

CVC Credit Partners, LLC

Part 2A of Form ADV: Firm Brochure

712 Fifth Avenue, 42nd Floor
New York, New York 10019
www.cvc.com

March 31, 2021

This brochure provides information about the qualifications and business practices of CVC Credit Partners, LLC. If you have any questions about the contents of this brochure, please contact Ms. Anna Spector at (212) 506-3897. The information in this brochure has not been approved or verified by the U.S. Securities and Exchange Commission or by any state securities authority. CVC Credit Partners, LLC is a registered investment adviser. Registration with the U.S. Securities and Exchange Commission ("SEC") of an investment adviser does not imply any level of skill or training.

Additional information about CVC Credit Partners, LLC is also available on the SEC's website at: www.adviserinfo.sec.gov.

Item 2: Material Changes

This brochure was updated on March 31, 2021. It provides information that is different from or supplemental to information that CVC Credit Partners, LLC provided in our previous amended brochure filed on March 30, 2020 as part of our annual amendment. CVC Credit Partners, LLC is now updating its brochure to reflect the following material changes:

- Item 8: Updates to the Firm's risk disclosures covering Material Non-Public Information, Brexit and Epidemics and Pandemics.
- Item 10: Clarification on the separation between CVC Capital and CVC Credit.

Item 3: Table of Contents

Item 1:	Cover Page	1
Item 2:	Material Changes	2

Item 17:	Voting Client Securities.....	45
Item 18:	Financial Information.....	46

Item 4: Advisory Business

CVC Credit Partners, LLC, a Delaware limited liability company, which was originally formed on January 12, 2005, is a wholly owned subsidiary of CVC Credit Partners Investment Management Limited. CVC Credit Partners Investment Management Limited (“CVC Credit UK”) is a separately-organized U.K. investment adviser, which is regulated by the U.K. Financial Conduct Authority and is a Relying Adviser of CVC Credit Partners, LLC. The majority of interests in CVC Credit Partners Investment Management Limited are ultimately held by CVC Credit Partners Group Holding Foundation, a foundation incorporated under the laws of Jersey, Channel Islands (“CVC Credit Holding Foundation”). The current beneficiaries of CVC Credit Holding Foundation are the employees of the subsidiaries and holding companies from time to time of CVC Capital Partners Credit Partners Holdings Limited (which is the immediate subsidiary of the CVC Credit Holding Foundation), which will be a changing class of persons. Such beneficiaries have no direct rights to, or an interest in, the assets and income of the CVC Credit Holding Foundation unless and until CVC Credit Holding Foundation determines to provide a benefit.

Additionally, CVC Credit Partners’ global platform includes CVC Credit Partners European Investment Fund Manager Limited, which is regulated by the Jersey Financial Services Commission and is a Relying Adviser of CVC Credit Partners, LLC.

CVC Credit Partners, LLC and its Relying Advisers are collectively referred to herein as (“CVC Credit Partners”).

The CVC Credit Partners advisers above are under common ultimate control with two other registered investment advisers which focus on the management of collateralized loan obligation vehicles and are held under a separate ownership structure. These advisers are CVC Credit Partners U.S. CLO Management LLC in the U.S., which is regulated by the Securities and Exchange Commission, and CVC Credit Partners European CLO Management, LLP, which is regulated by the U.K. Financial Conduct Authority (collectively referred to herein as (“CVC Credit CLO Management.”)). Both advisers are wholly-owned subsidiaries of CVC Credit Partners Global CLO Management Limited, a closed ended private limited liability company incorporated in Jersey.

Collectively all the above investment advisers constituting CVC Credit Partners and CVC Credit CLO Management are referred to herein as (“CVC Credit”).

CVC Credit operates under the same branding, (“CVC”), as CVC Capital Partners, a leading private equity and investment advisory firm. As used in this brochure, the term CVC includes CVC Advisory Holding Foundation, CVC Capital Partners SICAV-FIS S.A., CVC Credit Partners Group Holding Foundation, and their respective subsidiaries and affiliates from time to time, but does not include portfolio companies of the investment funds advised by them. CVC’s private equity investment business (described further in Item 10 below) is referred to herein as “CVC Capital”.

CVC Credit provides investment advisory and sub-advisory services to investment vehicles, including collateralized loan obligations and collateral debt obligations (collectively, “CLOs”), other collective investment vehicles (“Managed Funds”), and separately managed accounts for institutional investors on a discretionary and non-discretionary basis (“Managed Accounts”),

together CVC Credit's ("Clients"). CVC Credit's Clients pursue primarily U.S. and European Performing Credit strategies (such as broadly syndicated bank loans, secured and leveraged loans, floating rate loans, second lien loans, corporate and high yield bonds, convertible bonds). and Private Credit strategies focusing on direct lending (privately negotiated loans to mid-market companies) and capital solutions/special situations (primary junior capital). In the pursuit of these strategies, CVC Credit will also utilize currency forwards and other derivative instruments on behalf of its Clients.

CVC Credit applies fundamental credit research analysis and a proactive management style to identify the most compelling opportunities in the credit markets, and seeks to maximize total returns and manage portfolio risk. CVC Credit generally provides investment advisory services under the terms of specific offering documents and other analogous governing documents (i) a collateral management agreement and indenture in the case of CLOs; (ii) a limited partnership agreement or an investment management agreement in the case of Managed Funds; and (iii) an investment management agreement or similar written agreement(s) in the case of Managed Accounts (together, "Client Agreements"). CVC Credit negotiates these documents, which set forth the specific services that will be provided by CVC Credit, with Clients before the commencement of the relevant advisory relationship. CVC Credit may also negotiate side letters with individual Managed Fund investors to accommodate specific reporting, regulatory, and similar requirements.

Each of the CLOs, Managed Funds and Managed Accounts for which CVC Credit provides investment advisory services may impose investment guidelines and limitations on the types of securities and other instruments in which each portfolio may invest. In particular, each CLO for which CVC Credit provides investment advisory services is governed by an indenture that places significant restrictions on the types of securities and other instruments that may be purchased on behalf of the CLO.

As of December 31, 2020, CVC Credit Partners had approximately \$19.3 billion of assets under management. Of the total assets under management, approximately \$17 billion is managed on a discretionary basis, with the remainder managed on a non-discretionary basis. Certain Managed Accounts, pursuant to the terms of their investment management agreements, require CVC Credit Partners to provide notice of any proposed investments. In such cases, the Managed Account Client has the right to reject any investment proposed by CVC Credit Partners.

Item 5: Fees and Compensation.

As a general matter the Client Agreements for each Client detail the fees payable by such Client. These fees are typically negotiated, will vary from Client to Client, and typically include a management fee and incentive fees, which are at the rates and under the terms described in the relevant governing documents.

The discussion below summarizes representative fee arrangements for each type of Client. All fees are negotiated with CLOs, Managed Funds and Managed Accounts before the advisory relationship commences. The governing documents of each CLO, Managed Fund and Managed Account include detailed information regarding fees and expenses paid by the Client. Clients and

investors should review the relevant governing documents and offering materials to fully understand the total amount of fees and expenses that may be paid.

Fees

CLOs

With respect to its CVC Credit-sponsored CLOs (“CVC Credit CLOs”):

- CVC Credit receives a senior management fee that is typically up to 20 basis points, calculated as a percentage of assets under management.
- CVC Credit receives a subordinated management fee that is typically up to 40 basis points and is calculated as a percentage of assets under management.
- CVC Credit also charges the CVC Credit CLOs an incentive fee, which is generally 20% of distributions per annum above a pre-determined hurdle rate, payable when the equity class of securities for each CLO has achieved a specified internal rate of return on investment.

Managed Funds

With respect to its Managed Funds:

- CVC Credit Partners receives a management fee, typically up to 200 basis points of assets under management.
- CVC Credit Partners also charges certain Managed Funds performance fees, of up to 20% of the overall profits of the account. Performance fees typically are payable subject to Managed Funds achieving a specified internal rate of return on investment.

Managed Accounts

With respect to its Managed Accounts:

- CVC Credit Partners receives a management fee that is typically up to 200 basis points of assets under management.
- CVC Credit Partners also charges certain Managed Accounts performance fees, of up to 20% of the overall profits of the account. Performance fees typically are payable subject to Managed Accounts achieving a specified internal rate of return on investment.

All fees attributable to CLOs managed by CVC Credit are paid quarterly to CVC Credit by independent trustees for the CLOs in accordance with the terms of the applicable indenture. The management fee attributable to each CLO is calculated by the trustee and confirmed by CVC Credit. Base management fees and incentive fees attributable to Managed Funds and Managed

Accounts are paid quarterly (with respect to the management fees) and annually (with respect to incentive fees) to CVC Credit Partners by the Client or an independent third-party custodian. Certain Managed Funds are required to pay base management fees quarterly in advance of the calendar quarter. If an investor in a Managed Fund redeems that interest during the quarter (as opposed to the end of the quarter), the investor is entitled to a pro-rata share of unearned management fees.

Types of Expenses Charged to CVC Credit Clients

CVC Credit's advisory fees are not inclusive of all the fees and expenses that Clients (and, indirectly, investors) may pay. The fees and/or expenses that Clients may possibly pay will typically fall into three general categories: (1) organizational expenses, (2) operational expenses, and (3) investment-related expenses. A summary of these expenses, which is not intended to be exhaustive, is provided below. The relevant Client Agreement may set forth specific expenses that will (or will not) be borne by a Client, and the provisions of Client Agreements will supersede this brochure to the extent of any direct conflict.

Organizational Expenses

Organizational expenses typically include fees, costs and expenses in connection with establishing and organizing a Client. This expense category generally includes the following:

- Legal, accounting, and filing fees, costs and expenses incurred in connection with the formation, organization and establishment of, or sale of interests in, the Client and its General Partner (if any),
- Expenses incurred in connection with any amendments, restatements or other modifications to, or the monitoring of compliance with, Client Agreements, side letters and other constituent or related documents of the Client and the General Partner (if any) and other comparable compliance and compliance monitoring-related activities, and
- Fees, costs and expenses incurred in connection with the marketing and offering of interests in the Client (including legal, accounting, filing, access to, and use of, databases, client relationship management systems ("CRM") or datarooms for posting the Client documents and due diligence materials, travel (including accommodation and meals), and printing).

Operational Expenses

Operational expenses generally include ongoing costs and expenses in connection with operating a Client portfolio, including those that are transactional and regulatory in nature. This expense category generally includes the following, to the extent permitted by applicable law:

- Legal, accounting (including third-party accounting services and systems), bookkeeping, consulting, rating agency, asset assignment and settlement, tax preparation and filing (including Schedules K-1), independent appraisal, audit, other professional fees;

- Costs, expenses and liabilities of a Client in respect of administration, reporting (including the use of CRM), custody, management, systems used for monitoring of investment guidelines, operation, termination, liquidation, winding up and dissolution, including the costs and expenses of legal and tax advisers, administrators, auditors and consultants incurred in connection therewith;
- Costs and expenses incurred in connection with tax, legal and regulatory compliance relating to the Client's activities (including, without limitation, regulatory filings of the General Partner (if any), CVC Credit and their affiliates relating to the Client's activities), information, and communication;
- Costs and expenses associated with reports, disclosures, and filings prepared in accordance with applicable US and non-US regulations, including but not limited to Form PF, the Alternative Investment Fund Managers Directive ("AIFMD"), the Markets in Financial Instruments Directive II ("MiFID II"), or any other regulatory requirement (including, without limitation, regulatory and "blue sky" filings), and any costs associated with outsourcing the completion of such reports;
- Costs and expenses of any litigation and other extraordinary expenses relating to the Client or an entity in which investments are made by the Client;
- Costs and expenses attributed to holding any meetings (including annual investor conferences) of the Client, including the Client's investors, the Client's board of directors or advisory committee (including expenses related to transportation, accommodations, meals, events, and entertainment);
- Insurance premiums and fees (including directors' and officers' liability and errors and omissions liability),
- Interest on and fees, costs and expenses associated with certain strategies involving the use of leverage and borrowings (including interest on principal, fees and other costs), guarantees or other indebtedness incurred by the Client (or a financing subsidiary thereof);
- Costs and expenses incurred in connection with the usage of data service providers such as Bloomberg terminal fees, Markit/WSO fees and other expenses incurred in connection with data services providing price feeds, news feeds, securities and company information, company fundamental data, and S&P Index Alerts; and
- Fees and expenses in connection with the settlement of loans, trade executions and other trade related documentation (included expenses incurred in connection with legal counsel, expert review of loan documents, and any vendors or service providers).

Investment-Related Expenses

Investment-related expenses generally include costs and expenses in connection with the pursuit or sourcing of particular investments and ongoing investment costs. This expense category generally includes the following, to the extent permitted by applicable law:

- Costs and expenses of identifying, investigating (including, without limitation, conducting diligence) evaluating, researching (including research-related travel), structuring and negotiating potential investments for a strategy (fees and expenses of any legal, financial, accounting, consulting or other advisors or lenders, investment banks and other financing sources and any deposits or down payments that are forfeited in connection with, or amounts paid as a penalty for, unconsummated transactions (i.e., “broken-deals”));
- Costs and expenses relating to the holding, administering, monitoring, financing, refinancing, managing, disposing and hedging investments (including proposed but unconsummated investments), brokerage commissions, sourcing agent fees, clearing and settlement charges, syndication fees, arranger fees, pricing and valuation fees (including appraisal fees), underwriting commissions and discounts, interest and investment fees, transaction fees, breakup fee, investment banking fees, advisory fees, bank charges, other investment costs and expenses related to closing, execution and transaction costs, custodial, trustee, transfer agent, recordkeeping and other administrative fees, origination fees, commitment fees, rating agency fees, collateral management fees, facility fees, float fees or similar fees;
- Fees, costs and expenses of attending conferences or similar meetings in connection with the sourcing and evaluation of potential investments on behalf of Clients, irrespective of whether any such investment is ultimately consummated;
- Any travel-related expenses related to or arising from the discovery, evaluation, investigation, development, acquisition or consummation, ownership, maintenance, monitoring, hedging, or disposition of investments, including potential investments (which includes travel expenses for the use of business class travel);
- Fees, costs and expenses for other third-party research, specialty data subscription and license-based services and risk analysis software, industry information, analytics and expert networks/research resources incurred in connection with the sourcing or evaluation of investments for Clients;
- Fees, costs and expenses of consultants, including senior advisors and industry advisors, and other technical consultants; where a consultant charges a retainer fee and, in addition, a sourcing fee which is paid in respect of specific investments or potential investments, the retainer fee will typically be borne by CVC Credit Partners, and the sourcing fee will typically be borne by the Clients participating (or potentially participating in) the relevant investment opportunity;

- The costs and expenses associated with attendance at meetings, such as board meetings or steering committee meetings in connection with portfolio company investments made on behalf of Clients;
- Investment-related expenses incurred in connection with sourcing or due diligence for transactions that are not consummated;
- Travel and accommodation expenses for CVC Credit personnel and third-party providers incurred in connection with a broken deal; and
- Any reverse breakup fees, deposits or down payments (including deposits made by CVC Credit on behalf of Clients) that are forfeited in connection with, or amounts paid as a penalty for, broken deals.

Expense Allocation and Attribution

Investors in a CVC Credit Partners Managed Fund will indirectly bear their pro rata share of such additional fees and expenses for the time period they are invested in the CVC Credit Partners Managed Fund. Certain expenses are incurred on behalf of multiple Clients, and on occasion, an expense will be incurred on behalf of CVC Credit or an affiliate of CVC Credit as well as one or more Clients. To address the potential conflicts of interest associated with the allocation of such expenses, CVC Credit has adopted an expense allocation policy designed to ensure equitable allocation of expenses among Clients and, as applicable, CVC Credit. Under the policy, the allocation of expenses will be determined by CVC Credit based on the following factors:

- the extent of each Client's utilization of the services associated with such expense;
- the relative benefit to each Client that is derived from such expense (or that is expected to be derived from such expense);
- with respect to transactions and broken deals, the size or expected size of each Client's participation in the transaction; and
- the relationship of such expense to the legal, contractual or other obligations of each of the Clients.

In applying these factors, CVC Credit will generally allocate expenses according to the following standards, subject to the relevant Client Agreement.

- Expenses that are obligations of CVC Credit and not obligations of any Client are allocated solely to CVC Credit. These include payroll and employee benefits, office expenses, and other expenses incurred in connection with the operations of CVC Credit.
- Organizational, operational, and investment-related expenses incurred solely by, or on behalf of, a single Client are allocated, in whole, to that Client.

- Expenses that are attributable to more than one Client are allocated between and among such Clients in a manner that is fair and equitable based on the factors described above. Barring unusual circumstances, broken-deal expenses will be allocated according to the Client's expected allocation to the transaction. Feeder funds generally will bear their own expenses, as well as a pro rata share of all master fund expenses based upon their relative percentage of ownership of such master fund. Expenses that benefit all Clients in a particular CVC Credit investment strategy (including, for example, research subscriptions, publications, and other third-party vendors contracted to provide company and industry level research) are typically allocated to all Clients within that strategy in a manner that is fair and equitable over time on the nature of the expenses and the benefit derived therefrom. Where co-investors have been permitted to participate in investments, expenses associated with such investments will typically be allocated to such co-investors and among Clients per the factors set forth above or as prescribed in the Client Agreements.
- Expenses attributable to CVC Credit and one or more Clients will generally be allocated in the same manner as expenses allocated among clients, except that the scope of benefit to CVC Credit shall also be considered when making the allocation. In addition, when CVC Credit engages consultants and vendors for deal sourcing purposes, CVC Credit will typically pay any retainer fee, and the applicable Client(s) who participate in the investment will typically pay the deal sourcing fee.

In circumstances where an expense is allocated amongst various Clients and/or a portion of an expense is allocated to CVC Credit, the expense allocation policy requires a review of each allocation by CVC Credit's compliance department. The allocation methodology used for recurring expenses is reviewed on an periodic basis by the Finance and Compliance departments. CVC Credit's expense allocation policy also provides for the periodic testing and review of expense allocations to assess the appropriateness of CVC Credit's expense allocation practices.

Item 6: Performance Based Fees and Side-by-Side Management

CVC Credit may charge both management fees based on the value of assets under management and performance-based fees (meaning, fees based on a share of capital gains on or capital appreciation of assets, "Incentive Fees") to certain of its Clients. Certain investors in Managed Funds incur lower or no Incentive Fees. The Incentive Fees often differ from one Client to another, as well as among investors in the same Managed Funds. The payment by some, but not all, Client of Incentive Fees or payment of Incentive Fee at varying rates creates an incentive for CVC Credit to disproportionately allocate, time services or functions to Client paying Incentive Fees or Clients paying Incentive Fees at a higher rate, or allocate investment opportunities to such Clients. Please see Item 10 for additional information on allocation and how conflicts of interest are generally addressed by CVC Credit.

Item 7: Types of Clients

CVC Credit provides investment advice to CLOs, Managed Funds and Managed Accounts. Managed Account Clients and investors in CLOs and Managed Funds include high net worth

individuals, banks, thrift institutions, pension and profit sharing plans, sovereign wealth funds, trusts, estates, charitable organizations, university endowments, corporations, limited partnerships and limited liability companies or other business entities. Investments in CLOs and Managed Funds are generally only available to institutional investors and certain high-net worth investors who are qualified purchasers. Acceptance of Non-US investors into CVC Credit Partner's Managed Funds also generally requires qualification as an institutional investor under local regulatory requirements of the jurisdiction in which they are based. CVC Credit Partner's Managed Funds generally have a specific minimum investment amount, which is set forth in their Investment Agreements.

Item 8: Methods of Analysis, Investment Strategies and Risk of Loss

Methods of Analysis and Portfolio Management

CVC Credit manages its Clients in accordance with their investment strategy, applicable Client Agreements, and other governing documents. Certain strategies and agreements may place more significant restrictions on CVC Credit's ability to make certain investments.

In analyzing investments, CVC Credit employs fundamental credit research with respect to each of the loans, bonds, and securities held in (or considered for) the CLOs, Managed Funds and Managed Accounts for which CVC Credit provides investment advisory services. CVC Credit operates a rigorous, multi-stage, bottoms-up, investment process designed to provide a centralized forum for investment evaluation across the CVC Credit investment teams. The investment team will seek to maintain a highly selective and systematic investment approach. The investment process concentrates on fundamental credit and technical market analysis to evaluate the portfolio suitability of each potential investment, in order to seek to identify, mitigate and manage risks. Critical to the assessment of each investment opportunity is the work done on the fundamental credit worthiness of the borrower, focusing on business risk, financial risk, and structural risk. This is evaluated through extensive analysis and due diligence on the target company which underpins the entire investment process.

CVC Credit utilizes multiple sources of information in analysing investments, including but not limited to: 1) annual reports, prospectuses, regulatory filings filed with U.S. and foreign regulators and company press releases; 2) newswires, research material prepared by broker-dealers and third party research providers, and corporate rating services; 3) third party consultants, expert networks, lawyers, accountants, commercial and investment banks, financial intermediaries, other investment and advisory institutions and its direct and indirect contacts through its association with CVC. CVC Credit personnel may participate in on-site visits, portfolio company management meetings, creditors' committees, industry groups, or steering committees or may sit on the boards of directors of Client held investments. CVC Credit will seek to leverage CVC's network of relationships and capital resources across Europe and the U.S. to identify and participate in investment opportunities. In connection with the evaluation of potential investment opportunities, CVC Credit may engage with individuals retained by certain expert networks. To mitigate and manage the risk of receiving non-public information from these sources, CVC Credit has implemented policies and procedures designed to avoid inadvertently obtaining proprietary and/or

confidential information from its interactions with all information sources, including CVC, industry contacts, as well as expert network consultants. CVC Credit may also enter into agreements with certain industry experts (“CVC Credit Advisers”), in connection with sourcing of investment opportunities for various Managed Funds and Managed Accounts.

Credit monitoring is actively performed on an ongoing basis with both formal and informal updates provided typically several times a week at various investment committee meetings. CVC Credit believes that effective investment management requires a consistent, disciplined and proactive approach to collecting the necessary details regarding: (i) borrower financial and operational performance; (ii) macroeconomic factors that affect and drive the borrower’s operating environment; and (iii) the competitive landscape. The ability to monitor performance at a very granular level in an accurate and timely manner is critical, and reliant upon access to high quality data in order to reduce risks and highlight opportunities. CVC Credit seeks to establish and build strong relationships with management teams to increase the investment team’s understanding of the issuer and industry dynamics. In addition to a detailed assessment of the operational performance of an investment, this monitoring process includes an evaluation of macro-economic, credit specific and event-driven factors for each investment, the results of which the investment team will utilize to make decisions on the appropriate action for each respective investment. In all situations, relative value analysis and focus on acceptable risks and returns are considered when determining whether a position should remain in the portfolio.

To the extent consistent with its fiduciary responsibilities, CVC Credit may integrate environmental, social, and governance (“ESG”) considerations into its investment analysis and decision-making process when implementing certain investment strategies. As part of the assessment of a potential investment’s quality and our approach to risk management, risks associated with a potential investment’s approach to ESG issues are evaluated. Notwithstanding the foregoing, CVC Credit does not intend to invest exclusively in issuers that do (or do not) take into consideration ESG issues. CVC Credit believes the integration of ESG considerations into the investment process provides a more meaningful approach with respect to sustainability risk management.

Investment Strategies

The investment strategies employed by CVC Credit in the management of its CLOs, Managed Funds, and Managed Accounts are more fully set forth in the Client Agreements.

General Risks

Risk of Loss

Any investment includes the risk of loss and there can be no guarantee that a particular level of return will be achieved. While CVC Credit seeks to mitigate risks so that they are appropriate to the potential return for the Client or strategy, it is usually not possible or desirable to fully mitigate risks. Prospective investors or Clients should carefully consider the following risks, along with those risk factors described in the applicable governing documents. There can be no assurance that investment strategies will be carried out successfully. Investors and Clients should understand that

they could lose some or all of their investment and should be prepared to bear the risk of such potential losses. The governing documents of each investment program, including the offering memoranda for the Managed Funds and CLOs, more fully explain the material risks associated with the Credit strategies managed by CVC Credit. Investors in Managed Funds and CLOs should review these documents in addition to the risk summaries below.

Strategy Risk

Strategy risk is associated with the failure or deterioration of an investment strategy such that most or all investment managers employing that strategy suffer losses. Strategy specific losses may result from excessive concentration by multiple market participants in the same investment or general economic or other events that adversely affect particular strategies (for example, the disruption of historical pricing relationships). An investment strategy may fail, and it may be difficult for CVC Credit to amend an investment strategy quickly or at all should certain market factors appear, which may have a material adverse effect on the Client.

Credit Risk

Performance and investor yield on the interests may be affected by the default or perceived credit impairment of debt investments. Credit risks associated with such investments include among others: (i) the possibility that earnings of the obligor may be insufficient to meet its debt service obligations; (ii) the obligor's assets declining in value; and (iii) the declining creditworthiness, default and potential for insolvency of the obligor during periods of rising interest rates and economic downturn. Any such investment may become defaulted for a variety of reasons, including non-payment of principal or interest, as well as breaches of contractual covenants. A defaulted investment may become subject to workout negotiations or may be restructured by, for example, reducing the interest rate, a write-down of the principal, and/or changes to its terms and conditions. Any such process may be extensive and protracted over time, and therefore may result in substantial uncertainty with respect to the ultimate recovery on the defaulted investment. In addition, significant costs might be imposed on the lender, further affecting the value of an investment. The liquidity in such defaulted investments may also be limited and, where a defaulted investment is sold, it is unlikely that the proceeds from such sale will be equal to the amount of unpaid principal and interest owed on that investment. This would have a material adverse effect on the value of the Client portfolio. In the case of secured loans, restructuring can be an expensive and lengthy process which could have a material negative effect on the anticipated return on the restructured loan.

Financial Market Fluctuations

General fluctuations in interest rates and the market prices of investments may adversely affect the value of the Client's investments. Instability and volatility in interest rates and the debt, equity and other relevant markets may also increase the risks inherent in a Client's investments. The ability of an underlying issuer to refinance debt may depend on the ability to sell new debt and equity in the market, to borrow from banks or do otherwise, which may not be achievable on favorable terms or at all. A deterioration of the global debt markets (particularly the E.U. and U.S. debt markets), any possible future failures of financial services companies or a significant rise in market

perception of counterparty default risk will likely significantly reduce investor demand and liquidity for investment grade, high-yield and senior bank debt, which in turn is likely to lead some banks and other lenders to be unwilling or significantly less willing to finance new investments or to only offer financing for investments on less favourable terms than had been prevailing in the past.

Conditions in the credit markets, in particular, may have a significant impact on the business of CVC Credit. For example, the credit markets in the United States have experienced a variety of difficulties and changed economic conditions in recent years that have adversely affected the performance and market value of many securities and financial instruments. There can be no assurance that Clients will not suffer material adverse effects from broad and rapid changes in market conditions in the future.

Although the continued unfolding of the credit cycle may result in attractive investment opportunities, CVC Credit may not be able to time its investments correctly, which could result in depreciation in values. Furthermore, market conditions could deteriorate further and CVC Credit may be limited in its ability to realize investments already made due to difficulties in buyers' ability to obtain financing on favorable terms, or to secure financing at all.

Cyber Security and Disaster Risk

Cyber security incidents and cyber-attacks have been occurring globally at a more frequent and severe level and will likely continue to increase in frequency in the future. Like other business enterprises, CVC Credit relies on the security and reliability of information and communications technology, systems and networks to conduct its business operations. A cybersecurity attack or incident that impacts that information or access to systems may expose CVC Credit, its Clients, service providers, and their respective operations, to potential risks. Specifically, CVC Credit and our service providers' information and technology systems may be vulnerable to damage or interruption from computer viruses or other malicious code, network failures, computer and telecommunication failures, infiltration by unauthorized persons and security breaches, usage errors by their respective professionals or service providers, power, communications or other service outages, as well as catastrophic events such as fires, tornadoes, floods, hurricanes and earthquakes.

Cybersecurity incidents can result from intentional (or deliberate) attacks or unintentional events by insiders or third parties, including cybercriminals, competitors, nation-states and "hacktivists," among others. If unauthorized parties gain access to such information and technology systems, they may be able to steal, publish, delete or modify private and sensitive information. Although CVC Credit, CVC, and relevant service providers have established business continuity plans and systems designed to prevent such cyber-attacks, there are inherent limitations in such plans and systems including the possibility that certain risks have not been identified. Breaches such as those involving covertly introduced malware, impersonation of authorized users and industrial or other espionage may not be identified even with sophisticated prevention and detection systems, potentially resulting in further harm and preventing it from being addressed appropriately. The failure of these systems and/or of disaster recovery plans for any reason could cause significant interruptions in CVC Credit's operations and result in a failure to maintain the security,

confidentiality or privacy of sensitive data, including personal information relating to Clients (and their beneficial owners), and may materially impair CVC Credit's ability to provide advisory services to Clients. Similar types of cyber security risks are also present for issuers of debt instruments in which CVC Credit Clients invest, which could result in material adverse consequences for such issuers, and may cause CVC Credit Clients' investment therein to lose value.

CVC Credit and its affiliates have established procedures and systems that we believe are reasonably designed to seek to reduce the risks associated with cybersecurity incidents. These efforts include encryption and next generation endpoint protection, IDS/IPS, bi-annual penetration and phishing testing, advanced two factor authentication and identity management systems, robust diligence as part of the vendor onboarding process, and a comprehensive cyber security training and education program. In light of the evolving nature of cybersecurity risks, there can be no guarantee that these efforts will succeed in avoiding or mitigating the potential impact of cybersecurity incidents, and CVC Credit cannot control the cybersecurity practices and systems of issuers or third-party service providers.

CVC Credit has also developed a business continuity plan that is designed to minimize the disruption of normal business operations in the event of a cybersecurity or other incident, such as a natural disaster, that would impact CVC Credit's normal operations. While CVC Credit believes that this plan is comprehensive and should enable us to continue or reestablish normal business operations in a timely manner in the event of an adverse incident, there are inherent limitations in such plans, including the possibility that contingencies have not been anticipated and procedures do not work as intended. In the case of a broader Significant Business Disruption, it is possible that CVC Credit or our key service providers could be prevented from providing services to Clients, or able to provide only limited services to Clients, for an extended periods of time. These circumstances may include, without limitation, acts of governments, any act of declared or undeclared war or of a public enemy (including acts of terrorism), power shortages or failures, utility or communication failure or delays, labor disputes, strikes, epidemics, shortages, supply shortages, and system failures or malfunctions.

Counterparty Risk

Clients will be exposed to the credit risk of the counterparties with which CVC Credit and Clients transact. These parties may include trading counterparties, clearing agents, exchanges, clearing houses, custodians, prime brokers, trustees, administrators and other financial intermediaries. These parties may default on their obligations to CVC Credit Clients due to bankruptcy, lack of liquidity, operational failure or other reasons and such failure of a broker may result in adverse consequences for the assets held by such party, which may in turn have an adverse effect on the value of the investments.

Material Non-Public Information

Investment professionals at CVC Credit may acquire confidential information concerning an entity in which Clients have invested, or in which CVC Credit is considering an investment on behalf of one or more Clients. Acquiring material, non-public information may limit CVC Credit's ability

to buy or sell particular securities or other instruments of the entity on behalf of a Client, and this in turn may limit the investment opportunities or exit strategies available to a Client.

CVC maintains an information barrier to isolate and prevent communication of material, non-public information between each of CVC Credit and CVC Capital, except as expressly provided for in the information barrier procedures and subject to appropriate procedural oversight. The purpose of this information barrier is, among other things, to confine any material, non-public issuer-specific or price sensitive information obtained by personnel on one side of the barrier so that the investment activities of the businesses on the other side of the barrier are not restricted as a result of the material non-public information being imputed to the personnel on the other side of the barrier. As a result of this information barrier, personnel of CVC Credit may not be able to use, act on or otherwise be aware of information that is known by or in the possession of the personnel of CVC Capital (and vice-versa). Collaboration between CVC Credit personnel and CVC Capital personnel may therefore be limited; this in turn may reduce potential synergies across CVC.

There currently are no formal information barriers between or among the various investment teams within CVC Credit (as discussed further in Item 10 below). Under certain circumstances, temporary information barriers may be put into place with respect to certain issuers, assets, personnel, or investment teams to manage the flow of information amongst the different investment teams of CVC Credit. CVC Credit currently operates a shared restricted list to which all of their respective Clients may be subject. Consequently, CVC Credit may not be able to buy or sell a particular security or other instrument on behalf of its Clients because one or more personnel of CVC Credit possesses material, non-public information concerning the instrument's issuer or the market for the issuer's securities or other instruments. Similarly, in such circumstances, CVC Credit may not be able to dispose of a security or other instrument owned by a Client, even in a declining market, until the information becomes publicly available or immaterial and the trading in the issuer's securities or instruments is no longer restricted.

In addition, CVC may in the future establish or modify other information barriers between one (1) division of CVC, on the one hand, and the rest of CVC on the other, or between the investment teams within a division of CVC. Additionally, the terms of confidentiality or other agreements with or related to companies in which CVC has or has considered making an investment or which is otherwise an advisory client of CVC may restrict or otherwise limit the ability of the Company to make investments in or otherwise engage in businesses or activities competitive with such companies. CVC may enter into one (1) or more strategic relationships in certain regions or with respect to certain types of investments that, although may be intended to provide greater opportunities for the Company, may require the Company to share such opportunities or otherwise limit the amount of an opportunity the Company can otherwise take.

Regulatory Risk

There is no assurance that the investments of CVC Credit will be able to: (i) obtain all required regulatory approvals not yet acquired, or that may need to be acquired in the future; (ii) obtain any necessary modifications to existing regulatory approvals; or (iii) maintain required regulatory approvals. Delay in obtaining or failure to obtain and maintain in full force and effect any

regulatory approvals, or amendments thereto, or delay or failure to satisfy any regulatory conditions or other applicable requirements could prevent operations of a portfolio company, impede the development of real estate assets, delay the completion of a previously announced acquisition or sale to third parties, or otherwise result in additional costs to a portfolio company, or other investment, and in turn the CVC Credit's Clients. The global investment strategy of CVC Credit, on its Client's behalf, is subject to complex, changing, and sometimes competing legal, tax, and regulatory regimes throughout the world, and there is a possibility that new or changing regulatory requirements could potentially have adverse effects on CVC Credit or its Clients. Derivative contracts, repurchase agreements, and similar instruments used to implement hedging and financing activities of CVC Credit, or its Clients, are generally subject to limited regulation. New regulation in the U.S. or in non-U.S. jurisdictions relating to such instruments may limit the ability of CVC Credit, or its Clients, to engage in the same or similar transactions in the future, and there is a possibility that regulatory agencies may treat these instruments differently than the manner intended by CVC Credit. Such developments may prevent or delay the implementation of hedging or financing transactions, or result in the termination of existing arrangements. CVC Credit, or its Clients, may not be able to re-establish similar arrangements in a timely manner, or on the same terms as the prior financing arrangement, or on any terms.

Brexit

The United Kingdom ceased to be a member of the EU on January 31, 2020 ("Brexit"). During a prescribed transition period, which ended on 31 December 2020, certain transitional arrangements were in effect, such that the United Kingdom continued to be treated, in most respects, as if it were still a member of the European Union, and generally remained subject to European Union law. On December 24, 2020, the European Union and the United Kingdom reached an agreement in principle on the terms of certain agreements and declarations governing the ongoing relationship between the European Union and the United Kingdom, including the European Union-United Kingdom Trade and Cooperation Agreement (the "TCA"). The TCA is limited in its scope primarily to the trade of goods, transport, energy links and fishing; in particular the TCA does not make any meaningful provision for the financial services sector. Uncertainties remain relating to certain aspects of the United Kingdom's future economic, trading and legal relationships with the European Union and with other countries.

The impact of such events on the Fund is difficult to predict but they may adversely affect the return on the Fund and its investments. There may be detrimental implications for the value of certain of the Fund's investments, their ability to enter into transactions or to value or realize such investments or otherwise to implement its investment program. It is possible that certain of the Fund's investments may need to be restructured to enable the Fund's objectives to be pursued fully. This may increase costs or make it more difficult for the Fund to pursue its investment objectives.

Force Majeure

Investments may be affected by events beyond the control of the relevant company in which the Clients have made an investment, including, without limitation, acts of God, fire, flood, earthquakes, outbreaks of an infectious disease, pandemic or any other serious public health concern, war, terrorism, labor strikes, major plant breakdowns, pipeline or electricity line ruptures,

failure of technology, defective design and construction, accidents, demographic changes, government macroeconomic policies, social instability, and so on. Some of these “force majeure” events may adversely affect the ability of a company to perform its obligations until it is able to mitigate the effects of the event, or the underlying circumstances change. These risks could, among other effects, adversely impact the cash flows available from a company in which the Clients have invested, cause personal injury or loss of life, damage property, or instigate disruptions of service. In addition, the cost to a company in which the Clients have invested of repairing or replacing damaged assets resulting from such force majeure event could be considerable. Events that persist for a lengthy period of time, for which no mitigation is available, may have a permanent adverse effect on a company in which the Clients have invested. Certain events (such as war or an outbreak of an infectious disease) could have a broader negative impact on the world economy and international business activity generally, or in any of the countries in which the Clients may invest specifically. Additionally, a major governmental intervention into industry, including the nationalization of an industry or the assertion of control over one or more companies in which the Clients have invested or its assets, could result in a loss to the Clients, including if the investment in such companies is cancelled, unwound or acquired (which could be without adequate compensation). Any of the foregoing may therefore adversely affect the performance of CVC Credit’s Clients and their investments.

Epidemics and Pandemics

The outbreak of COVID-19 is an unprecedented event that has been, and continues to be, impossible to predict and could have material adverse impacts on the performance of the investments in which a Client’s account invests and the performance of a Client’s account. It has led to global travel restrictions, market disruptions, economic uncertainty and recession, which have impacted markets negatively. The collective mitigation response to COVID-19 has resulted in a sharp contraction in many aspects of the U.S. and global economies, tightening liquidity, and increasing volatility and uncertainty in capital and other markets. These effects of COVID-19 have caused, and can continue to cause, a decline in the value of securities in which a client’s account invests. The economic uncertainty and impact of COVID-19 could continue in the short-term or could last for an extended period of time (depending upon, among other factors, the extent to which vaccines are widely disseminated) and result in a continuing or further economic downturn or recession. Health crises caused by outbreaks, such as COVID-19, can exacerbate other pre-existing political, social and economic/market risks. The overall impact of COVID-19 has negatively affected, and other epidemics and pandemics that arise in the future could negatively affect, the worldwide economy, as well as the economies of individual countries, national, state or local governments, individual companies (including CVC Credit, and our Clients and service providers) and the market in general in significant, potentially material, and unforeseen ways. For example, market disruptions and other events relating to COVID-19 have caused, and can continue to cause, market volatility, illiquidity in the money market, fixed income or other markets, a decline in interest rates to near zero with the possibility of negative interest rates, and a decline in the value of and/or returns on certain securities in which client accounts invest. If essential employees, or a significant number of employees, contract COVID-19 and are unable to perform their duties either at all or only in a significantly diminished capacity, the absence of these employees could adversely impact our ability to continue to remain fully operational and/or to provide services to client accounts. A remote working environment could also increase cyber risk given the increased cyber-

attack surface stemming from the use of personal devices or non-office or personal technology in a work-from-home environment.

Material Risks of Investment Strategies

Reinvestment Risk

For certain Clients, CVC Credit will generally reinvest without limitation any proceeds from investments for a specified period of time. The objective of reinvesting such capital contributions is to provide ongoing additional capital to potentially increase the total return from the investments to the investors. However, if such proceeds are reinvested, the investor's capital will continue to be subject to the risk of loss for a longer period of time. If reinvested proceeds are lost, such loss would offset at least a portion of any gains that may have been realized from prior investments, and it is possible that any such loss could exceed any such prior gains, thereby resulting in a possible loss of at least a portion of the investor's investment.

Interest Rate Risk

CVC Credit, on behalf of its Clients, generally invests in a combination of floating rate and fixed income securities. Generally, the value of fixed income securities will change inversely with changes in interest rates. As interest rates rise, the market value of fixed income securities tends to decrease. Conversely, as interest rates fall, the market value of fixed income securities tends to increase. This risk will be greater for long-term securities than for short-term securities. The value of equity securities is also affected by changes in interest rates. CVC Credit may or may not attempt to minimize the exposure of the portfolios of its Clients to interest rate changes through the use of interest rate swaps, interest rate futures and/or interest rate options. Even if CVC Credit does attempt to do so, there can be no guarantee that it will be successful in mitigating the impact of interest rate changes.

Credit Ratings are Not a Guarantee of Quality

Credit ratings of assets represent the rating agencies' opinions regarding their credit quality and are not a guarantee of quality. A credit rating is not a recommendation to buy, sell or hold assets and may be subject to revision or withdrawal at any time by the assigning rating agency. In the event that a rating assigned to any corporate debt obligation is lowered for any reason, no party is obligated to provide any additional support or credit enhancement with respect to such corporate debt obligation. Rating agencies attempt to evaluate the safety of principal and interest payments and do not evaluate the risks of fluctuations in market value; therefore, ratings may not fully reflect the true risks of an investment. Also, rating agencies may fail to make timely changes in credit ratings in response to subsequent events, so that an obligor's current financial condition may be better or worse than a rating indicates. Consequently, credit ratings of any corporate debt obligation should be used only as a preliminary indicator of investment quality and should not be considered a completely reliable indicator of investment quality. Rating reductions or withdrawals may occur for any number of reasons and may affect numerous assets at a single time or within a short period of time, with material adverse effects upon the corporate debt obligation. It is possible

that many credit ratings of assets included in or similar to the corporate debt obligation will be subject to significant or severe adjustments downward.

Investment in Loans

The value of any loans held on behalf of Clients may be detrimentally affected to the extent that a borrower defaults on its obligations. While CVC Credit may in certain instances attempt to minimize this risk by obtaining collateral, there can be no assurance that the value assigned by CVC Credit to collateralize an underlying loan can be realized upon liquidation, nor can there be any assurance that any such collateral will retain its value. Furthermore, circumstances could arise (such as in the bankruptcy of a borrower) that could cause a Client's interest in the loan's collateral to be invalidated. Also, much of the collateral will be subject to restrictions on transfer intended to satisfy securities regulations, which will limit the number of potential purchasers if CVC Credit intends to liquidate such collateral on behalf of a Client. The amount realizable with respect to a loan may be detrimentally affected if a guarantor, if any, fails to meet its obligations under a guarantee. Finally, there may be a monetary, as well as a time cost involved in collecting on defaulted loans and, if applicable, taking possession of various types of collateral.

CVC Credit may, on behalf of its Clients, invest in second lien loans. Second lien loans are subject to the same investment risks generally applicable to loans, as described above. Second lien loans are also subordinate in right of payment to one or more senior loans of the related obligor. As a result, second lien loans are subject to additional risk that the cash flow of the related obligor and the property securing the second lien loan may be insufficient to repay the scheduled payments to the lender after giving effect to any senior secured obligations of the related obligor. Second lien loans are also expected to be more illiquid than senior first lien loans.

Additionally, CVC Credit may, on behalf of its Clients, invest in unsecured loans. Unsecured loans are subject to the same investment risks generally applicable to loans described above but are subject to additional risk that the assets and cash flow of the related obligor may be insufficient to repay the scheduled payments to the lender after giving effect to any secured obligations of the obligor. Unsecured loans will be subject to certain additional risks to the extent that such loans may not be protected, and such loans are not secured by collateral, financial covenants or limitations upon additional indebtedness. Unsecured loans are also expected to be a more illiquid investments than senior loans.

Furthermore, under the agreements governing most syndicated loans, if a holder of an interest in a syndicated loan wishes to call a default or exercise remedies against a borrower, it generally may not do so without the agreement of at least a majority of the other lenders. In addition, actions could be taken by a majority of the other lenders, or in some cases, a single agent bank, without the consent of all lenders. Each lender would nevertheless be liable to indemnify the agent bank for its ratable share of expenses or other liabilities incurred in such connection and, generally, with respect to the administration and any renegotiation or enforcement of the syndicated loans. Moreover, an assignee or participant in a loan may not be entitled to certain gross-up payments in respect of withholding taxes and other indemnities that otherwise might be available to the original holder of the loan. As lenders, CVC Credit Clients may be subject to the foregoing risks.

CVC Credit invests, on behalf of its Clients, in senior loans acquired through assignment or participations. In purchasing participations, the Client will usually have a contractual relationship only with the selling institution, and not the borrower. A Client generally will have no right directly to enforce compliance by the borrower with the terms of a loan agreement, nor any rights of set-off against the borrower, nor will it have the right to object to certain changes to or waivers under the loan agreement, which was agreed to by the selling institution. A Client may not directly benefit from the collateral supporting the related senior loan and may not be subject to any rights of set-off that the borrower has against the selling institution.

In addition, in the event of the insolvency of the selling institution in participation, a Client may be treated as a general creditor of such selling institution, and may not have any exclusive or senior claim with respect to the selling institution's interest in, or the collateral with respect to, the senior loan. Consequently, a Client may be subject to the credit risk of the selling institution as well as of the borrower. Certain senior loans or loan participations may be governed by the law of a jurisdiction other than the United States or a U.S. state which may present additional risks with regards to the characterization under such laws of such participation in the event of the insolvency of the selling institution or the borrower.

CVC Credit may aggregate bank debt investments to be purchased by one or more Clients with bank debt investments to be purchased by other Clients. In order to effect a bank debt purchase on behalf of multiple Clients, CVC Credit may be required by the selling institution, or may otherwise elect for investment, administrative, or other reasons to cause a single Client to purchase the bank debt and be the holder of record of the bank debt, and enter into sub-participation agreements or other similar arrangements with other Clients, allowing multiple Clients to participate in the positive and negative economic performance of the bank debt or other investments without actually owning the bank debt directly. This arrangement can, in certain cases, create conflicts among participating Client accounts. To address conflicts regarding the pricing of sub-participations, CVC Credit prices the sub-participations at the price paid by the issuing Client to the third-party from which it purchased the debt so that the economic effect of the transaction is the same as if the participants purchased directly from the third-party seller. Additionally, under the terms of participation arrangements, one or more Clients can be required to make future payments to another Client, and if any other fund or account were to default on its respective obligations to the Client that issues the participation, that Client could be adversely impacted. Also, where the issuing Client acts as the lender of record with respect to any purchase of bank debt or other investments, it may have greater administrative burdens and greater exposure to third-party claims than other funds and accounts that hold the interest by participation. When the issuing Client holds bank debt or other investments in a Client account managed by CVC Credit, the interest of the issuing Client and other participating Clients are typically aligned, and CVC Credit engages in administrative and risk oversight of the position on behalf of the issuing Client and all participating Clients. Where an issuing Client or participating Client seeks to liquidate a position, CVC Credit may be required to terminate the entire position, even if it would not otherwise seek to terminate the position for other Clients. CVC Credit may seek to establish an alternative issuing Client, reallocate participations in accordance with internal procedures for cross or principal transactions and applicable law, or take other steps to mitigate these risks, but the opportunity to mitigate these risks will not be available in all cases and/or may involve additional expenses and potential loss of capital.

Investment in Leveraged Loans

The underlying investments made by CVC Credit are comprised primarily of leveraged loans, which have significant liquidity and market value risks since they are not generally traded on an organized exchange but are traded by banks and other financial institutional investors engaged in loan syndications. Because loans are privately syndicated and loan agreements are privately negotiated and customized, loans are not purchased or sold as easily as publicly traded securities.

Investing in Non-U.S. Assets

CVC Credit may, on behalf of its Clients, invest in non-U.S. assets. Investing in securities or other instruments issued outside of the U.S. involves considerations and possible risks not typically involved in investing in instruments of companies domiciled and operating in the U.S., including the possibility of expropriation, limitations on the use or removal of funds or other assets, changes in governmental administration or economic or monetary policy (initiated from the U.S. or from abroad) or changed circumstances in dealings between nations. The application of foreign tax laws (e.g., the imposition of withholding taxes on dividend, interest or other payments) or confiscatory taxation may also affect investment in non-U.S. securities or other instruments. Higher expenses may result from investment in non-U.S. instruments than would from investment in U.S. securities or other instruments because of the costs incurred in connection with conversions between various currencies and the fact that foreign brokerage commissions may be higher than commissions charged in the U.S. Non-U.S. securities markets also may be less liquid, more volatile and less subject to governmental supervision than U.S. markets. Investments in non-U.S. countries could be affected by other factors not present in the U.S., including lack of uniform accounting, auditing and financial reporting standards and potential difficulties in enforcing contractual obligations.

Leverage

CVC Credit may, on behalf of its Clients, utilize leverage through margin borrowing, use of derivatives, and through certain other financial transactions. Leverage increases returns to Clients if they earn a greater return on leveraged investments than their cost of such leverage. However, the use of leverage exposes the Client to additional levels of risk including (i) greater losses from investments than would otherwise have been the case had the Client not borrowed to make the investments, (ii) margin calls or changes in margin requirements may force premature liquidations of investment positions, (iii) losses on an investment where the investment fails to earn a return that equals or exceeds the Client's cost of leverage related to the investment and (iv) fluctuations in interest rates on the Client's borrowings, which may have a negative effect on the Client's profitability. In case of a sudden, precipitous drop in value of a Client's assets, the Client might not be able to liquidate assets quickly enough to repay its borrowings, further magnifying the losses incurred by the Client. In addition to the enhanced portfolio volatility and risk that may arise from the use of leverage, the financial transactions that establish leverage generally subject Clients to credit risk with respect to the counterparty. Leveraging transactions often involve the transfer of legal title, pledge, or other encumbrance of underlying investments. Accordingly, the insolvency

or bankruptcy of a financing counterparty may result in legal action that impairs the value, marketability, or ownership rights of the underlying investments used as collateral.

Difficulty and Cost of Locating Suitable Investments

There is no guarantee that suitable deal flow will be available so that the Managed Funds and Managed Accounts will be able to invest its available capital during the applicable commitment period or that any such investments will be successful. The success of the Managed Funds and Managed Accounts depends on the ability of CVC Credit Partners to identify, select, effect and realise appropriate investments. Accordingly, CVC Credit Partners may only make a limited number of investments in connection with the mid-market and special situations strategies. These investments may involve a high degree of risk and poor performance by a few could significantly affect the return to investors.

Default of an Investment

Performance and yield on CVC Credit's investments may be affected by the default or perceived credit impairment of investments made by CVC Credit and by general or sector specific credit risk spread widening. Credit risks associated with the investments may include the possibility that the earnings of an obligor may be insufficient to meet the debt service obligations, or an obligor's assets declining in value. An economic downturn and/or rising interest rates could severely disrupt the market for the investments and adversely affect the performance. Any such investment may become defaulted for a variety of reasons, including non-payment of principal or interest, as well as breaches to the contractual covenants. In the event of a default, CVC Credit and those Clients who hold the investment will bear the risk of loss of principal and accrued interest on that investment.

Currency Risks

Investments in securities or other instruments that are denominated in a currency other than that in which an investment in a Client is made are subject to the risk that the value of a particular currency will change in relation to one or more other currencies. Among the factors that may affect currency values are trade balances, the level of short-term interest rates, differences in relative values of similar assets in different currencies, long-term opportunities for investment and capital appreciation and political developments.

Lack of Liquidity of Assets, Valuation

A Client's assets may, at any given time, include securities and other financial instruments or obligations that are thinly traded or for which no market exists and/or which are restricted as to their transferability under applicable securities laws. The sale of any such investments may be possible only at substantial discounts, and it may be extremely difficult to value accurately any such investments. The process of valuing securities for which reliable market quotations are not available is based on inherent uncertainties, and the resulting values may differ from values that would have been determined had a ready market existed for such securities, from values placed on such securities by other investors and from prices at which such securities may ultimately be sold.

Securities and other instruments held by Clients may routinely trade with significant bid-ask spreads. At times, third-party pricing information may not be available for certain positions held by a Client. CVC Credit Partners is entitled to rely, without independent investigation, upon pricing information and valuations furnished to CVC Credit Partners by third-parties, including any independent third-party pricing services selected by CVC Credit Partners. In addition, certain cross-transactions and other transactions between Clients managed by CVC Credit Partners, to the extent permitted, are subject to valuation risk.

Liquidity Risk

Certain of the credit investments held by Clients are highly illiquid, and there can be no assurance that Clients will be able to realize these investments in a timely manner. It is unlikely that there will be a public market in certain of the investments held in Client portfolios. Clients generally will not be able to sell securities held in their investment portfolios publicly unless their sale is registered under applicable securities laws, or unless an exemption from such registration requirements is available. In some cases Clients may be prohibited by contract or regulatory requirements from selling investments for a period of time. In the event of a margin call or other loan repayment at a time when the Client does not have sufficient cash assets to cover such call or payment, it may be forced to liquidate certain investments at less than their expected returns, thereby resulting in lower realized proceeds to Client.

Investments in Companies in Regulated Industries

Certain industries, such as the energy, healthcare, communications, and technology industries, are heavily regulated. Clients may invest in underlying issuers operating in industries that are subject to greater amounts of regulation than other industries generally. Investments in underlying issuers that are subject to greater amounts of governmental regulation pose additional risks relative to investments in other companies generally. Changes in applicable laws or regulations, or in the interpretations of these laws and regulations, could result in increased compliance costs or the need for additional capital expenditures. If an underlying issuer fails to comply with these requirements, it could also be subject to civil or criminal liability and the imposition of fines. An underlying issuer also could be materially and adversely affected as a result of statutory or regulatory changes or judicial or administrative interpretations of existing laws and regulations that impose more comprehensive or stringent requirements on such issuer. Governments have considerable discretion in implementing regulations that could impact an issuer's business and governments may be influenced by political considerations and may make decisions that adversely affect an issuer's business. Additionally, certain underlying issuers may have a unionized workforce or employees who are covered by a collective bargaining agreement, which could subject any such underlying issuer's activities and labor relations matters to complex laws and regulations relating thereto. An underlying issuer's operations and profitability could suffer if it experiences labor relations problems.

Expedited Transactions

Investment analyses and decisions will often be undertaken on an expedited basis to take advantage of investment opportunities. In such cases, the information available at the time of the investment

decision may be limited, and CVC Credit may not have access to the detailed information necessary for a more thorough evaluation of the investment opportunity. In addition, the financial information available regarding a potential investment may not be accurate or provided based upon accepted accounting methods. CVC Credit may rely upon independent consultants in connection with its evaluation of proposed investments. There can be no assurance that these consultants will accurately evaluate such investments.

Concentrated Portfolio

Since CVC Credit will, on behalf of its Clients, invest primarily in the credit markets, Client portfolios generally will not be as diversified as other investment vehicles and may end up with relatively fewer investments. In addition, because of the time it may take to source appropriate investments, certain Managed Funds and Managed Accounts will not initially be diversified. One risk of having a limited number of investments is that the aggregate returns realised by investors may be substantially adversely affected by the unfavourable performance of even a single investment. Accordingly, investments may be subject to a more rapid change in value than would be the case if CVC Credit were required, on behalf of its Clients, to maintain a wide diversification among types of securities, geographical areas, issuers and/or industries.

Risks Associated with Hedging Transactions and Derivative Instruments

In connection with the financing of certain investments, CVC Credit may employ hedging techniques on behalf of its Clients designed to reduce the risks of adverse movements in interest rates, securities' prices and/or currency exchange rates. However, even if CVC Credit seeks to hedge certain of these risks, some residual risk to Clients may remain as a result of imperfections and inconsistencies in the market and/or in the hedging contract. While such hedging transactions may reduce certain risks, they may create or magnify others, including, but not limited to, counterparty credit risk and risks associated with the use of derivatives.

There may be an imperfect correlation between the instrument acquired for hedging purposes and the investments or market sectors being hedged, in which case, a speculative element is added to the position acquired through a derivative instrument primarily for hedging purposes. Failure to properly hedge the market risk in the investments and/or default of a counterparty in the performance of its obligations under a hedging contract could have a material adverse effect on the Client, and such adverse effects may exceed those which may have resulted had no hedging strategy been employed.

Middle-Market Companies

CVC Credit Partners, on behalf of its Clients, invests in the debt obligations or securities of middle-market and/or less well-established companies in both the U.S. and Europe. While middle-market companies may have the potential for rapid growth, they often involve higher risks than larger companies. Middle-market companies have more limited financial resources than larger companies and may be unable to meet their obligations under their debt obligations, which may be accompanied by deterioration in the value of any collateral and a reduction in the likelihood of Clients realising any guarantees they may have obtained in connection with their investment.

Middle-market companies also typically have shorter operating histories, narrower product lines and smaller market shares than larger businesses, which tend to render them more vulnerable to competitors' actions and market conditions, as well as general economic downturns. Less publicly available information may be available about these companies and they may not be subject to the financial and other reporting requirements applicable to public companies. They are more likely to depend on the management talents and efforts of a small group of persons; therefore, the death, disability, resignation or termination of one or more of these persons could have a material adverse impact on the company and, in turn, on the Client. Middle-market companies may also have less predictable operating results and may require substantial additional capital to support their operations, finance expansion or maintain their competitive position. They may also have difficulty accessing the capital markets to meet future capital needs, which may limit their ability to grow or to repay their outstanding indebtedness upon maturity. If these companies are private companies, there will not be as much publicly available information about these companies as there is for public companies and such information may not be of the same quality. CVC Credit Partners European and US mid-market strategy Managed Funds and Managed Accounts will generally focus on debt investments in middle-market companies. CVC Credit Partners may determine whether companies are US or European-based or qualify as ("Middle-Market") in its sole discretion, subject to the terms of the relevant governing documents.

Follow-On Investments

Following an initial investment, CVC Credit may provide additional Client funds to the company. There is no assurance that CVC Credit will make follow-on investments or that Clients will have sufficient funds to make all or any of such investments. Any decision by CVC Credit not to make follow-on investments or its inability to make such investments may have a substantial adverse effect on the borrower in need of such an investment. Additionally, a failure to make such investments may result in a lost opportunity for a Client to increase its participation in a successful investments or result in the dilution of ownership in an investment if a third party makes the follow-on investment.

Exposure to Originated Investments

From time to time, certain of CVC Credit Partners Clients will originate certain investments with the expectation of later syndicating a portion of such investment to other affiliated funds or third parties. Prior to such syndication, or if such syndication is not successful, such Client's exposure to the originated investment will likely exceed the exposure that CVC Credit Partners intends for its Client to have over the long-term.

Special Situations

CVC Credit Partners may, on behalf of certain Clients, invest in companies involved in (or the target of) acquisition attempts or tender offers or in companies involved in work-outs, liquidations, spin-offs, reorganizations, bankruptcies and similar transactions. In any investment opportunity of this nature, there exists the risk that the contemplated transaction will be unsuccessful, will take considerable time or will result in a distribution of cash or a new security whose value will be less than the purchase price. Similarly, if an anticipated transaction does not in fact occur, the Client

may be required to sell its investment at a loss. Because there is substantial uncertainty concerning the outcome of transactions involving financially troubled companies in which CVC Credit Partners may invest, there is a potential risk of loss by the Client of its entire investment in such companies.

Investments in Non-Performing Loans

Certain of CVC Credit Partner's investments are expected to include investments in non-performing and sub-performing loans which often involve workout negotiations, restructuring and the possibility of foreclosure. These processes are often lengthy and expensive. In addition, investments will likely include securities and debt obligations of financially distressed issuers, including companies involved in bankruptcy or other reorganization and liquidation proceedings. As a result, certain of CVC Credit Partner's Clients may be subject to additional bankruptcy related risks, and returns on such investments may not be realized for a considerable period of time.

High-Yield Securities

CVC Credit may, on behalf of its Clients, invest in bonds or other fixed income securities, including without limitation, commercial paper and "higher yielding" (and, therefore, higher risk) debt securities, when CVC Credit believes that such securities offer opportunities for profit. These securities may be below "investment grade" and face ongoing uncertainties and exposure to adverse business, financial or economic conditions which could lead to the issuer's inability to make timely interest and principal payments. The market values of certain of these lower-rated debt securities tend to reflect individual corporate developments to a greater extent than do higher-rated securities, which react primarily to fluctuations in the general level of interest rates, and tend to be more sensitive to economic conditions than are higher-rated securities. It is likely that a major economic recession or an environment characterized by a shortage of liquidity could severely disrupt the market for these securities and may have an adverse impact on their value or liquidity. Moreover, it is likely that any such economic downturn or liquidity squeeze could adversely affect the ability of the issuers of these securities to repay principal and pay interest thereon and increase the incidence of default for these securities. In addition, adverse publicity and investor perceptions about lower-rated securities, whether or not based on fundamental analysis, may be a contributing factor in a decrease in the value and liquidity of lower-rated securities. The market for lower-rated securities is thinner and less active than that for higher-rated securities, which can adversely affect the prices at which these securities can be sold.

Distressed Assets

CVC Credit Partners may on behalf of its Clients invest in "distressed assets" securities, private claims and obligations of entities that are experiencing significant financial or business difficulties or have filed for Chapter 11 protection under the U.S. Bankruptcy Code. Investments may include loans, commercial paper, loan participations, trade claims held by trade or other creditors, stocks, partnership interests and similar financial instruments, executory contracts and options or participations therein not publicly traded.

Distressed assets may result in significant returns to Clients, but also involve a substantial degree of risk. A Client may lose a substantial portion or all of an investment in a distressed environment or may be required to accept cash or securities with a value less than the Client's investment. Among the risks inherent in investments in entities experiencing significant financial or business difficulties is the fact that it frequently may be difficult to obtain information as to the true condition of these issuers. These investments also may be adversely affected by state and federal laws relating to, among other things, fraudulent conveyances, voidable preferences, lender liability and the bankruptcy court's discretionary power to disallow, subordinate or disenfranchise particular claims. The market prices of these instruments are also subject to abrupt and erratic market movements and above average price volatility and the spread between the bid and ask prices of these instruments may be greater than normally expected. In trading distressed securities, litigation is sometimes required. Such litigation can be time-consuming and expensive, and can frequently lead to unpredicted delays or losses.

Mezzanine Investments

Certain Clients may make mezzanine investments, which investments are expected to be unsecured and made in companies whose capital structures have significant indebtedness ranking ahead of the investments, all or a significant portion of which may be secured. While the investments may benefit from the same or similar financial and other covenants as those enjoyed by the indebtedness ranking ahead of the investments and may benefit from cross-default provisions and security over the issuer's assets, some or all of such terms may not be part of particular investments. Moreover, the ability of a Client to influence such an issuer's affairs, especially during periods of financial distress or following an insolvency, is likely to be substantially less than that of senior creditors. Mezzanine investments generally are subject to various risks, including, without limitation: the possible invalidation of an investment transaction as a "fraudulent conveyance," (ii) the recovery of liens perfected or payments made on account of a debt in the period before an insolvency filing as a "preference," (iii) equitable subordination claims by other creditors, (iv) so called "lender liability" claims by an issuer of the obligations and (v) environmental liabilities that may arise with respect to collateral securing the obligations.

Equity and Equity-Like Investments

Certain CVC Credit Partners Clients may invest in preferred equity interests, convertible securities, warrants and otherwise in securities that have equity-like features and may otherwise end up owning equity securities as part of making or owning a debt instrument (e.g., in the case of foreclosure). Any equity interest owned by the Clients will generally rank junior to all existing and future indebtedness, including commercial mezzanine loans and senior debt. In the event of a bankruptcy, liquidation, reorganisation or other winding-up with respect to an issuer in which the Client holds an equity interest, the Client will bear a risk of loss principal as such interests are not generally secured.

Convertible Securities

CVC Credit Partners, on behalf of its Clients, may invest in convertible securities, which are bonds, debentures, notes, preferred stocks or other securities that may be converted into or exchanged for a specified amount of common stock of the same or different issuer within a particular period of

time at a specified price or formula. A convertible security entitles the holder to receive interest that is generally paid or accrued on debt or a dividend that is paid or accrued on preferred stock until the convertible security matures or is redeemed, converted or exchanged. Convertible securities have unique investment characteristics in that they generally (i) have higher yields than common stocks, but lower yields than comparable non-convertible securities, (ii) are less subject to fluctuation in value than the underlying common stock due to their fixed income characteristics and (iii) provide the potential for capital appreciation if the market price of the underlying common stock increases.

Credit Derivatives

CVC Credit Partners may, on behalf of its Clients, engage in trading in credit derivative contracts, which are contracts that transfer price, spread and/or default risks of debt and other instruments from one party to another, both for bona fide hedging of existing long and short positions, but also for independent profit opportunities. Such instruments may include one or more credits. The market for credit derivatives may be relatively illiquid, and there are considerable risks that may make it difficult either to buy or sell the contracts as needed or at reasonable prices. There are also risks with respect to credit derivatives in determining whether an event will trigger payment under the contract and whether the payment will offset the loss or payment due under another instrument. Generally, a credit event means bankruptcy, a failure to pay, the acceleration of an obligation or modified restructuring of a credit obligation or instrument.

CVC Credit Partners may, on behalf of its Clients, be either the buyer or seller in these transactions. If CVC Credit Partners is a buyer of credit protection on behalf of its Clients and no credit event occurs, the Client may recover nothing. If a credit event occurs, the Client, as a buyer, typically will receive full notional value for a reference obligation that may have little or no value. Buyers of credit derivatives carry the risk of non-performance by the seller due to an inability to pay.

As a seller of credit protection, a Client would typically receive a fixed rate of income throughout the term of the contract, which typically is between one month and five years, provided that no credit event occurs. If a credit event occurs, the seller may pay the buyer the full notional value of the reference obligations. Sellers of credit derivatives carry the inherent price, spread and default risks of the underlying instruments.

Credit default swaps involve greater risks than if the Client had invested in the reference obligation directly. In addition to general market risks, credit default swaps are subject to liquidity risk and credit risk. A buyer of credit protection also may lose its investment and recover nothing if no credit event occurs. If a credit event does occur, the value of the reference obligation received by the seller, coupled with the periodic payments previously received, may be less than the full notional value it pays to the buyer, resulting in a loss of value to the Client. Further, in certain circumstances, the buyer can receive the notional value of a credit default swap only by delivering a physical security to the seller, and is at risk if such deliverable security is unavailable or illiquid. Such a delivery crunch is a distinct risk of these investments.

The credit derivatives market is a rapidly evolving market. As a result, different participants in the credit derivatives markets may have different practices or interpretations with respect to

applicable terms and definitions, and ambiguities concerning such terms or definitions may be interpreted or resolved in ways that are adverse to Clients. Additionally, there may be circumstances and market conditions (including the possibility of a large number of buyers of credit default swaps being required to deliver the same physical security in the same time frame) that have not yet been experienced and that could have adverse effects on a Client's investments.

Short Sales

CVC Credit Partners may, on behalf of its Clients, engage in short sales of securities. Short sales can, in certain circumstances, substantially increase the impact of adverse price movements on a Client's portfolio. A short sale involves the risk of sudden and substantial losses (for example in the case of an acquisition proposal at a substantial premium over an issuer's market price), losses in an amount greater than the amount invested, and a theoretically unlimited risk of loss based on an unlimited potential increase in the market price of the particular investment sold short. These risks could in turn result in an inability to cover the short position, and CVC Credit Partners may be unable to cover short positions on a timely basis for other reasons, including the possibility that CVC Credit Partners will be prohibited from trading a security because it has material nonpublic information about the issuer or is otherwise subject to regulatory or operational impediments to trading. There is also a risk that a Client would be forced to return the securities it borrows in connection with a short sale, to the securities lender on short notice. If a request for the return of borrowed securities occurs at a time when other short sellers of the security are receiving similar requests, a short squeeze can occur, and a Client may be compelled to replace borrowed securities previously sold short with purchases on the open market at the most disadvantageous time, possibly at prices significantly in excess of the proceeds received in originally selling the securities short.

Investment Litigation Risk

Financial performance of underlying issuers in which CVC Credit has invested may be affected from time to time by litigation such as contractual claims, occupational health and safety claims, public liability claims, environmental claims, industrial disputes, tenure disputes and legal action from special interest groups. Such litigation could materially reduce the value of a Client's investments. CVC Credit's investment activities subject it, and Clients, to the normal risks of becoming involved in litigation by third parties. This risk is somewhat greater where CVC Credit exercises control or significant influence over a company's direction.

Participation on Creditors' Committees

CVC Credit, on behalf of its Clients may elect to appoint a representative to serve on creditors' committees, official or unofficial, equity holders' committees or other groups (in addition to boards of directors) to ensure preservation or enhancement of the investment as a creditor or equity holder. A member of any such committee or group may owe certain obligations generally to all parties similarly situated that the committee represents. If CVC Credit concludes that its obligations owed to the other parties as a committee or group member conflict with its duties owed to its Clients, it may resign from that committee or group, and the Clients may not realise the benefits, if any, of participation on the committee or group. In addition, and also as discussed above, if a Client is represented on a committee or group, it may be restricted or prohibited under applicable law from

disposing of or increasing its investments in such underlying issuer while it continues to be represented on such committee or group and potentially thereafter.

Structured Products

CVC Credit Partners may invest in structured products, including CLOs and other pools of loans. The Client's investments in structured products will be subject to a number of risks, including risks related to the fact that the structured products will be leveraged. Many structured products contain covenants designed to protect the providers of debt financing to such structured products. A failure to satisfy those covenants could result in the untimely liquidation of the structured product and potentially a complete loss of the investment. In addition, if the particular structured product is invested in a security in which the Client is also directly invested, this would tend to increase the Fund's overall exposure to the credit of the issuer of such securities. The value of an investment in a structured product will depend on the investment performance of the underlying assets or interests in which the structured product invests and will, therefore, be subject to all of the risks associated with an investment in those underlying assets or interests. These risks include the possibility of a default by, or bankruptcy of, the issuers of such assets or a claim that the pledging of collateral to secure any such asset constituted a fraudulent conveyance or preferential transfer that can be subordinated to the rights of other creditors under applicable law. Any such structured products may include one or more underlying issuers in which one or more of CVC Credit's Clients have acquired an interest, including CVC Capital Portfolio Companies. In addition, in the case where the Client is invested in structured products, the diversification limitations set forth in the Client Agreements will be applied separately to each underlying issuer and/or borrower comprising such structured product. This may result in an unintended concentration of the Client's investments in a limited number of issuers.

CLOs

Certain of CVC Credit Partner's Clients may have investment strategies permissive of investments in CLO notes. Generally, CLO notes will have limited liquidity and are subject to substantial transfer restrictions. CLO notes are often illiquid investments and there is no established secondary market for the notes. There can be no assurance that any secondary market for any of the notes will develop, or if a secondary market does develop. Securities issued in securitizations transactions may experience high volatility and significant fluctuations in market value. Additionally, some potential buyers of such securities may view securitization products as an inappropriate investment, or may be unable to invest in them due to regulatory reasons (EU and Japanese securitization rules), thereby reducing the number of potential buyers and/or potentially affecting liquidity in the secondary market.

Item 9: Disciplinary Information

Neither CVC Credit nor its management personnel have been involved in or are the subject of any legal or disciplinary events that would be material to a Client's or prospective Client's evaluation of CVC Credit's advisory business or the integrity of CVC Credit or its management personnel.

Item 10: Other Financial Industry Activities and Affiliations

Affiliated Advisers

Relying Investment Advisers

CVC Credit Partners Investment Management Limited is a Relying Adviser of CVC Credit Partners, LLC and is authorized and regulated by the U.K. Financial Conduct Authority. CVC Credit Partners Investment Management Limited is also registered as foreign company with the Australian Securities and Investments Commission.

CVC Credit Partners European Investment Fund Manager Limited is also a Relying Adviser of CVC Credit Partners, LLC and is authorized and regulated by the Jersey Financial Services Commission.

A single Operating Committee oversees the operations of CVC Credit. In addition, certain senior CVC Credit personnel are members of CVC Credit UK investment committees, and vice versa, and certain investment committees are joint, comprised of representatives from CVC Credit Partners, LLC and CVC Credit UK senior investment personnel.

CVC Credit UK and CVC Credit Partners European Investment Fund Manager Limited are subject to the global CVC Code of Ethics (see Item 11 below) and their personnel are Access Persons of CVC Credit Partners, LLC. CVC Credit UK, CVC Credit Partners European Investment Fund Manager Limited and their personnel are subject to CVC Credit Partners, LLC's regulatory oversight and its compliance policies and procedures, including those addressing books and records maintenance.

CVC Credit UK manages CLOs, Managed Funds and Managed Accounts. CVC Credit UK Clients focus primarily on European investment opportunities. Nonetheless, Clients of CVC Credit Partners, LLC and CVC Credit UK invest in substantially similar assets classes and may, in some instances, invest in the same instruments. In an effort to mitigate potential conflicts of interest, CVC Credit follows the procedures described below in Item 10 for the allocation of investments that are suitable for both CVC Credit Partners, LLC and CVC Credit UK Clients.

CVC Credit CLO Management

Two separate investment advisers, CVC Credit Partners U.S. CLO Management LLC in the U.S. and CVC Credit Partners European CLO Management, LLP in the U.K. are part of CVC Credit Partners and under common control with CVC Credit Partners. Both of these entities have their own distinct set of employees and their own investment committee and investment process. CVC Credit CLO Management manages CLOs focused on investing in the U.S. and Europe. While each manager maintains its own compliance program, certain policies and practices (outside of the investment process) are similar and aggregated across all CVC Credit Partners' investment management entities. Certain supervised persons of CVC Credit Partners are employees of CVC

Credit CLO Management, and act on behalf of CVC Credit Partners pursuant to personnel sharing agreement.

Commodity Pool Operators and Commodity Trading Advisors

Because certain Managed Funds and Managed Accounts may have the ability to invest in commodity interests, CVC Credit Partners may be subject to regulation under the Commodity Exchange Act and the regulations of the U.S. Commodity Futures and Trading Commission (“CFTC”) as a commodity pool operator or commodity trading adviser with respect to the services it provides to these Managed Funds and Managed Accounts. However, because CVC Credit Partner’s Managed Funds and Managed Accounts limit trading in commodity investments, are not offered to U.S. investors, make limited use of U.S. markets, and/or because interest in the Managed Funds and Managed Accounts are offered and sold without marketing to the public in the U.S., CVC Credit Partners is exempt from registration as a commodity pool operator or commodity trading adviser with respect to these Managed Funds and Managed Accounts pursuant to applicable CFTC regulations.

Affiliated Broker- Dealer

CVC Funding, LLC is registered as a broker-dealer in the U.S. with the SEC and FINRA and is a wholly-owned subsidiary of CVC Credit Partners, LLC. The primary focus of CVC Funding, LLC is to conduct activities as a distributor and/or placement agent for private funds managed by or otherwise affiliated with CVC Credit and CVC Capital. Interests in the funds are generally offered pursuant to Rule 506 of Regulation D, as well as Regulation S. CVC Funding, LLC does not execute portfolio transactions on behalf of CVC Credit or CVC Capital or their client accounts.

CVC Funding, LLC will be compensated by CVC Credit Partners, LLC through an agreement for services. Under certain circumstances, it may also be compensated by the applicable general partner, investment manager, and/or adviser through a one-time or ongoing fee, although this is not currently anticipated. Certain personnel of CVC Credit and CVC Capital act as registered representatives of CVC Funding, LLC to the extent necessary or appropriate to perform their responsibilities. While fees, commissions and other compensation paid to CVC Funding, LLC are, in the judgment of CVC Credit and its affiliates, reasonable and generally charged at rates that CVC Credit Partners believes are at market rate for the relevant activities such compensation may not in each case be negotiated at arm’s length.

Certain CVC Credit access persons, including management persons, are registered representatives of CVC Funding, LLC. These individuals are subject to the written supervisory procedures of CVC Funding, LLC when they engage in securities-related transactional activities.

Pooled Investment Vehicles

CVC Credit, its related persons and other entities within the CVC business serve as sponsors or general partners of pooled investment vehicles including, but not limited to, collateralized debt obligations, hedge funds and private equity funds.

CVC Credit Partners European Opportunities Limited

CVC Credit Partners European Opportunities Limited (“CCPEOL”) is a closed-ended investment company limited by shares, registered and incorporated in Jersey under the Companies Law on 20 March 2013, with registration number 112635. CCPEOL is subject to, and required to comply with, certain regulatory requirements that are applicable to closed-ended investment companies which are domiciled in Jersey including compliance with any decision of the Jersey Financial Services Commission (“JFSC”). In addition, CCPEOL is subject to the continuing obligations imposed by the UK Listing Authority and the London Stock Exchange on all investment companies whose shares are admitted to the Official List and to trading on the Main Market. CCPEOL is self-managed with the board of its directors making all management decisions (including overseeing CCPEOL’s investment policy and investment strategy) on a majority basis.

CVC Credit Partners Investment Services Management Limited

CVC Credit Partners Investment Services Management Limited (“CVC Investment Services”) is party to a Trade Mark Licence Agreement with CCPEOL pursuant to which CCPEOL licenses the use of the marks “CVC” and “CVC Credit Partners” from CVC Investment Services. Separately, CCPEOL has appointed CVC Credit Partners Investment Management Limited to provide marketing and financial intermediary services to CCPEOL pursuant to a corporate services and support agreement dated 29 March 2019 in exchange for CVC Credit Partners Investment Management Limited charging a fee calculated as the aggregate cost incurred by CVC Credit Partners Investment Management Limited in providing the relevant services, and allocating to CCPEOL the relevant proportion of that overall cost incurred by CVC Credit Partners Investment Management Limited, as agreed by CVC Credit Partners Investment Management Limited and CCPEOL from time to time.

CVC Capital Private Equity Business

CVC Advisory (U.S.), Inc. (“CVC US”) is an SEC-registered investment adviser and is a wholly-owned subsidiary of CVC Capital Partners (Luxembourg) Sàrl (“CVC Capital Luxembourg”).

CVC Capital Partners Advisory Company Limited (“CPAC”), CVC Capital Partners Private Equity Advisors Limited (“CVC Capital PE Advisors”) and CVC Advisers Jersey Limited (“CVC Capital Jersey”) are limited companies incorporated in Jersey, Channel Islands. CPAC and CVC Capital Jersey has filed with the SEC as an exempt reporting adviser.

CVC Capital Partners Advisory Luxembourg, CPAC, CVC Capital PE Advisors, CVC Capital Jersey, and their respective affiliates, including various CVC Capital sub-advisers (one of which is CVC US) operate the CVC Capital private equity business (referred to herein as “CVC Capital”) and are also part of CVC. CVC’s private equity business is primarily engaged in advising and managing private equity funds that generally acquire controlling or significant minority interests in European, North American and Asian businesses. CVC’s global private equity platform includes investment professionals across 23 countries in Europe, the Americas and the Asia-Pacific region. CVC and its predecessors have operated as an independent investment advisory business since 1993.

Managing Conflicts of Interest

CVC Credit's Conflicts Committee

In the ordinary course of business, CVC Credit may engage in activities, investments, transactions, or business that give rise to potential conflicts of interest. Accordingly, CVC Credit has adopted a Conflicts Mitigation Policy (the "Conflicts Policy"), designed to help CVC Credit identify and mitigate any potential conflicts of interest which may arise from investment or other activities. CVC Credit has also established a CVC Credit Conflicts Committee ("Conflicts Committee") comprised of the Firm's Senior Management, and also includes the Head of Legal and Chief Compliance Officer ("CCO"). The Conflicts Committee is responsible for the review of any new potential and existing material conflicts of interest that may arise as part of the Firm's ordinary course of business, and meets periodically. The Conflicts Committee is also responsible for the review and approval of conflicts mitigating policies and procedures as well as material changes to conflicts disclosure. CVC Credit has established an independent committee the ("External Conflicts Committee") of independent persons to provide guidance to CVC Credit with respect to any situation where there is the potential for (or an appearance or perception of) a material conflict of interest. As needed, the Conflicts Committee will escalate matters to the External Conflicts Committee. The below list is a comprehensive but not exhaustive list of conflicts that CVC Credit has encountered or may encounter in the future. Although CVC Credit has adopted policies and procedures designed to mitigate any conflicts or potential conflicts of interest. There can be no assurance that CVC Credit will resolve any conflict in a manner that is favorable to all Clients or to any particular Client.

Investments in CVC Capital Portfolio Companies by CVC Credit Clients

Any decision to purchase a primary credit investment or the initial purchase of a secondary credit investment in a company in which a CVC Capital Partners Fund has board representation, holds more than 25% of the share capital, or holds an economic interest in excess of €100 million (each such company a "CVC Capital Portfolio Company") shall be reviewed by the Conflicts Committee. In instances where such purchase would result in CVC Credit holding 10% or more of the relevant investment tranche or class across all of its Clients, the investment will be referred to the External Conflicts Committee.

Material Corporate Actions (i.e., amendments, re-leveraging, covenant waivers, or any restructuring) of a CVC Capital Portfolio Company will be reviewed by the CCO, and if necessary the Conflicts Committee. Corporate Actions relating to CVC Capital Portfolio Companies in which CVC Credit debt holding represents more than 10% of the relevant voting class will automatically be referred to the External Conflicts Committee, after it has been reviewed by the relevant investment committee and the Conflicts Committee.

Additionally, if CVC Credit Clients provide financing to portfolio companies of the private equity funds managed by CVC Capital, the CVC Credit Clients will typically participate on arm's length terms no more favorable than the terms on which other similarly situated lenders participate.

CVC Credit Shared Restricted List

CVC Credit Partners, LLC, CVC Credit UK, CVC Credit Partners European Investment Fund Manager Limited, and CVC Credit CLO Management are generally subject to a shared restricted list, to which all of their respective Clients are subject. Consequently, the Manager may not be able to buy or sell a particular security or other instrument on behalf of its Clients because one or more personnel or teams of personnel of CVC Credit UK, CVC Credit Partners European Investment Fund Manager Limited, or CVC Credit CLO Management possesses material, non-public information concerning the issuer or the market for the issuer's securities or other instruments, and vice versa. Similarly, in such circumstances, the Manager may not be able to dispose of a security or other instrument owned by a Client, even in a declining market, until the information becomes publicly available or immaterial and the trading in the issuer's securities or instruments is no longer restricted.

Separation between CVC Capital and CVC Credit

CVC Credit and CVC Capital, on behalf of their respective advisory clients, may make investments in different parts of the capital structure of the same company, in which case certain conflicts of interest, or the appearance of conflicts of interest, may arise. Such conflicts (or appearances thereof) are mitigated by CVC Credit and CVC Capital governance structures, and by information barrier and conflict mitigation policies designed to ensure that the firms each engage in independent decision-making. For example, CVC Credit and CVC Capital generally maintain separate investment committees and operating boards, although individuals may from time to time be management persons and/or a members of an investment committee of both firms ("Dual Officers"). Our policies seek to identify and mitigate potential conflicts arising from these roles by requiring the recusal of Dual Officers from investment decisions regarding positions that introduce potential conflicts with positions held by clients of the other firm. Additionally, CVC Credit and CVC Capital have established information barrier policies designed to ensure that Dual Officers do not transmit nonpublic information from one firm to the other without appropriate controls.

Information Barrier

As discussed in Item 8, CVC maintains an information barrier and has adopted relevant policies and procedures for the proper handling of issuer-specific confidential information to prevent violation of laws and regulations prohibiting the misuse of such information and to avoid situations which might create the appearance of such misuse. The barrier also serves to isolate the confidential, material, non-public information of each of CVC Credit and CVC Capital. The purpose of this information barrier is, among other things, to confine the two business' material, non-public information, such that the investment activities of CVC Credit, on the one hand, and CVC Capital, on the other hand, are not otherwise restricted because one business may have material, non-public information that would be imputed to the other business in the absence of an information barrier. The information barrier procedures limit interactions between CVC Credit personnel and CVC Capital personnel and establish appropriate procedural protections and compliance oversight of any permitted communications. CVC Capital and CVC Credit's compliance teams are responsible for monitoring the information barriers established by CVC,

administering the information sharing policies and procedures and overseeing potential conflicts of interest.

Cross Trades and Principal Transactions

From time to time, CVC Credit may execute or recommend transactions in which one Client sells securities or other instruments to another Client without the involvement of a broker (a “cross trade”). CVC Credit may also recommend transactions in which one Client that is deemed to be more than 25% owned by CVC Credit or certain affiliated entities (a “principal account”) buys securities or other instruments from, or sells securities or other instruments to, another Client without the involvement of a broker (a “principal transaction”). Cross trades present potential conflicts of interest. For example, one Client could be advantaged to the detriment of another Client in the event that the securities being exchanged are not priced in a manner that reflects their fair value (*i.e.*, if the trade was not executed in the open market). Additionally, there is a potential conflict of interest when a cross trade involves a Client account on one side of the transaction and a principal account, or an account in which CVC Credit receives a higher management fee on the other side of the transaction. To address these potential conflicts, CVC Credit maintains cross trade and principal transaction policies and procedures that are compliant with the requirements of Section 206(3) of the Advisers Act. Any cross trade or principal transaction will be effected in accordance with CVC Credit’s cross trade and principal transaction policies and procedures, which require compliance approval before the transaction may proceed and are designed to ensure that the transaction is in the best interest of each involved Client, is consistent with CVC Credit’s duty to seek best execution, and is executed at a fair price as determined in accordance with the pricing protocols specified in the abovementioned policies and procedures. CVC Credit will maintain documentation of the rationale for each transaction and the determination of pricing. In connection with principal transactions, CVC Credit will also disclose to the relevant Client(s) that the proposed transaction involves a principal account and obtain the necessary Client consent prior to the transaction being effected.

Capital Stacking and Opposite Way Trading

CVC Credit Clients may invest in different loan investments or securities issued by the same company. In some circumstances, the interests of Clients that invest in a company may not be aligned with the interests of other Clients that invest in a different loan investment or security issued by the same company, which could create actual or potential conflicts of interest or the appearance of such conflicts. In that regard, certain actions may be taken by CVC Credit on behalf of a Client that are adverse to the interests of other Clients. The interests of Clients investing in different parts of the capital structure of a company are particularly likely to conflict in the case of financial distress of the company, such as enforcement of credit rights or bankruptcy proceedings. This may result in a loss or substantial dilution of one Client’s investment, while another Client receives a full or partial recovery on its investment. While the possibility of conflicts in such circumstances can never be fully mitigated, prior to making any new investment in a company on behalf of a Client, CVC Credit will consider whether the interests of other Clients invested in the capital structure of the company may impair its ability to act in the best interest of the Client. When CVC Credit is required to take action with respect to a security or loan investment held by a Client, it is typically CVC Credit’s policy to act in the best interest of the holder of the investment

with respect to which action is being taken, even though such actions may be to the detriment of other Clients invested in the company's capital structure.

CVC Credit may take a long position in an issuer for one Client while concurrently taking a short position in of the security or loan facility of the same issuer for a different Client. To mitigate the potential conflicts associated with opposite way trading, the portfolio manager must assess the conflict (and confirming that the opposite way position is the result of a distinct and independent investment thesis) and if deemed necessary raise the conflict with Compliance and in certain cases, the Conflicts Committee.

Proxy Voting

When a corporate action involves a CVC Capital Portfolio Company, the CCO, or their designee, in consultation with the relevant Portfolio Manager determines whether a potential conflict of interest is present. If it is determined that a potential conflict of interest is present, the proxy is referred to the Conflicts Committee, which assists in determining how the proxy should be voted. In cases where a Portfolio Company Proxy is (a) with respect to a debt holding that represents more than 10% of the relevant voting class across all Clients, or (b) reasonably likely, in the view of the Portfolio Manager, to result in the Clients' positions experiencing a loss of invested capital on the relevant security, following the review of the Conflicts Committee, the proxy may be referred to the Firm's External Conflicts Committee.

CVC Credit also considers whether a proxy or corporate action which does not involve a CVC Capital Portfolio Company raises any conflicts of interest prior to voting the proxy. For equity proxies, CVC Credit's CCO, or a member of CVC Credit's compliance team, reviews each proxy with the relevant Portfolio Manager(s) as part of the conflicts assessment prior to voting, and refers any proxies raising potential conflicts of interest to the Conflicts Committee, which reviews and potentially may recommend as to how the proxy should be voted. For corporate actions, the Portfolio Manager, together with CVC Credit's operations team assesses whether an action presents potential conflicts, and notifies CVC Credit's compliance team of any potential concerns. CVC Credit's compliance team refers any proxies determined to raise potential conflicts of interest to the Conflicts Committee, which reviews and potentially recommends how CVC Credit should act on the corporate action.

Investment Allocation

In an effort to mitigate conflicts of interest related to side-by-side management of Client accounts with different fee structures, CVC Credit has established an investment allocation policy, which applies to all Clients and which seeks to allocate investments among Clients in a fair and equitable manner over time. By this method, CVC Credit undertakes to ensure that all Clients receive appropriate and individualized treatment based on the needs of a given Client at a given time. This policy is designed to ensure that, in allocating investment opportunities, no Client may or will be favored over another based on the Client's identity or affiliation, account performance, fee structure, or similar attributes not related to investment factors or restrictions. Each of CVC Credit's portfolio managers has responsibility for designated Clients, and is responsible for determining that Client's appropriate participation in the allocation by considering any relevant investment criteria. Such criteria include, without limitation, investment objectives, available

capital, the timing of capital inflows and outflows, applicable concentration limits, portfolio diversification, availability of alternative investments and the overall risk profile of a Client.

Board Membership

In furtherance of CVC Credit's advisory business, CVC Credit personnel may serve on the boards of directors or on creditor committees of companies whose instruments are held by certain Clients. Serving in this capacity may give rise to conflicts to the extent that such personnel's fiduciary duties to a company as a director may conflict with the interests of a Client. CVC Credit personnel are required to notify Compliance before accepting any such position, as discussed in Item 11 below. Additionally, CVC Credit evaluates any potential conflicts of interest that may arise in connection with such board service on an ongoing basis and in consultation with Compliance as appropriate.

Investment in CVC Capital Funds

As discussed above, CVC Funding, LLC, a broker-dealer and wholly-owned subsidiary of CVC Credit, acts as distributor and/or placement agent for private funds managed by or otherwise affiliated with CVC Credit and CVC Capital. From time to time, underlying investors in Clients of CVC Credit may be solicited to invest in private funds managed by or otherwise affiliated with CVC Capital, and clients of CVC Capital may be solicited to invest in private funds managed by or otherwise affiliated with CVC Credit. CVC Funding, LLC receives compensation from CVC Credit or CVC Capital, as applicable, in connection with such solicitation activities. In addition, from time to time, CVC Credit may pay compensation under a shared services agreement to personnel of CVC Capital to provide certain investor relations services to Clients of CVC Credit that are invested in CVC Capital products. As discussed in Item 10, CVC maintains an information barrier to isolate and prevent communication of material, non-public information between each of CVC Credit and CVC Capital, except as expressly provided for in the information barrier procedures and subject to appropriate procedural oversight.

Item 11: Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

CVC Credit is subject to CVC's Global Code of Ethics (the "Code"). The Code expresses CVC's operating principles of integrity, honesty and the fiduciary duties owed to Clients. The Code sets forth a standard of business conduct that is expected of all CVC directors, officers, partners and employees ("CVC Persons"). CVC Credit has also adopted policies and procedures ("Personal Securities Transaction Policy") that CVC Persons must follow to prevent activities that may lead to or give the appearance of conflicts of interest, insider trading, and other forms of unethical behavior. All CVC Credit personnel are CVC Persons subject to the Code and the Personal Securities Transaction Policy.

The Personal Securities Transaction Policy requires CVC Persons to report accounts in which they, or their immediate family members or other family members living in their household, have a beneficial interest within ten (10) days of joining CVC Credit or within ten (10) days of opening

the account if already an employee of CVC Credit. On a quarterly basis, CVC persons must also report securities transactions in accounts in which they, or their immediate family members or other family members living in their household, have a beneficial interest. CVC Persons must also report any newly opened accounts on an ongoing basis. Additionally, CVC Persons must certify annually in writing to their holdings and existing accounts, as well as their compliance with the terms of the Code, the Personal Securities Transaction Policy, and other key policies and procedures. The Code also requires CVC Persons to receive pre-clearance before making certain purchases or sales (investments and redemptions), which includes, but is not limited to securities, IPOs and private investments.

CVC Persons are prohibited from executing any personal securities transactions of any kind in any securities on CVC Credit's restricted list or issuers on which CVC Credit is designated as syndicate level private. CVC Credit's restricted list contains the names of companies for which CVC Credit has material non-public information, or for which CVC Credit has otherwise determined must be added to the restricted list.

The Code and Personal Securities Transaction Policy additionally require CVC Credit's compliance team to regularly review the trading activity of personnel and to address any issues noted during the review, including determining, with senior personnel, whether to impose sanctions for violations of the Code and Personal Securities Transaction Policy and the extent of imposed sanctions.

Under the Code, CVC Persons may not, outside of their activities performed on behalf of CVC Credit, serve as a director of a company (or in a similar position) or as a member of a company's creditors committee, unless the employee has received approval from CVC Credit's Chief Compliance Officer. Authorization will be based on a determination that the outside board or committee service would not conflict with the interest of any Client account. In making this assessment, the CCO will typically review not only for direct Client conflicts, but also indirect conflicts such as the possibility that board service would unduly restrict CVC Credit from making investments on behalf of Clients.

CVC Credit personnel are also prohibited under the Code from using their position with CVC Credit to obtain an item of value from any person or company that does business with CVC Credit. The benefits of the item of value must be designed to enhance the quality of the service to the client and not impair compliance with CVC Credit's duty to act honestly, fairly and professionally in accordance with the best interests of clients. CVC Credit personnel are subject to limits on the giving and receipt of gifts, and unsolicited business entertainment is permitted if: a) it is not so frequent or of such high value as to raise a question of impropriety, and b) the person providing the entertainment is present at the event. Gifts or entertainment in excess of established thresholds must be approved by CVC Credit's CCO, as well as any gifts or entertainment provided to public officials, irrespective of value.

A copy of the Code is available to any Client or investor, or potential Client or investor on request to CVC Credit's CCO.

Item 12: Brokerage Practices

CVC Credit is generally granted discretionary authority in its investment advisory contracts with Clients to select broker-dealers in connection with all portfolio transactions. With respect to CLO Clients, discretionary authority to purchase or sell securities or loan investments in Client accounts may be limited by the terms of the applicable indentures and other governing agreements which may impose quality, liquidity, concentration, diversification and other requirements. CVC Credit seeks to trade on behalf of Clients in a manner that is fair and equitable to all clients, and has established a (“Best Execution Policy”) designed to ensure that CVC Credit exercises diligence and care throughout the trading process. In seeking best execution, the determining factor is not always the lowest possible per security price or commission or fee but whether, in CVC Credit’s view, the transaction represents the best overall execution for CVC Credit’s Clients. In placing orders, CVC Credit seeks to obtain best net results for portfolio transactions that are reasonably available, whilst taking into account all relevant factors, including quality of execution, speed of execution, likelihood of execution and/or settlement, size, complexity and other characteristics of the order, and other execution factors identified in CVC Credit’s Best Execution Policy, all in light of CVC Credit’s overall responsibilities to each Client.

- In no instance does CVC Credit seek to obtain research or other soft dollar benefits in exchange for directing Client brokerage to the broker or bank producing such materials. CVC Credit may, from time to time, receive unsolicited market and industry research made generally available by broker-dealers and agent banks for loan syndications to their counterparties.
- CVC Credit and its related persons do not receive Client referrals from broker-dealers or third parties that provide order execution on behalf of Client accounts.
- CVC Credit does not routinely recommend, request or require Clients to direct CVC Credit to execute transactions through specified broker-dealers.

CVC Credit will provide Clients with its Best Execution Policy upon request. To comply with MiFID II and related regulations, CVC Credit UK in certain instances will also obtain client consent to the Best Execution Policy prior to providing advisory services.

In an effort to minimize costs and obtain best execution for Client transactions in marketable securities, CVC Credit may consider it appropriate to aggregate orders for Clients, subject to CVC Credit’s obligations to obtain best execution for Clients and otherwise treat those Client in a fair and equitable manner. Allocations of aggregated Client orders are consistent with CVC Credit’s allocation policies and procedures described above in Item 6 and Item 10.

Although CVC Credit personnel endeavour to take the utmost care in implementing investment decisions on behalf of each Client, trade errors do occur and could have a material adverse impact on the performance of any or all Clients. CVC Credit endeavours to detect trade errors prior to settlement and correct them in a prompt manner. Not all trade errors are compensable trade errors, but trade errors may be compensable if CVC Credit determines that its actions leading to the trade error did not meet the applicable standard of care for managing the assets of the Client, and the

Client suffered a net loss as a result. Where a single error or a series of related errors result in multiple transactions in a client account, gains and losses on these transactions may be netted to determine the net impact of a trade error. Calculating the exact amount owed to the Client involves discretion and CVC Credit will seek to calculate the amount owed in good faith. CVC Credit has adopted a formal trade error policy covering its practices.

On a semi-annual basis, CVC Credit's Brokerage Committee meets to discuss its best execution practices, any identified trade errors or trading issues, review counterparties, review cross trades, and evaluate execution quality as applicable. On an annual basis the Firm makes available on its website its Annual Best Execution Report as required under MiFID II.

Item 13: Review of Accounts

CVC Credit has implemented an internal structure which allocates responsibility for the ongoing oversight and review of its Client accounts to the respective CVC Credit investment committees and appropriate Portfolio Managers. CVC Credit reviews CLOs on at least a quarterly basis, focusing primarily on credit analysis of each issuer's financial performance, a review of each issuer's capital structure and a review of each issuer's industry prospects. Managed Accounts are reviewed, no less frequently than quarterly, with the Client by the Portfolio Manager and the Portfolio Manager responsible for the relevant portfolio. Managed Funds are reviewed on an ongoing basis with certain reviews performed daily, weekly and monthly. Such reviews may take into account the Managed Funds investment position exposure, pricing and risk analysis. These reviews are conducted by the Portfolio Manager. On a daily or weekly basis, CVC Credit also reviews certain aspects of each investment including, but not limited to: the operational performance of each investment, including an evaluation of the macro-economic, credit specific and event-driven factors for each investment; price performance; any related news items related to the investment; and any correspondence from the issuer/management and/or the institution that acts as the administrative agent for the issuer's financing. These reviews are conducted by the investment and operations teams.

The nature and frequency of regular reports provided to Managed Funds and Managed Accounts depends on the terms of the relevant governing documents and any regulatory requirements of jurisdictions where the Managed Funds and Managed Accounts are organized. CVC Credit will typically provide the reports described below, and may provide additional types of reports (such as proxy voting summary reports and brokerage reports) as may be agreed upon with Clients.

CLO investors receive monthly trustee report.

The Managed Accounts receive reports from CVC Credit Partners and/or the applicable custodian on a daily, monthly and quarterly basis. The custodian for each Managed Account makes available a cash flow report to the Managed Account on a daily basis. This report shows all transactions (debits and credits) affecting the account. CVC Credit Partners also provides the Managed Account with a monthly report summarizing account activity. CVC Credit Partners provides Managed Accounts with a quarterly report that summarizes market and economic activity together with return data and market prices.

Investors in Managed Funds may receive a monthly or quarterly capital statement and one-page transparency discussing the performance and positioning of the Managed Fund. Investors in Managed Funds may also receive a quarterly letter summarizing the investments in the Managed Fund. Typically, investors in Managed Funds are provided with written quarterly unaudited financial reports and annual audited financial statements.

Item 14: Client Referrals and Other Compensation

CVC Credit does not receive any economic benefit from any party that is not a Client in connection with the provision of investment advice or other advisory services to CVC Credit Clients.

CVC Credit Partners uses the services of placement agents to refer investors to Managed Funds for which CVC Credit Partners serves as the investment manager. Pursuant to the placement agent agreements between CVC Credit Partners and third-party placement agents, CVC Credit Partners generally compensates placement agents with a portion of the management fees charged to each Client referred to CVC Credit Partners by the placement agent. Compensation under these arrangements is determined by means of an asset-based fee and/or a fixed retainer fee payable periodically for a certain period of time. All fees associated with these agreements are payable by CVC Credit Partners.

Other Sources of Potential Compensation

CVC Credit may provide information regarding the price and time of trade executions or other trading-related information (“Trade Information”) to third parties in an aggregate format that does not identify or otherwise indicate the Clients for which trades were executed. CVC Credit may receive fees, discounts or credits towards services provided by such third-parties that would otherwise be paid directly by CVC Credit, or other benefits or compensation in connection with such activities that would not be payable back to CVC Credit’s Clients. When exercising discretion with respect to the selection of trading counterparties, CVC Credit does not take into consideration any fees, discounts, credits, or other compensation received from making Trade Information available to third-parties.

Item 15: Custody

Related persons of CVC Credit serve as general partners to the Managed Funds for which CVC Credit Partners provides investment advisory services. CVC Credit Partners is, therefore, deemed to have custody of Client funds and securities for such Managed Funds. All funds and securities owned by Managed Funds are maintained by qualified custodians, and are audited by an independent auditor. Investors are provided with a copy of the audit report within 120 days after the end of the Managed Fund’s fiscal year.

Item 16: Investment Discretion

The applicable indentures for each of the CLOs managed by CVC Credit place restrictions on CVC Credit's ability to buy and sell loans and securities on behalf of the CLO. Pursuant to the terms of these indentures, CVC Credit has limited discretionary authority over such accounts. CLO indentures generally restrict CVC Credit from selling collateral debt securities unless such loans or securities have experienced specified credit deterioration, ratings downgrades, or events of default. CVC Credit is also permitted by the terms of each CLO indenture to trade a portion of the CLO account on a discretionary basis. Client Agreements for Managed Accounts and Managed Funds set forth the general criteria for the types of loans and securities to be purchased and sold on behalf of the entity, subject to the restrictions as may be specified in such agreements. Further, certain investment management agreements for Managed Accounts may require that CVC Credit Partners provide notice to the Client prior to executing any transaction on behalf of the Client and provide the Client the opportunity to decline the proposed transaction. Notwithstanding the foregoing, CVC Credit Partners is generally granted discretionary investment authority on behalf of Managed Accounts and Managed Funds.

Item 17: Voting Client Securities

Although CVC Credit primarily provides investment advice with respect to loans and other debt investments that do not entitle Clients to vote on corporate matters, in certain instances Clients are entitled to vote in connection with amendments or waivers to their rights or in connection with other corporate actions.

CVC Credit has adopted and implemented a ("Proxy Policy") will vote all proxies and act on all corporate action notifications that it receives, unless a Client has reserved such right. The policy provides that, where CVC Credit is authorized to vote Client securities, the Firm will seek to vote or exercise rights in the best interest of its Clients, taking into account all relevant factors. In voting proxies and corporate actions, the Firm will act in a manner that it believes will (i) maximize the economic benefits to Clients and (ii) promote sound corporate governance by the issuer.

CVC Credit's Proxy Policy is designed to ensure that if a material conflict of interest is identified in connection with a particular proxy vote, that the vote is not improperly influenced by the conflict. Conflicts of interest will arise from time to time in relation to proxy voting requirements. CVC Credit shall monitor all proxies for any potential conflicts of interest. If a material conflict of interest arises, CVC Credit will determine what is in the best interests of the relevant CVC Credit Client and will seek to take appropriate steps to eliminate any such conflict, in accordance with the Proxy Policy.

Existing Clients may obtain a copy of the proxy voting policy and information on how CVC Credit voted Client securities by written request to CVC Credit. CVC Credit generally does not provide proxy or corporate action recommendations to Clients who have not granted CVC Credit voting authority over their securities.

Item 18: Financial Information

CVC Credit does not require the payment of management fees or other compensation six months or more in advance. There exists no financial condition of which CVC Credit is currently aware that would impair its ability to meet contractual commitments to its Clients.
