February 2021

This brochure provides information about the qualifications and business practices of MONECO Advisors LLC dba MONECO Advisors. If you have any questions about the contents of this brochure, please contact us at (203) 319-3550 or through our website at www.monecoadvisors.com. The information in this brochure has not been approved or verified by the United States Securities and Exchange Commission (“SEC”) or by any state securities authority. Additional information about MONECO Advisors, LLC also is available on the SEC’s website at www.adviserinfo.sec.gov.

Please note that the use of the term “registered investment adviser” and description of our firm and/or our associates as “registered” does not imply a certain level of skill or training. Clients are encouraged to review this Brochure and Brochure Supplements for our firm’s associates who advise clients for more information on the qualifications of our firm and our employees.

Item 2 - Material Changes

MONECO Advisors is required to make clients aware of information that has changed since the last annual update to the Wrap Brochure ("Wrap Brochure") and that may be important to them. Clients can then determine whether to review the brochure in its entirety or to contact us with questions about the changes.

Since the last annual amendment filed on 03/11/2020, the following changes have been made:

- Our firm has obtained financial assistance by participating in Paycheck Protection Program ("PPP") established by the U.S. Small Business Administration ("SBA"). PPP is intended to assist us with maintaining our firm's business in response to the COVID-19 pandemic by providing low-interest loans for business essentials such as payroll expenses. These loans are eligible for forgiveness, but it is not guaranteed as it will be based on factors such as staff retention and being used for payroll or firm overhead. Please refer to Item 9 for additional information.
- Our firm has reduced our maximum fee from 2.50% to 2.00% Please refer to Item 4 for additional information.
- Our firm has disclosed our use of options as a strategy. Please refer to Item 6 for additional information.

Item 9 – Additional Information.....	12

Item 4 – Services, Fees and Compensation

Our firm manages assets for many different types of clients to help meet their financial goals while remaining sensitive to risk tolerance and time horizons. As a fiduciary it is our duty to always act in the client's best interest. This is accomplished in part by knowing the client. Our firm has established a service-oriented advisory practice with open lines of communication. Working with clients to understand their investment objectives while educating them about our process, facilitates the kind of working relationship we value.

Our wrap fee program allows clients to pay a single fee for investment advisory services and associated custodial transaction costs. Because our firm absorbs client transaction fees, an incentive exists to limit trading activities in client accounts. Custodial transaction costs, however, are not included in the advisory fee charged by our firm for non-wrap services, and are to be paid by the client to their chosen custodian. Depending on the client's account or portfolio trading activity, clients may pay more for using our wrap fee services than they would for using our non-wrap services.

Our firm sponsors and offers a wrap fee program, which allows clients to pay a single fee for investment advisory services and associated custodial transaction costs. Transaction fees will be paid by our firm via individual transaction charges. Because our firm absorbs client transaction fees, an incentive exists to limit trading activities in client accounts. Custodial transaction costs, however, are not included in the advisory fee charged by our firm for non-wrap services, and are to be paid by the client to their chosen custodian. Depending on the client's account or portfolio trading activity, clients may pay more for using our wrap fee services than they would for using our non-wrap services.

LPL Financial offers a trading platform with select exchange traded funds ("ETFs") that do not charge transaction fees. The no-transaction-fee ETF trading platform is available to clients participating in LPL Financial's Strategic Wealth Management ("SWM") and Strategic Asset Management ("SAM") programs. Since our firm pays the transaction fees charged by LPL Financial to clients participating in our wrap fee program, we are incentivized to recommend no-transaction-fee ETFs over other types of securities and ETFs in order to reduce our costs. This presents a conflict of interest because the limited number of ETFs available on the no-transaction fee platform may have higher overall expenses than other types of securities and ETFs not included in the platform. In addition, other major custodians have eliminated transaction fees for all ETFs and U.S. equities, so clients may pay more for investing in the same securities at LPL Financial.

Our Wrap Advisory Services

Wrap Asset Management:

As part of our Wrap Asset Management service, clients will be provided asset management and financial planning or consulting services. This service is designed to assist clients in meeting their financial goals through the use of a financial plan or consultation. Our firm conducts client meetings to understand their current financial situation, existing resources, financial goals, and tolerance for risk. Based on what is learned, an investment approach is presented to the client, consisting of individual stocks, bonds, ETFs, options, mutual funds and other public and private securities or investments. Once the appropriate portfolio has been determined, portfolios are continuously and regularly monitored, and if necessary, rebalanced based upon the client's individual needs, stated goals and objectives. Upon client request, our firm provides a summary of observations and recommendations for the planning or consulting aspects of this service.

Fee Schedule

If LPL:

The maximum annual fee to be charged to the client's account(s) will not exceed 2.00%. The fee to be assessed to each account will be detailed in the client's signed advisory agreement, LPL Account Application or LPL Tiered Fee Authorization form. Fees are billed on a pro-rata basis quarterly in advance based on the value of the account(s) on the last day of the previous quarter. Fees are negotiable and will be deducted from the account(s). Please note that fees will be adjusted for deposits and withdrawals made during the quarter. If accounts are opened during the quarter, the pro-rata advisory fees will be deducted during the next regularly scheduled billing cycle. In rare cases, our firm will agree to direct bill clients. As part of this process, Clients understand the following:

- a) LPL as the client's custodian sends statements at least quarterly, showing all disbursements for each account, including the amount of the advisory fees paid to our firm;
- b) Clients provide authorization permitting LPL to deduct these fees;
- c) LPL calculates the advisory fees for all fee schedules and deducts them from the client's account.

If Schwab:

The maximum annual fee charged to the client's account will not exceed 2.00%. The fee to be assessed will be outlined in Schedule A of the client's signed advisory agreement. Annualized fees are billed on a pro-rata basis quarterly in advance based on the value of the account(s) on the last day of the previous quarter. Fees are negotiable and will be deducted from the account(s). In rare cases, our firm will agree to directly invoice. As part of this process, Clients understand the following:

- a) Client provides authorization permitting our firm, to be directly paid by these terms; and
- b) Client's independent custodian sends statements, at least quarterly, showing the market values for each security included in the Assets and all account disbursements, including the amount of the advisory fees paid to our firm; and
- c) Our firm will send an invoice directly to the custodian. If our firm sends an invoice to the Client, a legend urging the comparison of information provided in the statement with those from the qualified custodian will be included.

Other Types of Fees and Charges

In addition to our advisory fees above, Clients may also pay holdings charges imposed by the chosen custodian for certain investments, charges imposed directly by a mutual fund, index fund, or exchange traded fund, which shall be disclosed in the fund's prospectus (i.e., fund management fees, initial or deferred sales charges, mutual fund sales loads, 12b-1 fees, surrender charges, variable annuity fees, IRA and qualified retirement plan fees, and other fund expenses). Our firm does not receive a portion of these fees.

Wrap Fee Program Recommendations

Our firm does not recommend or offer the wrap program services of other providers.

Item 5 – Account Requirements and Types of Clients

Our requirements for opening and maintaining accounts or otherwise engaging us:

- Our firm requires a minimum account balance of \$10,000 for our Asset Management service. Generally, this minimum account balance requirement is negotiable and would be required throughout the course of the client's relationship with our firm.
- A minimum account value of \$15,000 is required for OMP.
- A minimum account value of \$250,000 is required for PWP.
- A minimum account value of \$50,000 is required for MWP.
- A minimum account value of \$100,000 is required for Manager Access Select, however, in certain instances, the minimum account size may be lower or higher.

Our firm has the following types of clients:

- Individuals and High Net Worth Individuals;
- Pension and Profit Sharing Plans;
- Corporations, Limited Liability Companies and/or Other Business Types

Item 6 – Portfolio Manager Selection and Evaluation

Our firm's investment adviser representatives ("IAR"s) act as portfolio manager(s) for this wrap fee program. A conflict arises in that other investment advisory firms may charge the same or lower fees than our firm for similar services. Our IARs are subject to individual licensing requirements as imposed by state securities boards. Our firm is required to confirm or update each IAR's Form U4 on an annual basis. IAR supervision is conducted by our Chief Compliance Officer or management personnel.

LPL performs certain administrative services for our firm, including generation of quarterly performance reports for program accounts. Client will receive an individual quarterly performance report, which provides performance information on a time weighted basis. The performance reports are intended to inform clients as to how their investments have performed for a period, both on an absolute basis and compared to leading investment indices.

Advisory Business:

Information about our wrap fee services can be found in Item 4 of this brochure. Our firm offers individualized investment advice to our Wrap Asset Management clients.

Each Wrap Asset Management client has the opportunity to place reasonable restrictions on the types of investments to be held in the portfolio. Restrictions on investments in certain securities or types of securities may not be possible due to the level of difficulty this would entail in managing the account.

Participation in Wrap Fee Programs:

Our firm does not manage wrap fee accounts in a different fashion than non-wrap fee accounts. All accounts are managed on an individualized basis according to the client's investment objectives, financial goals, risk tolerance, etc.

Performance-Based Fees & Side-By-Side Management:

Our firm does not charge performance-based fees.

Methods of Analysis and Investment Strategies

We emphasize continuous and regular account supervision. As part of our asset management service, we generally create a portfolio, consisting of individual stocks or bonds, exchange traded funds ("ETFs"), mutual funds and other public and private securities or investments.

The client's individual investment strategy is tailored to their specific needs and may include some or all of the previously mentioned securities. Each portfolio will be initially designed to meet a particular investment goal, which we determine to be suitable to the client's circumstances. Each client has the opportunity to place reasonable restrictions on the types of investments to be held in the portfolio.

We may use one of the following strategies in managing client accounts, provided that such strategies are appropriate to the needs of the client and consistent with the client's investment objectives, risk tolerance, and time horizons, among other considerations:

Alternative Strategy Mutual Funds. Certain mutual funds available in the program invest primarily in alternative investments and/or strategies. Investing in alternative investments and/or strategies may not be suitable for all investors and involves special risks, such as risks associated with commodities, real estate, leverage, selling securities short, the use of derivatives, potential adverse market forces, regulatory changes and potential illiquidity. There are special risks associated with mutual funds that invest principally in real estate securities, such as sensitivity to changes in real estate values and interest rates and price volatility because of the fund's concentration in the real estate industry.

Closed-End Funds. Client should be aware that closed-end funds available within the program are not readily marketable. In an effort to provide investor liquidity, the funds may offer to repurchase a certain percentage of shares at net asset value on a periodic basis. Thus, clients may be unable to liquidate all or a portion of their shares in these types of funds.

Exchange-Traded Funds (ETFs). ETFs are typically investment companies that are legally classified as open end mutual funds or UITs. However, they differ from traditional mutual funds, in particular, in that ETF shares are listed on a securities exchange. Shares can be bought and sold throughout the trading day like shares of other publicly-traded companies. ETF shares may trade at a discount or premium to their net asset value. This difference between the bid price and the ask price is often referred to as the "spread." The spread varies over time based on the ETF's trading volume and market liquidity, and is generally lower if the ETF has a lot of trading volume and market liquidity and higher if the ETF has little trading volume and market liquidity. Although many ETFs are registered as an investment company under the Investment Company Act of 1940 like traditional mutual funds, some ETFs, in particular those that invest in commodities, are not registered as an investment company.

Exchange-Traded Notes (ETNs). An ETN is a senior unsecured debt obligation designed to track the total return of an underlying market index or other benchmark. ETNs may be linked to a variety of assets, for example, commodity futures, foreign currency and equities. ETNs are similar to ETFs in that they are listed on an exchange and can typically be bought or sold throughout the trading day.

However, an ETN is not a mutual fund and does not have a net asset value; the ETN trades at the prevailing market price. Some of the more common risks of an ETN are as follows. The repayment of the principal, interest (if any), and the payment of any returns at maturity or upon redemption are dependent upon the ETN issuer's ability to pay. In addition, the trading price of the ETN in the secondary market may be adversely impacted if the issuer's credit rating is downgraded. The index or asset class for performance replication in an ETN may or may not be concentrated in a specific sector, asset class or country and may therefore carry specific risks.

Leveraged and Inverse ETFs, ETNs and Mutual Funds. Leveraged ETFs, ETNs and mutual funds, sometimes labeled "ultra" or "2x" for example, are designed to provide a multiple of the underlying index's return, typically on a daily basis. Inverse products are designed to provide the opposite of the return of the underlying index, typically on a daily basis. These products are different from and can be riskier than traditional ETFs, ETNs and mutual funds. Although these products are designed to provide returns that generally correspond to the underlying index, they may not be able to exactly replicate the performance of the index because of fund expenses and other factors. This is referred to as tracking error. Continual re-setting of returns within the product may add to the underlying costs and increase the tracking error. As a result, this may prevent these products from achieving their investment objective. In addition, compounding of the returns can produce a divergence from the underlying index over time, in particular for leveraged products. In highly volatile markets with large positive and negative swings, return distortions are magnified over time. Because of these distortions, these products should be actively monitored, as frequently as daily, and are generally not appropriate as an intermediate or long-term holding. To accomplish their objectives, these products use a range of strategies, including swaps, futures contracts and other derivatives. These products may not be diversified and can be based on commodities or currencies. These products may have higher expense ratios and be less tax-efficient than more traditional ETFs, ETNs and mutual funds.

Options: An option is a financial derivative that represents a contract sold by one party (the option writer) to another party (the option holder, or option buyer). The contract offers the buyer the right, but not the obligation, to buy or sell a security or other financial asset at an agreed-upon price (the strike price) during a certain period of time or on a specific date (exercise date). Options are extremely versatile securities. Traders use options to speculate, which is a relatively risky practice, while hedgers use options to reduce the risk of holding an asset. In terms of speculation, option buyers and writers have conflicting views regarding the outlook on the performance of a:

- *Call Option:* Call options give the option to buy at certain price, so the buyer would want the stock to go up. Conversely, the option writer needs to provide the underlying shares in the event that the stock's market price exceeds the strike due to the contractual obligation. An option writer who sells a call option believes that the underlying stock's price will drop relative to the option's strike price during the life of the option, as that is how he will reap maximum profit. This is exactly the opposite outlook of the option buyer. The buyer believes that the underlying stock will rise; if this happens, the buyer will be able to acquire the stock for a lower price and then sell it for a profit. However, if the underlying stock does not close above the strike price on the expiration date, the option buyer would lose the premium paid for the call option.
- *Put Option:* Put options give the option to sell at a certain price, so the buyer would want the stock to go down. The opposite is true for put option writers. For example, a put option buyer is bearish on the underlying stock and believes its market price will fall below the specified strike price on or before a specified date. On the other hand, an option writer who sells a put option believes the underlying stock's price will increase about a specified price on or before

the expiration date. If the underlying stock's price closes above the specified strike price on the expiration date, the put option writer's maximum profit is achieved. Conversely, a put option holder would only benefit from a fall in the underlying stock's price below the strike price. If the underlying stock's price falls below the strike price, the put option writer is obligated to purchase shares of the underlying stock at the strike price.

The potential risks associated with these transactions are that (1) all options expire. The closer the option gets to expiration, the quicker the premium in the option deteriorates; and (2) Prices can move very quickly. Depending on factors such as time until expiration and the relationship of the stock price to the option's strike price, small movements in a stock can translate into big movements in the underlying options.

Structured Products. Structured products are securities derived from another asset, such as a security or a basket of securities, an index, a commodity, a debt issuance, or a foreign currency. Structured products frequently limit the upside participation in the reference asset. Structured products are senior unsecured debt of the issuing bank and subject to the credit risk associated with that issuer. This credit risk exists whether or not the investment held in the account offers principal protection. The creditworthiness of the issuer does not affect or enhance the likely performance of the investment other than the ability of the issuer to meet its obligations. Any payments due at maturity are dependent on the issuer's ability to pay. In addition, the trading price of the security in the secondary market, if there is one, may be adversely impacted if the issuer's credit rating is downgraded. Some structured products offer full protection of the principal invested, others offer only partial or no protection. Investors may be sacrificing a higher yield to obtain the principal guarantee. In addition, the principal guarantee relates to nominal principal and does not offer inflation protection. An investor in a structured product never has a claim on the underlying investment, whether a security, zero coupon bond, or option. There may be little or no secondary market for the securities and information regarding independent market pricing for the securities may be limited. This is true even if the product has a ticker symbol or has been approved for listing on an exchange. Tax treatment of structured products may be different from other investments held in the account (e.g., income may be taxed as ordinary income even though payment is not received until maturity). Structured CDs that are insured by the FDIC are subject to applicable FDIC limits.

Hedge Funds and Managed Futures. Hedge and managed futures funds are available for purchase in the program by clients meeting certain qualification standards. Investing in these funds involves additional risks including, but not limited to, the risk of investment loss due to the use of leveraging and other speculative investment practices and the lack of liquidity and performance volatility. In addition, these funds are not required to provide periodic pricing or valuation information to investors and may involve complex tax structures and delays in distributing important tax information. Client should be aware that these funds are not liquid as there is no secondary trading market available. At the absolute discretion of the issuer of the fund, there may be certain repurchase offers made from time to time. However, there is no guarantee that client will be able to redeem the fund during the repurchase offer.

Variable Annuities. If client purchases a variable annuity that is part of the program, client will receive a prospectus and should rely solely on the disclosure contained in the prospectus with respect to the terms and conditions of the variable annuity. Client should also be aware that certain riders purchased with a variable annuity may limit the investment options and the ability to manage the subaccounts.

Margin Accounts. Client should be aware that margin borrowing involves additional risks. Margin borrowing will result in increased gain if the value of the securities in the account go up, but will result in increased losses if the value of the securities in the account goes down. The custodian, acting as the client's creditor, will have the authority to liquidate all or part of the account to repay any portion of the margin loan, even if the timing would be disadvantageous to the client. For performance illustration purposes, the margin interest charge will be treated as a withdrawal and will, therefore, not negatively impact the performance figures reflected on the quarterly advisory reports.

We use a combination of fundamental, technical and cyclical analysis in order to formulate investment advice when managing assets. Depending on the analysis the firm will implement a long or short term trading strategy based on the particular objectives and risk tolerance of a particular client.

Fundamental Analysis involves the analysis of financial statements, the general financial health of companies, and/or the analysis of management or competitive advantages. Fundamental analysis concentrates on factors that determine a company's value and expected future earnings. This strategy would normally encourage equity purchases in stocks that are undervalued or priced below their perceived value. The risk assumed is that the market will fail to reach expectations of perceived value.

Technical Analysis involves the analysis of past market data; primarily price and volume. Technical analysis attempts to predict a future stock price or direction based on market trends. The assumption is that the market follows discernible patterns and if these patterns can be identified then a prediction can be made. The risk is that markets do not always follow patterns and relying solely on this method may not take into account new patterns that emerge over time.

Cyclical Analysis involves the analysis of business cycles to find favorable conditions for buying and/or selling a security. Cyclical analysis assumes that the markets react in cyclical patterns which, once identified, can be leveraged to provide performance. The risks with this strategy are two-fold: 1) the markets do not always repeat cyclical patterns; and 2) if too many investors begin to implement this strategy, then it changes the very cycles these investors are trying to exploit.

Please note, investing in securities involves risk of loss that clients should be prepared to bear. There are different types of investments that involve varying degrees of risk, and it should not be assumed that future performance of any specific investment or investment strategy will be profitable or equal any specific performance level(s). Past performance is not indicative of future results.

The firms' methods of analysis and investment strategies do not represent any significant or unusual risks however all strategies have inherent risks and performance limitations such as:

Market Risk - the risk that the value of securities may go up or down, sometimes rapidly or unpredictably, due to factors affecting securities markets generally or particular industries.

Interest Rate Risk - the risk that fixed income securities will decline in value because of an increase in interest rates; a bond or a fixed income fund with a longer duration will be more sensitive to changes in interest rates than a bond or bond fund with a shorter duration.

Credit Risk - the risk that an investor could lose money if the issuer or guarantor of a fixed income security is unable or unwilling to meet its financial obligations.

Mutual Funds - Investing in mutual funds carries the risk of capital loss and thus you may lose money investing in mutual funds. All mutual funds have costs that lower investment returns. The funds can be of bond “fixed income” nature (lower risk) or stock “equity” nature (mentioned below).

Equity - investment generally refers to buying shares of stocks in return for receiving a future payment of dividends and/or capital gains if the value of the stock increases. The value of equity securities may fluctuate in response to specific situations for each company, industry conditions and the general economic environments.

Fixed income - investments generally pay a return on a fixed schedule, though the amount of the payments can vary. This type of investment can include corporate and government debt securities, leveraged loans, high yield, and investment grade debt and structured products, such as mortgage and other asset-backed securities, although individual bonds may be the best known type of fixed income security. In general, the fixed income market is volatile and fixed income securities carry interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) Fixed income securities also carry inflation risk, liquidity risk, call risk, and credit and default risks for both issuers and counterparties. The risk of default on treasury inflation protected/inflation linked bonds is dependent upon the U.S. Treasury defaulting (extremely unlikely); however, they carry a potential risk of losing share price value, albeit rather minimal. Risks of investing in foreign fixed income securities also include the general risk of non-U.S. investing described below.

Exchange Traded Funds (ETFs) - An ETF is an investment fund traded on stock exchanges, similar to stocks. Investing in ETFs carries the risk of capital loss (sometimes up to a 100% loss in the case of a stock holding bankruptcy). Areas of concern include the lack of transparency in products and increasing complexity, conflicts of interest and the possibility of inadequate regulatory compliance. Precious Metal ETFs (e.g., Gold, Silver, or Palladium Bullion backed “electronic shares” not physical metal) specifically may be negatively impacted by several unique factors, among them (1) large sales by the official sector which own a significant portion of aggregate world holdings in gold and other precious metals, (2) a significant increase in hedging activities by producers of gold or other precious metals, (3) a significant change in the attitude of speculators and investors.

Annuities - are a retirement product for those who may have the ability to pay a premium now and want to guarantee they receive certain monthly payments or a return on investment later in the future. Annuities are contracts issued by a life insurance company designed to meet requirement or other long-term goals. An annuity is not a life insurance policy. Variable annuities are designed to be long-term investments, to meet retirement and other long-range goals. Variable annuities are not suitable for meeting short-term goals because substantial taxes and insurance company charges may apply if you withdraw your money early. Variable annuities also involve investment risks; just as mutual funds do.

Non-U.S. securities - present certain risks such as currency fluctuation, political and economic change, social unrest, changes in government regulation, differences in accounting and the lesser degree of accurate public information available.

Voting Client Securities:

Our firm does not accept the proxy authority to vote client securities. Clients will receive proxies or other solicitations directly from their custodian or a transfer agent. In the event that proxies are sent

to our firm, our firm will forward them to the appropriate client and ask the party who sent them to mail them directly to the client in the future. Clients may call, write or email us to discuss questions they may have about particular proxy votes or other solicitations.

Item 7 – Client Information Provided to Portfolio Managers

All accounts are managed by our in-house licensed IARs. The IAR selected to manage the client's account(s) or portfolio(s) will be privy to the client's investment goals and objectives, risk tolerance, restrictions placed on the management of the account(s) or portfolio(s) and relevant client notes taken by our firm. Please see our firm's Privacy Policy for more information on how our firm utilizes client information.

Item 8 – Client Contact with Portfolio Managers

Clients are always free to directly contact their portfolio manager(s) with any questions or concerns about their portfolios or other matters.

Item 9 – Additional Information

Disciplinary Information

There are no legal or disciplinary events that are material to the evaluation of our advisory business or the integrity of our management.

Other Financial Industry Activities and Affiliations

Investment advisor representatives may also be registered representatives of LPL Financial, an unaffiliated SEC registered and FINRA/SIPC member broker/dealer. Clients may choose to engage a registered investment advisor in their capacity as a registered representative of the unaffiliated LPL Financial broker/dealer, to implement investment recommendations on a commission basis.

Representatives of our firm are insurance agents/brokers. They may offer insurance products and receive customary fees as a result of insurance sales. A conflict of interest may arise as these insurance sales may create an incentive to recommend products based on the compensation adviser and/or our supervised persons may earn and may not necessarily be in the best interests of the client. Such potential conflicts of interest are subject to review by the Chief Compliance Officer and subject to LPL Financial surveillance controls.

Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

As a fiduciary, it is an investment adviser's responsibility to provide fair and full disclosure of all material facts and to act solely in the best interest of each of our clients at all times. Our fiduciary duty is the underlying principle for our firm's Code of Ethics, which includes procedures for personal securities transaction and insider trading. Our firm requires all representatives to conduct business with the highest level of ethical standards and to comply with all federal and state securities laws at all times. Upon employment with our firm, and at least annually thereafter, all representatives of our firm will acknowledge receipt, understanding and compliance with our firm's Code of Ethics. Our firm and representatives must conduct business in an honest, ethical, and fair manner and avoid all

circumstances that might negatively affect or appear to affect our duty of complete loyalty to all clients. This disclosure is provided to give all clients a summary of our Code of Ethics. If a client or a potential client wishes to review our Code of Ethics in its entirety, a copy will be provided promptly upon request.

Our firm recognizes that the personal investment transactions of our representatives demands the application of a Code of Ethics with high standards and requires that all such transactions be carried out in a way that does not endanger the interest of any client. At the same time, our firm also believes that if investment goals are similar for clients and for our representatives, it is logical, and even desirable, that there be common ownership of some securities.

In order to prevent conflicts of interest, our firm has established procedures for transactions effected by our representatives for their personal accounts¹. In order to monitor compliance with our personal trading policy, our firm has pre-clearance requirements and a quarterly securities transaction reporting system for all of our representatives.

Neither our firm nor a related person recommends, buys or sells for client accounts, securities in which our firm or a related person has a material financial interest without prior disclosure to the client.

Related persons of our firm may buy or sell securities and other investments that are also recommended to clients. In order to minimize this conflict of interest, our related persons will place client interests ahead of their own interests and adhere to our firm's Code of Ethics, a copy of which is available upon request.

Likewise, related persons of our firm buy or sell securities for themselves at or about the same time they buy or sell the same securities for client accounts. In order to minimize this conflict of interest, our related persons will place client interests ahead of their own interests and adhere to our firm's Code of Ethics, a copy of which is available upon request. Further, our related persons will refrain from buying or selling the same securities prior to buying or selling for our clients in the same day. If related persons' accounts are included in a block trade, our related persons will always trade personal accounts last.

Review of Accounts

Our management personnel or financial advisors review accounts on at least an annual basis for our Wrap Asset Management clients. The nature of these reviews is to learn whether clients' accounts are in line with their investment objectives, appropriately positioned based on market conditions, and investment policies, if applicable.

Our firm may review client accounts more frequently than described above. Among the factors which may trigger an off-cycle review are major market or economic events, the client's life events, requests by the client, etc.

Our firm does not provide written reports to clients, unless asked to do so. Verbal reports to clients take place on at least an annual basis when our Wrap Asset Management clients are contacted.

¹ For purposes of the policy, our associate's personal account generally includes any account (a) in the name of our associate, his/her spouse, his/her minor children or other dependents residing in the same household, (b) for which our associate is a trustee or executor, or (c) which our associate controls, including our client accounts which our associate controls and/or a member of his/her household has a direct or indirect beneficial interest in.

Other Compensation

MONECO Advisors and employees may receive additional compensation from product sponsors. However, such compensation may not be tied to the sales of any products. Compensation may include such items as gifts valued at less than \$100 annually, an occasional dinner or ticket to a sporting event, or reimbursement in connection with educational meetings with investment advisor representative, client workshops or events, marketing events or advertising initiatives, including services for identifying prospective clients. Product sponsors may also pay for, or reimburse MONECO Advisors for the costs associated with, education or training events that may be attended by MONECO Advisors employees and investment advisor representatives and for MONECO Advisors sponsored conferences and events. Additionally, LPL may compensate our firm for on boarding advisors. Our clients do not pay more for investment transactions effected and/or assets maintained at LPL as result of this arrangement. There is no commitment made by us to LPL or any other institution as a result of the above arrangement.

Our firm's Dually Registered Persons may be incented to join and remain affiliated with LPL and to recommend that Clients establish accounts with LPL through the provision of Transition Assistance (discussed in the MONECO Advisors ADV 2B). LPL may also provide other compensation to our firm's Dually Registered Persons, including but not limited to, bonus payments, repayable and forgivable loans, stock awards and other benefits. The receipt of any such compensation creates a financial incentive for your representative to recommend LPL as custodian for the assets in your advisory account. Our firm encourages you to discuss any such conflicts of interest with your representative before making a decision to custody your assets at LPL.

Client Referrals

Our firm pays referral fees (non-commission based) to independent solicitors (non-registered representatives) for the referral of their clients to our firm in accordance with Rule 206 (4)-3 of the Investment Advisers Act of 1940. Such referral fee represents a share of our investment advisory fee charged to our clients. This arrangement will not result in higher costs to the referred client. In this regard, our firm maintains Solicitors Agreements in compliance with Rule 206 (4)-3 of the Investment Advisers Act of 1940 and applicable state and federal laws. All clients referred by Solicitors to our firm will be given full written disclosure describing the terms and fee arrangements between our firm and Solicitor(s). In cases where state law requires licensure of solicitors, our firm ensures that no solicitation fees are paid unless the solicitor is registered as an investment adviser representative of our firm. If our firm is paying solicitation fees to another registered investment adviser, the licensure of individuals is the other firm's responsibility.

Financial Information

Our firm is not required to provide financial information in this Brochure because:

- Our firm does not require the prepayment of more than \$1,200 in fees when services cannot be rendered within 6 months.
- Our firm does not take custody of client funds or securities.

Our firm has never been the subject of a bankruptcy proceeding.

Our firm has obtained financial assistance by participating in Paycheck Protection Program ("PPP") established by the U.S. Small Business Administration ("SBA"). PPP is intended to assist us with

maintaining our firm's business in response to the COVID-19 pandemic by providing low-interest loans for business essentials such as payroll expenses. These loans are eligible for forgiveness, but it is not guaranteed as it will be based on factors such as staff retention and being used for payroll or firm overhead.
