Item 4: Advisory Business

A. Description of the Advisory Firm

BluePath Capital, LLC d/b/a Nicholas Wealth Management (hereinafter "NWM") is a Limited Liability Company organized in the State of Georgia. The firm was formed in February 2016, and the principal owner is David Nicholas.

B. Types of Advisory Services

Portfolio Management Services

NWM offers ongoing portfolio management services based on the individual goals, objectives, time horizon, and risk tolerance of each client. NWM creates an Investment Policy Statement for each client, which outlines the client's current situation (income, tax levels, and risk tolerance levels). Portfolio management services include, but are not limited to, the following:

- Investment strategy
- Asset allocation
- Risk tolerance
- Personal investment policy
- Asset selection
- Regular portfolio monitoring

NWM evaluates the current investments of each client with respect to their risk tolerance levels and time horizon. NWM will request discretionary authority from clients in order to select securities and execute transactions without permission from the client prior to each transaction. Risk tolerance levels are documented in the Investment Policy Statement, which is given to each client.

NWM seeks to provide that investment decisions are made in accordance with the fiduciary duties owed to its accounts and without consideration of NWM's economic, investment or other financial interests. To meet its fiduciary obligations, NWM attempts to avoid, among other things, investment or trading practices that systematically advantage or disadvantage certain client portfolios, and accordingly, NWM's policy is to seek fair and equitable allocation of investment opportunities/transactions among its clients to avoid favoring one client over another over time. It is NWM's policy to allocate investment opportunities and transactions it identifies as being appropriate and prudent, including initial public offerings ("IPOs") and other investment opportunities that might have a limited supply, among its clients on a fair and equitable basis over time.

NWM may direct clients to third-party investment advisers to manage all or a portion of the client's assets. Before selecting other advisers for clients, NWM will always ensure those other advisers are properly licensed or registered as an investment adviser. NWM conducts due diligence on any third-party investment adviser, which may involve one or more of the following: phone calls, meetings and review of the third-party adviser's

performance and investment strategy. NWM then makes investments with a third-party investment adviser by referring the client to the third-party adviser. These investments may be allocated either through the third-party adviser's fund or through a separately managed account managed by such third-party adviser on behalf of NWM's client. NWM may also allocate among one or more private equity funds or private equity fund advisers. NWM will review the ongoing performance of the third-party adviser as a portion of the client's portfolio.

Selection of Other Advisers

NWM may direct clients to third-party investment advisers. Before selecting other advisers for clients, NWM will verify that all recommended advisers are properly licensed, notice filed, or exempt in the states where NWM is recommending the adviser to clients.

Financial Planning

Financial plans and financial planning may include but are not limited to: investment planning; life insurance; tax concerns; retirement planning; college planning; and debt/credit planning.

Services Limited to Specific Types of Investments

NWM generally limits its investment advice to mutual funds, fixed income securities, real estate funds (including REITs), equities, hedge funds, private equity funds, ETFs (including ETFs in the gold and precious metal sectors), treasury inflation protected/inflation linked bonds, commodities, non-U.S. securities, venture capital funds and private placements. NWM may use other securities as well to help diversify a portfolio when applicable.

C. Client Tailored Services and Client Imposed Restrictions

NWM offers the same suite of services to all of its clients. However, specific client investment strategies and their implementation are dependent upon the client Investment Policy Statement which outlines each client's current situation (income, tax levels, and risk tolerance levels). Clients may impose restrictions in investing in certain securities or types of securities in accordance with their values or beliefs. However, if the restrictions prevent NWM from properly servicing the client account, or if the restrictions would require NWM to deviate from its standard suite of services, NWM reserves the right to end the relationship.

D. Wrap Fee Programs

NWM participates in wrap fee programs, which are investment programs where the investor pays one stated fee that includes management fees, transaction costs, fund expenses, and other administrative fees. NWM manages the investments in the wrap fee

program but does not manage those wrap fee accounts any differently than non-wrap fee accounts. Fees paid under the wrap fee program will be given to NWM as a management fee. However, this brochure describes NWM's non-wrap fee advisory services; clients utilizing NWM's wrap fee portfolio management should see the separate Wrap Fee Program Brochure.

E. Assets Under Management

NWM has the following assets under management:

Discretionary Amounts:	Non-discretionary Amounts:	Date Calculated:
\$90,827,067	\$0	December 2020

Item 5: Fees and Compensation

A. Fee Schedule

Non-Wrap Fee Portfolio Management Fees

Total Assets Under Management	Annual Fees
\$0 - \$1,000,000	1.50%
\$1,000,000 - \$3,000,000	1.25%
\$3,000,000 - And Up	1.00%

NWM uses the value of the account as of the last business day of the billing period, after taking into account deposits and withdrawals, for purposes of determining the market value of the assets upon which the advisory fee is based.

These fees are generally negotiable, and the final fee schedule is attached as Exhibit I of the Investment Advisory Contract. Clients may terminate the agreement without penalty for a full refund of NWM's fees within five business days of signing the Investment Advisory Contract. Thereafter, clients may terminate the Investment Advisory Contract generally with 30 days' written notice.

Performance-Based Fees for Portfolio Management

Qualified clients will pay an annual fee of 1.00% of assets under management along with a 20.00% performance fee based on capital appreciation. If the client's portfolio rises in value, the client will pay 20.00% on that increase in value, but if the portfolio drops in value, the client will not incur a new performance fee until the portfolio reaches the last

highest value, adjusted for withdrawals and deposits, which is generally known as a “high water mark.”

The high water mark will be the highest value of the client’s account on the last day of any previous quarter, after accounting for the client’s deposits or withdrawals for each billing period.

These fees are generally negotiable and the final fee schedule is attached as Exhibit II of the Investment Advisory Contract. This service may be canceled with 30 days’ notice. Clients must pay the prorated performance-based fees for the billing period in which they terminate the Investment Advisory Contract up to and including the day of termination.

These fees are negotiable.

Selection of Other Advisers Fees

NWM may direct clients to third-party investment advisers. NWM will receive its standard fee on top of the fee paid to the third party adviser. The fees shared are negotiable and will not exceed any limit imposed by any regulatory agency. The notice of termination requirement and payment of fees for third-party investment advisers will depend on the specific third-party adviser selected.

NWM may specifically direct clients to AE Wealth Management, Alpha DNA Investment Management, LLC, Stewardship Partners, LLC, and Zega Financial, LLC. The fees charged by each adviser are as follows, as well as NWM’s standard annual fees.

AE Wealth Management: 0.10% – 0.65%

Alpha DNA: 0.60%

Stewardship Partners: 0.60%

Zega Financial: 0.40% – 0.50%

Total Assets Under Management	NWM’s Annual Fees
\$0 - \$1,000,000	1.50%
\$1,000,001 - \$3,000,000	1.25%
\$3,000,001 and Up	1.00%

Financial Planning Fees

Hourly Fees

The negotiated hourly fee for these services is between \$250 and \$1,000.

Educational Seminars/Workshops

NWM provides periodic educational seminars and workshops to clients and the general public.

B. Payment of Fees

Payment of Portfolio Management Fees

Asset-based portfolio management fees are withdrawn directly from the client's accounts with client's written authorization on a monthly basis. Fees are paid in arrears.

Payment of Performance-Based Portfolio Management Fees

Performance-based portfolio management fees are withdrawn directly from the client's accounts with client's written authorization on a quarterly basis, or may be invoiced and billed directly to the client on a quarterly basis. Clients may select the method in which they are billed. Fees are paid in arrears.

Fees for selection of Stewardship Partners, LLC as third-party adviser are withdrawn directly from the client's accounts with client's written authorization. Fees are paid quarterly in advance.

Payment of Selection of Other Advisers Fees

The timing, frequency, and method of paying fees for selection of third-party managers will depend on the specific third-party adviser selected and will be disclosed to the client prior to entering into a relationship with the third-party adviser.

Payment of Financial Planning Fees

Financial planning fees are paid via check and wire.

Hourly financial planning fees are paid in arrears upon completion.

Payment of Educational Seminar/Workshop Fees

Educational seminars and workshops are offered either free of charge or for a fee of \$75 per session, payable in advance and non-refundable, depending on the workshop offered.

C. Client Responsibility For Third Party Fees

This brochure describes NWM's non-wrap fee advisory services; clients utilizing NWM's wrap fee portfolio management should see the separate Wrap Fee Program Brochure. Client accounts not participating in the wrap fee program are responsible for the payment of all third-party fees (i.e., custodian fees, brokerage fees, mutual fund fees, transaction fees, etc.). Those fees are separate and distinct from the fees and expenses charged by NWM. Please see Item 12 of this brochure regarding broker/custodian.

D. Prepayment of Fees

NWM collects its fees in arrears. It does not collect fees in advance.

Stewardship Partners, LLC collects its fees in advance.

E. Outside Compensation For the Sale of Securities to Clients

David Alexis Nicholas, Aaron William Gaines, and Craig Jeffrey Jennings are registered representatives of a broker-dealer and David Alexis Nicholas is an insurance agent and, in these roles, they accept compensation for the sale of securities and other products to NWM clients.

1. This is a Conflict of Interest

Representative may accept compensation for the sale of securities or other investment products, including asset based sales charges or service fees from the sale of mutual funds to NWM's clients. This presents a conflict of interest and gives the supervised person an incentive to recommend products based on the compensation received rather than on the client's needs. When recommending the sale of securities or investment products for which the representative receives compensation, NWM will document the conflict of interest in the client file and inform the client of the conflict of interest.

2. Clients Have the Option to Purchase Recommended Products From Other Brokers

Clients always have the option to purchase NWM recommended products through other brokers or agents that are not affiliated with NWM.

3. Commissions are not NWM's primary source of compensation for advisory services

Commissions are not NWM's primary source of compensation for advisory services.

4. Advisory Fees in Addition to Commissions or Markups

Advisory fees that are charged to clients are not reduced to offset the commissions or markups on securities or investment products recommended to clients.

Item 6: Performance-Based Fees and Side-By-Side Management

NWM manages accounts that are billed on performance-based fees (a share of capital gains on or capital appreciation of the assets of a client) and may as well manage accounts that are not billed

on performance-based fees. Managing both kinds of accounts at the same time presents a conflict of interest because NWM and/or its representative have an incentive to favor accounts for which NWM receives a performance-based fee. NWM addresses the conflicts by ensuring that clients are not systematically advantaged or disadvantaged due to the presence or absence of performance-based fees. NWM seeks best execution and upholds its fiduciary duty for all clients. Clients paying a performance-based fee should be aware that investment advisers have an incentive to invest in riskier and more speculative investments when paid a performance-based fee due to the higher risk/higher reward attributes than would be in the case in the absence of a performance fee.

Item 7: Types of Clients

NWM generally provides advisory services to the following types of clients:

- ❖ Individuals
- ❖ High-Net-Worth Individuals
- ❖ Charitable Organizations

The account minimum is \$250,000 for NWM's services. This account minimum can be waived at NWM's discretion.

Item 8: Methods of Analysis, Investment Strategies, & Risk of Loss

A. Methods of Analysis and Investment Strategies

Methods of Analysis

NWM's methods of analysis include Charting analysis, Cyclical analysis, Fundamental analysis, Modern portfolio theory, Quantitative analysis and Technical analysis.

Charting analysis involves the use of patterns in performance charts. NWM uses this technique to search for patterns used to help predict favorable conditions for buying and/or selling a security.

Cyclical analysis involves the analysis of business cycles to find favorable conditions for buying and/or selling a security.

Fundamental analysis involves the analysis of financial statements, the general financial health of companies, and/or the analysis of management or competitive advantages.

Modern portfolio theory is a theory of investment that attempts to maximize portfolio expected return for a given amount of portfolio risk, or equivalently minimize risk for a given level of expected return, each by carefully choosing the proportions of various asset.

Quantitative analysis deals with measurable factors as distinguished from qualitative considerations such as the character of management or the state of employee morale, such as the value of assets, the cost of capital, historical projections of sales, and so on.

Technical analysis involves the analysis of past market data; primarily price and volume.

Investment Strategies

NWM uses long term trading, short term trading, short sales, margin transactions and options trading (including covered options, uncovered options, or spreading strategies).

Investing in securities involves a risk of loss that you, as a client, should be prepared to bear.

B. Material Risks Involved

Methods of Analysis

Charting analysis strategy involves using and comparing various charts to predict long and short term performance or market trends. The risk involved in using this method is that only past performance data is considered without using other methods to crosscheck data. Using charting analysis without other methods of analysis would be making the assumption that past performance will be indicative of future performance. This may not be the case.

Cyclical analysis assumes that the markets react in cyclical patterns which, once identified, can be leveraged to provide performance. The risks with this strategy are two-fold: 1) the markets do not always repeat cyclical patterns; and 2) if too many investors begin to implement this strategy, then it changes the very cycles these investors are trying to exploit.

Fundamental analysis concentrates on factors that determine a company's value and expected future earnings. This strategy would normally encourage equity purchases in stocks that are undervalued or priced below their perceived value. The risk assumed is that the market will fail to reach expectations of perceived value.

Modern portfolio theory assumes that investors are risk adverse, meaning that given two portfolios that offer the same expected return, investors will prefer the less risky one. Thus, an investor will take on increased risk only if compensated by higher expected returns. Conversely, an investor who wants higher expected returns must accept more risk. The exact trade-off will be the same for all investors, but different investors will evaluate the trade-off differently based on individual risk aversion characteristics. The

implication is that a rational investor will not invest in a portfolio if a second portfolio exists with a more favorable risk-expected return profile – i.e., if for that level of risk an alternative portfolio exists which has better expected returns.

Quantitative analysis Investment strategies using quantitative models may perform differently than expected as a result of, among other things, the factors used in the models, the weight placed on each factor, changes from the factors' historical trends, and technical issues in the construction and implementation of the models.

Technical analysis attempts to predict a future stock price or direction based on market trends. The assumption is that the market follows discernible patterns and if these patterns can be identified then a prediction can be made. The risk is that markets do not always follow patterns and relying solely on this method may not take into account new patterns that emerge over time.

Investment Strategies

NWM's use of short sales, margin transactions and options trading generally holds greater risk, and clients should be aware that there is a material risk of loss using any of those strategies.

Long term trading is designed to capture market rates of both return and risk. Due to its nature, the long-term investment strategy can expose clients to various types of risk that will typically surface at various intervals during the time the client owns the investments. These risks include but are not limited to inflation (purchasing power) risk, interest rate risk, economic risk, market risk, and political/regulatory risk.

Margin transactions use leverage that is borrowed from a brokerage firm as collateral. When losses occur, the value of the margin account may fall below the brokerage firm's threshold thereby triggering a margin call. This may force the account holder to either allocate more funds to the account or sell assets on a shorter time frame than desired.

Options transactions involve a contract to purchase a security at a given price, not necessarily at market value, depending on the market. This strategy includes the risk that an option may expire out of the money resulting in minimal or no value, as well as the possibility of leveraged loss of trading capital due to the leveraged nature of stock options.

Selection of Other Advisers: Although NWM will seek to select only money managers who will invest clients' assets with the highest level of integrity, NWM's selection process cannot ensure that money managers will perform as desired and NWM will have no control over the day-to-day operations of any of its selected money managers. NWM would not necessarily be aware of certain activities at the underlying money manager level, including without limitation a money manager's engaging in unreported risks, investment "style drift" or even regulatory breaches or fraud.

Short sales entail the possibility of infinite loss. An increase in the applicable securities' prices will result in a loss and, over time, the market has historically trended upward.

Short term trading risks include liquidity, economic stability, and inflation, in addition to the long term trading risks listed above. Frequent trading can affect investment performance, particularly through increased brokerage and other transaction costs and taxes.

Investing in securities involves a risk of loss that you, as a client, should be prepared to bear.

C. Risks of Specific Securities Utilized

NWM's use of short sales, margin transactions and options trading generally holds greater risk of capital loss. Clients should be aware that there is a material risk of loss using any investment strategy. The investment types listed below (leaving aside Treasury Inflation Protected/Inflation Linked Bonds) are not guaranteed or insured by the FDIC or any other government agency.

Mutual Funds: Investing in mutual funds carries the risk of capital loss and thus you may lose money investing in mutual funds. All mutual funds have costs that lower investment returns. The funds can be of bond "fixed income" nature (lower risk) or stock "equity" nature.

Equity investment generally refers to buying shares of stocks in return for receiving a future payment of dividends and/or capital gains if the value of the stock increases. The value of equity securities may fluctuate in response to specific situations for each company, industry conditions and the general economic environments.

Fixed income investments generally pay a return on a fixed schedule, though the amount of the payments can vary. This type of investment can include corporate and government debt securities, leveraged loans, high yield, and investment grade debt and structured products, such as mortgage and other asset-backed securities, although individual bonds may be the best known type of fixed income security. In general, the fixed income market is volatile and fixed income securities carry interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) Fixed income securities also carry inflation risk, liquidity risk, call risk, and credit and default risks for both issuers and counterparties. The risk of default on treasury inflation protected/inflation linked bonds is dependent upon the U.S. Treasury defaulting (extremely unlikely); however, they carry a potential risk of losing share price value, albeit rather minimal. Risks of investing in foreign fixed income securities also include the general risk of non-U.S. investing described below.

Exchange Traded Funds (ETFs): An ETF is an investment fund traded on stock exchanges, similar to stocks. Investing in ETFs carries the risk of capital loss (sometimes up to a 100% loss in the case of a stock holding bankruptcy). Areas of concern include the lack of transparency in products and increasing complexity, conflicts of interest and the possibility of inadequate regulatory compliance. Precious Metal ETFs (e.g., Gold, Silver, or Palladium Bullion backed "electronic shares" not physical metal) specifically may be negatively impacted by several unique factors, among them (1) large sales by the official

sector which own a significant portion of aggregate world holdings in gold and other precious metals, (2) a significant increase in hedging activities by producers of gold or other precious metals, (3) a significant change in the attitude of speculators and investors.

Real estate funds (including REITs) face several kinds of risk that are inherent in the real estate sector, which historically has experienced significant fluctuations and cycles in performance. Revenues and cash flows may be adversely affected by: changes in local real estate market conditions due to changes in national or local economic conditions or changes in local property market characteristics; competition from other properties offering the same or similar services; changes in interest rates and in the state of the debt and equity credit markets; the ongoing need for capital improvements; changes in real estate tax rates and other operating expenses; adverse changes in governmental rules and fiscal policies; adverse changes in zoning laws; the impact of present or future environmental legislation and compliance with environmental laws.

Hedge funds often engage in leveraging and other speculative investment practices that may increase the risk of loss; can be highly illiquid; are not required to provide periodic pricing or valuation information to investors; May involve complex tax structures and delays in distributing important tax information; are not subject to the same regulatory requirements as mutual funds; and often charge high fees. In addition, hedge funds may invest in risky securities and engage in risky strategies.

Private equity funds carry certain risks. Capital calls will be made on short notice, and the failure to meet capital calls can result in significant adverse consequences, including but not limited to a total loss of investment.

Private placements carry a substantial risk as they are subject to less regulation than are publicly offered securities, the market to resell these assets under applicable securities laws may be illiquid, due to restrictions, and the liquidation may be taken at a substantial discount to the underlying value or result in the entire loss of the value of such assets.

Venture capital funds invest in start-up companies at an early stage of development in the interest of generating a return through an eventual realization event; the risk is high as a result of the uncertainty involved at that stage of development.

Commodities are tangible assets used to manufacture and produce goods or services. Commodity prices are affected by different risk factors, such as disease, storage capacity, supply, demand, delivery constraints and weather. Because of those risk factors, even a well-diversified investment in commodities can be uncertain.

Options are contracts to purchase a security at a given price, risking that an option may expire out of the money resulting in minimal or no value. An uncovered option is a type of options contract that is not backed by an offsetting position that would help mitigate risk. The risk for a “naked” or uncovered put is not unlimited, whereas the potential loss for an uncovered call option is limitless. Spread option positions entail buying and selling multiple options on the same underlying security, but with different strike prices or expiration dates, which helps limit the risk of other option trading strategies. Option

transactions also involve risks including but not limited to economic risk, market risk, sector risk, idiosyncratic risk, political/regulatory risk, inflation (purchasing power) risk and interest rate risk.

Non-U.S. securities- present certain risks such as currency fluctuation, political and economic change, social unrest, changes in government regulation, differences in accounting and the lesser degree of accurate public information available.

Past performance is not indicative of future results. Investing in securities involves a risk of loss that you, as a client, should be prepared to bear.

Item 9: Disciplinary Information

A. Criminal or Civil Actions

There are no criminal or civil actions to report.

B. Administrative Proceedings

There are no administrative proceedings to report.

C. Self-regulatory Organization (SRO) Proceedings

There are no self-regulatory organization proceedings to report.

Item 10: Other Financial Industry Activities and Affiliations

A. Registration as a Broker/Dealer or Broker/Dealer Representative

As registered representatives of World Equity Group, Inc., David Alexis Nicholas, Aaron William Gaines, and Craig Jeffrey Jennings accept compensation for the sale of securities.

B. Registration as a Futures Commission Merchant, Commodity Pool Operator, or a Commodity Trading Advisor

Neither NWM nor its representative are registered as or have pending applications to become either a Futures Commission Merchant, Commodity Pool Operator, or Commodity Trading Advisor or an associated person of the foregoing entities.

C. Registration Relationships Material to this Advisory Business and Possible Conflicts of Interests

David Alexis Nicholas, Aaron William Gaines, and Craig Jeffrey Jennings are registered representatives of World Equity Group, Inc. and from time to time, will offer clients advice or products from those activities. Clients should be aware that these services pay a commission or other compensation and involve a conflict of interest, as commissionable products conflict with the fiduciary duties of a registered investment adviser. NWM always acts in the best interest of the client, including with respect to the sale of commissionable products to advisory clients. Clients are in no way required to implement the plan through any representative of NWM in such individual's capacity as a registered representative.

David Alexis Nicholas is an investment adviser representative with Triumph Wealth Advisors, Inc. From time to time, he may offer clients advice or products from those activities and clients should be aware that these services may involve a conflict of interest. BPC always acts in the best interest of the client and clients are in no way required to use the services of any representative of BPC in connection with such individual's activities outside of BPC.

David Alexis Nicholas is an independent licensed insurance agent, and from time to time, will offer clients advice or products from those activities. Clients should be aware that these services pay a commission or other compensation and involve a conflict of interest, as commissionable products conflict with the fiduciary duties of a registered investment adviser. NWM always acts in the best interest of the client; including the sale of commissionable products to advisory clients. Clients are in no way required to utilize the services of any representative of NWM in connection with such individual's activities outside of NWM.

Aaron William Gaines is a licensed insurance agent. From time to time, he will offer clients advice or products from those activities. Clients should be aware that these services pay a commission and involve a conflict of interest, as commissionable products conflict with the fiduciary duties of a registered investment adviser. NWM always acts in the best interest of the client; including the sale of commissionable products to advisory clients. Clients always have the right to decide whether or not to utilize the services of any representative of NWM in such individual's outside capacities.

Craig Jeffrey Jennings is a licensed insurance agent. From time to time, he will offer clients advice or products from those activities. Clients should be aware that these services pay a commission and involve a conflict of interest, as commissionable products conflict with the fiduciary duties of a registered investment adviser. NWM always acts in the best interest of the client; including the sale of commissionable products to advisory clients. Clients always have the right to decide whether or not to utilize the services of any representative of NWM in such individual's outside capacities.

Craig Jeffrey Jennings is an executor at Doug Jennings Will.

Cynthia Joy Panian is a licensed insurance agent. From time to time, she will offer clients advice or products from those activities. Clients should be aware that these services pay a commission and involve a conflict of interest, as commissionable products conflict with the fiduciary duties of a registered investment adviser. NWM always acts in the best interest of the client; including the sale of commissionable products to advisory clients. Clients always have the right to decide whether or not to utilize the services of any representative of NWM in such individual's outside capacities.

Cynthia Joy Panian is an executor at Steven Javery Will.

D. Selection of Other Advisers or Managers and How This Adviser is Compensated for Those Selections

NWM may direct clients to third-party investment advisers. Clients will pay NWM its standard fee in addition to the standard fee for the advisers to which it directs those clients. The fees will not exceed any limit imposed by any regulatory agency. NWM will always act in the best interests of the client, including when determining which third-party investment adviser to recommend to clients. NWM will ensure that all recommended advisers are exempt, licensed or notice filed in the states in which NWM is recommending them to clients.

Item 11: Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

A. Code of Ethics

NWM has a written Code of Ethics that covers the following areas: Prohibited Purchases and Sales, Insider Trading, Personal Securities Transactions, Exempted Transactions, Prohibited Activities, Conflicts of Interest, Gifts and Entertainment, Confidentiality, Service on a Board of Directors, Compliance Procedures, Compliance with Laws and Regulations, Procedures and Reporting, Certification of Compliance, Reporting Violations, Compliance Officer Duties, Training and Education, Recordkeeping, Annual Review, and Sanctions. NWM's Code of Ethics is available free upon request to any client or prospective client.

B. Recommendations Involving Material Financial Interests

NWM does not recommend that clients buy or sell any security in which a related person to NWM or NWM has a material financial interest.

C. Investing Personal Money in the Same Securities as Clients

From time to time, representative of NWM may buy or sell securities for themselves that they also recommend to clients. This may provide an opportunity for representative of NWM to buy or sell the same securities before or after recommending the same securities to clients resulting in representative profiting off the recommendations they provide to clients. Such transactions may create a conflict of interest. NWM will always document any transactions that could be construed as conflicts of interest and will never engage in trading that operates to the client's disadvantage when similar securities are being bought or sold.

D. Trading Securities At/Around the Same Time as Clients' Securities

From time to time, representative of NWM may buy or sell securities for themselves at or around the same time as clients. This may provide an opportunity for representative of NWM to buy or sell securities before or after recommending securities to clients resulting in representative profiting off the recommendations they provide to clients. Such transactions may create a conflict of interest; however, NWM will never engage in trading that operates to the client's disadvantage if representative of NWM buy or sell securities at or around the same time as clients.

Item 12: Brokerage Practices

A. Factors Used to Select Custodians and/or Broker/Dealers

Custodians/broker-dealers will be recommended based on NWM's duty to seek "best execution," which is the obligation to seek execution of securities transactions for a client on the most favorable terms for the client under the circumstances. Clients will not necessarily pay the lowest commission or commission equivalent, and NWM may also consider the market expertise and research access provided by the broker-dealer/custodian, including but not limited to access to written research, oral communication with analysts, admittance to research conferences and other resources provided by the brokers that may aid in NWM's research efforts. NWM will never charge a premium or commission on transactions, beyond the actual cost imposed by the broker-dealer/custodian.

NWM will require clients to use TD Ameritrade Institutional, a division of TD Ameritrade, Inc. Member FINRA/SIPC or Fidelity Brokerage Services LLC, (CRD# 7784).

1. Research and Other Soft-Dollar Benefits

While NWM has no formal soft dollars program in which soft dollars are used to pay for third party services, NWM may receive research, products, or other services from custodians and broker-dealers in connection with client securities transactions ("soft

dollar benefits"). NWM may enter into soft-dollar arrangements consistent with (and not outside of) the safe harbor contained in Section 28(e) of the Securities Exchange Act of 1934, as amended. There can be no assurance that any particular client will benefit from soft dollar research, whether or not the client's transactions paid for it, and NWM does not seek to allocate benefits to client accounts proportionate to any soft dollar credits generated by the accounts. NWM benefits by not having to produce or pay for the research, products or services, and NWM will have an incentive to recommend a broker-dealer based on receiving research or services. Clients should be aware that NWM's acceptance of soft dollar benefits may result in higher commissions charged to the client.

NWM participates in the institutional advisor program (the "Program") offered by TD Ameritrade. TD Ameritrade offers to independent investment advisor services which include custody of securities, trade execution, clearance and settlement of transactions. NWM receives some benefits from TD Ameritrade through its participation in the Program.

As disclosed above, NWM participates in TD Ameritrade's institutional advisor program and NWM may recommend TD Ameritrade to clients for custody and brokerage services. There is no direct link between NWM's participation in the Program and the investment advice it gives to its clients, although NWM receives economic benefits through its participation in the Program that are typically not available to TD Ameritrade retail investors. These benefits include the following products and services (provided without cost or at a discount): receipt of duplicate client statements and confirmations; research related products and tools; consulting services; access to a trading desk serving NWM participants; access to block trading (which provides the ability to aggregate securities transactions for execution and then allocate the appropriate shares to client accounts); the ability to have NWM's fees deducted directly from client accounts; access to an electronic communications network for client order entry and account information; access to mutual funds with no transaction fees and to certain institutional money managers; and discounts on compliance, marketing, research, technology, and practice management products or services provided to NWM by third party vendors. TD Ameritrade may also pay for business consulting and professional services received by NWM's related persons. Some of the products and services made available by TD Ameritrade through the Program may benefit NWM but may not benefit its client accounts. These products or services may assist NWM in managing and administering client accounts, including accounts not maintained at TD Ameritrade. Other services made available by TD Ameritrade are intended to help NWM manage and further develop its business enterprise. The benefits received by NWM or its personnel through participation in the Program do not depend on the amount of brokerage transactions directed to TD Ameritrade. As part of its fiduciary duties to clients, NWM endeavors at all times to put the interests of its clients first. Clients should be aware, however, that the receipt of economic benefits by NWM or its related persons in and of itself creates a conflict of interest and may indirectly influence the NWM's choice of TD Ameritrade for custody and brokerage services.

2. Brokerage for Client Referrals

NWM receives no referrals from a broker-dealer or third party in exchange for using that broker-dealer or third party.

3. Clients Directing Which Broker/Dealer/Custodian to Use

NWM will require clients to use a specific broker-dealer to execute transactions. Not all advisers require clients to use a particular broker-dealer.

B. Aggregating (Block) Trading for Multiple Client Accounts

If NWM buys or sells the same securities on behalf of more than one client, then it may (but would be under no obligation to) aggregate or bunch such securities in a single transaction for multiple clients in order to seek more favorable prices, lower brokerage commissions, or more efficient execution. In such case, NWM would place an aggregate order with the broker on behalf of all such clients in order to ensure fairness for all clients; provided, however, that trades would be reviewed periodically to ensure that accounts are not systematically disadvantaged by this policy. NWM would determine the appropriate number of shares and select the appropriate brokers consistent with its duty to seek best execution, except for those accounts with specific brokerage direction (if any).

Item 13: Review of Accounts

A. Frequency and Nature of Periodic Reviews and Who Makes Those Reviews

All client accounts for NWM's advisory services provided on an ongoing basis are reviewed at least annually by David Nicholas, President, with regard to clients' respective investment policies and risk tolerance levels. All accounts at NWM are assigned to this reviewer.

All financial planning accounts are reviewed upon financial plan creation and plan delivery by David Nicholas, President. There is only one level of review for financial planning, and that is the total review conducted to create the financial plan.

B. Factors That Will Trigger a Non-Periodic Review of Client Accounts

Reviews may be triggered by material market, economic or political events, or by changes in client's financial situations (such as retirement, termination of employment, physical move, or inheritance).

With respect to financial plans, NWM's services will generally conclude upon delivery of the financial plan.

C. Content and Frequency of Regular Reports Provided to Clients

Each client of NWM's advisory services provided on an ongoing basis will receive a quarterly report detailing the client's account, including assets held, asset value, and calculation of fees. This written report will come from the custodian.

Each financial planning client will receive the financial plan upon completion.

Item 14: Client Referrals and Other Compensation

A. Economic Benefits Provided by Third Parties for Advice Rendered to Clients (Includes Sales Awards or Other Prizes)

NWM will also receive soft dollar benefits discussed in Item 12 above, though there is no direct link between NWM's participation in the TD Ameritrade Program and the investment advice it gives to its clients.

NWM participates in the institutional advisor program (the "Program") offered by TD Ameritrade. TD Ameritrade offers to independent investment advisor services which include custody of securities, trade execution, clearance and settlement of transactions. NWM receives some benefits from TD Ameritrade through its participation in the Program.

As part of the Program, NWM may recommend TD Ameritrade to clients for custody and brokerage services. There is no direct link between NWM's participation in the Program and the investment advice it gives to its clients, although NWM receives economic benefits through its participation in the Program that are typically not available to TD Ameritrade retail investors. These benefits include the following products and services (provided without cost or at a discount): receipt of duplicate client statements and confirmations; research related products and tools; consulting services; access to a trading desk serving NWM participants; access to block trading (which provides the ability to aggregate securities transactions for execution and then allocate the appropriate shares to client accounts); the ability to have NWM's fees deducted directly from client accounts; access to an electronic communications network for client order entry and account information; access to mutual funds with no transaction fees and to certain institutional money managers; and discounts on compliance, marketing, research, technology, and practice management products or services provided to NWM by third party vendors. TD Ameritrade may also pay for business consulting and professional services received by NWM's related persons. Some of the products and services made available by TD Ameritrade through the Program may benefit NWM but may not benefit its client accounts. These products or services may assist NWM in managing and administering client accounts, including accounts not maintained at TD Ameritrade. Other services made available by TD Ameritrade are intended to help NWM manage and further develop its business enterprise. The benefits received by NWM or its personnel through

participation in the Program do not depend on the amount of brokerage transactions directed to TD Ameritrade. As part of its fiduciary duties to clients, NWM endeavors at all times to put the interests of its clients first. Clients should be aware, however, that the receipt of economic benefits by NWM or its related persons in and of itself creates a conflict of interest and may indirectly influence the NWM's choice of TD Ameritrade for custody and brokerage services.

B. Compensation to Non – Advisory Personnel for Client Referrals

NWM may enter into written arrangements with third parties to act as solicitors for NWM's investment management services. Solicitor relationships will be fully disclosed to each Client to the extent required by applicable law. NWM will ensure each solicitor is exempt, notice filed, or properly registered in all appropriate jurisdictions.

Item 15: Custody

When advisory fees are deducted directly from client accounts at client's custodian, NWM will be deemed to have limited custody of client's assets and must have written authorization from the client to do so. Clients will receive all account statements and billing invoices that are required in each jurisdiction, and they should carefully review those statements for accuracy.

Item 16: Investment Discretion

NWM provides discretionary and non-discretionary investment advisory services to clients. The Investment Advisory Contract established with each client sets forth the discretionary authority for trading. Where investment discretion has been granted, NWM generally manages the client's account and makes investment decisions without consultation with the client as to when the securities are to be bought or sold for the account, the total amount of the securities to be bought/sold, what securities to buy or sell, or the price per share.

Item 17: Voting Client Securities (Proxy Voting)

NWM will not ask for, nor accept voting authority for client securities. Clients will receive proxies directly from the issuer of the security or the custodian. Clients should direct all proxy questions to the issuer of the security.

Item 18: Financial Information

A. Balance Sheet

NWM neither requires nor solicits prepayment of more than \$500 in fees per client, six months or more in advance, and therefore is not required to include a balance sheet with this brochure.

B. Financial Conditions Reasonably Likely to Impair Ability to Meet Contractual Commitments to Clients

Neither NWM nor its management has any financial condition that is likely to reasonably impair NWM's ability to meet contractual commitments to clients.

C. Bankruptcy Petitions in Previous Ten Years

NWM has not been the subject of a bankruptcy petition in the last ten years.

Item 19: Requirements For State Registered Advisers

A. Principal Executive Officers and Management Persons; Their Formal Education and Business Background

BPC currently has only one management person: David Alexis Nicholas. Education and business background can be found on the individual's Form ADV Part 2B brochure supplement.

B. Other Businesses in Which This Advisory Firm or its Personnel are Engaged and Time Spent on Those (If Any)

Other business activities for each relevant individual can be found on the Form ADV Part 2B brochure supplement for each such individual.

C. Calculation of Performance-Based Fees and Degree of Risk to Clients

BPC accepts performance-based fees, fees based on a share of capital gains on or capital appreciation of the assets of a client.

Qualified clients will pay an annual fee of 1.00% of assets under management along with a 20.00% performance fee based on capital appreciation. If the client's portfolio rises in value, the client will pay 20.00% on that increase in value, but if the portfolio drops in

value, the client will not incur a new performance fee until the portfolio reaches the last highest value, adjusted for withdrawals and deposits, which is generally known as a “high water mark.”

The high water mark will be the highest value of the client’s account on the last day of any previous quarter, after accounting for the client’s deposits or withdrawals for each billing period.

These fees are generally negotiable and the final fee schedule is attached as Exhibit II of the Investment Advisory Contract. This service may be canceled with 30 days’ notice. Clients must pay the prorated performance-based fees for the billing period in which they terminate the Investment Advisory Contract up to and including the day of termination.

Clients that are paying a performance-based fee should be aware that investment advisers have an incentive to invest in riskier investments when paid a performance-based fee due to the higher risk/higher reward attributes.

D. Material Disciplinary Disclosures for Management Persons of this Firm

There are no civil, self-regulatory organization, or arbitration proceedings to report under this section.

E. Material Relationships That Management Persons Have With Issuers of Securities (If Any)

Neither BPC, nor its management persons, has any relationship or arrangement with issuers of securities. See Item 10.C and 11.B.
