Intrepid Wealth provides Highly structured tailored solutions to meet your needs through comprehensive financial planning including but not limited to:

- Comprehensive financial planning
- Comprehensive investment portfolio management with a focus on protecting & growing wealth
- Comprehensive Retirement Planning

How we serve our clients: We help clients crystalize their hopes, dreams, and goals for the future and then help them create an actionable financial plan with specific recommendations on how to realize all that is important to them. These plans are highly personalized & customized for your needs but tend to help people answer the following questions:

- How and when can I retire?
- How do I effectively transition out of my business?
- How should I invest/save my money to do everything I want to do?
- How do I navigate volatile market conditions?
- How much do I need to save for everything from retirement & college to buying a beach home and luxury travel?
- How can I pay less in taxes?
- How do I transfer my wealth to the next generation?

Financial Planning Services (virtual)

Our firm operates almost entirely in a Virtual manner although we can and will meet in person on an as needed basis with our clients. Through our comprehensive financial planning process, we first establish an in-depth understanding of your hopes, dreams, and goals for the future, covering everything from what is the single most important thing you want your money to do for you to what is keeping you up at night. This gives us your personal & financial baseline.

We then build and test a variety of solutions based upon our established baseline and where you want to be in the future. With your input we are able to narrow down everything you like, and don't like, about the different solutions and then boil them down into one actionable financial plan that you feel really good about and tells you exactly what you need to do to realize all that is important to you.

By collaborating with our team to build an actionable financial plan, you will increase the likelihood of getting all that you want out of life.

We use a "Results by Design" financial planning process. Focusing on specific results, the design of your plan allows us to see in advance which solutions are best suited for your situation. Living your best life today & tomorrow is our priority.

- We learn about and help you crystallize your hopes, dreams & goals
- We analyze & test your current financial situation to see if it will meet future needs
- We test multiple ways you can manage your money to find the lowest cost, lowest risk ways of reaching your goals
- We agree on customized solutions based upon the results of our analysis
- We help you implement the solutions from your financial plan
- We also work closely with your existing tax & legal counsel, working together with the common goal of helping you.

To do this type of planning we charge a planning fee so there are no surprises. You pay nothing up front. We use a financial planning agreement that spells out what we will do, what the fee is, and will not invoice you for the financial plan unless you are 100% happy & satisfied with the end result.

Portfolio Management Services

We utilize a comprehensive investment management process to maximize each client's returns while minimizing risk & taxes. Our **open architecture** allows us to offer **customized portfolio solutions** that are 100% transparent. Each client portfolio allocation is specifically designed based on your return objectives, risk profile, and tax status of your accounts. By first going through the financial planning process we are able to determine which strategies are best suited for your situation.

Retirement Income Planning

Our specialty is in meeting the income needs of investors who have or are looking to retire earlier than the norm, and have accumulated funds from sources like:

- Sold or are planning on selling their business
- Company stock liquidation
- Significant savings in retirement accounts like 401k's & IRA's
- Received an inheritance
- Won the lottery

We fully understand and appreciate the importance of creating a stable income, especially for those that may retire in their 30's, 40's, or 50's, and that it requires a specific blend of current income and future growth, while minimizing risk & taxes.

Using robust portfolio construction & retirement income projection software, we are able to design custom income solutions that are low cost, efficient, and flexible.

We may recommend third party investment advisors, such as Morningstar Investment Services to manage a portion of our client's account. We use Altruist as custodian, they are an all-in-one digital platform that offers a marketplace of 3rd party money managers.

We select and allocate investments based on these factors as well as using data from 3rd party money managers. We can recommend a large variety of investment types including stocks, bonds, ETFs, mutual funds, UMAs, and SMAs.

Investment Strategies

Risk of Loss

All investment programs have certain risks that are borne by the investor. Since we do not manage or advise you concerning your investments, you should consult your own investment advisory service. Investing in securities involves risk of loss that you should be prepared to bear. The risks can range from failing to keep pace with inflation to losing some or all of the money you invest.

Example of third-party material risks:

- Interest-rate Risk: Changes in interest rates may cause investment prices to fluctuate. For example, when interest rates rise, yields on existing bonds become less attractive, causing their market values to decline.
- Market Risk: The price of a security, bond, or mutual fund may drop in reaction to tangible and intangible events and conditions. This type of risk is caused by external factors independent of a security's particular underlying circumstances. For example, political, economic and social conditions may trigger market events.

- **Inflation Risk:** When any type of inflation is present, a dollar today will not buy as much as a dollar next year, because purchasing power is eroding at the rate of inflation.
- **Currency Risk:** Overseas investments are subject to fluctuations in the value of the dollar against the currency of the investment's originating country. This is also referred to as exchange rate risk.
- **Reinvestment Risk:** This is the risk that future proceeds from investments may have to be reinvested at a potentially lower rate of return (i.e. interest rate). This primarily relates to fixed income securities.
- **Business Risk:** These risks are associated with a particular industry or a particular company within an industry. For example, oil-drilling companies depend on finding oil and then refining it, a lengthy process, before they can generate a profit. They carry a higher risk of profitability than an electric company, which generates its income from a steady stream of customers who buy electricity no matter what the economic environment is like.
- **Liquidity Risk:** Liquidity is the ability to readily convert an investment into cash. Generally, assets are more liquid if many traders are interested in a standardized product. For example, Treasury Bills are highly liquid, while real estate properties are not.
- **Financial Risk:** Excessive borrowing to finance a business' operations increases the risk of profitability, because the company must meet the terms of its obligations in good times and bad. During periods of financial stress, the inability to meet loan obligations may result in bankruptcy and/or a declining market value.

No particular type of security primarily recommended.
