**PART 2A - APPENDIX 1
WRAP FEE PROGRAM BROCHURE**

This brochure provides information about the qualifications and business practices of Paulson Wealth Management Inc. If you have any questions about the contents of this brochure, contact us at 630-517-2950. The information in this brochure has not been approved or verified by the United States Securities and Exchange Commission or by any state securities authority.

Additional information about Paulson Wealth Management Inc. is available on the SEC's website at www.adviserinfo.sec.gov. Our searchable IARD/CRD # is 150374.

Paulson Wealth Management Inc. is a registered investment adviser. Registration with the United States Securities and Exchange Commission or any state securities authority does not imply a certain level of skill or training.

Item 2 Summary of Material Changes

Form ADV Part 2 requires registered investment advisers to amend their brochure when information becomes materially inaccurate. If there are any material changes to an adviser's disclosure brochure, the adviser is required to notify you and provide you with a description of the material changes.

Since the filing of our last annual updating amendment, dated March 7, 2020, we have the following material change to report:

- We have updated the annual fee schedule for Fixed Income Portfolio under the *Services, Fees, and Compensation* section. This fee schedule was previously referenced as 'Non-Discretion Portfolios', but has since been updated.
- The *Account Requirements and Types of Clients* section has been updated to reflect the non-negotiable minimum balance of \$1,000,000 for fixed income accounts participating in comprehensive portfolio management that is generally required to be maintained throughout the course of the client's relationship with the firm.
- We updated the *Portfolio Manager Selection and Evaluation* section to add a disclosure related to margin and the associated risks. We utilize margin when implementing option spread strategies.
- The *Client Referrals and Other Compensation* sub-section under the *Additional Information* section has been updated to remove the disclosure related to additional compensation arrangements with employees of the firm. We do not compensate any individual or firm for client referrals.

If you have questions or if you would like to receive a copy of our most recent disclosure brochure at any time without charge, please contact us at (630) 517-2950 or email at npaulson@paulsonwealth.com.

Item 4 Services, Fees, and Compensation

Description of Firm

Paulson Wealth Management Inc. is a registered investment adviser primarily based in Wheaton, Illinois. We are organized as a corporation under the laws of the State of Delaware. We have been providing investment advisory services since 2009. We are owned by Nathan Robert Paulson.

The following paragraphs describe our services and fees. Refer to the description of each investment advisory service listed below for information on how we tailor our advisory services to your individual needs. As used in this brochure, the words "we," "our," and "us" refer to Paulson Wealth Management Inc. and the words "you," "your," and "client" refer to you as either a client or prospective client of our firm. Also, you may see the term Associated Person in this brochure. Our Associated Persons are our firm's officers, employees, and all individuals providing investment advice on behalf of our firm.

We offer portfolio management services through a wrap-fee program ("Program") as described in this wrap fee program brochure to prospective and existing clients. We are the sponsor and investment adviser for the Program. A wrap-fee program is a type of investment program that provides clients with asset management and brokerage services for one all-inclusive fee. If you participate in our wrap fee program, you will pay our firm an annual advisory fee while we absorb the asset based program fee charged by the custodian. You will pay our firm a single fee, which includes money management fees, certain transaction costs, and custodial and administrative costs. You are not charged separate fees for the respective components of the total services. The overall cost you will incur if you participate in our wrap fee program may be higher or lower than you might incur by separately purchasing the types of securities available in the Program.

Client Investment Process

Our comprehensive portfolio management service encompasses asset management as well as providing financial planning/financial consulting to clients. While financial planning and consulting services are offered as a stand-alone service as described below for non-management clients, financial planning and consulting services are incidental to and included in the fees for our comprehensive portfolio management services. Our comprehensive portfolio management services are designed to assist clients in meeting their financial goals through the use of financial investments. We conduct at least one, but sometimes more than one meeting (in person if possible, otherwise via telephone conference) with clients in order to understand their current financial situation, existing resources, financial goals, and tolerance for risk. Based on what we learn, we propose an investment approach to the client. Upon the client's agreement to the proposed investment plan, we work with the client to establish or transfer investment accounts so that we can manage the client's portfolio. Once the relevant accounts are under our management, we regularly review these accounts at least quarterly. We may periodically rebalance or adjust client accounts under our management. If the client experiences any significant changes to his/her financial or personal circumstances, the client must notify us so that we can consider such information in managing the client's investments.

The Program is generally offered to clients for whom we recommend an options or active trading strategy in the equity portfolio described below. Other strategies are offered under a non-wrap program, as described in our firm's Form ADV Part 2A. Prior to becoming a client under the Program, you will be required to enter into a separate written agreement with us that sets forth the terms and conditions of the engagement and describes the scope of the services to be provided, and the fees to be paid.

Equity Portfolio

Our principal objective in the equity portfolio is to achieve higher risk-adjusted returns than the MSCI All Country World Index Series ("MSCI All Country World"), a composite of over 2,700 large and mid-cap global stocks, over a broad market cycle. MSCI All Country World is divided into developing and emerging market segments and represents 90-95% of investable market capitalization worldwide. The equity portfolio will typically be comprised of 5-20 equity index ETFs and/or individual equity positions. Any one position will not be greater than 20% of the portfolio. The use of equity index ETFs provides for significant securities diversification, while not excluding sector or industry concentration. Typically, the equity portfolio may possess 20-40 percent ex-US equity exposure. The allocation of the equity portfolio is determined by a top-down, risk-weighted approach, coupled with a market cap rotation overlay.

The base allocation of the equity portfolio is an equal weighted basket of 5 major equity indices. Based on internal and external research and analysis of the macro world economy and capital markets, this base allocation is adjusted to optimize the targeted risk-adjusted return properties of the portfolio. We accomplish this tailoring via overweighting or under weighting market capitalization and regional exposure. Additional indices may be added to tactically adjust the style box exposure of the portfolio.

Our firm believes strongly that superior compounding of returns over time can be achieved through a disciplined covered call writing strategy against some or all of the positions in the portfolio. To implement this call writing strategy, our firm employs a dynamic proprietary algorithm to determine the options to be traded. Our firm anticipates that the benefits of the premium income received via its options writing strategy outweigh the possible capital appreciation foregone. On occasion, our firm may attempt to enhance the total return of the portfolio through covering the options written prior to expiration or by buying put options depending on market liquidity and volatility conditions.

Balanced Portfolio

The primary objective of the balanced portfolio is to further refine the risk/return profile of the equity portfolio to fit each client's investment goals and risk tolerance. The balanced portfolio is compared to market benchmarks with a similar composition. The equity portion of the balanced portfolio is constructed and managed using the same methodology as the equity portfolio previously discussed. Fixed income and cash are used in the balanced portfolio primarily as a volatility reducing mechanism, not an asset class return maximization tool. Therefore, the fixed income portfolio generally is comprised of highly rated investment grade municipal, government agency, and corporate bonds or their equivalent fixed income ETFs. Securities within the fixed income portfolio are selected based upon our firms' interest rate assumptions, credit risk, yield curve and several macroeconomic variables that impact the performance of the bonds.

Assets for program accounts are held at TD Ameritrade as custodian. TD Ameritrade also acts as executing broker/dealer for transactions placed in Program accounts, and provides other administrative services as described throughout this Brochure. To compare the cost of the wrap fee program with non-wrap fee portfolio management services, you should consider the frequency of trading activity associated with our investment strategies and the brokerage commissions charged by TD Ameritrade and the advisory fees charged by investment advisers.

Changes in Your Financial Circumstances

In providing the contracted services, we are not required to verify any information we receive from you or from your other professionals (e.g., attorney, accountant, etc.) and we are expressly authorized to rely on the information you provide. Furthermore, unless you indicate to the contrary, we shall assume that there are no restrictions on our services, other than to manage your account in accordance with your designated investment objectives, risk tolerance, and time horizon (collectively, "investment

parameters"). It is your responsibility to promptly notify us if there are ever any changes in your financial situation or investment parameters for the purpose of reviewing, evaluating, and/or revising our previous recommendations and services.

The Program Fee

We charge an annual "wrap-fee" for participation in the Program depending upon the market value of your assets under our management. You are not charged separate fees for the different components of the services provided by the Program. Our firm pays all the asset based trading expenses on your behalf. Assets in each of your account(s) are included in the fee assessment unless specifically identified in writing for exclusion. Our fees are generally not negotiable. In special circumstances, and in our sole discretion, we may negotiate a lesser management fee based upon certain criteria (i.e., anticipated future earning capacity, dollar amount of assets to be managed, related accounts, account composition, pre-existing client relationship, account retention, etc.).

Our Program fee for Equity Balanced Portfolios is based on a percentage of the assets in your account and is set forth in the following annual fee schedule:

Annual Fee Schedule for Equity and Balanced Portfolios

Assets Under Management	Annual Fee
First \$500,000	1.50%
Next \$500,000	1.15%
Next \$4,000,000	1.00%
Above \$5,000,000	0.75%

Our Program fee for Fixed Income Portfolios is based on a percentage of the assets in your account and is set forth in the following annual fee schedule:

Annual Fee Schedule for Fixed Income Portfolios*

Assets Under Management	Annual Fee
First \$2,000,000	0.50%
Next \$3,000,000	0.35%
Next \$5,000,000	0.30%
Above \$10,000,000	0.25%

*We require a minimum balance of \$1,000,000 for our Fixed Income Portfolios service.

Our firm's fees are billed on a pro-rata annualized basis quarterly in advance based on the value of your account on the last day of the previous quarter.

If the wrap fee program agreement is executed at any time other than the first day of a calendar quarter, our fees will apply on a pro rata basis, which means that the advisory fee is payable in proportion to the number of days in the quarter for which you are a client.

As a client, you should be aware that the wrap fee charged by our firm may be higher (or lower) than those charged by others in the industry, and that it may be possible to obtain the same or similar services from other firms at lower (or higher) rates. A client may be able to obtain some or all of the

types of services available through our firm's wrap fee program on an individual basis through other firms and, depending on the circumstances, the aggregate of any separately paid fees may be lower or higher than the annual fees shown above.

At our discretion, we may combine the account values of family members living in the same household to determine the applicable advisory fee. For example, we may combine account values for you and your minor children, joint accounts with your spouse, and other types of related accounts. Combining account values may increase the asset total, which may result in your paying a reduced advisory fee based on the available breakpoints in our fee schedule stated above.

Withdrawal of Assets

You may withdraw account assets on notice to our firm, and subject to the usual and customary securities settlement procedures. However, we design our portfolios as long-term investments and asset withdrawals may impair the achievement of your specific investment objectives.

Payment of Fees

Fees will be automatically deducted from your managed account. As part of this process, you understand and acknowledge the following:

- Your independent custodian sends statements at least quarterly to you showing all disbursements for your account, including the amount of the advisory fees paid to us;
- You provide authorization permitting us to be directly paid by these terms; and
- If we send a copy of our invoice to you, we send a copy of our invoice to the independent custodian at the same time we send the invoice to you.

We encourage you to reconcile our invoices with the statement(s) you receive from the qualified custodian. If you find any inconsistent information between our invoice and the statement(s) you receive from the qualified custodian call our main office number located on the cover page of this brochure.

Termination of Advisory Relationship

We charge our advisory fees quarterly in advance. In the event that you wish to terminate the wrap fee program agreement, we will refund the unearned portion of our advisory fee to you. You need to contact us in writing at least one business day in advance and state that you wish to terminate our services. Upon receipt of your letter of termination, we will proceed to close out your account and process a pro-rata refund of unearned advisory fees based on the number of days for which you were a client during the relevant calendar quarter prior to termination.

Upon termination of accounts held at TD Ameritrade, they will deliver securities and funds held in the account per your instructions unless you request that the account be liquidated. After the wrap fee program agreement has been terminated, transactions are processed at the prevailing brokerage rates/fees. You become responsible for monitoring your own assets and our firm has no further obligation to act upon or to provide advice with respect to those assets.

Wrap Fee Program Disclosures

- The benefits under a wrap fee program depend, in part, upon the size of the Account, the management fee charged, and the number of transactions likely to be generated in the Account. For example, a wrap fee program may not be suitable for Accounts with little trading activity. In order to evaluate whether a wrap fee program is suitable for you, you should compare the Program Fee and any other costs of the Program with the amounts that would be charged by other advisers, broker-dealers, and custodians, for advisory fees, brokerage and other execution costs, and custodial services comparable to those provided under the Program.

- In considering the investment programs described in this brochure, you should be aware that participating in a wrap fee program may cost more or less than the cost of purchasing advisory, brokerage, and custodial services separately from other advisers or broker-dealers.
- Our firm and Associated Persons receive compensation as a result of your participation in the Program. This compensation may be more than the amount our firm or the Associated Persons would receive if you paid separately for investment advice, brokerage, and other services. Accordingly, a conflict of interest exists because our firm and our Associated Persons have a financial incentive to recommend the Program.
- Similar advisory services may be available from other registered investment advisers for lower fees.

Additional Fees And Expenses

The Program Fee includes the costs of brokerage commissions for transactions executed through the Qualified Custodian (or a broker-dealer designated by the Qualified Custodian), and charges relating to the settlement, clearance, or custody of securities in the Account. The Program Fee does not include mark-ups and mark-downs, dealer spreads or other costs associated with the purchase or sale of securities, interest, taxes, or other costs, such as national securities exchange fees, charges for transactions not executed through the Qualified Custodian, costs associated with exchanging currencies, wire transfer fees, or other fees required by law or imposed by third parties. The Account will be responsible for these additional fees and expenses.

The wrap program fees that you pay to our firm for portfolio management services are separate and distinct from the fees and expenses charged by mutual funds or exchange traded funds (described in each fund's prospectus) to their shareholders. These fees will generally include a management fee and other fund expenses. To fully understand the total cost you will incur, you should review all the fees charged by mutual funds, exchange traded funds, our firm, and others.

Brokerage Practices

Our firm participates in the TD Ameritrade Institutional program. TD Ameritrade Institutional is a division of TD Ameritrade, Inc. ("TD Ameritrade") member FINRA/SIPC. TD Ameritrade is an independent and unaffiliated SEC-registered broker-dealer. TD Ameritrade offers to independent investment Advisors services which include custody of securities, trade execution, clearance and settlement of transactions. We receive some benefits from TD Ameritrade through our participation in the program. If you participate in the Program, you will be required to establish an account with TD Ameritrade. If you do not direct our firm to execute transactions through TD Ameritrade, we reserve the right to not accept your account. Not all advisers require their clients to direct brokerage. Since you are required to use TD Ameritrade, we may be unable to achieve the most favorable execution of your transactions. We believe that TD Ameritrade provides quality execution services based on several factors, including, but not limited to, the ability to provide professional services, reputation, experience and financial stability.

Research and Other Soft Dollar Benefits

We do not have any soft dollar arrangements.

Economic Benefits

As a registered investment adviser, we have access to the institutional platform of your account custodian. As such, we will also have access to research products and services from your account custodian and/or other brokerage firm. These products may include financial publications, information about particular companies and industries, research software, and other products or services that provide lawful and appropriate assistance to our firm in the performance of our investment decision-making responsibilities. Such research products and services are provided to all investment advisers that utilize the institutional services platforms of these firms, and are not considered to be paid for with

soft dollars. However, you should be aware that the commissions charged by a particular broker for a particular transaction or set of transactions may be greater than the amounts another broker who did not provide research services or products might charge.

TD Ameritrade Institutional

We participate in the institutional advisor program (the "Program") offered by TD Ameritrade Institutional. TD Ameritrade Institutional is a division of TD Ameritrade Inc., member FINRA/SIPC ("TD Ameritrade"), an unaffiliated SEC-registered broker-dealer and FINRA member. TD Ameritrade offers to independent investment advisors services which include custody of securities, trade execution, clearance and settlement of transactions. We receive some benefits from TD Ameritrade through our participation in the Program. As disclosed above, we participate in TD Ameritrade's institutional customer program and we may recommend TD Ameritrade to you for custody and brokerage services. There is no direct link between our participation in the Program and the investment advice we give you, although we receive economic benefits through our participation in the Program that are typically not available to TD Ameritrade retail investors. These benefits include the following products and services (provided without cost or at a discount): receipt of duplicate Client statements and confirmations; research related products and tools; consulting services; access to a trading desk serving our participants; access to block trading (which provides the ability to aggregate securities transactions for execution and then allocate the appropriate shares to your accounts); the ability to have advisory fees deducted directly from your accounts; access to an electronic communications network for order entry and account information; access to mutual funds with no transaction fees and to certain institutional money managers; and discounts on compliance, marketing, research, technology, and practice management products or services provided to us by third party vendors. TD Ameritrade may also have paid for business consulting and professional services received by our related persons. Some of the products and services made available by TD Ameritrade through the Program may benefit us but may not benefit your accounts. These products or services may assist us in managing and administering your accounts, including accounts not maintained at TD Ameritrade. Other services made available by TD Ameritrade are intended to help us manage and further develop our business enterprise. The benefits received by us or our personnel through participation in the Program do not depend on the amount of brokerage transactions directed to TD Ameritrade. As part of our fiduciary duties to you, we endeavor at all times to put your interests first. You should be aware, however, that the receipt of economic benefits by us or our related persons in and of itself creates a potential conflict of interest and may indirectly influence our choice of TD Ameritrade for custody and brokerage services.

Brokerage for Client Referrals

We do not receive client referrals from broker-dealers in exchange for cash or other compensation, such as brokerage services or research.

Item 5 Account Requirements and Types of Clients

We have the following types of clients:

- Individuals and High Net Worth Individuals;
- Trusts, Estates or Charitable Organizations;
- Pension and Profit Sharing Plans;
- Corporations, limited liability companies and/or other business types;
- Other Investment Advisers.

Our requirements for opening and maintaining accounts or otherwise engaging us:

- We generally require clients to have at least \$1,000,000 in net worth to engage us for portfolio management services.

- We generally require a minimum fee of \$5,000 per year for portfolio management services.
- We may waive such minimums based on individual needs and circumstances; in which case the portfolio management fees would not exceed 2% of the assets under management.
- For fixed income accounts, a deposit of at least \$1,000,000 is required for our comprehensive portfolio management services. Generally, this minimum account balance requirement is not negotiable and would be required throughout the course of the client's relationship with our firm.

Item 6 Portfolio Manager Selection and Evaluation

We are the sponsor and sole portfolio manager for the Program. Refer to *Services, Fees, and Compensation* for additional disclosures on costs associated with your participation in the Program.

Performance-Based Fees and Side-by-Side Management

We do not accept performance-based fees or participate in side-by-side management. Performance-based fees are fees that are based on a share of capital gains or capital appreciation of a client's account. Side-by-side management refers to the practice of managing accounts that are charged performance-based fees while at the same time managing accounts that are not charged performance-based fees. Our fees are calculated as described above, and are not charged on the basis of a share of capital gains upon, or capital appreciation of, the funds in your advisory account.

Our Methods of Analysis, Investment Strategies and Risk of Loss

We may use one or more of the following methods of analysis or investment strategies when providing investment advice to you:

Charting Analysis - involves the gathering and processing of price and volume pattern information for a particular security, sector, broad index, or commodity. This price and volume pattern information is analyzed. The resulting pattern and correlation data is used to detect departures from expected performance and diversification and predict future price movements and trends.

Risk: Our charting analysis may not accurately detect anomalies or predict future price movements. Current prices of securities may reflect all information known about the security and day-to-day changes in market prices of securities may follow random patterns and may not be predictable with any reliable degree of accuracy.

Technical Analysis - involves studying past price patterns, trends and interrelationships in the financial markets to assess risk-adjusted performance and predict the direction of both the overall market and specific securities.

Risk: The risk of market timing based on technical analysis is that our analysis may not accurately detect anomalies or predict future price movements. Current prices of securities may reflect all information known about the security and day-to-day changes in market prices of securities may follow random patterns and may not be predictable with any reliable degree of accuracy.

Fundamental Analysis - involves analyzing individual companies and their industry groups, such as a company's financial statements, details regarding the company's product line, the experience and expertise of the company's management, and the outlook for the company and its industry. The resulting data is used to measure the true value of the company's stock compared to the current market value.

Risk: The risk of fundamental analysis is that information obtained may be incorrect and the analysis may not provide an accurate estimate of earnings, which may be the basis for a stock's value. If securities prices adjust rapidly to new information, utilizing fundamental analysis may not result in favorable performance.

Cyclical Analysis - a type of technical analysis that involves evaluating recurring price patterns and trends. Economic/business cycles may not be predictable and may have many fluctuations between long-term expansions and contractions.

Risk: The lengths of economic cycles may be difficult to predict with accuracy and therefore the risk of cyclical analysis is the difficulty in predicting economic trends and consequently the changing value of securities that would be affected by these changing trends.

Long-Term Purchases - securities purchased with the expectation that the value of those securities will grow over a relatively long period of time, generally greater than one year.

Risk: Using a long-term purchase strategy generally assumes the financial markets will go up in the long-term which may not be the case. There is also the risk that the segment of the market that you are invested in or perhaps just your particular investment will go down over time even if the overall financial markets advance. Purchasing investments long-term may create an opportunity cost - "locking-up" assets that may be better utilized in the short-term in other investments.

Short-Term Purchases - securities purchased with the expectation that they will be sold within a relatively short period of time, generally less than one year, to take advantage of the securities' short-term price fluctuations.

Risk: Using a short-term purchase strategy generally assumes that we can predict how financial markets will perform in the short-term which may be very difficult and will incur a disproportionately higher amount of transaction costs compared to long-term trading. There are many factors that can affect financial market performance in the short-term (such as short-term interest rate changes, cyclical earnings announcements, etc.) but may have a smaller impact over longer periods of times.

Margin Transactions - a securities transaction in which an investor borrows money to purchase a security, in which case the security serves as collateral on the loan. We utilize margin when implementing option spread strategies.

Risk: If the value of the shares drops sufficiently, the investor will be required to either deposit more cash into the account or sell a portion of the stock in order to maintain the margin requirements of the account. This is known as a "margin call." An investor's overall risk includes the amount of money invested plus the amount that was loaned to them.

Option Writing - a securities transaction that involves selling an option. An option is a contract that gives the buyer the right, but not the obligation, to buy or sell a particular security at a specified price on or before the expiration date of the option. When an investor sells a call option, he or she must deliver to the buyer a specified number of shares if the buyer exercises the option. When an investor sells a put option, he or she must pay the strike price per share if the buyer exercises the option, and will receive the specified number of shares. The option writer/seller receives a premium (the market price of the option at a particular time) in exchange for writing the option.

Risk: Options are complex investments and can be very risky, especially if the investor does not own the underlying stock. In certain situations, an investor's risk can be unlimited.

Trading - As part of our primary investment strategy when managing your account(s), we will use frequent trading (in general, selling securities within 30 days of purchasing the same securities). Short-term trading is not appropriate for all investors and we only use it if we have determined that it is suitable for you. Short-term trading includes buying and selling securities frequently in an attempt to capture significant market gains and avoid significant losses.

Risk: When a frequent trading policy is in effect, there is a risk that investment performance within your account may be negatively affected, particularly through increased brokerage and other transactional costs and taxes.

Cash Balances

We generally invest client's cash balances in money market funds, FDIC Insured Certificates of Deposit, high-grade commercial paper and/or government backed debt instruments. Ultimately, we try to achieve the highest return on our client's cash balances through relatively low-risk conservative investments. In most cases, at least a partial cash balance will be maintained in a money market account so that our firm may debit advisory fees for our services related to comprehensive portfolio management service, as applicable.

Our investment strategies and advice may vary depending upon each client's specific financial situation. As such, we determine investments and allocations based upon your predefined objectives, risk tolerance, time horizon, financial information, liquidity needs and other various suitability factors. Your restrictions and guidelines may affect the composition of your portfolio. **It is important that you notify us immediately with respect to any material changes to your financial circumstances, including for example, a change in your current or expected income level, tax circumstances, or employment status.**

Tax Considerations

Our strategies and investments may have unique and significant tax implications. However, unless we specifically agree otherwise, and in writing, tax efficiency is not our primary consideration in the management of your assets. Regardless of your account size or any other factors, we strongly recommend that you consult with a tax professional regarding the investing of your assets.

Custodians and broker-dealers must report the cost basis of equities acquired in client accounts. Your custodian will default to the First-In First-Out ("FIFO") accounting method for calculating the cost basis of your investments. You are responsible for contacting your tax advisor to determine if this accounting method is the right choice for you. If your tax advisor believes another accounting method is more advantageous, provide written notice to our firm immediately and we will alert your account custodian of your individually selected accounting method. Decisions about cost basis accounting methods will need to be made before trades settle, as the cost basis method cannot be changed after settlement.

Risk of Loss

Investing in securities involves risk of loss that *clients* should be prepared to bear. While the stock market may increase and your account(s) could enjoy a gain, it is also possible that the stock market may decrease and your account(s) could suffer a loss. It is important that you understand the risks associated with investing in the stock market, are appropriately diversified in your investments, and ask us any questions you may have.

Other Risk Considerations

When evaluating risk, financial loss may be viewed differently by each client and may depend on many different risks, each of which may affect the probability and magnitude of any potential losses. The following risks may not be all-inclusive, but should be considered carefully by a prospective client before retaining our services.

Liquidity Risk: The risk of being unable to sell your investment at a fair price at a given time due to high volatility or lack of active liquid markets. You may receive a lower price or it may not be possible to sell the investment at all.

Credit Risk: Credit risk typically applies to debt investments such as corporate, municipal, and sovereign fixed income or bonds. A bond issuing entity can experience a credit event that could impair or erase the value of an issuer's securities held by a client.

Inflation and Interest Rate Risk: Security prices and portfolio returns will likely vary in response to changes in inflation and interest rates. Inflation causes the value of future dollars to be worth less and may reduce the purchasing power of a client's future interest payments and principal. Inflation also generally leads to higher interest rates which may cause the value of many types of fixed income investments to decline.

Horizon and Longevity Risk: The risk that your investment horizon is shortened because of an unforeseen event, for example, the loss of your job. This may force you to sell investments that you were expecting to hold for the long term. If you must sell at a time that the markets are down, you may lose money. Longevity Risk is the risk of outliving your savings. This risk is particularly relevant for people who are retired, or are nearing retirement.

Recommendation of Particular Types of Securities

We primarily recommend exchange traded funds ("ETFs"), individual equity positions, equity options, investment grade municipal bonds, government agency, and corporate bonds or their equivalent fixed income ETFs. However, we may advise on other types of investments as appropriate for you since each client has different needs and different tolerance for risk. Each type of security has its own unique set of risks associated with it and it would not be possible to list here all of the specific risks of every type of investment. Even within the same type of investment, risks can vary widely. However, in very general terms, the higher the anticipated return of an investment, the higher the risk of loss associated with the investment.

Exchange Traded Funds: Exchange traded funds ("ETF") are professionally managed collective investment systems that pool money from many investors and invest in stocks, bonds, short-term money market instruments, other mutual funds, other securities, or any combination thereof. The fund will have a manager that trades the fund's investments in accordance with the fund's investment objective. While ETFs generally provide diversification, risks can be significantly increased if the fund is concentrated in a particular sector of the market, primarily invests in small cap or speculative companies, uses leverage (i.e., borrows money) to a significant degree, or concentrates in a particular type of security (i.e., equities) rather than balancing the fund with different types of securities. ETFs can be bought and sold throughout the day like stock and their price can fluctuate throughout the day. The returns on ETFs can be reduced by the costs to manage the funds.

ETFs may have tracking error risks. For example, the ETF investment adviser may not be able to cause the ETF's performance to match that of its underlying index or other benchmark, which may negatively affect the ETF's performance. In addition, for leveraged and inverse ETFs that seek to track the performance of their Underlying Indices or benchmarks on a daily basis, mathematical compounding may prevent the ETF from correlating with performance of its benchmark. In addition, an

ETF may not have investment exposure to all of the securities included in its underlying index, or its weighting of investment exposure to such securities may vary from that of the underlying index. Some ETFs may invest in securities or financial instruments that are not included in the underlying index, but which are expected to yield similar performance.

Stocks: There are numerous ways of measuring the risk of equity securities (also known simply as "equities" or "stock"). In very broad terms, the value of a stock depends on the financial health of the company issuing it. However, stock prices can be affected by many other factors including, but not limited to the class of stock (for example, preferred or common); the health of the market sector of the issuing company; and the overall health of the economy. In general, larger, better established companies ("large cap") tend to be safer than smaller start-up companies ("small cap") are but the mere size of an issuer is not, by itself, an indicator of the safety of the investment.

Options Contracts: Options are complex securities that involve risks and are not suitable for everyone. Option trading can be speculative in nature and carry substantial risk of loss. It is generally recommended that you only invest in options with risk capital. An option is a contract that gives the buyer the right, but not the obligation, to buy or sell an underlying asset at a specific price on or before a certain date (the "expiration date"). The two types of options are calls and puts:

A call gives the holder the right to buy an asset at a certain price within a specific period of time. Calls are similar to having a long position on a stock. Buyers of calls hope that the stock will increase substantially before the option expires.

A put gives the holder the right to sell an asset at a certain price within a specific period of time. Puts are very similar to having a short position on a stock. Buyers of puts hope that the price of the stock will fall before the option expires.

Selling options is more complicated and can be even riskier.

The option trading risks pertaining to options buyers are:

- Risk of losing your entire investment in a relatively short period of time.
- The risk of losing your entire investment increases if, as expiration nears, the stock is below the strike price of the call (for a call option) or if the stock is higher than the strike price of the put (for a put option).
- European style options which do not have secondary markets on which to sell the options prior to expiration can only realize its value upon expiration.
- Specific exercise provisions of a specific option contract may create risks.
- Regulatory agencies may impose exercise restrictions, which stops you from realizing value.

The option trading risks pertaining to options sellers are:

- Options sold may be exercised at any time before expiration.
- Covered Call traders forgo the right to profit when the underlying stock rises above the strike price of the call options sold and continues to risk a loss due to a decline in the underlying stock.
- Writers of Naked Calls risk unlimited losses if the underlying stock rises.
- Writers of Naked Puts risk losses if the underlying stock drops up to a maximum of the strike price multiplied by the numbers of contracts sold.
- Writers of naked positions run margin risks if the position goes into significant losses. Such risks may include liquidation by the broker.

- Writers of call options could lose more money than a short seller of that stock could on the same rise on that underlying stock. This is an example of how the leverage in options can work against the option trader.
- Writers of Naked Calls are obligated to deliver shares of the underlying stock if those call options are exercised.
- Call options can be exercised outside of market hours such that effective remedy actions cannot be performed by the writer of those options.
- Writers of stock options are obligated under the options that they sold even if a trading market is not available or that they are unable to perform a closing transaction.
- The value of the underlying stock may surge or ditch unexpectedly, leading to automatic exercises.

Other option trading risks are:

- The complexity of some option strategies is a significant risk on its own.
- Option trading exchanges or markets and option contracts themselves are open to changes at all times.
- Options markets have the right to halt the trading of any options, thus preventing investors from realizing value.
- Risk of erroneous reporting of exercise value.
- If an options brokerage firm goes insolvent, investors trading through that firm may be affected.
- Internationally traded options have special risks due to timing across borders.

Risks that are not specific to options trading include market risk, sector risk and individual stock risk. Option trading risks are closely related to stock risks, as stock options are a derivative of stocks.

Municipal Securities: Municipal securities, while generally thought of as safe, can have significant risks associated with them including, but not limited to: the credit worthiness of the governmental entity that issues the bond; the stability of the revenue stream that is used to pay the interest to the bondholders; when the bond is due to mature; and, whether or not the bond can be "called" prior to maturity. When a bond is called, it may not be possible to replace it with a bond of equal character paying the same amount of interest or yield to maturity.

Bonds: Corporate debt securities (or "bonds") are typically safer investments than equity securities, but their risk can also vary widely based on: the financial health of the issuer; the risk that the issuer might default; when the bond is set to mature; and, whether or not the bond can be "called" prior to maturity. When a bond is called, it may not be possible to replace it with a bond of equal character paying the same rate of return.

Money Market Funds: A money market fund is technically a security. The fund managers attempt to keep the share price constant at \$1/share. However, there is no guarantee that the share price will stay at \$1/share. If the share price goes down, you can lose some or all of your principal. The U.S. Securities and Exchange Commission ("SEC") notes that "While investor losses in money market funds have been rare, they are possible." In return for this risk, you should earn a greater return on your cash than you would expect from a Federal Deposit Insurance Corporation ("FDIC") insured savings account (money market funds are not FDIC insured). Next, money market fund rates are variable. In other words, you do not know how much you will earn on your investment next month. The rate could go up or go down. If it goes up, that may result in a positive outcome. However, if it goes down and you earn less than you expected to earn, you may end up needing more cash. A final risk you are taking with money market funds has to do with inflation. Because money market funds are

considered to be safer than other investments like stocks, long-term average returns on money market funds tends to be less than long term average returns on riskier investments. Over long periods of time, inflation can eat away at your returns.

Proxy Voting

We consider proxy voting an important right of our clients as shareholders and believe that reasonable care and diligence must be taken to ensure that such rights are properly and timely exercised. When we have discretion to vote the proxies of our clients, we will vote those proxies in your best interests and in accordance with these policies and procedures.

Policy for voting proxies

All proxies received by our firm will be given to our Chief Compliance Officer for processing. Our Chief Compliance Officer will determine which accounts managed by our firm hold the security to which the proxy relates. These accounts and their share holdings will be matched to the proxies received for each security. Missing proxies or significant variances in shares held will be investigated.

A grid of shares held by the client for each security being voted will be updated with each proxy being voted. Our Chief Compliance Officer will review each item for voting on each proxy. Based on our proxy voting guidelines outlined below, a determination of how our firm votes will be made. Any undefined issues will be referred to our President.

A listing of each proxy voted will be updated at the time the proxy is voted. Proxies will generally be voted online unless custodian requires mailed form. In the absence of specific voting guidelines from the client, we will vote proxies in the best interest of each particular client.

Proxies voting guidelines

Where voting authority exists, proxies are voted by our firm in the best interests of plan beneficiaries:

- for directors and for management on routine matters.
- for a limit on or reduction of the number of directors, and for an increase in the number of directors on a case by case basis.
- against the creation of a tiered board.
- for the elimination of cumulative voting.
- for independence of auditors
- for deferred compensation.
- for profit sharing plans.
- for stock option plans unless the plan could result in material dilution to shares outstanding or is excessive.
- for stock repurchases.
- for an increase in authorized shares unless the authorization effectively results in a blind investment pool for shareholders.
- for reductions in the par value of stock.
- for company name changes.
- for routine appointments of auditors.

We abstain on motions to limit directors' liability. Material issues not addressed above (e.g., mergers, poison pills, social investing and miscellaneous shareholder proposals) are dealt with on a case-by-case basis. Our firm will defer to client voting policies as directed. Eligible shares are monitored against ballots received from custodians, and detailed records of all issues and votes are maintained and reported to clients as requested.

We recognize that under certain circumstances we may have a conflict of interest between us and our clients. Such circumstances may include, but are not limited to, situations where our firm or one or more of our affiliates, including officers, directors and employees, has or is seeking a client relationship with the issuer of the security that is the subject of the proxy vote. We shall periodically inform our employees that they are under an obligation to be aware of the potential for conflicts of interest on the part of our firm with respect to voting proxies on behalf of funds, both as a result of our employee's personal relationships and due to circumstances that may arise during the conduct of our business, and to bring conflicts of interest of which they become aware to the attention of the proxy manager. We shall not vote proxies relating to such issuers on behalf of client accounts until we have determined that the conflict of interest is not material or a method of resolving such conflict of interest has been agreed upon by our management team. A conflict of interest will be considered material to the extent that it is determined that such conflict has the potential to influence our decision-making in voting a proxy. Materiality determinations will be based upon an assessment of the particular facts and circumstances. If we determine that a conflict of interest is not material, we may vote proxies notwithstanding the existence of a conflict. If the conflict of interest is determined to be material, the conflict shall be disclosed to our management team and we shall follow the instructions of the management team. We shall keep a record of all materiality decisions and report them to the management team on an annual basis.

Our firm generally submits votes electronically through proxyvote.com and relies on our ability to retrieve our voting history from them for producing our clients' records. We do not pay for proxy voting services with soft dollars. Also, we do not charge an additional fee to vote proxies.

We keep certain records required by applicable law in connection with our proxy voting activities. Clients may request a copy of our written policies and procedures regarding proxy voting and/or information on how particular proxies were voted by contacting our Chief Compliance Officer, Nathan R. Paulson, by phone at (630) 517-2950 or email at npaulson@paulsonwealth.com.

Item 7 Client Information Provided to Portfolio Managers

In order to provide the Program services, we will share your private information with your account custodian TD Ameritrade. We may also provide your private information to mutual fund companies and/or private managers as needed. We will only share the information necessary in order to carry out our obligations to you in servicing your account. We share your personal account data in accordance with our privacy policy as described below.

Privacy Policy

We view protecting your private information as a top priority. Pursuant to applicable privacy requirements, we have instituted policies and procedures to ensure that we keep your personal information private and secure.

We do not disclose any nonpublic personal information about you to any nonaffiliated third parties, except as permitted by law. In the course of servicing your account, we may share some information with our service providers, such as transfer agents, custodians, broker-dealers, accountants, consultants, and attorneys.

We restrict internal access to nonpublic personal information about you to employees, who need that information in order to provide products or services to you. We maintain physical and procedural safeguards that comply with regulatory standards to guard your nonpublic personal information and to ensure our integrity and confidentiality. We will not sell information about you or your accounts to anyone. We do not share your information unless it is required to process a transaction, at your request, or required by law.

You will receive a copy of our privacy notice prior to or at the time you sign an advisory agreement with our firm. Thereafter, we will deliver a copy of the current privacy policy notice to you on an annual basis. Contact our main office at the telephone number on the cover page of this brochure if you have any questions regarding this policy.

Item 8 Client Contact with Portfolio Managers

Without restriction, you should contact our firm or your advisory representative directly with any questions regarding your Program account. You should contact your advisory representative with respect to changes in your investment objectives, risk tolerance, or requested restrictions placed on the management of your Program assets.

Item 9 Additional Information

Disciplinary Information

We are required to disclose the facts of any legal or disciplinary events that are material to a client's evaluation of our advisory business or the integrity of our management. We do not have any required disclosures under this item.

Registrations with Broker-Dealer and Licensed Insurance Agents

Mr. Paulson sells securities and insurance products for a commission. In order to sell securities for a commission, Mr. Paulson is a registered representative of APW Capital, Inc. ("APW"), a securities broker-dealer and member FINRA/SIPC. In his capacity as registered representatives, Mr. Paulson receives compensation in connection with the purchase and sale of securities or other investment products, including asset-based sales charges, service fees or 12b-1 fees, or holding, of mutual funds. Compensation earned by Mr. Paulson in his capacity as a registered representative is separate and in addition to our advisory fees. This practice presents a conflict of interest because persons providing investment advice to advisory clients on behalf of our firm who are registered representatives have an incentive to recommend investment products based on the compensation received rather than solely based on your needs. Persons providing investment advice to advisory clients on behalf of our firm can select or recommend, and in many instances will select or recommend, mutual fund investments in share classes that pay 12b-1 fees when clients are eligible to purchase share classes of the same funds that do not pay such fees and are less expensive. This presents a conflict of interest. You are under no obligation, contractually or otherwise, to purchase securities products through any person affiliated with our firm who receives compensation described above.

Mr. Paulson is also a licensed, independent insurance agent. Mr. Paulson will earn commission-based compensation for selling insurance products, including insurance products they sell to you. Insurance commissions earned by Mr. Paulson are separate and in addition to our advisory fees. This practice presents a conflict of interest because persons providing investment advice on behalf of our firm who are insurance agents have an incentive to recommend insurance products to you for the purpose of generating commissions rather than solely based on your needs. You are under no obligation, contractually or otherwise, to purchase insurance products through any person affiliated with our firm.

Generally, Mr. Paulson only uses his securities license for 529 plans and insurance license for life insurance where it is in the best interest of the client.

Recommendation of Other Advisers

We may recommend that you use a third party money manager or we may hire sub-advisers ("TPMM") based on your needs and suitability. We will not receive separate compensation, directly or indirectly, from the TPMM for recommending that you use their services. Moreover, we do not have any other business relationships with the recommended TPMM(s). Refer to the ADV Part 2A Brochure under the *Advisory Business* section for additional disclosures on this topic.

Description of Our Code of Ethics

We strive to comply with applicable laws and regulations governing our practices. Therefore, our Code of Ethics includes guidelines for professional standards of conduct for persons associated with our firm.

We recognize that the personal investment transactions of members and employees of our firm demand the application of a high Code of Ethics and require that all such transactions be carried out in a way that does not endanger the interest of any client. At the same time, we believe that if investment goals are similar for clients and for members and employees of our firm, it is logical and even desirable that there be common ownership of some securities.

Therefore, in order to mitigate conflicts of interest, we have in place a set of procedures (including a pre-clearing procedure) with respect to transactions effected by our members, officers and employees for their personal accounts. In order to monitor compliance with our personal trading policy, we have a quarterly securities transaction reporting system for all of our associates. It is our policy that neither our firm nor persons associated with our firm shall have priority over your account in the purchase or sale of securities.

Furthermore, our firm has established a Code of Ethics which applies to all of our Associated Persons. An investment adviser is considered a fiduciary. As a fiduciary, it is an investment adviser's responsibility to provide fair and full disclosure of all material facts and to act solely in the best interest of each of our clients at all times. We have a fiduciary duty to all clients. Our fiduciary duty is considered the core underlying principle for our Code of Ethics which also includes Insider Trading and Personal Securities Transactions Policies and Procedures. We require all of our supervised persons to conduct business with the highest level of ethical standards and to comply with all federal and state securities laws at all times. Upon employment or affiliation and at least annually thereafter, all supervised persons will sign an acknowledgement that they have read, understand, and agree to comply with our Code of Ethics.

Our firm and supervised persons must conduct business in an honest, ethical, and fair manner and avoid all circumstances that might negatively affect or appear to affect our duty of complete loyalty to all clients. Code of Ethics. However, if a client or a potential client wishes to review our Code of Ethics in its entirety, a copy will be provided promptly upon request.

Participation or Interest in Client Transactions

Neither our firm nor any persons associated with our firm has any material financial interest in client transactions beyond the provision of investment advisory services as disclosed in this brochure.

Aggregated Trading

Accounts owned by our firm or persons associated with our firm may participate in aggregated trading with your accounts; however, they will not be given preferential treatment.

Review of Accounts

We review accounts on at least a weekly basis for our clients subscribing to our Wrap Fee Program service. The nature of these reviews is to learn whether clients' accounts are in line with

their investment objectives, appropriately positioned based on market conditions, and investment policies, if applicable. Only our Financial Advisors or Portfolio Managers will conduct reviews.

We may review client accounts more frequently than described above. Among the factors which may trigger an off-cycle review are major market or economic events, the client's life events, requests by the client, etc.

We will provide Client quarterly reports of the assets in the Account that include information regarding cost, current market value, gains and losses, performance and growth for the reporting period. We will also provide Client with direct access to their Accounts if they choose to open an account at the brokerage firm that PWM recommends through a secure portal on our firm's web site. Clients who direct us to place orders through brokerage firms other than the Preferred Broker will have access to the reports generated by PWM (but not direct access to the reports generated by the broker) through a password protected area of PWM's website.

Client Referrals and Other Compensation

We do not receive any compensation from any third party in connection with providing investment advice to you nor do we compensate any individual or firm for client referrals.

Aggregated Trades

We combine multiple orders for shares of the same securities purchased for discretionary advisory accounts we manage when it is in the best interest of the effected accounts (this practice is commonly referred to as "aggregated trading"). We will then distribute a portion of the shares to participating accounts in a fair and equitable manner. Generally, non-wrap accounts will pay a fixed transaction cost regardless of the number of shares transacted. In certain cases, each participating account pays an average price per share for all transactions and pays a proportionate share of all transaction costs on any given day. If you participate in our wrap fee program described above, you will not pay any portion of the transaction costs in addition to the program fee. In the event an order is only partially filled, the shares will be allocated to participating accounts in a fair and equitable manner, typically in proportion to the size of each client's order. Accounts owned by our firm or persons associated with our firm may participate in aggregated trading with your accounts; however, they will not be given preferential treatment.

We do not aggregate trade for non-discretionary accounts. Accordingly, non-discretionary accounts may pay different costs than discretionary accounts pay. If you enter into non-discretionary arrangements with our firm, we may not be able to buy and sell the same quantities of securities for you and you may pay higher commissions, fees, and/or transaction costs than clients who enter into discretionary arrangements with our firm.

Trade Errors

In the event a trading error occurs in your account, our policy is to restore your account to the position it should have been in had the trading error not occurred. Depending on the circumstances, corrective actions may include canceling the trade, adjusting an allocation, and/or reimbursing the account.

Class Action Lawsuits

We will assist you, in conjunction with your legal counsel or other professionals, in filing claims with the claims administrator to participate in any settlement proceeds related to class action settlements involving a security held in your portfolio. We may also work with your legal counsel to determine whether you are eligible to participate in class action litigation to recover damages on your behalf for injuries as a result of actions, misconduct, or negligence by issuers of securities held in your portfolio.

Financial Information

Our firm does not have any financial condition or impairment that would prevent us from meeting our contractual commitments to you. We do not take physical custody of client funds or securities, or serve as trustee or signatory for client accounts, and we do not require the prepayment of more than \$1,200 in fees six or more months in advance nor have we filed a bankruptcy petition at any time in the past ten years. Therefore, we are not required to include a financial statement with this brochure.

IRA Rollover Considerations

As part of our investment advisory services to you, we may recommend that you withdraw the assets from your employer's retirement plan and roll the assets over to an individual retirement account ("IRA") that we will manage on your behalf. If you elect to roll the assets to an IRA that is subject to our management, we will charge you an asset based fee as set forth in the agreement you executed with our firm. This practice presents a conflict of interest because persons providing investment advice on our behalf have an incentive to recommend a rollover to you for the purpose of generating fee based compensation rather than solely based on your needs. You are under no obligation, contractually or otherwise, to complete the rollover. Moreover, if you do complete the rollover, you are under no obligation to have the assets in an IRA managed by our firm.

Many employers permit former employees to keep their retirement assets in their company plan. Also, current employees can sometimes move assets out of their company plan before they retire or change jobs. In determining whether to complete the rollover to an IRA, and to the extent the following options are available, you should consider the costs and benefits of:

1. Leaving the funds in your employer's (former employer's) plan.
2. Moving the funds to a new employer's retirement plan.
3. Cashing out and taking a taxable distribution from the plan.
4. Rolling the funds into an IRA rollover account.

Each of these options has advantages and disadvantages and before making a change we encourage you to speak with your CPA and/or tax attorney.

If you are considering rolling over your retirement funds to an IRA for us to manage here are a few points to consider before you do so:

1. Determine whether the investment options in your employer's retirement plan address your needs or whether you might want to consider other types of investments.
 - a. Employer retirement plans generally have a more limited investment menu than IRAs.
 - b. Employer retirement plans may have unique investment options not available to the public such as employer securities, or previously closed funds.
2. Your current plan may have lower fees than our fees.
 - a. If you are interested in investing only in mutual funds, you should understand the cost structure of the share classes available in your employer's retirement plan and how the costs of those share classes compare with those available in an IRA.
 - b. You should understand the various products and services you might take advantage of at an IRA provider and the potential costs of those products and services.
3. Our strategy may have higher risk than the option(s) provided to you in your plan.
4. Your current plan may also offer financial advice.
5. If you keep your assets titled in a 401k or retirement account, you could potentially delay your required minimum distribution beyond age 72.
6. Your 401k may offer more liability protection than a rollover IRA; each state may vary.
 - a. Generally, federal law protects assets in qualified plans from creditors. Since 2005, IRA assets have been generally protected from creditors in bankruptcies. However, there

can be some exceptions to the general rules so you should consult with an attorney if you are concerned about protecting your retirement plan assets from creditors.

7. You may be able to take out a loan on your 401k, but not from an IRA.
8. IRA assets can be accessed any time; however, distributions are subject to ordinary income tax and may also be subject to a 10% early distribution penalty unless they qualify for an exception such as disability, higher education expenses or the purchase of a home.
9. If you own company stock in your plan, you may be able to liquidate those shares at a lower capital gains tax rate.
10. Your plan may allow you to hire us as the manager and keep the assets titled in the plan name.

It is important that you understand the differences between these types of accounts and to decide whether a rollover is best for you. Prior to proceeding, if you have questions contact your investment adviser representative, or call our main number as listed on the cover page of this brochure.

Item 10 Requirements for State-Registered Advisers

We are a federally registered investment adviser; therefore, we are not required to respond to this item.
