

Our Vision

GG Capital Group aims to invest in decentralization, non-custodial, private and multi-chain digital assets. In addition to digital assets, we intend to invest in products that enhance our privacy, freedom and our right to live. When these investments are found we take a different approach than the typical fund takes to holding the investment, analyzing the investment and assigning risk to the investment

GG CAPITAL GROUP

What is Compound Interest?

Compound interest is interest calculated on the initial principal, which also includes all of the accumulated interest of previous periods of a deposit or loan.

Our Team

Jordan Chaplin – Founder

Jordan Chaplin - Analyst

Our Services

We invest in Digital Assets, Real Estate and are angel investors in technologies and environments that fit our investment criteria.

Our team aims to help other investors understand human nature and how it pertains to modern investments.

Our Vision

- Our goal is to invest but to also examine ourselves , our biases, our tendencies and the sum of human nature to make the greatest asymmetric bets possible. I believe most people do not examine themselves thoroughly and this is where the GG edge resides. We also enforce discipline and a “sniper mentality” in our investing to ensure we don’t fall victim to fear/greed-based decision making.
