Item 4 Advisory Business

Description of Firm

IDR Investment Management, LLC ("IDR" or "Manager") is a registered investment adviser based in Cleveland, Ohio. We are organized as a limited liability company under the laws of the State of Delaware. We have been providing investment advisory services since December 2016. We are primarily owned by Gary Zdolshek, Roger Rankin and USAA Real Estate Company, LLC.

IDR has a strategic relationship with USAA Real Estate Company, LLC, pursuant to which USAA Real Estate Company, LLC owns a minority interest in IDR.

The following paragraphs describe our services and fees. Refer to the description of each investment advisory service listed below for information on how we tailor our advisory services to your individual needs. As used in this brochure, the words "we," "our," and "us" refer to IDR Investment Management, LLC and the words "you," "your," and "client" refer to you as either a client or prospective client of our firm.

Portfolio Management of Pooled Investment Vehicles

We serve as the investment adviser to the Core Property Index Trust, Core Property Index Fund, LLC, and Core Property Index Master Fund, LLC (the "Master Fund") (collectively, "the Funds"), private pooled investment vehicles. In providing services to the Funds, we direct and manage the investment of the Funds' assets and provide periodic reports to investors in each Fund.

IDR manages the assets of each Fund in accordance with the terms of the governing documents applicable to each such Fund. Investment advice is provided directly to each Fund and not individually to the investors in the Funds. The Fund (through its investment in the Master Fund) will pursue its investment objective by investing primarily in the open-end funds that comprise the NCREIF Fund Index — Open End Diversified Core Equity (the "NFI-ODCE" or "NFI-ODCE Index") (the "Component Funds") and other assets deemed appropriate by the Manager, actively managing allocations to such Component Funds and investing in short-term investments and cash equivalents on an interim basis.

USAA Real Estate Company, LLC, its parent companies, subsidiaries and/or affiliates may introduce prospective investors to the Fund, but has no obligation to do so. Neither USAA Real Estate Company, LLC, its parent companies, subsidiaries and/or affiliates will receive any placement fees in connection with the introduction of potential investors, but rather will receive an interest in IDR. Furthermore, USAA Real Estate Company, LLC does not control the investment vehicles sponsored by IDR and IDR does not participate in the management or control of any investment vehicle sponsored by USAA Real Estate Company, LLC.

Wrap Fee Programs

We do not participate in any wrap fee program.

Types of Investments

We primarily offer advice on interests in private equity real estate funds. Refer to the *Methods of Analysis, Investment Strategies and Risk of Loss* below for additional disclosures on this topic.

Assets Under Management

As of December 31, 2019, we provide continuous management services for \$1,614,235,036 in client assets on a discretionary basis.

Item 5 Fees and Compensation**Portfolio Management of Pooled Investment Vehicles**

The Master Fund will pay to IDR, on behalf of the Fund, a fee for investment management services to the Fund and the Master Fund (the "Management Fee").

Management Fees billed to Investors will range between 0.2% to 0.4% per annum based on commitment amount.

The Management Fee will be based on the Net Asset Value of each Capital Account at the last business day of each quarter. Fees are calculated and paid in arrears. The Management Fee will be paid within thirty days of the last day of the each quarter. The portion of the Management Fee applicable to any Capital Account of any Class or Series thereof will be debited from the Fund's capital account in the Master Fund that corresponds to the Capital Account(s) established for all of the Members in such Class or Series.

In the sole discretion of IDR, the Management Fee may be waived, reduced or calculated differently with respect to any Capital Account of any Class, and IDR may cause the Fund to pay the Management Fee directly.

The Fund, in the sole discretion of IDR, may in the future establish Additional Classes of membership interests, which may provide for different or additional terms including, without limitation, different Management Fee rates. IDR may establish such new Classes, without providing prior notice to, or receiving consent from, the Members.

Additional Fees and Expenses

To the extent that any sales charges are payable with respect to any quarter in connection with the offering of interests in the Funds, 100% of such sales charges (i) will be charged directly to the Manager or any of its affiliates or (ii) to the extent paid by the Fund, will otherwise reduce, dollar for dollar, the Management Fee payable with respect to such quarter.

Investors may be charged a pro-rata portion of Fund related expenses including certain legal expenses, Fund administration costs and auditing services. All fees and expenses assessed to the Fund(s) are fully disclosed to investors in the respective Fund's Private Placement Memorandum or offering documents and in the Investor Subscription documents.

Expenses of the Manager

In consideration of the Management Fee, IDR will provide office space and utilities; computer equipment; certain administrative services; and secretarial, clerical and other personnel to the Fund and the Master Fund. IDR will bear the costs of providing such goods and services and all of its own overhead costs and expenses.

Expenses of the Fund

To the extent permitted by law, the Funds will bear its own expenses and its pro rata share of the expenses of the Master Fund (calculated based on the net asset value of the Master Fund interests held by the Fund as compared to the net asset value of all Master Fund interests, as determined by IDR as of the time of the allocation of such expenses to the Capital Accounts).

Compensation for the Sale of Securities or Other Investment Products

One person providing investment advice on behalf of our firm is a registered representative with NH Cohen Partners, a securities broker-dealer, and a member of the Financial Industry Regulatory Authority and the Securities Investor Protection Corporation. In their capacity as registered representatives, these persons will receive commission-based compensation in connection with the purchase and sale of securities, including 12b-1 fees for the sale of investment company products. Compensation earned by these persons in their capacities as registered representatives is separate and in addition to our advisory fees. This practice does not present a conflict of interest in this instance since the Funds will not be purchasing securities from these registered representatives and they will not, therefore, receive any transaction based compensation.

Item 6 Performance-Based Fees and Side-By-Side Management

We do not accept performance-based fees or participate in side-by-side management. Performance-based fees are fees that are based on a share of a capital gains or capital appreciation of a client's account. Side-by-side management refers to the practice of managing accounts that are charged performance-based fees while at the same time managing accounts that are not charged performance-based fees. Our fees are calculated as described in the *Fees and Compensation* section above, and are not charged on the basis of a share of capital gains upon, or capital appreciation of, the funds in any advisory account.

Item 7 Types of Clients

We offer investment advisory services to pooled investment vehicles (other than investment companies).

In general, the minimum investment commitment required of an investor in the Funds is \$5,000,000, although these minimums are negotiable and can be waived at our discretion.

Item 8 Methods of Analysis, Investment Strategies and Risk of Loss

We may use one or more of the following methods of analysis or investment strategies when providing investment advice to the Funds:

Technical Analysis - involves studying past price patterns, trends and interrelationships in the financial markets to assess risk-adjusted performance and predict the direction of both the overall market and specific securities.

Risk: The risk of market timing based on technical analysis is that our analysis may not accurately detect anomalies or predict future price movements. Current prices of securities may reflect all information known about the security and day-to-day changes in market prices of securities may follow random patterns and may not be predictable with any reliable degree of accuracy.

Fundamental Analysis - Involves analyzing individual companies and their industry groups, such as a company's financial statements, details regarding the company's product line, the experience and expertise of the company's management, and the outlook for the company and its industry.

Risk: The risk of fundamental analysis is that information obtained may be incorrect and the analysis may not provide an accurate estimate of earnings, which may be the basis for a securities value. If securities prices adjust rapidly to new information, utilizing fundamental analysis may not result in favorable performance.

Modern Portfolio Theory - a theory of investment which attempts to maximize portfolio expected return for a given amount of portfolio risk, or equivalently minimize risk for a given level of expected return, by carefully diversifying the proportions of various assets.

Risk: Market risk is that part of a security's risk that is common to all securities of the same general class (real estate) and thus cannot be eliminated by diversification.

Long-Term Purchases - securities purchased with the expectation that the value of those securities will grow over a relatively long period of time, generally greater than one year.

Our investment strategies and advice are based on the governing documents of each Fund. As such, we determine investments and allocations based upon the Funds' predefined objectives, risk tolerance, time horizon, financial information, liquidity needs and other various suitability factors. The governing documents' restrictions and guidelines may affect the composition of the Funds' portfolio.

Risk of Loss

Investing in securities involves risk of loss that you should be prepared to bear. We do not represent or guarantee that our services or methods of analysis can or will predict future results, successfully identify market tops or bottoms, or insulate clients from losses due to market corrections or declines. We cannot offer any guarantees or promises that your financial goals and objectives will be met. Past performance is in no way an indication of future performance.

Recommendation of Particular Types of Securities

The Funds will pursue their investment objectives by investing primarily in the open-end funds ("Component Funds") that comprise the NFI ODCE Index and other assets deemed appropriate by the Investment Manager, actively managing allocations to such Component Funds and investing in short-term investments and cash equivalents on an interim basis. Component Funds are referred to herein as those open-end funds that comprise the NCREIF Fund Index — Open End Diversified Core Equity (the "NFI-ODCE" or "NFI-ODCE Index").

Component Fund Risk

The performance of the Funds, which IDR manages, depends in large part upon the performance of the Component Funds, their managers and selected strategies. Redemption limitations may also restrict IDR's ability to terminate investments in Component Funds. Component Funds are not publicly traded and, therefore, are not liquid investments. As a result, the Funds will depend on Component Funds to provide a valuation of the Funds investments, which could vary from the fair value of the investment that may be obtained if such investment were sold to a third party. In addition to valuation risk, Component Funds are not entitled to the protections of the 1940 Act. For example, Component Funds may not have independent boards, may not require shareholder approval of advisory contracts, may employ high leverage, may engage in joint transactions with affiliates, and are not obligated to file financial reports with the SEC.

The Funds (a) may not be able to invest in certain Component Funds that are oversubscribed or closed, (b) may be able to allocate only a limited amount of assets to a Component Fund or (c) may have to wait a significant amount of time before the Component Fund has the capacity to accept a Funds subscription. Investments in certain Component Funds may be subject to lock-up periods, during which the Fund may not redeem its investment. The Funds may invest a substantial portion of

its assets in Component Funds that follow a particular type of investment strategy, which may expose the Funds to the risks of that strategy. Most of the Funds assets will be priced in the absence of a readily available market and may be priced based on determinations of fair value, which may prove to be inaccurate. Some of the Component Funds have made an election to be treated as a REIT for federal tax purposes or operative subsidiaries that have made such an election. Consequently, the tax risks also apply to these Component Funds or their subsidiaries.

In addition to the above, the investments are also subject to other risks including, but not limited to: Non-Diversification, Leveraging Risk, Management Risk, Market Risk, Real Estate Industry Concentration, REIT Risk, REIT Tax Risk, Investment Strategy Risk, Model and Data Risk, Tracking Error Risk, Intellectual Property Risk, and Cybersecurity Risk.

The offering materials, disclosure documents and/or governing documents of the Funds will typically include a more detailed summary of certain risk factors and should be read in conjunction with the discussion of the risks outlined above.

See the governing documents of the Funds for more details.

The Funds are primarily invested in private equity real estate-related assets that typically do not issue proxies.

In limited circumstances where we receive proxies in connection with a private equity real estate investment, we will determine how to vote proxies based on our reasonable judgment of the vote most likely to produce favorable financial results for you. Proxy votes generally will be cast in favor of proposals that maintain or strengthen the shared interests of shareholders and management, increase shareholder value, maintain or increase shareholder influence over the issuer's board of directors and management, and maintain or increase the rights of shareholders. Generally, proxy votes will be cast against proposals having the opposite effect. However, we will consider both sides of each proxy issue. Unless we receive specific instructions from you, we will not base votes on social considerations.

Except in the case of a conflict of interest as described below, we do not accept direction from you on voting a particular proxy.

Conflicts of interest between you and our firm, or a principal of our firm, regarding certain proxy issues could arise. If we determine that a material conflict of interest exists, we will take the necessary steps to resolve the conflict before voting the proxies. For example, we may disclose the existence and nature of the conflict to you, and seek direction from you as to how to vote on a particular issue; we

may abstain from voting, particularly if there are conflicting interests for you (for example, where your account(s) hold different securities in a competitive merger situation); or, we will take other necessary steps designed to ensure that a decision to vote is in your best interest and was not the product of the conflict.

We keep certain records required by applicable law in connection with our proxy voting activities. You may obtain information on how we voted proxies and/or obtain a full copy of our proxy voting policies and procedures by making a written or oral request to our firm.
