Item 4: Advisory Business

A. Description of the Advisory Firm

Michael S. Ryan, Inc. dba Marathon Mission Wealth Management (hereinafter "MMWM") is a Corporation organized in the State of New York. The firm was formed in January 2003, and the principal owner is Michael S. Ryan.

B. Types of Advisory Services

Portfolio Management Services

MMWM offers ongoing portfolio management services based on the individual goals, objectives, time horizon, and risk tolerance of each client. MMWM creates an Investment Policy Statement for each client, which outlines the client's current situation (income, tax levels, and risk tolerance levels). Portfolio management services include, but are not limited to, the following:

- Investment strategy
- Asset allocation
- Risk tolerance
- Personal investment policy
- Asset selection
- Regular portfolio monitoring

MMWM evaluates the current investments of each client with respect to their risk tolerance levels and time horizon. MMWM will request discretionary authority from clients in order to select securities and execute transactions without permission from the client prior to each transaction. Risk tolerance levels are documented in the Investment Policy Statement, which is given to each client.

MMWM seeks to provide that investment decisions are made in accordance with the fiduciary duties owed to its accounts and without consideration of MMWM's economic, investment or other financial interests. To meet its fiduciary obligations, MMWM attempts to avoid, among other things, investment or trading practices that systematically advantage or disadvantage certain client portfolios, and accordingly, MMWM's policy is to seek fair and equitable allocation of investment opportunities/transactions among its clients to avoid favoring one client over another over time. It is MMWM's policy to allocate investment opportunities and transactions it identifies as being appropriate and prudent, including initial public offerings ("IPOs") and other investment opportunities that might have a limited supply, among its clients on a fair and equitable basis over time.

Pension Consulting Services

MMWM offers consulting services to pension or other employee benefit plans (including but not limited to 401(k) plans). Pension consulting may include, but is not limited to:

- identifying investment objectives and restrictions
- providing guidance on various assets classes and investment options
- recommending money managers to manage plan assets in ways designed to achieve objectives
- monitoring performance of money managers and investment options and making recommendations for changes
- recommending other service providers, such as custodians, administrators and broker-dealers
- creating a written pension consulting plan

These services are based on the goals, objectives, demographics, time horizon, and/or risk tolerance of the plan and its participants.

Financial Planning

Financial plans and financial planning may include, but are not limited to: investment planning; life insurance; tax concerns; retirement planning; college planning; and debt/credit planning.

Services Limited to Specific Types of Investments

MMWM generally limits its investment advice to mutual funds, fixed income securities, real estate funds (including REITs), insurance products including annuities, equities, ETFs (including ETFs in the gold and precious metal sectors), treasury inflation protected/inflation linked bonds, non-U.S. securities, venture capital funds and private placements. MMWM may use other securities as well to help diversify a portfolio when applicable.

C. Client Tailored Services and Client Imposed Restrictions

MMWM offers the same suite of services to all of its clients. However, specific client investment strategies and their implementation are dependent upon the client Investment Policy Statement which outlines each client's current situation (income, tax levels, and risk tolerance levels). Clients may impose restrictions in investing in certain securities or types of securities in accordance with their values or beliefs. However, if the restrictions prevent MMWM from properly servicing the client account, or if the restrictions would require MMWM to deviate from its standard suite of services, MMWM reserves the right to end the relationship.

D. Wrap Fee Programs

A wrap fee program is an investment program where the investor pays one stated fee that includes management fees, transaction costs, fund expenses, and other administrative fees. MMWM does not participate in any wrap fee programs.

E. Assets Under Management

MMWM has the following assets under management:

| Discretionary Amounts: | Non-discretionary Amounts: | Date Calculated: |
|-------------------------------|-----------------------------------|-------------------------|
| \$81,017,648 | \$5,121,958 | December 2020 |

Item 5: Fees and Compensation

A. Fee Schedule

Portfolio Management Fees

| Total Assets Under Management | Annual Fees |
|--------------------------------------|--------------------|
| \$0 - \$100,000 | 1.75% |
| \$100,001 - \$500,000 | 1.50% |
| \$500,001 - \$1,000,000 | 1.25% |
| \$1,000,001 - \$2,000,000 | 1.15% |
| \$2,000,000 - And up | 1.00% |

The advisory fee is calculated using the value of the assets in the Account on the last business day of the prior billing period.

These fees are generally negotiable and the final fee schedule is attached as Exhibit II of the Investment Advisory Contract. Clients may terminate the agreement without penalty for a full refund of MMWM's fees within five business days of signing the Investment Advisory Contract. Thereafter, clients may terminate the Investment Advisory Contract immediately upon written notice.

Pension Consulting Services Fees

Asset-Based Fees for Pension Consulting

| Total Assets Under Management | Annual Fee |
|--------------------------------------|-------------------|
| \$0 - \$500,000 | 1.00% |
| \$500,001 - \$1,000,000 | 0.50% |
| \$1,000,001 - And up | 0.25% |

The advisory fee is calculated using the value of the assets on the last business day of the prior billing period

These fees are generally negotiable and the final fee schedule is attached as Exhibit II of the pension consulting agreement.

Clients may terminate the agreement without penalty for a full refund of MMWM's fees within five business days of signing the Investment Advisory Contract. Thereafter, clients may terminate the pension consulting agreement immediately upon written notice. MMWM bills based on the balance on the first day of the billing period.

Financial Planning Fees

Hourly Fees

The negotiated hourly fee for this service is \$400 to \$500 per hour.

Clients may terminate the agreement without penalty, for full refund of MMWM's fees, within five business days of signing the Financial Planning Agreement. Thereafter, clients may terminate the Financial Planning Agreement generally upon written notice.

B. Payment of Fees

Payment of Portfolio Management Fees

Asset-based portfolio management fees are withdrawn directly from the client's accounts with client's written authorization on a quarterly basis. Fees are paid in advance.

Payment of Pension Consulting Fees

Asset-based pension consulting fees are withdrawn directly from the client's accounts with client's written authorization on a quarterly basis. Fees are paid in advance.

Payment of Financial Planning Fees

Financial planning fees are paid via check and wire.

Hourly financial planning fees are paid 100% in advance, but never more than six months in advance.

C. Client Responsibility For Third Party Fees

Clients are responsible for the payment of all third party fees (i.e. custodian fees, brokerage fees, mutual fund fees, transaction fees, etc.). Those fees are separate and distinct from the fees and expenses charged by MMWM. Please see Item 12 of this brochure regarding broker-dealer/custodian.

D. Prepayment of Fees

MMWM collects fees in advance. Refunds for fees paid in advance will be returned within fourteen days to the client via check, or return deposit back into the client's account.

For all asset-based fees paid in advance, the fee refunded will be equal to the balance of the fees collected in advance minus the daily rate* times the number of days elapsed in the billing period up to and including the day of termination. (*The daily rate is calculated by dividing the annual asset-based fee rate by 365.)

For hourly fees that are collected in advance, the fee refunded will be the balance of the fees collected in advance minus the hourly rate times the number of hours of work that has been completed up to and including the day of termination.

E. Outside Compensation For the Sale of Securities to Clients

Neither MMWM nor its supervised persons accept any compensation for the sale of investment products, including asset-based sales charges or service fees from the sale of mutual funds.

Item 6: Performance-Based Fees and Side-By-Side Management

MMWM does not accept performance-based fees or other fees based on a share of capital gains on or capital appreciation of the assets of a client.

Item 7: Types of Clients

MMWM generally provides advisory services to the following types of clients:

- ❖ Individuals
- ❖ High-Net-Worth Individuals
- ❖ Pension and Profit Sharing Plans

There is no account minimum for any of MMWM's services.

Item 8: Methods of Analysis, Investment Strategies, & Risk of Loss

A. Methods of Analysis and Investment Strategies

Methods of Analysis

MMWM's methods of analysis include Charting analysis, Fundamental analysis, Modern portfolio theory and Technical analysis.

Charting analysis involves the use of patterns in performance charts. MMWM uses this technique to search for patterns used to help predict favorable conditions for buying and/or selling a security.

Fundamental analysis involves the analysis of financial statements, the general financial health of companies, and/or the analysis of management or competitive advantages.

Modern portfolio theory is a theory of investment that attempts to maximize portfolio expected return for a given amount of portfolio risk, or equivalently minimize risk for a given level of expected return, each by carefully choosing the proportions of various asset.

Technical analysis involves the analysis of past market data; primarily price and volume.

Investment Strategies

MMWM uses long term trading, short sales, margin transactions and options trading (including covered options, uncovered options, or spreading strategies).

Investing in securities involves a risk of loss that you, as a client, should be prepared to bear.

B. Material Risks Involved

Methods of Analysis

Charting analysis strategy involves using and comparing various charts to predict long and short term performance or market trends. The risk involved in using this method is that only past performance data is considered without using other methods to crosscheck data. Using charting analysis without other methods of analysis would be making the assumption that past performance will be indicative of future performance. This may not be the case.

Fundamental analysis concentrates on factors that determine a company's value and expected future earnings. This strategy would normally encourage equity purchases in stocks that are undervalued or priced below their perceived value. The risk assumed is that the market will fail to reach expectations of perceived value.

Modern portfolio theory assumes that investors are risk averse, meaning that given two portfolios that offer the same expected return, investors will prefer the less risky one. Thus, an investor will take on increased risk only if compensated by higher expected returns. Conversely, an investor who wants higher expected returns must accept more risk. The exact trade-off will be the same for all investors, but different investors will evaluate the trade-off differently based on individual risk aversion characteristics. The implication is that a rational investor will not invest in a portfolio if a second portfolio exists with a more favorable risk-expected return profile – i.e., if for that level of risk an alternative portfolio exists which has better expected returns.

Technical analysis attempts to predict a future stock price or direction based on market trends. The assumption is that the market follows discernible patterns and if these patterns can be identified then a prediction can be made. The risk is that markets do not always follow patterns and relying solely on this method may not take into account new patterns that emerge over time.

Investment Strategies

MMWM's use of short sales, margin transactions and options trading generally holds greater risk, and clients should be aware that there is a material risk of loss using any of those strategies.

Long term trading is designed to capture market rates of both return and risk. Due to its nature, the long-term investment strategy can expose clients to various types of risk that will typically surface at various intervals during the time the client owns the investments. These risks include but are not limited to inflation (purchasing power) risk, interest rate risk, economic risk, market risk, and political/regulatory risk.

Margin transactions use leverage that is borrowed from a brokerage firm as collateral. When losses occur, the value of the margin account may fall below the brokerage firm's threshold thereby triggering a margin call. This may force the account holder to either allocate more funds to the account or sell assets on a shorter time frame than desired.

Options transactions involve a contract to purchase a security at a given price, not necessarily at market value, depending on the market. This strategy includes the risk that an option may expire out of the money resulting in minimal or no value, as well as the possibility of leveraged loss of trading capital due to the leveraged nature of stock options.

Short sales entail the possibility of infinite loss. An increase in the applicable securities' prices will result in a loss and, over time, the market has historically trended upward.

Investing in securities involves a risk of loss that you, as a client, should be prepared to bear.

C. Risks of Specific Securities Utilized

MMWM's use of short sales, margin transactions and options trading generally holds greater risk of capital loss. Clients should be aware that there is a material risk of loss using any investment strategy. The investment types listed below (leaving aside Treasury Inflation Protected/Inflation Linked Bonds) are not guaranteed or insured by the FDIC or any other government agency.

Mutual Funds: Investing in mutual funds carries the risk of capital loss and thus you may lose money investing in mutual funds. All mutual funds have costs that lower investment returns. The funds can be of bond "fixed income" nature (lower risk) or stock "equity" nature.

Equity investment generally refers to buying shares of stocks in return for receiving a future payment of dividends and/or capital gains if the value of the stock increases. The value of equity securities may fluctuate in response to specific situations for each company, industry conditions and the general economic environments.

Fixed income investments generally pay a return on a fixed schedule, though the amount of the payments can vary. This type of investment can include corporate and government debt securities, leveraged loans, high yield, and investment grade debt and structured products, such as mortgage and other asset-backed securities, although individual bonds may be the best known type of fixed income security. In general, the fixed income market is volatile and fixed income securities carry interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) Fixed income securities also carry inflation risk, liquidity risk, call risk, and credit and default risks for both issuers and counterparties. The risk of default on treasury inflation protected/inflation linked bonds is dependent upon the U.S. Treasury defaulting (extremely unlikely); however, they carry a potential risk of losing share price value, albeit rather minimal. Risks of investing in foreign fixed income securities also include the general risk of non-U.S. investing described below.

Exchange Traded Funds (ETFs): An ETF is an investment fund traded on stock exchanges, similar to stocks. Investing in ETFs carries the risk of capital loss (sometimes up to a 100% loss in the case of a stock holding bankruptcy). Areas of concern include the lack of transparency in products and increasing complexity, conflicts of interest and the possibility of inadequate regulatory compliance. Precious Metal ETFs (e.g., Gold, Silver, or Palladium Bullion backed "electronic shares" not physical metal) specifically may be negatively impacted by several unique factors, among them (1) large sales by the official sector which own a significant portion of aggregate world holdings in gold and other precious metals, (2) a significant increase in hedging activities by producers of gold or other precious metals, (3) a significant change in the attitude of speculators and investors.

Real estate funds (including REITs) face several kinds of risk that are inherent in the real estate sector, which historically has experienced significant fluctuations and cycles in performance. Revenues and cash flows may be adversely affected by: changes in local real estate market conditions due to changes in national or local economic conditions or changes in local property market characteristics; competition from other properties offering the same or similar services; changes in interest rates and in the state of the debt and equity credit markets; the ongoing need for capital improvements; changes in real estate tax rates and other operating expenses; adverse changes in governmental rules and fiscal policies; adverse changes in zoning laws; the impact of present or future environmental legislation and compliance with environmental laws.

Annuities are a retirement product for those who may have the ability to pay a premium now and want to guarantee they receive certain monthly payments or a return on investment later in the future. Annuities are contracts issued by a life insurance company designed to meet requirement or other long-term goals. An annuity is not a life insurance policy. Variable annuities are designed to be long-term investments, to meet retirement and other long-range goals. Variable annuities are not suitable for meeting short-term goals because substantial taxes and insurance company charges may apply if you withdraw your money early. Variable annuities also involve investment risks, just as mutual funds do.

Private placements carry a substantial risk as they are subject to less regulation than are publicly offered securities, the market to resell these assets under applicable securities laws may be illiquid, due to restrictions, and the liquidation may be taken at a substantial discount to the underlying value or result in the entire loss of the value of such assets.

Venture capital funds invest in start-up companies at an early stage of development in the interest of generating a return through an eventual realization event; the risk is high as a result of the uncertainty involved at that stage of development.

Options are contracts to purchase a security at a given price, risking that an option may expire out of the money resulting in minimal or no value. An uncovered option is a type of options contract that is not backed by an offsetting position that would help mitigate risk. The risk for a “naked” or uncovered put is not unlimited, whereas the potential loss for an uncovered call option is limitless. Spread option positions entail buying and selling multiple options on the same underlying security, but with different strike prices or expiration dates, which helps limit the risk of other option trading strategies. Option transactions also involve risks including but not limited to economic risk, market risk, sector risk, idiosyncratic risk, political/regulatory risk, inflation (purchasing power) risk and interest rate risk.

Non-U.S. securities present certain risks such as currency fluctuation, political and economic change, social unrest, changes in government regulation, differences in accounting and the lesser degree of accurate public information available.

Past performance is not indicative of future results. Investing in securities involves a risk of loss that you, as a client, should be prepared to bear.

Item 9: Disciplinary Information

A. Criminal or Civil Actions

There are no criminal or civil actions to report.

B. Administrative Proceedings

There are no administrative proceedings to report.

C. Self-regulatory Organization (SRO) Proceedings

There are no self-regulatory organization proceedings to report.

Item 10: Other Financial Industry Activities and Affiliations

A. Registration as a Broker/Dealer or Broker/Dealer Representative

Neither MMWM nor its representatives are registered as, or have pending applications to become, a broker/dealer or a representative of a broker/dealer.

B. Registration as a Futures Commission Merchant, Commodity Pool Operator, or a Commodity Trading Advisor

Neither MMWM nor its representatives are registered as or have pending applications to become either a Futures Commission Merchant, Commodity Pool Operator, or Commodity Trading Advisor or an associated person of the foregoing entities.

C. Registration Relationships Material to this Advisory Business and Possible Conflicts of Interests

Neither MMWM nor its representatives have any material relationships to this advisory business that would present a possible conflict of interest.

D. Selection of Other Advisers or Managers and How This Adviser is Compensated for Those Selections

MMWM does not utilize nor select third-party investment advisers. All assets are managed by MMWM management.

Item 11: Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

A. Code of Ethics

MMWM has a written Code of Ethics that covers the following areas: Prohibited Purchases and Sales, Insider Trading, Personal Securities Transactions, Exempted Transactions, Prohibited Activities, Conflicts of Interest, Gifts and Entertainment, Confidentiality, Service on a Board of Directors, Compliance Procedures, Compliance with Laws and Regulations, Procedures and Reporting, Certification of Compliance, Reporting Violations, Compliance Officer Duties, Training and Education, Recordkeeping, Annual Review, and Sanctions. MMWM's Code of Ethics is available free upon request to any client or prospective client.

B. Recommendations Involving Material Financial Interests

MMWM does not recommend that clients buy or sell any security in which a related person to MMWM or MMWM has a material financial interest.

C. Investing Personal Money in the Same Securities as Clients

From time to time, representatives of MMWM may buy or sell securities for themselves that they also recommend to clients. This may provide an opportunity for representatives of MMWM to buy or sell the same securities before or after recommending the same securities to clients resulting in representatives profiting off the recommendations they provide to clients. Such transactions may create a conflict of interest. MMWM will always document any transactions that could be construed as conflicts of interest and will never engage in trading that operates to the client's disadvantage when similar securities are being bought or sold.

D. Trading Securities At/Around the Same Time as Clients' Securities

From time to time, representatives of MMWM may buy or sell securities for themselves at or around the same time as clients. This may provide an opportunity for representatives of MMWM to buy or sell securities before or after recommending securities to clients resulting in representatives profiting off the recommendations they provide to clients. Such transactions may create a conflict of interest; however, MMWM

will never engage in trading that operates to the client's disadvantage if representatives of MMWM buy or sell securities at or around the same time as clients.

Item 12: Brokerage Practices

A. Factors Used to Select Custodians and/or Broker/Dealers

Custodians/broker-dealers will be recommended based on MMWM's duty to seek "best execution," which is the obligation to seek execution of securities transactions for a client on the most favorable terms for the client under the circumstances. Clients will not necessarily pay the lowest commission or commission equivalent, and MMWM may also consider the market expertise and research access provided by the broker-dealer/custodian, including but not limited to access to written research, oral communication with analysts, admittance to research conferences and other resources provided by the brokers that may aid in MMWM's research efforts. MMWM will never charge a premium or commission on transactions, beyond the actual cost imposed by the broker-dealer/custodian.

MMWM will require clients to use TD Ameritrade Institutional, a division of TD Ameritrade, Inc. Member FINRA/SIPC.

1. Research and Other Soft-Dollar Benefits

While MMWM has no formal soft dollars program in which soft dollars are used to pay for third party services, MMWM may receive research, products, or other services from custodians and broker-dealers in connection with client securities transactions ("soft dollar benefits"). MMWM may enter into soft-dollar arrangements consistent with (and not outside of) the safe harbor contained in Section 28(e) of the Securities Exchange Act of 1934, as amended. There can be no assurance that any particular client will benefit from soft dollar research, whether or not the client's transactions paid for it, and MMWM does not seek to allocate benefits to client accounts proportionate to any soft dollar credits generated by the accounts. MMWM benefits by not having to produce or pay for the research, products or services, and MMWM will have an incentive to recommend a broker-dealer based on receiving research or services. Clients should be aware that MMWM's acceptance of soft dollar benefits may result in higher commissions charged to the client.

2. Brokerage for Client Referrals

MMWM receives no referrals from a broker-dealer or third party in exchange for using that broker-dealer or third party.

3. Clients Directing Which Broker/Dealer/Custodian to Use

MMWM will require clients to use a specific broker-dealer to execute transactions. Not all advisers require clients to use a particular broker-dealer.

B. Aggregating (Block) Trading for Multiple Client Accounts

If MMWM buys or sells the same securities on behalf of more than one client, then it may (but would be under no obligation to) aggregate or bunch such securities in a single transaction for multiple clients in order to seek more favorable prices, lower brokerage commissions, or more efficient execution. In such case, MMWM would place an aggregate order with the broker on behalf of all such clients in order to ensure fairness for all clients; provided, however, that trades would be reviewed periodically to ensure that accounts are not systematically disadvantaged by this policy. MMWM would determine the appropriate number of shares and select the appropriate brokers consistent with its duty to seek best execution, except for those accounts with specific brokerage direction (if any).

Item 13: Review of Accounts

A. Frequency and Nature of Periodic Reviews and Who Makes Those Reviews

All client accounts for MMWM's advisory services provided on an ongoing basis are reviewed at least Annually by Michael S Ryan, President, with regard to clients' respective investment policies and risk tolerance levels. All accounts at MMWM are assigned to this reviewer.

All financial planning accounts are reviewed upon financial plan creation and plan delivery by Michael S Ryan, President. Financial planning clients are provided a one-time financial plan concerning their financial situation. After the presentation of the plan, there are no further reports. Clients may request additional plans or reports for a fee.

B. Factors That Will Trigger a Non-Periodic Review of Client Accounts

Reviews may be triggered by material market, economic or political events, or by changes in client's financial situations (such as retirement, termination of employment, physical move, or inheritance).

With respect to financial plans, MMWM's services will generally conclude upon delivery of the financial plan.

C. Content and Frequency of Regular Reports Provided to Clients

Each client of MMWM's advisory services provided on an ongoing basis will receive a quarterly report detailing the client's account, including assets held, asset value, and calculation of fees. This written report will come from the custodian.

Each financial planning client will receive the financial plan upon completion.

Item 14: Client Referrals and Other Compensation

A. Economic Benefits Provided by Third Parties for Advice Rendered to Clients (Includes Sales Awards or Other Prizes)

MMWM participates in the institutional advisor program (the "Program") offered by TD Ameritrade. TD Ameritrade offers to independent investment advisor services which include custody of securities, trade execution, clearance and settlement of transactions. MMWM receives some benefits from TD Ameritrade through its participation in the Program.

As disclosed above, MMWM participates in TD Ameritrade's institutional advisor program and MMWM may recommend TD Ameritrade to clients for custody and brokerage services. There is no direct link between MMWM's participation in the Program and the investment advice it gives to its clients, although MMWM receives economic benefits through its participation in the Program that are typically not available to TD Ameritrade retail investors. These benefits include the following products and services (provided without cost or at a discount): receipt of duplicate client statements and confirmations; research related products and tools; consulting services; access to a trading desk serving MMWM participants; access to block trading (which provides the ability to aggregate securities transactions for execution and then allocate the appropriate shares to client accounts); the ability to have MMWM's fees deducted directly from client accounts; access to an electronic communications network for client order entry and account information; access to mutual funds with no transaction fees and to certain institutional money managers; and discounts on compliance, marketing, research, technology, and practice management products or services provided to MMWM by third party vendors. TD Ameritrade may also pay for business consulting and professional services received by MMWM's related persons. Some of the products and services made available by TD Ameritrade through the Program may benefit MMWM but may not benefit its client accounts. These products or services may assist MMWM in managing and administering client accounts, including accounts not maintained at TD Ameritrade. Other services made available by TD Ameritrade are intended to help MMWM manage and further develop its business enterprise. The benefits received by MMWM or its personnel through participation in the Program do not depend on the amount of brokerage transactions directed to TD Ameritrade. As part of its fiduciary duties to clients, MMWM endeavors at all times to put the interests of its clients first. Clients should be aware, however, that the receipt of economic benefits by

MMWM or its related persons in and of itself creates a conflict of interest and may indirectly influence the MMWM's choice of TD Ameritrade for custody and brokerage services.

B. Compensation to Non – Advisory Personnel for Client Referrals

MMWM does not directly or indirectly compensate any person who is not advisory personnel for client referrals.

Item 15: Custody

When advisory fees are deducted directly from client accounts at client's custodian, MMWM will be deemed to have limited custody of client's assets and must have written authorization from the client to do so. Clients will receive all account statements and billing invoices that are required in each jurisdiction, and they should carefully review those statements for accuracy.

Item 16: Investment Discretion

MMWM provides discretionary and non-discretionary investment advisory services to clients. The advisory contract established with each client sets forth the discretionary authority for trading. Where investment discretion has been granted, MMWM generally manages the client's account and makes investment decisions without consultation with the client as to when the securities are to be bought or sold for the account, the total amount of the securities to be bought/sold, what securities to buy or sell, or the price per share.

Item 17: Voting Client Securities (Proxy Voting)

MMWM will not ask for, nor accept voting authority for client securities. Clients will receive proxies directly from the issuer of the security or the custodian. Clients should direct all proxy questions to the issuer of the security.

Item 18: Financial Information

A. Balance Sheet

MMWM neither requires nor solicits prepayment of more than \$1,200 in fees per client, six months or more in advance, and therefore is not required to include a balance sheet with this brochure.

B. Financial Conditions Reasonably Likely to Impair Ability to Meet Contractual Commitments to Clients

Neither MMWM nor its management has any financial condition that is likely to reasonably impair MMWM's ability to meet contractual commitments to clients.

C. Bankruptcy Petitions in Previous Ten Years

MMWM has not been the subject of a bankruptcy petition in the last ten years.
