Item 4: Advisory Business

A. Description of the Advisory Firm

Riverstone Wealth Management LLC (hereinafter “RWM”) is a Limited Liability Company organized in the State of Pennsylvania. The firm was formed in January 2008, registered as an investment adviser in March 2017, and the principal owners are Wesley Creese and Josiah Hoffman.

B. Types of Advisory Services

Financial Planning

Financial plans and financial planning may include, but are not limited to: investment planning; life insurance; tax concerns; retirement planning; college planning; and debt/credit planning.

RWM provides portfolio management services on a wrap fee basis only. Clients who wish to receive portfolio management services by RWM will receive the Part 2A- Appendix I, the Wrap Fee Program Brochure.

Services Limited to Specific Types of Investments

RWM generally limits its investment advice to mutual funds, fixed income securities, insurance products including annuities, equities, ETFs (including ETFs in the gold and precious metal sectors), treasury inflation protected/inflation linked bonds, non-U.S. securities, venture capital funds and private placements. RWM may use other securities as well to help diversify a portfolio when applicable.

C. Client Tailored Services and Client Imposed Restrictions

RWM will tailor a program for each individual client. This will include an interview session to get to know the client’s specific needs and requirements as well as a plan that will be executed by RWM on behalf of the client. RWM may use model allocations together with a specific set of recommendations for each client based on their personal restrictions, needs, and targets. Clients may impose restrictions in investing in certain securities or types of securities in accordance with their values or beliefs. However, if the restrictions prevent RWM from properly servicing the client account, or if the restrictions would require RWM to deviate from its standard suite of services, RWM reserves the right to end the relationship.

D. Wrap Fee Programs

RWM participates in wrap fee programs, which are investment programs where the investor pays one stated fee that includes management fees, transaction costs, fund expenses, and other administrative fees. RWM manages the investments in the wrap fee program. Fees paid under the wrap fee program will be given to RWM as a management fee.

E. Assets Under Management

RWM has the following assets under management:

Discretionary Amounts:	Non-discretionary Amounts:	Date Calculated:
\$246,296,929	\$0.00	December 2020

Item 5: Fees and Compensation

A. Fee Schedule

Wrap Fee Portfolio Management Services Fees

Total Assets Under Management	Annual Fee
\$0- \$1,000,000	1.00%
\$1,000,001 - \$2,000,000	0.75%
\$2,000,001 - \$10,000,000	0.50%
\$10,000,001 - And Up	0.25%

Financial Planning Fees

Fixed Fees

The negotiated fixed rate for creating client financial plans is between \$100 and \$10,000.

Hourly Fees

The negotiated hourly fee for these services is between \$100 and \$500.

Clients may terminate the agreement without penalty, for full refund of RWM's fees, within five business days of signing the Financial Planning Agreement. Thereafter, clients may terminate the Financial Planning Agreement generally upon written notice.

B. Payment of Fees

Payment of Financial Planning Fees

Financial planning fees are paid via check.

Fixed financial planning fees are paid 50% in advance, but never more than six months in advance, with the remainder due upon presentation of the plan.

Hourly financial planning fees are paid 50% in advance, but never more than six months in advance, with the remainder due upon presentation of the plan.

C. Client Responsibility For Third Party Fees

RWM will wrap third party fees (i.e. custodian fees, brokerage fees, mutual fund fees, transaction fees, etc.). RWM will charge clients one fee, and pay all transaction fees using the fee collected from the client.

D. Prepayment of Fees

Fixed fees that are collected in advance will be refunded based on the prorated amount of work completed at the point of termination.

For hourly fees that are collected in advance, the fee refunded will be the balance of the fees collected in advance minus the hourly rate times the number of hours of work that has been completed up to and including the day of termination.

E. Outside Compensation For the Sale of Securities to Clients

Josiah David Hoffman and Wesley William Creese are registered representatives of a broker-dealer. Josiah David Hoffman and Wesley William Creese are also insurance agents. In these roles, they accept compensation for the sale of investment products to RWM clients.

1. This is a Conflict of Interest

Supervised persons may accept compensation for the sale of investment products, including asset based sales charges or service fees from the sale of mutual funds to RWM's clients. This presents a conflict of interest and gives the supervised person an incentive to recommend products based on the compensation received rather than on the client's needs. When recommending the sale of investment products for which the

supervised persons receives compensation, RWM will document the conflict of interest in the client file and inform the client of the conflict of interest.

2. Clients Have the Option to Purchase Recommended Products From Other Brokers

Clients always have the option to purchase RWM recommended products through other brokers or agents that are not affiliated with RWM.

3. Commissions are not RWM's primary source of compensation for advisory services

Commissions are not RWM's primary source of compensation for advisory services.

4. Advisory Fees in Addition to Commissions or Markups

Advisory fees that are charged to clients are not reduced to offset the commissions or markups on investment products recommended to clients.

Item 6: Performance-Based Fees and Side-By-Side Management

RWM does not accept performance-based fees or other fees based on a share of capital gains on or capital appreciation of the assets of a client.

Item 7: Types of Clients

RWM generally provides advisory services to the following types of clients:

- ❖ Individuals
- ❖ High-Net-Worth Individuals
- ❖ Pension and Profit Sharing Plans
- ❖ Charitable Organizations
- ❖ Corporations or Business Entities

There is no account minimum for any of RWM's services.

Item 8: Methods of Analysis, Investment Strategies, & Risk of Loss

A. Methods of Analysis and Investment Strategies

Methods of Analysis

RWM's methods of analysis include Charting analysis, Cyclical analysis, Fundamental analysis, Modern portfolio theory, Quantitative analysis and Technical analysis.

Charting analysis involves the use of patterns in performance charts. RWM uses this technique to search for patterns used to help predict favorable conditions for buying and/or selling a security.

Cyclical analysis involves the analysis of business cycles to find favorable conditions for buying and/or selling a security.

Fundamental analysis involves the analysis of financial statements, the general financial health of companies, and/or the analysis of management or competitive advantages.

Modern portfolio theory is a theory of investment that attempts to maximize portfolio expected return for a given amount of portfolio risk, or equivalently minimize risk for a given level of expected return, each by carefully choosing the proportions of various asset.

Quantitative analysis deals with measurable factors as distinguished from qualitative considerations such as the character of management or the state of employee morale, such as the value of assets, the cost of capital, historical projections of sales, and so on.

Technical analysis involves the analysis of past market data; primarily price and volume.

Investment Strategies

RWM uses long term trading, short sales, margin transactions and options trading (including covered options, uncovered options, or spreading strategies).

Investing in securities involves a risk of loss that you, as a client, should be prepared to bear.

B. Material Risks Involved

Methods of Analysis

Charting analysis strategy involves using and comparing various charts to predict long and short term performance or market trends. The risk involved in using this method is that only past performance data is considered without using other methods to crosscheck data. Using charting analysis without other methods of analysis would be making the assumption that past performance will be indicative of future performance. This may not be the case.

Cyclical analysis assumes that the markets react in cyclical patterns which, once identified, can be leveraged to provide performance. The risks with this strategy are two-fold: 1) the markets do not always repeat cyclical patterns; and 2) if too many investors begin to implement this strategy, then it changes the very cycles these investors are trying to exploit.

Fundamental analysis concentrates on factors that determine a company's value and expected future earnings. This strategy would normally encourage equity purchases in stocks that are undervalued or priced below their perceived value. The risk assumed is that the market will fail to reach expectations of perceived value.

Modern portfolio theory assumes that investors are risk averse, meaning that given two portfolios that offer the same expected return, investors will prefer the less risky one. Thus, an investor will take on increased risk only if compensated by higher expected returns. Conversely, an investor who wants higher expected returns must accept more risk. The exact trade-off will be the same for all investors, but different investors will evaluate the trade-off differently based on individual risk aversion characteristics. The implication is that a rational investor will not invest in a portfolio if a second portfolio exists with a more favorable risk-expected return profile – i.e., if for that level of risk an alternative portfolio exists which has better expected returns.

Quantitative analysis Investment strategies using quantitative models may perform differently than expected as a result of, among other things, the factors used in the models, the weight placed on each factor, changes from the factors' historical trends, and technical issues in the construction and implementation of the models.

Technical analysis attempts to predict a future stock price or direction based on market trends. The assumption is that the market follows discernible patterns and if these patterns can be identified then a prediction can be made. The risk is that markets do not always follow patterns and relying solely on this method may not take into account new patterns that emerge over time.

Investment Strategies

RWM's use of short sales, margin transactions and options trading generally holds greater risk, and clients should be aware that there is a material risk of loss using any of those strategies.

Long term trading is designed to capture market rates of both return and risk. Due to its nature, the long-term investment strategy can expose clients to various types of risk that will typically surface at various intervals during the time the client owns the investments. These risks include but are not limited to inflation (purchasing power) risk, interest rate risk, economic risk, market risk, and political/regulatory risk.

Margin transactions use leverage that is borrowed from a brokerage firm as collateral. When losses occur, the value of the margin account may fall below the brokerage firm's threshold thereby triggering a margin call. This may force the account holder to either allocate more funds to the account or sell assets on a shorter time frame than desired.

Options transactions involve a contract to purchase a security at a given price, not necessarily at market value, depending on the market. This strategy includes the risk that an option may expire out of the money resulting in minimal or no value, as well as the possibility of leveraged loss of trading capital due to the leveraged nature of stock options.

Short sales entail the possibility of infinite loss. An increase in the applicable securities' prices will result in a loss and, over time, the market has historically trended upward.

Investing in securities involves a risk of loss that you, as a client, should be prepared to bear.

C. Risks of Specific Securities Utilized

RWM's use of short sales, margin transactions and options trading generally holds greater risk of capital loss. Clients should be aware that there is a material risk of loss using any investment strategy. The investment types listed below (leaving aside Treasury Inflation Protected/Inflation Linked Bonds) are not guaranteed or insured by the FDIC or any other government agency.

Mutual Funds: Investing in mutual funds carries the risk of capital loss and thus you may lose money investing in mutual funds. All mutual funds have costs that lower investment returns. The funds can be of bond "fixed income" nature (lower risk) or stock "equity" nature.

Equity investment generally refers to buying shares of stocks in return for receiving a future payment of dividends and/or capital gains if the value of the stock increases. The value of equity securities may fluctuate in response to specific situations for each company, industry conditions and the general economic environments.

Fixed income investments generally pay a return on a fixed schedule, though the amount of the payments can vary. This type of investment can include corporate and government debt securities, leveraged loans, high yield, and investment grade debt and structured products, such as mortgage and other asset-backed securities, although individual bonds may be the best known type of fixed income security. In general, the fixed income market is volatile and fixed income securities carry interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) Fixed income securities also carry inflation risk, liquidity risk, call risk, and credit and default risks for both issuers and counterparties. The risk of default on treasury inflation protected/inflation linked bonds is dependent upon the U.S. Treasury defaulting (extremely unlikely); however, they carry a potential risk of losing share price value, albeit rather minimal. Risks of investing in foreign fixed income securities also include the general risk of non-U.S. investing described below.

Exchange Traded Funds (ETFs): An ETF is an investment fund traded on stock exchanges, similar to stocks. Investing in ETFs carries the risk of capital loss (sometimes up to a 100% loss in the case of a stock holding bankruptcy). Areas of concern include the lack of transparency in products and increasing complexity, conflicts of interest and the possibility of inadequate regulatory compliance. Precious Metal ETFs (e.g., Gold, Silver, or Palladium Bullion backed “electronic shares” not physical metal) specifically may be negatively impacted by several unique factors, among them (1) large sales by the official sector which own a significant portion of aggregate world holdings in gold and other precious metals, (2) a significant increase in hedging activities by producers of gold or other precious metals, (3) a significant change in the attitude of speculators and investors.

Annuities are a retirement product for those who may have the ability to pay a premium now and want to guarantee they receive certain monthly payments or a return on investment later in the future. Annuities are contracts issued by a life insurance company designed to meet requirement or other long-term goals. An annuity is not a life insurance policy. Variable annuities are designed to be long-term investments, to meet retirement and other long-range goals. Variable annuities are not suitable for meeting short-term goals because substantial taxes and insurance company charges may apply if you withdraw your money early. Variable annuities also involve investment risks, just as mutual funds do.

Private placements carry a substantial risk as they are subject to less regulation than are publicly offered securities, the market to resell these assets under applicable securities laws may be illiquid, due to restrictions, and the liquidation may be taken at a substantial discount to the underlying value or result in the entire loss of the value of such assets.

Venture capital funds invest in start-up companies at an early stage of development in the interest of generating a return through an eventual realization event; the risk is high as a result of the uncertainty involved at that stage of development.

Options are contracts to purchase a security at a given price, risking that an option may expire out of the money resulting in minimal or no value. An uncovered option is a type of options contract that is not backed by an offsetting position that would help mitigate

risk. The risk for a “naked” or uncovered put is not unlimited, whereas the potential loss for an uncovered call option is limitless. Spread option positions entail buying and selling multiple options on the same underlying security, but with different strike prices or expiration dates, which helps limit the risk of other option trading strategies. Option transactions also involve risks including but not limited to economic risk, market risk, sector risk, idiosyncratic risk, political/regulatory risk, inflation (purchasing power) risk and interest rate risk.

Non-U.S. securities present certain risks such as currency fluctuation, political and economic change, social unrest, changes in government regulation, differences in accounting and the lesser degree of accurate public information available.

Past performance is not indicative of future results. Investing in securities involves a risk of loss that you, as a client, should be prepared to bear.

Item 9: Disciplinary Information

A. Criminal or Civil Actions

There are no criminal or civil actions to report.

B. Administrative Proceedings

There are no administrative proceedings to report.

C. Self-regulatory Organization (SRO) Proceedings

There are no self-regulatory organization proceedings to report.

Item 10: Other Financial Industry Activities and Affiliations

A. Registration as a Broker/Dealer or Broker/Dealer Representative

As a registered representative of Mid Atlantic Capital Corporation, Josiah David Hoffman accepts compensation for the sale of securities.

As a registered representative of Mid Atlantic Capital Corporation, Wesley William Creese accepts compensation for the sale of securities.

As a registered representative of Mid Atlantic Capital Corporation, David Lee Smith accepts compensation for the sale of securities.

B. Registration as a Futures Commission Merchant, Commodity Pool Operator, or a Commodity Trading Advisor

Neither RWM nor its representatives are registered as or have pending applications to become either a Futures Commission Merchant, Commodity Pool Operator, or Commodity Trading Advisor or an associated person of the foregoing entities.

C. Registration Relationships Material to this Advisory Business and Possible Conflicts of Interests

Some employees of RWM are registered representatives. From time to time, they will offer clients advice or products from those activities. Clients should be aware that these services pay a commission or other compensation and involve a conflict of interest, as commissionable products conflict with the fiduciary duties of a registered investment adviser. RWM always acts in the best interest of the client, including with respect to the sale of commissionable products to advisory clients. Clients are in no way required to implement the plan through any representative of RWM in such individual's capacity as a registered representative.

Some representatives of RWM are independent licensed insurance agents. From time to time, they will offer clients advice or products from those activities. Clients should be aware that these services pay a commission or other compensation and involve a conflict of interest, as commissionable products conflict with the fiduciary duties of a registered investment adviser. RWM always acts in the best interest of the client, including with respect to the sale of commissionable products to advisory clients. Clients are in no way required to implement the plan through any representative of RWM in such individual's capacity as a registered representative.

David Lee Smith is a Partner/Owner of CPA firm. He prepares tax returns, estate returns, trust returns and do general business consulting, tax planning, etc. He gets commissions based on investment fees charged to client. David Lee Smith is also an accountant. From time to time, he will offer clients advice or products from this activity. RWM always acts in the best interest of the client. Clients are in no way required to utilize the services of any representative of RWM in their capacity as an accountant.

Wesley William Creese is an accountant and managing partner of Creese & Co LLC. From time to time, he will offer clients advice or products from this activity. RWM always acts in the best interest of the client. Clients are in no way required to utilize the services of any representative of RWM in their capacity as an accountant.

Wesley William Creese is managing partner of BBR Benefits Solution, LLC, a benefit company. He does not offer clients any services from this outside activity and the business is not investment related.

Robert William Feyche is an executor of Estate.

Alex Feyche is a student at St. Bonaventure University.

James Joseph Kelly manages a reporting group at First National Bank.

James Joseph Kelly is the manager of consumer credit analytics at First National Bank of Pennsylvania.

D. Selection of Other Advisers or Managers and How This Adviser is Compensated for Those Selections

RWM will not direct clients to third-party investment advisers.

Item 11: Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

A. Code of Ethics

RWM has a written Code of Ethics that covers the following areas: Prohibited Purchases and Sales, Insider Trading, Personal Securities Transactions, Exempted Transactions, Prohibited Activities, Conflicts of Interest, Gifts and Entertainment, Confidentiality, Service on a Board of Directors, Compliance Procedures, Compliance with Laws and Regulations, Procedures and Reporting, Certification of Compliance, Reporting Violations, Compliance Officer Duties, Training and Education, Recordkeeping, Annual Review, and Sanctions. RWM's Code of Ethics is available free upon request to any client or prospective client.

B. Recommendations Involving Material Financial Interests

RWM does not recommend that clients buy or sell any security in which a related person to RWM or RWM has a material financial interest.

C. Investing Personal Money in the Same Securities as Clients

From time to time, representatives of RWM may buy or sell securities for themselves that they also recommend to clients. This may provide an opportunity for representatives of

RWM to buy or sell the same securities before or after recommending the same securities to clients resulting in representatives profiting off the recommendations they provide to clients. Such transactions may create a conflict of interest. RWM will always document any transactions that could be construed as conflicts of interest and will never engage in trading that operates to the client's disadvantage when similar securities are being bought or sold.

D. Trading Securities At/Around the Same Time as Clients' Securities

From time to time, representatives of RWM may buy or sell securities for themselves at or around the same time as clients. This may provide an opportunity for representatives of RWM to buy or sell securities before or after recommending securities to clients resulting in representatives profiting off the recommendations they provide to clients. Such transactions may create a conflict of interest; however, RWM will never engage in trading that operates to the client's disadvantage if representatives of RWM buy or sell securities at or around the same time as clients.

Item 12: Brokerage Practices

A. Factors Used to Select Custodians and/or Broker/Dealers

Custodians/broker-dealers will be recommended based on RWM's duty to seek "best execution," which is the obligation to seek execution of securities transactions for a client on the most favorable terms for the client under the circumstances. Clients will not necessarily pay the lowest commission or commission equivalent, and RWM may also consider the market expertise and research access provided by the broker-dealer/custodian, including but not limited to access to written research, oral communication with analysts, admittance to research conferences and other resources provided by the brokers that may aid in RWM's research efforts. RWM will never charge a premium or commission on transactions, beyond the actual cost imposed by the broker-dealer/custodian.

RWM recommends Mid Atlantic Trust Co. and National Financial Services LLC, a subsidiary of Fidelity Brokerage Co.

1. Research and Other Soft-Dollar Benefits

While RWM has no formal soft dollars program in which soft dollars are used to pay for third party services, RWM may receive research, products, or other services from custodians and broker-dealers in connection with client securities transactions ("soft dollar benefits"). RWM may enter into soft-dollar arrangements consistent with (and not outside of) the safe harbor contained in Section 28(e) of the Securities Exchange Act of 1934, as amended. There can be no assurance that any particular client will benefit from soft dollar research, whether or not the client's transactions paid for it, and RWM does not seek to allocate benefits to client accounts proportionate to any

soft dollar credits generated by the accounts. RWM benefits by not having to produce or pay for the research, products or services, and RWM will have an incentive to recommend a broker-dealer based on receiving research or services. Clients should be aware that RWM's acceptance of soft dollar benefits may result in higher commissions charged to the client.

2. Brokerage for Client Referrals

RWM receives no referrals from a broker-dealer or third party in exchange for using that broker-dealer or third party.

3. Clients Directing Which Broker/Dealer/Custodian to Use

RWM will recommend clients use a specific broker-dealer to execute transactions.

B. Aggregating (Block) Trading for Multiple Client Accounts

If RWM buys or sells the same securities on behalf of more than one client, then it may (but would be under no obligation to) aggregate or bunch such securities in a single transaction for multiple clients in order to seek more favorable prices, lower brokerage commissions, or more efficient execution. In such case, RWM would place an aggregate order with the broker on behalf of all such clients in order to ensure fairness for all clients; provided, however, that trades would be reviewed periodically to ensure that accounts are not systematically disadvantaged by this policy. RWM would determine the appropriate number of shares and select the appropriate brokers consistent with its duty to seek best execution, except for those accounts with specific brokerage direction (if any).

Item 13: Review of Accounts

A. Frequency and Nature of Periodic Reviews and Who Makes Those Reviews

All client accounts for RWM's advisory services provided on an ongoing basis are reviewed at least Quarterly by Wesley Creese, Financial Advisor - Principal, with regard to clients' respective investment policies and risk tolerance levels. All accounts at RWM are assigned to this reviewer.

All financial planning accounts are reviewed upon financial plan creation and plan delivery by Wesley Creese, Financial Advisor - Principal. Financial planning clients are provided a one-time financial plan concerning their financial situation. After the presentation of the plan, there are no further reports. Clients may request additional plans or reports for a fee.

B. Factors That Will Trigger a Non-Periodic Review of Client Accounts

Reviews may be triggered by material market, economic or political events, or by changes in client's financial situations (such as retirement, termination of employment, physical move, or inheritance).

With respect to financial plans, RWM's services will generally conclude upon delivery of the financial plan.

C. Content and Frequency of Regular Reports Provided to Clients

Each client of RWM's advisory services provided on an ongoing basis will receive a quarterly report detailing the client's account, including assets held, asset value, and calculation of fees. This written report will come from the custodian. RWM will also provide at least quarterly a separate written statement to the client.

Each financial planning client will receive the financial plan upon completion.

Item 14: Client Referrals and Other Compensation

A. Economic Benefits Provided by Third Parties for Advice Rendered to Clients (Includes Sales Awards or Other Prizes)

RWM does not receive any economic benefit, directly or indirectly from any third party for advice rendered to RWM's clients.

B. Compensation to Non – Advisory Personnel for Client Referrals

RWM does not directly or indirectly compensate anyone for client referrals.

Item 15: Custody

When advisory fees are deducted directly from client accounts at client's custodian, RWM will be deemed to have limited custody of client's assets and must have written authorization from the client to do so. Clients will receive all account statements and billing invoices that are required in each jurisdiction, and they should carefully review those statements for accuracy.

For fees deducted directly from client accounts, in states that require it, RWM will:

- (A) possess written authorization from the client to deduct advisory fees from an account held by a qualified custodian.

- (B) send the qualified custodian written notice of the amount of the fee to be deducted from the client's account and verify that the qualified custodian sends invoices to the client.
- (C) send the client a written invoice itemizing the fee upon or prior to fee deduction, including the formula used to calculate the fee, the time period covered by the fee and the amount of assets under management on which the fee was based.

RWM may also be deemed to have custody over the funds and securities of trust accounts for which it or its related persons serve as trustee.

Item 16: Investment Discretion

RWM provides discretionary and non-discretionary investment advisory services to clients. The advisory contract established with each client sets forth the discretionary authority for trading. Where investment discretion has been granted, RWM generally manages the client's account and makes investment decisions without consultation with the client as to when the securities are to be bought or sold for the account, the total amount of the securities to be bought/sold, what securities to buy or sell. In some instances, RWM's discretionary authority in making these determinations may be limited by conditions imposed by a client (in investment guidelines or objectives, or client instructions otherwise provided to RWM).

Item 17: Voting Client Securities (Proxy Voting)

RWM will not ask for, nor accept voting authority for client securities. Clients will receive proxies directly from the issuer of the security or the custodian. Clients should direct all proxy questions to the issuer of the security.

Item 18: Financial Information

A. Balance Sheet

RWM neither requires nor solicits prepayment of more than \$1,200 in fees per client, six months or more in advance, and therefore is not required to include a balance sheet with this brochure.

B. Financial Conditions Reasonably Likely to Impair Ability to Meet Contractual Commitments to Clients

Neither RWM nor its management has any financial condition that is likely to reasonably impair RWM's ability to meet contractual commitments to clients.

C. Bankruptcy Petitions in Previous Ten Years

RWM has not been the subject of a bankruptcy petition in the last ten years.
