Item 4: Advisory Business

A. Description of the Advisory Firm

Tyton Wealth (hereinafter “TYT”) is a Corporation organized in the State of Wyoming. The firm was formed in February 2019, and the principal owner is Vikash Harris Mathura.

B. Types of Advisory Services

Portfolio Management Services

TYT offers ongoing portfolio management services based on the individual goals, objectives, time horizon, and risk tolerance of each client. TYT creates an Investment Policy Statement for each client, which outlines the client’s current situation (income, tax levels, and risk tolerance levels). Portfolio management services include, but are not limited to, the following:

- Investment strategy
- Asset allocation
- Risk tolerance
- Personal investment policy
- Asset selection
- Regular portfolio monitoring

TYT evaluates the current investments of each client with respect to their risk tolerance levels and time horizon. TYT will request discretionary authority from clients in order to select securities and execute transactions without permission from the client prior to each transaction. Risk tolerance levels are documented in the Investment Policy Statement, which is given to each client.

TYT seeks to provide that investment decisions are made in accordance with the fiduciary duties owed to its accounts and without consideration of TYT’s economic, investment or other financial interests. To meet its fiduciary obligations, TYT attempts to avoid, among other things, investment or trading practices that systematically advantage or disadvantage certain client portfolios, and accordingly, TYT’s policy is to seek fair and equitable allocation of investment opportunities/transactions among its clients to avoid favoring one client over another over time. It is TYT’s policy to allocate investment opportunities and transactions it identifies as being appropriate and prudent among its clients on a fair and equitable basis over time.

Services Limited to Specific Types of Investments

TYT generally limits its investment advice to mutual funds, fixed income securities, real estate funds (including REITs), equities, ETFs (including ETFs in the gold and precious metal sectors), treasury inflation protected/inflation linked bonds, commodities and non-U.S. securities, although TYT primarily recommends global macro equities focused. TYT may use other securities as well to help diversify a portfolio when applicable.

C. Client Tailored Services and Client Imposed Restrictions

TYT offers the same suite of services to all of its clients. However, specific client investment strategies and their implementation are dependent upon the client Investment Policy Statement which outlines each client's current situation (income, tax levels, and risk tolerance levels). Clients may not impose restrictions in investing in certain securities or types of securities in accordance with their values or beliefs.

D. Wrap Fee Programs

A wrap fee program is an investment program where the investor pays one stated fee that includes management fees, transaction costs, and certain other administrative fees. TYT does not participate in wrap fee programs.

E. Assets Under Management

TYT has the following assets under management:

Discretionary Amounts:	Non-discretionary Amounts:	Date Calculated:
\$3,554,348	\$2,024,540	December 2020

Item 5: Fees and Compensation

A. Fee Schedule

Portfolio Management Services Fees

Total Assets	Annual Fee
All Assets	2.00%

These fees are negotiable and the final fee schedule is attached as Exhibit II of the Investment Advisory Contract. The balance in the client's account on the last day of the billing period is used to determine the market value of the assets upon which the advisory fee is based.

Clients may terminate the agreement without penalty, for full refund of TYT's fees, within five business days of signing the Investment Advisory Contract. Thereafter, clients may terminate the Investment Advisory Contract with thirty days' written notice.

Performance-Based Fees for Portfolio Management

Qualified clients will pay an annual fee of 1.00% of assets under management along with a 20.00% performance fee based on capital appreciation. If the client's portfolio rises in value, the client will pay 20.00% on that increase in value, but if the portfolio drops in value, the client will not incur a new performance fee until the portfolio reaches the last highest value, adjusted for withdrawals and deposits, which is generally known as a "high water mark."

Accredited clients will pay an annual fee of 1.00% of assets under management along with a 20.00% performance fee based on capital appreciation. If the client's portfolio rises in value, the client will pay 20.00% on that increase in value, but if the portfolio drops in value, the client will not incur a new performance fee until the portfolio reaches the last highest value, adjusted for withdrawals and deposits, which is generally known as a "high water mark."

The high water mark will be the highest value of the client's account on the last day of any previous year, after accounting for the client's deposits or withdrawals for each billing period.

The final fee schedule will be memorialized in the client's advisory agreement. This service may be canceled with 30 days' notice. Clients must pay the prorated performance-based fees for the billing period in which they terminate the Investment Advisory Contract up to and including the day of termination.

B. Payment of Fees

Payment of Portfolio Management Fees

Portfolio management fees are withdrawn directly from the client's accounts with client's written authorization. Fees are paid quarterly in arrears.

Payment of Performance-Based Portfolio Management Fees

Performance-based portfolio management fees are withdrawn directly from the client's accounts with client's written authorization on an annual basis. Fees are paid in arrears.

C. Client Responsibility For Third Party Fees

Clients are responsible for the payment of all third party fees (i.e. custodian fees, brokerage fees, mutual fund fees, transaction fees, etc.). Those fees are separate and distinct from the fees and expenses charged by TYT. Please see Item 12 of this brochure regarding broker-dealer/custodian.

D. Prepayment of Fees

TYT collects its fees in arrears. It does not collect fees in advance.

E. Outside Compensation For the Sale of Securities to Clients

Neither TYT nor its supervised persons accept any compensation for the sale of investment products, including asset-based sales charges or service fees from the sale of mutual funds.

Item 6: Performance-Based Fees and Side-By-Side Management

TYT manages accounts that are billed on performance-based fees (a share of capital gains on or capital appreciation of the assets of a client) and may as well manage accounts that are not billed on performance-based fees. Managing both kinds of accounts at the same time presents a conflict of interest because TYT and/or its supervised persons have an incentive to favor accounts for which TYT receives a performance-based fee. TYT addresses the conflicts by ensuring that clients are not systematically advantaged or disadvantaged due to the presence or absence of performance-based fees. TYT seeks best execution and upholds its fiduciary duty for all clients.

Clients paying a performance-based fee should be aware that investment advisers have an incentive to invest in riskier investments when paid a performance-based fee due to the higher risk/higher reward attributes.

Item 7: Types of Clients

TYT generally provides advisory services to the following types of clients:

- ❖ Individuals
- ❖ High-Net-Worth Individuals

There is no account minimum for any of TYT's services.

Item 8: Methods of Analysis, Investment Strategies, & Risk of Loss

A. Methods of Analysis and Investment Strategies

Methods of Analysis

TYT's methods of analysis include Charting analysis, Cyclical analysis, Fundamental analysis and Technical analysis.

Charting analysis involves the use of patterns in performance charts. TYT uses this technique to search for patterns used to help predict favorable conditions for buying and/or selling a security.

Cyclical analysis involves the analysis of business cycles to find favorable conditions for buying and/or selling a security.

Fundamental analysis involves the analysis of financial statements, the general financial health of companies, and/or the analysis of management or competitive advantages.

Technical analysis involves the analysis of past market data; primarily price and volume.

Investment Strategies

TYT uses long term trading, short term trading, short sales, margin transactions and options trading (including covered options, uncovered options, or spreading strategies).

Investing in securities involves a risk of loss that you, as a client, should be prepared to bear.

B. Material Risks Involved

Methods of Analysis

Charting analysis strategy involves using and comparing various charts to predict long and short term performance or market trends. The risk involved in using this method is that only past performance data is considered without using other methods to crosscheck data. Using charting analysis without other methods of analysis would be making the assumption that past performance will be indicative of future performance. This may not be the case.

Cyclical analysis assumes that the markets react in cyclical patterns which, once identified, can be leveraged to provide performance. The risks with this strategy are two-fold: 1) the markets do not always repeat cyclical patterns; and 2) if too many investors

begin to implement this strategy, then it changes the very cycles these investors are trying to exploit.

Fundamental analysis concentrates on factors that determine a company's value and expected future earnings. This strategy would normally encourage equity purchases in stocks that are undervalued or priced below their perceived value. The risk assumed is that the market will fail to reach expectations of perceived value.

Technical analysis attempts to predict a future stock price or direction based on market trends. The assumption is that the market follows discernible patterns and if these patterns can be identified then a prediction can be made. The risk is that markets do not always follow patterns and relying solely on this method may not take into account new patterns that emerge over time.

Investment Strategies

TYT's use of short sales, margin transactions and options trading generally holds greater risk, and clients should be aware that there is a material risk of loss using any of those strategies.

Long term trading is designed to capture market rates of both return and risk. Due to its nature, the long-term investment strategy can expose clients to various types of risk that will typically surface at various intervals during the time the client owns the investments. These risks include but are not limited to inflation (purchasing power) risk, interest rate risk, economic risk, market risk, and political/regulatory risk.

Margin transactions use leverage that is borrowed from a brokerage firm as collateral. When losses occur, the value of the margin account may fall below the brokerage firm's threshold thereby triggering a margin call. This may force the account holder to either allocate more funds to the account or sell assets on a shorter time frame than desired.

Options transactions involve a contract to purchase a security at a given price, not necessarily at market value, depending on the market. This strategy includes the risk that an option may expire out of the money resulting in minimal or no value, as well as the possibility of leveraged loss of trading capital due to the leveraged nature of stock options.

Short sales entail the possibility of infinite loss. An increase in the applicable securities' prices will result in a loss and, over time, the market has historically trended upward.

Short term trading risks include liquidity, economic stability, and inflation, in addition to the long term trading risks listed above. Frequent trading can affect investment performance, particularly through increased brokerage and other transaction costs and taxes.

Investing in securities involves a risk of loss that you, as a client, should be prepared to bear.

C. Risks of Specific Securities Utilized

TYT's use of short sales, margin transactions and options trading generally holds greater risk of capital loss. Clients should be aware that there is a material risk of loss using any investment strategy. The investment types listed below (leaving aside Treasury Inflation Protected/ Inflation Linked Bonds) are not guaranteed or insured by the FDIC or any other government agency.

Mutual Funds: Investing in mutual funds carries the risk of capital loss and thus you may lose money investing in mutual funds. All mutual funds have costs that lower investment returns. The funds can be of bond "fixed income" nature (lower risk) or stock "equity" nature.

Equity investment generally refers to buying shares of stocks in return for receiving a future payment of dividends and/or capital gains if the value of the stock increases. The value of equity securities may fluctuate in response to specific situations for each company, industry conditions and the general economic environments.

Fixed income investments generally pay a return on a fixed schedule, though the amount of the payments can vary. This type of investment can include corporate and government debt securities, leveraged loans, high yield, and investment grade debt and structured products, such as mortgage and other asset-backed securities, although individual bonds may be the best known type of fixed income security. In general, the fixed income market is volatile and fixed income securities carry interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) Fixed income securities also carry inflation risk, liquidity risk, call risk, and credit and default risks for both issuers and counterparties. The risk of default on treasury inflation protected/ inflation linked bonds is dependent upon the U.S. Treasury defaulting (extremely unlikely); however, they carry a potential risk of losing share price value, albeit rather minimal. Risks of investing in foreign fixed income securities also include the general risk of non-U.S. investing described below.

Exchange Traded Funds (ETFs): An ETF is an investment fund traded on stock exchanges, similar to stocks. Investing in ETFs carries the risk of capital loss (sometimes up to a 100% loss in the case of a stock holding bankruptcy). Areas of concern include the lack of transparency in products and increasing complexity, conflicts of interest and the possibility of inadequate regulatory compliance. Precious Metal ETFs (e.g., Gold, Silver, or Palladium Bullion backed "electronic shares" not physical metal) specifically may be negatively impacted by several unique factors, among them (1) large sales by the official sector which own a significant portion of aggregate world holdings in gold and other precious metals, (2) a significant increase in hedging activities by producers of gold or other precious metals, (3) a significant change in the attitude of speculators and investors.

Real estate funds (including REITs) face several kinds of risk that are inherent in the real estate sector, which historically has experienced significant fluctuations and cycles in performance. Revenues and cash flows may be adversely affected by: changes in local real

estate market conditions due to changes in national or local economic conditions or changes in local property market characteristics; competition from other properties offering the same or similar services; changes in interest rates and in the state of the debt and equity credit markets; the ongoing need for capital improvements; changes in real estate tax rates and other operating expenses; adverse changes in governmental rules and fiscal policies; adverse changes in zoning laws; the impact of present or future environmental legislation and compliance with environmental laws.

Commodities are tangible assets used to manufacture and produce goods or services. Commodity prices are affected by different risk factors, such as disease, storage capacity, supply, demand, delivery constraints and weather. Because of those risk factors, even a well-diversified investment in commodities can be uncertain.

Options are contracts to purchase a security at a given price, risking that an option may expire out of the money resulting in minimal or no value. An uncovered option is a type of options contract that is not backed by an offsetting position that would help mitigate risk. The risk for a “naked” or uncovered put is not unlimited, whereas the potential loss for an uncovered call option is limitless. Spread option positions entail buying and selling multiple options on the same underlying security, but with different strike prices or expiration dates, which helps limit the risk of other option trading strategies. Option transactions also involve risks including but not limited to economic risk, market risk, sector risk, idiosyncratic risk, political/regulatory risk, inflation (purchasing power) risk and interest rate risk.

Non-U.S. securities present certain risks such as currency fluctuation, political and economic change, social unrest, changes in government regulation, differences in accounting and the lesser degree of accurate public information available.

Past performance is not indicative of future results. Investing in securities involves a risk of loss that you, as a client, should be prepared to bear.

Item 9: Disciplinary Information

A. Criminal or Civil Actions

There are no criminal or civil actions to report.

B. Administrative Proceedings

There are no administrative proceedings to report.

C. Self-regulatory Organization (SRO) Proceedings

There are no self-regulatory organization proceedings to report.

Item 10: Other Financial Industry Activities and Affiliations

A. Registration as a Broker/Dealer or Broker/Dealer Representative

Neither TYT nor its representatives are registered as, or have pending applications to become, a broker/dealer or a representative of a broker/dealer.

B. Registration as a Futures Commission Merchant, Commodity Pool Operator, or a Commodity Trading Advisor

TYT is registered with the NFA as a CTA (commodity trading advisor).

C. Registration Relationships Material to this Advisory Business and Possible Conflicts of Interests

Vikash Harris Mathura is an investment adviser representative with another investment advisory firm, Tyton Capital (financial planning), and from time to time, may offer clients advice or products from those activities and clients should be aware that these services may involve a conflict of interest. TYT always acts in the best interest of the client and clients are in no way required to use the services of any representative of TYT in connection with such individual's activities outside of TYT.

Vikash Harris Mathura is an Analyst of Tsuru Capital LLC, a proprietary trading fund focused on options market-making. He analyses crypto markets for opportunities. From time to time, he may offer clients advice or products from those activities and clients should be aware that these services may involve a conflict of interest. Tyton Wealth always acts in the best interest of the client and clients always have the right to decide whether or not to utilize the services of any Tyton Wealth representative in such individual's outside capacities.

D. Selection of Other Advisers or Managers and How This Adviser is Compensated for Those Selections

TYT does not utilize nor select third-party investment advisers.

Item 11: Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

A. Code of Ethics

TYT has a written Code of Ethics that covers the following areas: Prohibited Purchases and Sales, Insider Trading, Personal Securities Transactions, Exempted Transactions, Prohibited Activities, Conflicts of Interest, Gifts and Entertainment, Confidentiality, Service on a Board of Directors, Compliance Procedures, Compliance with Laws and Regulations, Procedures and Reporting, Certification of Compliance, Reporting Violations, Compliance Officer Duties, Training and Education, Recordkeeping, Annual Review, and Sanctions. TYT's Code of Ethics is available free upon request to any client or prospective client.

B. Recommendations Involving Material Financial Interests

TYT and its associated persons may have material financial interests in issuers of securities that TYT may recommend for purchase or sale by clients.

For example: I or related persons may already own shares of the companies from previous recommendations to own those shares. Once a client is on-boarded they would be directed to purchase shares that may already be owned by myself or related persons to bring them in line with the rest of the clients and myself.

This presents a conflict of interest in that TYT or its related persons may receive more compensation from investment in a security in which TYT or a related person has a material financial interest than from other investments. Client approval will be sought for client investment in such recommendations and, if granted, such approval will be binding. TYT always acts in the best interest of the client consistent with its fiduciary duties and clients are not required invest in such investments if they do not wish to do so.

C. Investing Personal Money in the Same Securities as Clients

From time to time, representatives of TYT may buy or sell securities for themselves that they also recommend to clients. This may provide an opportunity for representatives of TYT to buy or sell the same securities before or after recommending the same securities to clients resulting in representatives profiting off the recommendations they provide to clients. Such transactions may create a conflict of interest. TYT will always document any transactions that could be construed as conflicts of interest and will never engage in trading that operates to the client's disadvantage when similar securities are being bought or sold.

D. Trading Securities At/Around the Same Time as Clients' Securities

From time to time, representatives of TYT may buy or sell securities for themselves at or around the same time as clients. This may provide an opportunity for representatives of TYT to buy or sell securities before or after recommending securities to clients resulting

in representatives profiting off the recommendations they provide to clients. Such transactions may create a conflict of interest; however, TYT will never engage in trading that operates to the client's disadvantage if representatives of TYT buy or sell securities at or around the same time as clients.

Item 12: Brokerage Practices

A. Factors Used to Select Custodians and/or Broker/Dealers

Custodians/broker-dealers will be recommended based on TYT's duty to seek "best execution," which is the obligation to seek execution of securities transactions for a client on the most favorable terms for the client under the circumstances. Clients will not necessarily pay the lowest commission or commission equivalent, and TYT may also consider the market expertise and research access provided by the broker-dealer/custodian, including but not limited to access to written research, oral communication with analysts, admittance to research conferences and other resources provided by the brokers that may aid in TYT's research efforts. TYT will never charge a premium or commission on transactions, beyond the actual cost imposed by the broker-dealer/custodian.

TYT will require clients to use Interactive Brokers LLC.

1. Research and Other Soft-Dollar Benefits

TYT receives no research, product, or services other than execution from broker-dealers or custodians in connection with client securities transactions ("soft dollar benefits").

2. Brokerage for Client Referrals

TYT receives no referrals from a broker-dealer or third party in exchange for using that broker-dealer or third party.

3. Clients Directing Which Broker/Dealer/Custodian to Use

TYT will require clients to use a specific broker-dealer to execute transactions. Not all advisers require clients to use a particular broker-dealer.

B. Aggregating (Block) Trading for Multiple Client Accounts

If TYT buys or sells the same securities on behalf of more than one client, then it may (but would be under no obligation to) aggregate or bunch such securities in a single transaction for multiple clients in order to seek more favorable prices, lower brokerage commissions, or more efficient execution. In such case, TYT would place an aggregate order with the

broker on behalf of all such clients in order to ensure fairness for all clients; provided, however, that trades would be reviewed periodically to ensure that accounts are not systematically disadvantaged by this policy. TYT would determine the appropriate number of shares and select the appropriate brokers consistent with its duty to seek best execution, except for those accounts with specific brokerage direction (if any).

Item 13: Review of Accounts

A. Frequency and Nature of Periodic Reviews and Who Makes Those Reviews

All client accounts for TYT's advisory services provided on an ongoing basis are reviewed at least Quarterly by Vikash H Mathura, President, with regard to clients' respective investment policies and risk tolerance levels. All accounts at TYT are assigned to this reviewer.

B. Factors That Will Trigger a Non-Periodic Review of Client Accounts

Reviews may be triggered by material market, economic or political events, or by changes in client's financial situations (such as retirement, termination of employment, physical move, or inheritance).

C. Content and Frequency of Regular Reports Provided to Clients

Each client of TYT's advisory services provided on an ongoing basis will receive a quarterly report detailing the client's account, including assets held, asset value, and calculation of fees. This written report will come from the custodian.

Item 14: Client Referrals and Other Compensation

A. Economic Benefits Provided by Third Parties for Advice Rendered to Clients (Includes Sales Awards or Other Prizes)

TYT does not receive any economic benefit, directly or indirectly from any third party for advice rendered to TYT's clients.

B. Compensation to Non - Advisory Personnel for Client Referrals

TYT may, via written arrangement, retain third parties to act as solicitors for TYT's investment management services. All compensation with respect to the foregoing will be

fully disclosed to each client to the extent required by applicable law. TYT will ensure each solicitor is properly registered in all appropriate jurisdictions. All such referral activities will be conducted in accordance with Rule 206(4)-3 under the Advisers Act, where applicable.

Item 15: Custody

When advisory fees are deducted directly from client accounts at client's custodian, TYT will be deemed to have limited custody of client's assets and must have written authorization from the client to do so. Clients will receive all account statements and billing invoices that are required in each jurisdiction, and they should carefully review those statements for accuracy.

Item 16: Investment Discretion

TYT provides discretionary and non-discretionary investment advisory services to clients. The advisory contract established with each client sets forth the discretionary authority for trading. Where investment discretion has been granted, TYT generally manages the client's account and makes investment decisions without consultation with the client as to when the securities are to be bought or sold for the account, the total amount of the securities to be bought/sold, what securities to buy or sell, or the price per share.

Item 17: Voting Client Securities (Proxy Voting)

TYT will not ask for, nor accept voting authority for client securities. Clients will receive proxies directly from the issuer of the security or the custodian. Clients should direct all proxy questions to the issuer of the security.

Item 18: Financial Information

A. Balance Sheet

TYT neither requires nor solicits prepayment of more than \$1,200 in fees per client, six months or more in advance, and therefore is not required to include a balance sheet with this brochure.

B. Financial Conditions Reasonably Likely to Impair Ability to Meet Contractual Commitments to Clients

Neither TYT nor its management has any financial condition that is likely to reasonably impair TYT's ability to meet contractual commitments to clients.

C. Bankruptcy Petitions in Previous Ten Years

TYT has not been the subject of a bankruptcy petition in the last ten years.
