Item 4: Advisory Business

A. Description of the Advisory Firm

Double I Investments, LLC (hereinafter “DII”) provides “robo-advisory” portfolio management services via an online interface to clients under this wrap fee program as sponsor and portfolio manager.

Total Assets Under Management	Annual Fee
All Assets	1.00%

Robo-advisory portfolio management fees are withdrawn directly from the client’s accounts with client’s written authorization on a monthly basis or may be invoiced and billed directly to the client on a monthly, clients may select the method in which they are billed.

Accounts with assets under \$6,000 will pay a minimum account fee of \$5 per month. The fee will be paid via a secure third-party credit card processor.

Fees are paid in advance. The advisory fee is calculated using the value of the assets on the last business day of the prior billing period. Refunds for any fees paid in advance but not yet earned will be refunded on a prorated basis and returned within fourteen days to the client via check or return deposit back into the client’s account. For all asset-based fees paid in advance, the fee refunded will be equal to the balance of the fees collected in advance minus the daily rate* times the number of days elapsed in the billing period up to and including the day of termination. (*The daily rate is calculated by dividing the annual asset-based fee rate by 365.)

Clients may terminate the agreement without penalty, for full refund of DII’s fees, within five business days of signing the Investment Advisory Contract. Thereafter, clients may terminate the Investment Advisory Contract immediately upon written notice.

B. Contribution Cost Factors

The program may cost the client more or less than purchasing such services separately. There are several factors that bear upon the relative cost of the program, including the trading activity in the client’s account, the adviser’s ability to aggregate trades, and the cost of the services if provided separately (which in turn depends on the prices and specific services offered by different providers).

C. Additional Fees

DII will wrap third party fees (i.e., custodian fees, brokerage fees, mutual fund fees,

transaction fees, etc.) for wrap fee portfolio management accounts. DII will charge clients one fee and pay all transaction fees using the fee collected from the client. Accounts participating in the wrap fee program are not charged higher advisory fees based on trading activity, but clients should be aware that DII has an incentive to limit trading activities for those accounts since the firm absorbs those transaction costs.

Certain other fees are not included in the wrap fee and are paid for separately by the client. These include, but are not limited to, margin costs, charges imposed directly by a mutual fund or exchange traded fund, fees associated with “step out” transactions if the account uses different custodians or broker-dealers, deferred sales charges, odd-lot differentials, transfer taxes, wire transfer and electronic fund fees, and other fees and taxes on brokerage accounts and securities transactions.

D. Compensation of Client Participation

Neither DII, nor any representatives of DII receive any additional compensation beyond advisory fees for the participation of client’s in the wrap fee program. However, compensation received may be more than what would have been received if client paid separately for investment advice, brokerage, and other services. Therefore, DII may have a financial incentive to recommend the wrap fee program to clients.

Item 5: Types of Clients

DII generally offers advisory services to Individuals.

There is no account minimum.

Item 6: Portfolio Manager Selection and Evaluation

A. Selecting/Reviewing Portfolio Managers

DII will not select outside portfolio managers for management of this wrap fee program. DII will be the sole portfolio manager for this wrap fee program.

DII will use industry standards to calculate portfolio manager performance.

DII reviews the performance information to determine and verify its accuracy and compliance with presentation standards. The performance information is quarterly and is reviewed by DII.

B. Related Persons

DII and its personnel serve as the portfolio managers for all wrap fee program accounts. This is a conflict of interest in that no outside adviser assesses DII's management of the wrap fee program. However, DII addresses this conflict by acting in its clients' best interest consistent with its fiduciary duty as sponsor and portfolio manager of the wrap fee program.

C. Advisory Business

DII provides "robo-advisory" portfolio management services via an online interface. This entails the use of algorithm-based portfolio management advice, rather than in-person investment advice. These automated investment solutions are customized to each client and based on individual characteristics, such as the client's age, risk tolerance, income, and current assets, among others. DII only provides "robo-advisory" portfolio management services via an online interface. DII does not provide any other services.

DII evaluates the current investments of each client with respect to their risk tolerance levels and time horizon.

DII will request discretionary authority from clients in order to select securities and execute transactions without permission from the client prior to each transaction.

Risk tolerance levels are documented in the Investment Policy Statement, which is given to each client.

Portfolio management accounts participating in the wrap fee program will not have to pay for transaction or trading fees. DII will charge clients one fee and pay transaction fees using the advisory fee collected from the client. Certain other fees are not included in the wrap fee and are paid for separately by the client. These include, but are not limited to, margin costs, charges imposed directly by a mutual fund or exchange traded fund, deferred sales charges, odd-lot differentials, transfer taxes, wire transfer and electronic fund fees, and other fees and taxes on brokerage accounts and securities transactions.

Accounts participating in the wrap fee program are not charged higher advisory fees based on trading activity, but clients should be aware that DII has an incentive to limit trading activities for those accounts since the firm absorbs those transaction costs. To address this conflict, DII will always act in the best interest of its clients consistent with its fiduciary duty as an investment adviser.

Services Limited to Specific Types of Investments

DII generally limits its investment advice to equities, fixed income securities, and ETFs. DII may use other securities as well to help diversify a portfolio when applicable.

Client Tailored Services and Client Imposed Restrictions

DII offers the same suite of services to all of its clients. However, specific client investment strategies and their implementation are dependent upon the client's current situation (income, tax levels, and risk tolerance levels). Clients are not permitted to impose restrictions in investing in certain securities or types of securities in accordance with their values or beliefs.

Wrap Fee Programs

As discussed herein, DII sponsors and acts as portfolio manager for this wrap fee program. DII manages the investments in the wrap fee program. The fees paid to the wrap account program will be given to DII as a management fee.

Amounts Under Management

DII has the following assets under management:

Discretionary Amounts:	Non-Discretionary Amounts:	Date Calculated:
\$0	\$0	July 2021

Performance-Based Fees and Side-By-Side Management

DII does not accept performance-based fees or other fees based on a share of capital gains on or capital appreciation of the assets of a client.

Clients paying a performance-based fee should be aware that investment advisers have an incentive to invest in riskier investments when paid a performance-based fee due to the higher risk/higher reward attributes.

Methods of Analysis and Investment Strategies

Methods of Analysis

DII's methods of analysis include charting analysis and charting analysis.

Charting analysis involves the use of patterns in performance charts. DII uses this technique to search for patterns used to help predict favorable conditions for buying and/or selling a security.

Technical analysis involves the analysis of past market data; primarily price and volume.

Investment Strategies

DII uses/recommends long term investing.

Investing in securities involves a risk of loss that you, as a client, should be prepared to bear.

Material Risks Involved

Methods of Analysis

Charting analysis strategy involves using and comparing various charts to predict long and short term performance or market trends. The risk involved in using this method is that only past performance data is considered without using other methods to crosscheck data. Using charting analysis without other methods of analysis would be making the assumption that past performance will be indicative of future performance. This may not be the case.

Technical analysis attempts to predict a future stock price or direction based on market trends. The assumption is that the market follows discernible patterns and if these patterns can be identified then a prediction can be made. The risk is that markets do not always follow patterns and relying solely on this method may not take into account new patterns that emerge over time.

Investment Strategies

Long term investing is designed to capture market rates of both return and risk. Due to its nature, the long-term investment strategy can expose clients to various types of risk that will typically surface at various intervals during the time the client owns the investments. These risks include but are not limited to inflation (purchasing power) risk, interest rate risk, economic risk, market risk, and political/regulatory risk.

Investing in securities involves a risk of loss that you, as a client, should be prepared to bear.

Risks of Specific Securities Utilized

Equity investment generally refers to buying shares of stocks in return for receiving a future payment of dividends and/or capital gains if the value of the stock increases. The value of equity securities may fluctuate in response to specific situations for each company, industry conditions and the general economic environments.

Fixed income investments generally pay a return on a fixed schedule, though the amount of the payments can vary. This type of investment can include corporate and government debt securities, leveraged loans, high yield, and investment grade debt and structured products, such as mortgage and other asset-backed securities, although individual bonds may be the best known type of fixed income security. In general, the fixed income market is volatile and fixed income securities carry interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) Fixed income securities also carry inflation risk, liquidity risk, call risk, and credit and default risks for both issuers and counterparties. The risk of default on treasury inflation protected/inflation linked bonds is dependent upon the U.S. Treasury defaulting (extremely unlikely); however, they carry a potential risk of losing share price value, albeit

rather minimal. Risks of investing in foreign fixed income securities also include the general risk of non-U.S. investing described below.

Exchange Traded Funds (ETFs): An ETF is an investment fund traded on stock exchanges, similar to stocks. Investing in ETFs carries the risk of capital loss (sometimes up to a 100% loss in the case of a stock holding bankruptcy). Areas of concern include the lack of transparency in products and increasing complexity, conflicts of interest and the possibility of inadequate regulatory compliance. Because ETFs use "authorized participants" (APs) as agents to facilitate creations or redemptions (primary market), there is a risk that an AP decides to no longer participate for a particular ETF; however, that risk is mitigated by the fact that other APs can step in to fill the vacancy of the withdrawing AP [an ETF typically has multiple APs] and ETF transactions predominantly take place in the secondary market without need for an AP. Like other liquid securities, ETF pricing changes throughout the trading day and there can be no guarantee that an ETF is purchased at the optimal time in terms of market movements. Moreover, due to market fluctuations, ETF brokerage costs, differing demand and characteristics of underlying securities, and other factors, the price of an ETF can be lower than the aggregate market price of its cash and component individual securities (net asset value – NAV). An ETF is subject to the same market risks as those of its underlying individual securities, and also has internal expenses that can lower investment returns.

Past performance is not indicative of future results. Investing in securities involves a risk of loss that you, as a client, should be prepared to bear.

Voting Client Securities (Proxy Voting)

DII will not ask for, nor accept voting authority for client securities. Clients will receive proxies directly from the issuer of the security or the custodian. Clients should direct all proxy questions to the issuer of the security.

Item 7: Client Information Provided to Portfolio Managers

DII's investment advisory personnel oversee the algorithm but may not monitor each client's account. Clients are encouraged to update their account/questionnaire with any change in their objectives, risk tolerance, or other pertinent information, as that information factors into the portfolio's composition.

Item 8: Client Contact with Portfolio Managers

DII will restrict clients from contacting portfolio managers. DII is registered with the SEC as an internet investment adviser. Per Rule 203A-2(e) Internet investment advisers are defined as advisers that provide investment advice to all of its clients exclusively through an interactive

website, except that the investment adviser may provide investment advice to fewer than 15 clients through other means during the preceding twelve months.

Item 9: Additional Information

A. Disciplinary Action and Other Financial Industry Activities

Criminal or Civil Actions

There are no criminal or civil actions to report.

Administrative Proceedings

There are no administrative proceedings to report.

Self-Regulatory Organization (SRO) Proceedings

There are no self-regulatory organization proceedings to report.

Registration as a Broker/Dealer or Broker/Dealer Representative

Neither DII nor its representatives are registered as, or have pending applications to become, a broker/dealer or a representative of a broker/dealer.

Registration as a Futures Commission Merchant, Commodity Pool Operator, or a Commodity Trading Advisor

Neither DII nor its representatives are registered as or have pending applications to become either a Futures Commission Merchant, Commodity Pool Operator, or Commodity Trading Advisor or an associated person of the foregoing entities.

Registration Relationships Material to this Advisory Business and Possible Conflicts of Interests

John Pyper Houghton is an accountant and from time to time may offer clients advice or products from those activities. Clients should be aware that these services may involve a conflict of interest; however, DII always acts in the best interest of the client. Clients are free to obtain these services or products through another provider and always have the right to utilize or decline the services of any DII representative in such individual's outside capacity.

Joshua Garth Slater is an accountant and from time to time may offer clients advice or products from those activities. Clients should be aware that these services may involve a conflict of interest; however, DII always acts in the best interest of the client. Clients are

free to obtain these services or products through another provider and always have the right to utilize or decline the services of any DII representative in such individual's outside capacity.

Selection of Other Advisers or Managers and How This Adviser is Compensated for Those Selections

DII does not select third-party investment advisers.

B. Code of Ethics, Client Referrals, and Financial Information

Code of Ethics

DII has a written Code of Ethics that covers the following areas: Prohibited Purchases and Sales, Insider Trading, Personal Securities Transactions, Exempted Transactions, Prohibited Activities, Conflicts of Interest, Gifts and Entertainment, Confidentiality, Service on a Board of Directors, Compliance Procedures, Compliance with Laws and Regulations, Procedures and Reporting, Certification of Compliance, Reporting Violations, Compliance Officer Duties, Training and Education, Recordkeeping, Annual Review, and Sanctions. DII's Code of Ethics is available free upon request to any client or prospective client.

Recommendations Involving Material Financial Interests

DII does not recommend that clients buy or sell any security in which DII or a related person has a material financial interest.

Investing Personal Money in the Same Securities as Clients

From time to time, representatives of DII may buy or sell securities for themselves that they also recommend to clients. This may provide an opportunity for representatives of DII to buy or sell the same securities before or after recommending the same securities to clients resulting in representatives profiting off the recommendations they provide to clients. Such transactions may create a conflict of interest. DII will always document any transactions that could be construed as conflicts of interest and will never engage in trading that operates to the client's disadvantage when similar securities are being bought or sold.

Trading Securities At/Around the Same Time as Clients' Securities

From time to time, representatives of DII may buy or sell securities for themselves at or around the same time as clients. This may provide an opportunity for representatives of DII to buy or sell securities before or after recommending securities to clients resulting in representatives profiting off the recommendations they provide to clients. Such transactions may create a conflict of interest; however, DII will never engage in trading that operates to the client's disadvantage if representatives of DII buy or sell securities at

or around the same time as clients.

Frequency and Nature of Periodic Reviews

Accounts are reviewed at least quarterly by Rebecca Malmrose, CCO, with regard to clients' respective investment policies and risk tolerance levels.

Factors That Will Trigger a Non-Periodic Review of Client Accounts

Reviews may be triggered by material market, economic or political events, or by changes in client's financial situations (such as retirement, termination of employment, physical move, or inheritance).

Content and Frequency of Regular Reports Provided to Clients

Each client will receive a quarterly account statement from the custodian.

Economic Benefits Provided by Third Parties for Advice Rendered to Clients

DII does not receive any economic benefit, directly or indirectly from any third party for advice rendered to DII clients.

Compensation to Non – Advisory Personnel for Client Referrals

DII does not directly or indirectly compensate any person who is not advisory personnel for client referrals.

Balance Sheet

DII neither requires nor solicits prepayment of more than \$1,200 / \$500.

Financial Conditions Reasonably Likely to Impair Ability to Meet Contractual Commitments to Clients

DII does not have any financial condition that would impair its ability to meet contractual commitments to clients.

Bankruptcy Petitions in Previous Ten Years

DII has not been the subject of a bankruptcy petition.

Item 10: Requirements For State Registered Advisers

Please see the “Recommendations Involving Material Financial Interests” and “Registration Relationships Material to this Advisory Business and Possible Conflicts of Interests” sections above.
