

Dark Forest Capital Management LP

151 West Avenue, Darien, CT 06820

FEBRUARY 2021

This “**Brochure**” provides information about the qualifications and business practices of Dark Forest Capital Management LP (hereinafter “**Dark Forest**”, “**we**”, “**us**”, “**our**” or the “**Firm**” or “**Investment Manager**”). If you have any questions about the contents of this Brochure, please contact our Chief Compliance Officer (“**CCO**”), Michael DeAddio, by email at mike@darkforesttech.com. Information in this Brochure has not been approved or verified by the U.S. Securities and Exchange Commission (the “**SEC**”) or by any state securities authority.

Dark Forest has applied as an “Investment Adviser Expecting to be Eligible for Commission Registration within 120 Days” with the SEC. Registration as an investment adviser does not imply that Dark Forest or any of its principals or employees possess a particular level of skill or training in the investment advisory business or any other business.

Additional information about Dark Forest is also available on the SEC's website at www.adviserinfo.sec.gov.

Item 2: Material Changes

This Brochure is Dark Forest's initial Form ADV Part 2A which has been submitted with our application for registration with the SEC; therefore, there are no material changes to report. In the future, if the Brochure contains material changes from our last update, we will identify and discuss those changes in this section.

Item 4: Advisory Business

Dark Forest Capital Management LP (hereinafter “**Dark Forest**”, “**we**”, “**us**”, “**our**” or the “**Firm**” or “**Investment Manager**”) was organized in August 2020 as a Delaware limited partnership with a principal place of business in Darien, CT.

We are an affiliate of Dark Forest Capital Management GP LLC (the “General Partner”), the general partner of the Firm; Dark Forest Global Equity Fund GP LLC (the “Fund General Partner”), the general partner of the Onshore Fund (as defined below) and the Master Fund (as defined below). The General Partner and the Fund General Partner, are herein collectively referred to as the “Dark Forest General Partners.”

Jacob Kline, the Founding Member, Chief Executive Officer, and Chief Investment Officer of the Firm (the “**CIO**”), is the majority beneficial owner of Firm and directs the investment activities and operations of the Funds (as defined below) and the Master Fund (as defined below).

Dark Forest will provide discretionary investment management services to qualified investors through its private funds: Dark Forest Global Equity Master Fund LP; Dark Forest Global Equity Onshore Fund LP; and Dark Forest Global Equity Offshore Fund Ltd.

We serve as the investment adviser, with discretionary trading authority, to private, pooled investment vehicles, the securities of which are offered through a private placement memorandum to accredited investors, as defined under the Securities Act of 1933, as amended, and qualified purchasers, as defined under the Investment Company Act of 1940, as amended. We do not tailor our advisory services to the individual needs of any particular investor.

Following registration with the SEC, Dark Forest intends to manage the following private, pooled investment vehicles:

- Dark Forest Global Equity Offshore Fund Ltd, a Cayman Islands exempted company (the “**Offshore Fund**”);
- Dark Forest Global Equity Onshore Fund LP, a Delaware limited partnership (the “**Onshore Fund**”); and
- Dark Forest Global Equity Master Fund LP, a Cayman Islands exempted limited partnership (the “**Master Fund**”).

The Master Fund, the Onshore Fund and the Offshore Fund are herein each referred to as a “**Fund**” or “**Client**”, and collectively referred to as the “**Funds**” or the “**Clients**”.

The Onshore Fund’s “**Limited Partners**” and the Offshore Fund’s “**Shareholders**” are hereafter collectively referred to as the “**Investors**” where appropriate.

Our investment decisions and advice with respect to the Funds are subject to each Fund’s investment objectives and guidelines, as set forth in its respective “**Offering Documents**.”

We do not currently participate in any Wrap Fee Programs.

Currently, we do not have regulatory assets under management, but we expect to have, within 120 days of the effective date of our initial registration, client assets under management sufficient to allow us to remain eligible for registration with the SEC.

Item 5: Fees and Compensation

The fees applicable to each of the Funds are set forth in detail in the corresponding Offering Documents. A brief summary of such fees is provided below.

Management Fee

Dark Forest is paid an investment management fee ("**Management Fee**") per annum. The Management Fee will range from 1.75% to 2.00%.

The Investment Manager, in its sole discretion, may waive or modify the Management Fee or Incentive Fee for any Investor.

Other Types of Fees or Expenses

Dark Forest is authorized to incur and pay in the name and on behalf of the Funds all expenses which they deem necessary or advisable.

The Firm is responsible for and shall pay, or cause to be paid, all of their own ordinary administrative and overhead expenses, including, without limitation, all costs and expenses related to rent, furniture, fixtures, equipment, office supplies, clerical expenses and all salaries, bonuses and benefits paid to, or on behalf of, personnel of the Firm.

The Funds will Offshore Fund and Onshore Fund bear all of its operating expenses and its pro rata share of the operating expenses of the Master Fund (collectively, the "Partnership Expenses"), including such costs incurred at or prior to the formation of the Funds and prior to the closing of the Funds, which expenses will include, without limitation: (a) organizational and offering expenses; (b) expenses associated with all investments and transactions considered, evaluated and/or consummated by the Funds, as well as overall consideration and evaluation of the Master Fund's portfolio, including, without limitation, those expenses incurred before the initial closing of the Dark Forest Funds, including, without limitation, expenses associated with sourcing, negotiating, investigating, researching, financing and structuring of investments and potential investments, whether or not consummated, including, without limitation, market data, alternative data and research onboarding, ingestion, aggregation and analysis and third-party research, market data, alternative data, analytics, modeling, risk, structuring, pricing, execution and other third-party information systems, including, without limitation, installation and maintenance, software and service fees (including, without limitation, the expenses with respect to data, data feeds, subscriptions, expert networks, political intelligence providers and reports); (c) the costs of research-related computer hardware and software expenses, including, without limitation, Bloomberg terminals and subscriptions and other market data and alternative information systems, as well as the costs of research management systems and corporate access tracking systems; (d) the costs of the Investment Manager's portfolio management system and any other software used for accounting and/or monitoring of the portfolio, including, without limitation, subscriptions relating to, among other things, trading and order management systems and services; (e) expenses associated with holding, financing, monitoring, hedging, maintaining and disposing of all investments of the Funds and all transaction and other costs associated therewith, including, without limitation, expenses associated with proxy research and voting

services; (f) travel and related expenses associated with investments and potential investments; (g) professional fees associated with investments and potential investments, including, without limitation, consulting, due diligence, accounting, valuation, financial, legal and other advisory fees and expenses; (h) transaction fees, brokerage commissions, custodial fees, clearing and settlement charges and similar fees and expenses associated with the acquisition, disposition and settling of investments and potential investments, including, without limitation, in connection with outsourced trading; (i) expenses associated with legal and regulatory filings of the Funds in the United States, the Cayman Islands, or in any other jurisdiction, including, without limitation, pursuant to Sections 13 and 16 of the Securities Exchange Act of 1934, as amended (the “Exchange Act”), as well as the expenses associated with preparation and filing of the Investment Manager’s Form 13F, Form 13H and Form PF, if applicable, and any other similar filing in any other U.S. or non-U.S. jurisdiction; (j) administrative, custodial, appraisal, valuation, legal, regulatory, compliance, consulting, advisory and similar fees and expenses associated with the Funds’ operations, investments and transactions, including, without limitation, fees and expenses of the Administrator (defined below) and the costs of client relationship management systems; (k) expenses incurred in connection with responding to requests or inquiries from any U.S. federal, state, local or non-U.S. governmental entity or authority, regulatory body or self-regulatory organization with respect to the Funds; (l) broken-deal, failed transaction, break-up and similar fees, costs and expenses (if any); (m) costs and expenses of leverage or any other borrowings of the Funds, including, without limitation, interest charges and fees; (n) expenses incurred in the collection of monies owed to the Funds, as applicable; (o) auditing and accounting expenses of the Funds, including, without limitation, expenses associated with the preparation of financial statements, tax returns and Schedules K-1 and the fees and expenses of the auditor; (p) any entity-level taxes, fees or other governmental charges on the Funds, including, without limitation, any withholding taxes not due to the status or noncompliance of a particular Limited Partner; (q) costs and expenses associated with investor communications and reports and the delivery thereof to investors; (r) the costs of service providers or software to measure or monitor risk metrics, to aggregate positions and/or to provide reporting with respect to risk metrics and/or positions; (s) costs and expenses associated with meetings of the Limited Partners, including, without limitation, the reasonable costs of the Investment Manager’s travel to such meetings; (t) insurance expenses, including, without limitation, general partner liability insurance and other policies, if any, as well as the Fund’s share of expenses with respect to directors’ and officers’ liability insurance and errors and omissions insurance; (u) costs and expenses (including, without limitation, entity-level taxes, fees or other governmental charges) associated with the formation, organization and operation of any subsidiary, special purpose vehicle, alternative investment vehicle, holding company or similar entity formed with respect to investments, credit facilities or other transactions entered into for the benefit of the Funds; (v) wind-up, liquidation, termination and dissolution expenses; (w) costs, fees and expenses related to registration, qualification and/or exemption under any applicable U.S. federal, state, local or non-U.S. laws, rules or regulations, including, without limitation, blue sky fees, Form D, Form 8.3, CFTC filings and notices and other securities and/or investment-related filing expenses; (x) costs related to any transfers of Interests, unless otherwise charged to or borne by the applicable transferor and/or transferee; (y) expenses incurred in connection with the preparation of any amendment to the amended and restated limited partnership agreement of the Onshore Fund (the “Partnership Agreement”) and the private placement memorandums of the Onshore Fund and Offshore Fund, as well as the preparation or amendment of any side letter; (z) expenses incurred in connection with pursuing, defending or participating in any litigation, arbitration, mediation or similar proceeding by the Funds; (aa) any extraordinary expenses (including, without limitation, all litigation-related and indemnification and contribution

expenses, including, without limitation, the amount of any judgment or settlement paid in connection therewith); (bb) the Management Fee; and (cc) all other fees, costs, charges and expenses associated with the business, affairs and/or operations of the Funds, including, without limitation, any other cost that may otherwise be paid by the Funds with soft dollars pursuant to Section 28(e) of the Exchange Act.

In general, each Limited Partner will bear its proportionate share of the Partnership Expenses on a pro rata basis with respect to the size of its Capital Account(s). The General Partner may, however, allocate expenses on another basis, including by allocating certain expenses to certain (but not all) Limited Partners or Capital Accounts, if the General Partner determines that such an allocation is more equitable.

In addition, any Partnership Expenses attributable solely to investments in “new issues” will be allocated solely to those Partners who participate in the relevant investments with respect to their relative interest in such investments. Further, the General Partner will have the right to charge any Partner, and not treat as a Partnership Expense, any expense attributable to a single Partner or a group of Partners, including, without limitation, additional accounting expenses incurred in providing a calculation of “unrelated business taxable income” (“UBTI”), if any, to particular Partners.

From time to time, the General Partner, the Investment Manager and/or their affiliates may elect to bear certain expenses on behalf of the Funds that would otherwise be Partnership Expenses. The General Partner, the Investment Manager and/or their affiliates will not have any obligation to bear such expenses and may elect at any time (in whole or in part) to no longer bear such expenses on behalf of the Funds.

To the extent that Partnership Expenses are attributable to multiple Dark Forest Clients (defined below), such amounts will be allocated in accordance with the Investment Manager’s expense allocation policy, pursuant to which the Investment Manager will generally allocate such expenses pro rata based upon the respective net asset values of such applicable Dark Forest Clients. Notwithstanding the foregoing, the Investment Manager may make non-pro rata allocations as permitted by its expense allocation policy.

The Investment Manager, the General Partner and/or the Principal may advance funds on behalf of the Funds, and the Investment Manager, the General Partner and the Principal, as the case may be, will be reimbursed by the Funds for such advanced amounts.

In general, each Investor will bear its proportionate share of the Partnership Expenses on a pro rata basis, calculated based on relative gross asset value as of the beginning of each month. The Fund General Partner may, however, allocate expenses on another basis, including by allocating certain expenses to certain (but not all) Investors or capital accounts, if the Fund General Partner determines that such an allocation is more equitable.

To the extent that Partnership Expenses are attributable to multiple Clients, such amounts will be allocated in accordance with the Investment Manager’s expense allocation policy, pursuant to which the Investment Manager will generally allocate such expenses pro rata based upon the respective gross asset values of such applicable Clients. Notwithstanding the foregoing, the Investment Manager may make non-pro rata allocations as permitted by the expense allocation policy.

In addition, any Partnership Expenses attributable solely to investments in “new issues” will be allocated solely to those Investors who participate in the relevant investments with respect

to their relative interest in such investments. Further, the Fund General Partner will have the right to charge any Investor, and not treat as a Partnership Expense, any expense attributable to a single Partner or a small group of Partners, including, without limitation, additional accounting expenses incurred in providing a calculation of “unrelated business taxable income” (“UBTI”), if any, to particular Investor.

From time to time, the Fund General Partner, the Investment Manager and/or their affiliates may elect to bear certain expenses on behalf of the Funds that would otherwise be Partnership Expenses. The Fund General Partner, the Investment Manager and/or their affiliates will not have any obligation to bear such expenses and may elect at any time (in whole or in part) to no longer bear such expenses on behalf of the Fund.

The Investment Manager, the Fund General Partner and/or the CIO may advance funds on behalf of the Funds, and the Investment Manager, the Fund General Partner and the CIO, as the case may be, will be reimbursed by the Funds for such advanced amounts.

Item 6: Performance-Based Fees and Side-By-Side Management

We and our affiliates are entitled to a performance-based compensation between 20% and 30% of gross performance. As a result, we and our affiliates do not currently face certain conflicts of interest that may arise when an investment adviser accepts performance-based fees from some clients, but not from other clients.

Performance-based allocation arrangements may create an incentive for us to recommend investments which may be riskier or more speculative than those which we would recommend under a different arrangement.

Item 7: Types of Clients

Our clients are the Funds, as described in Item 4 above, and the Funds are generally open to, among others, institutions, pension plans, endowments, high net-worth individuals, financially sophisticated individuals, and other sophisticated investors. Currently, there is no minimum investment in the Funds is at least \$1,000,000. Such minimum investment may be waived on a case-by-case basis subject to our discretion.

Item 8: Methods of Analysis, Investment Strategies, and Risk of Loss

The descriptions set forth in this Brochure of specific advisory services that we offer to Clients, and investment strategies pursued and investments made by us on behalf of our Clients, should not be understood to limit in any way our investment activities. We may offer any advisory services, engage in any investment strategy and make any investment, including any not described in this Brochure, that we consider appropriate, subject to each Client’s investment objectives and guidelines as set forth in the Offering Documents. The investment strategies we pursue are speculative and entail substantial risks. Clients should be prepared to bear a substantial loss of capital. There can be no assurance that the investment objectives of any Client will be achieved.

Investment Objective and Strategy

The investment objective of the Funds, through the Master Fund, is to generate attractive, risk-adjusted returns by employing a global, market-neutral, long-short equity strategy that

seeks to apply a systematic investment process to combine long/short equity signals from a wide range of specialized structural flows and macro information in a self-consistent, non-linear manner. The Investment Manager will seek to exploit persistent market inefficiencies created by diverse, price-insensitive market participants across both major developed and emerging markets, and will seek to capture opportunities created by the slow absorption of macro information into individual stocks. The Investment Manager will also seek to employ more traditional, data-driven, statistical equity signals, where they are diversifying and there is a competitive advantage derived from the research process.

Through the use of its distinctive, proprietary machine learning technology, which is designed to natively incorporate transaction costs, diversification and risk constraints, the Investment Manager will seek to combine disparate sources into a single comprehensive trading system in order to produce persistent, high-quality returns.

The investment strategies described herein are those that the Investment Manager expects to employ on behalf of the Master Fund. However, except as expressly set forth herein, there are no limitations on the investment strategies that the Master Fund may employ in order to opportunistically respond to, or to take advantage of, changing market conditions and new investment opportunities. Further, the Investment Manager may invest opportunistically in securities or transactions that vary from the core strategy of the Master Fund.

Notwithstanding the foregoing, from the date of the Partnership's initial closing through and including March 1, 2022, the Master Fund will invest only in single name equity securities; provided, that "single name equity securities" does not include ancillary hedging arrangements such as equity index hedges, similar derivatives, equity swaps, financing on swap or FX.

There can be no assurance that the Partnership's or the Master Fund's investment objective will be achieved, and investment results may vary substantially on a monthly, quarterly and annual basis.

Risk of Loss Factors

The following risk factors do not purport to be a complete list or explanation of the risks involved in an investment in the clients advised by us. These risk factors include only those risks we believe to be material, significant or unusual and relate to particular significant investment strategies or methods of analysis employed by us.

An investment involves significant risks, and is suitable only for those persons who can bear the economic risk of the loss of their entire investment, who have limited need for liquidity in their investment, and who have met the conditions set forth in the Offering Documents. There can be no assurances that we will achieve our investment objectives. An investment carries with it the inherent risks associated with investments in the Financial Instruments listed in the Offering Documents, including, without limitation, the risks described below. Each prospective investor should carefully review the Offering Documents and the documents referred to herein before deciding to invest with Dark Forest. Please refer to additional risk factors in the Funds' Offering Documents.

Equity Securities Generally

The value of equity securities of public and private, listed and unlisted companies and equity derivatives generally varies with the performance of the issuer and movements in the equity markets. As a result, the Master Fund may suffer losses if it invests in equity instruments of issuers whose performance diverges from the Investment Manager's expectations or if equity markets generally move in a single direction and the Master Fund has not hedged against such a general move. The Master Fund also may be exposed to risks that issuers will not fulfill contractual obligations such as, in the case of convertible securities or private placements, delivering marketable common stock upon conversions of convertible securities and registering restricted securities for public resale.

Liquidity of Investments

Liquidity may be essential to the Master Fund's business. Under certain market conditions, such as during volatile markets or when trading in a Financial Instrument or market is otherwise impaired, the liquidity of the Master Fund's portfolio positions may be reduced. In addition, the Master Fund may from time to time hold large positions with respect to a specific type of Financial Instrument, which may reduce the Master Fund's liquidity. During such times, the Master Fund may be unable to dispose of certain assets, which would adversely affect the Master Fund's ability to rebalance its portfolio or to meet withdrawal requests. In addition, such circumstances may force the Master Fund to dispose of assets at reduced prices, thereby adversely affecting the Master Fund's performance. If there are other market participants seeking to dispose of similar assets at the same time, the Master Fund may be unable to sell such assets or prevent losses relating to such assets. Furthermore, if the Master Fund incurs substantial trading losses and/or withdrawal requests, the need for liquidity could rise sharply while its access to liquidity could be impaired. In addition, in conjunction with a market downturn, the Master Fund's counterparties could incur losses of their own, thereby weakening their financial condition and increasing the Master Fund's credit risk to them. Many non-U.S. financial markets are not as developed or as efficient as those in the U.S., and as a result, liquidity may be reduced for the Master Fund's investments.

Relative Value Strategies

Relative value strategies involve taking offsetting long and short positions in comparable Financial Instruments that have either an economic or mathematical relationship to each other and where a distortion exists between either the historical price or the fair value of that relationship. These strategies may include merger arbitrage, intra-industry pairs trades, and cross-holdings. Although there is an economic or mathematical relationship between such long and short positions, there is no guarantee that the Investment Manager's assessment of that relationship will be correct. Furthermore, because the Master Fund's strategies involve short selling, there is a risk that the Master Fund will not be able to maintain its ability to borrow securities that have been sold short.

Leverage and Borrowing

Leverage for Investment Purposes

The Master Fund may employ leverage in connection with its investment strategies or for any other purpose deemed necessary, desirable or appropriate at such times, in such amounts and subject to such terms and conditions as the General Partner or Investment Manager, as applicable, may determine in its sole and absolute discretion. Such leverage may take a variety

of forms, including, but not limited to, margin borrowing from securities brokers and dealers, repurchase agreements, derivative instruments that are inherently leveraged, loans and other financing arrangements, as determined by the General Partner in its sole and absolute discretion. Leverage is likewise deployed by shorting securities. Leverage employed by the Master Fund may be secured by the securities holdings and other assets of the Partnership and/or the Master Fund, as applicable.

The use of leverage may increase the volatility of the Partnership's returns and may compound any negative returns. Leverage typically will cause the Partnership's and/or the Master Fund's net asset value to increase or decrease at a greater rate than if leverage were not used. Borrowing for Cash Management Purposes

Leverage for Cash Management Purposes

The Master Fund has the authority to borrow for cash management purposes, such as to satisfy withdrawal requests. The rates at and terms on which the Master Fund can borrow will affect the operating results of the Master Fund.

Collateral

The instruments and borrowings utilized by the Master Fund to leverage investments may be collateralized by all or a portion of the Master Fund's portfolio. Accordingly, the Master Fund may pledge its Financial Instruments in order to borrow or otherwise obtain leverage for investment or other purposes. Should the Financial Instruments pledged to brokers to secure the Master Fund's margin accounts decline in value, the Master Fund could be subject to a "margin call", pursuant to which the Master Fund must either deposit additional funds or Financial Instruments with the broker or suffer mandatory liquidation of the pledged Financial Instruments to compensate for the decline in value. The banks and dealers that provide financing to the Master Fund can apply essentially discretionary margin, "haircut", financing and collateral valuation policies. Changes by counterparties in any of the foregoing may result in large margin calls, loss of financing and forced liquidations of positions at disadvantageous prices. Lenders that provide other types of asset-based or secured financing to the Master Fund may have similar rights. There can be no assurance that the Master Fund will be able to secure or maintain adequate financing.

Costs

Borrowings will be subject to interest, transaction and other costs, and other types of leverage also involve transaction and other costs. Any such costs may or may not be recovered by the return on the Master Fund's portfolio.

Hedging Transactions

The Master Fund may utilize Financial Instruments for risk management purposes in order to: (i) protect against possible changes in the market value of the Master Fund's investment portfolio resulting from fluctuations in the markets and changes in interest rates; (ii) protect the Master Fund's unrealized gains in the value of its investment portfolio; (iii) facilitate the sale of any Financial Instruments; (iv) enhance or preserve returns, spreads or gains on any Financial Instrument in the Master Fund's portfolio; (v) hedge against a directional trade; (vi) hedge the interest rate, credit or currency exchange rate on any of the Master Fund's Financial Instruments; (vii) protect against any increase in the price of any Financial Instruments that the Master Fund anticipates purchasing at a later date; or (viii) act for any other reason that

the Investment Manager deems appropriate. The Master Fund will not be required to hedge any particular risk in connection with a particular transaction or its portfolio generally. The Investment Manager may be unable to anticipate the occurrence of a particular risk and, therefore, may be unable to attempt to hedge against it. While the Master Fund may enter into hedging transactions to seek to reduce risk, such transactions may result in a poorer overall performance for the Master Fund than if it had not engaged in any such hedging transaction. Moreover, the portfolio will always be exposed to certain risks that cannot be hedged.

Discretion of the Investment Manager; New Strategies and Techniques

While the Investment Manager will generally seek to employ the representative investment strategies and techniques discussed herein, the Investment Manager (subject to the policies and control of the General Partner, in its capacity as general partner of the Master Fund) has considerable discretion in the types of Financial Instruments that the Master Fund may trade and has the right to modify the investment strategies and techniques of the Master Fund without the consent of the Limited Partners. New investment strategies and techniques may not be thoroughly tested in the market before being employed and may have operational or theoretical shortcomings which could result in unsuccessful trades and, ultimately, losses to the Master Fund. In addition, any new investment strategy or technique developed by the Master Fund may be more speculative than earlier investment strategies and techniques and may involve material and as-yet-unanticipated risks that could increase the risk of an investment in the Master Fund.

Short Selling

The success of the Master Fund's short selling investment strategy depends upon the Investment Manager's ability to identify and sell short Financial Instruments that are overvalued. A short sale creates the risk of a theoretically unlimited loss, in that the price of the underlying Financial Instrument could theoretically increase without limit, thus increasing the cost to the Master Fund of buying those Financial Instruments to cover the short position. There can be no assurance that the Master Fund will be able to maintain the ability to borrow Financial Instruments sold short. In such cases, the Master Fund can be "bought in" (i.e., forced to repurchase Financial Instruments in the open market to return to the lender). There also can be no assurance that the Financial Instruments necessary to cover a short position will be available for purchase at or near prices quoted in the market. Purchasing Financial Instruments to close out a short position can itself cause the price of the Financial Instruments to rise further, thereby exacerbating the loss. Short strategies can also be implemented synthetically through various instruments and be used with respect to indices or in the over-the-counter market and with respect to futures and other instruments. In some cases of synthetic short sales, there is no floating supply of an underlying instrument with which to cover or close out a short position and the Master Fund may be entirely dependent on the willingness of over-the-counter market makers to quote prices at which the synthetic short position may be unwound. There can be no assurance that such market makers will be willing to make such quotes. Short strategies can also be implemented on a leveraged basis. Lastly, even though the Master Fund secures a "good borrow" of the Financial Instrument sold short at the time of execution, the lending institution may recall the lent Financial Instrument at any time, thereby forcing the Master Fund to purchase the Financial Instrument at the then-prevailing market price, which may be higher than the price at which such Financial Instrument was originally sold short by the Master Fund.

Derivative Instruments

Certain swaps, options and other derivative instruments may be subject to various types of risks, including market risk, liquidity risk, credit risk, legal risk and operations risk. The regulatory and tax environment for derivative instruments in which the Master Fund may participate is evolving, and changes in the regulation or taxation of such instruments may have a material adverse effect on the Master Fund.

Regulation in the Derivatives Industry

There are many rules related to derivatives that may negatively impact the Master Fund, such as requirements related to recordkeeping, reporting, portfolio reconciliation, central clearing, minimum margin for uncleared over-the-counter (“**OTC**”) instruments and mandatory trading on electronic facilities, and other transaction-level obligations. Parties that act as dealers in swaps, are also subject to extensive business conduct standards, additional “know your counterparty” obligations, documentation standards and capital requirements. All of these requirements add costs to the legal, operational and compliance obligations of the Investment Manager and the Master Fund, and increase the amount of time that the Investment Manager spends on non-investment-related activities. Requirements such as these also raise the costs of entering into derivative transactions, and these increased costs will likely be passed on to the Master Fund.

These rules are operationally and technologically burdensome for the Investment Manager and the Master Fund. These compliance obligations require employee training and use of technology, and there are operational risks borne by the Master Fund in implementing procedures to comply with many of these additional obligations.

These regulations may also result in the Master Fund forgoing the use of certain trading counterparties (such as broker-dealers and futures commission merchants (“**FCMs**”)), as the use of other parties may be more efficient for the Master Fund from a regulatory perspective. However, this could limit the Master Fund’s trading activities, create losses, preclude the Master Fund from engaging in certain transactions or prevent the Master Fund from trading at optimal rates and terms.

Many of these requirements were implemented under legislation intended to reform the U.S. financial regulatory system, the EU Regulation on OTC Derivatives, Central Counterparties and Trade Repositories (known as the European Market Infrastructure Regulation, or “**EMIR**”), and similar regulations globally. In the United States, regulatory responsibility for derivatives is divided between the SEC and the CFTC, a distinction that does not exist in any other jurisdiction. The SEC has regulatory authority over “security-based swaps” and the CFTC has regulatory authority over “swaps”. EMIR is being implemented in phases through the adoption of delegated acts by the European Commission. As a result of the SEC and CFTC bifurcation and the different pace at which the SEC, the CFTC, the European Commission and other international regulators have promulgated necessary regulations, different transactions are subject to

different levels of regulation. Though many rules and regulations have been finalized, there are others, particularly SEC regulations with respect to security-based swaps, that are still in the proposal stage or are expected to be introduced in the future.

The following describes derivatives regulations that may have the most significant impact on the Master Fund:

Reporting

Most swap transactions have become subject to anonymous “real time reporting” requirements, meaning that information relating to transactions entered into by the Master Fund will become visible to the market in ways that may impair the Master Fund’s ability to enter into additional transactions at comparable prices or could enable competitors to “front run” or replicate the Master Fund’s strategies.

Central Clearing

In order to mitigate counterparty risk and systemic risk in general, various U.S. and international regulatory initiatives, including EMIR, are underway to require certain derivatives to be cleared through central clearinghouses. In the United States, clearing mandates affect certain interest rate and credit default swaps. The CFTC and the SEC may introduce clearing requirements for additional classes of derivatives in the future. EMIR also requires OTC derivatives contracts meeting specific criteria to be cleared through central counterparties.

While such clearing requirements may be beneficial for the Master Fund in many respects (for instance, they may reduce the counterparty risk to the dealers to which the Master Fund would be exposed under non-cleared derivatives), the Master Fund could be exposed to new risks, such as the risk that an increasing percentage of derivatives will be required to be standardized and/or cleared through central clearinghouses, and, as a result, the Master Fund may not be able to hedge its risks or express an investment view as well as it would have been able to had it used customizable derivatives available in the over-the-counter markets. The Master Fund may have to split its derivatives portfolio between centrally cleared and over-the-counter derivatives, which may result in operational inefficiencies and an inability to offset risk between centrally cleared and over-the counter positions, and which could lead to increased costs.

Another risk is that the Master Fund may be subject to more onerous and more frequent (daily or even intraday) margin calls

from both the Master Fund's FCM and the clearinghouse. Virtually all margin models utilized by the clearinghouses are dynamic, meaning that unlike traditional bilateral swap contracts where the amount of initial margin posted on the contract is typically static throughout the life of the contract, the amount of the initial margin that is required to be posted in respect of a cleared contract will fluctuate, sometimes significantly, throughout the life of the contract. The dynamic nature of the margin models utilized by the clearinghouses and the fact that the margin models might be changed at any time may subject the Master Fund to an unexpected increase in collateral obligations by clearinghouses during a volatile market environment, which could have a detrimental effect on the Master Fund. Clearinghouses also limit collateral that they will accept to cash, U.S. treasuries and, in some cases, other highly rated sovereign and private debt instruments, which may require the Master Fund to borrow eligible securities from a dealer to meet margin calls and raise the costs of cleared trades to the Master Fund. In addition, clearinghouses may not allow the Master Fund to portfolio-margin its positions, which may increase the Master Fund's costs.

Although standardized clearing for derivatives is intended to reduce counterparty risk (for instance, it may reduce the counterparty risk to the dealers to which the Master Fund would have been exposed under OTC derivatives), it does not eliminate risk. Derivatives clearing may also lead to concentration of counterparty risk, namely in the clearinghouse and the Master Fund's FCM, subjecting the Master Fund to the risk that the assets of the FCM are insufficient to satisfy all of the FCM's payment obligations, leading to a payment default. The failure of a clearinghouse or FCM could have a significant impact on the financial system. Even if a clearinghouse does not fail, large losses could force significant capital calls on FCMs during a financial crisis, which could lead FCMs to default and thus worsen the crisis.

Swap Execution Facilities

In addition to the central clearing requirement, certain swap transactions are required to trade on regulated electronic platforms such as swap execution facilities ("SEFs"), which require the Master Fund to subject itself to regulation by these venues and subject the Master Fund to the jurisdiction of the CFTC. CFTC rules governing the operation of SEFs continue to evolve; the SEC has yet to finalize rules related to security-based SEFs.

The EU regulatory framework governing derivatives is set not only by EMIR but also a legislative package known as a recast of the Markets in Financial Instruments Directive (“**MiFID II**”). Among other things, MiFID II requires transactions in derivatives to be executed on regulated trading venues.

It is not clear whether these trading venues will benefit or impede liquidity, or how they will fare in times of market stress. Trading on these trading venues may increase the pricing discrepancy between assets and their hedges as products may not be able to be executed simultaneously, therefore increasing basis risk. It may also become relatively expensive for the Master Fund to obtain tailored swap products to hedge particular risks in its portfolio due to higher collateral requirements on bilateral transactions as a result of these regulations.

Margin Requirements for Non-Cleared Swaps

Rules issued by U.S., EU and other regulators globally (the “**Margin Rules**”) impose various margin requirements on all swaps that are not centrally cleared, including the establishment of minimum amounts of initial margin that must be posted, and, in some cases, the mandatory segregation of initial margin with a third-party custodian. Although the Margin Rules are intended to increase the stability of the derivatives market, the overall amount of margin that the Master Fund will be required to post to swap counterparties may increase by a material amount, and as a result the Master Fund may not be able to deploy capital as effectively. Additionally, to the extent the Master Fund is required to segregate initial margin with a third party custodian, additional costs will be incurred by the Master Fund.

Call and Put Options

The Master Fund may incur risks associated with the sale and purchase of call options and put options. Under a conventional cash-settled option, the purchaser of the option pays a premium in exchange for the right to receive upon exercise of the option (i) in the case of a call option, the excess, if any, of the reference price or value of the underlier (as determined pursuant to the terms of the option) above the option’s strike price or (ii) in the case of a put option, the excess, if any, of the option’s strike price above the reference price or value of the underlier (as so determined). Under a conventional physically-settled option structure, the purchaser of a call option has the right to purchase a specified quantity of the underlier at the strike price, and the purchaser of a put option has the right to sell a specified quantity of the underlier at the strike price.

A purchaser of an option may suffer a total loss of premium (plus transaction costs) if that option expires without being exercised. An option's time value (i.e., the component of the option's value that exceeds the in-the-money amount) tends to diminish over time. Even though an option may be in-the-money to the purchaser at various times prior to its expiration date, the purchaser's ability to realize the value of an option depends on when and how the option may be exercised. For example, the terms of the transaction may provide for the option to be exercised automatically if it is in-the-money on the expiration date. Conversely, the terms may require timely delivery of a notice of exercise, and exercise may be subject to other conditions (such as the occurrence or non-occurrence of certain events, such as knock-in, knock-out or other barrier events) and timing requirements, including the "style" of the option.

Uncovered option writing (i.e., selling an option when the seller does not own a like quantity of an offsetting position in the underlier) exposes the seller to potentially significant loss. The potential loss of uncovered call writing is unlimited. The seller of an uncovered call may incur large losses if the reference price or value of the underlier increases above the exercise price by more than the amount of any premiums earned. As with writing uncovered calls, the risk of writing uncovered put options is substantial. The seller of an uncovered put option bears a risk of loss if the reference price or value of the underlier declines below the exercise price by more than the amount of any premiums earned. Such loss could be substantial if there is a significant decline in the value of the underlier.

Index or Index Options

The value of an index or index option fluctuates with changes in the market values of the assets included in the index. Because the value of an index or index option depends upon movements in the level of the index rather than the price of a particular asset, whether the Master Fund will realize appreciation or depreciation from the purchase or writing of options on indices depends upon movements in the level of instrument prices in the assets generally or, in the case of certain indices, in an industry or market segment, rather than movements in the price of particular assets.

Index Futures

The price of index futures contracts may not correlate perfectly with the movement in the underlying index because of certain market distortions. First, all participants in the futures market are subject to margin deposit and maintenance requirements. Rather than meeting additional margin deposit requirements, participants may close futures contracts through offsetting transactions that would distort the normal relationship between the index and futures markets. Second, from the point of view of speculators, the deposit requirements in the futures market are less onerous than margin requirements in the securities market. Therefore, increased participation by speculators in the futures market also may cause price distortions. Successful use of index futures

contracts by the Master Fund also is subject to the Investment Manager's ability to correctly predict movements in the direction of the market.

Futures Contracts

The value of futures contracts depends upon the price of the Financial Instruments, such as commodities, underlying them. The prices of futures contracts are highly volatile, and price movements of futures contracts can be influenced by, among other things, interest rates, changing supply and demand relationships, trade, fiscal, monetary and exchange control programs and policies of governments, as well as national and international political and economic events and policies. In addition, investments in futures contracts are also subject to the risk of the failure of any of the exchanges on which the Master Fund's positions trade or of its clearing houses or counterparties. Futures positions may be illiquid because certain commodity exchanges limit fluctuations in certain futures contract prices during a single day by regulations referred to as "daily price fluctuation limits" or "daily limits". Under such daily limits, during a single trading day no trades may be executed at prices beyond the daily limits. Once the price of a particular futures contract has increased or decreased by an amount equal to the daily limit, positions in that contract can neither be taken nor liquidated unless traders are willing to effect trades at or within the limit. This could prevent the Master Fund from promptly liquidating unfavorable positions and subject the Master Fund to substantial losses or prevent it from entering into desired trades. Also, low margin or premiums normally required in such trading may provide a large amount of leverage, and a relatively small change in the price of a security or contract can produce a disproportionately larger profit or loss. In extraordinary circumstances, a futures exchange or the CFTC could suspend trading in a particular futures contract, or order liquidation or settlement of all open positions in such contract.

Non-U.S. Futures Transactions

Foreign futures transactions involve executing and clearing trades on a foreign exchange. This is the case even if the foreign exchange is formally "linked" to a domestic exchange, whereby a trade executed on one exchange liquidates or establishes a position on the other exchange. No domestic organization regulates the activities of a foreign exchange, including the execution, delivery, and clearing of transactions on such an exchange, and no domestic regulator has the power to compel enforcement of the rules of the foreign exchange or the laws of the foreign country. Moreover, such laws or regulations will vary depending on the foreign country in which the transaction occurs. For these reasons, the Master Fund may not be afforded certain of the protections which apply to domestic transactions, including the right to use domestic alternative dispute resolution procedures. In particular, funds received from customers to margin foreign futures transactions may not be provided the same protections as funds received to margin futures transactions on domestic exchanges. In addition, the price of any foreign futures or option contract and, therefore, the potential profit and loss resulting therefrom, may be affected by any fluctuation

in the foreign exchange rate between the time the order is placed and the time the foreign futures contract is liquidated or the time the foreign option contract is liquidated or exercised.

Forward Contracts

The Master Fund may enter into forward contracts and options thereon, including non-deliverable forwards. The principals who deal in the forward contract market are not required to continue to make markets in such contracts. There have been periods during which certain participants in forward markets have refused to quote prices for forward contracts or have quoted prices with an unusually wide spread between the price at which they were prepared to buy and that at which they were prepared to sell. The imposition of credit controls or price risk limitations by governmental authorities may limit such forward trading to less than that which the Investment Manager would otherwise recommend, to the possible detriment of the Master Fund. In its forward trading, the Master Fund will be subject to the risk of the failure of, or the inability or refusal to perform with respect to its forward contracts by, the principals with which the Master Fund trades. Master Fund assets on deposit with such principals will also generally not be protected by the same segregation requirements imposed on certain regulated brokers in respect of customer funds on deposit with them. The Investment Manager may order trades for the Master Fund in such markets through agents. Accordingly, the insolvency or bankruptcy of such parties could also subject the Master Fund to the risk of loss.

Contracts for Differences

Contracts for differences (“CFDs”) are privately negotiated contracts between two parties, buyer and seller, stipulating that the seller will pay to or receive from the buyer the difference between the nominal value of the underlying instrument at the opening of the contract and that instrument’s value at the end of the contract. The underlying instrument may be a single security, stock basket or index. A CFD can be set up to take either a short or long position on the underlying instrument. The buyer and seller are both required to post margin, which is adjusted daily. The buyer will also pay to the seller a financing rate on the notional amount of the capital employed by the seller less the margin deposit. As is the case with trading any financial instrument, there is the risk of loss associated with trading a CFD. There may be liquidity risk if the underlying instrument is illiquid because the liquidity of a CFD is based on the liquidity of the underlying instrument. A further risk is that adverse movements in the underlying security will require the posting of additional margin. CFDs also carry counterparty risk, i.e., the risk that the counterparty to the CFD transaction may be unable or unwilling to make payments or to otherwise honor its financial obligations under the terms of the contract. If the counterparty were to do so, the value of the contract may be reduced. Entry into a CFD transaction may, in certain circumstances, require the payment of an initial margin and adverse market movements against the underlying stock may require additional margin payments. CFDs may be considered illiquid. To the extent that there is an

imperfect correlation between the return on the Master Fund's obligation to its counterparty under the CFDs and the return on related assets in its portfolio, the CFD transaction may increase the Master Fund's financial risk.

Failure to Enter into Offsetting Trade

To the extent the Master Fund invests in a futures contract or long option, unless an offsetting trade is made, the Master Fund would be required to take physical delivery of the commodity underlying the future or option. To the extent the Investment Manager fails to enter into such offsetting trade prior to the expiration of the contract, the Master Fund may suffer a loss since neither the Master Fund nor the Investment Manager has the operational capacity to accept physical delivery of commodities.

Item 9: Disciplinary Information

To the best of our knowledge, there are no legal or disciplinary events that are material to an Investor's or prospective investor's evaluation of our advisory business or the integrity of our management.

Item 10: Other Financial Industry Activities and Affiliations

Neither we nor our management persons are registered as broker-dealers, and neither of us has any application pending to register with the SEC as a broker-dealer or registered representative of a broker-dealer, respectively.

Item 11: Code of Ethics, Participation or Interest in Client Transactions, and Personal Trading

Code of Ethics

Dark Forest has adopted a "Code of Ethics" that establishes the high standard of conduct that we expect of our employees and procedures regarding our employees' personal trading of securities. Our employees are required to certify their adherence to the terms set forth in the Code of Ethics upon commencement of employment and annually thereafter. Employees also are required to provide quarterly certifications of compliance with certain Code of Ethics provisions.

The foundation of our Code of Ethics is based upon the following underlying fiduciary principles:

- Employees must at all times place the interests of the Funds and Investors first;
- Employees must ensure that all personal securities transactions are conducted consistent with the Code of Ethics' Employee Personal Investment Policy (described below); and
- Employees should not take inappropriate advantage of their position at the Firm.
- Independence in the investment decision-making process must be maintained at all times.

The Code of Ethics places restrictions on personal trades by employees and mandates that employees disclose their personal securities holdings and transactions to the Investment Adviser on a periodic basis. The Code of Ethics permits personal accounts, but prohibits trading in single name equity securities, other than legacy positions, which are subject to pre-approval, and requires pre-approval and/or minimum holding periods for certain types of transactions.

Employees are not required, however, to obtain pre-clearance for personal investments in certain other asset classes and goods, including certain investments in residential real estate and mutual funds, whether or not our clients have invested in the same or similar assets. We have the ability to permit certain employees to maintain various personal investments that were acquired prior to their association with the Investment Adviser, including investments in private issuers that may subsequently conduct public offerings of securities, and may grant similar permissions in the future and/or permit personnel to sell such previously acquired securities.

Employees are prohibited from participating in Initial Public Offerings (“IPOs”). Employees are also prohibited from personally, or on behalf of a Client, purchasing or selling securities that appear on the Firm’s Restricted List.

Employees must obtain pre-approval from the CCO before: (i) engaging in any outside business activities; or (ii) making any private investments.

We will provide a copy of our Code of Ethics to our Investors, or any prospective investor, upon request, to be viewed on the premises.

Item 12: Brokerage Practices

Dark Forest is authorized to determine the broker-dealer to be used for executing securities transactions for the Funds. In selecting broker-dealers to execute transactions, we do not need to solicit competitive bids and do not have an obligation to solely seek the lowest available commission cost. Generally, it is not our practice to negotiate “execution only” commission rates; therefore, the Funds may be deemed to be paying for research, brokerage or other services provided by the broker which are included in the commission rate.

We shall also have the authority to select and appoint custodians of the assets of the Funds. The Firm’s authority is limited by its own internal policies and procedures and each Fund’s investment guidelines.

Best Execution

In selecting an appropriate broker-dealer to effect a Client trade, we seek to obtain “**Best Execution**,” meaning generally the execution of a securities transaction for a Client in such a manner that a Client’s total costs or proceeds in the transaction are most favorable under the circumstances. Accordingly, in seeking Best Execution, we will take into consideration the price of a security offered by the broker-dealer, as well as a broker-dealer’s full range and quality of their services including, among other things, their facilities, reliability and financial responsibility, execution capability, commission rates, responsiveness to us, brokerage and research services provided to us (for example, research ideas, analysis, and investment

strategies), special execution and block positioning capabilities, clearance, and settlement and custodial services.

Soft Dollars

The Firm currently does not use use “**Soft Dollars**”. However, if the Firm choses to use Soft Dollars in the future, in such cases, Soft Dollar credits, generated by the Fund’s trading activities, would be used to purchase brokerage and research services or products that would otherwise have been a Fund expense. We intend to keep any such arrangements within the parameters of the safe harbor of Section 28(e) of the Exchange Act.

Neither Dark Forest nor any related person receives client referrals from any broker-dealer or third party. However, subject to best execution, we may consider, among other things, capital introduction and marketing assistance with respect to Investors in the Funds in selecting or recommending broker-dealers for the Funds.

The provision by a broker of research and other services and property to us creates an incentive for us to select such broker since we would not have to pay for such research and other services and property as opposed to solely seeking the most favorable execution for a Client. Any research, services or property provided by a broker may benefit any Client and such benefits may not be proportionate to commission dollars related to the provision of such research, services or property.

Item 13: Review of Accounts

Our Portfolio Manager and investment professionals continuously monitor and analyze the transactions, positions, and investment levels of the Fund to ensure that they conform with the investment objectives and guidelines that are stated in the Fund’s Offering Documents. In these reviews, the Firm pays particular attention to any changes in the investment’s fundamentals, overall risk management and changes in the markets that may affect price levels.

Account Reporting

We perform various periodic reviews of each Client’s portfolio. Such reviews are conducted by our officers.

We will distribute an audited financial report with respect to the previous fiscal year to all Investors within 120 days of fiscal year end. We may also distribute unaudited net asset value statements on at least a quarterly basis, quarter-end performance reports, and a quarterly investor letter to all Investors.

Item 14: Client Referrals and Other Compensation

We do not receive economic benefits from non-clients for providing investment advice and other advisory services. Neither we nor any of our related persons, directly or indirectly, compensate any person who is not a supervised person for client referrals.

Item 15: Custody

We will be deemed to have custody of Client funds and securities because we have the authority to obtain Client funds or securities, for example, by deducting advisory fees from a Client's account or otherwise withdrawing funds from a Client's account. Account statements related to the Clients are sent by qualified custodians to Dark Forest.

We will comply with Rule 206(4)-2 of the Investment Advisers Act of 1940, as amended (the “**Advisers Act**”) (i.e., the “custody rule”) by meeting the conditions of the pooled vehicle annual audit approach. Upon completion of the relevant Fund’s annual audit by an independent auditor that is registered with, and subject to inspection by, the Public Company Accounting Oversight Board (PCAOB), we will distribute the Fund’s audited financials to Investors within 120 days of such Fund’s fiscal year end.

Item 16: Investment Discretion

We will have full discretionary investment authority with respect to the Funds, including the authority to make decisions with respect to which securities to be bought and sold, as well as the amount and price of those securities. Our investment discretion and authority is subject to the limitations set forth in the Client’s investment management agreement or the particular Fund’s Offering Documents, as applicable.

Item 17: Voting Client Securities

In compliance with Rule 206(4)-6 of the Advisers Act (i.e., the “proxy voting rule”), we have adopted proxy voting policies and procedures. The general policy is to vote all proxy proposals, amendments, consents or resolutions (collectively, “**Proxies**”) in a prudent and diligent manner that will serve the applicable Client’s best interests and is in line with the Client’s investment objectives.

We may take into account all relevant factors, as determined by us in our discretion, including, without limitation:

- the impact on the value of the securities or instruments owned by the relevant Client and the returns on those securities;
- the anticipated associated costs and benefits;
- the continued or increased availability of portfolio information; and
- industry and business practices.

Generally, Clients may not direct our vote in a particular solicitation.

Clients may obtain a copy of our Proxy voting policies and our Proxy voting record upon request.

Item 18: Financial Information

We are not required to include a balance sheet for our most recent fiscal year, are not aware of any financial condition reasonably likely to impair our ability to meet contractual commitments to Clients, and have not been the subject of a bankruptcy petition at any time during the past ten years.
