Supervision

CSC has adopted written policies and procedures which are designed to set standards and internal controls for the firm, its employees, and its businesses and are also reasonably designed to detect and prevent any violations of regulatory requirements and the firm's policies and procedures. Every employee and manager is required to be responsible for and monitor those individuals and departments he or she supervises to detect, prevent and report any activities inconsistent with the firm's procedures, policies, high professional standards, or legal/regulatory requirements.

CSC's Compliance Department, in conjunction with Senior Management, are primarily responsible for the development and implementation of appropriate policies and procedures. Monitoring systems are tailored to particular policies and procedures, the manner and frequency of testing varies as appropriate.

These compliance procedures include the reporting of violations or errors to designated personnel. After any preliminary due diligence and investigation, matters are corrected or resolved in an appropriate manner, which will vary depending on, among other things, the nature and severity of the violation. CSC Senior Management may be involved for significant errors or violations.
