derivative instruments.
- Macro Strategies. Macro strategies generally involve the purchase of traditional assets, such as stocks and bonds, and Non-Traditional Assets and the use of short sales and derivative instruments in an attempt to profit from anticipated changes in securities markets, commodities markets, currency values, and/or interest rates.
- Discretionary and Systematic Trading Strategies. Discretionary trading strategies generally attempt to identify and capitalize on patterns or trends in the markets. Systematic trading strategies generally rely on computerized trading systems or models to identify and capitalize on those patterns or trends. These strategies often involve the use of Non-Traditional Assets, short sales, derivative instruments and significant leverage.
- Private Investment Strategies. Private investment strategies generally involve purchasing common stock or securities convertible into common stock in private transactions. Private investment strategies may invest in companies of all market capitalization ranges or may focus on any combination of specific capitalization ranges. They may also focus on companies in one or more economic industries or sectors or geographic regions. Some private investment strategies focus on companies that are newly formed, in financial distress or already in bankruptcy. The securities purchased are typically unregistered and illiquid. Private Investment Strategies may also involve the use of leverage.
- Leveraged Strategies. Leveraged strategies generally involve the use of Non-Traditional Assets, leverage, short sales and derivative instruments in an attempt to amplify returns or

produce returns that are a multiple of a benchmark index.

- Inverse Strategies. Inverse strategies generally involve the use of Non-Traditional Assets, leverage, short sales and derivative instruments in an attempt to produce returns that are the opposite of a benchmark index.

Alternative Strategies and other Complex Strategies are not appropriate for some clients because they are subject to special risks. See "Services, Fees and Compensation—Additional Service Information—Complex Strategies and Complex Investment Products" above and "Portfolio Manager Selection and Evaluation—Methods of Analysis, Investment Strategies and Risk of Loss—Principal Risks—Non-Traditional Assets and Complex Strategies Risks" below for more information.

Asset Allocation Strategies

Certain Services, including the FWG Investment Management Service, make available asset allocation strategies. Asset allocation strategies involve investing in one or more of the following categories of assets:

- the equity securities asset category, which is comprised of certain asset classes, such as, equity securities issued by: U.S. large cap growth companies; U.S. large cap value companies; U.S. large cap core companies; U.S. mid cap growth companies; U.S. mid cap value companies; U.S. mid cap core companies; U.S. small cap growth companies; U.S. small cap value companies; U.S. small cap core companies; foreign companies located in developed markets; foreign companies located in emerging markets; U.S. REITs; and foreign REITs;
- the fixed income securities asset category, which is comprised of certain asset classes, such as: short-term taxable bonds; intermediate term taxable bonds; long-term taxable bonds; short-term tax-exempt bonds; intermediate term tax-exempt bonds; long-term tax-exempt bonds; high yield fixed income securities; foreign fixed income securities; and broad fixed income securities;
- the Non-Traditional Assets category, which is comprised of certain asset classes, such as:

commodities and commodity-linked instruments; and currencies and currency-linked instruments;

- the Alternative Investment Products category which is comprised of certain asset classes, such as: hedge funds, private equity funds; and managed futures; and
- cash.

Asset allocation strategies have varying investment objectives, ranging from growth of capital to preservation of capital. Asset allocation strategies also have varying investment strategies. Some asset allocation strategies use strategic investment strategies, which involve investing accounts in accordance with a predetermined target allocation to different asset classes. Some asset allocation strategies use tactical investing, which typically involves tactically and actively adjusting account allocations to different asset classes based upon the manager's perception of how those asset classes will perform in the short-term. Some asset allocation strategies involve the use of both strategic and tactical investment strategies, sometimes referred to as dynamic strategies.

Asset allocation strategies may be implemented using a variety of investment types, such as individual securities, mutual funds and ETPs. The amount allocated to an asset class or investment type varies by strategy, and some strategies may have little or no allocation to one or more asset classes or types of investments described above.

Baird uses its Capital Market Assumptions in developing its proprietary model asset allocation strategies, including those used by some FWG Consultants. In determining its Capital Market Assumptions, Baird conducts an analysis of different asset classes and the different levels of risk associated with those investments. That analysis involves the consideration of past performance and the use of forward looking projections that are based upon certain assumptions made by Baird about how markets will perform in the future. There is no assurance that asset classes or markets will perform in accordance with Baird's projections or assumptions. For more information about Baird's Capital Market Assumptions, a client should contact the client's FWG Consultant.

Baird's most common asset allocation strategies are described below. A client should note that the specific investments in an Account following a particular asset allocation strategy could vary from the description below for a number of reasons, including market conditions.

All Growth Portfolio. An All Growth Portfolio typically seeks to provide growth of capital. Typically, an All Growth Portfolio will experience high fluctuations in annual returns and overall market value. Under normal market conditions, this strategy generally invests nearly all of its assets in equity securities. This strategy may also invest in other asset classes, such as fixed income securities, Non-Traditional Assets and cash. This strategy may also invest in Alternative Investment Products or may involve the use of leverage, short sales and derivative instruments.

Capital Growth Portfolio. A Capital Growth Portfolio typically seeks to provide growth of capital. Typically, a Capital Growth Portfolio will experience moderately high fluctuations in annual returns and overall market value. Generally, under normal market conditions, this strategy will primarily invest in a mix of equity securities and fixed income securities, with a significantly higher allocation to equity securities. This strategy may also invest in other asset classes, such as Non-Traditional Assets and cash. This strategy may also invest in Alternative Investment Products or may involve the use of leverage, short sales and derivative instruments. Generally, under normal market conditions, this strategy will have a significantly higher allocation to equity securities than fixed income securities.

Growth with Income Portfolio. A Growth with Income Portfolio typically seeks to provide moderate growth of capital and some current income. Typically, a Growth with Income Portfolio will experience moderate fluctuations in annual returns and overall market value. Generally, under normal market conditions, this strategy will primarily invest in a mix of equity securities and fixed income securities, with a bias towards equity securities. This strategy may also invest in other asset classes, such as Non-Traditional Assets and cash. This strategy may also invest in Alternative Investment Products or may involve the use of leverage, short sales and derivative instruments. Generally, under normal market conditions, this strategy will have a slightly higher allocation to equity securities than fixed income securities.

Income with Growth Portfolio. An Income with Growth Portfolio typically seeks to provide current income and some growth of capital. Typically, an Income with Growth Portfolio will experience moderate fluctuations in annual returns and overall market value. Generally, under normal market conditions, this strategy will primarily invest in a mix of fixed income securities and equity securities, with a bias towards fixed income securities. This strategy may also invest in other asset classes, such as Non-Traditional Assets and cash. This strategy may also invest in Alternative Investment Products or may involve the use of leverage, short sales and derivative instruments. Generally, under normal market conditions, this strategy will have a slightly higher allocation to fixed income securities than equity securities.

Conservative Income Portfolio. A Conservative Income Portfolio typically seeks to provide current income. Typically, a Conservative Income Portfolio will experience relatively small fluctuations in annual returns and overall market value. Generally, under normal market conditions, this strategy will primarily invest in a mix of fixed income securities, cash and equity securities, with a significantly higher allocation to fixed income securities. This strategy may also invest in other asset classes, such as Non-Traditional Assets. Generally, under normal market conditions, this strategy will have a significantly higher allocation to fixed income securities and cash than equity securities.

Capital Preservation Portfolio. A Capital Preservation Portfolio typically seeks to preserve capital while generating current income. Typically, a Capital Preservation Portfolio will experience relatively small fluctuations in annual returns and overall market value. Under normal market conditions, this strategy generally invests nearly all of its assets in a mix of fixed income securities and cash. This strategy may also invest in other asset classes, such as equity securities and Non-Traditional Assets.

Some FWG Consultants and investment managers use asset allocation strategies that include target asset allocation percentages for equity and/or fixed income investments in the names of the strategies (e.g., 80-20, 60-40, 40-60, 20-80, etc.). A client should note that those percentages are intended to be asset allocation targets only. There is no guarantee that accounts following asset allocation strategies will be invested strictly

in accordance with target asset allocations. It is likely that the actual investments in Accounts following those strategies will vary, sometimes significantly, from the target asset allocations and may include other asset classes due to market conditions and the FWG Consultant's or investment manager's assessment of how to best invest a client's Accounts. See "Important Information about Implementation of Investment Objectives and Investment Strategies" below for more information.

For information about the risks associated with the asset allocation strategies described above, see the section of the Brochure entitled "Principal Risks—Risks Associated with Certain Investment Objectives and Asset Allocation Strategies" below.

Important Information about Implementation of Investment Objectives and Investment Strategies

A client should note that, to implement an investment strategy, a client's FWG Consultant or investment manager may use or recommend mutual funds, ETPs or other Investment Funds that primarily invest in particular types of securities instead of direct investment in those types of securities. A client should also note that the client's FWG Consultant or investment manager may use a strategy not described above or they may use a strategy with the same or similar name that is implemented differently. A client should ask the client's FWG Consultant or investment manager for more specific information about the strategy being used for the client's Account.

A client's Account is subject to the risks associated with the Account's particular strategies and investments. A client should review the risks associated with those strategies and investments described under the heading "Principal Risks" below.

From time to time, the client's FWG Consultant or investment manager will invest the client's Account, or recommend that the client invest the Account, in a manner that is inconsistent with the investment strategy or investment objective selected by the client for the Account when the client's FWG Consultant or investment manager determines that it is appropriate to do so, such as using defensive strategies in response to adverse market or other conditions or engaging in tax management. Similarly, a client's Account may be

invested in a manner inconsistent with the investment strategy or investment objective selected by the client for the Account in certain other circumstances, such as when the client's Account is transitioning to a new Service, investment objective or investment strategy, or due to other factors, such as market appreciation or depreciation of the assets in the client's Account, deposits and withdrawals made by the client, and investment restrictions, if any, imposed by the client. A client's Account may not be able to achieve its investment objectives during any such period of time and the Account may be subject to different or enhanced risks than would be the case had the Account been invested in a manner wholly consistent with the investment objective or investment strategy selected by the client. Clients are encouraged to discuss with their FWG Consultant on a regular basis how the Account is being managed or advised and whether any such conditions exist.

Methods of Analysis

Baird, its home office investment professionals, and FWG Consultants may use various forms of security analyses, including the following:

- **Fundamental Analysis.** Fundamental analysis involves an approach to investing through a detailed analysis of specific companies, such as their financial statements and financial ratios, management, competitive advantages and markets, in an attempt to determine the value of an investment. Fundamental analysis may include qualitative and quantitative analyses.
- **Qualitative Analysis.** Qualitative analysis involves the use of subjective judgment to analyze factors that may be difficult to quantify or measure objectively. As it pertains to managers and investment products, qualitative analysis may include review of the background and experience of a manager or a mutual fund company.
- **Quantitative Analysis.** Quantitative analysis is a method of evaluating securities by analyzing a large amount of data through the use of algorithms or models in an attempt to understand behavior, predict market events, market prices, etc., and generate an investment decision. As it pertains to managers and investment products, quantitative analysis may include review of manager performance,

investment style, style consistency, risk, and risk-adjusted performance.

- **Technical Analysis.** Technical analysis is a method of analyzing past price and volume patterns and trends in the trading markets to attempt to predict the direction of both the overall market and specific investments.

Baird, its home office investment professionals, and FWG use various third party research information and related tools to provide investment advice to clients. These sources of information and tools may include, among others, issuer-supplied literature (such as annual reports, press releases and other information) and external market, economic, financial and investment data and analyses provided by organizations not affiliated with Baird. They may also employ the use of computers and third party software to more readily display information, assist with the evaluation and analysis, and create asset allocation recommendations. Although they generally use information and tools that Baird deems reliable, FWG and Baird do not independently verify or guarantee the accuracy of the information or tools used.

Baird and FWG Consultants may also utilize research reports created by Baird. However, it should be noted that FWG Consultants are not obligated to act in a manner consistent with Baird research reports and they may act in a manner that is contrary to those reports if they deem it to be consistent with the client's investment objectives and in the client's best interest.

When providing investment advice to clients, FWG Consultants may also use the model portfolios or recommended or eligible product lists made available by Baird's Asset Manager Research Department or other Baird departments, or they may use investment products that Baird has generally deemed to be "available" for use in its advisory programs ("Available Investment Products"). The level of initial and ongoing evaluation, monitoring and review that FWG and Baird perform on managers and on investment products varies. Available Investment Products generally do not receive the same level of initial or ongoing evaluation, monitoring or review by Baird as those managers or products that are included in a model portfolio or on a recommended or eligible product list. As a result,

Available Investment Products are subject to certain risks. See “Portfolio Manager Selection and Evaluation—Methods of Analysis, Investment Strategies and Risk of Loss—Principal Risks—Available Investment Product Risks” below for more information.

More specific information about Baird model portfolios, recommended lists and eligible product lists is provided below. A client should note that investment products recommended to the client or selected for the client’s Account, including investment managers or products included on a Baird recommended or eligible product list, are those which, in Baird’s professional judgment, may be appropriate to help the client pursue the client’s financial goals. FWG and Baird do not represent or guarantee that such investment managers or products are or will be the best investment managers or products available.

Under certain circumstances when requested by a client, FWG and Baird may allow a client to select a manager or investment product that is not on a Baird recommended or eligible product list or that is generally not made available to Baird clients. A client should note that, unless FWG and Baird otherwise agree in writing, FWG and Baird do not provide any initial or ongoing evaluation, monitoring or review of any such managers or investment products and that the client’s decision to select such a manager or investment product is based solely upon the client’s review of the manager or investment product.

Certain Model Portfolios

Baird Recommended Portfolio. The Baird Recommended Portfolio, which is managed by Baird’s PWM Equity Research team, seeks to outperform the S&P 500 Index by investing in a diversified core portfolio of 40–50 stocks. The portfolio invests primarily in stocks with market capitalization greater than or equal to \$10 billion (large cap). The portfolio may also contain stocks with market caps below \$10 billion but these stocks will not represent more than 35% of the total portfolio. The team’s top-down investment approach begins with macroeconomic and market outlooks from Baird’s Investment Strategy team. This information is used to underweight or overweight particular industry sectors compared to the S&P 500 Index. Individual stocks are selected with an emphasis on higher quality companies that the team believes have strong

fundamental characteristics and management teams, attractive growth prospects, and reasonable price-appreciation expectations. Each stock is assigned a weighting as a percentage of the portfolio with no one company comprising more than 5% of the entire portfolio. Stocks can be sold or positions reduced for a variety of reasons such as valuation, a change in company or industry fundamentals, or a change in industry sector weighting. The Portfolio is intended as a long-term investment strategy.

Baird Rising Dividend Portfolio. The Baird Rising Dividend Portfolio, which is managed by Baird’s PWM Equity Research team, seeks to provide a core equity strategy with a portfolio yield above that of the S&P 500 Index. The team’s top-down investment approach begins with macroeconomic and market outlooks from Baird’s Investment Strategy team. The 30–50 stocks in the portfolio are primarily large cap stocks—as defined by a market capitalization of \$10 billion or greater at the time of investment—and all are above \$5 billion. The team looks for quality companies with strong fundamental characteristics and management, attractive dividend yields, and the ability to increase their dividends. Companies are screened for dividend history and consistency, earnings growth expectations, and balance sheet quality. Each stock that is selected is assigned a weighting as a percentage of the portfolio with no one company comprising more than 5% of the entire portfolio. A position can be reduced or removed due to changes in valuation, company fundamentals or the perceived ability to continue to raise its dividend in the future—among a variety of other potential reasons for portfolio changes including a change in industry sector weighting. The Portfolio is intended as a long-term investment strategy.

AQA Portfolios. Baird makes available to clients certain Automated Quantitative Analysis (“AQA”) Portfolios. AQA is an analytical tool that seeks to identify stocks of companies that are undervalued by calculating the intrinsic values for the stocks and comparing the calculated values to current market prices. Focusing on a company’s past financial performance, AQA analyzes fundamental ratios and trends of the most recent eight-year history of a company and each company in its peer group, excluding estimates of future balance sheet and income statement performance. The analysis is quantitative and ignores certain qualitative information such as company-specific

material news and events. Stocks are ranked from the most undervalued to the most overvalued based on the difference between the values calculated by AQA and current market prices. The stocks identified by AQA as being the most undervalued are then selected for investment. Baird offers the following four (4) AQA Portfolio strategies, each of which invest in undervalued stocks identified using AQA, excluding securities issued by banks, REITS and insurance companies: (1) the AQA All Cap Strategy, which primarily invests in stocks across market capitalizations, generally those included in the S&P 500®, S&P MidCap 400® or S&P SmallCap 600® Indices; (2) the AQA Large Cap Strategy, which primarily invests in large cap stocks, generally those included in the S&P 500® Index; (3) the AQA Mid Cap Strategy, which primarily invests in mid cap stocks, generally those included in the S&P MidCap 400® Index; and (4) the AQA Small Cap Strategy, which primarily invests in small cap stocks, generally those included in the S&P SmallCap 600® Index.

Hilliard Lyons Trust Strategies. Baird makes available to clients five (5) portfolio strategies developed and maintained by HLT ("HLT Strategies") described below. The HLT Strategies invest in a mix of equity securities, fixed income securities, mutual funds and ETFs.

- (1) The HLT Large Cap Equity strategy invests in a fairly concentrated portfolio of large cap equity securities. This strategy is intended for clients seeking investment in large cap companies as one part of their overall asset allocation. This strategy is generally not intended to be a complete investment program.
- (2) The HLT Core + Satellite 100 strategy is a diversified portfolio with a 100% target equity allocation. The strategy uses the HLT Large Cap Equity strategy as the core allocation of the portfolio while providing exposure to satellite asset classes (such as mid cap and small cap companies) through the use of ETFs that principally invest in equity securities. This model does not include fixed income.
- (3) The HLT Core + Satellite 70/30 strategy utilizes the HLT Large Cap Equity strategy as the core allocation of the portfolio while

providing exposure to satellite asset classes (such as mid cap and small cap companies) and fixed income securities through the use of ETFs that principally invest in equity securities and fixed income securities. This strategy has a target allocation of 70% of its assets to equity securities and 30% of its assets to fixed income securities.

- (4) The HLT Core + Satellite 50/50 strategy utilizes the HLT Large Cap Equity strategy as the core allocation portion of the portfolio while providing exposure to satellite asset classes (such as mid cap and small cap companies) and fixed income securities through the use of ETFs that principally invest in equity securities and fixed income securities. This strategy has a target allocation of 50% of its assets to equity securities and 50% of its assets to fixed income securities.
- (5) The HLT Equity Income strategy primarily invests in dividend paying companies that HLT believes have the ability to consistently grow their dividend at attractive rates over the long-term.

Certain Recommended Lists

Baird's Recommended Managers List. When selecting managers and their strategies ("BRM Strategies") for Baird's Recommended Managers List, Baird seeks registered investment advisory firms having portfolio managers with academic credentials such as a master's degree or participation or completion of the Chartered Financial Analyst ("CFA") program. Baird also looks for a portfolio manager with greater than three (3) years of investment experience focusing on the particular investment style that is offered by the portfolio manager. Baird generally looks for portfolio managers that have demonstrated success, that have performance histories showing sufficient ability to achieve returns in excess of their respective benchmarks, and that have investment processes, infrastructure, personnel and other resources satisfactory to Baird. Baird also considers other qualitative and quantitative factors.

Baird's Asset Manager Research Department is primarily responsible for selecting and evaluating investment managers included on Baird's Recommended Managers List. In selecting

investment managers, Baird's Asset Manager Research Department utilizes quantitative and qualitative measures to evaluate managers based on the:

- quality and stability of their organization
- soundness and clarity of their investment philosophy
- reliability and consistency of their investment process
- competitiveness of their investment performance

Baird's Asset Manager Research Department may also employ the use of computers and third party software to more readily display information and assist with the evaluation and analysis.

Baird's initial screening process begins with a proprietary, multi-factor model that evaluates managers on different factors including risk-adjusted performance, consistency of returns and downside protection. These factors are scored over various time periods and relative to a specific peer group universe, narrowing the pool of managers for further evaluation. Baird's Asset Manager Research Department then performs a more in-depth evaluation of managers that are identified through the initial screening process, which generally includes a review of the following factors: stability of the firm/team, the robustness and repeatability of the investment process, the portfolio's past returns pattern and tax-efficiency, and how the manager adds value. The final determination of Baird's Recommended Managers List is subject to the approval of Baird's Investment Committee.

Ongoing manager evaluation generally includes quarterly conference calls, performance attribution and periodic onsite visits. Material adverse changes affecting a manager may result in the manager being placed on Baird's "watch" list. Managers on the watch list are scrutinized to see if improvement or degradation is taking place. Potential causes for removal from Baird's Recommended Managers List include fundamental changes in the operations of the manager, turnover in key personnel, substantial changes in management or ownership, a change in investment philosophy or style, significant drift from stated objectives, major legal, regulatory or compliance difficulties, impairment of financial

condition, sustained underperformance in relation to its peers, or other adverse changes affecting the manager that in Baird's opinion warrants the manager's removal.

If a Model-Traded BRM Strategy is selected for a client's Account, it is important to note that Baird's selection and ongoing evaluation of a BRM Strategy is based upon an assumption that the Recommended Manager's Model Portfolio will be fully and faithfully implemented by the Overlay Manager or Implementation Manager on a continuous basis. A client should understand that the Overlay Manager or Implementation Manager has discretion over the client's Account and may invest the client's Account in a manner that differs from the Model Portfolio. Baird does not monitor the Account's performance nor does it ascertain whether the Overlay Manager or Implementation Manager is implementing the Model Portfolio as provided by the Recommended Manager. If the Overlay Manager or Implementation Manager, in the exercise of its discretion, decides to implement the Model Portfolio differently, the performance of a client's Account could be negatively impacted. Baird is not monitoring, evaluating or reviewing the Overlay Manager or Implementation Manager or the performance of a client's Account under those circumstances.

Certain investment strategies offered by Baird Equity Asset Management have been selected by Baird for inclusion on Baird's Recommended Managers List. This presents a conflict of interest. However, the criteria used by Baird in deciding to select affiliated managers for Baird's Recommended Managers List are the same as those used for unaffiliated managers.

Baird's Recommended Mutual Fund List. Baird's Recommended Mutual Fund List is designed to include mutual funds across numerous asset classes. When selecting funds for inclusion on the List, Baird generally seeks mutual funds that have investment managers with tenure of at least three (3) years and have underlying investments that adhere to the fund's market capitalization policy and are consistent with the manager's stated investment process and philosophy. Baird generally looks for funds that are among the top-performing funds in a style category in terms of risk-adjusted returns or that are managed by individuals or firms that have demonstrated success in other, related asset classes; that have performance histories showing sufficient ability to

achieve returns in excess of their respective style index; and that have investment processes, infrastructure, personnel and other resources satisfactory to Baird. Baird's Asset Manager Research Department is primarily responsible for assisting with selecting and evaluating mutual funds included on the List. In selecting funds, Baird's Asset Manager Research Department utilizes a quantitative and qualitative evaluation process of the investment managers of such funds. The process Baird uses for selecting and removing funds for the Baird Recommended Fund List is similar to the process Baird uses to select and remove BRM Strategies described under "Baird's Recommended Managers List" above. Baird's Investment Committee is ultimately responsible for selecting funds included on the List. The Baird Aggregate Bond Fund, Baird Quality Intermediate Municipal Bond Fund, Baird Short-Term Bond Fund, and Baird MidCap Fund, mutual funds affiliated with Baird, have been selected by Baird for inclusion in Baird's Recommended Mutual Fund List. This presents a conflict of interest. However, the criteria used by Baird in deciding to select affiliated mutual funds for Baird's Recommended Mutual Fund List are the same as those used for unaffiliated mutual funds.

Baird's Recommended Funds of Hedge Fund List. Baird's Recommended Funds of Hedge Fund List contains a variety of funds of hedge funds ("FOHFs") that pursue various Alternative Strategies or other Complex Strategies. Some FOHFs primarily use credit-oriented investment strategies, which are known as fixed income diversifiers. Some FOHFs primarily use equity-oriented investment strategies, which are known as equity diversifiers. Other FOHFs primarily use a combination of credit- and equity-oriented strategies, which are known as balanced diversifiers. In certain circumstances, FOHFs may be an appropriate substitute for part of a client's allocation to traditional fixed income or equity investments.

To be added to Baird's Recommended FOHF List, a FOHF must generally meet the following requirements: SEC registration (by the general partner or investment advisor under the Investment Advisers Act of 1940), stable to growing assets under management as determined by Baird, principals with an appropriate level of hedge fund management experience and network of contacts in the industry according to Baird,

adequate diversification by number of hedge funds and type of hedge fund strategy in Baird's opinion, effective risk management, and reputable service providers (e.g., auditor, administrator, and legal counsel). Baird also seeks FOHFs that it believes possess one or more unique attributes that may lead to favorable performance relative to their peers going forward.

Before adding a prospective FOHF to the List, Baird's Asset Manager Research Department conducts an in-depth due diligence process. The process begins with a review of the FOHF's responses to a due diligence questionnaire and of marketing and legal documents (e.g., subscription documentation, limited partnership agreement, offering memorandum, and the adviser's Form ADV Part 2A Brochures). This is followed by an onsite review, where Baird meets with one or more principals and analysts to assess how the FOHF identifies, hires, monitors, and terminates individual hedge funds. Baird also evaluates how the FOHF constructs its hedge fund portfolio and manages risk. In addition, Baird undertakes a brief review of the FOHF's third party service providers. At the conclusion of the onsite review, an investment thesis is presented to and discussed with a Baird Investment Committee. The Committee votes on whether to add the FOHF to Baird's Recommended Funds of Hedge Fund List. In making that determination, the Committee considers the information presented, taking into account the merits of the individual FOHF, how that FOHF compares to other FOHFs that Baird offers, and the level of expected demand for the particular FOHF.

After a FOHF is added to Baird's Recommended Funds of Hedge Fund List, it is monitored each quarter, and subsequent onsite reviews periodically take place. As part of its quarterly monitoring, Baird evaluates a FOHF's assets under management and flows (subscriptions and redemptions), organizational changes (e.g., personnel changes or new offerings), recent changes made to the FOHF portfolio (e.g., hedge funds added or removed), and reasons for performance differences between the FOHF and its benchmark. Subsequent onsite reviews are similar in nature and scope to the initial on-site review.

Baird may place a FOHF on "Watch" status if it has experienced a material event that, in Baird's opinion, may negatively affect the FOHF's

performance going forward or possibly lead to the departure of an important member(s) of the FOHF. Examples include a large decline in assets under management, high rate of redemptions, notable change in the investment or compliance teams, weakening performance, or regulatory problems. Any firm that is placed on Watch is evaluated more closely to determine if the problem is likely to be temporary or long-term, and whether it can be remedied. Baird will remove a FOHF from Watch and return it to active status if, in Baird's opinion, the problem has been or is in process of being adequately addressed. However, Baird will terminate a FOHF from the List if it believes the issue is likely to be long-term and adversely affect the FOHF's future performance.

Using the FOHFs on Baird's Recommended Funds of Hedge Funds List, FWG Consultants will select or replace, or recommend the selection or replacement of, a particular FOHF based upon each client's particular goals and circumstances.

Certain Eligible Product Lists

Baird's ETP Short List. Baird's ETP Short List is designed to encompass numerous asset classes and varied investment objectives. Baird generally seeks to include ETPs with transparent, experienced sponsors that have stable or growing assets under management and have demonstrated consistent strategy performance over time. Baird tends to favor ETPs that have well-known, diversified benchmark indices, lower fees and tracking errors, and higher trading liquidity relative to other ETPs. Inclusion on or exclusion from the Baird ETP Short List is not meant to be a buy or sell recommendation. Rather, the List is a collection of ETPs that may be appropriate to meet particular client investment goals.

Managed Futures. Effective March 1, 2018, Baird ceased maintaining an official list of managed futures funds that are structured as limited partnerships. Therefore, Baird does not, and will not in the future, provide any evaluation, monitoring or review of those funds or their sponsors. A client's decision to invest in, or to maintain an investment in, a managed futures fund is based solely upon the client's own review and evaluation of the fund.

Structured Products. When determining whether to make a structured product available to Baird clients, Baird reviews the offering documents for the structured product and considers: the size of the issuer and issuer's credit rating, the maturity of the product, how interest is calculated, the underlying asset category (e.g., a basket of securities or currencies or a market index), applicable caps, barriers, and participation rate, and whether the structured product has principal protection.

Baird tends to favor larger-sized issuers of structured products over smaller-sized issuers and also tends to favor structured products that have shorter maturities, less complex payout structures, underlying assets that are more liquid or transparent, and offer full or partial principal protection. If a product does not offer full principal protection, Baird also considers how much principal is exposed to loss, whether, in Baird's judgment, there is reasonable risk/reward trade-off for that exposure, as well as the events that could trigger loss of principal and Baird's belief as to the likelihood of the occurrence of such events.

Baird's Investment Solutions Department is primarily responsible for selecting and evaluating structured products made available to clients under the Services. Baird's Alternative Investment Committee, which includes members of Baird's Investment Solutions, Asset Manager Research, Compliance, Legal, and Risk Management Departments, ultimately determines whether to make a structured product available to Baird clients.

Using the structured products that Baird makes available, FWG Consultants will select or replace, or recommend the selection or replacement of, a particular structured product based upon each client's particular goals and circumstances.

Hedge Funds. Baird makes hedge funds available to clients in certain Programs, including hedge funds sponsored by, affiliated with or offered by Capital Integration Systems LLC or CAIS Capital LLC (collectively, "CAIS Hedge Funds"). An independent third party research firm provides research and due diligence materials on CAIS Hedge Funds to Baird. Clients interested in a CAIS Hedge Fund or invested in a CAIS Hedge Fund may receive those research and due diligence

materials from Baird. Clients should note that Baird solely relies upon the independent third party research firm to provide an independent analysis of each CAIS Hedge Fund, Baird does not conduct its own research or due diligence on any CAIS Hedge Fund, and Baird does not verify the accuracy of the information contained in the research and due diligence materials. Clients should also note that neither Baird nor any other third party provides any initial or ongoing evaluation, monitoring or review of other hedge funds.

Private Equity Funds and Funds of Private Equity Funds. Baird makes available to clients private equity funds affiliated with Baird and private equity funds and funds of private equity funds that are not affiliated with Baird.

When making unaffiliated private equity funds or funds of private equity funds available to its clients, Baird generally seeks to identify fund or fund of private equity fund products that have the following traits: a management firm that is registered with the SEC as an investment adviser; stable or growing assets under management; a well-diversified portfolio; and reputable service providers (e.g., auditor, administrator, legal counsel and custodian). In addition, Baird looks for fund and fund of private equity fund products that offer strategies that Baird believes may be suitable for Baird clients. Baird also considers the fund's principals' experience managing a fund and whether they have a network of contacts in the industry.

Baird's Investment Solutions Department along with the Asset Manager Research Department are primarily responsible for selecting and evaluating the unaffiliated private equity funds and funds of private equity funds made available to clients under the Programs. Baird's initial evaluation of an unaffiliated private equity fund or fund of private equity product and its sponsor includes a review of a questionnaire and legal documents (e.g., subscription documents and agreements, disclosure documents, and offering materials) and a meeting with key personnel in person or via telephone. Baird's Product Strategy Committee determines whether to make a fund of private equity funds product available to Baird clients.

Baird generally monitors unaffiliated funds and fund of private equity funds made available to

Baird clients on an annual basis through the use of a questionnaire that focuses primarily on the following factors: investments made or distributions, assets under management, organizational changes (e.g., personnel changes), changes made (e.g., investment strategies or process), and reasons for the fund's recent performance. In addition, Baird conducts subsequent onsite reviews of each sponsor on a periodic basis when deemed necessary by Baird.

Baird may discontinue making a specific unaffiliated private equity fund or fund of private equity fund available for new investments if it experiences a notable change in investment or key personnel, or regulatory problems.

Baird does not subject private equity funds affiliated with Baird to the criteria imposed upon unaffiliated private equity funds described above when making them available to clients, and Baird does not perform any evaluation, monitoring or review of the private equity funds affiliated with Baird. This presents a potential conflict of interest. See "Additional Information—Other Financial Industry Activities and Affiliations—Certain Affiliations—Affiliated Private Equity Funds" below.

Using the funds of private equity funds that Baird makes available, FWG Consultants will select or replace, or recommend the selection or replacement of, a particular fund of private equity fund based upon each client's particular goals and circumstances.

The FWG Investment Process

When providing advice to clients, FWG starts with the "financial framework" and risk analysis developed for a client in connection with the financial planning process described above. Using a variety of tools, FWG then develops and recommends a long-term, strategic asset allocation and investment strategy for the client's portfolio that is appropriate for the client's risk and return objectives. FWG develops a customized asset allocation strategy by dividing client assets into what FWG views as "less risky" and "more risky" asset classes. FWG then develops an investment strategy by diversifying the client's portfolio among different investments in each asset class with the goal to manage risk. Investment strategies may involve the use of different equity styles or strategies, such as: large

cap growth, large cap value, mid cap growth, mid cap value, small cap growth, small cap value, international and emerging market equities strategies; different fixed income styles or strategies, such as short or intermediate, taxable and tax-exempt bond, international and emerging market bond, and high yield bond strategies; different Non-Traditional Asset strategies, such as real estate and real estate fund and commodity strategies; and Alternative Strategies, which may include the use of hedge funds, funds of hedge funds, private equity funds, funds of private equity funds, and managed futures.

From time to time, and depending on macroeconomic conditions, FWG may also recommend or implement a slight, short-term tactical tilt to the client's chosen asset allocation that is above or below the long-term strategic asset allocation.

FWG typically recommends or selects mutual funds and ETFs for FWG Investment Management Accounts. However, other types of securities may be recommended or selected for those Accounts.

When recommending or selecting a particular mutual fund or ETF for client Accounts, FWG begins by reviewing a client's asset allocation and investment strategy needs and identifying the characteristics of the types of mutual funds or ETFs appropriate for the client. Once the characteristic types of mutual funds or ETFs are identified, FWG looks for investments that meet those requirements. FWG tends to look for passively managed funds when selecting funds that invest primarily in equity securities and actively managed funds when selecting funds that invest primarily in fixed income securities. FWG also looks for funds that have higher trading volumes and lower expense ratios. Once FWG has identified a potential fund for a client, FWG conducts a quantitative and qualitative analysis of the investment manager for the fund similar to the analysis it performs on investment managers described under "Portfolio Manager Selection and Evaluation—Selection and Evaluation—FWG Recommended Managers Service" above.

In order to implement the overall client portfolio strategy, FWG may utilize one or more of the Services and a combination of different investment vehicles, such as SMAs, mutual funds and ETFs.

More specific information about the particular investment strategies and methods of analysis that FWG and Baird use in connection with each Service is further described below.

FWG Investment Management Service

Under the FWG Investment Management Service, FWG may use various investment strategies. A client's particular investment strategy is typically determined by FWG in consultation with the client using the investment process described in the section "The FWG Investment Process" above.

FWG Consultants, as a group, utilize a variety of investment styles and strategies, including the investment strategies described in the sections "Methods of Analysis, Investment Strategies and Risk of Loss—Investment Strategies and Methods of Analysis—Investment Strategies" and "The FWG Investment Process" above. They may also use the model portfolios or recommended or eligible product lists made available by Baird's Asset Manager Research Department or other Baird Departments, or they may use lists of investment products that Baird has generally deemed to be "available" for use in its advisory programs. For more information about Baird model portfolios, recommended lists and eligible product lists, see "Methods of Analysis, Investment Strategies and Risk of Loss—Investment Strategies and Methods of Analysis—Methods of Analysis" above.

FWG manages client assets using investment strategies and investment products based upon a client's particular investment objectives and financial goals. FWG may use a wide variety of investment products to implement the client's investment strategy, which investments are further described under "Services, Fees and Compensation—Additional Service Information—Permitted Investments" above. FWG may also use certain investment strategies, such as concentrated investment strategies and margin, and certain types of investments, such as illiquid securities and Complex Investment Products, including REITs, private equity funds, funds of private equity funds, leveraged or inverse funds and structured products. These investment strategies and products involve special risks and may not be appropriate for all clients. Please see "Principal Risks" below for more information.

Principal Risks

Risk is inherent in any investment product and FWG and Baird do not guarantee any level of return on a client's investments. There is no assurance that a client's investment objectives will be achieved, and a client could lose all or a portion of the amount invested. The management of client accounts and recommendations made to clients are based in part upon the use of forward looking projections, which in turn are based upon certain assumptions about how markets will perform in the future. There can be no guarantee that markets will perform in the manner assumed and the actual performance of markets and a client's Account could differ materially from those assumptions. Also, a client's Account value may fluctuate, sometimes dramatically, depending upon the nature of the client's investments, market conditions and other factors. By participating in a Service, a client may be subject to certain risks, including, but not limited to the risks described below. The risks discussed below vary by Service, investment style or strategy, and the investments in the client's Account, and each risk may or may not apply to a client. Clients should not pursue a strategy or invest in an investment product unless they are prepared to accept the associated risks. Clients are encouraged to discuss with their FWG Consultant the risks that apply to them. A client should also review the prospectus or other disclosure document for any security or other investment product in which the client invests, as it will contain important information about the risks associated with investing in such security or other investment product.

General Risk Information

General risks of the Services include the following:

Market Risks. A client's Account may change in value due to overall market fluctuations. General economic conditions, political developments, international events and other factors may cause the overall market to decline, which in turn may reduce the value of the client's Account regardless of the relative strength of the securities held in the Account. Securities prices often vary for reasons unrelated to matters directly affecting the issuers of the securities.

Management and Securities Selection Risks. A client's Account may fluctuate in value

differently than, or in the opposite direction as, the overall market or applicable benchmark because of the selection of individual securities for the Account. The judgments made by the persons managing client accounts about the attractiveness, value and potential appreciation of particular securities may prove to be incorrect. For example, while the stock markets may experience increases in value, the client's Account may experience a decline in value due to the underperformance of the stocks selected for investment in the client's Account.

Investment Objective and Asset Allocation

Risks. A client's investment objective and asset allocation strategies involve the risk that certain asset classes selected for the client's Account may not perform as well as other asset classes during varying periods. In addition, clients who pursue more aggressive investment objectives and asset allocation strategies, while hoping to achieve high returns, may face greater risk of loss than clients with more conservative objectives and strategies. In developing investment objectives and asset allocation strategies, clients should carefully consider their financial situation and needs, investment goals, investment time horizon and risk tolerance. A client should inform the client's FWG Consultant of these considerations so the FWG Consultant can assist in determining the client's investment objectives and asset allocation strategies.

Conflicts of Interest Risks. Issuers, advisors or other sponsors of investment products or their affiliates may engage in business practices that conflict with the interests of investors. Among other things, these business practices can have a negative impact on the market price of the investment product. Clients are encouraged to review the prospectus or other disclosure document for the investment product and also discuss with their FWG Consultant the conflicts of interest risks that may apply to them.

Stock Market Risks. Equity security prices vary and may fall, thus reducing the value of a client's investments. Certain stocks selected for a client's Account may decline in value more than the overall stock market.

Equity Securities Risks. Equity securities may experience sudden, unpredictable drops in value or long periods of decline in value. This may occur

because of factors that affect the securities markets in general, such as adverse changes in economic conditions, the general outlook for corporate earnings, interest rates or investor sentiment. Equity securities may also lose value because of factors affecting an entire industry or sector, such as increases in production costs, or factors directly related to a specific company, such as decisions made by its management.

Common Stock Risks. Common stocks are susceptible to general stock market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change. These investor perceptions are based on various and unpredictable factors including: expectations regarding government, economic, monetary and fiscal policies; inflation and interest rates; economic expansion or contraction; and global or regional political, economic and banking crises. Holders of common stocks are generally subject to greater risk than holders of preferred stocks and debt obligations of the same issuer because common stockholders generally have inferior rights to receive payments from issuers in comparison with the rights of preferred stockholders, bondholders and other creditors.

Fixed Income Security Risks. Fixed income securities are subject to certain risks, including interest rate risk, credit risk and liquidity risk. In addition, they are subject to maturity risk. Generally, the longer a bond's maturity, the greater the interest rate risk and the higher its yield. Conversely, the shorter a bond's maturity, the lower the interest rate risk and the lower its yield. Non-rated, split-rated, below investment grade, and asset-backed securities, including mortgage-backed securities and CMOs, have additional, special risks.

Interest Rate Risk. The value of some investment products, particularly fixed income securities, is affected significantly by changes in interest rates. Generally, when interest rates rise, the product's market value declines and when interest rates decline, its market value rises. In addition, a rise in interest rates may have a negative impact on the issuer, which, in turn, could have a negative impact on the market value of the investment product.

Credit Risk. The value of some investment products, particularly fixed income securities, is affected by changes in the product's credit quality rating or the issuer's financial condition. If the credit quality rating or the issuer's financial condition declines, so may the value of the investment product. Issuers may experience unanticipated financial problems and may be unable to meet its payment obligations. Municipal obligations in particular may be adversely affected by political and economic conditions and developments (for example, legislation reducing state aid to local governments.) Bonds receiving the lowest investment grade rating or a non-investment grade rating may have speculative characteristics and, compared to higher grade debt obligations, may have a weakened capacity to make principal and interest payments due to changes in economic conditions or other adverse circumstances. Ratings agencies such as Moody's, Fitch and S&P provide ratings on bonds based on their analyses of information they deem relevant. Ratings are essentially opinions or judgments of the credit quality of an issuer and may prove to be inaccurate. In addition, there may be a delay between events or circumstances adversely affecting the ability of an issuer to pay interest and/or repay principal and an agency's decision to downgrade a security.

Capitalization Risks. A client may be invested in small and mid cap stocks, which are often more volatile and less liquid than investments in larger companies. The frequency and volume of trading in securities of such companies may be substantially less than is typical of larger companies. Therefore, the securities of such companies may be subject to greater and more abrupt price fluctuations. In addition, small- and mid-size companies may lack the management experience, financial resources and product diversification of larger companies, making them more susceptible to market pressures and business failure.

Investment Style Risks. Investment styles or strategies that focus on growth stocks may perform better or worse than styles or strategies that focus on value stocks or that are broader or more diversified. Similarly, investment styles or strategies that focus on value stocks may perform better or worse than styles or strategies that focus on growth stocks or that are broader or more diversified. A particular style of investing may go out of favor at times and for extended

periods. Growth stocks are often characterized by high price-to-earnings ratios and may be more volatile than stocks with lower price-to-earnings ratios. Value stocks are subject to the risk that the broader market may not agree with the manager's assessment of, or recognize, the investments' intrinsic value.

Foreign Issuer and Investment Risks.

Securities of foreign issuers, ADRs, Global Depositary Receipts ("GDRs") and European Depositary Receipts ("EDRs"), and investments in foreign markets generally, are subject to certain inherent risks, such as political or economic instability of the country of issue, the difficulty of predicting international trade patterns and the possibility of imposition of exchange controls. Such securities may also be subject to greater fluctuations in price than securities of domestic corporations. Investors in foreign markets may face delayed settlements, currency controls and adverse economic developments as well as higher overall transaction costs. In addition, fluctuations in the U.S. dollar's value versus other currencies may enhance, erode, reverse gains or widen losses from investments denominated in foreign currencies. For instance, foreign governments may limit or prevent investors from transferring their capital out of a country. This may affect the value of a client's investment in the country that adopts such currency controls. Exchange rate fluctuations also may impair an issuer's ability to repay U.S. dollar denominated debt, thereby increasing the credit risk of such debt. In addition, there may be less publicly available information about a foreign company than about a domestic company. Foreign companies generally are not subject to uniform accounting, auditing and financial reporting standards comparable to those applicable to domestic companies. With respect to certain foreign countries, there is a possibility of expropriation or confiscatory taxation, or diplomatic developments, which could affect investment in those countries.

Emerging Markets Risks. Investments in emerging markets can involve risks in addition to and greater than those generally associated with investing in more developed foreign markets. The extent of economic development, political stability, market depth, infrastructure, capitalization, and regulatory oversight can be less than in more developed markets. Emerging market economies can be subject to greater social, economic, regulatory, and political

uncertainties. All of these factors can make emerging market securities more volatile and potentially less liquid than securities issued in more developed markets.

Cybersecurity Risks. With the increased use of technologies such as the Internet to conduct business, issuers of investments are susceptible to operational, information security and related risks. In general, cyber incidents can result from deliberate attacks or unintentional events. Cyber attacks include, but are not limited to, gaining unauthorized access to digital systems (e.g., through "hacking" or malicious software coding) for purposes of misappropriating assets or sensitive information, corrupting data, or causing operational disruption. Cyber attacks may also be carried out in a manner that does not require gaining unauthorized access, such as causing denial-of-service attacks on websites (i.e., efforts to make network services unavailable to intended users). Cyber incidents affecting issuers or their service providers have the ability to cause disruptions and impact business operations, potentially resulting in financial losses, interference with the ability to transact business, violations of applicable privacy and other laws, regulatory fines, penalties, reputational damage, reimbursement or other compensation costs, or additional compliance costs. Similar adverse consequences could result from cyber incidents affecting governmental and other regulatory authorities, exchange and other financial market operators, banks, brokers, dealers, insurance companies and other financial institutions and other parties. In addition, substantial costs may be incurred in order to prevent any cyber incidents in the future. While issuers and other parties may establish business continuity plans in the event of, and risk management systems to prevent, such cyber incidents, there are inherent limitations in such plans and systems including the possibility that certain risks have not been identified. As a result, client accounts and investments could be negatively impacted.

Government Obligation Risks. Client assets may be invested in securities issued, sponsored or guaranteed by the U.S. Government, its agencies and instrumentalities. However, no assurance can be given that the U.S. Government will provide financial support to U.S. Government-sponsored agencies or instrumentalities where it is not obligated to do so by law. For instance, securities issued by the Government National Mortgage

Association ("Ginnie Mae") are supported by the full faith and credit of the United States. Securities issued by the Federal National Mortgage Association ("Fannie Mae") and the Federal Home Loan Mortgage Corporation ("Freddie Mac") have historically been supported only by the discretionary authority of the U.S. Government. While the U.S. Government provides financial support to various U.S. Government-sponsored agencies and instrumentalities, such as those listed above, no assurance can be given that it will always do so.

Municipal Securities Risks. Repayment of municipal securities depends on the ability of the issuer or project backing such securities to generate taxes or revenues. Municipal securities may also decrease in value during times when tax rates are falling. Since interest income on municipal securities is normally not subject to regular federal income taxation, the attractiveness of municipal securities in relation to other investment alternatives is affected by changes in federal income tax rates applicable to, or the continuing federal tax-exempt status of, such interest income. Any proposed or actual changes in such rates or exempt status, therefore, can significantly affect the liquidity, marketability and supply and demand for municipal securities, which would in turn affect Baird's ability to acquire and dispose of municipal securities at desirable yield and price levels. Investment in tax-exempt debt obligations poses additional risks. In many cases, the IRS has not ruled on whether the interest received on a tax-exempt obligation is tax-exempt, and accordingly, purchases of these municipal securities are based on the opinion of bond counsel to the issuers at the time of issuance. Thus, there is a risk that interest may be taxable on a municipal security that is otherwise expected to produce tax-exempt interest.

Money Market Fund Risks. A money market fund is a type of mutual fund that generally invests in short-term debt instruments. Many investors use money market funds to store cash. There are three primary types of money market funds: (1) government money market funds (funds that invest nearly all assets in cash, government securities, and/or repurchase agreements collateralized by cash or government securities); (2) retail money market funds (funds that have policies and procedures reasonably designed to limit beneficial ownership to natural

persons); and (3) institutional money market funds (funds that permit beneficial ownership by institutions and natural persons). The rules governing money market funds vary based on the type of money market fund. Government and retail money market funds generally try to keep their net asset value (NAV) at a stable \$1.00 per share using special pricing and valuation conventions. Institutional money market funds are required to calculate their NAV in a manner such that the NAV will vary based upon the market value of assets and liabilities of the fund (also known as a "floating NAV"). An investment in a money market fund is not insured or guaranteed by the FDIC or any other government agency. Although some money market funds seek to preserve the value of an investment at \$1.00 per share, there can be no assurance that will occur, and it is possible to lose money should the fund value per share fall. In some circumstances, money market funds may be forced to cease operations when the value of a fund drops. In that event, the fund's holdings may be liquidated and distributed to the fund's shareholders. This liquidation process could take time to complete. During that time, the amounts a client has invested in the money market fund would not be available for purchases or withdrawals. In addition, retail and institutional money market funds are required to impose redemption fees (also known as liquidity fees) and suspend redemptions (also known as redemption gates) in certain circumstances. Government money market funds may also impose redemption fees and suspend redemptions in those same circumstances. More specific information about how a money market fund calculates its NAV and the circumstances under which it will impose a redemption fee or suspend redemptions is set forth in the prospectus for that money market fund.

Illiquid Securities and Liquidity Risks.

Liquidity risk is the risk that certain investments may be difficult or impossible to sell at the time and price that a client would like to sell. Clients may have to lower the price, sell other investments or forego an investment opportunity, any of which may have a negative effect on the management or performance of client accounts. The liquidity of a particular investment depends on the strength of demand for the investment, which is generally related to the willingness of broker-dealers to make a market for the investment as well as the interest of other

investors to buy the investment. During periods of economic uncertainty, significant economic and market downturns and periods in which financial services firms are unable to commit capital to make a market in, or otherwise buy, certain investments, a client may experience challenges in selling such investments at optimal prices. In addition, recent regulatory changes applicable to financial intermediaries that make markets in debt securities have restricted or made it less desirable for those financial intermediaries to hold large inventories of debt securities. Because market makers provide stability to a market through their intermediary services, a reduction in dealer inventories may lead to decreased liquidity and increased volatility in the fixed income markets. In the event the client directs Baird to liquidate an illiquid investment, the client should understand that Baird may have difficulty finding a buyer in the market for such investment and such investment may be held in the Account for a period of time while Baird attempts to satisfy the client's liquidation request.

Quantitative Strategy Risks. Some investment managers may employ quantitative investment methodologies or processes to make investment decisions. The success of the quantitative investment methodologies and processes used by investment managers depends on the analyses and assessments that were used in developing such methodologies and processes, as well as on the accuracy and reliability of models and data provided by third parties. Incorrect analyses and assessments or inaccurate or incomplete models and data would adversely affect performance. Additionally, an investment manager's methodologies and processes are predictive in nature, based on historical outcomes and trends. Certain low-probability events or factors that are assigned little weight may occur or prove to be more likely or may have more relevance than expected, for short or extended periods of time, which may adversely affect the portfolios generated by the investment manager's quantitative methodologies and processes. It is also possible that prices of securities may move in directions that were not predicted by the investment manager's quantitative methodologies and processes or may fail to move as much as predicted, for reasons that were not expected. There can be no assurance that these methodologies will enable a client to achieve the client's objective.

Technical Strategy Risks. Some investment managers may employ technical analysis or investment methodologies to make investment decisions or recommendations. The primary risk of using technical analysis is that past price and volume patterns and trends in the trading markets cannot predict future prices, volume patterns or trends. There is no guarantee that technical investment methods used are designed properly, are updated with new data as it becomes available, or can accurately predict future market or investment performance. In order for technical investment methods to work, there must be sufficient data about the markets available so that trends can be identified and predictions can be made. A technical method may fail to identify trends or be able to accurately predict future prices if a market does not have sufficient data or trends or if the market behaves erratically.

Concentration Risks. A client's Account may consist of a portfolio of securities that is concentrated in an issuer or group of issuers, an industry or economic sector or group of related industries or sectors, or concentrated in limited asset classes. Client accounts with concentrated positions are susceptible to greater volatility and increased risk of loss than an Account that is diversified across several issuers and industries or sectors and asset classes. A client should not engage in strategies using concentration unless the client is prepared to experience significant losses in the value of the client's Account.

Frequent Trading and Portfolio Turnover Risks. Some of the investment strategies offered to clients in this Brochure may involve frequent or active trading for client accounts, which could result in high portfolio turnover. Strategies that involve frequent or active trading increase the management and securities selection risks because the persons managing the accounts are making more trading decisions, which may prove to be incorrect. A portfolio with a high turnover rate will also incur more transaction costs than one with a lower rate. Higher transaction costs may negatively impact the return of the portfolio. High portfolio turnover may also cause a client to experience adverse tax consequences due to the fact that the client may have increased instances of realized gains and losses and such gains and losses may commonly be characterized as short term gains and losses under applicable tax law.

Asset-Backed Securities Risks. Asset-backed securities are securities secured or backed by mortgage loans, student loans, automobile loans, installment sale contracts, credit card receivables or other assets and are issued by entities such as commercial banks, trusts, financial companies, finance subsidiaries of industrial companies, savings and loan associations, mortgage banks and investment banks. These securities represent interests in pools of assets in which periodic payments of interest or principal on the securities are made, thus, in effect passing through periodic payments made by the individual borrowers on the assets that underlie the securities, net of any fees paid to the issuer or guarantor of the securities. Asset-backed securities are issued in multiple classes (or tranches) and their relative payment rights may be structured in many ways. Asset-backed securities may be subject to greater risk of default during periods of economic downturn than other instruments. Asset-backed securities also can be more sensitive to interest rate risk than other types of fixed income securities. Modest movements in interest rates (both increases and decreases) may quickly and significantly reduce the value of certain types of these securities. Asset-backed securities are subject to a number of other risks, including, but not limited to, market and valuation risks, liquidity risk, and prepayment risk.

Non-Rated, Split-Rated, and Below Investment Grade Securities (High Yield or "Junk" Bonds) Risks. Investing in securities or other investment products that are not rated, split-rated or are below investment grade (also known as high yield or "junk" bonds) involve significant, special risks. As a result, they may not be suitable for some clients. The risks associated with these investments include, but not limited to, price volatility risk, credit risk, default risk, and liquidity risk. Clients investing in securities or other investment products that are not rated, split-rated or are below investment grade should have a high tolerance for risk, including the willingness and ability to accept significant price volatility, potential lack of liquidity and potential loss of their investment.

Mutual Fund Risks. Mutual funds can have many different investment objectives and strategies, including equity, fixed income, balanced, international, and global strategies, and strategies that focus on a particular market capitalization, investment style, economic

industry or sector, or geographic region. Mutual funds have risks, which may include market risk, management and securities selection risk, investment objective and asset allocation risk, stock market risk, equity securities risk, common stock risk, fixed income securities risk, interest rate risk, credit risk, capitalization risk, investment style risk, foreign issuer and investment risk, and emerging market risk. *Certain mutual funds pursue Complex Strategies, which are subject to special risks.* The degree of these and other risks will vary depending on the type of mutual fund selected. Also, investment return and principal value will fluctuate, and shares, when redeemed, may be worth more or less than their original cost.

Exchange Traded Fund Risks. An ETF is different from a mutual fund in that an ETF does not sell its shares directly to public investors and does not redeem shares from public investors. Rather, shares of an ETF are commonly purchased or sold in the secondary market on a securities exchange, like common stocks. An ETF maintains a net asset value but, based on demand and other factors, the market price of shares of an ETF may vary from its net asset value. ETFs invest in and hold securities and other assets, such as stocks, bonds, commodities and currencies, and have stated investment objectives and principal strategies. ETFs can have many different investment objectives and strategies, including equity, fixed income, balanced, international, and global strategies, and strategies that focus on a particular market capitalization, investment style, economic industry or sector, or geographic region. Many ETFs seek to track the performance of an index or other underlying benchmark. Passively managed ETFs will not be able to replicate exactly the performance of the indices the ETFs track because the total return generated by the securities will be reduced by management fees, transaction costs and other expenses incurred by the ETF. ETFs have other risks, which may include market risk, management and securities selection risk, investment objective and asset allocation risk, stock market risk, equity securities risk, common stock risk, fixed income securities risk, interest rate risk, credit risk, capitalization risk, investment style risk, foreign issuer and investment risk, and emerging market risk. *Certain ETFs pursue Complex Strategies, which are subject to special risks.* The degree of these

and other risks will vary depending on the type of ETF selected.

Closed-End Fund Risks. Unlike mutual funds which continuously offer and redeem their shares on a daily basis at net asset value, closed-end funds typically raise money by selling a fixed number of shares of common stock in a single, one-time offering, much the way a company issues stock in an initial public offering. Closed-end funds can have many different investment objectives and strategies, including equity, fixed income, balanced, international, and global strategies, and strategies that focus on a particular market capitalization, investment style, economic industry or sector, or geographic region. Closed-end fund shares are not redeemable, meaning that investors cannot require closed-end funds to buy back their shares, although closed-end fund shares are listed and traded on an exchange. For many reasons, closed-end fund shares often trade at a discount to their net asset value and the market prices of closed end fund shares often fall below their public offering prices. Clients are therefore cautioned about buying shares of a closed-end fund in its initial public offering. Closed-end funds often engage in leverage to raise additional capital for purposes of making investments through borrowings and issuances of senior securities (such as preferred stock). Such leverage may present the opportunity to enhance potential returns but also involve the risk of exacerbating losses and depreciation in the value of the underlying securities. Closed-end funds have other risks, which may include market risk, management and securities selection risk, investment objective and asset allocation risk, stock market risk, equity securities risk, common stock risk, fixed income securities risk, interest rate risk, credit risk, capitalization risk, investment style risk, foreign issuer and investment risk, and emerging market risk. *Certain closed-end funds pursue Complex Strategies, which are subject to special risks.* Some closed-end funds are organized as interval funds, which differ from traditional closed-end funds in that their shares do not trade on the secondary market, but instead their shares are subject to repurchase offers from the fund. Closed-end funds structured as an interval fund will, therefore be relatively less liquid. Interval funds also often impose a redemption fee when shares are sold back to the fund. The degree of

these and other risks will vary depending on the type of close-end fund selected.

Unit Investment Trust Risks. A UIT is a pooled investment vehicle in which a portfolio of securities is selected by the sponsor and deposited into the trust for a specified period of time. The portfolio of a UIT is designed to follow an investment objective over a specified time period, although there is no guarantee that the objective will be met. UITs can have many different investment objectives and strategies, including equity, fixed income, balanced, international, and global strategies, and strategies that focus on a particular market capitalization, investment style, economic industry or sector, or geographic region. UITs are passively managed and follow a "buy and hold" strategy, meaning that UITs buy a fixed portfolio of securities and hold on to that portfolio until their termination date at which time the portfolio is liquidated with the net proceeds paid to investors. UITs, thus, generally have a relatively higher risk of loss than other funds in the event of adverse changes in market or economic conditions. UITs have other risks, which may include management and securities selection risk, investment objective and asset allocation risk, stock market risk, equity securities risk, common stock risk, fixed income securities risk, interest rate risk, credit risk, capitalization risk, investment style risk, foreign issuer and investment risk, and emerging market risk. *Certain UITs pursue Complex Strategies, which are subject to special risks.* The degree of these and other risks will vary depending on the type of UIT selected. Also, investment return and principal value will fluctuate, and units, if and when redeemed, may be worth more or less than their original cost.

Investment Fund Risks; Purchase and Redemption Risks. Investment Funds are generally subject to the same risks as the securities or other assets in which they invest. In addition, from time to time Baird, an FWG Consultant, or an investment manager may decide to add or remove an Investment Fund to or from an investment strategy or Service. In addition, they may decide to increase or decrease their clients' account allocations to an Investment Fund. In general, they will place transactions for all affected Accounts at one time, which may cause the fund to experience relatively large purchases or redemptions. Significant purchases and redemptions may adversely affect the fund in

question and consequently, a client's investment. An Investment Fund receiving large purchase orders may have difficulty investing the cash, which may have a negative impact on the fund's performance. An Investment Fund experiencing large redemption orders may have to sell portfolio securities, which may negatively impact performance and which may have negative tax consequences. Large redemptions could also reduce liquidity as the fund may suspend or delay redemptions. These risks are more pronounced with respect to newer Investment Funds and those with smaller asset sizes.

Non-Traditional Assets and Complex Strategies Risks

Non-Traditional Assets Risks. Non-Traditional Assets, such as real estate, commodities, currencies and private companies, are subject to risks that are different from, and in some instances, greater than, other assets like stocks and bonds. Some Non-Traditional Assets are less transparent and more sensitive to domestic and foreign political and economic conditions than more traditional investments. Non-Traditional Assets are also generally more difficult to value, less liquid, and subject to greater volatility compared to stocks and bonds.

Commodities Risks. Investments in commodities markets or a particular sector of the commodities markets, and investments in securities or other instruments denominated in or indexed or linked to commodities, are subject to certain risks. Those investments generally will subject a client Account to greater volatility than investments in traditional securities. The commodities markets are impacted by a variety of factors, including changes in overall market movements, domestic and foreign political and economic conditions, interest rates, inflation rates and investment and trading activities in commodities. Prices of commodities may also be affected by factors such as drought, floods, weather, livestock disease, embargoes, tariffs and other regulatory developments. The prices of commodities can also fluctuate widely due to supply and demand disruptions in major producing or consuming regions. Certain commodities may be produced in a limited number of countries and may be controlled by a small number of producers or groups of producers. As a result, political, economic and supply related events in such countries could have

a disproportionate impact on the prices of such commodities. No active trading market may exist for certain commodities investments, which may impair the value of the investments.

Currency Risks. Investments in currencies, and investments in securities or other instruments denominated in or indexed or linked to currencies, are subject to certain risks. Those investments are subject to all of the risks associated with foreign investing generally. In addition, currency markets generally are not as regulated as securities markets. Also, changes in currency exchange rates could adversely impact the investment. Devaluation of a currency by a country will also have a significant negative impact on the value of any investment denominated in that currency. Currency investments may also be positively or negatively affected by a country's strategies intended to make its currency stronger or weaker relative to other currencies.

Leverage and Margin Risks. Leveraging strategies may amplify the impact of any decrease in the value of underlying securities in the client's Account, thereby increasing a client's risk of loss. The use of leverage may also increase an Account's volatility. Strategies involving margin can cause a client to lose more money than deposited in the client's margin account. A client should not engage in strategies involving leverage or margin unless the client is prepared to experience significant losses in the value of the client's Account.

Short Sales Risks. Short selling runs the risk of loss if the price of the securities sold short does not decline below the price at which they were originally sold. This risk of loss is theoretically unlimited, as there is no cap on the amount that the price of a security may appreciate. In addition, a lender may request, or market conditions may dictate, that securities sold short be returned to the lender on short notice, which may result having to buy the securities sold short at an unfavorable price. A client should not engage in short sales unless the client is prepared to experience significant losses in the client's Account.

Derivative Instrument Risks. The values of options, convertible securities, futures, swaps, forward contracts and other derivative

instruments is derived from an underlying asset, such as a security, commodity, currency, or index. Derivative instruments often have risks similar to the underlying asset, however, in certain cases, those risks are greater than the risks presented by the underlying asset. Derivative instruments may experience dramatic price changes and imperfect correlations between the price of the derivative and the underlying asset, which may increase volatility. Derivatives generally create leverage, and as a result, a small movement in the underlying asset's value can result in large change in the value of the derivative instrument. Derivatives are also subject to liquidity risk, interest rate risk, market risk, credit risk, management risk and counterparty risk. The use of these instruments is not appropriate for some clients because they involve special risks. A client should not invest in these instruments unless the client is prepared to experience volatility and significant losses in the client's Account.

Options Risks. In purchasing a put or call option, the purchaser faces the risk of loss of the premium paid for the option if the market price moves in a direction opposite to what the purchaser had expected. In selling or writing an option, the seller faces significantly more risk. A seller of a call option faces the risk of significant loss if the prevailing market price of the underlying security or index increases above the strike price, and a seller of a put option faces the risk of significant loss if the prevailing market price of the underlying security or index decreased below the strike price.

Hedging Risks. When a derivative instrument is used as a hedge against an opposite position, any loss on the derivative instrument should be substantially offset by gains on the hedged investment, and vice versa. Although hedging can be an effective way to reduce the investment risk, it may not always perfectly offset one position with another. As a result, there is no assurance that hedging transactions will be effective.

Complex Investment Product Risks

Hedge Funds and Funds of Hedge Fund Risks. Hedge funds typically engage in one or more Complex Strategies, including the use of Non-Traditional Assets, short sales, leverage and other derivative instruments. Funds of hedge funds typically invest substantially all of their

assets in other hedge funds. Hedge funds and funds of hedge funds have unique tax characteristics. A client should consult with a tax advisor before investing in those funds. Some hedge funds and funds of hedge funds are subject to limited regulation and offer limited disclosure and transparency. Also, the costs of hedge funds and funds of hedge funds are typically higher than other types of funds. Investment advisers or managers for those funds often receive a management fee plus an incentive or performance-based fee. Because of the existence of a performance-based fee, fund managers may be motivated to make riskier investments that have the potential for significant growth in value. Hedge funds and funds of hedge funds are also subject to a higher risk of incorrect valuations. Many hedge funds hold investments for which market quotations are not readily available, which necessitates the use of "fair value" pricing. Fair value pricing is an inherently subjective process and may not accurately reflect the prices that can actually be obtained upon sale of the assets for which fair values are used. Investments in hedge funds and funds of hedge funds also have reduced liquidity compared to other investments and are generally subject to a higher risk of volatility. Investing in hedge funds and funds of hedge funds involves other special risks, including, but not limited to, risks associated with Non-Traditional Assets, short sales, leverage, derivative instruments, and Complex Strategies. Other risks may include: market risk, management and securities selection risk, investment objective and asset allocation risk, stock market risk, equity securities risk, common stock risk, fixed income securities risk, interest rate risk, credit risk, capitalization risk, investment style risk, foreign issuer and investment risk, and emerging market risk. *Hedge funds and funds of hedge funds are complex investments that have significant, special risks. As a result, they may not be suitable for some clients. Clients investing in hedge funds or funds of hedge funds should have a high tolerance for risk, including the willingness and ability to accept significant price volatility, potential lack of liquidity and potential loss of their investment.*

Private Equity Funds and Funds of Private Equity Funds Risks. Private equity funds are pools of actively managed capital that invest primarily in private companies with the intent of creating value in the companies in which they invest by improving operations, reducing costs,

selling non-core assets and maximizing cash flow. Private equity funds usually have an investment objective or strategy that may focus on companies in certain sectors, industries, geographic regions, size ranges or stages of development or operations, or on certain types and sizes of investments. Funds of private equity funds typically invest substantially all of their assets in other private equity funds. Private equity funds and funds of private equity funds have unique tax characteristics. A client should consult with a tax advisor before investing in those funds. Private equity funds and funds of private equity funds are subject to limited regulation and offer limited disclosure and transparency. Also, the costs of private equity funds and funds of private equity funds are typically higher than other types of funds. Investment advisers or managers for those funds often receive a management fee plus an incentive fee or carried interest. Private equity funds and funds of private equity fund are also generally subject to administrative service fees and portfolio company transaction fees. Because of the existence of a carried interest, fund managers may be motivated to make riskier investments that have the potential for significant growth in value. Investments in private equity funds and funds of private equity funds also have reduced liquidity compared to other investments. Investors should not expect to receive distributions from a fund for a number of years. Private equity investing is very risky. Many investments made in portfolio companies are not profitable. In addition, investments made by private equity funds and funds of private equity funds may be concentrated in one or more economic industries or sectors, geographic regions, stages of development or operation, or sizes of companies. Investing in private equity funds and funds of private equity funds involves other special risks, including, but not limited to, dependence upon key personnel and conflicts of interest risks. Other risks may include: market risk, management and securities selection risk, investment objective and asset allocation risk, interest rate risk, credit risk, capitalization risk, investment style risk, foreign issuer and investment risk, and emerging market risk. *Private equity funds and funds of private equity funds are complex investments that have significant, special risks. As a result, they may not be suitable for some clients. Clients investing in private equity funds and funds of private equity funds should have a high tolerance for risk,*

including the willingness and ability to accept lack of liquidity and potential loss of their investment.

Private Credit Funds or Floating Rate Bond Fund Risks.

Private credit funds or floating rate bond funds invest in floating rate bonds, also known as floating rate corporate debt, floating rate loans or floating rate bank loans, which are a type of fixed income security that have unique characteristics and risks compared to traditional bonds. Floating rate bonds are not issued by a company directly to the public. Instead, financial institutions provide loans to companies that need funding. The loans are then combined and repackaged for sale to investors. Sometimes, repayment of the loan is secured by assets of the companies obtaining the loans. However, the companies underlying floating rate bonds are frequently those that have low or no credit ratings. Thus, floating rate bonds generally are subject the same risks as below investment grade or “junk” bonds. Unlike traditional bonds, interest payments on floating-rate bonds, are determined by a reference interest rate, such as the federal funds rate. The interest rate of floating rate bonds is reset periodically to the then-existing reference rate. Consequently, the interest payments made on those bonds vary, or “float”, in accordance with reference rate. Because the interest rate is periodically reset to a reference interest rate, floating-rate bonds are generally subject to lower interest rate risk compared to traditional bonds. Floating rate bonds are generally resold in a private secondary market, which may be subject to irregular trading activity and settlement periods. As a result, floating rate bonds are subject to greater liquidity risk than other investments.

Exchange Traded Notes Risks. An ETN is a type of debt security that trades on an exchange and provides a return linked to the performance of an underlying benchmark. The underlying benchmark can be a particular security, bond, commodity, currency, or other Non-Traditional Asset type, a group or basket of companies, securities, commodities, currencies, derivative instruments, Non-Traditional Asset investments or other assets, or an index or other benchmark linked to stocks, market volatility, bonds, interest rates, Treasury yields, yield curves and spreads, derivative instruments, strategies, commodities, currencies or other assets. ETNs trade on exchanges throughout the day at prices determined by the market. Unlike ETFs, issuers of

ETNs do not buy or hold assets to replicate or approximate the performance of the underlying benchmark. Also in contrast to ETFs, ETNs also do not calculate their net asset value, are generally not redeemable on a daily basis, and are not registered under the Investment Company Act of 1940. Issuers may also have the right and option to redeem ETNs. Redemptions are made at the ETN's "indicative value" or "closing indicative value". An ETN's closing indicative value is computed by the issuer and is distinct from an ETN's market price, which is the price at which an ETN trades in the secondary market. Issuers of ETNs may also issue and redeem notes as a means to keep the ETN's market price in line with its indicative value, which have caused significant fluctuations in ETN prices. Investing in ETNs involves special risks, including, but not limited to, risks associated with Non-Traditional Assets and derivative instruments and the risk that the actual market price for an ETN may vary significantly from the indicative value computed by the issuer. Other risks may include: market risk, management and securities selection risk, investment objective and asset allocation risk, stock market risk, equity securities risk, common stock risk, fixed income securities risk, interest rate risk, credit risk, capitalization risk, investment style risk, foreign issuer and investment risk, and emerging market risk. *ETNs are complex investments and involve significant, special risks. As a result, ETNs may not be suitable for some clients.*

Managed Futures Risks. Managed futures are commodity pools (typically structured as investment partnerships) managed by a futures trading adviser that trade speculatively in various derivative instruments and other investments. There are significantly higher fees and expenses associated with investments in managed futures than other types of funds. Sponsors or managers for these pools often receive a management fee plus incentive or performance-based fee. Because of the existence of a performance-based fee, managers may be motivated to make riskier investments that have the potential for significant growth in value. Managed futures may seek exposure to different asset classes, such as equity securities, fixed income securities, commodities (such as metals, agricultural products, and energy products), currencies, interest rates, and indices. Managed futures often obtain this exposure through derivative instruments, which may be traded on U.S. or foreign exchanges or markets.

Managed futures often employ computerized, systematic and often proprietary trading models and systems. Investing in managed futures involves special risks, including, but not limited to, liquidity risks and risks associated with commodities, currencies, and other Non-Traditional Assets, leverage, derivative instruments and Complex Strategies. Other risks may include: market risk, management and securities selection risk, investment objective and asset allocation risk, stock market risk, equity securities risk, common stock risk, fixed income securities risk, interest rate risk, credit risk, foreign issuer and investment risk, and emerging market risk. *Managed futures can be speculative investments because of the types of investments they make and they involve significant, special risks. As a result, they may not be suitable for some clients. Clients investing in these funds should have a high tolerance for risk, including the willingness and ability to accept significant price volatility, potential lack of liquidity and potential loss of their investment.*

Leveraged Fund and Inverse Fund Risks.

Leveraged funds and inverse funds may be structured as ETNs, ETFs or open-end mutual funds. Leveraged funds seek to deliver multiples of the performance of the index or benchmark they track. Inverse funds seek to deliver the opposite of the performance of the index or benchmark they track. Leveraged inverse funds seek to achieve a return that is a multiple of the inverse performance of the underlying index. Most leveraged and inverse funds "reset" daily, meaning that they are designed to achieve their stated objectives on a daily basis. Because of the effects of compounding, volatility and the fund expenses, the returns of a leveraged or inverse fund over longer periods of time can differ significantly from the performance (or inverse of the performance) of their underlying index or benchmark during the same period of time. To achieve their objectives, leveraged and inverse funds typically employ aggressive investment techniques, such as the use of leverage, short sales, swap contracts, futures, options and other derivative instruments. Investing in leveraged funds and inverse funds involves special risks, including, but not limited to, risks associated with Non-Traditional Assets, short sales, leverage, and derivative instruments. Other risks may include: market risk, management and securities selection risk, investment objective and asset allocation risk, stock market risk, equity securities risk,

common stock risk, fixed income securities risk, interest rate risk, credit risk, foreign issuer and investment risk, and emerging market risk. *Leveraged funds and inverse funds are complex investments that have an increased risk of loss compared to other funds and they involve significant, special risks. As a result, they may not be suitable for some clients. A client should not invest in these securities unless the client is prepared to experience significant losses in the value of the client's Account.*

Structured Products Risks. Structured products are a hybrid between two asset classes (typically issued in the form of a CD or note) but instead of having a pre-determined rate of interest, the return is linked to the performance of an underlying asset class, such as single security or basket or index of securities; a commodity or basket or index of commodities, including futures; and a foreign currency or basket of foreign currencies. Investing in structured products involves special risks, including, but not limited to, risks associated with derivative instruments. Other risks may include: market risk, management and securities selection risk, investment objective and asset allocation risk, stock market risk, equity securities risk, common stock risk, fixed income securities risk, interest rate risk, credit risk, foreign issuer and investment risk, emerging market risk, commodities risk and currency risk. *Structured products are complex investments and involve special risks. As a result, they may not be suitable for some clients.*

Real Estate Investment Trusts Risks. A REIT is a corporation, trust or association that owns and typically operates income-producing real estate or real estate-related assets. The income-producing real estate assets owned by a REIT may include office buildings, shopping malls, multi-family housing, student housing, hotels, resorts, hospitals and health care facilities, self-storage facilities, data centers, warehouses, telecommunications facilities, and mortgages or loans. Many REITs are registered with the SEC and their common stock and preferred stock are publicly traded on a stock exchange. These are known as publicly traded REITs. Others may be registered with the SEC but are not publicly traded. These are known as private REITs (also known as non-traded or non-exchange traded REITs). Private REITs are generally subject to limited regulation and offer limited disclosure and

transparency. The shareholders of a REIT are responsible for paying taxes on the dividends that they receive and on any capital gains associated with their investment in the REIT. Dividends paid by REITs generally are treated as ordinary income and are not entitled to the reduced tax rates on other types of corporate dividends. Prices of REIT securities and trading volumes may be more volatile than other investments. Many REITs focus on a particular sector of the real estate market, such as apartments, student housing, hotels and hospitality, health care, office buildings, shopping malls, warehouses, self-storage facilities and the like. Those REITs are subject to risks associated with sectors in which they are focused. Additionally, many REITs may own properties that are concentrated in a particular geographic region or regions, which subject them to the risk of deteriorating economic conditions in those areas. Investing in REITs involves other special risks, including, but not limited to, real estate portfolio risk (including development, environmental, competition, occupancy and maintenance risk), liquidity risk, leverage risk, distribution risk, capital markets access risk, growth risk, counterparty risk, conflicts of interest risk, dependence upon key personnel risk, and regulatory risk. Other risks may include: market risk, management and securities selection risk, investment objective and asset allocation risk, stock market risk, equity securities risk, interest rate risk, credit risk, foreign issuer and investment risk, and emerging market risk. *REITs involve significant, special risks and may not be suitable for some clients. Clients investing in REITs should have a high tolerance for risk, including the willingness and ability to accept significant price volatility and volatility of regular distribution amounts, potential lack of liquidity and potential loss of their investment.*

Business Development Company Risks. A BDC is typically a domestic, closed-end investment company that is operated for the purpose of making equity and debt investments in small and developing businesses, as well as financially troubled businesses. As a result, investments made by BDCs tend to be risky and speculative. Investment advisers or managers for BDCs often receive a management fee plus incentive or performance-based fee. Because of the existence of a performance-based fee, managers may be motivated to make riskier investments that have the potential for significant growth in value. BDCs commonly use borrowings

or leverage to make investments in portfolio companies. Adverse interest rate movements can negatively impact a BDC's ability to make investments. Investments made by BDCs are typically illiquid, and valuing such investments is challenging. It is possible that valuations on investments used are materially different from the values that BDCs will ultimately receive upon disposition of those investments. Changing market and economic conditions affecting a BDC's investments may cause significant volatility in the BDC's net asset value and stock price. Due to the nature of BDCs' investments, securities issued by BDCs are subject to greater liquidity risk than other investments. A debt security or preferred stock issued by a BDC, in many cases, is non-rated or is rated below investment grade, which can carry its own risks. Investing in BDCs involves other special risks, including, but not limited to, portfolio company credit and investment risk, leverage risk, capital markets access risk, dependence upon key personnel risk, and regulatory risk. Other risks may include: market risk, management and securities selection risk, investment objective and asset allocation risk, stock market risk, equity securities risk, common stock risk, fixed income securities risk, and interest rate risk. *BDCs can be speculative investments because of the types of investments they make and involve significant, special risks. As a result, BDC investments may not be suitable for some clients. Clients investing in BDCs should have a high tolerance for risk, including the willingness and ability to accept significant price volatility, potential lack of liquidity and potential loss of their investment.*

Master Limited Partnership Risks. An MLP is a form of publicly-traded partnership that is taxed as a partnership. MLPs have unique tax characteristics. A client should consult with a tax advisor before investing in MLPs. An MLP must generally earn at least 90% of its income from certain qualifying sources, which includes income and gains from certain activities involving natural resources such as oil, natural gas, natural gas liquids, refined petroleum products, coal, carbon dioxide and biofuels. An MLP is generally structured as a limited partnership or limited liability company and managed and operated by a general partner or manager. Owners of an MLP are called "limited partners" or "unit holders". Unit holders own interests or units in the MLP ("units") that are traded on a stock exchange. MLPs make distributions to unit holders of their

available cash flows. Many MLPs focus on a particular sector or industry. Those MLPs are subject to risks associated with sectors or industries in which they are focused. The value of an investment in an MLP and the amount of distributions it makes may depend on the prices of the underlying commodity, such as oil or natural gas. Many MLPs are sensitive to changes in the prevailing level of commodity prices. MLPs have also shown sensitivity to interest rate movements. Investing in MLPs involves other special risks, including, but not limited to, macroeconomic risk, interest rate risk, liquidity risk, operating risk, capital markets access risk, growth risk, distribution risk, conflicts of interest risk, and regulatory risk. *MLPs are complex investments that have significant, special risks. As a result, MLPs may not be suitable for some clients. Clients investing in MLPs should have a high tolerance for risk, including the willingness and ability to accept potential lack of liquidity and potential loss of their investment.*

Additional information about certain Complex Investment Products and other investments pursuing Complex Strategies, including the risks associated with those investments, is available on Baird's website at www.rwbaird.com/disclosures and on FINRA's website at www.finra.org/Investors. A client is encouraged to read the disclosure documents included on those websites carefully before investing.

Risks Associated with Certain Investment Objectives and Asset Allocation Strategies

Each Account is subject to the risks associated with the investments in the Account. Generally, an Account will be subject to the risks associated with the portfolio listed below that corresponds to the investment objective of the Account or the asset allocation strategy pursued by the Account.

All Growth Portfolio. An All Growth Portfolio will generally be invested in a manner that seeks to provide growth of capital. All Growth Portfolios have historically experienced high fluctuations in annual returns and overall market value, typically as a result of changes to market and economic conditions. The Portfolio's investments are subject to a high risk of price declines, especially during periods when stock markets in general are declining. An All Growth Portfolio's primary risks generally include: market risk, management and

securities selection risk, investment objective and asset allocation risk, stock market risk, equity securities risk, common stock risk, and capitalization risks. Depending upon the Portfolio's specific investments, the Portfolio may also be subject to other primary risks, including investment style risks, foreign issuer and investment risks, emerging market risks, fixed income security risks, below investment grade (high yield or "junk" bonds) securities risks, and the risks described under the headings "Non-Traditional Assets and Complex Strategies Risks" and "Complex Investment Product Risks" above.

Capital Growth Portfolio. A Capital Growth Portfolio will generally be invested in a manner that seeks to provide growth of capital. Capital Growth Portfolios have historically experienced moderately high fluctuations in annual returns and overall market value, typically as a result of changes to market and economic conditions. The Portfolio's investments are subject to a risk of price declines, especially during periods when stock markets in general are declining. A Capital Growth Portfolio's primary risks generally include: market risk, management and securities selection risk, investment objective and asset allocation risk, stock market risk, equity securities risk, common stock risk, and capitalization risks. Depending upon the Portfolio's specific investments, the Portfolio may also be subject to other primary risks, including investment style risks, foreign issuer and investment risks, emerging market risks, fixed income securities risk, interest rate risk, credit risk, asset-backed securities risks, below investment grade (high yield or "junk" bonds) securities risks, and the risks described under the headings "Non-Traditional Assets and Complex Strategies Risks" and "Complex Investment Product Risks" above.

Growth with Income Portfolio. A Growth with Income Portfolio will generally be invested in a manner that seeks to provide moderate growth of capital and some current income. Growth with Income Portfolios have historically experienced moderate fluctuations in annual returns and overall market value, typically as a result of changes to market and economic conditions and interest rates. The Portfolio's investments are subject to a risk of price declines, especially during periods when stock markets in general are declining or when interest rates are rising. A Growth with Income Portfolio's primary risks generally include: market risk, management and

securities selection risk, investment objective and asset allocation risk, stock market risk, equity securities risk, common stock risk, fixed income securities risk, interest rate risk, credit risk, and capitalization risks. Depending upon the Portfolio's specific investments, the Portfolio may also be subject to other primary risks, including investment style risks, foreign issuer and investment risks, emerging market risks, asset-backed securities risks, below investment grade (high yield or "junk" bonds) securities risks, and the risks described under the headings "Non-Traditional Assets and Complex Strategies Risks" and "Complex Investment Product Risks" above.

Income with Growth Portfolio. An Income with Growth Portfolio will generally be invested in a manner that seeks to provide current income and some growth of capital. Income with Growth Portfolios have historically experienced moderate fluctuations in annual returns and overall market value, typically as a result of changes to interest rates and market and economic conditions. The Portfolio's investments are subject to a risk of price declines, especially during periods when interest rates are rising or when stock markets in general are declining. An Income with Growth Portfolio's primary risks generally include: market risk, management and securities selection risk, investment objective and asset allocation risk, fixed income securities risk, interest rate risk, credit risk, money market fund risk, stock market risk, equity securities risk, common stock risk, and capitalization risks. Depending upon the Portfolio's specific investments, the Portfolio may also be subject to other primary risks, including investment style risks, foreign issuer and investment risks, emerging market risks, asset-backed securities risks, below investment grade (high yield or "junk" bonds) securities risks, and the risks described under the headings "Non-Traditional Assets and Complex Strategies Risks" and "Complex Investment Product Risks" above.

Conservative Income Portfolio. A Conservative Income Portfolio will generally be invested in a manner that seeks to provide current income. Relative to the portfolios described above, Conservative Income Portfolios have historically experienced smaller fluctuations in annual returns and overall market value as a result of changes in stock market conditions, but have experienced fluctuations in relation to changes in interest rates and economic conditions. The Portfolio's investments are subject to risk of price declines,

especially during periods when interest rates are rising. A Conservative Income Portfolio's primary risks generally include: market risk, management and securities selection risk, investment objective and asset allocation risk, fixed income securities risk, interest rate risk, credit risk, money market fund risk, equity securities risk, and common stock risks. Depending upon the Portfolio's specific investments, the Portfolio may also be subject to other primary risks, including investment style risks, foreign issuer and investment risks, asset-backed securities risks, and below investment grade (high yield or "junk" bonds) securities risks.

Capital Preservation Portfolio. A Capital Preservation Portfolio will generally be invested in a manner that seeks to preserve capital while generating current income. Relative to the portfolios described above, Capital Preservation Portfolios have historically experienced smaller fluctuations in annual returns and overall market value as a result of changes in stock market conditions, but have experienced fluctuations in relation to changes in interest rates and economic conditions. The Portfolio's investments are subject to risk of price declines, especially during periods when interest rates are rising. A Capital Preservation Portfolio's primary risks generally include: market risk, management and securities selection risk, investment objective and asset allocation risk, fixed income securities risk, interest rate risk, credit risk, and money market fund risk. Depending upon the Portfolio's specific investments, the Portfolio may also be subject to other primary risks, including foreign issuer and investment risks, asset-backed securities risks, and below investment grade (high yield or "junk" bonds) securities risks.

Opportunistic Portfolio. An Opportunistic Portfolio will generally be invested in a manner that seeks to provide long term growth through capital appreciation and/or income by utilizing an active management style that shifts the percentage of assets held in various categories to take advantage of market pricing anomalies, strong market sectors, the current interest rate environment and/or other macro-economic trends to achieve growth while accounting for a client's specific short, intermediate and long term investment and/or cash flow needs. Depending upon the investment strategy used, some Opportunistic Portfolios have historically experienced high fluctuations in annual returns

and overall market value, typically as a result of changes to market and economic conditions. Depending upon the investment strategy used and the investments made, the Portfolio's investments may be subject to a high risk of price declines, especially during periods when stock markets in general are declining. An Opportunistic Portfolio's primary risks generally include: market risk, management and securities selection risk, investment objective and asset allocation risk, stock market risk, equity securities risk, common stock risk, and capitalization risks. Depending upon the Portfolio's specific investments, the Portfolio may also be subject to other primary risks, including investment style risks, foreign issuer and investment risks, emerging market risks, fixed income security risks, below investment grade (high yield or "junk" bonds) securities risks, and the risks described under the headings "Non-Traditional Assets and Complex Strategies Risks" and "Complex Investment Product Risks" above.

Additional Considerations. *A client should note that an Account pursuing a particular investment objective or asset allocation strategy will from time to time be subject to actual risks that are higher or lower than, or different from, the risks described above under certain circumstances. See "Investment Strategies and Methods of Analysis—Investment Strategies—Important Information about Implementation of Investment Objectives and Investment Strategies" above for more information.* In addition to the specific risks described above, a client's Account may be subject to additional risks, depending upon the particular investments in the client's Account. A client should discuss the risks of particular investments with the client's FWG Consultant. A client should also note that there is no guarantee as to how an Account will perform in the future. It is possible that an Account could experience more dramatic return or market value fluctuations than occurred in the past.

Available Investment Product Risks

The use of Available Investment Products, including SMA Strategies made available under the BSN and DC Programs, are subject to additional risks compared to the use of Baird recommended investment products. Available Investment Products are investment products that generally do not meet the qualifications and standards that Baird establishes for its

recommended product lists. As a result, there is a higher likelihood that some Available Investment Products will have poor performance and will significantly underperform compared to an applicable benchmark index or peer group. Available Investment Products are also subject to significantly less rigorous review by Baird compared to recommended investment products. Thus, if an Available Investment Product experiences significant performance problems or if the manager or sponsor of an Available Investment Product experiences significant management, organizational, operational, compliance, legal, regulatory or other problems, there is a higher risk that the Available Investment Product will be made available (and will continue to be made available) to clients by Baird. An investment by a client in an Available Investment Product that experiences the occurrence of any such event could negatively impact the client's Account. Available Investment Products should only be used by a client if the client wishes to take more responsibility for monitoring and managing the assets in the client's Account, the list of recommended products does not contain an investment product that meets the client's particular needs, and the client understands the risks of doing so.

Recent Events

In response to the financial crisis that began in 2008, the Federal Reserve took extraordinary steps to support financial markets and the U.S. economy, including various bond buying or quantitative easing ("QE") programs as well as maintaining their policy interest rate at historically low levels. In more recent years, the Federal Reserve undertook a policy rate normalization process, raising its policy rate, the overnight Federal Funds rate. However, in response to market volatility late in 2018 and signs of slowing global economic activity in early 2019, and the Coronavirus (COVID-19) outbreak in early 2020, the Federal Reserve lowered its policy rate in the second half of 2019 and in the first calendar quarter of 2020. There is uncertainty regarding the long-term impact of low interest rates and the potential dependency on historically low interest rates to support economic growth.

The outbreak of the Coronavirus (COVID-19) presents a global health issue and a risk to the global economy. Efforts to limit the spread of the virus have included travel restrictions and

business shutdowns in an effort to limit the spread of the virus. U.S. and international markets have experienced a period of significant volatility recently as a result of the, at this point, unknown full global humanitarian, social and economic impact of the Coronavirus (COVID-19). Global economic growth may be severely negatively impacted as a result.

A United States ("US") presidential election will take place in November of 2020. The financial markets may experience periods of heightened volatility as investors anticipate the election's outcome as well as the potential impact of policy positions put forth by the candidates.

Beginning in 2018, the U.S. announced the first of several tariffs on products produced in the People's Republic of China. Tariffs have the potential to negatively impact global trade and economic growth. As a result of the tariffs, some companies face higher input costs and increased uncertainty over end demand for affected products which could negatively impact such companies' profitability. The ability of countries to effectively resolve meaningful trade disagreements is uncertain.

In June 2016, the United Kingdom ("UK") voted to leave the European Union ("EU") following a referendum referred to as "Brexit." After several delays, the UK formally left the EU at the end of January 2020. However, there remains uncertainty regarding Brexit's ramifications, and the range of possible political, regulatory, economic, and market outcomes are difficult to predict. The negative impact could be significant, potentially resulting in increased volatility and illiquidity and lower economic growth for companies that rely significantly on Europe for their business activities and revenues.

It is possible that these or other geopolitical events could have an adverse effect on a client's Account.

Voting Client Securities

Non-Discretionary Accounts

With respect to any Accounts over which the client retains discretionary investment authority, a client retains the right to vote proxies with respect to the securities held in such Accounts. Accordingly, the client is responsible for voting proxies and otherwise addressing all matters

submitted for consideration by security holders, and FWG and Baird are under no obligation to take any action or render any advice regarding such matters. The client's FWG Consultant may, upon the client's request, provide advice on proxy voting or what other action the client could take.

Separately Managed Accounts

Under the FWG Recommended Managers Service, Baird SMA Network Program and Dual Contract Program, a client may retain the right to vote proxies with respect to the securities held in the client's Account, or the client may delegate such right to the investment manager selected to manage the client's Account (which may include Baird, the Overlay Manager or an Implementation Manager). A client may select either option by making the appropriate election in the client's advisory agreement (and in the case of a dual contract arrangement under the Dual Contract Program, by providing proper instructions to the manager directly). For information about a manager's voting policies and procedures, clients should review the manager's Form ADV Part 2A Brochure.

Discretionary Services

Under the FWG Investment Management Service, a client may retain the right to vote proxies with respect to the securities held in the client's Account, or a client may delegate such right to Baird.

If a client retains proxy voting authority, Baird will forward proxy materials that Baird actually receives to the client. The client will then be solely responsible for analyzing the materials and casting the vote.

If a client delegates voting authority to Baird, Baird will vote proxies solicited by, or with respect to, securities held in the client's Account for the exclusive benefit of the client and in accordance with policies and procedures adopted by Baird.

Baird has adopted written policies and procedures that are reasonably designed to ensure that it votes client securities in the best interests of clients. Those procedures address material conflicts of interest that may arise between Baird's interests and those of its clients. Although a description of Baird's proxy voting policies and procedures is provided below, Baird will furnish a copy of its proxy voting policies and procedures to

clients upon their request. Additionally, clients may obtain information on how Baird actually voted proxies with respect to the securities held in their accounts by contacting their FWG Consultant or by calling (414) 765-3500.

In situations in which a client has delegated to Baird voting authority with respect to securities in the client's Account, Baird will vote proxies in a manner that Baird believes is consistent with the client's best interests. Baird utilizes an independent provider of proxy voting and corporate governance services, currently Institutional Shareholder Services ("ISS"), to analyze proxy materials and votes and make independent voting recommendations. ISS provides proxy voting guidelines regarding its position on various matters presented by companies to their shareholders for consideration. Baird will typically vote shares in accordance with the recommendations made by ISS. However, ISS's guidelines are not exhaustive, do not address all potential voting issues, and do not necessarily correspond with the opinions of FWG Consultants. In the event the client's FWG Consultant believes the ISS recommendation is not in the best interest of the client, the FWG Consultant will bring the issue to Baird's Proxy Voting Sub-Committee through a proxy challenge process. The Sub-Committee will then be responsible for determining how the vote will be cast. The decision made by the Proxy Voting Sub-Committee on the proxy challenge applies to all advisory accounts managed by the FWG Consultant (or team of FWG Consultants), unless the client has directed Baird to utilize specific voting guidelines (e.g., Taft-Hartley guidelines). For those matters for which the independent proxy voting service does not provide a specific voting recommendation, each FWG Consultant will cast the vote in a manner he or she believes is in the best interest of clients. The votes cast for a client's Account may differ from those votes cast for other Baird clients based on differing views of FWG Consultants and other Baird portfolio managers.

The proxy voting policies and procedures also address instances in which Baird's interests may appear to conflict with client interests, such as when Baird or an affiliate of Baird is managing or administering (or seeking to manage or administer) a corporate retirement, pension or employee benefit plan or providing (or seeking to provide) advisory or other services to a company

whose management is soliciting proxies. In such instances, there may be a concern that Baird would be inclined to vote in favor of management because of Baird's relationship or pursuit of a relationship with the company. In situations where there is a potential conflict of interest, Baird's Proxy Voting Sub-Committee will determine the nature and materiality of the conflict. If the conflict is determined to not be material, the Sub-Committee will vote the proxy in a manner the Sub-Committee believes is in the best interests of the client and without consideration of any benefit to Baird or its affiliates. If the potential conflict is determined to be material, Baird's Proxy Voting Sub-Committee will take one of the following steps to address the potential conflict: (1) cast the vote in accordance with the recommendations of ISS or other independent third party; (2) refer the proxy to the client or to a fiduciary of the client for voting purposes; (3) suggest that the client engage another party to determine how the proxy should be voted; (4) if the matter is not addressed by ISS, vote in accordance with management's recommendation; or (5) abstain from voting.

While Baird uses its best efforts to vote proxies, there are instances when voting is not practical or is not, in Baird's or FWG Consultants' view, in the best interest of clients. For example, casting a vote on a foreign security may involve additional costs or may prevent, for a period of time, sales of shares that have been voted. Also, when a client has entered into a securities lending program, Baird generally will not seek to recall the securities on loan for the purpose of voting the securities; however, Baird reserves the right to recall the shares on loan on a best efforts basis if the client's FWG Consultant becomes aware of a proxy proposal where the proxy vote is materially important to the client's Account.

In addition to the services described above, Baird has engaged ISS for vote execution and record-keeping services.

Other Proxy Voting Information

Clients wishing to direct particular votes once they have granted Baird discretionary voting authority may do so by contacting their FWG Consultant. However, if Baird has been granted discretionary voting authority, neither FWG nor Baird will provide a client with notice that Baird has received a proxy solicitation, nor will they

consult with the client before casting a vote, unless the client otherwise directs them to do so.

Except to the extent a client has delegated proxy voting authority to Baird, FWG and Baird have no authority, direct or implicit, and accept no responsibility for taking any action or rendering any advice with respect to the voting of proxies related to securities held in a client's Accounts.

Legal Proceedings and Corporate Actions

Generally, none of FWG, Baird or any Other Manager responsible for managing all or a portion of the assets in a client's Account will render advice or take action on a client's behalf with respect to securities that are or were held in the client's Account, or the issuers thereof, which go into default or become the subject of legal proceedings, such as class action claims, defaults or bankruptcies. Also, they may or may not vote or advise clients on other corporate actions, like tender offers, that are not solicited by a proxy statement. At a client's request, Baird will forward information that Baird actually receives to the client.

Providing Baird Voting Instructions

As mentioned above, Baird may be the holder of record for certain securities in a client's Account. If the client retains voting authority over such securities (or delegates such authority to party other than Baird), and a proxy is solicited with respect to any such securities, the client (or other authorized party) will need to provide voting instructions to Baird. To the extent the client (or other authorized party) does not provide timely voting instructions, Baird will vote such securities to the extent permitted by law and in compliance with the rules of the New York Stock Exchange and the SEC relating to such matters.

Client Information Provided to Portfolio Managers

Under the FWG Recommended Managers Service, Baird SMA Network Program and Dual Contract Program, FWG and Baird provide certain information about the client to the investment managers managing the client's Account (which may include the Overlay Manager or an Implementation Manager) when the client establishes the advisory relationship with such managers. Such information includes the client's investment objectives and risk tolerance. Under

the FWG Recommended Managers Service, FWG and Baird also provide to the investment manager a client's age, investment timeframe, and liquidity requirements.

Unless specifically requested to do so by a client, FWG and Baird do not generally provide such information about the client on an ongoing basis to the investment manager managing the client's Account.

Baird also generally provides the following to the client's manager unless otherwise instructed by a client: trade confirmations, account statements, and access to client's Account on Baird's system.

Client Contact with Portfolio Managers

FWG and Baird do not place any restrictions upon clients who wish to contact or consult with Other Managers managing their accounts. FWG encourages clients to discuss their accounts with their FWG Consultant.

Additional Information

Disciplinary Information

In April 2016, Baird, without admitting or denying the findings, consented to the sanctions and findings of the Financial Industry Regulatory Authority, Inc. ("FINRA") that it violated NASD Conduct Rule 3010, FINRA Rule 3110, and FINRA Rule 2010, by failing to establish and maintain a supervisory system and procedures reasonably designed to ensure that customers who purchased mutual fund shares received the benefit of applicable sales charge waivers. In May 2015, Baird began a review to determine whether Baird had provided available sales charge waivers to eligible customers. Based on this review, in May 2015, Baird self-reported to FINRA that various eligible customers had not received available sales charge waivers. Baird was found to have disadvantaged certain retirement plan and charitable organization customers that were eligible to purchase Class A shares in certain mutual funds without a front-end sales charge. The findings also stated that these customers were instead sold Class A shares with a front-end sales charge or Class B or C shares with higher ongoing fees and the potential application of a contingent deferred sales charge. Baird was censured and required to pay restitution to affected customers estimated to be approximately \$2.1 million including interest.

In July 2016, Baird, without admitting or denying the findings, consented to the sanctions and to the entry of findings of FINRA that the firm and a firm supervisor within its Private Wealth Management business did not reasonably supervise a former Financial Advisor who misused a customer's funds. The findings stated that the supervisor did not reasonably follow-up on red flags associated with a trade correction request submitted by the Financial Advisor that should have alerted him to the Financial Advisor's misuse of a customer's funds. The supervisor also did not follow certain of Baird's written supervisory procedures ("WSPs") relating to trade corrections. After the supervisor realized that the Financial Advisor misused the customer's funds, Baird reimbursed the customer for the loss. The findings also included that Baird did not establish and maintain a supervisory system, including WSPs, for correcting trade errors that was reasonably designed to ensure compliance with applicable securities laws, regulations and rules. Baird was censured and fined \$200,000.

In September 2016, the SEC announced that Baird, without admitting or denying the findings, consented to the sanctions and findings of the SEC that it violated Section 206(4) of the Advisers Act and Rule 206(4)-7 thereunder by failing to adopt and implement adequate policies and procedures to track and disclose trading away practices by certain of the subadvisors participating in Baird's wrap fee programs offered through its Private Wealth Management Department. Through these programs, Baird's advisory clients pay an annual fee in exchange for receiving access to select subadvisors and trading strategies, advice from Baird's financial advisors, and trade execution services through Baird at no additional cost. However, if a subadvisor chooses not to direct the execution of particular equity trades through Baird in order to fulfill its best execution obligation and the executing broker charges a commission or fee, Baird's advisory clients often are charged additional commissions or fees for those transactions, which is often embedded in the price paid or received for the security. This practice is referred to as "trading away" and these types of trades are frequently called "trade aways." Baird was found to have failed to adopt or implement policies and procedures designed to provide specific information to Baird's clients and financial advisors about the costs of trading away. Baird agreed to provide additional disclosure to clients

and review and, as necessary, update its policies and procedures. Baird also was ordered to cease and desist committing or causing any violations and any future violations of Section 206(4) of the Advisers Act and Rule 206(4)-7 thereunder and pay a civil money penalty in the amount of \$250,000.

In March 2019, Baird, without admitting or denying the findings, consented to an order of the SEC, which found that it violated Sections 206(2) and 207 of the Advisers Act for making inadequate disclosures to advisory clients about mutual fund share classes. The order was part of a voluntary self-reporting program initiated by the SEC called the "Share Class Selection Disclosure (or SCSD) Initiative." Under the program, investment advisory firms were offered the opportunity to voluntarily self-report violations of the federal securities laws relating to mutual fund share class selection and related disclosure issues and agree to settlement terms imposed by the SEC, including returning money to affected investment advisory clients. The central issue identified by the SEC was that, in many cases, investment advisory firms bought for or recommended to their investment advisory clients mutual fund share classes that had distribution or service fees (commonly known as 12b-1 fees) paid out of fund assets to the firms when lower-cost share classes were available to those advisory clients, and the investment advisory firms did not adequately disclose their receipt of 12b-1 fees and/or the conflict of interest associated with those 12b-1 paying share classes. Baird and many other firms self-reported under the program and entered into substantially identical orders. By self-reporting and consenting to the order, Baird agreed to a censure and to cease and desist from committing or causing any violations and future violations of Sections 206(2) and 207 of the Advisers Act. Baird also agreed to establish a distribution fund and to deposit into that fund the improperly disclosed 12b-1 fees received by Baird plus prejudgment interest, which will be paid to affected advisory clients. More information about the order is contained in Baird's Form ADV, which is available on the SEC's Investment Advisory Public Disclosure website at <https://www.adviserinfo.sec.gov/IAPD/Default.aspx> or in the SEC's press release about the SCSD Initiative at <https://www.sec.gov/news/press-release/2019-28>.

In June 2019, Baird, without admitting or denying the findings, consented to the sanctions and to the entry of findings of FINRA that between late April 2013 and early July 2013 it published research reports about an issuer without disclosing that the research analyst who authored the reports was engaged in employment discussions with the issuer that constituted an actual, material conflict of interest and that the failure to disclose the research analyst's employment discussions with the issuer in the research reports made those reports misleading. Baird was censured and fined \$150,000.

Additional information about Baird's disciplinary history is available on the SEC's website at www.adviserinfo.sec.gov.

Other Financial Industry Activities and Affiliations

Baird is registered with the SEC as a broker-dealer under the Exchange Act and as an investment adviser under the Advisers Act. Baird is also affiliated with certain investment advisors and investment products that are identified below, including certain mutual funds, ETFs, private equity funds and hedge funds. Certain Baird and FWG associates and certain management persons of Baird may invest in those funds.

From time to time, Baird and FWG Consultants may recommend that clients invest assets with investment advisors or in investment products that are affiliated with Baird. Such a recommendation of affiliated advisors or investment products creates a potential conflict of interest because Baird, FWG Consultants and Baird's affiliates may receive higher aggregate compensation if clients retain affiliated advisors or invest in affiliated investment products instead of retaining unaffiliated advisors or investing in unaffiliated investment products. FWG and Baird address this potential conflict through disclosure in this Brochure. Further, when acting as fiduciary investment advisers, FWG and Baird are required to select or recommend affiliated investment products only when they determine it to be in the client's best interest to do so. The criteria used by them in deciding to select or recommend affiliated investment products are generally the same as those used for unaffiliated investment products. *However, a client should note that certain Services and certain categories of investment*

products made available to clients only offer advisors or investment products that are affiliated with Baird. In those cases, FWG and Baird do not impose the same criteria or level of review.

Broker-Dealer Activities

Baird is engaged in a broad range of broker-dealer activities, including: individual and institutional brokerage transactions; origination of, and participation in, underwritings of corporate and municipal securities; market making and trading activities in corporate securities and municipal and governmental bonds; distribution of mutual fund shares; option transactions; and research services.

Certain FWG and Baird associates and certain management persons of Baird are registered, or have an application pending to register, as registered representatives and associated persons of Baird to the extent necessary or appropriate to perform their job responsibilities.

Investment Management Activities

Baird and FWG Consultants may, from time to time refer clients to Baird Advisors or Baird Equity Asset Management, investment management departments of Baird, or Chautauqua Capital Management ("CCM"), a division of Baird Equity Asset Management. FWG Consultants are eligible for referral compensation to be paid by Baird that is based upon, among other factors, the compensation received by Baird. *FWG Consultants may have a financial incentive to recommend to clients the services of those Baird investment management departments over the services provided by other investment managers.*

Certain investment strategies offered by Baird Equity Asset Management have been selected by Baird for inclusion on Baird's Recommended Managers List. In addition, investment products and services offered by Baird Advisors, Baird Equity Asset Management and CCM are made available to clients through other Services. *Baird has a financial incentive to favor Baird Advisors, Baird Equity Asset Management and CCM because Baird receives more compensation if Baird Advisors, Baird Equity Asset Management or CCM manages a client's Account rather than other unaffiliated managers.*

Certain Affiliations

Affiliated Broker-Dealers

Baird is affiliated, and may be deemed to be under common control, with Strategas Securities, LLC ("Strategas Securities"), which is registered with the SEC as a broker-dealer and investment adviser, by virtue of their common indirect ownership by BFG. Certain investment products associated with Strategas Securities are made available to clients through the Services. *Due to its affiliation with Strategas Securities, Baird has a financial incentive to favor Strategas Securities' investment products and services.*

Affiliated Investment Advisors

Baird is affiliated, and may be deemed to be under common control, with Riverfront by virtue of their common indirect ownership by BFG. Additional information about Riverfront is available in Riverfront's Form ADV Part 2A Brochure. *Due to its affiliation with Riverfront, Baird has a financial incentive to favor Riverfront investment products and services.*

Baird is affiliated, and may be deemed to be under common control, with Greenhouse Funds LP ("Greenhouse") and Greenhouse Fund GP LLC ("Greenhouse GP") by virtue of their common indirect ownership by BFG. From time to time, FWG Consultants may use or recommend Greenhouse or Greenhouse GP investment products and services. *Due to its affiliation with Greenhouse and Greenhouse GP, Baird has a financial incentive to favor their investment products and services.*

Baird is affiliated, and may be deemed to be under common control, with Strategas, by virtue of their common indirect ownership by BFG. Certain Strategas investment products and services are made available to clients through the Services. *Due to its affiliation with Strategas, Baird has a financial incentive to favor Strategas investment products and services.*

Affiliated Mutual Funds, ETFs and Investment Companies

Baird is the investment adviser and principal underwriter for the Baird Funds. Baird Advisors provides investment management, administrative, and other services to certain Baird Funds investing primarily in fixed income securities (the "Baird Bond Funds"). Baird Equity Asset

Management provides investment management and other services to certain Baird Funds investing primarily in equity securities (the "Baird Equity Funds"). CCM provides investment management and other services to certain Baird Funds pursuing global or international investment strategies (the "Chautauqua Funds"). As compensation for its services, Baird receives fees from each Baird Fund, which fees are disclosed in each Fund's prospectus and statement of additional information available at www.bairdfunds.com. Certain Baird Funds and Chautauqua Funds have been selected by Baird for inclusion on Baird's Recommended Mutual Fund List, and all Baird Funds and Chautauqua Funds are made available to FWG clients through the Services. *Baird has a financial incentive to favor the Baird Funds and Chautauqua Funds because Baird receives more compensation if a client invests in the Baird Funds or Chautauqua Funds rather than other unaffiliated funds.*

FWG Consultants who refer clients to the Baird Funds or Chautauqua Funds are eligible for referral compensation to be paid by Baird that is based upon, among other factors, the compensation received by Baird. The amount of the referral compensation is disclosed in each Fund's statement of additional information available at www.bairdfunds.com. *FWG Consultants may have a financial incentive to favor investments in those Funds over investments in other mutual funds and to favor the Baird Equity and Chautauqua Funds over the Baird Bond Funds.*

Baird Advisors serves as investment sub-adviser to a mutual fund series of the Bridge Builder Trust and Baird receives compensation for those services. Additional information about that mutual fund, including information relating to the fees paid by that fund for investment management services, is available in the fund's prospectus and statement of additional information.

Baird Advisors also serves as investment sub-adviser to two sub-funds of PrivilEdge, a Société d'Investissement à Capital Variable (SICAV) (an investment company with variable capital) organized under the laws of Luxembourg. Baird receives compensation for the services provided to those sub-funds.

Baird Equity Asset Management serves as investment sub-adviser to a mutual fund series of the Principal Funds, Inc. and Baird receives compensation for those services. Additional information about that mutual fund, including information relating to the fees paid by that fund for investment management services, is available in the fund's prospectus and statement of additional information.

CCM serves as investment sub-adviser to a mutual fund series of the Pace® Select Advisors Trust and Baird receives compensation for those services. Additional information about those mutual funds, including information relating to the fees paid by those funds for investment management services, is available in the funds' prospectus and statement of additional information.

Baird acts as a portfolio consultant for certain UITs that are part of the FT Series, including the DIT Global Portfolio Series, the Dividend Income Trust Series, the Automated Quantitative Analysis (AQA®) Portfolio Series and the AQA® Large-Cap Portfolio Series. Baird also acts as administrator for certain closed-end funds sponsored by Duff & Phelps Investment Management Co., including DNP Select Income Fund, Inc., Duff & Phelps Utility and Corporate Bond Trust, Inc., and DTF Tax Free Income Fund Inc. Additional information about those investment products, including information relating to the compensation paid to Baird is available in the applicable prospectus and other fund documents. Those investment products are made available to clients through the Programs. *Due to its affiliation with those investment products, Baird has a financial incentive to favor those investment products.*

Riverfront acts as investment sub-adviser for certain mutual fund series of the Financial Investors Trust and certain ETFs that are part of the ALPS ETF Trust and First Trust Exchange-Traded Fund III. Additional information about those mutual funds and ETFs, including information relating to the compensation paid to Riverfront by those funds for investment management services, is available in each fund's prospectus and statement of additional information. Certain mutual funds and ETFs managed by Riverfront are made available to clients. *Due to its affiliation with Riverfront, Baird has a financial incentive to favor funds managed by Riverfront.*

Strategas acts as investment sub-adviser for the Destinations Large Cap Equity Fund. Strategas Securities acts as a portfolio consultant to, or otherwise has a financial interest in, certain UITs, including the Policy Opportunities Portfolios, part of the Invesco Unit Trusts, and the Strategas Policy Basket Portfolio, part of the Alaia Market Linked Trust. Additional information about those investment products, including information relating to the compensation paid to Strategas and Strategas Securities, is available in the applicable prospectus. Those investment products are made available to clients through the Services. *Due to its affiliation with Strategas and Strategas Securities, Baird has a financial incentive to favor those investment products.*

Affiliated Private Funds

CCM acts as investment manager for, and Baird is the general partner or manager of, the Chautauqua International Growth Equity QP Fund, LP, the Chautauqua Global Growth Equity QP Fund, LP and the Chautauqua New World Growth Equity Series (a series of Chautauqua Series Fund, LLC) (the "Chautauqua Private Funds"), and CCM serves as investment sub-adviser to the Multi-Advisor Funds International Fund. Those funds are private pooled investment vehicles that are not required to be registered with the SEC as investment companies. *Due to their affiliation with the Chautauqua Private Funds and the Multi-Advisor Funds International Fund, Baird Equity Asset Management, CCM and Baird have a financial incentive to favor those funds.*

Affiliated Private Equity Funds

Baird is also engaged in a private equity business through Baird Capital ("Baird Capital"), Baird's global private equity group. Baird and its Financial Advisors may refer clients to Baird Capital. Baird Capital makes venture capital, growth equity and private equity investments primarily in the healthcare, technology and services, and products sectors. Baird, in combination with certain executive officers, may be deemed to control Baird Venture Partners Management Company I, L.L.C. ("BVP I"); Baird Venture Partners Management Company III, LLC ("BVP III"); Baird Venture Partners Management Company IV, LLC ("BVP IV"); Baird Venture Partners Management Company V, LLC ("BVP V"); Baird Capital Partners Management Company V, LLC ("BCP V"); Baird Capital Partners Asia Management I Limited Partnership ("BCPA I"); Baird Capital Global Fund

Management I LP ("BCGF I"); and Baird Capital Partners Europe Limited. BVP I, BVP III, BVP IV and BVP V participate in venture capital opportunities by generally investing in equity securities of early-to-growth stage companies. BVP I is the general partner of one limited partnership and is an investment adviser registered with the SEC. BVP III is the general partner of three limited partnerships and is an investment adviser registered with the SEC. BVP IV is the general partner of three limited partnerships and is an investment adviser registered with the SEC. BVP V is the general partner of three limited partnerships and is an investment adviser registered with the SEC. BCP V generally invests in equity securities of growing lower-middle market companies issued in management buyouts, recapitalizations, industry consolidations and growth equity transactions. BCP V is the general partner of three side-by-side limited partnerships and is an investment adviser registered with the SEC. BCPA I makes growth equity investments in smaller, high potential companies with substantial operations and growth opportunities in China. BCPA I is the general partner of three limited partnerships and is an investment adviser registered with the SEC. BCGF I generally makes buyout and growth equity investments in lower middle market companies in the U.S., U.K., as well as companies operating in Asia with operations or growth opportunities in China. BCGF I is the general partner of four limited partnerships and is an investment adviser registered with the SEC. Baird Capital Partners Europe Limited, an English limited company, is regulated and authorized by the Financial Conduct Authority and is the manager of certain partnerships formed to acquire businesses and make investments across a range of industry sectors.

In addition, Baird, in combination with certain executive officers, may be deemed to control Baird Principal Group Management Company I, LLC ("BPG I") and Baird Principal Group Management Company II, LLC ("BPG II"). BPG I and BPG II generally co-invest with private equity funds and private equity professionals in transactions in the United States and Europe. BPG I is the general partner of one limited partnership and is an investment adviser registered with the SEC. BPG II is the general partner of one limited partnership and is an investment adviser registered with the SEC. Only Baird employees

were permitted to invest in the BPG I limited partnership and BPG II limited partnership.

If a client expresses an interest, FWG Consultants may refer clients to Baird Capital. FWG does not charge fees on client assets invested in private equity funds affiliated with Baird. Instead, the general partner of the private equity fund may provide compensation to the client's FWG Consultant for referring the client to Baird Capital. The actual amount of compensation may vary based upon the client's investment commitment and will be disclosed to a client in the documentation the client receives in connection with the investment. *Due to Baird's affiliation with those private equity funds and the referral compensation paid to FWG Consultants, Baird and FWG Consultants have a financial incentive to favor those private equity funds.*

Affiliated Hedge Funds

Greenhouse acts as investment manager for, and Greenhouse GP is the general partner of, the Greenhouse Master Fund LP and the Greenhouse Onshore Fund LP. Greenhouse also acts as investment adviser for the Greenhouse Overseas Fund Ltd. Those funds are hedge funds that are not required to be registered with the SEC as investment companies. The Greenhouse Onshore Fund LP is available to clients under the Services. *Due to its affiliation with Greenhouse and Greenhouse GP, Baird has a financial incentive to favor those hedge funds.*

Other Affiliated Financial Services Firms

Baird is affiliated, and may be deemed to be under common control, with HLT, a Kentucky-chartered trust company, by virtue of their common indirect ownership by BFG. Certain HLT investment products and services, such as the HLT Strategies, are made available to clients through the Services. *Due to its affiliation with HLT, Baird has a financial incentive to favor HLT investment products and services.*

FWG Consultants who refer clients to HLT generally receive referral compensation based upon the compensation received by HLT. The amount of the referral compensation may be up to 25% of the ongoing fees that a client pays to HLT. The referral compensation paid to FWG Consultants does not increase the fees that clients pay to HLT. *FWG Consultants thus have a*

financial incentive to favor HLT over other trust companies.

Baird is affiliated with, and may be deemed to control, bFinance UK Limited ("bFinance") and bFinance's related companies by virtue of Baird's indirect control over those entities. bFinance is a financial services firm located in the United Kingdom and regulated by the Financial Conduct Authority. From time to time, bFinance or its related companies may refer clients to Baird or recommend Baird products or services.

Other Financial Industry Activities

Baird has business relationships with many investment managers, including those participating in the Services, separate and apart from the Services. Other investment management firms may select Baird, in its capacity as a broker-dealer, to execute portfolio trades for their clients, including for mutual funds or money market funds they advise. Investment management firms may also select Baird to provide custody, research or other services. Baird receives compensation for those services. This may create an incentive for Baird to favor the services of such investment management firms or their products, including the mutual funds or money market funds advised by such investment management firms. However, Baird is a fiduciary that is required to act in the best interest of advisory clients when selecting or recommending investment management firms or their investment products to such clients. Baird addresses this potential conflict through disclosure in this Brochure. Further, Baird does not consider the extent to which an investment management firm directs or is expected to direct trades to Baird for execution when considering the eligibility of an investment management firm for Baird's advisory programs (including when Baird constructs its Recommended Managers List or Recommended Mutual Fund List). In addition, investment management firms are, absent client direction to the contrary, obligated at all times to retain the broker or dealer providing the client best execution as described under the heading "Services, Fees and Compensation—Additional Service Information—Trading for Client Accounts" above. In addition, mutual fund companies are prohibited from considering Baird's efforts in marketing and selling their funds when selecting Baird for executing portfolio trades for the funds. To learn more about how a mutual fund company

selects brokerage firms for trade execution, a client should consult the fund's statement of additional information, available from each fund.

Certain Baird associates from time to time may provide clients with tax return preparation, bill pay or related services. In some instances, the fee for those services may be bundled with the Advisory Fee. A client should understand that the provision of such services is separate from, and not related to, the Services offered under this Brochure and will be governed by an agreement separate from the client's advisory agreement with Baird. *A client should understand that Baird and its associates do not act as investment adviser or fiduciary to the client when providing tax return preparation, bill pay or related services to the client.*

Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

Code of Ethics

Subject to the restrictions described below, Baird and its affiliates and associates may engage in securities transactions for their own accounts, including the same or related securities that are recommended to or owned by Baird clients. These transactions may include trading in securities in a manner that differs from, or is inconsistent with, the advice given to Baird clients, and the transactions may occur at or about the same time that such securities are recommended to or are purchased or sold for client accounts. This creates a potential for a conflict between the interest of clients and the interests of Baird and its affiliates and associates.

To address the potential for conflicts of interest, Baird has adopted a Code of Ethics (the "Code") that applies to its associates that provide investment advisory services to clients, including Baird Financial Advisors, their supervisors, and certain associates who have access to non-public information relating to advisory client accounts ("Access Persons"). The Code prohibits Access Persons from using knowledge about advisory client account transactions to profit personally, directly, or indirectly, by trading in his or her personal accounts. The Code also generally prohibits Access Persons from executing a security transaction for their personal accounts during a blackout period one business day before or after the date that a client transaction in that same security is executed. The Code provides for

certain exceptions deemed appropriate by Baird management or by Baird's Compliance Department. In addition, orders for the accounts of Access Persons and other Baird associates that are under discretionary management by Baird may be aggregated with orders for other Baird client accounts, so long as the order is executed as part of a block transaction with client orders. A copy of the Code is available to clients or prospective clients upon request.

Baird has also implemented certain policies and procedures relating to Baird's and its associates' trading activities that are designed to prevent them from improperly benefiting from the trading activities of Baird's advisory clients. In addition, Baird's Compliance Department monitors the personal trading activities of all of Baird's associates providing advisory-related services to clients.

Participation or Interest in Client Transactions

Broker-Dealer and Related Activities

In their broker-dealer capacities, Baird and FWG Consultants provide brokerage and related services to clients, including the purchase and sale of individual stocks, bonds, mutual funds, Complex Investment Products and other securities. Baird and FWG Consultants receive compensation based upon the sale of such investment products.

FWG, Baird and Baird's affiliates may buy or sell securities for their own accounts, or may act as broker or agent for other FWG or Baird clients, including other advisory clients. FWG, Baird and Baird's affiliates may give advice and take action in the performance of their duties to a client that may differ from advice given, or in the timing and nature of action taken, with respect to their own accounts or that of another client. FWG or Baird may also engage in agency cross transactions and principal transactions with clients as further described under "Services, Fees and Compensation—Additional Service Information—Trading for Client Accounts—Trade Execution Services Performed by Baird" above.

Baird, as broker-dealer, continually engages in various securities transactions and trading activities through its institutional trading departments, including market making and corporate stock buyback activities. FWG

Consultants who refer corporate buyback opportunities to the institutional trading departments of Baird are eligible for referral compensation from Baird that is based upon, among other factors, the commissions that Baird receives. Baird and FWG Consultants may, therefore, have an incentive to sell, or to make sell recommendations with respect to, the securities of issuers for which Baird provides such buyback services.

As a registered broker-dealer, Baird effects transactions in securities on a national exchange and may receive and retain compensation for such services, subject to the limitations and restrictions made applicable to such transactions by Section 11(a) of the Exchange Act and Rule 11a2-2(T) thereunder. Baird may also benefit from the possession or use of any free credit balances in client Accounts, subject to restrictions imposed by Rule 15c3-3 under the Exchange Act.

Baird selects securities trade execution venues based on the size of the order, trading characteristics of the security, speed of execution, likelihood of price improvement, availability of efficient automated transaction processing, guaranteed automatic execution levels, and other qualitative factors. Baird receives payment or liquidity rebates on certain options or equity securities orders routed to some venues (commonly known as "payment for order flow"). The existence and amount of payments are dependent upon the size and type of the routed order. The source and amount of any compensation received by Baird in connection with payment for order flow will be disclosed to the non-institutional participants in the transaction upon request. This compensation gives Baird an incentive to route client orders for securities transactions to those venues that provide Baird the greatest levels of compensation, but Baird's routing decision is always based upon obtaining favorable executions for clients rather than the availability of payment for order flow.

The foregoing activities could create a conflict of interest with clients. Baird addresses these potential conflicts through disclosure in this Brochure and by adopting internal policies and procedures for FWG and Baird and their associates that require them to provide investment advice that is suitable for advisory clients (based upon the information provided by such clients) and that are designed to make

securities allocations to discretionary client accounts in a manner such that all such clients receive fair and equitable treatment over time. In addition, Baird has adopted a Code of Ethics and other internal trading policies and procedures relating to FWG's, Baird's and their associates' trading activities that are designed to prevent them from improperly benefiting from the trading activities of Baird's advisory clients. See "Code of Ethics, Participation or Interest in Client Transactions and Personal Trading—Code of Ethics" above.

Investment Product Selling and Servicing

Mutual Funds

Distribution and Shareholder Servicing Fees. Baird and FWG Consultants provide certain distribution and other shareholder-related services to mutual funds and their vendors with respect to FWG clients that hold shares of such mutual funds in their accounts. Baird receives distribution and shareholder servicing fees from certain funds out of their 12b-1 plans ("12b-1 fees") on an ongoing basis as compensation for the services provided. The 12b-1 fees paid by a mutual fund are disclosed in the mutual fund's prospectus.

If Baird receives 12b-1 fees from a fund with respect to a client's mutual fund investment in the client's Account and the client's Account is subject to an asset-based fee arrangement, Baird either: (1) rebates such 12b-1 fees to the client's Account if the client is paying an asset-based Advisory Fee on such investment; or (2) excludes such fund shares from the calculation of the client's asset-based Advisory Fee (sometimes referred to as "unbillable assets") for such period of time that Baird collects and retains the 12b-1 fee. 12b-1 fees rebated to a client's Account are estimated based on the average daily balance of the mutual fund shares in the Account and the annual rate of the 12b-1 fee paid by the applicable fund. If any rebated fees remain in a client's Account at the time of billing, those rebated amounts will be included in the Account assets subject to the Advisory Fee.

If Baird receives 12b-1 fees with respect to mutual fund shares that are designated as unbillable assets in a client's Account, Baird will retain such 12b-1 fees. This presents a conflict of interest because it provides FWG and Baird an incentive to recommend or invest client accounts in mutual fund shares that pay greater 12b-1

fees. Baird addresses this conflict by adopting a Mutual Fund Share Class Policy described above and by adopting internal policies that limit the circumstances under which mutual fund investments in client accounts can be designated as unbillable assets and 12b-1 fees can be retained.

Marketing Support and Revenue Sharing. Baird receives marketing support or revenue sharing payments ("marketing support") from the sponsors and investment advisers of certain mutual funds. These payments, which are based on sales of or client assets invested in such funds, are intended to compensate Baird for providing marketing, distribution and other services for the mutual funds. Marketing support is not paid by sponsors or investment advisers of mutual funds on mutual fund assets held in Retirement Accounts. Baird received marketing support payments over the past two calendar years from the sponsors or investment advisers of American Funds, Hartford Funds, JPMorgan Funds, Oppenheimer Funds, Lord Abbett Funds, Principal Funds, AllianceBernstein Funds, Franklin Templeton Funds, Goldman Sachs Funds, Invesco Funds, MFS Funds, and PIMCO Funds.

Receipt of marketing support payments from sponsors and investment advisers of mutual funds provides Baird an incentive to offer, market and recommend such mutual funds and to favor mutual funds with sponsors or investment advisers that make the greatest levels of such payments. However, Baird is a fiduciary that is required to act in the best interests of advisory clients when recommending mutual funds to those clients, and Baird does not consider the receipt of these payments in compiling its Recommended Mutual Fund List.

The marketing support payments that Baird receives from third party sponsors and investment advisers of mutual funds are not paid to FWG Consultants, and the compensation that Baird pays to FWG Consultants is not tied to such payments.

Schwab Clearing Arrangement. Baird has a clearing arrangement with Charles Schwab & Co., Inc. ("Schwab") whereby Schwab maintains an omnibus account with certain mutual fund families for Baird on behalf of FWG clients. Under the clearing arrangement, Schwab provides clearing

services for most "no load" funds and "load" funds held by FWG clients. Although Baird pays Schwab a fee for its clearing and omnibus services, Schwab generally passes through to Baird the shareholder servicing fees that Schwab receives from the funds. Shareholder servicing fees are not paid by Schwab on mutual fund assets held in Retirement Accounts. The amount of the shareholder servicing fees paid to Baird are based on the value of the Baird and FWG client assets invested in those funds. However, the shareholder servicing fee rate varies based on the type of fund (load or no load), the value of Baird and FWG client assets in those funds, and the relationship that Schwab has with those funds (whether or not Schwab receives payments from those funds or their sponsors, and the rates of such payments). As a result, Baird has an incentive to recommend mutual funds from which Baird would receive higher payments from Schwab.

If Baird receives 12b-1 fees from Schwab with respect to a mutual fund investment in a client's Account Baird rebates or retains such fees as further described above under the heading "Distribution and Shareholder Servicing Fees" above.

Administrative and Networking Fees. Baird receives compensation from certain mutual funds and their sponsors not cleared through Schwab in consideration for administrative, accounting, recordkeeping, sub-transfer agency or other services that Baird provides to those funds. While this provides Baird an incentive to favor funds paying higher fees, these fees are not paid to FWG Consultants, and the compensation that Baird pays to FWG Consultants is not tied to such fees.

Mutual Fund Share Class Policy. When selecting mutual fund share classes made available pursuant to the Share Class Policy, Baird has a financial incentive to select those mutual fund share classes that provide Baird greater levels of compensation. See "Services, Fees and Compensation—Additional Information—Mutual Fund Share Class Policy" above for more information.

Additional Information. More specific information about the compensation that Baird receives from a mutual fund is available in the mutual fund's prospectus or statement of additional information.

Clients may also contact Baird or an FWG Consultant for more specific information about the amount of compensation Baird receives from mutual funds or their sponsors. Additional information about mutual funds and the types of compensation that Baird receives from mutual funds or their sponsors can be found in the "Important Information About Mutual Funds Disclosure" document that is available on Baird's website at www.rwbaird.com/disclosures.

Unit Investment Trusts

Baird generally receives compensation related to the sale of units of UITs. Sponsors of UITs typically make marketing or concession payments to the firms that sell their UITs, including Baird. These payments are typically calculated as a percentage of the total volume of sales of the sponsor's UITs made by the firm during a particular period. That percentage typically increases as higher sales volume levels are achieved. Descriptions of these additional payments are provided in a UIT's prospectus. Baird has a financial incentive to favor UITs making higher marketing and concession payments. The marketing and concession payments that Baird receives from UIT sponsors are not paid to FWG Consultants, and the compensation that Baird pays to its FWG Consultants is not tied to such payments. More specific information about the compensation that Baird receives from a UIT is available in the UIT's prospectus or other offering documents. Clients may also contact Baird or an FWG Consultant for more specific information about the amount of compensation Baird receives from UITs or their sponsors. Additional information about UITs and the types of compensation that Baird receives from UITs or their sponsors is available on Baird's website at www.rwbaird.com/disclosures.

Complex Investment Products

Baird receives transaction-based compensation related to the sale of certain Complex Investment Products, such as upfront commissions and placement fees relating to the initial sale of the product and ongoing trail fees relating to a client's continued holding of the product. Baird compensates FWG Consultants based upon the compensation it receives. The receipt of such compensation provides Baird and FWG Consultants an incentive to favor Complex Investment Products that provide higher compensation.

If a Complex Investment Product is registered as an investment company (that is, a mutual fund), Baird and FWG Consultants may receive compensation described in the section entitled "Mutual Funds" above.

More specific information about the compensation that Baird receives related to the sale of a Complex Investment Product is available in the Complex Investment Product's prospectus or other offering documents. Clients may also contact Baird or an FWG Consultant for more specific information about the amount of compensation Baird receives from Complex Investment Products or their sponsors. Additional information about Complex Investment Products and the types of compensation that Baird receives from Complex Investment Products or their sponsors is available on Baird's website at www.rwbaird.com/disclosures.

Annuities

Baird receives transaction-based compensation related to the sale of annuities, such as upfront commissions relating to the initial sale of the product and ongoing trail commissions or residuals relating to a client's continued holding of the product. Baird compensates FWG Consultants based upon the compensation it receives. The receipt of such compensation provides Baird and FWG Consultants an incentive to favor annuities that provide higher compensation.

In addition to the compensation described above, Baird may receive additional financial support from sponsors of annuities. This support, which varies from sponsor to sponsor and is commonly referred to as "marketing support" payments, is typically allocated toward the costs of training and educating FWG Consultants about the products offered by the sponsor, due diligence on the products and marketing support.

Receipt of marketing support payments provides Baird an incentive to favor annuities and their sponsors that make the greatest levels of such payments. However, Baird is a fiduciary that is required to act in the best interests of advisory clients when recommending annuities to those clients, and Baird does not consider the receipt of marketing support payments when making sponsor or product recommendations.

The marketing support payments that Baird receives from annuity product sponsors are not paid to FWG Consultants, and the compensation that Baird pays to FWG Consultants is not tied to such financial support.

More specific information about the compensation that Baird receives related to the sale of annuities is available in the product's prospectus or other disclosure documents. Clients may also contact Baird or an FWG Consultant for more specific information about the amount of compensation Baird receives from annuities or their sponsors. Additional information about annuities and the types of compensation that Baird receives from those products or their sponsors is available on Baird's website at www.rwbaird.com/disclosures.

Other Third Party Payments

Baird hosts a number of seminars and conferences, including Baird's PWM Symposium, for Baird Financial Advisors and FWG Consultants during the year, which gives sponsors of investment products, such as mutual funds, the opportunity to make presentations at, and contribute money toward the cost of, such seminars and conferences. This presents a conflict of interest in that it gives Baird an incentive to promote or market the sponsors' investment products in order to persuade them to continue supporting Baird's seminars and conferences.

FWG Consultants generally receive non-cash compensation and other benefits from Baird and from sponsors of investment products with which Baird does business. Such non-cash compensation and other benefits may include invitations to attend conferences or educational seminars, payment of related travel, lodging and meal expenses, reimbursement for branch and client events, and receipt of gifts and entertainment. For example, FWG Consultants are invited to educational conferences hosted by sponsors of mutual funds, annuities and other investment products, with the costs associated with such conference (including travel and lodging) paid by the sponsors. In addition, FWG Consultants hold client events with some or all of the costs of such events paid by sponsors of investment products. Product sponsors may also provide gifts and entertainment in connection with those or other events. While these benefits present a conflict of interest in that they give FWG Consultants an incentive to recommend investment products and

their sponsors that provide the greatest levels of such benefits, FWG believes that such benefits do not impact investment product selections or recommendations made by FWG Consultants.

Addressing Conflicts

In addition to the measures described above, Baird addresses conflicts posed by the selling and servicing of the foregoing investment products through disclosure in this Brochure and the prospectuses or other offering documents provided to clients. In addition, Baird has adopted internal policies and procedures for FWG and Baird and their associates that require them to provide investment advice that is suitable for advisory clients (based upon the information provided by such clients). In addition, Baird has adopted policies and procedures for FWG Consultants providing advisory services that address and limit the receipt of non-cash benefits in an attempt to avoid any question of propriety or any conduct inconsistent with Baird's high standards of ethics.

Other Interests in Client Transactions

Cash Sweep Program

Baird maintains a Cash Sweep Program that is intended for clients who want to earn interest and receive FDIC insurance protection on their cash over short periods of time while awaiting investment. If a client participates in Baird's Cash Sweep Program, uninvested cash in the client's Accounts will be automatically deposited or swept into one or more FDIC-insured deposit accounts at participating banks (the Bank Sweep Feature) or, under certain conditions, will be automatically invested in shares of a money market mutual fund that Baird makes available in the program (the Money Market Fund Feature), subject to the terms and conditions of the program. By using multiple participating banks as opposed to a single bank, the Bank Sweep Feature seeks to provide FDIC insurance protection for client cash balances of up to an aggregate deposit limit determined under the program. Each deposit account at a bank constitutes a direct obligation of the bank and is not directly or indirectly an obligation of Baird.

Any aggregate cash balances held by a client in excess of the applicable aggregate deposit limit are automatically invested in shares of a money market mutual fund that Baird makes available in the Money Market Fund feature of the program.

Cash held in employee benefit plan accounts, employee health and welfare plan accounts, and SEP and SIMPLE IRAs will be automatically invested or swept into a money market mutual fund that Baird makes available under the Money Market Fund Feature of the program. In addition, clients with aggregate cash balances of \$5 million or more across all of their Baird accounts within the same household are eligible to have all or any portion of their cash balances automatically swept into a money market mutual fund that Baird makes available under the Money Market Fund Feature of the program.

Baird receives compensation for the administrative, accounting and other services that Baird provides under the program, which is paid out of the aggregate interest that is paid by the participating banks on the aggregate client balances in the deposit accounts participating in the Bank Sweep Feature. Baird's annual rate of compensation may be up to 2.00% of the aggregate client balances. Baird also receives an annual rate of compensation of up to 0.50% of the aggregate balances automatically invested into money market mutual funds under the Money Market Fund Feature. A client should note that the client will be charged the Advisory Fee on the value of all of the assets in the client's advisory Accounts, including cash that is swept into a bank deposit account or invested into a money market mutual fund under the Cash Sweep Program. As a result, Baird receives two layers of fees on a client's assets swept or invested in the Cash Sweep Program: the Advisory Fee, which compensates Baird for the investment advice, trading and custody services provided to the client related to those assets, and the compensation paid by the banks or money market funds related to those assets, which compensates Baird for the services it provides to the banks and funds and for Baird's efforts in maintaining the Cash Sweep Program. The compensation that Baird receives from the Cash Sweep Program gives it a financial incentive to recommend that clients participate in the Cash Sweep Program and maintain high levels of uninvested cash balances in their Accounts.

As an alternative to the Cash Sweep Program, Baird makes available other money market mutual funds and other cash alternatives in which a client may invest, often at a higher yield, although these investments do not have an automatic sweep feature. In addition, instead of

maintaining cash balances in an advisory Account, a client has the option to maintain such cash balances in a brokerage account that is not subject to an asset-based fee.

A client should understand that the Cash Sweep Program is an ancillary account service and it is not an, nor is it part of any, Advisory Service or investment advisory service. FWG and Baird do not act as investment adviser or a fiduciary to a client in connection with the Cash Sweep Program. However, a client should note that the amount of a client's Advisory Service Account dedicated to cash and cash equivalents is part of the overall investment allocation advice provided to the client and thus the amount of such cash and cash equivalents included in the calculation of the Advisory Fee for the client's Account. More detailed information about the Cash Sweep Program and the compensation Baird receives is available on Baird's website at www.rwbaird.com/cashsweeps.

Investment Banking and Public Finance Activities

Through its Investment Banking and Public Finance Departments, Baird provides investment advisory, securities underwriting and related investment banking services to various corporate, municipal, and other issuers of securities. Baird receives compensation and fees from such entities in connection with the services it provides. Certain FWG Consultants may also receive a selling concession or other incentive on the sale to clients of securities that Baird underwrites. In addition, certain FWG Consultants who refer securities underwriting or other business opportunities to the Investment Banking or Public Finance Departments are eligible for referral compensation from Baird that is based upon, among other factors, the compensation and fees Baird receives. Baird and FWG Consultants may, therefore, have an incentive to favor the securities of issuers for which Baird provides such services over the securities of issuers for which Baird does not provide such services. Baird and FWG Consultants also have an incentive to recommend that clients purchase securities in offerings underwritten by Baird because the underwriting compensation that Baird and FWG Consultants will earn on those offerings tends to be higher than the compensation they would normally receive if clients were to buy them in the secondary market, and because the profitability of underwritten offerings to Baird depends upon

Baird's ability to sell the securities allocated to Baird in the offering. However, Baird and FWG Consultants will only recommend such securities to an advisory client when they believe it is in a client's best interest to do so. Also, in accordance with applicable law and Baird's policies, any securities underwritten by Baird will be sold to a client by Baird in a principal capacity only if the client consents to the transaction in writing and Baird has provided the client with all material information regarding Baird's or the client's FWG Consultant's interest in the transaction. For more information, please see "Services, Fees and Compensation—Additional Service Information—Trading for Client Accounts—Trade Execution Services Performed by Baird" above. FWG Consultants also have the incentive to favor some clients over other clients when allocating shares issued in public offerings, particularly those clients with larger accounts or accounts that generate high fees and compensation, as a reward for their past business or to generate future business.

Baird, by reason of its investment banking or other activities, may from time to time acquire information deemed confidential, material and non-public, about corporations or other entities and their securities. Baird, FWG and their associates are not permitted to divulge such information to any client or act upon such information with respect to a client's Account or their own accounts.

Research Activities

The investment advice provided to a client may be based on the research opinions of Baird's research departments. Baird does, and seeks to do, business with companies covered by those research departments and as a result, Baird may have a conflict of interest that could affect the content of its research reports.

Trust Services Arrangements

Baird maintains an alliance with certain institutions, including Comerica Bank & Trust, National Association, that provide trust services, including trust administration, custody, tax reporting and recordkeeping. FWG Consultants at times refer clients seeking trust services to institutions that are members of the alliance. Baird is generally compensated by institutions that are members of the alliance for the marketing support or other services that Baird

provides. Such annual compensation generally will not exceed 10% of the annual trust service fees received by the institution. This provides Baird a financial incentive to recommend firms that pay Baird such compensation.

In addition, as described above, FWG Consultants may refer clients to HLT, an affiliate of Baird. FWG Consultants generally receive referral compensation which may be up to 25% of the ongoing fees that a client pays to HLT. The referral compensation paid to FWG Consultants does not increase the fees that clients pay to HLT. Due to Baird's affiliation with HLT and the referral compensation paid to FWG Consultants, Baird and FWG Consultants have a financial incentive to favor HLT over other trust companies.

A client should understand that any such referral for trust services made by FWG or Baird is an ancillary account service and it is not an, nor is it part of any, Advisory Service or other investment advisory service. They do not act as investment adviser or a fiduciary to the client when making such a referral and they will not provide advice on or oversee any such trust services arrangement.

Margin Loans

Margin involves borrowing money from Baird to buy securities. If a client uses margin to buy eligible securities in the client's Account, the client will pay Baird interest on the amount the client borrows. Because a client will pay interest to Baird on the outstanding balance of the client's margin loan that is used to buy securities, Baird has an incentive to recommend that a client use margin. Baird and FWG Consultants also have an incentive to recommend that a client use margin to buy securities, because a margin loan allows the client to make larger securities purchases and retain assets in the client's Accounts that pay an ongoing asset based fee instead of liquidating them to fund a cash need, which increases the asset-based fees and trail fees, if any, Baird earns on the client's Accounts. A client should note that any margin balance (i.e., the outstanding amounts of the margin loan a client owes to Baird) in the client's Accounts will not be applied to reduce the client's billable Account value in calculating the client's asset-based Advisory Fee, which gives Baird and the client's FWG Consultant further incentive to recommend the client's use of margin instead of liquidating assets to fund a cash need. Because the interest Baird receives and

fees Baird earns on a client's Accounts increase as the amount of the client's margin loan increases, Baird and the client's FWG Consultant also have an incentive to recommend that the client continue to maintain the client's margin loan balance with Baird at high levels.

Securities Based Lending Program

Baird offers clients an opportunity to borrow money from a third party bank, including Tristate Capital Bank, under Baird's Securities Based Lending Program. These loans, if made, can be used for any personal or business purpose other than to purchase, carry or trade securities, or to repay margin debt. These loans are secured by the investments and other assets in client's Baird accounts. A client will pay interest on the outstanding balance of the client's loan. Baird receives an ongoing administrative fee from the bank, with annual rates generally ranging from 0.50% to 2.50% of outstanding balances under a client's loan, which is paid by the bank out of the interest the client pays to the bank. FWG Consultants receive an ongoing referral fee at the annual rate of 0.25% on the outstanding balance of a client's loan, which is paid out of Baird's administrative fee. Because Baird receives an administrative fee and a client's FWG Consultants receives a referral fee if the client obtains a loan from a third party bank under Baird's Securities Based Lending Program, Baird and the client's FWG Consultant have an incentive to recommend that a client obtain loans under that program. Baird and a client's FWG Consultant will continue to receive compensation on assets held in the client's Accounts that are collateral for such loans, including Advisory Fees on such assets if those assets are in the client's Account. As a result, Baird and a client's FWG Consultant have a financial incentive to recommend that a client obtain a loan under the program to provide for the client's needs instead of liquidating assets in the client's Accounts because a decline in the amounts the client has in the client's Accounts will result in lower revenues to Baird and compensation paid to the client's FWG Consultant.

A client should understand that any referral made by Baird and FWG Consultants under the Securities Based Lending Program is an ancillary account service and it is not an, nor is it part of any, Service or investment advisory service. They do not act as investment adviser or a fiduciary to the client when making such a referral and they

will not provide advice on or oversee any such lending arrangement.

Other Conflicts of Interest

Asset-based Advisory Fee arrangements create an incentive for Baird and FWG Consultants to set the applicable fee rate at a high level and to encourage clients to add more money into their accounts.

Baird and FWG Consultants generally have a financial incentive to recommend investment advisory Accounts to clients rather than brokerage accounts because Advisory Fee revenue is recurring, more predictable and typically greater than the revenues Baird earns, and the compensation FWG Consultants receive, from brokerage accounts. In addition, because Advisory Fees are paid by a client regardless of the trade activity in the client's advisory Account, Baird will receive greater revenue, and the client's FWG Consultant will receive greater compensation, from a low trade-activity advisory Account than from a low trade-activity brokerage account. Baird and FWG Consultants thus have an incentive to recommend an investment advisory Account to a client rather than a brokerage account if the client has, or is expected to have, lower levels of trading activity in the client's account. However, because Baird's revenues and the compensation paid to FWG Consultants from brokerage accounts increase as the level of trading increases, Baird and FWG Consultants have an incentive to recommend a brokerage account to a client rather than an investment advisory Account if the client has, or is expected to have, significant trading activity in the client's account.

Baird and a client's FWG Consultant have an incentive to recommend that the client transfer the client's accounts to Baird and establish new accounts with Baird (including IRA rollovers) because doing so will result in increased revenues to Baird and compensation for the FWG Consultant.

Baird and FWG Consultants have an incentive to recommend that a client open different types of accounts with Baird, such as individual accounts, IRA rollovers, joint accounts, 529 plan accounts and UGMA/UTMA accounts, because if a client has different types of accounts with Baird, the client brings more of the client's investable assets to

Baird, on which fees can be generated, thereby increasing Baird's revenues and the client's FWG Consultant's compensation. Also, if a client has more account types with Baird, the client is statistically more likely to maintain the client's relationship with Baird and the client's FWG Consultant for longer periods of time.

Most FWG Consultants own common stock of BFG, Baird's ultimate parent, and when offered the opportunity to buy BFG stock they usually do so. The amount of BFG stock that an FWG Consultant may purchase is based in part on the FWG Consultant's total production level. A client's FWG Consultant thus has an incentive to make recommendations that increase the FWG Consultant's total production on the client's accounts with Baird. Moreover, revenues from Baird's PWM department, in which FWG Consultants operate, contribute substantially to BFG's overall revenues and profitability, and the performance of BFG's stock price is largely due to the profitability of Baird's PWM department. As a result, a client's FWG Consultant's ownership of BFG stock creates a financial incentive to make recommendations to the client that increase the amount of revenues generated from the client's accounts with Baird, even if those recommendations will not increase the FWG Consultant's production, so as to increase the revenues and profitability of Baird's PWM department and thus of BFG, which will serve to grow the value of the BFG stock. For example, ownership of BFG stock provides a client's FWG Consultant an incentive to recommend affiliated products to a client even though such recommendation does not increase the client's FWG Consultant's production.

Certain client accounts managed by Baird and FWG Consultants may have similar investment objectives and strategies but may be subject to different fee schedules or commission rates. Thus, Baird and FWG Consultants have an incentive to favor client accounts that generate a higher level of compensation.

From time to time, Baird may have proprietary investments in companies or issuers whose securities are offered and sold to clients, an FWG Consultant or another Baird associate may have significant investments in companies or issuers whose securities are offered and sold to clients, or an FWG Consultant or another other Baird associate (or their spouses, partners or family

members) may have a position as an officer or director of a company or issuer whose securities are offered and sold to clients. In such cases, Baird and/or a client's FWG Consultant will have an incentive to recommend that the client invest in those companies.

Baird offers to clients other investment products and services not described in this Brochure. These investment products and services provide different levels of compensation to Baird and PAM Consultants. Baird and PAM Consultants have an incentive to favor those investment products and services that generate a higher level of compensation than those that generate a lower level of compensation. For more information about the other investment products and services offered by Baird, clients should contact Baird or a PAM Consultant.

Other sections of this Brochure also describe instances when FWG or Baird may recommend to clients, and may buy and sell for client's Account, securities in which Baird and its affiliates and associates have a material financial interest or practices that present a conflict of interest. For more information, please see "Services, Fees and Compensation—Advisory Fee—Advisory Fee Payments to Baird, FWG Consultants and Investment Managers" and "Additional Information—Other Financial Industry Activities and Affiliations" above, and "Additional Information—Client Referrals and Other Compensation" below.

Addressing Conflicts

In addition to the measures described above, Baird addresses these conflicts through disclosure in this Brochure. In addition, Baird has adopted internal policies and procedures for Baird and its associates that require them to provide investment advice that is suitable for advisory clients (based upon the information provided by such clients) and that are designed to make securities allocations to discretionary client accounts in a manner such that all such clients receive fair and equitable treatment over time.

Duration Compensation Will Be Received

If a client holds mutual funds, Complex Investment Products, or any of the other investment products described above, FWG, Baird and Baird's affiliates and associates will receive the fees and payments described above for the

duration of the client's advisory relationship with FWG or Baird. In some circumstances, the receipt of such compensation may extend beyond a client's advisory relationship with FWG or Baird if the client continues to hold those assets at Baird.

If FWG, Baird, or an affiliate or associate of them, receives any compensation or benefit described in this Brochure from or related to a client's investment, they will generally retain the compensation or benefit. Except as otherwise described above, FWG and Baird generally do not rebate these amounts to a client's Account or credit the amount against the Advisory Fees payable by a client unless such compensation may not be retained under applicable law or regulation.

Review of Accounts

Client Account Review

Client accounts are monitored on a periodic basis by the client's FWG Consultant and are subject to review by the Baird Regional Director or PWM Supervision department supervisor (or his or her respective designee) responsible for supervising the client's FWG Consultant. A client's FWG Consultant generally reviews the performance of the client's Account at least annually. However, the client's FWG Consultant may not review the performance of a client's SMAs managed by Other Managers under the Baird SMA Network Program or Dual Contract Program. Baird has designated individuals who are responsible for monitoring a client's FWG Consultant with respect to the client account's trading activity and attempting to ascertain whether client accounts within each composite are being treated equitably.

Account Statements and Performance Reports

If Baird provides transaction execution services to a client, Baird will generally provide the client with a monthly brokerage account statement when activity occurs during that month. Otherwise, Baird will provide the client with a quarterly statement if there has not been any intervening monthly transaction activity.

A client's FWG Consultant will provide the client with a written report on the client's Account's performance as often as the client and the FWG Consultant may from time to time mutually agree. Performance reporting may not be available for Account assets that are not custodied at Baird.

For more information about performance reports provided by FWG, see "Services, Fees and Compensation—Description of Advisory Services" above. FWG or Baird may change or discontinue performance reporting to a client at any time for any reason upon notice.

Client performance reports usually contain a portfolio valuation and typically show the asset allocation of the client's portfolio, changes in a client's portfolio, and account performance compared to a benchmark market index or indices (such as the S&P 500® Index or the Barclays U.S. Intermediate Government/Credit Bond Index). The benchmark may be a blended benchmark that combines the returns for two or more indices.

A client should note that past performance does not indicate or guarantee future results. None of FWG, Baird, or investment managers managing the client's Account promise or guarantee any level of investment returns or that the client's investment objective will be achieved.

Benchmarks shown in performance reports are for informational purposes only. FWG's selection and use of benchmarks is not a promise or guarantee that the performance of a client's Account will meet or exceed the stated benchmark. When the client compares Account performance to the performance of a market index, the client should recognize that a market index merely reflects the performance of a list of unmanaged securities included in the index and the index performance does not take into account management fees, execution costs, and other expenses related to investing for a client's Account. The securities included in a client's Account generally do not exactly mirror the securities included in the index.

The benchmarks used by Baird with respect to a client's SMA may differ from the benchmarks used by the manager of the client's SMA. As a result, the performance comparisons in Baird's performance reports may differ from reports provided to clients directly by the investment manager for the client's SMA.

The performance of investment managers may, under certain circumstances, be presented to clients on a "gross" or "gross of fees" basis, which means the performance results being presented does not reflect the deduction of Advisory Fees and other costs that clients have incurred and will

incur when retaining the manager. Had applicable Advisory Fees and other costs been included in the performance calculation, the manager's performance results would have been lower than the performance results presented. Documents presenting a manager's performance results on a gross of fees basis should contain certain disclosures about the performance results being presented. Clients are urged to review carefully those disclosures because they contain important information about the calculation of the performance results. If a client is presented performance information for a manager's strategy on a gross of fees basis and the client has an Account managed by that manager pursuant to that strategy, the client should obtain a performance report for the Account and review that performance information carefully because the performance report for the Account will reflect the deduction of applicable Advisory Fees and other costs.

Certain Model Providers have adopted trade rotation policies that allow them to send Model Portfolio updates to the Overlay Manager after they have implemented the Model Portfolio updates for client accounts managed by them or after they have otherwise completed trading for those accounts. As a result, the performance of a Model Portfolio, as reported by the Model Provider, will differ, perhaps in a materially negative manner, from the actual performance realized by Baird client Accounts pursuing the Model Portfolio strategy. See "Additional Service Information—Trading for Client Accounts—Trading Practices of Investment Managers" above for more information.

When preparing a client's Account statements and performance reports, FWG and Baird generally rely upon third party sources, such as third party pricing services. In some instances, such as when Baird is unable to obtain a price for an asset from a pricing service, Baird may obtain a price from its trading desk or it may elect to not price the asset. Obtaining a price from its trading desk may present a conflict of interest. In some cases, Baird obtains prices from the issuers or sponsors of investment products in the client's Account when prices are not otherwise readily available. This frequently occurs with respect to the valuation of Complex Investment Products. If the assets in the client's Account are held by a custodian other than Baird, Baird may also use valuation

information provided by the client's third party custodian.

FWG and Baird do not conduct a review of valuation information provided by third party pricing services, issuers, sponsors, or custodians, and they do not verify or guarantee the accuracy of such information. FWG and Baird do not accept responsibility for valuations provided by third parties that are inaccurate unless they have a reason to believe that the source of such valuations is unreliable. Valuation data for investments, particularly Complex Investment Products, may not be provided to FWG or Baird in a timely manner, resulting in valuations that are not current. The prices obtained by FWG and Baird from the third party pricing services, issuers, sponsors and custodians may differ from prices that could be obtained from other sources. Values used in account statements and performance reports may vary from prices received in actual transactions and are not firm bids, offers or guarantees of any type with respect to the value of assets in an Account, and the values may be greater than the amount a client would receive if the securities were actually sold from the client's Account.

If a client has assets held by a third party custodian, the prices shown on a client's Account statements provided by the custodian could be different from the prices shown on statements and reports provided by FWG or Baird. See "Services, Fees and Compensation—Additional Service Information—Custody Services" above for more information.

Client Referrals and Other Compensation

FWG or Baird may provide compensation to individuals who refer clients in some instances. When applicable, the compensation paid is a percentage of the client's fee payments or the value of the client's Account. The amount of compensation will vary, with the specific level determined based upon consideration of various factors including, but not limited to, the individual's role in developing the client relationship and the assets under management. Baird may pay these fees to registered representatives of Baird and its affiliates as well as to unaffiliated solicitors that have entered into a written agreement with Baird.

FWG and Baird and Baird's affiliates and associates may receive certain economic benefits in connection with providing advisory services to clients, which are described in the sections entitled "Services, Fees and Compensation", "Account Requirements and Types of Clients", "Additional Information—Other Financial Industry Activities and Affiliations" and "Additional Information—Code of Ethics, Participation or Interest in Client Transactions and Personal Trading" above.

Financial Information

FWG does not require or solicit prepayment of more than \$1,200 in fees per client six months or more in advance and, thus, has not included a balance sheet of Baird's most recent fiscal year. Neither Baird nor FWG is aware of any financial condition that is reasonably likely to impair their ability to meet their contractual commitments to clients, nor has either been the subject of a bankruptcy petition at any time during the past ten years.

Special Considerations for Retirement Accounts

Each Retirement Account Fiduciary of a client should understand that FWG or Baird may invest for the client, or recommend that the client invest in, affiliated investment products and that Baird and its affiliates may receive fees or other compensation related to such investments made by the client. Each Retirement Account Fiduciary should also understand that when FWG or Baird invests with discretion the assets of a Retirement Account in an affiliated investment product that pays investment advisory fees to Baird or any of its affiliates, including in connection with any cash sweep services, Baird and its affiliates may receive such investment advisory fees in accordance with the terms of Department of Labor ("DOL") Prohibited Transaction Exemption ("PTE") 77-4, and, as required thereby, FWG and Baird will waive the asset-based Advisory Fees on that portion of the assets invested in the affiliated investment product for such period of time so invested or Baird will offset the investment advisory fees received by Baird or any of its affiliates from the affiliated investment product against the asset-based Advisory Fee that FWG and Baird charge to the client. For the purpose of complying with the terms of DOL PTE 77-4, the client and each Retirement Account Fiduciary of the client acknowledge in the client's advisory

agreement that: (i) the investment in affiliated investment products for the client's Account is appropriate because of, among other things, the investment goals, redeemability, liquidity, and diversification of those products; (ii) subject to the terms of the applicable Service, all assets of the client's Account may be invested in one or more of the affiliated investment products; (iii) the client and such Retirement Account Fiduciary received prospectuses or other offering or disclosure documents for the affiliated investment products that may be used in connection with the Account, each of which include a summary of all fees that may be paid by the affiliated investment products to Baird or its affiliates; and (iv) the client received information concerning the nature and extent of any differential between the rate of such affiliated investment product fees and the Advisory Fees payable by the client. The differential between the fees to be charged by FWG and Baird for the investment advisory services they provide to the client and, if applicable, the investment advisory and other similar fees paid by the affiliated investment product to Baird or its affiliates with respect to the services Baird or any of its affiliates provides to the affiliated investment product is the difference between the Advisory Fee disclosed in the client's advisory agreement and the applicable investment management, investment advisory and other similar fees detailed in the applicable prospectus or other offering or disclosure documents for the affiliated investment product.

If the client's Account is a Retirement Account and if FWG is directed to implement a directed brokerage arrangement for the Account, each Retirement Account Fiduciary of the client should understand: that the directed brokerage arrangement must be for the exclusive benefit of participants and beneficiaries of the Retirement Account; and the fiduciary responsibilities discussed in ERISA Technical Bulletin 86-1. Each Retirement Account Fiduciary should also understand that such Fiduciary is solely responsible for complying with all fiduciary responsibilities discussed in ERISA Technical Bulletin 86-1, including, without limitation, the duty to make an initial determination that the directed broker-dealer is capable of providing best execution for the client's brokerage transactions, the duty to monitor the services provided by the directed broker-dealer so as to assure that the client has received best execution of the client's brokerage transactions, and the duty to

determine that the commissions paid by the client and any other fees or costs incurred by the client are reasonable in relation to the value of the brokerage and other services received by the client. The client and each Retirement Account Fiduciary of the client should also understand that the client and the client's Retirement Account Fiduciaries are solely responsible for engaging a directed broker-dealer, monitoring its performance and terminating a directed brokerage arrangement, and that FWG and Baird are not responsible for determining whether a directed broker-dealer is capable of providing best execution.

If a client's Account is a Retirement Account and if the client has selected an investment manager or product affiliated with Baird (such as the use of services or products offered by Baird Advisors, Baird Equity Asset Management, CCM, HLT, Greenhouse, Riverfront, Strategas or any Investment Fund affiliated with any of them), each Retirement Account Fiduciary of the client understands and agrees that in making such selection: (a) Baird and its affiliates may receive higher aggregate compensation than if the client selected investment managers, funds or other products not affiliated with Baird and thus Baird may have an incentive to offer such affiliated investment managers, funds or other products; (b) Baird makes available to the client investment managers, funds and products not affiliated with Baird and the client may obtain additional information about such unaffiliated investment managers, funds or products at any time by contacting the client's FWG Consultant; and (c) the client is free to choose another investment option or participate in another Baird advisory program that does not use investment managers, funds or products affiliated with Baird at any time by contacting the client's FWG Consultant. For more information about investment managers and products that are affiliated with Baird, please see "Additional Information—Other Financial Industry Activities and Affiliations" above.
