Amundi Asset Management US, Inc.	Date: March 31, 2021
Address: 60 State Street, Boston MA 02109	Phone: (800) 225-6292
Web Site Address: http://www.amundi.com/US	

This Brochure provides information about the qualifications and business practices of Amundi Asset Management US, Inc. (“Amundi US” or the “adviser”). If you have any questions about the contents of this Brochure, please contact us at 800-225-6292 and/or e-mail ask.amundi@amundi.com. The information in this Brochure has not been approved or verified by the United States Securities and Exchange Commission (“SEC”) or by any state securities authority.

Additional information about Amundi US also is available on the SEC’s website at www.adviserinfo.sec.gov.

Material Changes

The following material change has been made to this Brochure since its last annual amendment dated March 30, 2020.

- Effective January 1, 2021, Amundi Pioneer Institutional Asset Management, Inc. merged with and into its affiliate, Amundi Pioneer Asset Management, Inc. (the “Merger”), and the surviving entity changed its name to Amundi Asset Management US, Inc. After the Merger, the investment advisory services previously provided by Amundi Pioneer Institutional Asset Management, Inc. are now provided through Amundi Asset Management US, Inc.

Following the Merger, effective January 1, 2021, the US business of Amundi adopted a new brand, Amundi US. This replaces Amundi Pioneer, which was first adopted following Amundi’s acquisition of Pioneer Investments in July 2017.

Advisory Business

Amundi US provides investment advisory services encompassing a wide range of investment strategies, as discussed herein.

Pooled Vehicles

Amundi US provides investment management services to various entities, including open and closed-end investment companies (“Domestic Funds”) that are registered under the U.S. Investment Company Act of 1940, as amended (the “Investment Company Act”), and other similarly managed accounts such as private funds, foreign registered investment companies (“Off-Shore Funds”), unregistered pooled investment vehicles, collective investment trusts (“CIT”), pension and profit sharing plans, and a controlled foreign corporation (“CFC”) wholly owned by a registered investment company (“RIC”) (“Pooled Vehicles”). Amundi US also provides investment sub-advisory services to RICs. Amundi US does not tailor its services to individual needs of its Pooled Vehicle clients.

Separate Accounts

Amundi US provides investment advisory services to separate accounts owned by institutional clients such as charitable organizations, endowments, high net worth individuals, corporations and other businesses, and state and local retirement boards (“Separate Accounts”). Amundi US offers discretionary investment advice to separately managed account programs and platforms sponsored by investment advisers, broker-dealers and other financial service firms (“Program Sponsors”) either directly to the Program Sponsor (“Single Contract SMA”) or the participants (“Dual Contract SMA”) depending on the program (collectively referred to as “SMA Programs”). Amundi US also provides investment advice to third-party model investment programs (“Model Portfolios”). Through each investment management agreement with Amundi US with respect to a Separate Account, a client will provide Amundi US with an investment objective and guidelines. In addition to this option, each client can choose whether to authorize Amundi US to vote proxies for its respective account(s).

Amundi US is registered with the Commodity Futures Trading Commission (“CFTC”) as a Commodity Pool Operator (“CPO”) and a commodity trading advisor (“CTA”). Amundi US’s Boston, MA office focuses on both equity and fixed income investments. The adviser’s Durham, NC office focuses on fixed income investments. The adviser’s U.S. history dates back to 1928 with the creation of the Pioneer Fund, one of the first mutual funds.

Amundi Asset Management US, Inc. is a wholly owned subsidiary of Amundi US, Inc., which in turn, is a wholly owned subsidiary of Amundi Holdings US, Inc.. Amundi Holdings US, Inc. is a wholly owned subsidiary of Amundi. Amundi is controlled by Credit Agricole S.A., a French credit institution. Credit Agricole S.A. currently holds 70% of Amundi’s share capital. The remaining shares of Amundi are held by institutional and retail investors.

FIRM BROCHURE

As of 02/28/2021, Amundi US managed approximately \$93,965,000,000 in assets for approximately 5627 clients. Approximately \$93,847,000,000 was managed on a discretionary basis, and \$118,000,000 was managed on a non-discretionary basis.

Fees and Compensation

Pooled Vehicles

The fees for providing investment management services to all Pooled Vehicle clients, including Domestic Funds and other similarly managed accounts such as private funds and Off-Shore Funds, are negotiated on an individual basis and vary significantly among clients. Fees generally are expressed as a percentage of assets under management of the client, and clients are billed monthly or quarterly and in arrears. Fees paid by certain clients also may include performance fees permitted by Section 205(b) of the Investment Advisers Act of 1940, as amended (the “Investment Advisers Act”) and SEC Rules adopted thereunder.

With respect to the Domestic Funds, each management contract generally has an initial term of two years and continues thereafter only if approved by the Fund’s Board of Trustees (the “Board”), including a majority of the Board’s independent trustees, annually and may be terminated without penalty by either the Fund, by a vote of the Fund’s Board or by a vote of a majority of its outstanding voting securities, or by Amundi US upon 60 days’ prior written notice to the Fund. The contracts also terminate if “assigned,” as that term is defined in the Investment Company Act. The fees are described below and in the investment company registration statements and amendments filed with the SEC. Management fees are calculated as a percentage of assets under management.

FIRM BROCHURE

Domestic Funds	Management Fee (expressed as a percentage of assets under management)

Amundi Luxembourg S.A., an affiliate of Amundi US, has engaged Amundi US to provide investment management services to a number of publicly-offered European funds, including certain Luxembourg domiciled UCITS (Undertakings for Collective Investment in Transferable Securities). For the delegated asset management services, Amundi US receives a portion of the total fees received by Amundi Luxembourg S.A. The rates at which Amundi US receives fees for its services are established from time to time pursuant to intercompany fee arrangements that consider the competitive range of fees for similar services.

With respect to clients that are Off-Shore Funds, each management contract usually provides that either party has the right to terminate the advisory relationship not less than 90 days' with prior written notice. In the event of account termination, Amundi US is entitled to receive all fees accrued up to the date of termination.

FIRM BROCHURE

With respect to private funds, each management agreement provides that either party has the right to terminate the agreement, without penalty, upon the giving of 30 calendar days' notice to the other party.

With respect to the Domestic Funds, Amundi US provides for office space, equipment and personnel for managing the Funds' affairs and investments and pays all or a part of the salaries and fees of all officers of each Fund and of all Trustees who are "interested persons," as that term is defined in the Investment Company Act, of Amundi US. Amundi US may waive all or a portion of its management fee otherwise payable to it and/or undertake to pay or reimburse a Fund for all or a portion of its expenses not otherwise required to be borne or reimbursed by Amundi US. Amundi US has entered into expense limitation agreements with certain of the Domestic Funds whereby Amundi US has committed for certain periods of time to limit or maintain the expenses of such Domestic Funds.

With respect to the Off-Shore Funds, Amundi US provides for office space, equipment and personnel for managing the Funds' investments. Amundi US may agree to waive a portion of the fees it receives from Amundi Luxembourg S.A. for the delegated asset management services.

Clients of Domestic Funds and Off-Shore Funds generally will incur and pay: (1) charges and expenses for accounting, pricing and appraisal services of any portfolio accounting and / or recordkeeping agent appointed by the client with respect to the portfolio; (2) the charges and expenses of any custodian appointed by the client with respect to the portfolio; (3) all brokerage commissions, dealer spreads, transfer fees and taxes; (4) reasonable legal expenses related to any investment of the portfolio; and (5) all other reasonable expenses properly chargeable to the client. Clients also will incur transaction costs on their account. Any expenses allocated to an account relating to securities may be shared pro rata with any other of Amundi US's accounts with the same expenses. The expenses and costs described above are not reflected in the fee schedules listed above, which only reflect management fees.

Clients of private funds generally will not incur and pay: (1) charges and expenses for accounting, pricing and appraisal services of any portfolio accounting and/or recordkeeping agent appointed by the client with respect to the portfolio; (2) the charges and expenses of any custodian appointed by client with respect to the portfolio; (3) all brokerage commissions, dealer spreads, transfer fees and taxes; (4) charges and expenses (including reasonable legal fees) associated with the purchase of securities incurred in good faith in connection with the valuation, negotiation and purchase of securities for the portfolio and the ongoing exercise of the client's rights under the securities held in the portfolio; and (5) all other expenses properly chargeable to the client. Clients also will incur transaction costs on their account. Any expenses allocated to an account relating to securities may be shared pro rata with any other of Amundi US's accounts with the same expenses.

FIRM BROCHURE

Separate Accounts

The following fees, and corresponding strategies, are utilized for clients of Amundi US unregistered pooled investment vehicles, CIT's, pension and profit sharing plans and separate account clients such as charitable organizations, endowments, high net worth individuals, corporations and other businesses, and state and local retirement boards.

Fees for advisory services for these client strategies generally are expressed as a percentage of assets under management of the client, and clients are billed monthly or quarterly and in arrears. The fees for providing investment management services are negotiated on an individual basis and vary among clients.

The following fees represent management fees only. Defined Contribution plan fee schedule – Investment through a private CIT or unregistered pooled investment vehicle (LLC) are included.

Other Fees and Expenses – Separate Accounts

In addition to management fees, Separate Account clients generally will incur and pay: (1) charges and expenses for accounting, pricing and appraisal services of any portfolio accounting and / or recordkeeping agent appointed by the client with respect to the portfolio; (2) the charges and expenses of any custodian appointed by the client with respect to the portfolio; (3) all brokerage commissions, dealer spreads, transfer fees and taxes; (4) reasonable legal expenses related to any investment of the portfolio (provided the client will be consulted prior to incurring

FIRM BROCHURE

legal expenses potentially exceeding \$5,000); and (5) all other reasonable expenses properly chargeable to the client. Clients also will incur transaction costs on their account. Any expenses allocated to an account relating to securities may be shared pro rata with any other of Amundi US's accounts with the same expenses. The expenses and costs described above are not reflected in the fee schedules listed above, which only reflect management fees.

No standard advisory fee schedule exists for strategies managed from Amundi US's Durham office. The fees for these customized strategies are negotiated on a case-by-case basis.

All Clients

Accounts initiated or terminated during a calendar quarter will be charged a pro-rated fee. Upon termination of any account, any earned, unpaid fees will be due and payable.

Amundi US may sub-contract with investment management firms having a particular expertise ("sub-advisers") to manage a portion of or all the assets in an account under its management. In such event, the fees payable to sub-advisers would generally be paid by Amundi US and are based on a percentage of assets under the sub-advisers management.

The Brokerage Practices section of this Brochure further describes the factors that Amundi US considers in selecting or recommending broker-dealers for client transactions and determining the reasonableness of their compensation.

Performance-Based Fees and Side-by-Side Management

Certain clients pay Amundi US performance-based fees. Amundi US in general, and certain portfolio managers of Amundi US, manage accounts that are charged a performance-based fee and accounts that are charged only an asset-based fee. Managing both types of accounts at the same time may create an incentive to favor performance-based fee accounts. In addition, as a result of such performance fees, Amundi US may have an incentive to make riskier investment decisions on behalf of clients for which it may earn performance-based fees because such decisions could yield higher returns.

Amundi US recognizes that conflicts may arise under these circumstances, and has adopted an investment allocation policy for Amundi US that addresses the potential conflict of interest for a portfolio manager to favor performance-based fee accounts. This policy provides that no allocation shall be made to an account based on performance, the amount or structure of Amundi US's fee for managing the account, the direct or indirect interests of Amundi US or its employees in the account, or whether the account is public, private, proprietary or third party. In determining which securities to buy or sell for a client and in what amount, Amundi US may consider a variety of factors, including the client's investment objectives and strategies, the client's diversification and liquidity requirements, the size of the client's account, tax implications, the marketability of the securities, the characteristics of the client's account and other relevant factors, such as the size of an available purchase or sale opportunity, the extent to

FIRM BROCHURE

which an available opportunity would represent a meaningful portion of the client's account, and the availability of comparable opportunities. Other factors considered include the amount of securities of the issuer then outstanding, the value of those securities and the market for them. Amundi US may make purchase and sale decisions with respect to a particular client account that may be the same as, or differ from, the recommendations made, or the timing or nature of the action taken, with respect to other accounts.

Frequently, the same investment decision is made for more than one account and Amundi US's portfolio managers may place orders to buy or sell the same security for a number of accounts. Amundi US may aggregate orders to purchase or sell the same security for multiple accounts. Whenever Amundi US aggregates orders, all accounts that participate in the transaction will participate on a pro rata or other objective basis, as described below. Amundi US will not aggregate investment transactions for accounts unless the transaction is consistent with its duties to the accounts, the terms of the applicable investment management agreement and each account's investment objectives, restrictions and policies.

Equity Trade Allocation: With the exception of transactions in limited investment opportunities such as Initial Public Offerings ("IPOs"), new issues or secondary offerings, executions of aggregated equity trades generally are allocated pro rata to the participating accounts based on order size (i.e., each client will be allocated that percentage of the executed order that its requested order size bears to the total size of the order). Allocated amounts may be rounded to reflect market practices for lot sizes. All accounts in a single aggregated trade receive the average price obtained and pay a pro rata portion of all transactions costs.

If new orders for the same security with the same terms are submitted at any time to an existing order where partial executions have already occurred with respect to the original order, the prior executions will be allocated pro rata among the original participating accounts at the average price obtained for such executions up to the time new orders are received. New orders will be added to the balance of the original unexecuted order, and each original participating account will receive a pro rata allocation based on the percentage that the balance of the original order plus the new orders relates to the balance of the original order. New orders will receive a pro rata allocation based on the percentage that each new order relates to the balance of the original order plus the new orders. All allocations to original participating and new accounts will be at the average price obtained for executions subsequent to the new orders being added to the original order.

If a trade is only partially completed on a given day, that day's fill will be allocated on a pro rata basis among each participating account at the close of business that day at the average execution price.

Fixed Income Trade Allocation: Amundi US allocates fixed-income trades prior to the end of the day the trade is executed ("trade date"). In determining the level of allocation to a particular account, portfolio managers and analysts review client guidelines and consider a variety of factors at the time of allocation.

FIRM BROCHURE

Once a fixed income trade has been executed and participating accounts are identified as described above, all participating accounts receive the same purchase price and transaction costs, if any, are shared pro rata among participating accounts.

Limited Public Offerings, New Issues and Limited Opportunity Allocations: Client accounts acquiring securities in IPOs, new issue or limited investment opportunity will receive a pro rata allocation of such transaction based on the total net assets of all participating accounts, provided that variances of $\pm 15\%$ are permitted and that allocations to an account may not exceed the portfolio manager's indication of interest. The net assets of a closed-end fund shall not include the leverage derived from the issuance of preferred shares.

Allocations for IPOs, new issues or limited investment opportunities are determined immediately after confirmation of an allocation for shares/interests in the offering from the broker-dealer. Once an allocation is confirmed, if it is less than Amundi US requested, Amundi US may adjust its allocation on a pro rata basis to the original allocation as provided in Amundi US's trade allocation procedures. Allocations of IPOs, new issues and limited investment opportunities are reviewed by the Trade Management Committee. The allocation and reporting procedures relating to IPOs, new issues and limited investment opportunities shall not apply to situations where an offering does not present a limited or unique opportunity based on the issue size or availability of substantially similar securities, such as in the case of government securities, certificates of deposit (CDs) and high quality, short-term investments.

Amundi US maintains separate trading groups for Amundi US's managed funds and accounts ("Amundi US Trading Group") and any third-party model programs ("Model Portfolios Group"). The two groups operate independently of one another.

Model changes to similarly managed strategies will be communicated to both the Amundi US Trading Group and the Model Portfolios Group simultaneously.

In cases where Amundi US is participating in more than one model program for the same strategy, the Model Portfolios Group will disseminate the respective strategy's model changes to the applicable Firms using an equitable rotation methodology.

Amundi US will not allocate trades for the purpose of benefitting Amundi US or any of its officers or its employees; or for the accounts of business associates, friends or relatives while excluding other accounts from the allocation of any securities.

Under no circumstances will Amundi US delay allocation so that it can allocate the more favorable prices received during the day to one account and the less favorable prices to another account.

Post-execution allocations must comply with the same general guidelines set forth above for pre-execution allocations and must be consistent with treating all accounts fairly and equitably. All deviations from modifications to allocations for this reason must be documented.

Types of Clients

Amundi US provides investment advisory services encompassing a wide range of investment strategies, as discussed herein.

Pooled Vehicles

Amundi US provides investment management services to various entities, including Domestic Funds that are registered under the Investment Company Act, and other similarly managed accounts such as private funds and Off-Shore Funds, unregistered pooled investment vehicles, CITs, pension and profit sharing plans, and a CFC wholly owned by a RIC. Amundi US also serves as a sub-adviser to RICs. Each Domestic Fund prospectus contains information related to opening and maintaining an account and other account policies.

Separate Accounts

Amundi US also provides investment advisory services to various entities including separate accounts - accounts owned by institutional clients such as charitable organizations, endowments, high net worth individuals, corporations and other businesses, central and supranational banks and state and local retirement boards. Advisory services are limited to portfolio management services for businesses or institutional clients. The foregoing entities may be organized in the United States or other countries.

Separately managed accounts require an initial investment of \$100,000. Additional investments into a separately managed account are not subject to a minimum requirement. Initial investments in SMA Programs have two levels, \$100,000 for equity strategies and \$250,000 for fixed income strategies. The minimum account size for CIT's and unregistered pool vehicles is typically \$3 million.

Methods of Analysis, Investment Strategies and Risk of Loss
--

Amundi US selects investments from a wide range of asset classes and employs a variety of styles in managing client assets. With respect to equity securities, Amundi US employs both fundamental research and quantitative research to its portfolio management. From both the fundamental research and quantitative research groups, information flows to the portfolio managers, who are responsible for active portfolio management. The investment management teams evaluate the research teams' recommendations against Amundi US's buy or sell disciplines, and act accordingly.

With respect to fixed income securities, Amundi US's investment professionals consistently apply well established means of identifying potentially rewarding securities, bolstered by access to information from their associates around the globe and aided by technology. Whether

FIRM BROCHURE

applying top-down analysis that leads to selection of government bonds, or the bottom-up approach that ends with corporate bonds being selected, the investment management teams' goal is portfolio construction that matches product objectives and supports investors' goals.

Pooled Vehicles

The significant investment strategies that Amundi US uses in managing assets in the Domestic Funds and other similarly managed accounts such as private funds and Off-Shore Funds, are described below. Any percentage limitations on investment strategies are those of the applicable Domestic Fund. Other similarly managed accounts may have different percentage limitations. In each of its strategies, Amundi US utilizes macroeconomic research regarding economic forecasts and analysis, as well as industry data relating to profits and trends. Demographic, technological and social trends are also analyzed in the overall analysis of certain securities. The material risks involved with these strategies or methods of analysis are described at the end of this section.

Equity Strategies

<ul style="list-style-type: none"> • The significant investment strategies for <i>Pioneer Fund</i> and certain other similarly managed and sub-advised accounts with investment objectives of reasonable income and capital growth are: <p>The fund invests in a broad group of carefully selected securities that Amundi US believes are reasonably priced, rather than in securities whose prices reflect a premium resulting from their current market popularity. The fund invests predominantly in equity securities. For purposes of the fund's investment policies, equity securities include common stocks and other equity instruments, such as funds that invest primarily in equity securities, equity interests in real estate investment trusts (REITs), depositary receipts, warrants, rights and preferred stocks.</p> <p>The fund primarily invests in securities of U.S. issuers. The fund may invest up to 15% of its total assets in securities of non-U.S. issuers. The fund will not invest more than 5% of its total assets in the securities of emerging markets issuers.</p> <p>The fund may invest up to 15% of its net assets in REITs.</p> <p>The fund may invest in initial public offerings of equity securities. The fund may also invest in investment grade and below investment grade debt securities (known as “junk bonds”).</p>	<p>Principal Risks:</p> <ul style="list-style-type: none"> - Market risk - Value style risk - Portfolio selection risk - ESG risk - Risks of investments in real estate related securities - Risks of warrants and rights - Preferred stocks risk - Risks of initial public offerings - Risks of investment in other funds - Debt securities risk - Risks of non-U.S. investments - Market segment risk - Derivatives risk - Leveraging risk
--	--

FIRM BROCHURE

<p>The fund may, but is not required to, use derivatives. The fund may use derivatives, such as stock index futures and options, for a variety of purposes, including: in an attempt to hedge against adverse changes in the market price of securities, interest rates or currency exchange rates; as a substitute for purchasing or selling securities; to attempt to increase the fund's return as a non-hedging strategy that may be considered speculative; to manage portfolio characteristics; and as a cash flow management technique. The fund may choose not to make use of derivatives for a variety of reasons, and any use may be limited by applicable law and regulations. The fund may also hold cash or other short-term investments.</p> <p>Amundi US uses a value approach to select the fund's investments to buy and sell. Amundi US seeks securities selling at reasonable prices or substantial discounts to their underlying values and then holds these securities until the market values reflect their intrinsic values. Amundi US evaluates a security's potential value, including the attractiveness of its market valuation, based on the company's assets and prospects for earnings growth. In making that assessment, Amundi US employs fundamental research and an evaluation of the issuer based on its financial statements and operations. In selecting securities, Amundi US considers a security's potential to provide a reasonable amount of income. Amundi US focuses on the quality and price of individual issuers.</p> <p>Amundi US also considers environmental, social and/or corporate governance (ESG) standards in selecting securities to buy and sell. Amundi US integrates ESG analysis into its investment process by focusing on companies with sustainable business models and evaluating ESG-related risks as part of its research recommendations. In addition, Amundi US generally excludes corporate issuers that do not meet or exceed minimum ESG standards, based on a system that uses ESG ratings provided by third parties or internal sources. When using ESG ratings to exclude corporate issuers and evaluating ESG issues generally, Amundi US considers ratings in the context of an issuer's respective sector or industry. The fund generally will not invest in companies significantly involved in certain business activities, including but not limited to, the production of alcohol, tobacco products and certain controversial military weapons, and the operation of coal mines and gambling casinos and other gaming businesses.</p>	<ul style="list-style-type: none"> - Valuation risk - Liquidity risk - Cash management risk - Expense risk - Redemption risk - Cybersecurity risk

FIRM BROCHURE

<p>Normally, the fund invests at least 80% of its net assets (plus the amount of borrowings, if any, for investment purposes) in floating rate instruments of U.S. and non-U.S. issuers, including: mortgage-backed and asset-backed securities; senior secured loans (“senior loans”) and second lien or other subordinated or unsecured loans; debt issued by banks and other corporate, governmental and non-governmental entities; corporate bonds; event-linked bonds (also known as “catastrophe bonds”); and preferred stock. The fund may invest in floating rate instruments of issuers in any industry or market sector. The fund also considers as floating rate instruments, and the fund may invest without limit in, adjustable rate securities, fixed rate securities with durations of less than or equal to one year, funds that invest primarily in floating rate instruments, and fixed rate securities with respect to which the fund has entered into derivative instruments to effectively convert the fixed rate interest payments into floating rate interest payments. The fund considers these investments as economic equivalents of floating rate instruments. The fund also may invest in other derivative instruments that provide exposure to floating rate instruments or have similar economic characteristics for purposes of satisfying the 80% requirement.</p> <p>The fund does not have a targeted maturity range for its portfolio. The fund may invest in securities with a broad range of maturities. The maturity of a fixed income security is a measure of the time remaining until final payment on the security is due.</p> <p>Under normal circumstances, the fund’s average portfolio duration will be less than two years. Duration seeks to measure the price sensitivity of a fixed income security to changes in interest rates. If the fund’s average portfolio duration exceeds two years, the fund will take action to bring it within its expected range within a reasonable period of time. Unlike maturity, duration takes into account interest payments that occur throughout the course of holding the bond. The longer a portfolio’s duration, the more sensitive it will be to changes in interest rates. For example, if the fund has a two year duration, then all other things being equal, the fund will decrease in value by two percent if interest rates rise one percent. The assumptions that are made about a security’s features and options when calculating duration may prove to be incorrect. Duration is calculated by Amundi US, is not an exact measurement and may not reliably predict the fund’s or a particular security’s price sensitivity to changes in yield or interest rates.</p> <p>The fund may invest up to 20% of its net assets in debt securities that are rated below investment grade (debt securities rated below investment grade are commonly referred to as “junk bonds”) or are</p>	<p>risk</p> <ul style="list-style-type: none"> - Extension risk - Liquidity risk - Portfolio selection risk - Risks of investing in floating rate loans - Collateral risk - Risk of disadvantaged access to confidential information - Risks of subordinated securities - U.S. Treasury obligations risk - U.S. government agency obligations risk - Mortgage-related and asset-backed securities risk - Risks of investing in collateralized debt obligations - Risks of instruments that allow for balloon payments or negative amortization payments - High yield or “junk” bond risk - Risks of investing in insurance-linked securities - Municipal securities risk - Risks of zero coupon bonds, payment in kind,

<p>In allocating assets among debt and equity securities, Amundi US considers a variety of factors expected to influence global economic activity, including fundamental economic indicators, such as the rates of economic growth and inflation, monetary policy, geo-political factors, the performance of securities markets, and the relative value of the U.S. dollar compared to other currencies. The fund is not required to allocate its investments among debt and equity securities in any fixed proportion, nor is it limited by the issuer's geographic location, size or market capitalization. The relative proportions of the fund's investments in debt and equity securities may change over time based upon market and economic conditions.</p> <p>In selecting individual securities to buy and sell, Amundi US considers a security's income prospects relative to perceived risk. Amundi US selects debt securities based upon such factors as a security's yield, liquidity and rating, an assessment of credit quality, and sector and issuer diversification. Amundi US considers an equity security's potential to provide income in view of the sustainability of the issuer's earnings and financial condition. In selecting equity and debt securities, Amundi US generally favors those securities it perceives to be undervalued. Amundi US employs fundamental research in evaluating issuers, taking into account financial condition and profitability, future capital needs, potential for change in rating, industry outlook, the competitive environment and management ability. In making these portfolio decisions, Amundi US relies on the knowledge, experience and judgment of its staff and the staff of its affiliates who have access to a wide variety of fundamental and quantitative research. In selecting among market segments and instruments, Amundi US considers the relative value of particular investments. Investments typically are sold when Amundi US's overall assessment of market and economic conditions changes or the assessments of the attributes of asset classes or individual holdings change.</p> <p>The fund may invest in securities and instruments that are not income-producing for purposes of seeking capital appreciation or managing risk or other portfolio characteristics. <ul style="list-style-type: none"> • The significant investment strategies for <i>Pioneer Diversified High Income Trust</i> (a closed-end fund) and certain other similarly managed accounts with investment objectives of a high level of current income, with a potential for capital appreciation as a secondary objective. The fund invests in a unique blend of higher yielding asset classes, including global high yield bonds, leveraged bank loans and event-linked bonds (cat bonds). <p>Under normal market conditions, the fund invests at least 80% of its managed assets (net assets plus borrowings or other leverage for investment purposes) in diversified portfolio of below investment grade (high yield) debt securities, loans and preferred stocks. The fund allocates its investments principally among three sectors of the fixed income securities markets: (i) below investment grade debt securities and preferred stocks of U.S. and non-U.S. issuers, including governmental and corporate issuers in emerging markets ("global high yield debt securities"), (ii) floating rate loans and (iii) "event-linked" bonds, which sometimes are referred to as "insurance-linked" or "catastrophe" bonds.</p> <p>Amundi US believes that this actively managed, diversified portfolio of asset classes – global high yield debt securities, floating rate loans and event-linked bonds – may provide investors with a range of potential benefits across various market cycles and under various market</p>	<p>Principal Risks:</p> <ul style="list-style-type: none"> - Market risk - High yield or "junk" bond risk - Risks of non-U.S. investments - Currency risk - Sovereign debt risk - Interest rate risk - Credit risk - Prepayment or call risk - Extension risk - Liquidity risk - Portfolio selection risk - Mortgage-related and asset-backed securities risk - Risks of instruments that allow for balloon payments or negative amortization

FIRM BROCHURE

<p>conditions. These benefits include, among others, the potential to provide investors with a relatively high level of current income without undue risk as a result of the low correlation among these asset classes, reduced volatility due to limited exposure to interest rate and duration risk, as well as a favorable risk return profile. Specifically, the floating rate feature of both floating rate loans and event-linked bonds serves to reduce sensitivity to changes in prevailing interest rates. In addition, the introduction of event-linked bonds to the diversified portfolio enhances these benefits by reducing volatility, while providing the potential for above average returns. Moreover, the fund's investments in event-linked bonds offer investors access to a unique asset class that otherwise may be unavailable to them.</p> <p>The fund does not have a policy of maintaining a specific average credit quality or a targeted maturity range for its portfolio. The fund may invest any portion of its assets in securities and other instruments of non-U.S. issuers, including emerging market issuers, and may engage in certain strategic transactions.</p> <p>Amundi US is responsible for managing the fund's overall investment program, including allocating the fund's investments among the different asset classes and managing the fund's investments in global high income debt securities and floating rate loans. Amundi US considers both broad economic and issuer specific factors in selecting a portfolio designed to achieve the fund's investment objectives. Amundi US selects individual securities based upon the terms of the securities (such as yields compared to U.S. Treasuries or comparable issues), liquidity and rating, sector and issuer diversification. Amundi US also employs due diligence and fundamental quantitative and qualitative research to assess an issuer's credit quality, taking into account financial condition and profitability, future capital needs, potential for change in rating, industry outlook, the competitive environment and management ability. Amundi US may sell a portfolio security when it believes the security no longer will contribute to meeting the fund's investment objectives. Amundi US makes that determination based on the same criteria it uses to select portfolio securities. In making these portfolio decisions, Amundi US relies on the knowledge, experience and judgment of its staff and the staff of its affiliates who have access to a wide variety of research.</p> <p>The fund may use financial leverage on an ongoing basis for investment purposes by borrowing from banks through a revolving credit facility. <p>below investment grade by the national rating agencies that cover the obligations (i.e., Ba and below by Moody's Investors Service, Inc. ("Moody's") or BB and below by Standard & Poor's Ratings Group ("S&P")), or if unrated, are determined by Amundi US to be of comparable quality. Investment in securities of below investment grade quality involves substantial risk of loss. "Junk bonds" are considered predominantly speculative with respect to the issuer's ability to pay interest and repay principal and are susceptible to default or decline in market value due to adverse economic and business developments. The fund may invest all or any portion of its assets in securities of issuers that are in default or that are in bankruptcy.</p> <p>Amundi US's investment philosophy is based on the belief that fundamental research and a disciplined asset acquisition/disposition process will produce superior long-term results. Amundi US's investment process combines an economic and industry overlay with a disciplined securities selection process. Amundi US's economic and industry overlay utilizes a variety of macro and economic variables to identify broad market sectors that Amundi US believes have positive fundamentals. Within these broad sectors, Amundi US targets specific industries that appear to have, in Amundi US's view, the most promising prospects under current market conditions. Within a targeted industry, Amundi US engages in a disciplined securities selection process. In this process, Amundi US conducts an extensive analysis of issuers within the targeted industry to identify issuers that appear to have the most favorable prospects for improving financial condition. Amundi US also reviews the terms of the agreements documenting the Senior Loans to seek to identify those Senior Loans that have the most favorable risk and return characteristics. Based on this analysis, Amundi US constructs and actively manages a portfolio of Senior Loans. Amundi US's goal is to achieve the highest potential level of current income with the lowest potential volatility over long periods of time.</p> <p>The fund may use financial leverage on an ongoing basis for investment purposes by borrowing from banks through a revolving credit facility. Leverage creates special risks not associated with unleveraged funds having a similar investment objectives and policies. These include the possibility of higher volatility of both the net asset value of the fund and the value of assets serving as asset coverage for the borrowing.</p>	<p>debt obligations</p> <ul style="list-style-type: none"> - Risks of instruments that allow for balloon payments or negative amortization payments - Risks of investing in insurance-linked securities - Risks of zero coupon bonds, payment in kind, deferred and contingent securities - Risks of non-U.S. investments - Currency risk - Risks of convertible securities - Preferred stocks risk - Risks of investment in other funds - Derivatives risk - Credit default swap risk - Structured securities risk - Risks of investing in inverse floating rate obligations - Forward foreign currency transactions risk - Leveraging risk - Repurchase agreement risk - Market segment risk - Valuation risk

the preferred shares.	
<ul style="list-style-type: none"> • The significant investment strategies for <u>Pioneer Securitized Income Fund</u> (a closed-end fund) and certain other similarly managed accounts with investment objectives of total return are: <p>The fund invests primarily in mortgage-backed securities and other securitized asset instruments.</p> <p>A substantial portion of the fund’s assets ordinarily will consist of below investment grade (high yield) debt securities. Investment in securities of below investment grade quality, commonly referred to as “junk bonds,” involves substantial risk of loss.</p> <p>In selecting investments, Amundi US integrates fundamental analysis of individual investments and their sectors with a top-down view of the macroeconomic landscape. Amundi US uses a research oriented, value-driven approach to identify investments that it believes will perform well over market cycles in terms of income, total return and risk characteristics. Relying on a team of portfolio managers and analysts specializing in sectors of the securitized asset markets, Amundi US seeks to add value over the course of market cycles by identifying specific opportunities, including cyclical opportunities, with the potential for attractive risk-adjusted returns. In its evaluation, the team considers such factors as yield, interest rate risk, liquidity, instrument structure, credit and asset quality, perceived risk relative to other risk assets, and supply/demand technicals. In selecting among investments, Amundi US considers the relative value of particular investments. Amundi US also may employ sector rotation, which refers to the shifting of investments from one or more sectors or subsectors into one or more other sectors or subsectors.</p> <p>In addition to investment-specific factors, Amundi US considers broad economic factors in constructing a portfolio designed to achieve the fund's investment objective. In assessing the appropriate quality, sector weightings and duration of the portfolio, Amundi US considers a variety of factors that are expected to influence economic activity and interest rates. These factors include fundamental economic indicators, such as the rates of economic growth and inflation, Federal Reserve monetary policy and the relative value of the U.S. dollar compared to other currencies.</p> <p>In selecting debt securities other than securitized asset instruments, Amundi US considers the terms of the securities (such as yields),</p>	<p>Principal Risks:</p> <ul style="list-style-type: none"> - Market risk - Interest rate risk - Credit risk - Prepayment or call risk - Extension risk - Liquidity risk - High yield or “junk” bond risk - Portfolio selection risk - Credit risk transfer securities risk - Anti-takeover provisions - Asset-backed securities risk - Risks of instruments that allow for balloon payments or negative amortization payments - Risks of subordinated securities - Structured securities risk - U.S. Treasury obligations risk - U.S. government agency obligations risk - Derivatives risk - Portfolio turnover risk - Risks of investing in inverse floating rate obligations - Credit default

FIRM BROCHURE

<p>liquidity and rating, and market segment. Amundi US employs fundamental research to assess an issuer's credit quality, taking into account financial condition and profitability, future capital needs, potential for change in rating, industry outlook, the competitive environment and management ability. In making portfolio decisions, Amundi US relies on the knowledge, experience and judgment of its staff and the staff of its affiliates who have access to a wide variety of research.</p> <p>Amundi US may sell a portfolio security when it believes the security no longer will contribute to meeting the fund's investment objective. Amundi US makes that determination based on the same criteria it uses to select portfolio investments.</p> <p>Normally, the fund invests at least 80% of its net assets (plus borrowings or other leverage for investment purposes) in securitized asset instruments. Securitized asset instruments include agency and non-agency mortgage-backed securities (MBS), such as commercial mortgage-backed securities (CMBS), residential mortgage-backed securities (RMBS), and uniform mortgage-backed securities (UMBS), asset-backed securities (ABS), including private and multi-class structures, pass-through certificates, other instruments secured by financial, physical, and/or intangible assets (e.g., receivables or pools of receivables), and debt and equity tranches of collateralized debt obligations (CDOs), collateralized mortgage obligations (CMOs) and collateralized loan obligations (CLOs). Derivative instruments that provide exposure to securitized asset instruments or have similar economic characteristics may be used to satisfy the fund's 80% policy.</p> <p>The fund will provide written notice to shareholders at least 60 days prior to any change to the requirement that it invest at least 80% of its net assets in securitized asset instruments.</p> <p>Agency MBS are issued or guaranteed by the U.S. government or its agencies, instrumentalities or sponsored enterprises, including mortgage pass-through securities representing interests in pools of mortgage loans issued or guaranteed by the Government National Mortgage Association (GNMA), the Federal National Mortgage Association (FNMA), or the Federal Home Loan Mortgage Corporation (FHLMC). Although securitized asset instruments typically represent pools of loans, in some cases they may consist of one large loan that is securitized and sold to capital market investors. At any given time, the fund may have a substantial amount of its assets in any sector or subsector of the securitized asset markets.</p> <p>MBS and other mortgage-related investments may be structured such</p>	<p>swap risk</p> <ul style="list-style-type: none"> - Leveraging risk - Non-diversification risk - Market segment risk - Valuation risk - Expense risk - Cybersecurity risk

FIRM BROCHURE

that payments consist of interest-only (IO), principal-only (PO) or principal and interest. The fund may also invest in structured investments including credit linked notes (CLNs), adjustable rate mortgage loans (ARMs), and custodial receipts. The fund may invest a substantial amount of its assets in “sub-prime” mortgage-related securities. The fund also may invest in mortgage pass-through securities including securities eligible to be sold on the “to-be-announced” or TBA market. The fund may enter into dollar rolls, in which the fund sells mortgage-backed securities including mortgage TBAs and at the same time contracts to buy back very similar securities on a future date. MBS include credit risk transfer securities, which transfer the credit risk related to the MBS to the buyer of the security. Credit risk transfer securities are fixed or floating-rate unsecured general obligations issued by FNMA, FHLMC or other government sponsored or private entities.

In addition to securitized asset instruments, the fund has the flexibility to invest in a broad range of issuers and segments of the debt security markets as a whole. Debt securities may include instruments and obligations of U.S. and non-U.S. corporate and other non-governmental entities, those of U.S. and non-U.S. governmental entities (including government agencies and instrumentalities), floating rate loans and other floating rate securities, subordinated debt securities, insurance-linked securities, certificates of deposit, money market securities, funds that invest primarily in debt securities, and cash, cash equivalents and other short term holdings. The fund may invest in securities of issuers in any market sector, industry or market capitalization range. The fund may also invest in Treasury Inflation Protected Securities (TIPS) and other inflation-linked debt securities.

The fund has no limit as to the maturity or duration of the securities in which it invests and maintains an average portfolio duration that varies based upon the judgment of Amundi US. The fund's investments may have fixed or variable principal payments and all types of interest rate payment and reset terms, including fixed rate, adjustable rate, floating rate, zero coupon, contingent, deferred, payment in kind and auction rate features. The fund's investments may include instruments that allow for balloon payments or negative amortization payments.

The fund may invest without limit in securities of any rating. The fund's investments in debt securities rated below investment grade may include securities that are in default.

The fund may invest in securities that are subordinated or “junior” to more senior securities of the issuer, including residual or equity

FIRM BROCHURE

<p>tranches of securitized asset instruments.</p> <p>The fund may, but is not required to, use derivatives, such as interest rate futures. The fund may use derivatives for a variety of purposes, including: in an attempt to hedge against adverse changes in the market price of securities, interest rates or currency exchange rates; as a substitute for purchasing or selling securities; to seek event-linked exposure; to attempt to increase the fund's return as a non-hedging strategy that may be considered speculative; and to manage portfolio characteristics. The fund may choose not to make use of derivatives for a variety of reasons, and any use may be limited by applicable law and regulations.</p> <p>The fund intends, subject to favorable market conditions, to add leverage to its portfolio through direct borrowing and/or through entering into reverse repurchase agreements or derivatives transactions that create leverage.</p> <p>To the extent consistent with the repurchase liquidity requirement of an interval fund, the fund may invest without limit in illiquid securities.</p> <p>The fund is classified as a non-diversified fund under the 1940 Act and may invest in the securities of a smaller number of issuers than a diversified fund.</p> <p>The fund's investment strategies and policies may be changed from time to time without shareholder approval, unless specifically stated otherwise in this prospectus or in the statement of additional information.</p>

Material Risks – Pooled Vehicles and Separate Accounts

The following is a description of the material risks of Amundi US's significant investment strategies.

Material risks of equity and fixed income investments:

- **Market risk.** The market prices of securities held may go up or down, sometimes rapidly or unpredictably, due to general market conditions, such as real or perceived adverse economic, political, or regulatory conditions, recessions, the spread of infectious illness or other public health issues, inflation, changes in interest or currency rates or adverse investor sentiment.
- **Portfolio selection risk.** Amundi US's judgment about a particular security or issuer, about the economy or a particular sector, region or market segment, or about an investment strategy, or Amundi US's allocation of fund assets to the various asset classes, may prove to be incorrect.
- **Market segment risk.** To the extent a client account may, from time to time, make investments in a market segment, the account will be subject to a greater degree of risks particular to that segment, and may experience greater market fluctuation than an account without the same focus.
- **ESG risk.** The fund generally does not invest in corporate issuers that do not meet or exceed minimum ESG standards. Excluding specific issuers limits the universe of investments available to the fund as compared with other funds that do not apply minimum ESG standards, which may mean forgoing some investment opportunities available to funds without similar ESG standards.

However, the strategy of seeking to identify companies with sustainable business models is believed to provide potential return and risk benefits, including the selection of issuers with fewer ESG-related risks. Further, in implementing its ESG approach, Amundi US focuses on investment considerations that relate to potential return and risk, without sacrificing these considerations for non-economic purposes.

- **Risks of non-U.S. investments.** Investing in non-U.S. issuers may involve unique risks compared to investing in securities of U.S. issuers. These risks are more pronounced for issuers in emerging markets or to the extent that the clients account invests significantly in one region or country. These risks may include different financial reporting practices and regulatory standards, less liquid trading markets, currency risks, changes in economic, political, regulatory and social conditions, terrorism, sustained economic downturns, tax burdens, and investment and repatriation restrictions. Lack of information and less market regulation also may affect the value of these securities. Withholding and other non-U.S. taxes may decrease the fund's return. Non-U.S. issuers may be located in parts of the world that have historically been prone to natural disasters. Investing in depositary receipts is subject to many of the same risks as investing directly in non-U.S. issuers. Depositary receipts may involve higher expenses and may trade at a discount (or premium) to the underlying security.
- **Derivatives risk.** Using derivatives exposes a client account to additional risks, may increase the volatility of the net asset value and may not provide the result intended. Derivatives may have a leveraging effect on the client's portfolio. Amundi US may have to sell assets at inopportune times to satisfy the client account's obligations. Derivatives may be difficult to sell, unwind or value, and the counterparty may default on its obligations to the client.
- **Leveraging risk.** The value of a client's investment portfolio may be more volatile and other risks tend to be compounded if the client account borrows or uses derivatives or other investments that have embedded leverage. Leverage generally magnifies the effect of any increase or decrease in the value of the client account's underlying assets or creates investment risk with respect to a larger pool of assets than the client account would otherwise have. Engaging in such transactions may cause the client account to liquidate positions when it may not be advantageous to do so to satisfy its obligations or meet segregation requirements.
- **Liquidity risk.** Some securities and derivatives held by the fund may be impossible or difficult to purchase, sell or unwind, particularly during times of market turmoil. An instrument's liquidity may be affected by reduced trading volume, a relative lack of market makers or legal restrictions, and illiquid securities and derivatives also may be difficult to value.

FIRM BROCHURE

- **Credit default swap risk.** Credit default swap contracts, a type of derivative instrument, involve special risks and may result in losses to the client's investment portfolio. Credit default swaps may in some cases be illiquid, and they increase credit risk since the client account has exposure to both the issuer of the referenced obligation and the counterparty to the credit default swap. Swaps may be difficult to unwind or terminate. The absence of a central exchange or market for swap transactions led, in some instances, to difficulties in trading and valuation, especially in the event of market disruptions. Recent legislation will require most swaps to be executed through a centralized exchange or regulated facility and be cleared through a regulated clearinghouse. The swap market could be disrupted or limited as a result of this legislation, which could adversely affect the fund. Moreover, the establishment of a centralized exchange or market for swap transactions may not result in swaps being easier to trade or value.
- **Currency risk.** Because the fund may invest in non-U.S. currencies, securities denominated in non-U.S. currencies, and other currency-related investments, the fund is subject to currency risk, meaning that the fund could experience losses based on changes in the exchange rate between non-U.S. currencies and the U.S. dollar.
- **Risk of investment in other funds.** Investing in other investment companies subjects the fund to the risks of investing in the underlying securities or assets held by those funds. When investing in another fund, the fund will bear a pro rata portion of the underlying fund's expenses, including management fees, in addition to its own expenses.
- **Master limited partnership risk.** Investments in securities of master limited partnerships can be less liquid than, and involve other risks that differ from, investments in common stock. Holders of the units of master limited partnerships have limited ability to influence management and limited rights to vote on matters affecting the partnership. Conflicts of interest may exist between common unit holders, the general partner of a master limited partnership and other unit holders. Master limited partnerships may be subject to less regulation (and less protection for investors) under state laws than corporations. There also are tax risks associated with investments in master limited partnerships.
- **Portfolio turnover risk.** If a fund does a lot of trading, it may incur additional operating expenses, which would reduce performance. A higher level of portfolio turnover may also cause shareholders to incur a higher level of taxable income or capital gains.
- **Expense risk.** Your actual costs of investing in the fund may be higher

than the expenses shown in “Annual fund operating expenses” for a variety of reasons. For example, expense ratios may be higher than those shown if overall net assets decrease. Net assets are more likely to decrease and fund expense ratios are more likely to increase when markets are volatile.

- **Commodity investments risk.** Exposure to the commodities markets may subject the fund to greater volatility than investments in other securities. The value of commodity-linked derivatives may be affected by changes in overall market movements, commodity index volatility, changes in interest rates, or factors affecting a particular industry or commodity, such as drought, floods, weather, livestock disease, embargoes, tariffs and international economic, political and regulatory developments. The prices of energy, industrial metals, precious metals, agriculture and livestock sector commodities may fluctuate widely due to factors such as changes in value, supply and demand and governmental regulatory policies. Commodity-related investments may be more volatile and less liquid than the underlying commodities, instruments or measures, are subject to the credit risks associated with the issuer, and their values may decline substantially if the issuer’s creditworthiness deteriorates. As a result, returns of commodity-linked investments may deviate significantly from the return of the underlying commodity, instruments or measures. The fund intends to gain exposure to commodities by investing in the Subsidiary, a foreign entity that will be treated as a corporation for U.S. federal income tax purposes. The fund’s ability to invest in commodity-related investments, and the means through which any such investments may be made, will be limited by tax considerations.
- **Risks of convertible securities.** The market values of convertible securities tend to decline as interest rates increase and, conversely, to increase as interest rates decline. A downturn in equity markets may cause the price of convertible securities to decrease relative to other fixed income securities.
- **Preferred stocks risk.** Preferred stocks may pay fixed or adjustable rates of return. Preferred stocks are subject to issuer-specific and market risks applicable generally to equity securities. In addition, a company’s preferred stocks generally pay dividends only after the company makes required payments to holders of its bonds and other debt. Thus, the value of preferred stocks will usually react more strongly than bonds and other debt to actual or perceived changes in the company’s financial condition or prospects. The market value of preferred stocks generally decreases when interest rates rise. Preferred stocks of smaller companies may be more vulnerable to adverse developments than preferred stocks of larger companies.

FIRM BROCHURE

- **Income producing securities risk.** Income producing securities may fall out of favor with investors and underperform the overall equity market.
- **Anti-takeover provisions (closed-end funds).** The fund's Agreement and Declaration of Trust and by-laws include provisions that could limit the ability of other entities or persons to acquire control of the fund or convert the fund to open-end status.
- **Tax Risk (Pioneer Flexible Opportunities Fund).** In order to qualify for the favorable tax treatment generally available to regulated investment companies, at least 90% of the fund's gross income each taxable year must consist of qualifying income, the fund must meet certain asset diversification tests at the end of each fiscal quarter, and the fund must meet certain distribution requirements for each taxable year.

In addition, the Internal Revenue Service has issued a revenue ruling concluding that income and gains from certain commodity-linked derivatives does not constitute "qualifying income." Under proposed Treasury regulations, certain income derived by a regulated investment company for a taxable year from a foreign wholly owned subsidiary, such as the Subsidiary, which invests in commodities and commodity-linked derivatives, would generally constitute "qualifying income" only to the extent the foreign wholly-owned subsidiary makes distributions in respect of such income to the regulated investment company for that taxable year.

The fund has obtained a private letter ruling from the Internal Revenue Service establishing that income derived from the Subsidiary will be permissible income for purposes of the 90% income test. There can be no assurance that the Internal Revenue Service will not revoke the private letter ruling it issued to the fund. It is possible that any such revocation could be retroactive to a date to be specified by the Internal Revenue Service. The tax treatment of the fund's investment in commodity interests or in the Subsidiary could also be adversely affected by future legislation or Treasury regulations.

- **Tax Risk (Pioneer ILS Interval Fund).** In order to qualify for the favorable tax treatment generally available to regulated investment companies, at least 90% of the fund's gross income each taxable year must consist of qualifying income, the fund must meet certain asset diversification tests at the end of each fiscal quarter, and the fund must meet certain distribution requirements for each taxable year.

The tax treatment of certain insurance-linked securities ("ILS") is not entirely clear. Certain of the fund's investments (including, potentially, certain ILS) may generate income that is not qualifying income. The fund might generate more non-qualifying income than anticipated, might not be able to generate

qualifying income in a particular taxable year at levels sufficient to meet the qualifying income test, or might not be able to determine the percentage of qualifying income it has derived for a taxable year until after year-end. The fund may determine not to make an investment that it otherwise would have made, or may dispose of an investment it otherwise would have retained (potentially resulting in the recognition of taxable gain or loss, and potentially under disadvantageous circumstances), in an effort to meet the qualifying income test.

- **Risks of investing in structured insurance investments (Pioneer ILS Interval Fund).** The fund may invest in special purpose vehicles (“SPVs”) or similar instruments structured to comprise a portion of a reinsurer’s catastrophe-oriented business, known as quota share instruments (sometimes referred to as reinsurance sidecars), or to provide reinsurance relating to specific risks to insurance or reinsurance companies through a collateralized instrument, known as collateralized reinsurance. Quota shares instruments and other structured reinsurance investments generally will be considered illiquid securities by the fund. Structured reinsurance investments are typically more customizable but less liquid investments than event-linked bonds. Like event-linked bonds, an investor in structured reinsurance investments participates in the premiums and losses associated with underlying reinsurance contracts. Structured reinsurance investments are subject to the same risks as event-linked bonds. In addition, because quota share instruments represent an interest in a basket of underlying reinsurance contracts, the fund has limited transparency into the individual underlying contracts and therefore must rely upon the risk assessment and sound underwriting practices of the issuer. Structured reinsurance investments may be difficult to value.
- **ILS market and reinvestment risk (Pioneer ILS Interval Fund).** The size of the ILS market may change over time, which may limit the availability of ILS for investment by the fund. The original issuance of ILS in general, including ILS with desired instrument or risk characteristics, may fluctuate depending on the capital and capacity needs of reinsurers as well as the demand for ILS by institutional investors. The availability of ILS in the secondary market also may be limited by supply and demand dynamics and prevailing economic conditions. To the extent ILS held by the fund mature, or the fund must sell securities in connection with share repurchases, the fund may be required to hold more cash or short-term instruments than it normally would until attractive ILS becomes available. Holding excess cash and/or reinvestment in securities that are lower yielding or less desirable than securities sold may negatively affect performance.
- **Mortgage dollar roll transactions risk.** The benefits to the fund from mortgage dollar roll transactions depend upon the Adviser’s ability to forecast mortgage prepayment patterns on different mortgage pools. The fund may

lose money if, during the period between the time it agrees to the forward purchase of the mortgage securities and the settlement date, these securities decline in value due to market conditions or prepayments on the underlying mortgages.

- **Concentration risk (Pioneer ILS Interval Fund).** A fund that invests a significant percentage of its assets in a single industry may be particularly susceptible to adverse economic, regulatory or other events affecting that industry and may be more risky than a fund that does not concentrate in an industry.
- **Repurchase offers risk (Pioneer ILS Interval Fund and Pioneer Securitized Income Fund).** The risk that the fund's repurchases of shares may hurt investment performance by forcing the fund to maintain a higher percentage of its assets in liquid investments or to liquidate certain investments when it is not desirable to do so. Repurchases may be oversubscribed, preventing shareholders from selling some or all of their shares back to the fund.
- **Cash management risk.** The value of the investments held by the fund for cash management or temporary defensive purposes may be affected by market risks, changing interest rates and by changes in credit ratings of the investments. To the extent that the fund has any uninvested cash, the fund would be subject to credit risk with respect to the depository institution holding the cash. If the fund holds cash uninvested, the fund will not earn income on the cash and the fund's yield will go down. During such periods, it may be more difficult for the fund to achieve its investment objective.
- **Risks of warrants and rights.** If the price of the underlying stock does not rise above the exercise price before the warrant expires, the warrant generally expires without any value and the fund loses any amount it paid for the warrant. The failure to exercise subscription rights to purchase common shares would result in the dilution of the fund's interest in the issuing company.
- **Short position risk.** Taking short positions involves leverage of the fund's assets and presents various risks. If the price of the instrument or market on which the fund has taken a short position increases, then the fund will incur a loss. Because of leverage, taking short positions involves the risk that losses may be exaggerated, potentially more than the actual cost of the investment. Unlike purchasing a financial instrument like a stock, where potential losses are limited to the purchase price and there is no upside limit on potential gain, short sales involve no cap on maximum losses. Also, there is the risk that a counterparty may fail to perform the terms of the arrangement, causing a loss

to the fund.

- **Forward foreign currency transactions risk.** The fund may not fully benefit from or may lose money on forward foreign currency transactions if changes in currency rates do not occur as anticipated or do not correspond accurately to changes in the value of the fund's holdings, or if the counterparty defaults. Such transactions may also prevent the fund from realizing profits on favorable movements in exchange rates. Risk of counterparty default is greater for counterparties located in emerging markets.
- **Equity-linked notes risk.** Equity-linked notes (ELNs) may not perform as expected and could cause the fund to realize significant losses including its entire principal investment. Other risks include the risk of counterparty default, liquidity risk and imperfect correlation between ELNs and the underlying securities.
- **Valuation risk.** The sales price the fund could receive for any particular portfolio investment may differ from the fund's valuation of the investment, particularly for illiquid securities and securities that trade in thin or volatile markets or that are valued using a fair value methodology. Investors who purchase or redeem fund shares on days when the fund is holding fair-valued securities may receive fewer or more shares or lower or higher redemption proceeds than they would have received if the fund had not fair-valued the securities or had used a different valuation methodology.
- **Redemption risk.** The fund may experience periods of heavy redemptions that could cause the fund to liquidate its assets at inopportune times or at a loss or depressed value particularly during periods of declining or illiquid markets. Redemption risk is greater to the extent that the fund has investors with large shareholdings, short investment horizons, or unpredictable cash flow needs. The redemption by one or more large shareholders of their holdings in the fund could cause the remaining shareholders in the fund to lose money. In addition, the fund may suspend redemptions when permitted by applicable regulations.
- **Cybersecurity risk.** Cybersecurity failures or breaches by the fund's adviser, transfer agent, distributor, custodian, fund accounting agent and other service providers may disrupt fund operations, interfere with the fund's ability to calculate its NAV, prevent fund shareholders from purchasing, redeeming or exchanging shares or receiving distributions, cause loss or unauthorized access to private shareholder information, and result in financial losses, regulatory fines, penalties, reputational damage, or additional compliance cost.

Material risks of equity investments

- **Equity securities risk.** Equity securities represent an ownership interest in an issuer, rank junior in a company's capital structure to debt securities and consequently may entail greater risk of loss than debt securities. Equity securities are subject to the risk that stock prices may rise and fall in periodic cycles and may perform poorly relative to other investments. This risk may be greater in the short term.
- **Growth style risk.** The client account's investments do not have the growth potential originally expected. Growth stocks may fall out of favor with investors and underperform the overall equity market.
- **Value style risk.** The prices of securities Amundi US believes to be undervalued may not appreciate as expected or may go down. Value stocks may fall out of favor with investors and underperform the overall equity market.
- **Small and mid-size companies risk.** Compared to large companies, small and mid-size companies, and the market for their equity securities, may be more sensitive to changes in earnings results and investor expectations. They have more limited product lines and capital resources, experience sharper swings in market values, may be harder to sell at the appropriate times and prices, and offer greater potential for market fluctuation.
- **Risks of investments in REITs.** Investing in real estate investment trusts ("REITs") involves unique risks. They are significantly affected by the market for real estate and are dependent upon management skills and cash flow. REITs may have lower trading volumes and may be subject to more abrupt or erratic price movements than the overall securities markets. In addition to its own expenses, the fund will indirectly bear its proportionate share of any management and other expenses paid by REITs in which it invests. Many real estate companies, including REITs, utilize leverage.
- **Debt securities risk.** Factors that could contribute to a decline in the market value of debt securities in the fund include rising interest rates, if the issuer or other obligor of a security held by the fund fails to pay principal and/or interest, otherwise defaults or has its credit rating downgraded or is perceived to be less creditworthy or the credit quality or value of any underlying assets declines. Interest rates may go up, causing the value of the fund's investments to decline (this risk generally will be greater for securities with longer maturities or durations). For example, if interest rates increase by 1%, the value of a fund's securities with a portfolio duration of ten years would be expected to decrease by 10%, all other things being equal. Interest rates in the U.S. have been historically low and have begun to rise, and so the fund faces a

heightened risk that interest rates may continue to rise. A general rise in interest rates could adversely affect the price and liquidity of fixed income securities and could also result in increased redemptions from the fund. Junk bonds involve greater risk of loss, are subject to greater price volatility and are less liquid, especially during periods of economic uncertainty or change, than higher quality debt securities; they may also be more difficult to value. Junk bonds have a higher risk of default or are already in default and are considered speculative.

- **Risks of investing in the Subsidiary (Pioneer Flexible Opportunities Fund).** The Subsidiary is not registered under the 1940 Act and is not subject to all of the investor protections of the 1940 Act. Thus, the fund, as an investor in the Subsidiary, will not have all of the regulatory protections offered to investors in registered investment companies. In addition, changes in the laws of the United States and/or the Cayman Islands, under which the fund and the Subsidiary, respectively, are organized, could affect the ability of the fund and/or the Subsidiary to operate as described in this prospectus and could negatively affect the fund and its shareholders.
- **Equity issuer focus risk (Pioneer Disciplined Growth Fund).** The fund may invest in fewer than 40 securities. A higher percentage of the fund's assets may be invested in the securities of any one or a few issuers, than other funds. As a result, the fund's performance may be more volatile than the performance of funds holding more securities, and the fund's losses may be magnified by adverse events affecting a particular issuer.
- **Geographic focus risk (Pioneer Emerging Markets Fund).** To the extent that the fund invests from time to time more than 25% of its assets in issuers organized or located in a particular geographic region, including but not limited to issuers organized or with exposure to China and other Asian countries, the fund may be particularly affected by adverse securities markets, exchange rates and social, political, regulatory or economic events which may occur in those regions. Markets in China and other Asian countries are relatively new and undeveloped. Investments in Chinese and other Asian issuers could be adversely affected by changes in government policies, or trade or political disputes with major trading partners, including the U.S.
- **Large capitalization companies risk.** Large capitalization companies may fall out of favor with investors and underperform the overall equity market.
- **Risks of initial public offerings.** Companies involved in initial public offerings (IPOs) generally have limited operating histories, and prospects for future profitability are uncertain. The market for IPO issuers has been volatile, and share prices of newly public companies have fluctuated significantly over short periods of time. The purchase of IPO shares may involve high

transaction costs.

Material risks of fixed income investments

- **Interest rate risk.** Interest rates may go up; causing the value of an account's investments to decline, (this risk may be greater for securities with longer maturities).
- **Credit risk.** If an issuer or guarantor of a security held or a counterparty to a financial contract with the client account defaults on its obligation to pay principal and/or interest, has its credit rating downgraded or is perceived to be less creditworthy, or the credit quality or value of any underlying assets declines, the value of your investment will decline.
- **Credit risk transfer securities risk.** Credit risk transfer securities are unguaranteed and unsecured debt securities issued by government sponsored enterprises and therefore are not directly linked to or backed by the underlying mortgage loans. As a result, in the event that a government sponsored enterprise fails to pay principal or interest on its credit risk transfer securities or goes through a bankruptcy, insolvency or similar proceeding, holders of such credit risk transfer securities have no direct recourse to the underlying mortgage loans and will generally receive recovery on par with other unsecured note holders in such a scenario. The risks associated with an investment in credit risk transfer securities are different than the risks associated with an investment in mortgage-backed securities issued by Fannie Mae and Freddie Mac, or other government sponsored enterprise or issued by a private issuer, because some or all of the mortgage default or credit risk associated with the underlying mortgage loans is transferred to investors. As a result, investors in these securities could lose some or all of their investment in these securities if the underlying mortgage loans default.
- **Prepayment or call risk.** Many issuers have a right to prepay their securities. If interest rates fall, an issuer may exercise this right. If this happens, the client account will be forced to reinvest prepayment proceeds at a time when yields on securities available in the market are lower than the yield on the prepaid security. The client account also may lose any premium it paid on the security.
- **Extension risk.** During periods of rising interest rates, the average life of certain types of securities may be extended because of slower than expected principal payments.
- **Mortgage-related and asset-backed securities risk.** The value of mortgage-related and asset-backed securities will be influenced by factors affecting the real estate market and the assets underlying such securities. As a result, during

periods of declining asset value, difficult or frozen credit markets, swings in interest rates, or deteriorating economic conditions, mortgage-related and asset-backed securities may decline in value, face valuation difficulties, become more volatile and/or become illiquid.

- **High yield or “junk” bond risk.** Debt securities that are below investment grade, “junk bonds,” are speculative, have a higher risk of default or are already in default, tend to be less liquid and are more difficult to value than higher grade securities. Junk bonds tend to be volatile and more susceptible to adverse events and negative sentiments.
- **Risks of investing in floating rate loans.** Floating rate loans and similar investments maybe illiquid or less liquid than other investments and difficult to value. The value of collateral, if any, securing a floating rate loan can decline or may be insufficient to meet the issuer’s obligations or may be difficult to liquidate. Market quotations for these securities may be volatile and / or subject to large spreads between bid and ask prices. No active trading market may exist for many floating rate loans, and many loans are subject to restrictions on resale. Loans may take longer than seven days to settle, potentially leading to the sale proceeds of loans not being available to meet redemptions for a substantial period of time after the sale of the loans. To the extent that sale proceeds of loans are not available, the fund may sell securities that have shorter settlement periods or may access other sources of liquidity to meet redemption requests. There is less readily available, reliable information about most senior loans than is the case for many other types of securities. Loans may not be considered “securities,” and purchasers, such as the fund, therefore may not be entitled to rely on the anti-fraud protections afforded by federal securities laws.
- **Collateral risk.** The value of collateral, if any, securing a floating rate loan can decline, and may be insufficient to meet the issuer’s obligations or may be difficult to liquidate. In addition, the fund’s access to collateral may be limited by bankruptcy or other insolvency laws. Uncollateralized loans involve a greater risk of loss.
- **Risk of disadvantaged access to confidential information.** The adviser’s decision not to receive material, non-public information about an issuer of a loan either held by, or considered for investment by, the fund, under normal circumstances could place it at a disadvantage, relative to other loan investors, in assessing a loan or the loan’s issuer, and adversely affect the fund’s investment performance.
- **Risks of inverse floating rate obligations.** The interest rate on inverse floating obligations will generally decrease as short-term interest rates increase, and increase as short-term rates decrease. Due to their leveraged

FIRM BROCHURE

structure, the sensitivity of the market value of an inverse floating rate obligation to changes in interest rates is generally greater than a comparable long-term bond issued by the same issuer and with similar credit quality, redemption and maturity provisions. Inverse floating rate obligations may be volatile and involve leverage risk.

- **Risks of investing in event-linked bonds.** The return of principal and the payment of interest on “event-linked” bonds are contingent on the non-occurrence of a pre-defined “trigger” event, such as a hurricane or an earthquake of a specific magnitude. In addition to the specified trigger events, event-linked bonds may expose the fund to other risks, including but not limited to issuer (credit) default, adverse regulatory or jurisdictional interpretations and adverse tax consequences.
- **Risks of subordinated securities.** A holder of securities that are subordinated or “junior” to more senior securities of an issuer is entitled to payment after holders of more senior securities of the issuer. Subordinated securities are more likely to suffer a credit loss than non-subordinated securities of the same issuer, any loss incurred by the subordinated securities is likely to be proportionately greater, and any recovery of interest or principal may take more time. As a result, even a perceived decline in creditworthiness of the issuer is likely to have a greater impact on subordinated securities than more senior securities.
- **Inflation-linked securities risk.** The principal or interest of inflation-linked securities such as TIPS is adjusted periodically to a specified rate of inflation. The inflation index used may not accurately measure the real rate of inflation. Inflation-linked securities may lose value in the event that the actual rate of inflation is different than the rate of the inflation index, and losses may exceed those experienced by other debt securities with similar durations. The values of inflation-linked securities may not be directly correlated to changes in interest rates, for example if interest rates rise for reasons other than inflation.
- **Risks of zero coupon bonds and payment in kind securities.** Zero coupon bonds and payment in kind securities may be more speculative and may fluctuate more in value than securities which pay income periodically and in cash. In addition, applicable tax rules require the fund to accrue and pay out its imputed income from such securities annually as income dividends. Such distributions may be taxable to shareholders.
- **U.S government agency obligations risk.** Amundi US may invest in obligations issued by agencies and instrumentalities of the U.S. government. Government-sponsored entities such as FNMA, FHLMC and the FHLBs, although chartered or sponsored by Congress, are not funded by congressional

appropriations and the debt and mortgage-backed securities issued by them are neither guaranteed nor issued by the U.S. government. The maximum potential liability of the issuers of some U.S. government obligations may greatly exceed their current resources, including any legal right to support from the U.S. government. Such debt and mortgage-backed securities are subject to the risk of default on the payment of interest and/or principal, similar to debt of private issuers. Although the U.S. government has provided financial support to FNMA and FHLMC in the past, there can be no assurance that it will support these or other government-sponsored entities in the future.

- **Risks of instruments that allow for balloon payments or negative amortization payments.** Certain debt instruments allow for balloon payments or negative amortization payments. Such instruments permit the borrower to avoid paying currently a portion of the interest accruing on the instrument. While these features make the debt instrument more affordable to the borrower in the near term, they increase the risk that the borrower will be unable to make the resulting higher payment or payments that become due at the maturity of the loan.
- **Risks of investing in collateralized debt obligations.** Investment in a collateralized debt obligation (CDO) is subject to the credit, subordination, interest rate, valuation, prepayment, extension and other risks of the obligations underlying the CDO and the tranche of the CDO in which the fund invests. CDOs are subject to liquidity risk. Synthetic CDOs are also subject to the risks of investing in derivatives, such as credit default swaps, and leverage risk.
- **Duration risk.** Duration seeks to measure the price sensitivity of a fixed income security to changes in interest rates. The longer a portfolio's duration, the more sensitive it will be to changes in interest rates. The fund's average portfolio maturity may be greater than the fund's average portfolio duration, and, accordingly, the fund may be more sensitive to changes in yield or interest rates. A portfolio with negative duration may increase in value when interest rates rise, and generally incurs a loss when interest rates and yields fall. The assumptions that are made about a security's features and options when calculating duration may prove to be incorrect. Duration is calculated by Amundi US, is not an exact measurement and may not reliably predict the fund's or a particular security's price sensitivity to changes in yield or interest rates. Amundi US may not be successful in its efforts to limit sensitivity to interest rate changes.
- **Exchange-traded note risk.** Exchange-traded notes (ETNs) are debt securities that may be traded on stock exchanges and generally are linked to the performance of an underlying index. An ETN's value generally depends on the performance of the underlying index and the credit rating of the issuer.

FIRM BROCHURE

ETNs may be held to maturity, but there are no periodic interest payments and principal is not protected. The fund is subject to the risk that the issuer of the ETN will not fulfill its contractual obligations. The market price of an ETN may be more volatile than the price of the underlying securities. The cost of owning an ETN may exceed the cost of investing directly in the underlying securities. The fund could lose some or the entire amount invested in an ETN. When the fund invests in an ETN, the fund bears its proportionate share of any fees and expenses borne by the ETN.

- **Municipal securities risk.** Municipal issuers may be adversely affected by rising health care costs, increasing unfunded pension liabilities, and by the phasing out of federal programs providing financial support. Unfavorable conditions and developments relating to projects financed with municipal securities can result in lower revenues to issuers of municipal securities. Issuers often depend on revenues from these projects to make principal and interest payments. The value of municipal securities can also be adversely affected by changes in the financial condition of one or more individual municipal issuers or insurers of municipal issuers, regulatory and political developments, tax law changes or other legislative actions, and by uncertainties and public perceptions concerning these and other factors. In recent periods, an increasing number of municipal issuers in the United States have defaulted on obligations and commenced insolvency proceedings. Financial difficulties of municipal issuers may continue or get worse.
- **Non-diversification risk.** Being non-diversified may magnify the fund and underlying fund's losses from adverse events affecting a particular issuer.
- **Sovereign debt risk.** A governmental entity may delay, refuse or be unable to pay interest or principal on its sovereign debt due to cash flow problems, insufficient foreign currency reserves, political considerations, the relative size of the governmental entity's debt position in relation to the economy or the failure to put in place economic reforms. There may be no legal or bankruptcy process for collecting sovereign debt. Emerging markets countries tend to have economic, political and legal systems that are less fully developed and are less stable than those of more advanced countries.
- **Repurchase agreement risk.** In the event that the other party to a repurchase agreement defaults on its obligations, the fund may encounter delay and incur costs before being able to sell the security. Such a delay may involve loss of interest or a decline in price of the security. In addition, if the fund is characterized by a court as an unsecured creditor, it would be at risk of losing some or all of the principal and interest involved in the transaction.
- **U.S. Treasury obligations risk.** The market value of direct obligations of the U.S. Treasury may vary due to changes in interest rates. In addition, changes

to the financial condition or credit rating of the U.S. government may cause the value of the fund's investments in obligations issued by the U.S. Treasury to decline.

- **Risks of investing in insurance-linked securities.** The fund could lose a portion or all of the principal it has invested in an insurance-linked security, and the right to additional interest payments with respect to the security, upon the occurrence of one or more trigger events, as defined within the terms of an insurance-linked security. Trigger events may include natural or other perils of a specific size or magnitude that occur in a designated geographic region during a specified time period, and/or that involve losses or other metrics that exceed a specific amount. Natural perils include disasters such as hurricanes, earthquakes, windstorms, fires, floods and other weather-related occurrences, as well as mortality or longevity events. Non-natural perils include disasters resulting from human-related activity such as commercial and industrial accidents or business interruptions. There is no way to accurately predict whether a trigger event will occur and, accordingly, insurance-linked securities carry significant risk. In addition to the specified trigger events, insurance-linked securities may expose the fund to other risks, including but not limited to issuer (credit) default, adverse regulatory or jurisdictional interpretations and adverse tax consequences. Certain insurance-linked securities may have limited liquidity, or may be illiquid. The fund has limited transparency into the individual contracts underlying certain insurance-linked securities, which may make the risk assessment of such securities more difficult. Certain insurance-linked securities may be difficult to value.
- **Taxable investment risk.** Although distributions of interest income from the fund's tax-exempt securities are generally exempt from regular federal income tax, distributions from other sources, including capital gain distributions, and any gains on the sale of your shares are not. In addition, the interest on the fund's municipal securities could become subject to regular federal income tax or the AMT due to noncompliant conduct by issuers, unfavorable legislation or litigation, or adverse interpretations by regulatory authorities. You should consult a tax adviser about whether the AMT applies to you and about state and local taxes on your fund distributions.
- **Risks of investing in "when-issued," delayed delivery, to be announced and forward commitment transactions.** The market value of these transactions may increase or decrease as a result of changes in interest rates. These transactions involve risk of loss if the value of the underlying security changes unfavorably before the settlement date or if the assets set aside to pay for these securities decline in value prior to the settlement date. Therefore, these transactions may have a leveraging effect on the fund, making the value of an investment in the fund more volatile and increasing the fund's overall investment exposure. There is also a risk that the security will not be issued or

that the other party to the transaction will default on its obligation to purchase or sell the security, which may result in the fund missing the opportunity to obtain a favorable price or yield elsewhere.

- **Structured securities risk.** Structured securities may behave in ways not anticipated by the fund, or they may not receive the tax, accounting or regulatory treatment anticipated by the fund.
- **Synthetic municipal securities risk.** The tax-exempt character of the interest paid on tender option bonds, bond receipts and similar synthetic municipal securities, a type of derivative instrument, is based on the tax-exempt income stream from the collateral. In addition to the risks of investing in municipal securities and in derivatives generally, investments in synthetic municipal securities are subject to the risk that income derived from such securities is deemed to be taxable.
- **Money market fund risks.** You could lose money by investing in the fund. Although the fund seeks to preserve the value of your investment at \$1.00 per share, it cannot guarantee it will do so. An investment in the fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The fund's sponsor has no legal obligation to provide financial support to the fund, and you should not expect that the sponsor will provide financial support to the fund at any time. You should be aware that money market funds have, in the past, "broken the buck," which means that investors did not receive \$1.00 per share for their investment in those funds, and this could happen again. If a money market fund breaks the buck or if money market funds are perceived to be likely to do so, there could be significant redemptions from money market funds, driving market prices of securities down and making it more difficult for the fund to maintain a \$1.00 per share net asset value. In the past, the adviser and its affiliates have reimbursed or otherwise reduced the fund's expenses and the adviser has waived a portion of its management fee in an effort to maintain a net asset value of \$1.00 per share, for the purpose of avoiding a negative yield or increasing the fund's yield. The adviser and its affiliates may, but are not required to, continue to waive and/or reimburse fees in the future. Any such expense reimbursements, reductions or waivers are voluntary and temporary and may be terminated by the adviser at any time without notice. The adviser may not recapture fees and expenses previously waived and/or reimbursed.
- **Yield risk.** The amount of income received by the fund will go up or down depending on day-to-day variations in short-term interest rates, and when interest rates are very low the fund's expenses could absorb all or a significant portion of the fund's income. If interest rates increase, the fund's yield may not increase proportionately. For example, the fund's adviser may discontinue any temporary voluntary fee waivers. In addition, the implementation of the

FIRM BROCHURE

recently adopted requirements for money market funds could have a negative effect on the fund's yield.

- **Redemption risk.** The fund may experience periods of heavy redemptions that could cause the fund to liquidate its assets at inopportune times or at a loss or depressed value, particularly during periods of declining or illiquid markets, and that could affect the fund's ability to maintain a \$1.00 share price. Redemption risk is greater to the extent that the fund has investors with large shareholdings, short investment horizons, or unpredictable cash flow needs. The redemption by one or more large shareholders of their holdings in the fund could cause the remaining shareholders in the fund to lose money. In addition, the fund may suspend redemptions when permitted by applicable regulations.

Please refer to each Domestic Fund's Prospectus and Statement of Additional Information for additional information on a fund's strategies and risks.

Disciplinary Information

Neither Amundi US nor any of its management persons has been subject to any legal or disciplinary events that are material to a client's or prospective client's evaluation of Amundi US's advisory business or the integrity of Amundi US's management.

Other Financial Industry Activities and Affiliations

Amundi US has a number of relationships with related persons that are material to its advisory business or its clients.

Amundi US may appoint sub-advisers for Domestic Funds, and other similarly managed accounts such as private funds and Off-Shore Funds and pay such sub-advisers a portion of the fee received.

Amundi US may, from time to time, change or recommend a change in a sub-adviser for a fund. Amundi US will benefit to the extent that it recommends replacing a sub-adviser with another

FIRM BROCHURE

sub-adviser with a lower sub-advisory fee, or if Amundi US recommends appointing an affiliated sub-adviser.

Securities frequently meet the investment objectives of one or more investment strategies of Amundi US clients. In such cases, the decision to recommend a purchase to one client or fund rather than another is based on a number of factors. In determining which securities to buy or sell for a client and in what amount, Amundi US may consider a variety of factors, including the client's investment objectives and strategies, the client's diversification and liquidity requirements, the size of the client's account, tax implications, the marketability of the securities, the characteristics of the client's account and other relevant factors, such as the size of an available purchase or sale opportunity, the extent to which an available opportunity would represent a meaningful portion of the client's account, and the availability of comparable opportunities. Other factors considered include the amount of securities of the issuer then outstanding, the value of those securities and the market for them. Amundi US may make purchase and sale decisions with respect to a particular client account that may be the same as, or differ from, the recommendations made, or the timing or nature of the action taken, with respect to other accounts.

It is possible that at times identical securities will be held by more than one fund and/or account managed by Amundi US. However, positions in the same issue may vary and the length of time that any fund or account may choose to hold its investment in the same issue may likewise vary. To the extent that multiple clients and/or funds or other clients of Amundi US seek to acquire the same security at about the same time, a fund or client account may not be able to acquire as large a position in such security as is desired or it may have to pay a higher price for the security. Similarly, a fund or client account may not be able to obtain as large an execution of an order to sell or as high a price for any particular portfolio security if Amundi US decides to sell the same portfolio security at the same time on behalf of other funds or accounts. On the other hand, if the same securities are bought or sold at the same time by more than one fund or client account, the resulting participation in volume transactions could produce better executions for the fund or account. In the event more than one fund or account purchases or sells the same security on a given date, the purchases and sales will normally be made as nearly as practicable on a pro rata basis in proportion to the amounts desired to be purchased or sold by such funds or accounts. Although the other funds and accounts managed by Amundi US may have the same or similar investment objectives and policies as another fund or account managed by Amundi US, their portfolios do not generally consist of exactly the same investments and their performance results are likely to differ.

The "Performance-Based Fees and Side-by-Side Management" section of this Brochure provides information on how investment opportunities and trades are allocated in an effort to avoid such conflicts of interest.

Amundi US may recommend investments in securities that also may be owned by its affiliates, officers or employees (either directly or through pooled investment vehicles in which such persons have invested) or clients of related investment advisers of Amundi US.

FIRM BROCHURE

Amundi US has adopted a Conflicts of Interest Policy that is designed to establish a framework for identifying circumstances and relationships that might constitute a conflict of interest and to address these conflicts in a manner that is fair and equitable to Amundi US's clients and to Amundi US and does not disadvantage a client. This policy requires the full disclosure of actual or potential conflicts of interests with clients. If a potential conflict cannot be resolved or eliminated, internal controls will be designed to oversee the conduct or business practice. The conduct or business practice may be discontinued.

Amundi US, Amundi US Inc., Amundi Distributor US, Inc. ("Amundi Distributor US") and Amundi Holdings US, Inc. are indirect wholly owned subsidiaries of Amundi. Amundi has other subsidiaries that are engaged in the investment management business that are not registered as investment advisers under the Investment Advisers Act.

Amundi Distributor US, a wholly owned subsidiary of Amundi US Inc., is a broker-dealer registered with the SEC and is a member of the Financial Industry Regulatory Authority. Amundi Distributor US primarily is engaged in the marketing and sale of mutual funds and receives compensation from the Funds for such services. Amundi Distributor US is the principal underwriter of the Domestic Funds.

Pursuant to a participating affiliate agreement between Amundi US and its affiliates, Amundi Asset Management, Amundi Intermediation, and Amundi Intermediation Asia, PTE Ltd. (collectively, "Amundi"), Amundi provides certain administrative, investment management and trading services to Amundi US with respect to a client account, including the services of Amundi's research, portfolio management, compliance and trading staff. Amundi is engaged in an investment advisory business outside the United States.

In connection with the provision of services to Amundi US, each affiliate has appointed the SEC as its agent for service of process within the jurisdiction of the United States. Amundi US and each affiliate is operating under the applicable participating affiliate arrangement in reliance upon the Royal Bank of Canada No-Action Letter, dated June 3, 1998 and other related no-action letters.

Amundi has other subsidiaries that are engaged in the banking and insurance businesses in numerous countries. Amundi's portfolio management activity is organized at a local level. In addition to the portfolio management activity of Amundi US in Boston and Durham, NC, Amundi conducts portfolio management operations in numerous countries. Amundi and its subsidiaries may own investment securities, and from time to time, Amundi US will make an investment decision on behalf of its clients to purchase or sell a security in which Amundi or one of its other subsidiaries has positions or interests subject to applicable law. Amundi US's portfolio managers operate separately and independently of any portfolio managers that make decisions to purchase and sell securities on behalf of Amundi. It is Amundi US's policy not to purchase or sell securities on behalf of clients based on any position or interest that Amundi or other subsidiaries may have in such securities.

FIRM BROCHURE

Amundi has joint venture investments in other entities, any of which may be considered affiliated companies or related persons of Amundi US (“Amundi Affiliates”). Certain of these Amundi Affiliates are involved in international venture capital and others provide investment advice and/or make investments in securities for their own or client accounts. Subject to applicable law, Amundi US may purchase or sell for, or recommend for purchase or sale by, a client account securities that such Amundi Affiliates may own, directly or indirectly. Additionally, affiliated advisers may recommend to their clients, or invest on behalf of their clients in securities that are the subject of recommendations to, or discretionary trading on behalf of, Amundi US’s U.S.–based clients. While each of these entities may act independently from Amundi US with respect to making investment decisions for client accounts or, if applicable, for a proprietary account, investment information and data is exchanged between or among Amundi US and some or all of such Amundi Affiliates.

In contrast to the portfolio management activities described above, Amundi has research activities globally. Research is communicated via email to global investment staff, including investment personnel of Amundi US. All documents are emailed and housed in a proprietary document management system for real-time communication of research to all members of investment management on a global basis. Research is communicated throughout the organization, giving portfolio managers the opportunity to react accordingly.

Code of Ethics, Participation or Interest in Client Transactions and Personal Trading
--

Amundi US has adopted a Code of Ethics pursuant to Rule 204A-1 under the Investment Advisers Act. Among other things, Amundi US’s Code of Ethics requires supervised persons of Amundi US to comply with federal securities laws, and to adhere to certain standards of business conduct that reflect Amundi US’s fiduciary obligations to its clients. In addition, supervised persons of Amundi US who participate in or have access to investment decisions on behalf of Amundi US’s clients must report his or her personal securities transactions and holdings to Amundi US, pre-clear certain transactions with Amundi US’s Compliance Department, and refrain from engaging in certain investment activities. To the extent Amundi US retains a sub-adviser with respect to any account under its management, Amundi US requires that such sub-adviser adopt a code of ethics that complies with the requirements of Rule 204A-1 under the Investment Advisers Act.

One of the key objectives of the Amundi US Code of Ethics is to prevent personal trades by Amundi US officers and employees based on information about securities transactions made for advisory clients. Each officer or employee with access to advisory client information must obtain pre-clearance for all reportable securities transactions in his or her personal accounts, (“Access Person”).

Each Amundi US employee must observe the following fiduciary principles with respect to his or her personal investment activities:

- At all times, each Amundi US employee must place the interests of advisory clients first;

FIRM BROCHURE

- Personal securities transactions of employees must be conducted in a manner designed to avoid actual or potential conflicts of interest with the interests of any advisory client or any abuse of the employee's position of trust and responsibility; and
- Each Amundi US employee must avoid actions or activities that would allow him or her to inappropriately profit or benefit from his or her position at Amundi US, or that otherwise brings into question the employee's independence or judgment.

A copy of the Code of Ethics will be provided to any client or prospective client upon request.

Brokerage Practices

Subject to any directed brokerage arrangements, it is the policy of Amundi US to select brokers or counterparties to execute client transactions in a manner that is consistent with the fiduciary obligations of Amundi US to the client for whom the transaction is being executed, and to employ a trading process that attempts to maximize the value of a client's portfolio within the client's stated investment objectives and constraints. The policy embodies the obligation of an adviser to seek what is commonly referred to as "best execution." Best execution means that the total costs or proceeds to a client are the most favorable under the circumstances. Best execution does not mean that Amundi US must obtain the lowest possible commission cost (or markup or markdown), but rather means that Amundi US should seek to obtain the best overall qualitative execution for the client.

Amundi US will place orders pursuant to its investment determinations for each client either directly with the issuer or with any broker or dealer, foreign currency dealer, futures commission merchant or others selected by it. Amundi US will seek the best overall execution available in the selection of brokers or dealers or counterparties and the placing of orders for each client. In assessing the best execution available for any transaction, Amundi US may consider factors it deems relevant, including the size and type of the transaction, the nature and character of the markets for the security to be purchased or sold, the execution capabilities and financial condition of the broker or dealer or counterparty, and the reasonableness of the commission or dealer spread, if any (whether for a specific transaction or on a continuing basis).

In connection with the selection of such brokers or dealers and the placing of such orders, subject to applicable law, brokers or dealers may be selected who also provide brokerage and research services (as those terms are defined in Section 28(e) of the Securities Exchange Act of 1934, as amended (the "Exchange Act")) ("soft dollar benefits") to the client and/or the other accounts over which Amundi US or its affiliates exercise investment discretion. Consistent with Section 28(e), if Amundi US determines in good faith that the amount of commissions charged by a broker-dealer is reasonable in relation to the value of the brokerage and research services provided by the broker-dealer, a client may pay commissions (or markups or markdowns) to the broker-dealer in an amount greater than the amount another firm may charge. These services

FIRM BROCHURE

may include advice concerning the value of securities; the advisability of investing in, purchasing or selling securities; the availability of securities or the purchasers or sellers of securities; providing stock quotation services, credit rating service information and comparative fund statistics; furnishing analyses, electronic information services, manuals and reports concerning issuers, industries, securities, economic factors and trends, portfolio strategy, and performance of accounts and particular investment decisions; and effecting securities transactions and performing functions incidental thereto (such as clearance and settlement). Amundi US benefits when it uses client brokerage commissions (or markups or markdowns) to obtain research or other services that it would otherwise have to produce or purchase.

Amundi US maintains a listing of broker-dealers who provide such services on a regular basis. However, because many transactions on behalf of a client and other investment companies or accounts managed by Amundi US are placed with broker-dealers (including broker-dealers on the listing) without regard to the furnishing of such services, it is not possible to estimate the proportion of such transactions directed to such broker-dealers solely because such services were provided. Amundi US believes that no exact dollar value can be calculated for such services.

The research received from broker-dealers may be useful to Amundi US in rendering investment management services to the client whose account generated the soft dollar benefit, as well as other investment companies or other accounts managed by Amundi US, although not all such research may be useful to a client. Conversely, such information provided by brokers or dealers who have executed transaction orders on behalf of such other accounts may be useful to Amundi US in carrying out its obligations to a client. The receipt of such research enables Amundi US to avoid the additional expenses that might otherwise be incurred if it were to attempt to develop comparable information through its own staff. Amundi US will seek to allocate soft dollar benefits to client accounts proportionately to the soft dollar credits the accounts generate.

Promotional or sales efforts provided or conducted by broker-dealers are not considered in the selection of broker-dealers.

Certain brokerage and research services also may assist Amundi US beyond the investment decision-making process. In such instances, Amundi US will determine the portion of such brokerage and research not used in the investment decision-making process and will pay for such portion out of its own funds. Amundi US maintains a list of broker-dealers that regularly provide these services. However, because many transactions on behalf of accounts managed by Amundi US are placed with broker-dealers (including broker-dealers on the list) without regard to the furnishing of additional services, it is not possible to estimate the proportion of transactions directed to broker-dealers solely because they provide other services.

Certain accounts may have directed brokerage arrangements or other limitations that restrict Amundi US's ability to aggregate orders for such accounts with orders for other accounts and provide best execution. In those cases, Amundi US will make an effort to obtain prices comparable to those obtained for unrestricted accounts; however, trades for restricted accounts will generally occur after trades for unrestricted accounts. Trades will be prioritized among restricted accounts in a fair and equitable manner. In directed brokerage arrangements, Amundi

FIRM BROCHURE

US may not be in a position to negotiate freely commission rates or spreads, obtain volume discounts on aggregated orders or select broker/dealer on the basis of best price and execution, and, as a result, the directed brokerage transactions may result in higher commissions, greater spreads or less favorable execution on some transactions than would be the case if Amundi US were free to choose the broker/dealer. Amundi US does not engage in activities such as directing brokerage to a broker-dealer who either has made a referral or has been designated by a solicitor.

Amundi US may aggregate orders to purchase or sell the same security for multiple accounts if permitted by a client. Whenever Amundi US aggregates orders, all accounts that participate in the transaction will participate on a pro rata or other objective basis. To the extent that orders are not aggregated, clients may not receive the same transaction price and transaction costs may be higher. Please see “Side by Side Management” and “Other Financial Industry Activities and Affiliations” for information on conflicts of interest.

It is the policy of Amundi US to promptly and efficiently correct trade errors that occur during the course of trading securities on behalf of client accounts. As an investment adviser, Amundi US has a fiduciary duty to each client to exercise the utmost care in implementing investment decisions on behalf of clients and to place trades correctly for such clients. However, in the course of trading for client accounts, it is possible that trading errors will occur from time to time. When such an error occurs, Amundi US seeks to place the client account in the same position as it would have been had there been none. Amundi US will reimburse the client for any loss in connection with a trade error to the extent required by law or Amundi US’ fiduciary obligations.

Cross trading generally refers to the practice by which Amundi US causes an account to buy or sell securities from or to another account. Amundi US will only engage in a cross trade where it has determined that such trade is in the best interests of each account and is otherwise consistent with Amundi US’s fiduciary duty to each account. Amundi US may trade securities between accounts for a variety of reasons, including, to manage cash flows; to maintain appropriate compositions and weightings; where securities owned by one account subsequently become less appropriate for that account and more appropriate for a different account; or other instances where portfolio management requirements indicate that accounts will be buying and selling the same securities and the purchase and sale decision is made independently for each account.

However, cross trades can be affected in a manner that may be perceived to favor one account over another. For instance, an investment adviser may be viewed as crossing securities that are expected to increase in value from accounts paying lower fees to accounts paying higher fees (e.g., performance-based fees) or to investment companies of which the investment performance is important to the marketing of shares of such investment companies. Conversely, an investment adviser may be perceived as crossing securities that are expected to decrease in value from accounts paying higher performance-based fees to accounts paying lower performance-based fees.

In effecting cross trades, Amundi US is subject to the rules and regulations applicable to its activities as a registered investment adviser and the rules and regulations applicable to its accounts, such as the Investment Advisers Act of 1940, Investment Company Act, The

FIRM BROCHURE

Employee Retirement Income Security Act of 1974 (“ERISA”) and the rules and regulations of certain foreign regulatory authorities, where applicable. The portions of this policy required by Rule 17a-7 under the Investment Company Act, constitutes the procedure required under Rule 17a-7 for the Domestic Funds managed by Amundi US.

Amundi US may enter into transactions for clients with affiliated funds or other clients (known as “crossing securities” or “cross trades”), subject to applicable law. Amundi US believes that the potential benefit to client accounts that may result from crossing securities outweighs the potential risks. Cross trades are effected pursuant to procedures established by Amundi US. Amundi US will cross securities between client accounts where possible if it is in the best interests of the account.

All cross trades are properly categorized as such on Amundi US’s trade management system. Each cross trade is reported on a quarterly basis to the global compliance department and upon request to a respective client.

Review of Accounts

The investment management functions of Amundi US are organized into three main areas: portfolio management, research (which includes fundamental research, quantitative research and investment risk) and trading.

Management of the Amundi US portfolios is grouped into teams according to common elements of market, style and objective (e.g., international equity, domestic equity (comprised of small company investment, large and mid-cap value and growth investments, and core investments) and fixed income). Each team consists of investment professionals who meet regularly to discuss holdings, prospective investments and portfolio composition. Day-to-day management of a portfolio is the responsibility of a designated portfolio manager or team of portfolio managers.

Accounts also are reviewed by Amundi US’s Investment Committee, which meets monthly to:

- Review and evaluate investment performance;
- Review and approve the development, modification and use of investment strategies, techniques and instruments;
- Review and evaluate the feasibility of all product-related proposals, including investment capability and allocation of resources; and
- Review and address investment-related compliance matters.

In addition, Amundi US’s Risk Department provides an ongoing review of the investment activities with respect to each client account in an effort to ensure that the assets of such account are managed in conformity with investment guidelines applicable to the account.

FIRM BROCHURE

The Risk Department monitors investments using an automated compliance tool. In general, equity orders are tested before execution of a transaction. For the majority of transactions fixed income trades are tested for compliance with investment guidelines on a pre-trade basis. There are instances, however, where due to the purchased security, or the trade being transacted via a phone call, compliance is monitored immediately after execution of a transaction on a pre-allocation basis. We also conduct nightly fixed income checks on all accounts (“batch monitoring”).

Certain fixed income trades are reviewed for immediate post-execution compliance on trade date. Trades are required to be entered into the order management system, which will run the compliance checks within two hours of execution. As most securities are purchased in blocks (including allotments for other commonly managed accounts), any purchase that will cause the portfolio with a limit to be out of compliance is not allowed to proceed further in the trade flow.

Investment limitations that cannot be tested by the automated compliance system normally are monitored manually.

As noted above, individuals employed by Amundi Ireland may provide administrative and portfolio management services to certain of Amundi US’s clients using a similar research and portfolio management structure as that employed by Amundi US.

Members of the portfolio management teams for each of the Domestic Funds regularly report to the Boards of Trustees of the Domestic Funds regarding the Funds’ performance. In addition, each of the Domestic Funds provides shareholders with a semi-annual written report containing performance and financial information, as required by applicable law. The Domestic Funds also file with the SEC an annual report regarding the Funds’ proxy voting records and a quarterly report regarding the Funds’ portfolio holdings.

Audited financial statements of private funds will generally be prepared and delivered to shareholders within 120 days or as soon thereafter as is reasonably practicable following the close of each fiscal year. Each shareholder is provided with unaudited performance information and account statements at least monthly. Unless otherwise restricted by law, all reports, financial statements, and other information may be delivered to shareholders electronically.

Client Referrals and Other Compensation
--

Amundi US does not utilize or pay for external marketers in connection with solicitation with respect to the Off-Shore Funds.

Amundi US may enter into agreements with firms to direct clients to Amundi US for non-Public Fund institutional advisory management services subject to the requirements of Rule 206(4)-3 under the Investment Advisers Act. Amundi US intends to pay for such services generally as a percentage of new assets managed. The clients of Amundi US are not charged for any fees paid to such firms.

FIRM BROCHURE

Affiliates of Amundi US (“Amundi US Affiliates”) make revenue sharing payments as incentives to certain financial intermediaries to promote and sell shares of the Domestic Funds. The benefits Amundi US Affiliates receive when they make these payments include, among other things, entry into or increased visibility in the financial intermediary’s sales system, participation by the intermediary in the distributor’s marketing efforts (such as helping facilitate or providing financial assistance for conferences, seminars or other programs at which Amundi US personnel may make presentations on the funds to the intermediary’s sales force), placement on the financial intermediary’s preferred fund list, and access (in some cases, on a preferential basis over other competitors) to individual members of the financial intermediary’s sales force or management. Revenue sharing payments are sometimes referred to as “shelf space” payments because the payments compensate the financial intermediary for including the Domestic Funds in its fund sales system (on its “shelf space”). Amundi US Affiliates compensate financial intermediaries differently depending typically on the level and/or type of considerations provided by the financial intermediary. The revenue sharing payments Amundi US Affiliates make may be calculated on sales of shares of the Domestic Funds (“Sales-Based Payments”); although there is no policy limiting the amount of Sales-Based Payments any one financial intermediary may receive, the total amount of such payments normally does not exceed 0.25% per annum of those assets. Such payments also may be calculated on the average daily net assets of the applicable Domestic Funds attributable to that particular financial intermediary (“Asset-Based Payments”); although there is no policy limiting the amount of Asset-Based Payments any one financial intermediary may receive, the total amount of such payments normally does not exceed 0.16% per annum of those assets. Sales-Based Payments primarily create incentives to make new sales of shares of the Domestic Funds and Asset-Based Payments primarily create incentives to retain previously sold shares of the Domestic Funds in investor accounts. Amundi US Affiliates may pay a financial intermediary either or both Sales-Based Payments and Asset-Based Payments.

Amundi US Affiliates also may make payments to certain financial intermediaries that sell Domestic Fund shares for certain administrative services, including record keeping and sub-accounting for shareholder accounts, to the extent that the funds do not pay for these costs directly. Amundi US Affiliates also may make payments to certain financial intermediaries that sell the Domestic Fund shares in connection with client account maintenance support, statement preparation and transaction processing. The types of payments that Amundi US Affiliates may make under this category include, among others, payment of ticket charges per purchase or exchange order placed by a financial intermediary, payment of networking fees in connection with certain mutual fund trading systems, or one-time payments for ancillary services such as setting up funds on a financial intermediary’s mutual fund trading system.

From time to time, Amundi US Affiliates, at their expense, may provide additional compensation to financial intermediaries that sell or arrange for the sale of shares of the Domestic Funds. Such compensation provided by Amundi US Affiliates may include financial assistance to financial intermediaries that enable Amundi US Affiliates to participate in and/or present at conferences or seminars, sales or training programs for invited registered representatives and other employees, client entertainment, client and investor events, and other financial intermediary-sponsored events, and travel expenses, including lodging incurred by registered representatives and other

FIRM BROCHURE

employees in connection with client prospecting, retention and due diligence trips. Other compensation may be offered to the extent not prohibited by federal or state laws or any self-regulatory agency, such as FINRA. Amundi US Affiliates make payments for entertainment events they deem appropriate, subject to Amundi US Affiliates' guidelines and applicable law. These payments may vary depending upon the nature of the event or the relationship.

As of January 1, 2021, Amundi US anticipates that the following broker-dealers or their affiliates will receive additional payments as described in the Domestic Funds' prospectuses and statements of additional information:

Advisor Group	ADP Retirement Group	AIG

Custody

Amundi US does not maintain physical custody over client assets. Amundi US does not have the ability to deduct fees directly from client accounts.

Because Amundi US serves as managing member or investment manager of certain Amundi US sponsored private funds, and because Amundi US officers serve as directors of certain of these private funds, Amundi US is deemed to have custody over these private funds within the meaning of Rule 206(4)-2 under the Investment Advisers Act. To comply with Rule 206(4)-2, each investor in the private fund receives audited financial statements within 120 days following the private fund's fiscal year end. Investors in an Amundi US sponsored private fund should review their fund's audited financial statements carefully. Investors in an Amundi US sponsored private fund who have not received audited financial statements timely should please contact Amundi US. At least monthly, the fund administrator provides net asset value statements to

FIRM BROCHURE

investors in Amundi US sponsored private funds. As a courtesy, Amundi US provides investors in Amundi US sponsored private funds with written monthly reports.

Amundi US is also deemed to have custody of certain client assets because an affiliate under common management with Amundi US maintains custody of the assets of certain accounts managed by Amundi US on behalf of its clients. This affiliate operates independently from Amundi US. Advisory personnel for Amundi US do not hold any position with the affiliate or share a location with the affiliate.

Investment Discretion

As an investment adviser primarily to open and closed-end mutual funds, Amundi US has discretionary authority to purchase securities on behalf of such Domestic Funds. Amundi US's investment decisions with respect to the Domestic Funds are limited by Investment Company Act rules as well as other rules and restrictions that are set forth in each Fund's prospectus and statement of additional information. In order for Amundi US to remain the investment adviser of each Domestic Fund, the Trustees of the Fund must determine annually whether to renew the investment advisory agreement for the Fund.

With respect to accounts other than Domestic Funds, Amundi US usually receives discretionary authority from the client at the outset of an advisory relationship to select the identity and amount of securities to be bought or sold. In all cases, however, such discretion is to be exercised in a manner consistent with the stated investment objectives for the particular account and the investment advisory agreement for such client. Amundi US requires an executed management agreement before assuming discretionary investment authority.

Investment guidelines and restrictions must be provided to Amundi US in writing.

Voting Client Securities

Amundi US has adopted policies and procedures concerning the voting of proxies on behalf of client accounts.

When delegating proxy-voting authority for a client, Amundi US will vote proxies presented in a timely manner in a manner consistent with the best interest of its clients. Amundi US's sole concern in voting proxies is the economic effect of the proposal on the value of portfolio holdings. Amundi US's proxy voting policies and procedures are designed to complement Amundi US's policies and procedures regarding its general responsibility to monitor the performance and/or corporate events of companies that are issuers of securities held in accounts managed by Amundi US. Amundi US's proxy voting policies summarize Amundi US's position on a number of issues solicited by companies held by Amundi US's clients. The policies are

FIRM BROCHURE

guidelines that provide a general indication on how Amundi US would vote but do not include all potential voting scenarios.

The overriding goal is that all proxies for US and non-US companies that are received promptly will be voted in accordance with Amundi US's policies or specific client instructions. All shares of an issuer held by accounts managed by Amundi US will be voted alike, unless a client has given Amundi US specific voting instructions on an issue or Amundi US determines that the circumstances justify a different approach.

Amundi US has engaged an independent proxy voting service to assist in the voting of securities. The proxy voting service works with the custodians to ensure all proxy materials are received by the custodians and processed in a timely manner. To the extent applicable, the proxy voting service votes all proxies in accordance with Amundi US's proxy voting guidelines. The proxy voting procedures describe circumstances in which the proxy voting service will refer proxy questions to Amundi US.

Amundi US addresses potential material conflicts of interest by having a predetermined proxy voting policy. A Proxy Voting Oversight Group along with a Proxy Coordinator is responsible for monitoring potential conflicts of interest in connection with the voting of proxies on behalf of Amundi US clients.

Any associate involved in the proxy voting process with knowledge of any apparent or actual conflict of interest must disclose such conflict to the Proxy Coordinator and the Chief Compliance Officer of Amundi US and Funds. The Proxy Voting Oversight Group will review each item referred to Amundi US by the proxy voting service to determine whether an actual or potential conflict of interest with Amundi US exists in connection with the proposal(s) to be voted upon. The review will be conducted by comparing the apparent parties affected by the proxy proposal being voted upon against the Proxy Coordinator's and Compliance Department's internal list of interested persons and, for any matches found, evaluating the anticipated magnitude and possible probability of any conflict of interest being present. For each referral item, the determination regarding the presence or absence of any actual or potential conflict of interest will be documented in a Conflicts of Interest Report prepared by the Proxy Coordinator.

Clients may review Amundi US's proxy voting policies and procedures online at <https://www.amundi.com/usinvestors/Local-Content/Footer/Proxy-Voting/Proxy-Voting>.

Clients also may request a copy of applicable voting records by contacting Amundi US. Information regarding how a Domestic Fund voted proxies relating to portfolio securities during the most recent twelve-month period ended June 30 also is publicly available to shareowners without charge at <https://amundi.com/USInvestors> and on the SEC's website at <http://www.sec.gov>.

Financial Information

Amundi US does not have a financial condition that is reasonably likely to impair its ability to meet contractual commitments to clients. Amundi US has not been the subject of a bankruptcy proceeding.

Business Continuity

Amundi US has implemented a Business Continuity policy that describes the firm's program to respond to a significant business disruption or other failure in its ability to continue to conduct business or meet its obligations to its clients. As a subsidiary of Amundi US, Inc., Amundi US is included in Amundi US, Inc.'s Business Continuity Plan ("BCP Plan"). The BCP Plan, which is maintained by Amundi US's Risk Management Department, is updated upon any material change to Amundi US, Inc.'s operations, structure, business, or location and distributed to the Management Committee of Amundi US at least annually.

The BCP Plan is based on an assessment of the following: identification of significant business disruptions; description of Amundi US's mission-critical operations; and description or assessment of Amundi US's operational risk, such as loss of communication systems, loss of access to, or total loss of, paper, books and records, loss of access to electronic records, loss of access to the building, or loss of personnel. The Business Continuity policy summarizes key elements of the BCP Plan.

The firm contracts with SunGard to provide a redundant data center that includes recovery of all operations and critical systems, including trading and accounting systems, key network files, and email systems. This facility is augmented with remote access to all mission critical systems capabilities for the firm's staff. The firm conducts business-wide operational tests of the facility, including with fixed income and equity trading, operations and compliance staff, supported by technology and general service teams twice annually.

Privacy

Amundi US has adopted policies and procedures relating to the collection of confidential client information in accordance with Regulation S-P. A copy of the privacy notice is available on request and will be offered to clients annually as required by Regulation S-P.
