Item 4: Advisory Business

A. Description of the Advisory Firm

Greenup Street Wealth Management LLC d/b/a Greenup Wealth Management (hereinafter "GSWML") is a Limited Liability Company organized in the State of Michigan. The firm was formed in September 2020, and the principal owner is Daniel Greulich.

B. Types of Advisory Services

Portfolio Management Services

GSWML offers ongoing portfolio management services based on the individual goals, objectives, time horizon, and risk tolerance of each client. GSWML creates an Investment Policy Statement for each client, which outlines the client's current situation (income, tax levels, and risk tolerance levels). Portfolio management services include, but are not limited to, the following:

- Investment strategy
- Asset allocation
- Risk tolerance
- Personal investment policy
- Asset selection
- Regular portfolio monitoring

GSWML evaluates the current investments of each client with respect to their risk tolerance levels and time horizon. GSWML will request discretionary authority from clients in order to select securities and execute transactions without permission from the client prior to each transaction. Risk tolerance levels are documented in the Investment Policy Statement, which is given to each client.

GSWML seeks to provide that investment decisions are made in accordance with the fiduciary duties owed to its accounts and without consideration of GSWML's economic, investment or other financial interests. To meet its fiduciary obligations, GSWML attempts to avoid, among other things, investment or trading practices that systematically advantage or disadvantage certain client portfolios, and accordingly, GSWML's policy is to seek fair and equitable allocation of investment opportunities/transactions among its clients to avoid favoring one client over another over time. It is GSWML's policy to allocate investment opportunities and transactions it identifies as being appropriate and prudent, including initial public offerings ("IPOs") and other investment opportunities that might have a limited supply, among its clients on a fair and equitable basis over time.

On-going Financial Planning

On-going financial planning services may include:

1. Initial Consultation (Free)
 - a. Assess current financial situation and discuss the financial planning process and my services
2. Detailed meeting to go through Clients financial situation in depth and better understanding of client's financial goals and concerns
3. Client Recommendation Meeting
 - a. Delivery of a financial plan including current net worth (Balance Sheet), goals, action items and more.
 - b. Recommendations
 - c. Client walkthrough of plan and any questions

Included in the ongoing plan:

1. Biannual check ins with clients to assess financial plan, implementation of the plan, limitations, adjustments needed, and assess new variables in a client's financial picture.
2. End of Year meeting to discuss financial plan
3. A new/updated financial plan annually

In offering financial planning, a conflict exists between the interests of the investment adviser and the interests of the client. The client is under no obligation to act upon the investment adviser's recommendation, and, if the client elects to act on any of the recommendations, the client is under no obligation to effect the transaction through the investment adviser. This statement is required by California Code of Regulations, 10 CCR Section 260.235.2.

Advisor Credit Exchange (ACX)

Credit solutions for GSWML clients offered through the Adviser Credit Exchange. Services to include: collateralized and unsecured personal loans. GSWML receives a commission for each loan that they refer to ACX, ranging from 0 - .25% of the loan amount. Therefore, GSWML has a financial incentive to recommend ACX to their clients. Client are not required to use ACX and may select any lender of their choosing.

Credit solutions offered through Advisor Credit Exchange ("ACX" a third party owned by Envestnet). The Advisor Credit Exchange solution do charge an interest rate based amount borrowed and terms of loan.

Services Limited to Specific Types of Investments

GSWML generally limits its investment advice to mutual funds, fixed income securities, real estate funds (including REITs), equities, ETFs (including ETFs in the gold and precious metal sectors), treasury inflation protected/inflation linked bonds, commodities, non-U.S. securities, venture capital funds and private placements. GSWML may use other securities as well to help diversify a portfolio when applicable.

C. Client Tailored Services and Client Imposed Restrictions

GSWML offers the same suite of services to all of its clients. However, specific client investment strategies and their implementation are dependent upon the client Investment Policy Statement which outlines each client's current situation (income, tax levels, and risk tolerance levels). Clients may impose restrictions in investing in certain securities or types of securities in accordance with their values or beliefs. However, if the restrictions prevent GSWML from properly servicing the client account, or if the restrictions would require GSWML to deviate from its standard suite of services, GSWML reserves the right to end the relationship.

D. Wrap Fee Programs

A wrap fee program is an investment program where the investor pays one stated fee that includes management fees, transaction costs, fund expenses, and other administrative fees. GSWML does not participate in any wrap fee programs.

E. Assets Under Management

GSWML has the following assets under management:

Discretionary Amounts:	Non-discretionary Amounts:	Date Calculated:
\$137,424,042	\$0	July 2021

Item 5: Fees and Compensation

A. Fee Schedule

Portfolio Management Fees

Total Assets Under Management	Annual Fees
\$0 - \$500,000	1.25%
\$500,001 - \$2,000,000	1.00%
\$2,000,001 - \$5,000,000	0.85%
\$5,000,001 - \$10,000,000	0.70%
\$10,000,001 – and Up	0.45%

The advisory fee is calculated using the value of the assets in the Account on the last business day of the prior billing period. Lower fees for comparable services may be available from other sources.

These fees are negotiable. The final fee schedule will be memorialized in the client's advisory agreement. Clients may terminate the agreement without penalty for a full refund of GSWML's fees within five business days of signing the Investment Advisory Contract. Thereafter, clients may terminate the Investment Advisory Contract generally with 1 days' written notice.

On-going Financial Planning Fees

Fixed Fees

GSWML offers financial planning on both a monthly basis & flat fee basis.

Standard financial planning on a monthly basis will be \$250 per month. Flat fee basis will be based on the GSWML's discretion. These fees are negotiable.

Clients may terminate the agreement without penalty, for full refund of GSWML's fees, within five business days of signing the Financial Planning Agreement. Thereafter, clients may terminate the Financial Planning Agreement generally upon written notice.

B. Payment of Fees

Payment of Portfolio Management Fees

Asset-based portfolio management fees are withdrawn directly from the client's accounts with client's written authorization on a quarterly basis. Fees are paid in advance.

Payment of On-going Financial Planning Fees

Fixed Fees

On- going Financial planning fees are paid via ACH and check. Fees are paid monthly in advance.

C. Client Responsibility For Third Party Fees

Clients are responsible for the payment of all third party fees (*i.e.*, custodian fees, brokerage fees, mutual fund fees, transaction fees, etc.). Those fees are separate and distinct from the fees and expenses charged by GSWML. Please see Item 5C and Item 12 below.

D. Prepayment of Fees

GSWML collects fees in advance. Refunds for fees paid in advance but not yet earned will be refunded on a prorated basis and returned within fourteen days to the client via check, or return deposit back into the client's account.

For all asset-based fees paid in advance, the fee refunded will be equal to the balance of the fees collected in advance minus the daily rate* times the number of days elapsed in the billing period up to and including the day of termination. (*The daily rate is calculated by dividing the annual asset-based fee rate by 365.)

E. Outside Compensation For the Sale of Securities to Clients

Neither GSWML nor its supervised persons accept any compensation for the sale of investment products, including asset-based sales charges or service fees from the sale of mutual funds.

Item 6: Performance-Based Fees and Side-By-Side Management

GSWML does not accept performance-based fees or other fees based on a share of capital gains on or capital appreciation of the assets of a client.

Item 7: Types of Clients

GSWML generally provides advisory services to the following types of clients:

- ❖ Individuals
- ❖ High-Net-Worth Individuals
- ❖ Corporations or Business Entities
- ❖ Foundations

There is no account minimum for any of GSWML's services.

Item 8: Methods of Analysis, Investment Strategies, & Risk of Loss

A. Methods of Analysis and Investment Strategies

Methods of Analysis

GSWML's methods of analysis include Charting analysis, Cyclical analysis, Fundamental analysis, Modern portfolio theory, Quantitative analysis and Technical analysis.

Charting analysis involves the use of patterns in performance charts. GSWML uses this technique to search for patterns used to help predict favorable conditions for buying and/or selling a security.

Cyclical analysis involves the analysis of business cycles to find favorable conditions for buying and/or selling a security.

Fundamental analysis involves the analysis of financial statements, the general financial health of companies, and/or the analysis of management or competitive advantages.

Modern portfolio theory is a theory of investment that attempts to maximize portfolio expected return for a given amount of portfolio risk, or equivalently minimize risk for a given level of expected return, each by carefully choosing the proportions of various asset.

Quantitative analysis deals with measurable factors as distinguished from qualitative considerations such as the character of management or the state of employee morale, such as the value of assets, the cost of capital, historical projections of sales, and so on.

Technical analysis involves the analysis of past market data; primarily price and volume.

Investment Strategies

GSWML uses long term trading, short term trading, short sales, margin transactions and options trading (excluding uncovered options; including covered options or spreading strategies).

Investing in securities involves a risk of loss that you, as a client, should be prepared to bear.

B. Material Risks Involved

Methods of Analysis

Charting analysis strategy involves using and comparing various charts to predict long and short term performance or market trends. The risk involved in using this method is that only past performance data is considered without using other methods to crosscheck data. Using charting analysis without other methods of analysis would be making the assumption that past performance will be indicative of future performance. This may not be the case.

Cyclical analysis assumes that the markets react in cyclical patterns which, once identified, can be leveraged to provide performance. The risks with this strategy are two-fold: 1) the markets do not always repeat cyclical patterns; and 2) if too many investors begin to implement this strategy, then it changes the very cycles these investors are trying to exploit.

Fundamental analysis concentrates on factors that determine a company's value and expected future earnings. This strategy would normally encourage equity purchases in stocks that are undervalued or priced below their perceived value. The risk assumed is that the market will fail to reach expectations of perceived value.

Modern portfolio theory assumes that investors are risk averse, meaning that given two portfolios that offer the same expected return, investors will prefer the less risky one. Thus, an investor will take on increased risk only if compensated by higher expected returns. Conversely, an investor who wants higher expected returns must accept more risk. The exact trade-off will be the same for all investors, but different investors will evaluate the trade-off differently based on individual risk aversion characteristics. The implication is that a rational investor will not invest in a portfolio if a second portfolio exists with a more favorable risk-expected return profile – i.e., if for that level of risk an alternative portfolio exists which has better expected returns.

Quantitative analysis Investment strategies using quantitative models may perform differently than expected as a result of, among other things, the factors used in the models, the weight placed on each factor, changes from the factors' historical trends, and technical issues in the construction and implementation of the models.

Technical analysis attempts to predict a future stock price or direction based on market trends. The assumption is that the market follows discernible patterns and if these patterns can be identified then a prediction can be made. The risk is that markets do not always follow patterns and relying solely on this method may not take into account new patterns that emerge over time.

Investment Strategies

GSWML's use of short sales, margin transactions and options trading generally holds greater risk, and clients should be aware that there is a material risk of loss using any of those strategies.

Long term trading is designed to capture market rates of both return and risk. Due to its nature, the long-term investment strategy can expose clients to various types of risk that will typically surface at various intervals during the time the client owns the investments. These risks include but are not limited to inflation (purchasing power) risk, interest rate risk, economic risk, market risk, and political/regulatory risk.

Margin transactions use leverage that is borrowed from a brokerage firm as collateral. When losses occur, the value of the margin account may fall below the brokerage firm's threshold thereby triggering a margin call. This may force the account holder to either allocate more funds to the account or sell assets on a shorter time frame than desired.

Options transactions involve a contract to purchase a security at a given price, not necessarily at market value, depending on the market. This strategy includes the risk that an option may expire out of the money resulting in minimal or no value, as well as the possibility of leveraged loss of trading capital due to the leveraged nature of stock options.

Short sales entail the possibility of infinite loss. An increase in the applicable securities' prices will result in a loss and, over time, the market has historically trended upward.

Short term trading risks include liquidity, economic stability, and inflation, in addition to the long term trading risks listed above. Frequent trading can affect investment performance, particularly through increased brokerage and other transaction costs and taxes.

Investing in securities involves a risk of loss that you, as a client, should be prepared to bear.

C. Risks of Specific Securities Utilized

GSWML's use of short sales, margin transactions and options trading generally holds greater risk of capital loss. Clients should be aware that there is a material risk of loss using any investment strategy. The investment types listed below (leaving aside Treasury Inflation Protected/Inflation Linked Bonds) are not guaranteed or insured by the FDIC or any other government agency.

Mutual Funds: Investing in mutual funds carries the risk of capital loss and thus you may lose money investing in mutual funds. All mutual funds have costs that lower investment returns. The funds can be of bond "fixed income" nature (lower risk) or stock "equity" nature.

Equity investment generally refers to buying shares of stocks in return for receiving a future payment of dividends and/or capital gains if the value of the stock increases. The value of equity securities may fluctuate in response to specific situations for each company, industry conditions and the general economic environments.

Fixed income investments generally pay a return on a fixed schedule, though the amount of the payments can vary. This type of investment can include corporate and government debt securities, leveraged loans, high yield, and investment grade debt and structured products, such as mortgage and other asset-backed securities, although individual bonds may be the best known type of fixed income security. In general, the fixed income market is volatile and fixed income securities carry interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) Fixed income securities also carry inflation risk, liquidity risk, call risk, and credit and default risks for both issuers and counterparties. The risk of default on treasury inflation protected/inflation linked bonds is dependent upon the U.S. Treasury defaulting (extremely unlikely); however, they carry a potential risk of losing share price value, albeit rather minimal. Risks of investing in foreign fixed income securities also include the general risk of non-U.S. investing described below.

Exchange Traded Funds (ETFs): An ETF is an investment fund traded on stock exchanges, similar to stocks. Investing in ETFs carries the risk of capital loss (sometimes up to a 100% loss in the case of a stock holding bankruptcy). Areas of concern include the lack of transparency in products and increasing complexity, conflicts of interest and the possibility of inadequate regulatory compliance. Risks in investing in ETFs include trading risks, liquidity and shutdown risks, risks associated with a change in authorized participants and non-participation of authorized participants, risks that trading price differs from indicative net asset value (iNAV), or price fluctuation and disassociation from the index being tracked. With regard to trading risks, regular trading adds cost to your portfolio thus counteracting the low fees that one of the typical benefits of ETFs. Additionally, regular trading to beneficially “time the market” is difficult to achieve. Even paid fund managers struggle to do this every year, with the majority failing to beat the relevant indexes. With regard to liquidity and shutdown risks, not all ETFs have the same level of liquidity. Since ETFs are at least as liquid as their underlying assets, trading conditions are more accurately reflected in implied liquidity rather than the average daily volume of the ETF itself. Implied liquidity is a measure of what can potentially be traded in ETFs based on its underlying assets. ETFs are subject to market volatility and the risks of their underlying securities, which may include the risks associated with investing in smaller companies, foreign securities, commodities, and fixed income investments (as applicable). Foreign securities in particular are subject to interest rate, currency exchange rate, economic, and political risks, all of which are magnified in emerging markets. ETFs that target a small universe of securities, such as a specific region or market sector, are generally subject to greater market volatility, as well as to the specific risks associated with that sector, region, or other focus. ETFs that use derivatives, leverage, or complex investment strategies are subject to additional risks. Precious Metal ETFs (e.g., Gold, Silver, or Palladium Bullion backed “electronic shares” not physical metal) specifically may be negatively impacted by several unique factors, among them (1) large sales by the official sector which own a significant portion of aggregate world holdings in gold and

other precious metals, (2) a significant increase in hedging activities by producers of gold or other precious metals, (3) a significant change in the attitude of speculators and investors. The return of an index ETF is usually different from that of the index it tracks because of fees, expenses, and tracking error. An ETF may trade at a premium or discount to its net asset value (NAV) (or indicative value in the case of exchange-traded notes). The degree of liquidity can vary significantly from one ETF to another and losses may be magnified if no liquid market exists for the ETF's shares when attempting to sell them. Each ETF has a unique risk profile, detailed in its prospectus, offering circular, or similar material, which should be considered carefully when making investment decisions.

Real estate funds (including REITs) face several kinds of risk that are inherent in the real estate sector, which historically has experienced significant fluctuations and cycles in performance. Revenues and cash flows may be adversely affected by: changes in local real estate market conditions due to changes in national or local economic conditions or changes in local property market characteristics; competition from other properties offering the same or similar services; changes in interest rates and in the state of the debt and equity credit markets; the ongoing need for capital improvements; changes in real estate tax rates and other operating expenses; adverse changes in governmental rules and fiscal policies; adverse changes in zoning laws; the impact of present or future environmental legislation and compliance with environmental laws.

Private placements carry a substantial risk as they are subject to less regulation than are publicly offered securities, the market to resell these assets under applicable securities laws may be illiquid, due to restrictions, and the liquidation may be taken at a substantial discount to the underlying value or result in the entire loss of the value of such assets.

Venture capital funds invest in start-up companies at an early stage of development in the interest of generating a return through an eventual realization event; the risk is high as a result of the uncertainty involved at that stage of development.

Commodities are tangible assets used to manufacture and produce goods or services. Commodity prices are affected by different risk factors, such as disease, storage capacity, supply, demand, delivery constraints and weather. Because of those risk factors, even a well-diversified investment in commodities can be uncertain.

Options are contracts to purchase a security at a given price, risking that an option may expire out of the money resulting in minimal or no value. An uncovered option is a type of options contract that is not backed by an offsetting position that would help mitigate risk. The risk for a "naked" or uncovered put is not unlimited, whereas the potential loss for an uncovered call option is limitless. Spread option positions entail buying and selling multiple options on the same underlying security, but with different strike prices or expiration dates, which helps limit the risk of other option trading strategies. Option transactions also involve risks including but not limited to economic risk, market risk, sector risk, idiosyncratic risk, political/regulatory risk, inflation (purchasing power) risk and interest rate risk.

Non-U.S. securities present certain risks such as currency fluctuation, political and economic change, social unrest, changes in government regulation, differences in accounting and the lesser degree of accurate public information available.

Past performance is not indicative of future results. Investing in securities involves a risk of loss that you, as a client, should be prepared to bear.

Item 9: Disciplinary Information

A. Criminal or Civil Actions

There are no criminal or civil actions to report.

B. Administrative Proceedings

There are no administrative proceedings to report.

C. Self-regulatory Organization (SRO) Proceedings

There are no self-regulatory organization proceedings to report.

Item 10: Other Financial Industry Activities and Affiliations

A. Registration as a Broker/Dealer or Broker/Dealer Representative

Neither GSWML nor its representatives are registered as, or have pending applications to become, a broker/dealer or a representative of a broker/dealer.

B. Registration as a Futures Commission Merchant, Commodity Pool Operator, or a Commodity Trading Advisor

Neither GSWML nor its representatives are registered as or have pending applications to become either a Futures Commission Merchant, Commodity Pool Operator, or Commodity Trading Advisor or an associated person of the foregoing entities.

C. Registration Relationships Material to this Advisory Business and Possible Conflicts of Interests

Anthony Michael Schmitt is a technical director at Kolping Kicks Soccer Club.

Anthony Michael Schmitt is a board member at Holy Child Catholic Grade School.

Aaron Gideon Kirsch is a licensed insurance agent. From time to time, he will offer clients advice or products from this activity. Clients should be aware that these services pay a commission and involve a possible conflict of interest, as commissionable products can conflict with the fiduciary duties of a registered investment adviser. Greenup Street Wealth Management LLC always acts in the best interest of the client; including in the sale of commissionable products to advisory clients. Clients are in no way required to implement the plan through any representative of Greenup Street Wealth Management LLC in their capacity as a licensed insurance agent.

All material conflicts of interest under California Code of Regulations Section 260.238(k) are disclosed regarding the investment adviser, its representatives or any of its employees, which could be reasonably expected to impair the rendering of unbiased and objective advice.

D. Selection of Other Advisers or Managers and How This Adviser is Compensated for Those Selections

GSWML does not utilize nor select third-party investment advisers.

Item 11: Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

A. Code of Ethics

GSWML has a written Code of Ethics that covers the following areas: Participation or Interest in Client Transactions, Personal Trading, Prohibited Purchases and Sales, Insider Trading, Personal Securities Transactions, Prohibited Activities, Conflicts of Interest, Gifts and Entertainment, Confidentiality, Service on a Board of Directors, Compliance Procedures, Compliance with Laws and Regulations, Procedures and Reporting, Certification of Compliance, Reporting Violations, Compliance Officer Duties, Training and Education, Recordkeeping, Annual Review, and Sanctions. GSWML's Code of Ethics is available free upon request to any client or prospective client.

B. Recommendations Involving Material Financial Interests

GSWML does not recommend that clients buy or sell any security in which a related person to GSWML or GSWML has a material financial interest.

C. Investing Personal Money in the Same Securities as Clients

From time to time, representatives of GSWML may buy or sell securities for themselves that they also recommend to clients. This may provide an opportunity for representatives

of GSWML to buy or sell the same securities before or after recommending the same securities to clients resulting in representatives profiting off the recommendations they provide to clients. Such transactions may create a conflict of interest. GSWML will always document any transactions that could be construed as conflicts of interest and will never engage in trading that operates to the client's disadvantage when similar securities are being bought or sold.

D. Trading Securities At/Around the Same Time as Clients' Securities

From time to time, representatives of GSWML may buy or sell securities for themselves at or around the same time as clients. This may provide an opportunity for representatives of GSWML to buy or sell securities before or after recommending securities to clients resulting in representatives profiting off the recommendations they provide to clients. Such transactions may create a conflict of interest; however, GSWML will never engage in trading that operates to the client's disadvantage if representatives of GSWML buy or sell securities at or around the same time as clients.

Item 12: Brokerage Practices

A. Factors Used to Select Custodians and/or Broker/Dealers

Custodians/broker-dealers will be recommended based on GSWML's duty to seek "best execution," which is the obligation to seek execution of securities transactions for a client on the most favorable terms for the client under the circumstances. Clients will not necessarily pay the lowest commission or commission equivalent, and GSWML may also consider the market expertise and research access provided by the broker-dealer/custodian, including but not limited to access to written research, oral communication with analysts, admittance to research conferences and other resources provided by the brokers that may aid in GSWML's research efforts. GSWML will never charge a premium or commission on transactions, beyond the actual cost imposed by the broker-dealer/custodian.

GSWML recommends Fidelity Brokerage Services LLC.

1. Research and Other Soft-Dollar Benefits

While GSWML has no formal soft dollars program in which soft dollars are used to pay for third party services, GSWML may receive research, products, or other services from custodians and broker-dealers in connection with client securities transactions ("soft dollar benefits"). GSWML may enter into soft-dollar arrangements consistent with (and not outside of) the safe harbor contained in Section 28(e) of the Securities Exchange Act of 1934, as amended. There can be no assurance that any particular client will benefit from soft dollar research, whether or not the client's transactions paid for

it, and GSWML does not seek to allocate benefits to client accounts proportionate to any soft dollar credits generated by the accounts. GSWML benefits by not having to produce or pay for the research, products or services, and GSWML will have an incentive to recommend a broker-dealer based on receiving research or services. Clients should be aware that GSWML's acceptance of soft dollar benefits may result in higher commissions charged to the client.

2. Brokerage for Client Referrals

GSWML receives no referrals from a broker-dealer or third party in exchange for using that broker-dealer or third party.

3. Clients Directing Which Broker/Dealer/Custodian to Use

GSWML may permit clients to direct it to execute transactions through a specified broker-dealer. If a client directs brokerage, then the client will be required to acknowledge in writing that the client's direction with respect to the use of brokers supersedes any authority granted to GSWML to select brokers; this direction may result in higher commissions, which may result in a disparity between free and directed accounts; the client may be unable to participate in block trades (unless GSWML is able to engage in "step outs"); and trades for the client and other directed accounts may be executed after trades for free accounts, which may result in less favorable prices, particularly for illiquid securities or during volatile market conditions. Not all investment advisers allow their clients to direct brokerage.

B. Aggregating (Block) Trading for Multiple Client Accounts

If GSWML buys or sells the same securities on behalf of more than one client, then it may (but would be under no obligation to) aggregate or bunch such securities in a single transaction for multiple clients in order to seek more favorable prices, lower brokerage commissions, or more efficient execution. In such case, GSWML would place an aggregate order with the broker on behalf of all such clients in order to ensure fairness for all clients; provided, however, that trades would be reviewed periodically to ensure that accounts are not systematically disadvantaged by this policy. GSWML would determine the appropriate number of shares and select the appropriate brokers consistent with its duty to seek best execution, except for those accounts with specific brokerage direction (if any).

Item 13: Review of Accounts

A. Frequency and Nature of Periodic Reviews and Who Makes Those Reviews

All client accounts for GSWML's advisory services provided on an ongoing basis are reviewed at least Annually by Anthony Michael Schmitt, Chief Compliance Officer, with

regard to clients' respective investment policies and risk tolerance levels. All accounts at GSWML are assigned to this reviewer.

B. Factors That Will Trigger a Non-Periodic Review of Client Accounts

Reviews may be triggered by material market, economic or political events, or by changes in client's financial situations (such as retirement, termination of employment, physical move, or inheritance).

C. Content and Frequency of Regular Reports Provided to Clients

Each client of GSWML's advisory services provided on an ongoing basis will receive a quarterly report detailing the client's account, including assets held, asset value, and calculation of fees. This written report will come from the custodian. GSWML will also provide at least quarterly a separate written statement to the client.

Item 14: Client Referrals and Other Compensation

A. Economic Benefits Provided by Third Parties for Advice Rendered to Clients (Includes Sales Awards or Other Prizes)

In addition to the soft dollar benefits as described in Item 12 above, GSWML refers clients to Advisor Credit Exchange (ACX). ACX offers credit solutions for through the Adviser Credit Exchange. GSWML receives a commission for each loan that they refer to ACX, ranging from 0 - .25% of the loan amount.

B. Compensation to Non - Advisory Personnel for Client Referrals

GSWML engages independent solicitors to provide client referrals. If a client is referred to us by a solicitor, this practice is disclosed to the client in writing by the solicitor and GSWML pays the solicitor out of its own funds—specifically, GSWML generally pays the solicitor a portion of the advisory fees earned for managing the capital of the client or investor that was referred. The use of solicitors is strictly regulated under applicable federal and state law. GSWML's policy is to fully comply with the requirements of Rule 206(4)-3, under the Investment Advisers Act of 1940, as amended, and similar state rules, as applicable.

GSWML may receive client referrals from Zoe Financial, Inc through its participation in Zoe Advisor Network (ZAN). Zoe Financial, Inc is independent of and unaffiliated with the Advisor and there is no employee relationship between them. Zoe Financial established the Zoe Advisor Network as a means of referring individuals and other

investors seeking fiduciary personal investment management services or financial planning services to independent investment advisors. Zoe Financial does not supervise GSWML and has no responsibility for GSWML's management of client portfolios or GSWML's other advice or services. GSWML pays Zoe Financial an on-going fee for each successful client referral. This fee is usually a percentage of the advisory fee that the client pays to GSWML ("Solicitation Fee"). GSWML will not charge clients referred through Zoe Advisor Network any fees or costs higher than its standard fee schedule offered to its clients. For information regarding additional or other fees paid directly or indirectly to Zoe Financial Inc, please refer to the Zoe Financial Disclosure and Acknowledgement Form.

GSWML also currently has in place an arrangement with SmartAsset CRD#307375 to refer clients to GSWML for a fee of \$120 per lead. This fee does not increase the advisory fee charged to the client.

Solicitor relationships will be fully disclosed to each Client to the extent required by applicable law. GSWML will ensure each solicitor is exempt, notice filed, or properly registered in all appropriate jurisdictions.

Item 15: Custody

When advisory fees are deducted directly from client accounts at client's custodian, GSWML will be deemed to have limited custody of client's assets and must have written authorization from the client to do so. Clients will receive all account statements and billing invoices that are required in each jurisdiction, and they should carefully review those statements for accuracy.

Item 16: Investment Discretion

GSWML provides discretionary and non-discretionary investment advisory services to clients. The advisory contract established with each client sets forth the discretionary authority for trading. Where investment discretion has been granted, GSWML generally manages the client's account and makes investment decisions without consultation with the client as to when the securities are to be bought or sold for the account, the total amount of the securities to be bought/sold, what securities to buy or sell, or the price per share. Clients with discretionary accounts will execute a limited power of attorney to evidence discretionary authority. Clients may, but typically do not, impose restrictions in investing in certain securities or types of securities in accordance with their values or beliefs.

Where GSWML does not have discretionary authority to place trade orders, GSWML will secure client permission prior to effecting securities transactions for the client's account.

Item 17: Voting Client Securities (Proxy Voting)

GSWML will not ask for, nor accept voting authority for client securities. Clients will receive proxies directly from the issuer of the security or the custodian. Clients should direct all proxy questions to the issuer of the security.

Item 18: Financial Information

A. Balance Sheet

GSWML neither requires nor solicits prepayment of more than \$1200 in fees per client, six months or more in advance, and therefore is not required to include a balance sheet with this brochure.

B. Financial Conditions Reasonably Likely to Impair Ability to Meet Contractual Commitments to Clients

Neither GSWML nor its management has any financial condition that is likely to reasonably impair GSWML's ability to meet contractual commitments to clients.

C. Bankruptcy Petitions in Previous Ten Years

GSWML has not been the subject of a bankruptcy petition in the last ten years.

Greenup Street Wealth Management LLC

Kansas Addendum to Firm Brochure

Disclosure for clients and prospective clients residing in Kansas: Please be advised that the investment advisory firm has professional liability insurance coverage for its investment advisory services. If applicable, a copy of the insurance agreement for the firm's professional liability insurance coverage will be provided to the client upon request.
