**PART 2A - APPENDIX 1
WRAP FEE PROGRAM BROCHURE**

This brochure provides information about the qualifications and business practices of Centerfin. If you have any questions about the contents of this brochure, contact us at 917-747-1517. The information in this brochure has not been approved or verified by the United States Securities and Exchange Commission or by any state securities authority.

Additional information about Centerfin is available on the SEC's website at www.adviserinfo.sec.gov.

Centerfin is a registered investment adviser. Registration with the United States Securities and Exchange Commission or any state securities authority does not imply a certain level of skill or training.

Item 2 Summary of Material Changes

Form ADV Part 2 requires registered investment advisers to amend their brochure when information becomes materially inaccurate. If there are any material changes to an adviser's disclosure brochure, the adviser is required to notify you and provide you with a description of the material changes.

Since the filing of our last annual updating amendment, dated March 17, 2021, we have updated our disclosure brochure to include the acknowledgement of our fiduciary status as required by a recently adopted Department of Labor rule.

Item 4 Services, Fees, and Compensation

Description of Firm

Centerfin (formerly Sophne LLC) is a registered investment advisor based in New York, New York. Centerfin Inc. is organized as a corporation under the laws of the state of Delaware. Centerfin Inc. and Sophne LLC have merged with Centerfin Inc. being the surviving entity. The Advisor commenced operations in August 2020 and is majority owned by Kyrill Asatur and Denis Toporov.

Centerfin offers discretionary investment advisory services under a wrap fee program. The wrap fee program ("Program") is made available by an interactive web-based investment management system to individual investors ("Clients") or other registered investment advisers ("RIAs"). The investment advice rendered is tailored to meet a client's investment objective and is delivered exclusively based upon information they submit via a web-based investor suitability questionnaire. The responses to the questionnaire are used to select a model portfolio based on their risk profile. Thereafter, Centerfin will monitor client portfolios on a daily basis. Once you agree with the model chosen, the program will automatically process the transaction. In providing investment advisory services through the system, all information will be provided through our web-based system. Our firm does not verify any information we receive from you or your agent(s) for accuracy, and we will rely on the information you provide. It is your responsibility to promptly update the client's account application through the web-based portal if there are ever any changes in the client's financial situation or investment objectives.

Centerfin manages model portfolios on an active basis. Portfolios primarily consist of Exchange Traded Funds and Mutual Funds, but may include a range of other securities, based on your stated goals and objectives.

In providing investment advisory services, we will accept reasonable client restrictions on the specific securities or the types of securities that may be held in your account, however if we feel the restrictions prevent us from effectively managing your account we terminate our relationship with you.

Our discretionary web-based investment advisory services require you to grant us discretionary authority to trade in client's account(s). Subject to a grant of discretionary authorization, we have the authority and responsibility to formulate investment strategies on the client's behalf. Discretionary authorization will allow us to determine the specific securities, and the amount of securities, to be purchased or sold for the client's account without obtaining the client's approval prior to each transaction. Discretionary authority is typically granted by the investment advisory agreement you sign with our firm.

The following paragraphs describe our services and fees. Refer to the description of each investment advisory service listed below for information on how we tailor our advisory services to your individual needs. As used in this brochure, the words "we," "our," and "us" refer to Centerfin and the words "you," "your," and "client" refer to you as either a client or prospective client of our firm.

As of March 22, 2022, we have approximately \$1,100,000 in discretionary assets under management.

Client Investment Process

We offer discretionary portfolio management services. Our investment advice is tailored to meet our clients' needs and investment objectives.

If you participate in our discretionary portfolio management services, we require you to grant our firm discretionary authority to manage your account. Discretionary authorization will allow us to determine

the specific securities, and the amount of securities, to be purchased or sold for your account without your approval prior to each transaction. Discretionary authority is typically granted by the investment advisory agreement you sign with our firm and the appropriate trading authorization forms.

This Program allows you to choose an investment option that employs a model portfolio developed by our firm that is diversified among investment styles and/or asset classes. We will use the information we gather to develop a strategy that enables our firm to customize an investment portfolio for you in accordance with your risk tolerance and investment objectives. Once we construct an investment portfolio for you, or select a model portfolio, we will monitor your portfolio's performance and re-balance your investments as required by changes in market conditions and in your financial circumstances.

Our annual portfolio management fee ("Program Fee") is equal to 0.50% of the market value of your assets under our management. Our Program Fee is billed and payable monthly in arrears based on the account average daily balance.

If the investment advisory agreement is executed at any time other than the first day of a calendar month, our fees will apply on a pro-rata basis, which means that the Program Fee is payable in proportion to the number of days in the month for which you are a client.

As a client, you should be aware that the wrap fee charged by our firm may be higher (or lower) than those charged by others in the industry, and that it may be possible to obtain the same or similar services from other firms at lower (or higher) rates.

Brokerage Practices

If you participate in the Program, you will be required to establish an account with Folio Investments Inc. ("Folio"), a member of the Financial Industry Regulatory Authority and the Securities Investor Protection Corporation, an unaffiliated SEC-registered broker-dealer. If you do not direct our firm to execute transactions through Folio, we reserve the right to not accept your account. Not all advisers require their clients to direct brokerage. Since you are required to use Folio, we may be unable to achieve the most favorable execution of your transactions. We believe that Folio provides quality execution services based on several factors, including, but not limited to, the ability to provide professional services, reputation, experience and financial stability.

Withdrawal of Assets

You may withdraw account assets on notice to our firm, and subject to the usual and customary securities settlement procedures. However, we design our portfolios as long-term investments and asset withdrawals may impair the achievement of your specific investment objectives.

Payment of Fees

We will deduct our fee directly from your account through the qualified custodian holding your funds and securities. We will deduct our management fee only when you have given our firm written authorization permitting the fees to be paid directly from your account. The qualified custodian will deliver an account statement to you at least quarterly. These account statements will show all disbursements from your account including our fee. You should review all statements for accuracy.

Termination of Advisory Relationship

You may terminate the wrap fee program agreement upon written notice to our firm. You will incur a pro-rata charge for services rendered prior to the termination of the wrap fee program agreement, which means you will incur management fees only in proportion to the number of days in the month for which you are a client.

Upon termination of accounts held at Folio Investments, Inc., we will deliver securities and funds held in the account per your instructions unless you request that the account be liquidated. After the wrap fee program agreement has been terminated, transactions are processed at the prevailing brokerage rates/fees. You become responsible for monitoring your own assets and our firm has no further obligation to act upon or to provide advice with respect to those assets.

Wrap Fee Program Disclosures

- The benefits under a wrap fee program depend, in part, upon the size of the Account, the management fee charged, and the number of transactions likely to be generated in the Account. For example, a wrap fee program may not be suitable for Accounts with little trading activity. In order to evaluate whether a wrap fee program is suitable for you, you should compare the Program Fee and any other costs of the Program with the amounts that would be charged by other advisers, broker-dealers, and custodians, for management fees, brokerage and other execution costs, and custodial services comparable to those provided under the Program.
- In considering the investment programs described in this brochure, you should be aware that participating in a wrap fee program may cost more or less than the cost of purchasing advisory, brokerage, and custodial services separately from other advisers or broker-dealers.
- Our firm and Associated Persons receive compensation as a result of your participation in the Program. This compensation may be more than the amount our firm or the Associated Persons would receive if you paid separately for investment advice, brokerage, and other services. Accordingly, a conflict of interest exists because our firm and our Associated Persons have a financial incentive to recommend the Program.
- Similar advisory services may be available from other registered investment advisers for lower fees.

Additional Fees And Expenses

As part of our investment advisory services to you, we may invest, or recommend that you invest, in mutual funds and exchange traded funds. The fees that you pay to our firm for investment advisory services are separate and distinct from the fees and expenses charged by mutual funds or exchange traded funds (described in each fund's prospectus) to their shareholders. These fees will generally include a management fee and other fund expenses. Separately, you may be subject to custodial fees for specific services requested by you, such as an account transfer to another brokerage firm, or wiring cash to another financial institution. These fees are typically imposed by the broker-dealer or custodian through whom your account transactions are executed. We do not share in any portion of the brokerage fees or charges imposed by the broker-dealer or custodian. To fully understand the total cost you will incur, you should review all the fees charged by mutual funds, exchange traded funds, our firm, and others.

Research and Other Soft Dollar Benefits

We do not have any soft dollar arrangements.

Economic Benefits

As a registered investment adviser, we have access to the institutional platform of your account custodian. As such, we will also have access to research products and services from your account custodian and/or other brokerage firm. These products are in addition to any benefits or research and may include financial publications, information about particular companies and industries, research software, and other products or services that provide lawful and appropriate assistance to our firm in the performance of our investment decision-making responsibilities. Such research products and services are provided to all investment advisers that utilize the institutional services platforms of these firms, and are not considered to be paid for with soft dollars.

Brokerage for Client Referrals

We do not receive client referrals from broker-dealers in exchange for cash or other compensation, such as brokerage services or research.

Item 5 Account Requirements and Types of Clients**Types of Clients**

We offer investment advisory services to individuals, families, trusts (including estates or charitable foundations), other registered investments advisors, retirement accounts, pensions, defined contribution plans, profit sharing plans, corporations, and other business entities.

IRA Rollover Recommendations

When we provide investment advice to you regarding your retirement plan account or individual retirement account, we are fiduciaries within the meaning of Title I of the Employee Retirement Income Security Act and/or the Internal Revenue Code, as applicable, which are laws governing retirement accounts. The way we make money creates some conflicts with your interests, so we operate under a special rule that requires us to act in your best interest and not put our interest ahead of yours. Under this special rule's provisions, we must:

- Meet a professional standard of care when making investment recommendations (give prudent advice);
- Never put our financial interests ahead of yours when making recommendations (give loyal advice);
- Avoid misleading statements about conflicts of interest, fees, and investments;
- Follow policies and procedures designed to ensure that we give advice that is in your best interest;
- Charge no more than is reasonable for our services; and
- Give you basic information about conflicts of interest.

We benefit financially from the rollover of your assets from a retirement account to an account that we manage or provide investment advice, because the assets increase our assets under management and, in turn, our advisory fees. As a fiduciary, we only recommend a rollover when we believe it is in your best interest.

In general, we do not require a minimum dollar amount to open and maintain an advisory account; however, we have the right to terminate your Account if it falls below a minimum size which, in our sole opinion, is too small to manage effectively.

Item 6 Portfolio Manager Selection and Evaluation

We may use one or more of the following methods of analysis or investment strategies when providing investment advice to you:

Fundamental Analysis - involves analyzing individual companies and their industry groups, such as a company's financial statements, details regarding the company's product line, the experience and expertise of the company's management, and the outlook for the company and its industry. The resulting data is used to measure the true value of the company's stock compared to the current market value.

Risk: The risk of fundamental analysis is that information obtained may be incorrect and the analysis may not provide an accurate estimate of earnings, which may be the basis for a stock's value. If securities prices adjust rapidly to new information, utilizing fundamental analysis may not result in favorable performance.

Modern Portfolio Theory - a theory of investment which attempts to maximize portfolio expected return for a given amount of portfolio risk, or equivalently minimize risk for a given level of expected return, by carefully diversifying the proportions of various assets.

Risk: Market risk is that part of a security's risk that is common to all securities of the same general class (stocks and bonds) and thus cannot be eliminated by diversification.

Long-Term Purchases - securities purchased with the expectation that the value of those securities will grow over a relatively long period of time, generally greater than one year.

Risk: Using a long-term purchase strategy generally assumes the financial markets will go up in the long-term which may not be the case. There is also the risk that the segment of the market that you are invested in or perhaps just your particular investment will go down over time even if the overall financial markets advance. Purchasing investments long-term may create an opportunity cost - "locking-up" assets that may be better utilized in the short-term in other investments.

Our investment strategies and advice may vary depending upon each client's specific financial situation. As such, we determine investments and allocations based upon your predefined objectives, risk tolerance, time horizon, financial information, liquidity needs and other various suitability factors. Your restrictions and guidelines may affect the composition of your portfolio. **It is important that you notify us immediately with respect to any material changes to your financial circumstances, including for example, a change in your current or expected income level, tax circumstances, or employment status.**

Tax Considerations

Our strategies and investments may have unique and significant tax implications. However, unless we specifically agree otherwise, and in writing, tax efficiency is not our primary consideration in the management of your assets. Regardless of your account size or any other factors, we strongly recommend that you consult with a tax professional regarding the investing of your assets.

Custodians and broker-dealers must report the cost basis of equities acquired in client accounts. Your custodian will default to the Specific Identification accounting method for calculating the cost basis of your investments. Essentially, this accounting methodology allows you to maximize losses and minimize gains for tax purposes. You are responsible for contacting your tax advisor to determine if this accounting method is the right choice for you. If your tax advisor believes another accounting method is more advantageous, provide written notice to our firm immediately and we will alert your

account custodian of your individually selected accounting method. Decisions about cost basis accounting methods will need to be made before trades settle, as the cost basis method cannot be changed after settlement.

Risk of Loss

Investing in securities involves risk of loss that you should be prepared to bear. We do not represent or guarantee that our services or methods of analysis can or will predict future results, successfully identify market tops or bottoms, or insulate clients from losses due to market corrections or declines. We cannot offer any guarantees or promises that your financial goals and objectives will be met. Past performance is in no way an indication of future performance.

Other Risk Considerations

When evaluating risk, financial loss may be viewed differently by each client and may depend on many different risks, each of which may affect the probability and magnitude of any potential losses. The following risks may not be all-inclusive, but should be considered carefully by a prospective client before retaining our services.

Liquidity Risk: The risk of being unable to sell your investment at a fair price at a given time due to high volatility or lack of active liquid markets. You may receive a lower price or it may not be possible to sell the investment at all.

Credit Risk: Credit risk typically applies to debt investments such as corporate, municipal, and sovereign fixed income or bonds. A bond issuing entity can experience a credit event that could impair or erase the value of an issuer's securities held by a client.

Inflation and Interest Rate Risk: Security prices and portfolio returns will likely vary in response to changes in inflation and interest rates. Inflation causes the value of future dollars to be worth less and may reduce the purchasing power of a client's future interest payments and principal. Inflation also generally leads to higher interest rates which may cause the value of many types of fixed income investments to decline.

Horizon and Longevity Risk: The risk that your investment horizon is shortened because of an unforeseen event, for example, the loss of your job. This may force you to sell investments that you were expecting to hold for the long term. If you must sell at a time that the markets are down, you may lose money. Longevity Risk is the risk of outliving your savings. This risk is particularly relevant for people who are retired, or are nearing retirement.

Recommendation of Particular Types of Securities

We primarily recommend ETF, and Mutual Funds. However, we may advise on other types of investments as appropriate for you since each client has different needs and different tolerance for risk. Each type of security has its own unique set of risks associated with it and it would not be possible to list here all of the specific risks of every type of investment. Even within the same type of investment, risks can vary widely. However, in very general terms, the higher the anticipated return of an investment, the higher the risk of loss associated with the investment.

Money Market Funds: A money market fund is technically a security. The fund managers attempt to keep the share price constant at \$1/share. However, there is no guarantee that the share price will stay at \$1/share. If the share price goes down, you can lose some or all of your principal. The U.S. Securities and Exchange Commission ("SEC") notes that "While investor losses in money market funds have been rare, they are possible." In return for this risk, you should earn a greater return on your cash than you would expect from a Federal Deposit Insurance Corporation ("FDIC") insured savings account (money market funds are not FDIC insured). Next, money market fund rates are

variable. In other words, you do not know how much you will earn on your investment next month. The rate could go up or go down. If it goes up, that may result in a positive outcome. However, if it goes down and you earn less than you expected to earn, you may end up needing more cash. A final risk you are taking with money market funds has to do with inflation. Because money market funds are considered to be safer than other investments like stocks, long-term average returns on money market funds tends to be less than long term average returns on riskier investments. Over long periods of time, inflation can eat away at your returns.

Certificates of Deposit: Certificates of deposit ("CD") are generally a safe type of investment since they are insured by the Federal Deposit Insurance Company ("FDIC") up to a certain amount. However, because the returns are generally low, there is risk that inflation outpaces the return of the CD. Certain CDs are traded in the market place and not purchased directly from a banking institution. In addition to trading risk, when CDs are purchased at a premium, the premium is not covered by the FDIC.

Bonds: Corporate debt securities (or "bonds") are typically safer investments than equity securities, but their risk can also vary widely based on: the financial health of the issuer; the risk that the issuer might default; when the bond is set to mature; and, whether or not the bond can be "called" prior to maturity. When a bond is called, it may not be possible to replace it with a bond of equal character paying the same rate of return.

Stocks: There are numerous ways of measuring the risk of equity securities (also known simply as "equities" or "stock"). In very broad terms, the value of a stock depends on the financial health of the company issuing it. However, stock prices can be affected by many other factors including, but not limited to the class of stock (for example, preferred or common); the health of the market sector of the issuing company; and, the overall health of the economy. In general, larger, better established companies ("large cap") tend to be safer than smaller start-up companies ("small cap") are but the mere size of an issuer is not, by itself, an indicator of the safety of the investment.

Mutual Funds and Exchange Traded Funds: Mutual funds and exchange traded funds ("ETF") are professionally managed collective investment systems that pool money from many investors and invest in stocks, bonds, short-term money market instruments, other mutual funds, other securities, or any combination thereof. The fund will have a manager that trades the fund's investments in accordance with the fund's investment objective. While mutual funds and ETFs generally provide diversification, risks can be significantly increased if the fund is concentrated in a particular sector of the market, primarily invests in small cap or speculative companies, uses leverage (i.e., borrows money) to a significant degree, or concentrates in a particular type of security (i.e., equities) rather than balancing the fund with different types of securities. ETFs differ from mutual funds since they can be bought and sold throughout the day like stock and their price can fluctuate throughout the day. The returns on mutual funds and ETFs can be reduced by the costs to manage the funds. Also, while some mutual funds are "no load" and charge no fee to buy into, or sell out of, the fund, other types of mutual funds do charge such fees which can also reduce returns. Mutual funds can also be "closed end" or "open end". So-called "open end" mutual funds continue to allow in new investors indefinitely whereas "closed end" funds have a fixed number of shares to sell which can limit their availability to new investors.

ETFs may have tracking error risks. For example, the ETF investment adviser may not be able to cause the ETF's performance to match that of its Underlying Index or other benchmark, which may negatively affect the ETF's performance. In addition, for leveraged and inverse ETFs that seek to track the performance of their Underlying Indices or benchmarks on a daily basis, mathematical compounding may prevent the ETF from correlating with performance of its benchmark. In addition, an ETF may not have investment exposure to all of the securities included in its Underlying Index, or its

weighting of investment exposure to such securities may vary from that of the Underlying Index. Some ETFs may invest in securities or financial instruments that are not included in the Underlying Index, but which are expected to yield similar performance.

Commercial Paper: Commercial paper ("CP") is, in most cases, an unsecured promissory note that is issued with a maturity of 270 days or less. Being unsecured the risk to the investor is that the issuer may default. There is a less risk in asset based commercial paper (ABCP). The difference between ABCP and CP is that instead of being an unsecured promissory note representing an obligation of the issuing company, ABCP is backed by securities. Therefore, the perceived quality of the ABCP depends on the underlying securities.

Real Estate: Real estate is increasingly being used as part of a long-term core strategy due to increased market efficiency and increasing concerns about the future long-term variability of stock and bond returns. In fact, real estate is known for its ability to serve as a portfolio diversifier and inflation hedge. However, the asset class still bears a considerable amount of market risk. Real estate has shown itself to be very cyclical, somewhat mirroring the ups and downs of the overall economy. In addition to employment and demographic changes, real estate is also influenced by changes in interest rates and the credit markets, which affect the demand and supply of capital and thus real estate values. Along with changes in market fundamentals, investors wishing to add real estate as part of their core investment portfolios need to look for property concentrations by area or by property type. Because property returns are directly affected by local market basics, real estate portfolios that are too heavily concentrated in one area or property type can lose their risk mitigation attributes and bear additional risk by being too influenced by local or sector market changes.

Real Estate Investment Trust: A real estate investment trust ("REIT") is a corporate entity which invests in real estate and/or engages in real estate financing. A REIT reduces or eliminates corporate income taxes. REITs can be publicly or privately held. Public REITs may be listed on public stock exchanges. REITs are required to declare 90% of their taxable income as dividends, but they actually pay dividends out of funds from operations, so cash flow has to be strong or the REIT must either dip into reserves, borrow to pay dividends, or distribute them in stock (which causes dilution). After 2012, the IRS stopped permitting stock dividends. Most REITs must refinance or erase large balloon debts periodically. The credit markets are no longer frozen, but banks are demanding, and getting, harsher terms to re-extend REIT debt. Some REITs may be forced to make secondary stock offerings to repay debt, which will lead to additional dilution of the stockholders. Fluctuations in the real estate market can affect the REIT's value and dividends.

Limited Partnerships: A limited partnership is a financial affiliation that includes at least one general partner and a number of limited partners. The partnership invests in a venture, such as real estate development or oil exploration, for financial gain. The general partner has management authority and unlimited liability. The general partner runs the business and, in the event of bankruptcy, is responsible for all debts not paid or discharged. The limited partners have no management authority and their liability is limited to the amount of their capital commitment. Profits are divided between general and limited partners according to an arrangement formed at the creation of the partnership. The range of risks are dependent on the nature of the partnership and disclosed in the offering documents if privately placed. Publicly traded limited partnership have similar risk attributes to equities. However, like privately placed limited partnerships their tax treatment is under a different tax regime from equities. You should speak to your tax adviser in regard to their tax treatment.

Warrants: A warrant is a derivative (security that derives its price from one or more underlying assets) that confers the right, but not the obligation, to buy or sell a security – normally an equity – at a certain price before expiration. The price at which the underlying security can be bought or sold is referred to as the exercise price or strike price. Warrants that confer the right to buy a security are

known as call warrants; those that confer the right to sell are known as put warrants. Warrants are in many ways similar to options. The main difference between warrants and options is that warrants are issued and guaranteed by the issuing company, whereas options are traded on an exchange and are not issued by the company. Also, the lifetime of a warrant is often measured in years, while the lifetime of a typical option is measured in months. Warrants do not pay dividends or come with voting rights.

PIPES: In a Private Investment in Public Equity ("PIPE") transaction, investors typically purchase securities directly from a publicly traded company in a private placement. Depending on the structure of the transaction, this can be done at a premium to or at a discount from the market price of the company's common stock. Because the sale of the securities is not pre-registered with the U.S. Securities and Exchange Commission ("SEC"), the securities are "restricted" and cannot be immediately resold by the investors into the public markets. Accordingly, the company will usually agree as part of the PIPE transaction to register the restricted securities with the SEC. Thus, the PIPE transaction can offer the company the speed and predictability of a private placement, while providing investors with a nearly liquid security. Risks of investing in PIPES include but may not be limited to substantial entry requirements, limited liquidity, limited investor control, potential for unfunded commitments, and loss of investment.

Structured Products: A structured product, also known as a market-linked product, is generally a pre-packaged investment strategy based on derivatives, such as a single security, a basket of securities, options, indices, commodities, debt issuances, and/or foreign currencies, and to a lesser extent, swaps. Structured products are usually issued by investment banks or affiliates thereof. They have a fixed maturity, and have two components: a note and a derivative. The derivative component is often an option. The note provides for periodic interest payments to the investor at a predetermined rate, and the derivative component provides for the payment at maturity. Some products use the derivative component as a put option written by the investor that gives the buyer of the put option the right to sell to the investor the security or securities at a predetermined price. Other products use the derivative component to provide for a call option written by the investor that gives the buyer of the call option the right to buy the security or securities from the investor at a predetermined price. A feature of some structured products is a "principal guarantee" function, which offers protection of principal if held to maturity. However, these products are not always Federal Deposit Insurance Corporation insured; they may only be insured by the issuer, and thus have the potential for loss of principal in the case of a liquidity crisis, or other solvency problems with the issuing company. Investing in structured products involves a number of risks including but not limited to: fluctuations in the price, level or yield of underlying instruments, interest rates, currency values and credit quality; substantial loss of principal; limits on participation in any appreciation of the underlying instrument; limited liquidity; credit risk of the issuer; conflicts of interest; and, other events that are difficult to predict.

Private Placements: A private placement (non-public offering) is an illiquid security sold to qualified investors and are not publicly traded nor registered with the Securities and Exchange Commission.

Risk: Private placements generally carry a higher degree of risk due to illiquidity. Most securities that are acquired in a private placement will be restricted securities and must be held for an extended amount of time and therefore cannot be sold easily. The range of risks are dependent on the nature of the partnership and are disclosed in the offering documents.

Proxy Voting

Centerfin has adopted and implemented written Proxy Voting Policies and Procedures ("Proxy Voting Procedures"). Within Centerfin's fiduciary obligation to clients, the firm must ensure that any proxies for which it has voting authority are voted solely in the best interests, and for the exclusive benefit of the client.

The Proxy Voting Procedures are intended to guide the firm and its personnel in ensuring that proxies are voted in such manner without limiting the firm or its personnel in specific situations to vote in a predetermined manner.

These policies, designed to assist the firm in identifying and resolving any conflicts of interest with regard to voting client proxies, direct the CCO to make the voting decision wherever a material conflict of interest has been identified. The CCO shall use discretion in determining whether further discussion and/or approval by supervisory personnel is warranted before making the Voting Decision.

A copy of the firm's Proxy Voting Policies and Procedures may be obtained upon request.

Item 7 Client Information Provided to Portfolio Managers

In order to provide our Program services, we will require certain information about you which includes, financial information, investment objectives, risk tolerance and investment time horizon. Should that information change, we request that you notify us immediately in order for us to modify the Program services appropriate to those changes.

Item 8 Client Contact with Portfolio Managers

Without restriction, you should contact our firm directly with any questions regarding your Program account. You should update your account online with respect to changes in your investment objectives, risk tolerance, or requested restrictions placed on the management of your Program assets.

Item 9 Additional Information

Disciplinary Information

We are required to disclose the facts of any legal or disciplinary events that are material to a client's evaluation of our advisory business or the integrity of our management. We do not have any required disclosures under this item.

Other Financial Industry Activities and Affiliations

Persons providing investment advice on behalf of our firm are registered representatives with Gallatin Capital LLC ("Gallatin") and Weild & Co. (Weild"). Both firms, are a securities broker-dealer, and a member of the Financial Industry Regulatory Authority and the Securities Investor Protection Corporation. In order to mitigate any conflicts of interest as a result of this relationship, Centerfin will not execute securities transactions through Gallatin or Weild, nor will clients of Centerfin be solicited to invest in any products or services provided by either firm.

Persons providing investment advice on behalf of our firm are investment advisor representatives of i-squared Wealth Management, Inc., a state Registered Investment Advisor. In order to mitigate any conflicts of interest as a result of this relationship, clients of Centerfin will not be solicited to use investment services provided by i-squared Wealth Management, Inc. Centerfin has created policies and procedures to mitigate conflicts as it relates to trading.

Description of Our Code of Ethics

We strive to comply with applicable laws and regulations governing our practices. Therefore, our Code of Ethics includes guidelines for professional standards of conduct for persons associated with our firm. Our goal is to protect your interests at all times and to demonstrate our commitment to our fiduciary duties of honesty, good faith, and fair dealing with you. All persons associated with our firm

are expected to adhere strictly to these guidelines. Persons associated with our firm are also required to report any violations of our Code of Ethics. Additionally, we maintain and enforce written policies reasonably designed to prevent the misuse or dissemination of material, non-public information about you or your account holdings by persons associated with our firm.

Clients or prospective clients may obtain a copy of our Code of Ethics by contacting us at the telephone number on the cover page of this brochure.

Personal Trading Practices

Our firm or persons associated with our firm may buy or sell the same securities that we recommend to you or securities in which you are already invested. A conflict of interest exists in such cases because we have the ability to trade ahead of you and potentially receive more favorable prices than you will receive. To mitigate this conflict of interest, it is our policy that neither our firm nor persons associated with our firm shall have priority over your account in the purchase or sale of securities.

Review of Accounts

The CEO and CIO will monitor your accounts periodically. Based on different client risk profiles, we will make changes through the web-based system based on the client's particular risk profile. Additional reviews may be conducted based on various circumstances, including, but not limited to:

- market moving events;
- security specific events; and/or
- changes in your risk/return objectives.

The individuals conducting reviews may vary from time to time, as personnel join or leave our firm.

We will not provide you with regular written reports. You will receive trade confirmations and monthly or quarterly statements from your account custodian(s).

Client Referrals and Other Compensation

We do not receive any compensation from any third party in connection with providing investment advice to you nor do we compensate any individual or firm for client referrals.

Aggregated Trades

We combine multiple orders for shares of the same securities purchased for advisory accounts we manage (this practice is commonly referred to as "aggregated trading"). We will then distribute a portion of the shares to participating accounts in a fair and equitable manner. The distribution of the shares purchased is typically proportionate to the size of the account, but it is not based on account performance or the amount or structure of management fees. Participants in this wrap program will not pay any portion of the transaction costs in addition to the program fee. Accounts owned by our firm or persons associated with our firm may participate in aggregated trading with your accounts; however, they will not be given preferential treatment.

Our firm or persons associated with our firm may buy or sell securities for you at the same time we or persons associated with our firm buy or sell such securities for our own account. We may also combine our orders to purchase securities with your orders to purchase securities ("aggregated trading"). A conflict of interest exists in such cases because we have the ability to trade ahead of you and potentially receive more favorable prices than you will receive. To eliminate this conflict of interest, it is our policy that neither our firm nor persons associated with our firm shall have priority over your account in the purchase or sale of securities.

Trade Errors

In the event a trading error occurs in your account, our policy is to restore your account to the position it should have been in had the trading error not occurred. Depending on the circumstances, corrective actions may include canceling the trade, adjusting an allocation, and/or reimbursing the account.

Class Action Lawsuits

We do not determine if securities held by you are the subject of a class action lawsuit or whether you are eligible to participate in class action settlements or litigation nor do we initiate or participate in litigation to recover damages on your behalf for injuries as a result of actions, misconduct, or negligence by issuers of securities held by you.

Financial Information

Our firm does not have any financial condition or impairment that would prevent us from meeting our contractual commitments to you. We do not take physical custody of client funds or securities, or serve as trustee or signatory for client accounts, and, we do not require the prepayment of more than \$1,200 in fees six or more months in advance. Therefore, we are not required to include a financial statement with this brochure.

We have not filed a bankruptcy petition at any time in the past ten years.

Item 10 Requirements for State-Registered Advisers

We are a federally registered investment adviser; therefore, we are not required to respond to this item.
