Item 4: Advisory Business

A. Description of the Advisory Firm

Old Slip Registered Investment Advisors, LLC (hereinafter “OSRIAL”) provides portfolio management to clients under this wrap fee program as sponsor and portfolio manager.

Total Assets Under Management	Annual Fee
\$0 - \$1,000,000	1.50%
\$1,000,001 – And Up	1.00%

Portfolio management fees are withdrawn directly from the client’s accounts with client’s written authorization.

Fees are paid monthly in arrears. OSRIAL uses the value of the account as of the last business day of the billing period, after taking into account deposits and withdrawals, for purposes of determining the market value of the assets upon which the advisory fee is based.

Clients may terminate the agreement without penalty, for full refund of OSRIAL’s fees, within five business days of signing the Investment Advisory Contract. Thereafter, clients may terminate the Investment Advisory Contract generally with 3 days written notice.

B. Contribution Cost Factors

The program may cost the client more or less than purchasing such services separately. There are several factors that bear upon the relative cost of the program, including the trading activity in the client’s account, the adviser’s ability to aggregate trades, and the cost of the services if provided separately (which in turn depends on the prices and specific services offered by different providers).

C. Additional Fees

OSRIAL will wrap third party fees for wrap fee portfolio management accounts. OSRIAL will charge clients one fee, and pay all transaction fees using the fee collected from the client. Accounts participating in the wrap fee program are not charged higher advisory fees based on trading activity, but clients should be aware that OSRIAL has an incentive to limit trading activities for those accounts since the firm absorbs those transaction costs.

Certain other fees are not included in the wrap fee and are paid for separately by the client. These include, but are not limited to, margin costs, charges imposed directly by a mutual fund or exchange traded fund, fees associated with “step out” transactions if the account

uses different custodians or broker-dealers, deferred sales charges, odd-lot differentials, transfer taxes, wire transfer and electronic fund fees, and other fees and taxes on brokerage accounts and securities transactions.

You may pay custodial fees, charges imposed directly by a mutual fund, index fund, or exchange traded fund which shall be disclosed in the fund's prospectus (i.e., fund management fees and other fund expenses), mark-ups and mark-downs, spreads paid to market makers, wire transfer fees and other fees and taxes on brokerage accounts and securities transactions. These fees are not included within the wrap-fee you are charged by our firm

As the OSRIAL absorbs certain transaction costs in wrap fee accounts, the OSRIAL may have a financial incentive not to place transaction orders in those accounts since doing so increases its transaction costs. Thus, an incentive exists to place trades less frequently in a wrap fee arrangement.

We do not charge our clients higher advisory fees based on their trading activity, but you should be aware that we may have an incentive to limit our trading activities in your account(s) because we are charged for executed trades.

Schwab and other custodians have eliminated commissions [or transaction fees] for online trades of U.S. equities, ETFs and options (subject to \$0.65 per contract fee). This means that, in most cases, when we buy and sell these types of securities, we will not have to pay any commissions to Schwab. We encourage you to review Schwab's pricing to compare the total costs of entering into a wrap fee arrangement versus a non-wrap fee arrangement. If you choose to enter into a wrap fee arrangement, your total cost to invest could exceed the cost of paying for brokerage and advisory services separately. To see what you would pay for transactions in a non-wrap account please refer to Schwab's most recent pricing schedules available at schwab.com/aspricingguide.

D. Compensation of Client Participation

Neither OSRIAL, nor any representatives of OSRIAL receive any additional compensation beyond advisory fees for the participation of client's in the wrap fee program. However, compensation received may be more than what would have been received if client paid separately for investment advice, brokerage, and other services. Therefore, OSRIAL may have a financial incentive to recommend the wrap fee program to clients.

Item 5: Types of Clients

OSRIAL generally offers advisory services to the following types of clients:

- ❖ High-Net-Worth Individuals
- ❖ Pension and Profit Sharing Plans

There is no account minimum.

Item 6: Portfolio Manager Selection and Evaluation

A. Selecting/Reviewing Portfolio Managers

OSRIAL will not select outside portfolio managers for management of this wrap fee program. OSRIAL will be the sole portfolio manager for this wrap fee program.

OSRIAL will use industry standards to calculate portfolio manager performance.

OSRIAL reviews the performance information to determine and verify its accuracy and compliance with presentation standards. The performance information is monthly and is reviewed by OSRIAL.

B. Related Persons

OSRIAL and its personnel serve as the portfolio managers for all wrap fee program accounts. This is a conflict of interest in that no outside adviser assesses OSRIAL's management of the wrap fee program. However, OSRIAL addresses this conflict by acting in its clients' best interest consistent with its fiduciary duty as sponsor and portfolio manager of the wrap fee program.

C. Advisory Business

OSRIAL offers ongoing wrap fee portfolio management services based on the individual goals, objectives, time horizon, and risk tolerance of each client. OSRIAL creates an Investment Policy Statement for each client, which outlines the client's current situation (income, tax levels, and risk tolerance levels). Portfolio management services include, but are not limited to, the following:

- | | |
|---------------------------------|--------------------------------|
| • Determine investment strategy | • Personal investment policy |
| • Asset allocation | • Asset selection |
| • Assessment of risk tolerance | • Regular portfolio monitoring |

OSRIAL evaluates the current investments of each client with respect to their risk tolerance levels and time horizon.

Risk tolerance levels are documented in the Investment Policy Statement, which is given to each client.

Portfolio management accounts participating in the wrap fee program will not have to pay for transaction or trading fees. OSRIAL will charge clients one fee, and pay transaction fees using the advisory fee collected from the client. Certain other fees are not included in the wrap fee and are paid for separately by the client. These include, but are not limited to, margin costs, charges imposed directly by a mutual fund or exchange traded fund, deferred sales charges, odd-lot differentials, transfer taxes, wire transfer and electronic fund fees, and other fees and taxes on brokerage accounts and securities transactions.

Accounts participating in the wrap fee program are not charged higher advisory fees based on trading activity, but clients should be aware that OSRIAL has an incentive to limit trading activities for those accounts since the firm absorbs those transaction costs. To address this conflict, OSRIAL will always act in the best interest of its clients consistent with its fiduciary duty as an investment adviser.

Services Limited to Specific Types of Investments

OSRIAL generally limits its investment advice to mutual funds, fixed income securities, real estate funds, insurance products including annuities, equities and treasury inflation protected/inflation linked bonds, although OSRIAL primarily recommends growth and income / conservative, retirement minded investing. OSRIAL may use other securities as well to help diversify a portfolio when applicable.

Client Tailored Services and Client Imposed Restrictions

OSRIAL offers the same suite of services to all of its clients. However, specific client investment strategies and their implementation are dependent upon the client's current situation (income, tax levels, and risk tolerance levels). Clients are not permitted to impose restrictions in investing in certain securities or types of securities in accordance with their values or beliefs.

Wrap Fee Programs

As discussed herein, OSRIAL sponsors and acts as portfolio manager for this wrap fee program. OSRIAL manages the investments in the wrap fee program, but does not manage those wrap fee accounts any differently than it would manage non-wrap fee accounts. The fees paid to the wrap account program will be given to OSRIAL as a management fee.

Amounts Under Management

OSRIAL has the following assets under management:

Discretionary Amounts:	Non-discretionary Amounts:	Date Calculated:
\$36,000,000.00	\$305,000,000.00	December 2020

Performance-Based Fees and Side-By-Side Management

OSRIAL does not accept performance-based fees or other fees based on a share of capital gains on or capital appreciation of the assets of a client.

Clients paying a performance-based fee should be aware that investment advisers have an incentive to invest in riskier investments when paid a performance-based fee due to the higher risk/higher reward attributes.

Methods of Analysis and Investment Strategies

Methods of Analysis

OSRIAL's methods of analysis include charting analysis, charting analysis, charting analysis, charting analysis and charting analysis.

Charting analysis involves the use of patterns in performance charts. OSRIAL uses this technique to search for patterns used to help predict favorable conditions for buying and/or selling a security.

Fundamental analysis involves the analysis of financial statements, the general financial health of companies, and/or the analysis of management or competitive advantages.

Technical analysis involves the analysis of past market data; primarily price and volume.

Quantitative analysis deals with measurable factors as distinguished from qualitative considerations such as the character of management or the state of employee morale, such as the value of assets, the cost of capital, historical projections of sales, and so on.

Modern portfolio theory is a theory of investment that attempts to maximize portfolio expected return for a given amount of portfolio risk, or equivalently minimize risk for a given level of expected return, each by carefully choosing the proportions of various assets.

Investment Strategies

OSRIAL uses/recommends long term investing.

Investing in securities involves a risk of loss that you, as a client, should be prepared to bear.

Material Risks Involved

Methods of Analysis

Charting analysis strategy involves using and comparing various charts to predict long and short term performance or market trends. The risk involved in using this method is that only past performance data is considered without using other methods to crosscheck data. Using charting analysis without other methods of analysis would be making the assumption that past performance will be indicative of future performance. This may not be the case.

Fundamental analysis concentrates on factors that determine a company's value and expected future earnings. This strategy would normally encourage equity purchases in stocks that are undervalued or priced below their perceived value. The risk assumed is that the market will fail to reach expectations of perceived value.

Technical analysis attempts to predict a future stock price or direction based on market trends. The assumption is that the market follows discernible patterns and if these patterns can be identified then a prediction can be made. The risk is that markets do not always follow patterns and relying solely on this method may not take into account new patterns that emerge over time.

Quantitative Model Risk: Investment strategies using quantitative models may perform differently than expected as a result of, among other things, the factors used in the models, the weight placed on each factor, changes from the factors' historical trends, and technical issues in the construction and implementation of the models.

Modern portfolio theory assumes that investors are risk averse, meaning that given two portfolios that offer the same expected return, investors will prefer the less risky one. Thus, an investor will take on increased risk only if compensated by higher expected returns. Conversely, an investor who wants higher expected returns must accept more risk. The exact trade-off will be the same for all investors, but different investors will evaluate the trade-off differently based on individual risk aversion characteristics. The implication is that a rational investor will not invest in a portfolio if a second portfolio exists with a more favorable risk-expected return profile – i.e., if for that level of risk an alternative portfolio exists which has better expected returns.

Investment Strategies

Long term investing is designed to capture market rates of both return and risk. Due to its nature, the long-term investment strategy can expose clients to various types of risk that will typically surface at various intervals during the time the client owns the investments. These risks include but are not limited to inflation (purchasing power) risk,

interest rate risk, economic risk, market risk, and political/regulatory risk.

Investing in securities involves a risk of loss that you, as a client, should be prepared to bear.

Risks of Specific Securities Utilized

Equity investment generally refers to buying shares of stocks in return for receiving a future payment of dividends and/or capital gains if the value of the stock increases. The value of equity securities may fluctuate in response to specific situations for each company, industry conditions and the general economic environments.

Fixed income investments generally pay a return on a fixed schedule, though the amount of the payments can vary. This type of investment can include corporate and government debt securities, leveraged loans, high yield, and investment grade debt and structured products, such as mortgage and other asset-backed securities, although individual bonds may be the best known type of fixed income security. In general, the fixed income market is volatile and fixed income securities carry interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) Fixed income securities also carry inflation risk, liquidity risk, call risk, and credit and default risks for both issuers and counterparties. The risk of default on treasury inflation protected/inflation linked bonds is dependent upon the U.S. Treasury defaulting (extremely unlikely); however, they carry a potential risk of losing share price value, albeit rather minimal. Risks of investing in foreign fixed income securities also include the general risk of non-U.S. investing described below.

Mutual Funds: Investing in mutual funds carries the risk of capital loss and thus you may lose money investing in mutual funds. All mutual funds have costs that lower investment returns. The funds can be of bond “fixed income” nature (lower risk) or stock “equity” nature.

Real Estate exposure (including REITs) entails several kinds of risk that are inherent in the real estate sector, which historically has experienced significant fluctuations and cycles in performance. Specifically, revenues and cash flows may be adversely affected by: changes in local real estate market conditions due to changes in national or local economic conditions or changes in local property market characteristics; competition from other properties offering the same or similar services; changes in interest rates and in the state of the debt and equity credit markets; the ongoing need for capital improvements; changes in real estate tax rates and other operating expenses; adverse changes in governmental rules and fiscal policies; adverse changes in zoning laws; the impact of present or future environmental legislation and compliance with environmental laws.

Annuities are retirement products for those who may have the ability to pay a premium now and want to guarantee they receive certain payments or a return on investment in the future. Annuities are contracts issued by a life insurance company designed to meet requirement or other long-term goals. An annuity is not a life insurance policy. Variable annuities are designed to be long-term investments, to meet retirement and other long-range goals. Variable annuities are not suitable for meeting short-term goals because

substantial taxes and insurance company charges may apply if you withdraw your money early. Variable annuities also involve investment risks, just as mutual funds do.

Past performance is not indicative of future results. Investing in securities involves a risk of loss that you, as a client, should be prepared to bear.

Voting Client Securities (Proxy Voting)

OSRIAL will not ask for, nor accept voting authority for client securities. Clients will receive proxies directly from the issuer of the security or the custodian. Clients should direct all proxy questions to the issuer of the security.

Item 7: Client Information Provided to Portfolio Managers

All client information material to managing the portfolio (including basic information, risk tolerance, sophistication level, and income level) is provided to the portfolio manager. The portfolio manager will also have access to that information as it changes and is updated.

Item 8: Client Contact with Portfolio Managers

OSRIAL does not restrict clients from contacting portfolio managers. OSRIAL's representatives can be contacted during regular business hours using the information on the Form ADV Part 2B cover page.

Item 9: Additional Information

A. Disciplinary Action and Other Financial Industry Activities

Criminal or Civil Actions

There are no criminal or civil actions to report.

Administrative Proceedings

There are no administrative proceedings to report.

Self-Regulatory Organization (SRO) Proceedings

There are no self-regulatory organization proceedings to report.

Registration as a Broker/Dealer or Broker/Dealer Representative

As a registered representative of Purshe Kaplan Sterling James Joseph Lukezic accepts compensation for the sale of securities.

Registration as a Futures Commission Merchant, Commodity Pool Operator, or a Commodity Trading Advisor

Neither OSRIAL nor its representatives are registered as or have pending applications to become either a Futures Commission Merchant, Commodity Pool Operator, or Commodity Trading Advisor or an associated person of the foregoing entities.

Registration Relationships Material to this Advisory Business and Possible Conflicts of Interests

James Joseph Lukezic is a registered representative of Old Slip Capital Management and from time to time, will offer clients advice or products from those activities. Clients should be aware that these services pay a commission or other compensation and involve a conflict of interest, as commissionable products conflict with the fiduciary duties of a registered investment adviser. OSCM always acts in the best interest of the client, including with respect to the sale of commissionable products to advisory clients. Clients are in no way required to implement the plan through any representative of Old Slip Registered Investment Advisors, LLC in such individual's capacity as a registered representative.

James Joseph Lukezic is an independent licensed insurance agent for Old Slip Benefits and Insurance Services and from time to time, will offer clients advice or products from those activities. Clients should be aware that these services pay a commission or other compensation and involve a conflict of interest, as commissionable products conflict with the fiduciary duties of a registered investment adviser. Old Slip Registered Investment Advisors, LLC always acts in the best interest of the client; including the sale of commissionable products to advisory clients. Clients are in no way required to utilize the services of any representative of Old Slip Registered Investment Advisors, LLC in connection with such individual's activities outside of Old Slip Registered Investment Advisors, LLC's individual's capacity as a registered representative.

Selection of Other Advisers or Managers and How This Adviser is Compensated for Those Selections

OSRIAL does not select third-party investment advisers.

B. Code of Ethics, Client Referrals, and Financial Information

Code of Ethics

OSRIAL has a written Code of Ethics that covers the following areas: Prohibited Purchases and Sales, Insider Trading, Personal Securities Transactions, Exempted Transactions, Prohibited Activities, Conflicts of Interest, Gifts and Entertainment, Confidentiality, Service on a Board of Directors, Compliance Procedures, Compliance with Laws and Regulations, Procedures and Reporting, Certification of Compliance, Reporting Violations, Compliance Officer Duties, Training and Education, Recordkeeping, Annual Review, and Sanctions. OSRIAL's Code of Ethics is available free upon request to any client or prospective client.

Recommendations Involving Material Financial Interests

OSRIAL does not recommend that clients buy or sell any security in which OSRIAL or a related person has a material financial interest.

Investing Personal Money in the Same Securities as Clients

From time to time, representatives of OSRIAL may buy or sell securities for themselves that they also recommend to clients. This may provide an opportunity for representatives of OSRIAL to buy or sell the same securities before or after recommending the same securities to clients resulting in representatives profiting off the recommendations they provide to clients. Such transactions may create a conflict of interest. OSRIAL will always document any transactions that could be construed as conflicts of interest and will never engage in trading that operates to the client's disadvantage when similar securities are being bought or sold.

Trading Securities At/Around the Same Time as Clients' Securities

From time to time, representatives of OSRIAL may buy or sell securities for themselves at or around the same time as clients. This may provide an opportunity for representatives of OSRIAL to buy or sell securities before or after recommending securities to clients resulting in representatives profiting off the recommendations they provide to clients. Such transactions may create a conflict of interest; however, OSRIAL will never engage in trading that operates to the client's disadvantage if representatives of OSRIAL buy or sell securities at or around the same time as clients.

Frequency and Nature of Periodic Reviews

Accounts are reviewed at least monthly by James J Lukezic, Executive Managing Director, with regard to clients' respective investment policies and risk tolerance levels.

Factors That Will Trigger a Non-Periodic Review of Client Accounts

Reviews may be triggered by material market, economic or political events, or by changes

in client's financial situations (such as retirement, termination of employment, physical move, or inheritance).

Content and Frequency of Regular Reports Provided to Clients

Each client will receive a quarterly account statement from the custodian. OSRIAL will also provide at least quarterly a separate written report to the client.

Economic Benefits Provided by Third Parties for Advice Rendered to Clients

OSRIAL participates in the institutional advisor program (the "Program") offered by TD Ameritrade Institutional, a division of TD Ameritrade, Inc. Member FINRA/SIPC ("TD Ameritrade"). TD Ameritrade offers to independent investment advisor services which include custody of securities, trade execution, clearance and settlement of transactions. OSRIAL receives some benefits from TD Ameritrade through its participation in the Program.

As disclosed above, OSRIAL participates in TD Ameritrade's institutional advisor program and OSRIAL may recommend TD Ameritrade to clients for custody and brokerage services. There is no direct link between OSRIAL's participation in the Program and the investment advice it gives to its clients, although OSRIAL receives economic benefits through its participation in the Program that are typically not available to TD Ameritrade retail investors. These benefits include the following products and services (provided without cost or at a discount): receipt of duplicate client statements and confirmations; research related products and tools; consulting services; access to a trading desk serving OSRIAL participants; access to block trading (which provides the ability to aggregate securities transactions for execution and then allocate the appropriate shares to client accounts); the ability to have OSRIAL's fees deducted directly from client accounts; access to an electronic communications network for client order entry and account information; access to mutual funds with no transaction fees and to certain institutional money managers; and discounts on compliance, marketing, research, technology, and practice management products or services provided to OSRIAL by third party vendors. TD Ameritrade may also pay for business consulting and professional services received by OSRIAL's related persons. Some of the products and services made available by TD Ameritrade through the Program may benefit OSRIAL but may not benefit its client accounts. These products or services may assist OSRIAL in managing and administering client accounts, including accounts not maintained at TD Ameritrade. Other services made available by TD Ameritrade are intended to help OSRIAL manage and further develop its business enterprise. The benefits received by OSRIAL or its personnel through participation in the Program do not depend on the amount of brokerage transactions directed to TD Ameritrade. As part of its fiduciary duties to clients, OSRIAL endeavors at all times to put the interests of its clients first. Clients should be aware, however, that the receipt of economic benefits by OSRIAL or its related persons in and of itself creates a conflict of interest and may indirectly influence the OSRIAL's choice of TD Ameritrade for custody and brokerage services.

Economic benefits of being on the Schwab platform

OSRIAL may recommend that clients establish brokerage accounts with the Schwab Advisor Services division of Charles Schwab & Co., Inc. (Schwab), a registered broker-dealer, member SIPC, to maintain custody of clients' assets and to effect trades for their accounts. The final decision to custody assets with Schwab is at the discretion of the Advisor's clients, including those accounts under ERISA or IRA rules and regulations, in which case the client is acting as either the plan sponsor or IRA accountholder. OSRIAL is independently owned and operated and not affiliated with Schwab. Schwab provides OSRIAL with access to its institutional trading and custody services, which are typically not available to Schwab retail investors. These services generally are available to independent investment advisors on an unsolicited basis, at no charge to advisors. Schwab's services include brokerage services that are related to the execution of securities transactions, custody, research, including that in the form of advice, analyses and reports, and access to mutual funds and other investments that are otherwise generally available only to institutional investors or would require a significantly higher minimum initial investment.

Schwab also makes available to OSRIAL other products and services that benefit OSRIAL but may not benefit its clients' accounts. . These benefits may include national, regional or OSRIAL specific educational events organized and/or sponsored by Schwab Advisor Services. Other potential benefits may include occasional business entertainment of personnel of OSRIAL by Schwab Advisor Services personnel, including meals, invitations to sporting events, including golf tournaments, and other forms of entertainment, some of which may accompany educational opportunities. Other of these products and services assist OSRIAL in managing and administering clients' accounts. These include software and other technology (and related technological training) that provide access to client account data (such as trade confirmations and account statements), facilitate trade execution (and allocation of aggregated trade orders for multiple client accounts), provide research, pricing information and other market data, facilitate payment of [Advisor Firm's] fees from its clients' accounts, and assist with back-office training and support functions, recordkeeping and client reporting. Many of these services generally may be used to service all or some substantial number of [Advisor Firm's] accounts, including accounts not maintained at Schwab Advisor Services. Schwab Advisor Services also makes available to OSRIAL other services intended to help OSRIAL manage and further develop its business enterprise. These services may include professional compliance, legal and business consulting, publications and conferences on practice management, information technology, business succession, regulatory compliance, employee benefits providers, human capital consultants, insurance and marketing. In addition, Schwab may make available, arrange and/or pay vendors for these types of services rendered to OSRIAL by independent third parties. Schwab Advisor Services may discount or waive fees it would otherwise charge for some of these services or pay all or a part of the fees of a third-party providing these services to OSRIAL. While, as a fiduciary, OSRIAL endeavors to act in its clients' best interests, [Advisor Firm's] recommendation/requirement that clients maintain their assets in accounts at Schwab may be based in part on the benefit to OSRIAL of the availability of some of the foregoing products and services and other arrangements and not solely on the nature, cost or quality of custody and brokerage services provided by Schwab, which may create a potential conflict of interest.

Compensation to Non – Advisory Personnel for Client Referrals

OSRIAL does not directly or indirectly compensate any person who is not advisory personnel for client referrals.

Balance Sheet

OSRIAL neither requires nor solicits prepayment of more than \$1,200.

Financial Conditions Reasonably Likely to Impair Ability to Meet Contractual Commitments to Clients

OSRIAL does not have any financial condition that would impair its ability to meet contractual commitments to clients.

Bankruptcy Petitions in Previous Ten Years

OSRIAL has not been the subject of a bankruptcy petition.
