## FORM ADV PART 2A

March 15, 2022

**This brochure provides information about the qualifications and business practices of RiskBridge Advisors, LLC. If you have any questions about the contents of this brochure, please contact us at +1 (203) 658-6055. The information in this brochure has not been approved or verified by the United States Securities and Exchange Commission or by any state securities authority.**

**Additional information about RiskBridge Advisors, LLC also is available on the SEC's website at [www.adviserinfo.sec.gov](http://www.adviserinfo.sec.gov).**

## **Item 2. Material Changes**

Since the last annual update of the brochure on February 26, 2021, RiskBridge Advisors, LLC ("RiskBridge") has updated this brochure to:

- Clarify the disclosure regarding RiskBridge's advisory services and update regulatory assets under management in "Item 4 – Advisory Business."
- Clarify the fees charged to clients in "Item 5 – Fees and Compensation."
- Clarify the types of clients RiskBridge advises in "Item 7 – Types of Clients."

Because this Item 2 discusses only those changes that have been made to this brochure since the prior annual filing that RiskBridge believes to be material, this brochure should be reviewed in its entirety.

## **Item 4. Advisory Business**

### **Structure; History and Ownership**

RiskBridge Advisors, LLC ("RiskBridge," the "Firm," "we," or "us") is an independent, privately held Delaware limited liability company with its principal place of business located in New Canaan, Connecticut. The Firm is principally owned by Tomah Management, LLC, wholly owned by William Kennedy, the Chief Executive Officer (CEO) and Chief Investment Officer (CIO) of RiskBridge.

As of December 31, 2021, RiskBridge managed Regulatory Assets Under Management were approximately \$394,700,484, of which \$189,858,723 was managed on a discretionary basis, and \$204,841,761 was managed on a non-discretionary basis. These figures are based on the gross asset values of our clients' securities (including hedge funds and private investments) as reported to us by third party custodians and investment managers. The value of private investments is reported with at least a one-quarter lag.

In addition, we also maintain relationships with clients where we engage in proactive and ongoing leadership of the client's investment program and research services on a non-discretionary basis. However, these assets are not considered Regulatory Assets Under Management by the U.S. Securities and Exchange Commission.

### **Types of Advisory Services**

*Investment Management.* RiskBridge provides continuous and regular investment advice based on each investing client's unique needs and objectives. We offer discretionary management solutions to investing clients on a separately managed account ("Separate Account") basis. Each Separate Account client enters into a RiskBridge Investment Management Agreement ("IMA") and receives an Investment Policy Statement ("IPS") tailored to the client's unique needs. We may purchase, sell, convert, and otherwise acquire or dispose of all forms of securities and other investments permitted by the IPS. Limitations on RiskBridge's discretionary authority may result in Separate Accounts that perform differently (and potentially less successfully) than other Separate Accounts with similar strategies managed by RiskBridge that do not have such limitations.

RiskBridge may allocate Separate Account capital to a variety of securities, including, without limitation: mutual funds, exchange traded funds ("ETFs"), exchanged traded notes ("ETNs"), derivatives, Sub-Advisers, and private investment funds (hedge funds, private investments). Any assets invested directly by RiskBridge on behalf of a Separate Account are referred to collectively as the "Investment Program" or "Program."

RiskBridge may allocate Separate Account capital to unaffiliated third-party Sub-Advisers. RiskBridge may enter into a Sub-Advisory Agreement with Sub-Advisers who may exercise investment discretion and may invest capital of the Separate Account in a wide variety of securities and other instruments, including derivative instruments.

RiskBridge may allocate Separate Account capital to private investment funds as part of the Investment Program. The Separate Account client will directly execute subscription documents and partnership agreements with the private investment funds. Interests in any privately offered investment fund will be offered only pursuant to a definitive prospectus or offering memorandum, subscription materials, and organizational documents ("Offering Materials") for such private investment funds. Before making any investment decision, Separate Account clients and prospective clients should carefully review the Offering Materials and make any investment decisions solely based on such Offering Materials. RiskBridge does not offer proprietary pooled vehicles managed or sponsored by RiskBridge or any affiliates.

RiskBridge may also provide continuous and regular investment advice on a non-discretionary basis. Non-discretionary accounts enter into a RiskBridge Advisory Services Agreement ("ASA") designed to meet clients' unique needs and objectives.

*Subadvisory/Model Services.* RiskBridge Managed Volatility Portfolio ("MVP") strategies are offered directly to certain Separate Account clients. MVP strategies are also provided on a subadvisory basis by partnering with unaffiliated advisers ("RIAs") and working through their financial representatives ("Financial Advisors") to offer MVP strategies to their clients. In such cases, RIAs will enter into a RiskBridge Subadvisory Agreement ("RSA") where RiskBridge serves as the Sub-adviser to the RIA, and the RIA retains the client account responsibilities. Under the RSA, the RIA gives RiskBridge discretion to provide continuous investment advice based on the account's risk objective (conservative, moderate, aggressive). It is our intent to maintain a risk exposure following the Client Profile by using the various investment choices available under the selected MVP strategy. We utilize different security products, including exchange traded funds and mutual funds. Through our ongoing monitoring of asset class segment return and risk factors, we may change the portfolio asset mix to help meet the objectives.

To provide accurate and timely management of the MVP assets, RIAs requesting RiskBridge MVPs are asked to establish a custodial account with a designated custodian who maintains physical custody and the underlying records for the assets held in the MVP account. RiskBridge does not serve as the custodian for MVP assets, and RiskBridge will not be responsible for any custodian or transactions fees. RiskBridge strives to maintain MVP account data as accurately as possible; however, we rely on accurate reporting provided to us by the RIA and their custodian through electronic or other means. RiskBridge is not responsible for inaccurate data provided to us by the RIA or by their custodian. The RIA must also promptly submit to us in writing any changes to the Client Profile or any changes to any information the RIA has provided to us regarding the management of the client assets using MVP strategies.

Additionally, RiskBridge provides model investment strategies to unaffiliated investment advisory firms, which, in turn, offer MVP strategies to their clients. RiskBridge model investment strategies are limited to certain third-party platforms and are separate from RiskBridge's other services described herein. We do not enter into direct relationships with or serve as fiduciaries to these clients. Instead, we serve as a strategist to the investment advisory firms paying a strategist fee for access to our models. We refer to these relationships as "Platform" relationships. RiskBridge enters into a Strategist Agreement with Platform providers to provide model investment strategies. Certain investment platform providers make model portfolios and strategies available through a wrap fee program sponsored by the investment platform provider. RiskBridge does not participate in or act as sponsor of any wrap fee program.

As a strategist, RiskBridge provides ongoing monitoring and supervision of the MVP strategies and periodically recommends purchase and sale transactions of the MVP strategies by adjusting positions on the online Platform portal/console. The firms that offer our models are solely responsible for implementing all trading activity recommended by RiskBridge. They are also responsible for providing all administrative and performance reporting services to their clients. The model portfolios are not tailored to any particular investor's specific needs or circumstances. In some cases, the third-party advisor may have discretion to deviate from the model. RiskBridge does not have investment discretion over the Platform assets and does not place trades or vote proxies in Platform accounts. On occasion, these models can hold slightly different funds than RiskBridge's direct advisory accounts due to custodial relationship constraints with Underlying Fund companies that are outside of our control. Because of this fact, the performance between our standard advisory relationship and our platform models can and will differ.

For certain models, RiskBridge utilizes ETFs that are unaffiliated with RiskBridge. For these models, RiskBridge selects ETFs objectively based on their investment characteristics and fit with the model's investment objectives and our risk targeting methodology and not based on any other factors. RiskBridge does not accept or receive any fees from ETFs or funds selected to the RiskBridge platform.

*Guidance and Implementation.* RiskBridge provides investment guidance and implementation services to various institutions' boards and investment committees for a fee. RiskBridge may enter into an Advisory Service Agreement ("ASA") with clients to provide the following guidance and implementation solutions:

- Custom manager research and due diligence for alternatives and private investments
- Portfolio risk diagnostics, including stress testing and Environmental, Social, and Governance (ESG) assessment
- Macroeconomic and capital market research
- Custom risk and performance reporting
- Board and Investment Committee education addressing investment and fiduciary trends
- Investment governance, investment policy, and investment committee charter
- Enterprise risk management assessment

Please see Item 8, "Methods of Analysis, Investment Strategies, and Risk of Loss," for more information regarding our investment strategies.

## Item 5. Fees and Compensation

### Fees

*Investment Management.* RiskBridge's advisory fees are typically charged based on a percentage of the value of the client's assets under management (AUM). The maximum current applicable fee rate for RiskBridge's advisory services for a Separate Account of \$10 million or more is 0.65% annually. The maximum current applicable fee rate for RiskBridge's advisory services for a Separate Account of less than \$10 million is 1.00% annually. While it is generally RiskBridge's policy to charge fees in accordance with the fee schedule in effect at the time the Investment Management Agreement (IMA) is signed, fees are subject to negotiation. RiskBridge may waive its minimum fee or account size or charge fees different from those set forth herein, depending on facts and circumstances. All investment management fees are calculated based on the quarter average assets under management of the separate account as valued by the third party custodians and administrators holding such assets, payable quarterly in advance.

Separate Account clients will be subject to a *pro-rated* management fee with respect to partial period investments based upon the portion of the quarter for which the assets were invested, and the unearned portion of the fee will be refunded to the client (as applicable).

RiskBridge advisory fees are typically invoiced and paid by the custodian directly from the client's Separate Account assets upon request. Clients pay management and incentive fees of the subadviser and underlying funds separately.

*Subadvisory/Model Services.* RiskBridge may charge fees for delivering subadvisory services to other investment advisors. The fees for this service will be individually negotiated with the investment advisory firm and billed quarterly in advance and paid directly from the investor subadvisory account.

RiskBridge may charge fees to certain third-party Platforms to access RiskBridge's investment models. The fee amount will be stated in the Strategist Agreement and will typically be billed quarterly in advance but are subject to negotiated contract terms between RiskBridge and the Platform sponsor. Since the level of investment management effort and day-to-day operational activity is typically less for model-based relationships than for discretionary relationships, the fees for model investment strategies are usually lower than those for discretionary relationships.

### *Guidance and Implementation*

The fees charged in connection with guidance and implementation relationships vary depending on the size and scope of the relationship. Such fees are negotiated on a case-by-case basis. There is a \$10,000 minimum fee, which may be waived at RiskBridge's discretion.

## **Expenses**

Separate Account clients will generally be responsible for all custodial fees, brokerage commissions, clearing fees, interest and withholding or transfer taxes incurred in connection with trading for the Separate Account, and our fees as described above.

As we consider appropriate, we may invest a portion of a Separate Account's assets in one or more Underlying Funds, money market funds, mutual funds, or exchange-traded funds. When any such investments are made, the Separate Account client will be paying, in addition to the compensation payable to us, the Separate Account's proportionate share of any fees charged by the manager of such Underlying Fund, money market fund or mutual fund. In addition, we may invest a portion of a Separate Account's assets in a portfolio managed by a Sub-Adviser. Any fees charged by a Sub-Adviser are separate from and in addition to the fees described above. RiskBridge may negotiate fees and expenses on behalf of the Separate Account client.

A description of the brokerage and other transaction costs that will be borne by the Separate Accounts are described in more detail in Item 12 (Brokerage Practices) in this brochure.

## **Item 6. Performance-Based Fees and Side-by-Side Management**

RiskBridge does not currently charge performance-based fees (fees based on a share of capital gains or capital appreciation of client's assets) but may do so in the future. The presence of flat and performance-based fees could potentially create a conflict of interest in which RiskBridge has an incentive to favor accounts with performance-based fees.

## **Item 7. Types of Clients**

RiskBridge's clients may include U.S. and non-U.S.:

- Individuals, trusts, and estates
- Charitable organizations
- Insurance companies
- State or municipal government entities
- Corporations or other businesses
- Other Registered Investment Advisers (RIAs)
- Model portfolio program sponsors

The minimum account size for discretionary investment management Separate Accounts is \$10 million; however, we may choose to waive the minimum.

## **Item 8. Methods of Analysis, Investment Strategies and Risk of Loss**

### **Methods of Analysis and Investment Strategies**

RiskBridge specializes in asset allocation, portfolio construction, and manager selection. We take a holistic view of the portfolio and aim to understand the factors driving the portfolio's risk and returns. Unlike asset classes, risk factors allow more in-depth insight into the portfolio. Armed with this deeper understanding, we select for the client a risk-targeted portfolio with a pre-defined level of volatility as measured by the estimated annualized standard deviation of return. We then allocate the risk allowance that seeks to achieve the portfolio's targeted volatility level. Within the constraints of the client's investment policy and targeted volatility level, we may tactically tilt the portfolio towards attractive market opportunities. We believe this process's result is a well-balanced, diversified, and resilient portfolio positioned to weather capital market turbulence.

Risk allocation portfolios use exchange-traded funds (ETFs), mutual funds, outside separately managed accounts (SMAs), and private investment funds (hedged equity, private equity, hedged credit, private credit, real estate/infrastructure, and co-investments). The risk associated with each investment is carefully considered before it is added to the portfolio. Each Sub-Adviser and Underlying Fund is assigned a risk value based on its contribution to the targeted volatility level and risk allowance.

RiskBridge's risk management process includes setting limits as to a portfolio's realized volatility relative to its targeted volatility level, adhering to concentration limits as to the percentage of assets allocated to a single Underlying Fund or Sub-Adviser, and selecting only from the Firm's approved manager list of Underlying Funds and Sub-Advisers. Also, RiskBridge conducts extensive research of the liquidity, business, and market cycles to assess the prevailing macroeconomic regime. Dynamic risk allocation may be applied to adjust the targeted volatility level higher or lower based on macroeconomic and market conditions. Also, risk allowances are tactically adjusted by style, sector, or geographic factors based on changes to the prevailing macroeconomic regime.

Our manager selection process focuses on both a qualitative evaluation as well as quantitative analysis. The qualitative evaluation researches the organization (background, structure, department, and compensation scheme), analyzes its particular edge in sourcing opportunities, and evaluates the rigor of portfolio construction, risk management, and strategy implementation. The quantitative analysis helps us assess both return and risk thoroughly by comparing historical results to both appropriate benchmarks and managers with similar investment strategies. RiskBridge analyzes Underlying Funds and Sub-Advisers' specific characteristics, including their return expectations, expected contribution to risk, liquidity, and their fit within the portfolio.

We form an investment idea or strategy using a variety of resources including (but not limited to) financial publications and corporate rating services, annual reports, prospectus and other SEC filings, the information provided by direct dialogue (either phone calls or in-person meetings) with Sub-Advisers and underlying funds, and information provided by third-party research providers including periodicals, research reports, and due diligence memoranda.

## **Risks Associated with Our Investment Strategies**

The investment strategies described above that we, the Underlying Funds and/or the Sub-Advisers use for the Separate Accounts cover a wide range of investment types. Material risks involved in the strategies and investment models are described below.

On January 30, 2020, the World Health Organization declared the coronavirus ("COVID-19") to be a public health emergency. COVID-19 has led to increased short-term market volatility and may have adverse long-term effects on U.S. and world economies and markets generally. COVID-19 may adversely impact the investments of the Separate Accounts and the Underlying Funds. Its full impact, including on securities markets, the global economy and business operations, is not yet known.

*Overall Investment Risk.* All securities investments risk the loss of capital. The nature of the securities purchased and traded by the Separate Accounts and Underlying Funds and of the investment techniques and strategies we, the Underlying Funds and the Sub-Advisers employ may increase this risk. There can be no assurance that the Separate Accounts will not incur losses. Many unforeseeable events, including, but not limited to, actions by various government agencies, such as the Federal Reserve Board, and domestic and international economic and political developments, may cause sharp market fluctuations which could adversely affect the Separate Accounts.

Any past successes with our investment methodology cannot assure future results. There can be no assurance that the investments or investment techniques we employ for the Separate Accounts will achieve the Separate Accounts' investment objectives or that the Separate Accounts will be profitable. Similarly, any past successes of an Underlying Fund or Sub-Adviser with its investment methodology cannot assure future results. There can be no assurance that the investments or investment techniques employed by an Underlying Fund or Sub-Adviser will achieve its investment objectives or will be profitable.

RiskBridge believes the amount of risk and types of risk taken matter most to investment performance but do not guarantee the results of the advice given or model portfolios. Thus, losses can occur by following any strategy or investing in any security, including those recommended or applied by RiskBridge. A RiskBridge client may lose all, or a substantial portion of, its investment and clients must be prepared to bear the risk of a complete loss of their investment.

*General Investment Risk.* Investments selected directly by us and/or the Sub-Advisers and Underlying Funds we select may decline in value for any number of reasons, including changes in the overall market for equity and/or debt securities, and factors pertaining to particular portfolio securities, such as management, the market for the issuer's products or services, sources of supply, technological changes within the issuer's industry, the availability of additional capital and labor, general economic conditions, political conditions and other similar conditions.

*Market Volatility.* The securities markets have in recent years been characterized by high degrees of volatility and unpredictability. In addition, the U.S. and other national economies have recently undergone significant disruptions, and future economic conditions are uncertain. Both market and economic conditions and events such as interest rates, availability of credit, inflation rates, economic uncertainty, changes in laws (including laws relating to taxation of investments), trade barriers, currency exchange controls, national and international political circumstances (including wars, terrorist acts, or security operations), and the occurrence of various events (including hurricanes, earthquakes, other

natural disasters and disease outbreaks or pandemics) may be expected to have an impact (potentially adverse) on the profitability of the Separate Accounts.

*Concentration of Investments.* The identity and number of Underlying Funds and/or Sub-Advisers to which a Separate Account's assets are allocated will vary over time. In addition, certain Separate Accounts may allocate to a limited number of Underlying Funds and/or Sub-Advisers. Further, certain of the Separate Accounts may from time to time have a material percentage of their respective assets concentrated in one or more investment strategies or investments and a loss in any investment could have a material adverse impact on the applicable Separate Account's capital. There is a risk that a Separate Account's investments will not be diversified in all market conditions. The possible lack of diversification may subject the investments of such Separate Account to more rapid change in value than would be the case if the assets of such Separate Account were more widely diversified.

*Equity Risks.* The Separate Accounts and Underlying Funds will invest in equity securities or their equivalents. The value of these securities generally will vary with the performance of the issuer and movements in the equity markets. As a result, the Separate Accounts and/or Underlying Funds may suffer losses and/or not successfully hedge targeted risks if it invests in equity securities of issuers whose performance diverges from the expectations of the Firm, the Sub-Adviser and/or the manager of the Underlying Fund.

*Price Volatility.* Stocks are inherently volatile. Such volatility may result in the value of a Separate Account's or Underlying Fund's assets fluctuating from time-to-time more greatly than that of other investment vehicles which may be more diversified. There can be no assurance that our investment strategies, including hedging techniques, or other techniques, will be effective in protecting the Separate Accounts from such price volatility.

*Foreign Investments.* A portion of the assets of the Separate Accounts and/or Underlying Funds may consist of foreign investments, which may include foreign or domestic equity securities denominated in foreign currencies and/or traded outside of the United States. Such investments require consideration of certain risks typically not associated with investing in U.S. securities or property. Such risks include, among other things, trade balances and imbalances and related economic policies, unfavorable currency exchange rate fluctuations, imposition of exchange control regulation by the United States or foreign governments, United States and foreign withholding taxes, limitations on the removal of funds or other assets, policies of governments with respect to possible nationalization of their industries, political difficulties, including expropriation of assets, confiscatory taxation and economic or political instability in foreign nations.

There may be less publicly available information about certain foreign companies than would be the case for comparable companies in the United States and certain foreign companies may not be subject to accounting, auditing and financial reporting standards and requirements comparable to or as uniform as those of United States companies. Securities markets outside the United States, while growing in volume, have for the most part substantially less volume than U.S. markets, and many securities traded on these foreign markets are less liquid and their prices more volatile than securities of comparable U.S. companies. In addition, settlement of trades in some non-U.S. markets is slower, less systematic, and more subject to failure than in U.S. markets. There also may be less extensive regulation of the securities markets in countries other than the United States.

*Dependence on Sub-Advisers and Underlying Funds.* Each Separate Account that is primarily allocated to Sub-Advisers and Underlying Funds will be highly dependent upon the expertise and abilities of those Sub-Advisers and Underlying Funds. Each such Sub-Adviser and Underlying Fund will have investment discretion over the applicable Portfolio's assets and there is a risk that an event having a negative impact on one of the Sub-Advisers and/or Underlying Funds, such as a significant change in personnel or corporate structure or resources, may adversely affect the Portfolio's results. External Sub-Advisers and/or Underlying Funds we select may not have extensive track records.

*Multiple Managers.* The overall success of our strategies depends on, among other things, (i) the ability to develop a successful asset allocation strategy, (ii) the ability to select Sub-Advisers and Underlying Funds and to allocate the assets amongst them, and (iii) the ability of the Sub-Advisers and Underlying Funds to be successful in their strategies. The past performance of such strategies is not necessarily indicative of their future profitability. No assurance can be given that the strategy or strategies utilized will be successful under all or any future market conditions.

Because we may allocate Separate Account assets to multiple Sub-Advisers and/or Underlying Funds who make their trading decisions independently, it is possible that one or more of such Sub-Advisers and/or Underlying Funds may, at any time, take positions which may be opposite of positions taken by other Sub-Advisers and/or Underlying Funds. It is also possible that Sub-Advisers and/or Underlying Funds may on occasion take substantial positions in the same security or group of securities at the same time. The possible lack of diversification caused by these factors may subject a Portfolio to more rapid change in value than would be the case if the Portfolio were more widely diversified. In addition, a particular Sub-Adviser and/or Underlying Fund may take positions for a Separate Account which may be opposite to positions taken for its other clients.

*Due diligence considerations.* We will conduct the amount and type of due diligence we believe is adequate to select Sub-Advisers and Underlying Funds. However, due diligence is not foolproof and may not uncover problems associated with a particular Sub-Adviser or Underlying Fund. For example, one or more of the Sub-Advisers or Underlying Funds may engage in improper conduct, including unauthorized changes in investment strategy, which may be harmful and may result in losses to the Separate Account. We may rely upon representations made by Sub-Advisers, Underlying Funds, accountants, attorneys, prime brokers, and/or other investment professionals. If any such representations are misleading, incomplete, or false, this may result in the selection of a Sub-Adviser or Underlying Fund that might have otherwise been eliminated from consideration had fully accurate and complete information been made available to us.

While the Underlying Funds may be subject to certain investment restrictions, there can be no assurance that the Underlying Funds' external investment managers will comply with such restrictions. Moreover, the Separate Accounts will rely upon the valuations provided by the prime brokers or administrators of the Underlying Funds, and we cannot verify the accuracy of such valuations throughout a given Underlying Fund fiscal year. The Separate Accounts receive verification of Underlying Funds annually as part of the Underlying Funds' audit process. If an external investment manager deviates from an investment restriction, or the prime broker or administrator provides incorrect valuations, the Underlying Funds and the applicable Separate Account could be adversely affected.

*Selection and Monitoring of Sub-Advisers and Underlying Funds.* There is a risk that in our selection process we will not identify appropriate Sub-Advisers or Underlying Funds for Portfolios or will not identify weaknesses in a Sub-Adviser's or Underlying Fund's compliance or operational controls or existing material regulatory, financial, or other operational issues. Further, there is a risk that a Sub-Adviser or Underlying Fund fails to meet our expectations over time, develops significant weaknesses in its compliance or operational controls that could materially adversely affect a Separate Account's investment or develops material regulatory, financial, or other operational issues.

*Transaction Execution and Costs.* As a result of certain strategies that we and/or one or more Underlying Funds or Sub-Advisers may employ, the Separate Accounts' or Underlying Funds' portfolios may include short-term holdings (which may comprise a significant portion of the Separate Accounts' or Underlying Funds' portfolios) and, consequently, the Separate Accounts or Underlying Funds may experience a relatively high volume of trading activity. In addition, in many cases relatively narrow spreads may exist between the prices at which the Separate Accounts or Underlying Funds will purchase and sell particular positions. The successful application of our and the Underlying Funds' and Sub-Advisers' methodology may therefore depend, in part, upon the quality of execution of transactions, such as the ability of broker-dealers to execute orders on a timely and efficient basis. Although we will seek to utilize brokerage firms which will afford superior execution capability to the Separate Accounts, there is no assurance that all of the Separate Accounts' transactions will be executed with optimal quality. The level of commission charges, as an expense of the Separate Accounts and/or Underlying Funds, may therefore be a factor in determining future profitability of the Separate Accounts or Underlying Funds.

Underlying Funds and/or Sub-Advisers may allocate transactions to brokers which agree to pay all or part of their research-related expenses, or so-called "soft dollar" arrangements. Such soft dollar arrangements may result in increased commission costs or other inefficiencies in execution. There can be no assurance that an Underlying Fund or a Sub-Adviser will be successful in seeking to reduce expenses through satisfactory soft dollar arrangements or that such arrangements will not result in increased transaction costs or otherwise impact the Underlying Funds or Separate Accounts.

*Alternative Investing Generally.* Our strategies are designed for investors seeking potential long-term growth from alternative investments, who do not require regular current income and who can accept a high degree of risk in their investments. In view of, among other things, the strategies' flexibility to invest in a wide range of securities and instruments and to use a broad variety of investment techniques, the strategies may be deemed speculative in nature and are not intended to be a comprehensive investment program. The strategies are intended solely for sophisticated investors who are accustomed to and fully understand the risks of such investments.

No assurance can be given that a Separate Account or Underlying Fund will achieve its investment objective or that a Separate Account's or Underlying Fund's investment strategy will be successful.

*Alternative Investment Funds.* Alternative investment funds, such as hedge funds, private equity funds, and other private investment funds, often are: (i) highly speculative and invest in complex instruments and structures including derivatives and structured products; (ii) illiquid with limited withdrawal or redemption rights; (iii) leveraged; (iv) subject to significant volatility; (v) subject to long holding periods; (vi) less transparent than public investments; (vii) subject to significant restrictions on transfers; (viii) affected by complex tax considerations; and (ix) in the case of private equity funds, affected by capital call default risk. In addition to the above, investors in these alternative investment funds such as the Underlying Funds are subject to fees and expenses which will reduce profits or increase losses.

*Hedging Transactions.* Certain Separate Accounts and Underlying Funds and/or Sub-Advisers may utilize certain financial instruments for both investment and risk management purposes. These instruments could include writing or buying options and other derivatives, as well as shorting securities, funds, indices, or swaps, and combining long and short positions in securities and instruments to reduce overall risk. The success of a hedging strategy will depend on the Firm's, the Underlying Fund's, or the Sub-Adviser's ability to predict the future correlation, if any, between the performance of the instruments utilized for hedging purposes and the performance of the investments being hedged. The change in the correlation may also result in the hedge increasing the overall risk of the Portfolio or Underlying Fund. There is also a risk that such correlation will change over time rendering the hedge ineffective. Since the characteristics of many securities changes as markets change or time passes, the success of a hedging strategy may also be subject to the Firm's, the Underlying Fund's, or the Sub-Adviser's ability to correctly readjust and execute hedges in an efficient and timely manner.

Hedging transactions, however, also limit the opportunity for gain if the value of the portfolio position should increase. In addition, the degree of correlation between price movements of the instruments used in a hedging strategy and price movements in the portfolio position being hedged may vary. Insufficient correlation between hedged and hedging positions may not only result in failing to protect the Separate Accounts or Underlying Funds against the risks sought to be hedged but may actually increase the magnitude of overall loss in the event of losses in the hedging positions. For a variety of reasons, we, an Underlying Fund, or a Sub-Adviser may not seek or be able to establish a sufficiently accurate correlation between such hedging instruments and the portfolio holdings being hedged. Moreover, we, an Underlying Fund or a Sub-Adviser may not necessarily endeavor to hedge a Separate Account's or an Underlying Fund's portfolio whatsoever. As a general matter, the Separate Accounts' and Underlying Funds' portfolios will be exposed to basic issuer risk and other risks attendant to their investment strategy and to particular positions, which risks will not be generally hedged.

*Short Selling.* Short selling may be part of our, the Underlying Funds' and/or the Sub-Advisers' investment strategies and may be utilized both in situations where the Underlying Fund, the Sub-Adviser or we believe the securities in question are overvalued, and therefore likely to experience significant price declines, over time, or as a hedge or offset to related long positions. Short selling inherently involves certain additional risks. Selling securities short creates the risk of losing an amount greater than the initial investment in a relatively short period of time and the theoretically unlimited risk of an increase in the market price of the securities sold short. There is also the risk that the securities borrowed by a Separate Account or Underlying Fund in connection with a short sale would need to be returned to the securities lender on short notice. If the request for return of securities occurs at a time when other short sellers of the security are receiving similar requests, a "short squeeze" can occur, and the Separate Account or Underlying Fund might be compelled, at the most disadvantageous time, to replace borrowed securities previously sold short with purchases on the open market, possibly at prices significantly in excess of the proceeds received earlier. In addition, short selling can involve significant borrowing and other costs which can reduce the profit or create losses in particular positions.

*Investments in Restricted Securities.* We, the Underlying Funds, or the Sub-Advisers may cause the Separate Accounts or Underlying Funds to invest in "restricted securities," which are securities subject to significant legal or contractual restrictions on their public resale. Investing in restricted securities involves a number of significant risks. Without the ability to resell restricted securities in the public markets, a Separate Account or Underlying Fund may be compelled to hold such investments indefinitely or to dispose of them in private transactions on unattractive terms. Such restrictions therefore can impair both the avoidance of losses as well as the timely realization of gains. Although in

some instances a Separate Account or Underlying Fund may have registration rights or other contractual means of achieving liquidity as to its investment in restricted securities, such rights may in fact be limited or ineffective in achieving the secondary market desired. Restricted securities invested in by the Separate Accounts and Underlying Funds may include highly speculative, developmental stage issuers, as well as securities of more seasoned companies, which can involve significant issuer or industry related risks.

*Investments with Limited or No Liquidity.* We, the Underlying Funds, or the Sub-Advisers may decide to cause the Separate Accounts or Underlying Funds to take positions in particular securities which are relatively large as compared to their trading volume or overall market capitalization. Such positions may at times prove more difficult to sell in a timely or efficient manner and could thus impair to some extent a Separate Account's or Underlying Fund's ability to fully realize portfolio gains or limit losses. We do not generally limit investments to issues of any particular minimum capitalization. Such stocks often have less liquidity than large capitalization issues.

*Leverage; Interest Rates; Margin.* Separate Accounts and/or Underlying Funds may utilize leverage for investment purposes to increase investment positions or to make additional investments. A Separate Account will have no control over the amount of leverage used by an Underlying Fund. Leverage may be employed by means of conventional margin arrangements, or through options, swaps, forwards, and other derivative instruments.

While leverage (including the use of derivatives) presents opportunities for increasing a Separate Account's or Underlying Fund's total return, it has the effect of potentially increasing losses as well. Accordingly, any event that adversely affects the value of an investment, either directly or indirectly, could be magnified to the extent that leverage is employed. The effect of the use of leverage by the Separate Accounts and Underlying Funds in a market that moves adversely to the investments of the entity employing the leverage, could result in a loss to a Separate Account or an Underlying Fund that would be greater than if leverage were not employed by the Separate Account or Underlying Fund. In addition, to the extent that a Separate Account or Underlying Fund borrows funds, the interest cost at which the Separate Account or Underlying Fund can borrow will affect the operating results of the Separate Account or Underlying Fund.

The use of short-term margin borrowings by the Separate Accounts and Underlying Funds may result in certain additional risks to the Separate Accounts and Underlying Funds. For example, should the securities that are pledged to brokers to secure a Separate Account's or Underlying Fund's margin accounts decline in value, or should brokers from which the Separate Account or Underlying Fund has borrowed increase their maintenance margin requirements (i.e., reduce the percentage of a position that can be financed), then a Separate Account or Underlying Fund could be subject to a "margin call", pursuant to which the Separate Account or Underlying Fund must either deposit additional funds with the broker or suffer mandatory liquidation of the pledged securities to compensate for the decline in value. The broker will typically have the right to liquidate a portfolio in certain circumstances. In the event of a precipitous drop in the value of the assets of the Separate Account or Underlying Fund, the Separate Account or Underlying Fund might not be able to liquidate assets quickly enough to pay off the margin debt and might suffer mandatory liquidation of positions in a declining market at relatively low prices. Similar risks may arise in connection with longer-term borrowings and certain derivative transactions.

*Options.* We, the Underlying Funds, and the Sub-Advisers may utilize options in furtherance of our investment strategies for both speculative and hedging purposes. Options positions may include long positions, where a Separate Account or Underlying Fund is the holder of put or call options, as well as short positions, where a Separate Account or an Underlying Fund is the seller (writer) of an option. Although option techniques can increase investment return, they can also involve a relatively higher level of risk. The writing (selling) of uncovered options involves a theoretically unlimited risk of a price increase or decline, as the case may be, in the underlying security. The expiration of unexercised long option positions effectively results in loss of the entire cost or premium paid for the option. Option premium costs, as well as the cost of covering options written by a Separate Account or an Underlying Fund, can reduce or eliminate position profits or create losses as well. The ability of a Separate Account or an Underlying Fund to close out its position as a purchaser of an exchange listed option is dependent upon the existence of a liquid secondary market on option exchanges. We, the Underlying Funds, and the Sub-Advisers may also utilize options, particularly in foreign markets, which may have limited liquidity.

The seller ("writer") of a call option which is covered assumes the risk of a decline in the market price of the underlying security or other instrument below the purchase price of the underlying instrument, less the amount of premium received by the seller, and forgoes the opportunity for gain on the underlying instrument above the exercise price of the option. The buyer of a call option assumes the risk of losing its entire investment (the premium paid) in the call option. If the buyer of a call option sells short the underlying security or other instrument, a loss on the call option itself may be offset, in whole or in part, by any gain on the short sale of the underlying position.

The seller ("writer") of a put option which is covered assumes the risk of an increase in the market price of the underlying security or other instrument above the sales price (in establishing the short position) of the underlying instrument, plus the premium received by the seller, and forgoes the opportunity for gain on the underlying instrument below the exercise price of the option. The buyer of a put option assumes the risk of losing its entire investment (the premium paid) in the put option. If the buyer of a put option holds a long position in the underlying security or other instrument, a loss on the put option itself may be offset, in whole or in part, by any gain on the underlying position.

*Derivatives.* The derivatives markets are frequently characterized by limited liquidity, which can make it difficult as well as costly to close out open positions in order to either realize gains or to limit losses. Additionally, many derivatives are valued on the basis of dealers' pricing of these instruments. However, the price at which dealers value a particular derivative and the price which the same dealers would actually be willing to pay for such derivative should a Separate Account or an Underlying Fund be required to sell such position may be materially different. Such differences may have a materially adverse effect on a Separate Account or an Underlying Fund if it is required to sell derivative instruments in order to raise funds for margin purposes or to pay withdrawals.

The pricing relationships between derivatives and the underlying instruments on which they are based may not conform to anticipated or historical patterns, resulting in unanticipated losses.

The stability and liquidity of forwards, swaps, repurchase agreements, and other over-the-counter derivative transactions depend in large part on the creditworthiness of the parties to the transaction. If there is a default by the counterparty to a transaction, a Separate Account or an Underlying Fund may have contractual remedies pursuant to the agreements related to the transaction; however, exercising such contractual rights may involve delays or costs, or may not be successful, which could adversely affect the Separate Account or Underlying Fund. It is possible that in the event of a counterparty credit default, a Separate Account or an Underlying Fund may not be able to recover all or a portion of its investment in such derivative instrument and may be exposed to additional liability (*i.e.*, the obligations associated with what has become an unhedged position).

*Cybersecurity.* The computer systems, networks, and devices we use and that are used by service providers to us and our clients to carry out routine business operations employ a variety of protections designed to prevent damage or interruption from computer viruses, network failures, computer and telecommunication failures, infiltration by unauthorized persons and security breaches. Despite the various protections utilized, systems, networks, or devices potentially can be breached. A client could be negatively impacted as a result of a cybersecurity breach. Cybersecurity breaches can include unauthorized access to systems, networks, or devices; infection from computer viruses or other malicious software code; and attacks that shut down, disable, slow, or otherwise disrupt operations, business processes, or website access or functionality. Cybersecurity breaches may cause disruptions and impact business operations, potentially resulting in financial losses to a client; impediments to trading; the inability by us and other service providers to transact business; violations of applicable privacy and other laws; regulatory fines, penalties, reputational damage, reimbursement or other compensation costs, or additional compliance costs; as well as the inadvertent release of confidential information. Similar adverse consequences could result from cybersecurity breaches affecting issuers of securities in which a client invests; governmental and other regulatory authorities; exchange and other financial market operators, banks, brokers, dealers, and other financial institutions; and other parties. In addition, substantial costs may be incurred by these entities in order to prevent any cybersecurity breaches in the future.

## **Item 9. Disciplinary Information**

RiskBridge has no legal or disciplinary events to report.

## **Item 10. Other Financial Industry Activities and Affiliations**

### **Material Financial Industry Affiliations of the Firm**

RiskBridge is principally owned by Tomah Management, LLC, which is wholly owned by William Kennedy. RiskBridge also has three minority owners. RiskBridge has an advisory board, which serves at the request of RiskBridge and provides advice on an as requested basis (the "Advisory Board"). One member of the Advisory Board is also a minority owner of RiskBridge. Although we are not affiliated directly with any other investment adviser, or with any broker-dealer or other financial institution, certain of our minority owners and Advisory Board members may be affiliated with other investment advisers, broker-dealers and/or other financial institutions.

RiskBridge is not registered as a commodity pool operator with the CFTC.

RiskBridge may refer clients to one or more advisers for which it will receive compensation from such advisers. The same advisers may also be selected by RiskBridge and added to its approved manager list. This arrangement creates an incentive for RiskBridge to refer clients to such advisers. Notwithstanding the foregoing, RiskBridge will endeavor to only recommend advisers to clients that RiskBridge believes are in the client's best interest.

Currently two Advisory Board members are principals of independent, third-party investment managers. Such investment managers have been selected by RiskBridge and added to its approved manager list. This could potentially create a conflict of interest in which RiskBridge allocates client capital to such Sub-Advisers. Because (i) RiskBridge does not compensate these principals for their Advisory Board services, (ii) RiskBridge selected these firms based on the merits of their quantitative and qualitative assessment, and (iii) RiskBridge has also selected competing products to the approved manager list, we believe that these conflicts are substantially mitigated, but clients should be aware of their potential. In addition, RiskBridge may engage additional Advisory Board members in the future who may also be associated with independent, third-party investment managers who are on RiskBridge's approved manager list.

### **Conflicts of Interest**

RiskBridge engages in a broad range of activities, including investment activities for the accounts of RiskBridge clients. In the ordinary course of conducting its activities, the interests of a RiskBridge client may conflict with the interests of RiskBridge, its affiliates or other RiskBridge clients. Certain of these conflicts of interest, as well as a description of how RiskBridge addresses such conflicts of interest, are outlined below. The below discussion does not describe all conflicts that may arise. Other conflicts may be disclosed throughout this brochure, including, without limitation, in Item 11, and this brochure should be read in its entirety for other conflicts.

*Valuation* - The valuation of investments in Separate Accounts presents several conflicts of interest between and among clients and RiskBridge. As discussed in Item 8, RiskBridge may invest in, or allocate assets to Underlying Funds or Sub-Advisers that invest in assets that lack a readily ascertainable market value. Such assets will generally be assigned a fair valuation determined by RiskBridge, or the Underlying Fund or Sub-Adviser. The valuation of such assets presents a conflict of interest for RiskBridge, and for an Underlying Fund or Sub-Adviser, insofar as such valuation affects the performance results of RiskBridge or the underlying manager, the calculation of any asset-based performance-based fees on such assets, and the price at which investors purchase, sell or redeem interests.

*Management of the Funds.* RiskBridge may, in the future, establish one or more investment funds with investment objectives substantially similar to, or different from, those of current RiskBridge clients. Allocation of available investment opportunities among RiskBridge clients and any such investment fund could give rise to conflicts of interest. See "*Allocation of Investment Opportunities*" below. In addition, it is expected that employees of RiskBridge responsible for managing a particular RiskBridge client account will have responsibilities with respect to other RiskBridge clients, including funds that may be established in the future.

*Diverse Membership.* The Advisory Board members may include persons with conflicting interests with respect to their participation on the Advisory Board. As a consequence, conflicts of interest may arise in connection with decisions made by RiskBridge, including with respect to selecting Sub-Advisers and Underlying Funds.

*Conflicts of Underlying Funds and Sub-Advisers.* Underlying Funds and Sub-Advisers have interests and relationships that may create conflicts of interest related to their management of Portfolios. Such conflicts of interest may be similar to, different from or supplemental to those conflicts described herein relating to RiskBridge. For example, Underlying Funds or Sub-Advisers may have additional or different conflicts with respect to trading and investment practices, including their selection of broker-dealers, aggregation of orders for multiple clients or netting of orders for the same client as well as with respect to the investment of client assets in companies in which they have an interest.

*Resolution of Conflicts.* In the case of all conflicts of interest, the determination of RiskBridge regarding which factors are relevant, and the resolution of such conflicts, will be made using RiskBridge's best judgment, in its sole discretion. In resolving conflicts, RiskBridge may consider various factors, including the interests of the applicable RiskBridge clients with respect to the immediate issue and/or with respect to their longer-term courses of dealing. Certain procedures for resolving specific conflicts of interest are set forth below. When conflicts arise, the following factors may mitigate, but will not eliminate, conflicts of interest:

1. On any issue involving actual conflicts of interest, RiskBridge will be guided by its fiduciary duty.
2. RiskBridge will not recommend that a client make an investment unless RiskBridge believes that such investment is an appropriate investment considered solely from the viewpoint of the applicable RiskBridge client.
3. Conflicts of interest will be resolved by set procedures contained in RiskBridge's compliance policies.

## **Item 11. Code of Ethics, Participation or Interest in Client Transactions and Personal Trading**

### **Code of Ethics**

RiskBridge has adopted a written Code of Ethics (the "Code") that is applicable to all supervised persons (as defined therein). The Code, which is designed to comply with Rule 204A-1 under the Advisers Act, establishes guidelines for professional conduct and personal trading procedures.

The Code states that it is improper for supervised persons and their families to use for their benefit (or the benefit of anyone other than a RiskBridge client) information about RiskBridge's trading or investment recommendations, or to take advantage of investment opportunities that would otherwise be available for a RiskBridge client. The Code requires all supervised persons to comply with applicable U.S. federal securities laws at all times.

The Code outlines written policies regarding personal trading in any brokerage or trading account in which supervised persons, or their immediate family, have any direct or indirect control or beneficial ownership. Under the Code, access persons are also required to disclose all personal account holdings to RiskBridge upon employment and to provide periodic reports to RiskBridge. The Code helps RiskBridge detect and prevent potential conflicts of interest.

Supervised persons who violate the Code may be subject to remedial actions, including, but not limited to, profit disgorgement, fines, censure, demotion, suspension, or dismissal. Supervised persons are also required to promptly report any violation of the Code of which they become aware and to annually certify compliance with the Code.

A copy of the Code is available to any RiskBridge client or prospective RiskBridge client upon request to Bill Kennedy, CEO, Chief Investment Officer, at (203) 658-6055 or in writing to RiskBridge Advisors, LLC at PO Box 575, New Canaan, CT 06840.

## **Interested Transactions**

*Principal Transactions.* Section 206 of the Investment Advisers Act of 1940, as amended (the "Advisers Act") regulates principal transactions among an investment adviser and its affiliates, on the one hand, and its clients. If an adviser (or an affiliate) purchases a security from or sells a security to a client, the adviser must disclose the terms of the transaction to the client and obtain the consent of the client prior to engaging in the principal transaction. In connection with RiskBridge's management of client assets, RiskBridge may, from time to time, engage in principal transactions and transactions with affiliates. Such transactions present conflicts of interest for RiskBridge and its affiliates. RiskBridge has established certain policies and procedures to address such conflicts of interest and to comply with the requirements of the Advisers Act as they relate to principal transactions and transactions with affiliates.

*Conflicts Related to Purchases and Sales.* RiskBridge, its affiliates and supervised persons may own, buy, or sell securities or other instruments that RiskBridge has bought, sold, or recommended to RiskBridge clients. Such transactions are subject to the policies and procedures set forth in the Code. The investment policies, fee arrangements, and other circumstances of these investments may vary among RiskBridge clients and RiskBridge, its affiliates, and supervised persons.

RiskBridge receives management or other fees in connection with its management of Separate Accounts, which creates a conflict of interest when a Separate Account is involved in an interested transaction. To address these conflicts of interest, RiskBridge's Chief Executive Officer will be responsible for confirming that RiskBridge (i) considers its duties to each client, (ii) determines whether the purchase or sale and price or other terms are comparable to what could be obtained through an arm's length transaction with a third party, and (iii) obtains any required approvals of the transaction's terms and conditions. RiskBridge will not directly or indirectly receive any commission or other transaction-based compensation for effecting any such transaction, and RiskBridge will not effect any such transaction for any client where RiskBridge may be deemed to own more than 25% of the RiskBridge client, unless such transaction complies with the requirements of RiskBridge's principal transactions policy, as described above.

A particular investment may be bought or sold for only one RiskBridge client or in different amounts and at different times for one (or more than one) RiskBridge client, even though it could have been bought or sold for other RiskBridge clients at the same time. Likewise, a particular investment may be bought for one or more RiskBridge clients when one or more other RiskBridge clients are selling the investment.

RiskBridge, a manager of an Underlying Fund or a Sub-Adviser could disadvantage a RiskBridge client because of activities conducted by them for other of their respective clients as a result of, among other things: legal restrictions on the combined size of positions which may be taken for all accounts managed by RiskBridge, the manager of such Underlying Fund or such Sub-Adviser, thereby limiting the size of a portfolio's position; and the difficulty of liquidating an investment for more than one account where the market cannot absorb the sale of the combined positions.

*Allocation of Investment Opportunities.* RiskBridge will, from time to time, encounter situations in which each must determine how to allocate investment opportunities among its clients. RiskBridge has little influence over how the manager of an Underlying Fund, or a Sub-Adviser allocates investment opportunities but expects them to allocate opportunities in a fair and equitable manner.

RiskBridge endeavors to treat clients fairly and equitably in the allocation of investment opportunities and transactions. RiskBridge has adopted written policies and procedures relating to the allocation of investment opportunities and will make allocation determinations consistently therewith.

RiskBridge will first determine which clients will participate in an investment opportunity. RiskBridge will assess whether an investment opportunity is appropriate for a particular client, based on the client's investment objectives, strategies, and structure. A client's investment objectives, strategies and structure typically are reflected in the client's organizational documents, investment management agreement or investment guidelines, as applicable. Prior to making any allocation to a client of an investment opportunity, RiskBridge will determine what additional factors may restrict or limit the offering of an investment opportunity to the client. Possible restrictions include, but are not limited to:

- Obligation to Offer: RiskBridge may be required to offer an investment opportunity to one or more clients. This obligation to offer investment opportunities may be set forth in a client's organizational documents, investment management agreement or a side letter.
- Related Investments: RiskBridge may offer an investment opportunity related to an investment previously made by a RiskBridge client to such client to the exclusion of, or resulting in a limited offering to, other clients.
- Legal and Regulatory Exclusions: RiskBridge may determine that certain clients should be excluded from an allocation due to specific legal, regulatory, and contractual restrictions placed on the participation of such persons in certain types of investment opportunities.

Once the clients that will participate in a particular investment have been identified, RiskBridge, in its discretion, will decide how to allocate such investment opportunity among the identified clients. In allocating such investment opportunity, RiskBridge may consider a wide range of factors, which may include, but are not necessarily limited to, the following:

- Each client's investment objectives and investment focus;
- Transaction sourcing;
- Each client's liquidity and reserves;
- Each client's diversification;
- Lender covenants and similar limitations;

- Amount of capital available for investment by each client as well as each client's projected future capacity for investment;
- Composition of each client's portfolio;
- The availability of other suitable investments for each client;
- Risk considerations;
- Cash flow considerations;
- Asset class restrictions;
- Industry and other allocation targets;
- Minimum and maximum investment size requirements;
- Tax implications;
- Legal, contractual, or regulatory constraints; and
- Any other relevant limitations imposed by, or conditions set forth in the applicable investment management agreement of each client.

RiskBridge will seek to make all allocations of investment opportunities among clients in a fair and equitable manner and will not favor or disfavor any client in relation to any other client. Further, RiskBridge will not allocate investment opportunities based, in whole or in part, on (i) the relative fee structure or amount of fees paid to RiskBridge by any client, or (ii) the profitability to RiskBridge of any client.

The appropriate allocation between clients of expenses and fees generated in the course of evaluating and making investments which are not consummated, such as out-of-pocket fees associated with due diligence, attorney fees and the fees of other professionals, will be determined by RiskBridge in its good faith judgment.

In exercising discretion to allocate investment opportunities, fees, and expenses, RiskBridge may be faced with a variety of potential conflicts of interest. For example, an investment adviser allocating an investment opportunity among clients with differing fee, expense and compensation structures has an incentive to allocate investment opportunities to the clients from which it derives, directly or indirectly, a higher fee, compensation, or other benefit.

In addition, affiliates of RiskBridge, including principal executive officers, Advisory Board members, and other personnel of RiskBridge, may in the future invest with RiskBridge and may therefore participate in investments selected by RiskBridge. The existence of these varying circumstances may present conflicts of interest in determining how much, if any, of certain investment opportunities to offer.

## **Item 12. Brokerage Practices**

### **Selection of Brokers**

While RiskBridge may provide advice with respect to a wide variety of securities, we generally allocate Separate Account assets to Underlying Funds and Sub-Advisers. Interests in Underlying Funds are traded directly with the issuer and not placed through a broker-dealer. We also enter into subadvisory relationships with Sub-Advisers. We expect that the managers of the Underlying Funds and the Sub-Advisers will direct brokerage business on the basis of best available execution and in consideration of such brokers' provision of brokerage, research, and related services, but we do not participate in those decisions and no absolute assurances can be made in that respect.

We may recommend that a Separate Account client use a certain custodian or broker including Charles Schwab & Co., Inc. ("Schwab"), however, the client will decide whether to do so and will open the account directly with the custodian or broker. Schwab provides us with access to their institutional brokerage services (trading, custody, reporting and related services). Schwab has also agreed to pay for certain technology, research, marketing, and compliance consulting products and services on our behalf once the value of our clients' assets in accounts at Schwab reaches certain thresholds. The fact that we receive these benefits from Schwab is an incentive for us to recommend the use of Schwab rather than making such a decision based exclusively on a client's interest in receiving the best value in custody services and the most favorable execution of transactions. This is a conflict of interest. We believe, however, that taken in the aggregate when we recommend the use of Schwab as custodian and broker it is in the best interests of our clients. Our selection is primarily supported by the scope, quality, and price of Schwab's services and not Schwab's services that benefit only us.

RiskBridge clients are generally not permitted to direct the Firm to use a particular broker to execute transactions in the client's Separate Account. In the case of directed brokerage, the client may pay a higher transaction fee and costs or receive less favorable trade execution than would be the case if the client had not directed trading to a designated broker.

With respect to any direct trading activity conducted by RiskBridge (for example when RiskBridge directly invests the assets of a Separate Account in individual publicly traded securities), we will seek "best execution" for the transaction. In determining whether a particular broker or dealer is likely to provide best execution in a particular transaction, we take into account a number of factors we deem relevant to the broker's or dealer's execution capability, for example, price, the size of the transaction, the nature of the market for the security, the amount of the commission, the timing of the transaction, market trends, the reputation, experience and financial stability of the broker or dealer, and the quality of service rendered by the broker or dealer in other transactions.

RiskBridge has no affiliations with any broker/dealer.

## **Soft Dollars**

RiskBridge has no "soft dollar" or other direct or indirect compensation arrangement with any broker/dealer transacting on its behalf.

## **Aggregation of Orders**

When we deem the purchase or sale of securities to be in the best interest of than more one Separate Account, we may aggregate the securities to be purchased or sold by all such Separate Accounts in order to obtain superior execution or lower brokerage expenses. In particular, execution prices for identical securities purchased or sold on behalf of multiple Separate Accounts in any one business day may be averaged. In such events, allocation of the securities purchased or sold, as well as expenses incurred in the transaction, will be made among the Separate Accounts by applying such considerations as we deem appropriate, including:

- relative account size of such entities and clients,
- amount of available capital,
- size of existing positions in the same or similar securities,
- impact of leverage,
- investment objective and
- strategy considerations, including, without limitation,
  - concentration parameters,
  - tax considerations and
  - other factors.

Although such allocations may be *pro rata* among Separate Accounts, they will not necessarily be so. No Separate Account will be entitled to investment priority over another Separate account and may not necessarily participate in every investment opportunity. We endeavor to make all investment allocations in a manner which we consider to be the most equitable to all Separate Accounts.

## **Item 13. Review of Accounts**

RiskBridge client accounts are regularly reviewed by the CIO with respect to investment strategy and the suitability of the investments used to meet the investment objectives of an account.

Reporting may differ for each client, and clients should confirm which reports they will receive. Separate Accounts are generally provided monthly statements directly from the custodian and quarterly reports from RiskBridge.

**Item 14. Client Referrals and Other Compensation**

We receive an economic benefit from Schwab in the form of the support products and services it makes available to us. In addition, Schwab has also agreed to pay for certain products and services for which we would otherwise have to pay once the value of our clients' assets in accounts at Schwab reaches a certain size. Clients do not pay more for assets maintained at Schwab as a result of these arrangements. However, we benefit from the arrangement because the cost of these services would otherwise be borne directly by us. Clients should consider these conflicts of interest when selecting a custodian. Please see Item 12, "Brokerage Practices - Selection of Brokers" for more information.

RiskBridge may receive referrals or introductions to potential clients. We expect to compensate third parties for client referrals. All such compensation will be fully disclosed to each client consistent with applicable law. The client will incur no additional costs or expenses as a result of any such compensation arrangements. Any such referred activities will be conducted in accordance with SEC Rule 206(4)-3 under the Advisers Act.

**Item 15. Custody**

RiskBridge does not act as a custodian for RiskBridge client assets.

In the case of Separate Account clients, RiskBridge does not have physical custody of the Separate Account client assets. We will recommend an independent, qualified custodian to the Separate Account client whose services and fees will be separate from RiskBridge's investment management fees. Separate Account clients are responsible for opening custodial accounts directly with the independent, qualified custodian. Separate Account clients should receive required periodic reports or statements from their qualified custodians and should carefully review those reports or statements and compare the records from the qualified custodians to any reports or statements that we provide. The information in any reports or statements from us may vary from a qualified custodian's reports or statements based on account procedures, reporting dates, or valuation methodologies of certain securities.

**Item 16. Investment Discretion**

RiskBridge manages Separate Accounts on a discretionary basis. We provide investment advice directly to the Separate Account pursuant to a written agreement which sets forth any investment restrictions, limitations, or guidelines on such Separate Account's investments or on our investment authority.

In special cases, RiskBridge may manage Separate Accounts on a non-discretionary basis. In such cases, we will make recommendations to the client with respect to investment transactions pursuant to a written agreement, but the client will make the ultimate investment decision.

**Item 17. Voting Client Securities**

We generally arrange for managers of the Underlying Funds and the Sub-Advisers to have the authority to vote the proxies for securities under their management. The Underlying Funds and the Sub-Advisers are responsible for retaining all required books and records associated with the proxy voting they conduct.

RiskBridge is responsible for voting proxies which are not voted by the Underlying Funds or the Sub-Advisers. RiskBridge will review each proxy independently and conduct and document any necessary research regarding the decision on how to vote. In addition, RiskBridge will be responsible for resolving any conflicts of interest regarding proxy votes. If a conflict arises, the proxy will be sent to the client to vote.

We will make information regarding how proxies were voted, as well as a copy of our voting policy and procedures, available at your request. Please submit any such requests to Bill Kennedy, CEO/CIO, at (203) 658-6055 or in writing to RiskBridge Advisors, LLC at PO Box 575, New Canaan, CT 06840.

**Item 18. Financial Information**

We do not require or solicit prepayment of more than \$1,200 in fees from any RiskBridge clients, six months or more in advance, and therefore are not required to include a balance sheet for our most recent fiscal year.
