Item 4 - Advisory Business

ICON Advisers, Inc. ("ICON," "ICON Advisers," "we" or "our") was incorporated in 1986 as Meridian Asset Management Company and became a registered investment adviser with the SEC in 1991. ICON is headquartered, near Denver, in Greenwood Village, Colorado. Dr. Craig Callahan, Founder of ICON, has sole control of ICON Management & Research Corporation ("IMRC"). IMRC owns 100% of ICON Advisers. Since IMRC owns ICON Advisers, it is considered to be an affiliate or under common control.

ICON uses a disciplined, objective, non-emotional methodology to identify industries and sectors that our methodology suggests are underpriced relative to our calculation of intrinsic value. ICON provides investment advice only with respect to equities and fixed income products described below.

Many investment managers characterize their style as falling into one of nine style boxes: by a company's market capitalization (small-cap, mid-cap, or large-cap) and by style (value, growth or blend). ICON manages its products using an approach that imposes no limits or restrictions on the market capitalization of its investments. ICON has the freedom to invest in small-, mid-, and large-size companies because we believe stocks migrate through the grid over time. Please see **Item 8** for information on our investment methodology.

ICON offers a range of portfolio solutions including tactical allocation portfolios and strategy based investing portfolios; institutional accounts; and separately managed accounts. Each of these products is described in more detail in the following pages. ICON offers asset management services to individual and institutional investors. ICON also serves as the investment sub-adviser to the ICON Funds ("ICON Funds" or "Funds"), a series of diversified and multi-sector mutual funds in the SCM Trust.

ICON manages, among other accounts, the ICON Tactical Allocation Portfolios and ICON Strategy Based Investing Portfolios that invest in the ICON Funds, which are sub-advised by ICON, and in certain mutual funds advised by Shelton Capital Management ("Shelton"), and may invest in certain non-affiliated mutual funds as deemed appropriate by ICON. Please see **Item 8** for more information on the ITAP and SBI products. ICON's total assets under management ("AUM") across all accounts as of December 31, 2021, were \$805,003,507 all discretionary with no discretionary accounts.

Mutual Funds

ICON Advisers provides investment sub-advisory services to the ICON Funds. More information about the risks and operations of, and services provided to, the ICON Funds can be found in the Registration Statement filed on Form N-1A with the U.S. Securities and Exchange Commission (www.sec.gov), which includes the Prospectus and Statement of Additional Information or at www.iconfunds.com.

ICON Tactical Allocation Portfolios

ICON offers a mutual fund allocation program called the ICON Tactical Allocation Portfolios ("ITAP(s)" or "Portfolios"). The ITAPs invest exclusively in the ICON Funds and in certain mutual funds advised by Shelton for which ICON receives compensation. ICON offers Domestic, International and Global ITAPs, which have a minimum initial investment of \$25,000. You are allowed to place reasonable restrictions on the investments, which are generally at the fund level. You cannot make an investment restriction on a specific security. Depending on your restriction, ICON may not be able to manage the account like it would for other accounts in the same ITAP without restrictions. All Domestic ITAPs may hold foreign equity securities (as defined in the prospectuses of the respective funds) but the Portfolios will generally hold at least 80% of their respective investments in securities traded in the United States. ICON offers the following ITAPs:

Domestic Allocation Portfolios

- The **U.S. Growth Portfolio** strives to increase the value of your account through a rise in the market price of securities or net asset value ("NAV") of mutual funds (capital appreciation) from investments in U.S. multi-sector and diversified mutual funds.

- The **U.S. Moderate Portfolio** strives to increase the value of your account through a rise in the market price of securities or NAV of mutual funds (capital appreciation) and, to a lesser extent, providing income from investments in U.S. multi-sector, diversified, and bond mutual funds. The proportions of equity and fixed-income assets will vary through time, although ICON's U.S. Moderate Portfolio will generally invest a greater portion of assets in equity investments than ICON's U.S. Conservative Portfolio would.
- The **U.S. Conservative Portfolio** strives to increase the value of your account through a rise in the market price of securities or NAV of mutual funds (capital appreciation) and to provide income from investments in U.S. multi-sector, diversified, and bond mutual funds. The proportions of equity and fixed-income assets will vary through time, although ICON's U.S. Conservative Portfolio will generally invest a greater portion of assets in fixed-income and dividend-paying investments than ICON's U.S. Moderate Portfolio would.
- The **U.S. Income Portfolio** strives to provide income from investments in U.S. multi-sector, diversified, and bond mutual funds. The proportions of equity and fixed-income assets will vary through time, although ICON's U.S. Income Portfolio will generally invest a greater portion of assets in fixed-income and dividend-paying investments than ICON's U.S. Conservative Portfolio would have invested at any given time.

International Allocation Portfolio

- The **International Growth Portfolio** strives to increase the value of your account through a rise in the market price of securities or NAV of mutual funds (capital appreciation) from investments in international mutual funds.

Global Allocation Portfolios

- The **Global Growth Portfolio** strives to increase the value of your account through a rise in the market price of securities or NAV of mutual funds (capital appreciation) from investments in U.S. multi-sector, diversified and international mutual funds.
- The **Global Moderate Portfolio** strives to increase the value of your account through a rise in the market price of securities or NAV of mutual funds (capital appreciation) and, to a lesser extent, providing income from investments in U.S. multi-sector, diversified, bond, and international mutual funds. The proportions of equity and fixed-income assets will vary through time, although ICON's Global Moderate Portfolio will generally invest a greater portion of assets in equity investments than ICON's Global Conservative Portfolio would.
- The **Global Conservative Portfolio** strives to increase the value of your account through a rise in the market price of securities or NAV of mutual funds (capital appreciation) and to provide income from investments in U.S. multi-sector, diversified, bond, and international mutual funds. The proportions of equity and fixed-income assets will vary through time, although ICON's Global Conservative Portfolio will generally invest a greater portion of assets in fixed-income and dividend-paying investments than ICON's Global Moderate Portfolio would.

Like all investing, there is a risk of loss. This risk includes the chance that the portfolio's return will be different than expected or the possibility of losing some or all of your original investment. ICON's Growth Portfolios generally have a higher risk of loss than ICON's Moderate Portfolios and Conservative Portfolios. ICON's U.S. Income Portfolio is structured to provide the least amount of risk of the ITAPs. Please refer to **Item 8** for more Risk Information.

You must sign an investment management agreement with ICON and complete the applicable custodian's paperwork. ICON currently uses Equity Trust Company ("Equity Trust") and Charles Schwab & Co., Inc. ("Charles Schwab") as custodians for its ITAPs.

ICON Strategic Allocation Portfolios

ICON offers a mutual fund allocation program called the ICON Strategy Based Investing Allocation Portfolios (“SBI” or “SBI Portfolios”). The SBI Portfolios use a methodology developed and designed by AthenaInvest (“Athena”), which it has licensed to ICON. Athena’s Strategy Based Investing evaluates actively managed equity mutual funds based on the strategies being pursued by the fund managers. The funds are grouped and ranked by Athena based on the managers’ consistency in following their strategy. Athena believes that consistent managers beat the benchmark. The 10 Strategies include: Competitive Position, Economic Conditions, Future Growth, Market Conditions, Opportunity, Profitability, Quantitative, Risk, Social Considerations and Valuation. Athena is the sub-adviser to the SBI Portfolios and provides ICON with a model portfolio of mutual funds. Athena’s model portfolio is implemented under the supervision, control and discretion of ICON. The model portfolio will use ICON Funds for its fixed income allocation and when its strategy calls for a Valuation component. The model portfolio may also include certain funds advised by Shelton for which ICON receives compensation. The SBI Portfolios have a minimum initial investment of \$25,000.

You are allowed to place reasonable restrictions on the investments, which are generally at the fund level. You cannot make an investment restriction on a specific security. Depending on your restriction, ICON may not be able to manage the account like it would for other accounts in the same SBI Portfolios without restrictions. Additionally, depending on your account’s platform or custodian, certain securities may not be available. When this occurs, an alternate security with similar investment characteristics may be used. ICON offers the following SBI Portfolios:

SBI Global Allocation Portfolios

- The **SBI Global Growth Portfolio** strives to increase the value of your account through a rise in the market price of securities or NAV of mutual funds (capital appreciation) from investments in U.S. and international mutual funds. The SBI Global Growth Portfolio is an all-equity mutual fund portfolio comprised of approximately 70% strategic allocation and a 30% managed tactical allocation. The SBI Global Growth Portfolio will hold certain ICON Funds, and certain mutual funds advised by Shelton, whenever the strategic allocation and/or tactical allocation call(s) for a Valuation component. The SBI Global Growth Portfolio will generally invest a greater portion of assets in equity mutual funds than the SBI Global Moderate Portfolio would.
- The **SBI Global Moderate Portfolio** strives to increase the value of your account through a rise in the market price of securities or NAV of mutual funds (capital appreciation) from investments in U.S. and international mutual funds. The SBI Global Moderate Portfolio is a mutual fund portfolio comprised of approximately 50% strategic allocation, a 20% managed tactical allocation, and a 30% fixed income allocation. The SBI Global Moderate Portfolio will hold certain ICON Funds, and certain mutual funds advised by Shelton, whenever the strategic allocation and/or tactical allocation call(s) for a Valuation component, and in all cases for the fixed income allocation. The SBI Global Moderate Portfolio will generally invest a greater portion of assets in equity mutual funds than the SBI Global Conservative Portfolio would.
- The **SBI Global Conservative Portfolio** strives to increase the value of your account through a rise in the market price of securities or NAV of mutual funds (capital appreciation) from investments in U.S. and international mutual funds. The SBI Global Conservative Portfolio is a mutual fund portfolio comprised of approximately 20% strategic allocation, a 10% managed tactical allocation, and a 70% fixed income allocation. The SBI Global Conservative Portfolio will hold certain ICON Funds, and certain mutual funds advised by Shelton, whenever the strategic allocation and/or tactical allocation call(s) for a Valuation component, and in all cases for the fixed income allocation. The SBI Global Conservative Portfolio will generally invest a greater portion of assets in fixed-income funds than the SBI Global Moderate Portfolio would.

Like all investing, there is a risk of loss. This risk could be the chance that the portfolio’s return will be different than expected or the possibility of losing some or all of your original investment. ICON’s SBI Global Growth Portfolios generally have a higher risk of loss than ICON’s SBI Global Moderate Portfolios and SBI Global

Conservative Portfolios. Please refer to ***Item 8*** for more Risk Information.

You must sign an investment management agreement with ICON and complete the applicable custodian's paperwork. ICON currently uses Equity Trust as custodian for its SBI Portfolios.

Separately Managed Accounts

ICON Advisers also advises Separately Managed Accounts (“SMAs”). SMAs are accounts that invest directly in individual stocks. Investors can place reasonable restrictions on SMAs, such as not investing in a particular security. ICON’s SMAs have a minimum initial investment of \$100,000. ICON offers the following SMAs:

- The **ICON Multi-Cap U.S. Equity Portfolio** strives to increase the value of your account through a rise in the market price of securities (capital appreciation) from investments primarily in U.S. common stock investments in selected industries and sectors utilizing a value-based sector allocation strategy.
- The **ICON U.S. SRI (Socially Responsible Investing) Portfolio** strives to increase the value of your account through a rise in the market price of securities (capital appreciation) from investments primarily in U.S. securities of companies that comprise the top 40% of companies ranked at the time of purchase by Sustainalytics, an independent environmental, social, and governance (ESG) and corporate governance research, ratings and analysis firm. For more detailed information on Sustainalytics, see www.sustainalytics.com. After an investment is identified as within the top 40% of companies ranked by Sustainalytics, ICON utilizes its value based sector allocation strategy to determine whether an investment is appropriate for the portfolio.

To establish an SMA you must sign an investment management agreement with ICON and complete the applicable custodian’s paperwork. ICON currently uses Charles Schwab as custodian for its SMAs, but has the flexibility to use various custodians for this product.

Institutional Accounts

The **Institutional Domestic Core Equity Portfolio** (“DCE Portfolio”) strives to increase the value of your account through a rise in the market price of securities (capital appreciation) by investing in U.S. common stocks in selected industries and sectors using a value-based sector allocation strategy. The DCE Portfolio is offered to institutional investors such as public retirement systems, banks, foundations, endowments and pension plans or certain accredited investors. You can impose reasonable investment restrictions on DCE Portfolios.

ERISA Accounts

If you are subject to ERISA, you and/or your investment professional must inform ICON in writing. ICON does not serve as a trustee or plan administrator for any client ERISA plans and does not advise such plans on issues such as funding, diversification or distribution of plan assets.

403(b) Plan Accounts

ICON no longer directly accepts new 403(b) accounts. However, 403(b) accounts are allowed in the ICON Funds through various broker-dealers. Please refer to the ICON Funds statutory prospectus for more information.

ICON reserves the right to accept accounts below the minimum investment requirement, or to retain accounts that have dropped below a minimum account value requirement due to market fluctuation or investment activity. ICON may consider a group of accounts that have a family, corporate or other relationship to meet the minimum requirements.

Item 5 - Fees and Compensation

Mutual Fund Advisory Fee

If you own a share in one of the ICON Funds, you pay Shelton the ICON Funds Advisory Annual Fee listed in the table below. You indirectly pay ICON for its investment sub-advisory services via ICON's sub-advisory agreement with SCM Trust, under which ICON receives a portion of the ICON Funds Advisory Annual Fees from Shelton.

ICON Funds Advisory Annual Fee*

ICON Multi-Sector Funds

ICON Consumer Select Fund	1.00%
ICON Health and Information Technology Fund	1.00%
ICON Natural Resources and Infrastructure Fund	1.00%
ICON Utilities and Income Fund	1.00%

ICON Diversified Funds

ICON Flexible Bond Fund	0.60%
ICON Equity Income Fund	0.75%
ICON Equity Fund	0.75%

If you own a share in one of the Shelton Funds, you pay Shelton the Shelton Funds Advisory Annual Fee listed in the table below. ICON receives (from Shelton) a portion of the Shelton Funds Advisory Annual Fee with respect to investments through ICON model allocations in these funds. ICON will also be compensated by Shelton for certain assets attributable to the former ICON International Equity Fund and ICON Emerging Markets Fund. ICON will receive quarterly compensation for a mutually agreed period, based on a calculation of the advisory fee earned by Shelton, less certain expenses.

Shelton Funds Advisory Annual Fee

Shelton International Funds

Shelton Emerging Markets Fund	1.00%
Shelton International Select Equity Fund	0.74%

*The ICON Funds also have an expense reimbursement agreement with Shelton for certain expenses paid by Shelton due to the expense limitation agreement. Please refer to the prospectus for further information regarding fees and expenses.

The investment sub-advisory agreement between ICON and Shelton may be terminated for various reasons under the Investment Company Act of 1940 or by a vote of the Board of Trustees ("Trustees") of the Funds or by ICON upon written notice. The agreement terminates automatically if it is assigned. Please refer to the prospectus for further information regarding fees and expenses.

ITAP Investment Management Fees

For accounts custodied at Equity Trust, management fees are generally deducted monthly in arrears based on the average daily value of the account. Individual Client fees are detailed in their individual Client agreement. You may elect to have the custodian debit the account directly for fees or you may authorize ICON to debit fees from a separate bank account. Management fees are adjusted for each capital contribution and withdrawal made during the applicable month. Clients must read their Investment Management Agreement and the ADV thoroughly.

For accounts custodied at Charles Schwab, management fees are generally deducted quarterly in arrears based on the account value at the end of each quarter. You may elect to have the custodian debit the account directly for fees or you may authorize ICON to debit fees from a separate bank account. Management fees are not adjusted for each capital contribution and withdrawal made during the applicable calendar quarter.

Accounts opened or closed during a month (Equity Trust) or calendar quarter (Charles Schwab) will be charged a prorated fee. When you close your account, any earned, unpaid fees will be due and payable. Please refer to your Investment Management Agreement for more details on fees and how they are charged.

ICON pays custodial fees for the ITAP accounts, exclusive of charges imposed by the custodians for transfer taxes, wire transfer and electronic fund fees, other security transaction fees and/or other fees disclosed and imposed upon you by the custodian. Mutual funds also charge their own advisory fees, which are disclosed in a fund's prospectus and in your Investment Management Agreement with ICON. For its services as investment adviser, Client agrees to pay ICON a management fee for managing the allocation in the portfolio and servicing the account, which is in addition to the fees charged by ICON Funds and other funds not managed by ICON. ICON does not offset its fees it receives for managing the allocation and servicing Client accounts with the fees you pay on the underlying mutual funds managed by ICON. These charges, fees and commissions are exclusive of and in addition to ICON's management fee. ICON receives a portion of the advisory fee on the investments in the ICON Funds and certain Shelton Funds. If you own an ITAP, you indirectly pay Mutual Fund Advisory Fees to ICON as discussed under Mutual Fund Advisory Fee above. ITAPs invest exclusively in no-load mutual fund shares.

The investment management fees paid by ITAP clients to ICON for managing allocations and servicing the accounts, represent fees for managing the client's assets and are separate from the fees and expenses of the underlying ICON Funds and custodial transaction fees.

What is the management fee to you?

- The maximum management fee to a client is 2% per year.
- That maximum 2% management fee includes a solicitor's fee for your representative, if applicable. The portion of the fee that goes to your representative varies depending on the firm. Your representative may receive up to 100% of the management fee. Please contact your representative for further information.

While ICON reserves the right to, and in fact does, negotiate management fees, the following annual management fees apply, in general, to ITAP accounts:

<u>ITAP DOMESTIC and INTERNATIONAL ALLOCATION PORTFOLIOS</u>	
U.S. Growth, U.S. Moderate and International Growth	
Assets Under Management	Maximum Management Fee*
First \$250,000	2.00% per year
Next \$500,000	1.50% per year
Next \$250,000	1.00% per year
Over \$1,000,000	Negotiable
U.S. Conservative and U.S. Income	
Assets Under Management	Maximum Management Fee*
First \$250,000	0.80% per year
Next \$500,000	0.70% per year
Next \$250,000	0.70% per year
Over \$1,000,000	Negotiable

ITAP GLOBAL ALLOCATION PORTFOLIOS

Global Growth, Global Moderate, and Global Conservative

Assets Under Management	Maximum Management Fee*
First \$250,000	2.00% per year
Next \$500,000	1.50% per year
Next \$250,000	1.00% per year
Over \$1,000,000	Negotiable

* These fees reflect the maximum management fee, not the average fee. The above ITAPs may be offered at a reduced or lower fee at ICON's discretion or as negotiated by and at the request of clients, including the aggregating ("Householding") of some or all of a client's accounts for the purpose of qualifying for fee breakpoints. To Household, accounts must belong to related family members living in the same household, and the client or its representative must notify ICON and the client's custodian of the relationship. Solicitors are permitted to submit their own personal accounts at a discounted fee as negotiated by ICON. Portfolios may be subject to a maximum annual management fee of 2.00% and custodial fees, if applicable, as required by the account custodian.

ICON also provides its ITAP models on a no-cost, non-discretionary basis to certain relationships as a way to promote investment in the ICON Funds. These model assets are not included in ICON's regulatory assets under management as it does not provide continuous and regular supervisory or management services to the accounts. Account performance and fees on those platforms may differ from that provided by ICON directly.

Account Termination Procedures: You may terminate the investment management agreement by giving at least ten (10) days' notice in writing to ICON. ICON may also terminate the agreement with you by giving you at least ten (10) days' written notice. Upon termination, all securities will be liquidated (sold) unless you provide ICON with a signed written request with different instructions with your notice. You may be responsible for any exchange, redemption, or other fees assessed by the custodian, tax liabilities and market fluctuation. Management fees will be collected until ICON receives written notice from the client to terminate the account and has a reasonable amount of time to act on the properly issued instructions.

Should the account value drop to a level that ICON is not able to manage efficiently, ICON reserves the right to notify you in writing to deposit funds within 30 days. If the account is not funded adequately within the specified timeframe, ICON reserves the right to liquidate and close the account. The account proceeds will be mailed to the address of record, and you will be responsible for any tax liabilities incurred.

SBI Portfolio Investment Management Fees

SBI Portfolios custodied at Equity Trust have their management fees generally deducted monthly in arrears based on the average daily value of the Client Account. You may elect to have the custodian debit the account directly for fees or you may authorize ICON to debit fees from a separate bank account. Management fees are adjusted for each capital contribution and withdrawal made during the applicable month.

Accounts opened or closed during a month will be charged a prorated fee. When you close your account, any earned, unpaid fees will be due and payable. Please refer to your Investment Management Agreement for more details on any fees and how they are charged.

ICON pays custodial fees for the SBI Portfolio accounts, exclusive of charges imposed by the custodians for transfer taxes, wire transfer and electronic fund fees, and other security transaction fees. Mutual funds also charge their own advisory fees, which are disclosed in a fund's prospectus. ICON does not offset its portfolio management fee with the fees you pay on the underlying mutual funds. These charges, fees and commissions are exclusive of and in addition to ICON's management fee. ICON receives a portion of the advisory fee on the investments in the ICON Funds and certain Shelton Funds. If you own an SBI Portfolio, you indirectly pay Mutual Fund Advisory Fees to ICON, for any ICON Fund or Shelton Fund in the SBI Portfolio, as discussed under Mutual Fund Advisory Fee above. Where available and eligible, ICON seeks to invest in no-load mutual funds.

The investment management fees paid by SBI Portfolio clients to ICON represent fees for managing the client's assets and are separate from the fees and expenses of the underlying mutual funds and custodial transaction fees. Athena, as the sub-adviser to the SBI Portfolios, receives a portion of the SBI Portfolio management fee described below.

While ICON reserves the right to, and in fact does negotiate management fees, the following annual management fees apply, in general, to SBI Portfolio accounts:

SBI GLOBAL ALLOCATION PORTFOLIOS

Global Growth, Global Moderate and Global Conservative

Assets Under Management	Maximum Management Fee*
\$25,000 to \$1,000,000	1.55% per year
Over \$1,000,000	Negotiable

* These fees reflect the maximum management fee, not the average fee. The above SBI Portfolios may be offered at a reduced or lower fee at ICON's discretion or as negotiated by and at the request of clients, including the aggregating ("Householding") of some or all of a client's accounts for the purpose of qualifying for fee breakpoints. To Household, accounts must belong to related family members living in the same household, and the client or its representative must notify ICON and the client's custodian of the relationship. Solicitors are permitted to submit their own personal accounts at a discounted fee as negotiated by ICON. Portfolios may be subject to a maximum annual management fee of 1.55% and custodial fees, if applicable, as required by the account custodian.

ICON provides its SBI models to certain relationship where it maintains discretion by providing ongoing supervisory and management services at no-cost to the account. Performance and fees on those platforms may differ from that provided by ICON directly. Please refer to Item 5 related to fees and other compensation.

Account Termination Procedures: Either party may terminate this Agreement by giving at least ten (10) days' notice in writing to the other. Upon termination, all securities will be liquidated unless otherwise requested in writing and signed by you. Upon termination, you will be responsible for any exchange, redemption, or other fees assessed by mutual fund companies, the custodian, tax liabilities and market fluctuation. Management fees will be collected until ICON receives written notice from you to terminate the account and has a reasonable amount of time to act on the instructions.

Should the account value drop to a level that ICON is not able to manage efficiently, ICON reserves the right to notify you in writing to deposit funds within 30 days. If the account is not funded adequately within the specified timeframe, ICON reserves the right to liquidate and close the account. The account proceeds will be mailed to the address of record, and you will be responsible for any tax liabilities incurred.

ICON SMA Management Fees

Management fees for the SMA portfolios are generally deducted quarterly in arrears based on the account value at the end of each quarter. You may elect to have the custodian debit your account directly for fees or you may authorize ICON to debit fees from a separate bank account. Management fees will not be prorated for each capital contribution and withdrawal made during the applicable calendar quarter. Accounts opened or closed during a calendar quarter will be charged a prorated fee. When you close your account, any earned, unpaid fees will be due and payable. Please refer to your Investment Management Agreement for more details on any fees and how they are charged.

ICON's fees do not include other related costs and expenses which may be incurred by the client, such as charges imposed by custodians, brokers, and other third parties. For example, fees charged by managers, deferred sales charges, odd-lot differentials, transfer taxes, wire transfer and electronic fund fees, and other fees and taxes on brokerage accounts and securities transactions. Such charges, fees and commissions are in addition to ICON's fees and ICON does not receive any portion of these commissions, fees, and costs.

While ICON reserves the right to, and in fact does, negotiate management fees, the following annual management fees apply, in general, to ICON SMA Portfolios:

ICON MULTI-CAP U.S. EQUITY PORTFOLIO	
Assets Under Management	Maximum Annual Management Fee*
First \$250,000	1.850%
Next \$250,000	1.825%
Next \$500,000	1.800%
Next \$1,500,000	1.775%
Next \$2,500,000	1.750%
Over \$5,000,000	1.700%

* These fees reflect the maximum management fee, not the average fee. The above SMA may be offered at a reduced or lower fee at ICON's discretion or as negotiated by and at the request of clients, including the aggregating ("Householding") of some or all of a client's accounts for the purpose of qualifying for fee breakpoints. To Household, accounts must belong to related family members living in the same household, and the client or its representative must notify ICON and the client's custodian of the relationship.

ICON U.S. SRI Portfolio	
Assets Under Management	Maximum Annual Management Fee*
First \$250,000	1.250%
Next \$250,000	1.225%
Next \$500,000	1.200%
Next \$1,500,000	1.175%
Next \$2,500,000	1.150%
Over \$5,000,000	1.125%

* These fees reflect the maximum management fee, not the average fee. The above SMA may be offered at a reduced or lower fee at ICON's discretion or as negotiated by and at the request of clients, including the aggregating ("Householding") of some or all of a client's accounts for the purpose of qualifying for fee breakpoints. To Household, accounts must belong to related family members living in the same household, and the client or its representative must notify ICON and the client's custodian of the relationship.

Account Termination Procedures: You may terminate the investment management agreement by giving at least ten (10) days' notice in writing to ICON. ICON may also terminate the agreement by giving you at least ten (10) days' written notice. Upon termination, all securities will be liquidated (sold) unless you provide ICON with a signed written request with different instructions with your notice. Trades that have already been entered into at the time notice of termination is received will usually settle for the account. You will be responsible for any commissions, tax liabilities, market fluctuation, redemption fees or other fees assessed by the custodian when closing your account. Management fees will be collected until ICON receives written notice from the client to terminate the account and has a reasonable amount of time to act on the instructions.

If your account value drops to a level that ICON is not able to manage efficiently, ICON reserves the right to notify you in writing to deposit funds within 30 days. If the account is not adequately funded within the specified time frame, ICON reserves the right to liquidate and close the account. The account proceeds will be mailed to the address of record and you will be responsible for any tax liabilities incurred.

DCE Management Fees

Management fees for the DCE Portfolio are generally deducted quarterly in arrears based on the value at the end of each quarter. Certain account fees are calculated based on the specified plan requirements, if applicable. You may elect to have the custodian debit the account directly for fees or you may authorize ICON to debit fees from a separate bank account. Management fees will not be prorated for each capital contribution and withdrawal made during the applicable calendar quarter. Accounts opened or closed during a calendar quarter will be charged a

prorated fee. When you close your account, any earned, unpaid fees will be due and payable. The specific manner in which fees are charged by ICON is established in a client's written agreement with ICON.

ICON's fees do not include brokerage commissions, transaction fees, and other related costs and expenses which may be incurred by the client, such as certain charges imposed by custodians, brokers, and other third parties. For example, fees charged by managers, custodial fees, deferred sales charges, odd-lot differentials, transfer taxes, wire transfer and electronic fund fees, and other fees and taxes on brokerage accounts and securities transactions. Such charges, fees and commissions are in addition to ICON's fee, and ICON does not receive any portion of these commissions, fees, and costs.

While ICON reserves the right to, and in fact does, negotiate management fees, the following annual management fees apply, in general, to DCE Portfolios:

INSTITUTIONAL DOMESTIC CORE EQUITY PORTFOLIOS

Assets Under Management	Maximum Management Fee*
First \$10,000,000	1.00% per year
Next \$15,000,000	0.80% per year
Next \$25,000,000	0.60% per year
Next \$50,000,000	0.50% per year
Over \$100,000,000	Negotiable

*The above DCE accounts may be offered at a reduced fee at ICON's discretion or as negotiated by and at the request of clients, including the aggregating ("Householding") of some or all of a client's accounts for the purpose of qualifying for fee breakpoints. To Household, accounts must belong to related family members living in the same household, and the client or its representative must notify ICON and the client's custodian of the relationship.

Account Termination Procedures: Generally, ICON may be removed upon written notice by the account, or ICON may resign, upon advance notice in writing directed to the account. In the event of any termination, trades that have already been entered into at the time notice of termination is received will usually settle for the account. You will be responsible for any commissions, tax liabilities, market fluctuation, redemption fees or other fees assessed by the custodian when closing your account. ICON must receive specific liquidation/transfer instructions from you, in writing, when you close your DCE account. Management fees will be collected until ICON receives written notice from the client to terminate the account and has a reasonable amount of time to act on the instructions.

Item 12 further describes the factors that ICON considers in selecting broker-dealers for *client* transactions and determining the reasonableness of their compensation (e.g., commissions).

Item 6 - Performance-Based Fees and Side-By-Side Management

ICON does not charge performance-based fees (fees based on a share of capital gains or capital appreciation of the assets of a client).

Item 7 - Types of Clients

ICON provides sub-advisory and portfolio management services to registered mutual funds, individuals and high net worth individuals. Please refer to **Item 4** for account minimums

Item 8 - Methods of Analysis, Investment Strategies and Risk of Loss

Methodology

ICON ITAPs, Domestic Core Equity Portfolio and Separately Managed Accounts

The ITAPs invest exclusively in ICON Funds and certain mutual funds advised by Shelton. ICON believes that the market experiences themes, typically lasting one to two years, whereby certain industries and sectors lead or lag the overall market. ITAPs employ an active, tactical, industry rotation process that tilts our portfolios to undervalued areas of the market in an attempt to outperform passive investments and capture those market themes. This industry rotation is accomplished through the ICON Funds as sub-advised by ICON. Many investment managers characterize their style as falling into one of nine style boxes: by a company's market capitalization (small-cap, mid-cap, or large-cap) and by style (value, growth or blend). ICON's approach imposes no restrictions on the market capitalization of its investments. ICON has the freedom to invest in small-, mid-, and large-size companies because ICON believes equity securities migrate through the grid over time.

Equity Funds

ICON uses a quantitative methodology to identify stocks, industries and sectors that our methodology suggests are underpriced relative to our calculation of intrinsic value (value that you would be willing to pay for a security based on the market conditions).

The ICON valuation methodology is rooted in the fundamentals of finance. Earnings, future earnings growth, risk as measured by *beta*¹, and opportunity costs as determined by bond yields help us calculate the intrinsic value of a company. We rely on the integrity of the financial statements companies release to the market as a part of our analysis.

We use these fundamentals to analyze hundreds of companies included in approximately 158 separate sub-industries, that change over time, and eleven basic market sectors as classified by the Standard & Poor's Global Industry Classification Standard. We compare our valuation of a security to its current market price to arrive at a *Value-to-Price Ratio*² for each stock, and in turn, develop a *Value-to-Price Ratio* for each of the industries. Portfolio Managers then have discretion to choose the individual securities they determine should comprise the portfolio.

The *Value-to-Price Ratio* guides our determination as to whether stocks, sub-industries, industries or sectors are over- or underpriced.

We believe that the market goes through themes over time. As themes in the market change over time, different countries, sub-industries, industries and sectors may become leaders. Themes are defined simply: stocks in industries that were market leaders at one time tend to become overpriced relative to intrinsic value, and stocks in industries that were not in favor tend to drop below intrinsic value. We sell industries we believe are overpriced and buy industries we believe are underpriced, as identified by our valuation model, in an effort to capture developing industry and sector themes without restrictions on market capitalization.

In addition to using our methodology to evaluate stocks and industries to categorize each as over- or underpriced relative to the broad market, we may factor in relative strength. In general, relative strength is a measure of the performance of an industry in relation to the performance of the broader market over a period of time.

¹ Beta is a measure of an individual security's volatility versus a broader index or market.

² Value-to-Price Ratio (or V/P) is a ratio of the intrinsic value, as calculated using ICON's proprietary valuation methodology, of a broad range of domestic and international securities within ICON's system as compared to the current market price of those securities. We believe stocks with a V/P reading below 1.00 are overvalued while stocks with a V/P reading above 1.00 are undervalued.

Fixed Income Funds

ICON uses various methods to determine the value for individual fixed income securities that it believes are underpriced relative to its determination of intrinsic value. ICON relies on the integrity of the financial statements of the fixed income security released to the market as a part of its analysis. ICON may invest in investment grade and non-investment grade securities.

For more information on the ITAPs, Domestic Core Equity Portfolio and Separately Managed Accounts, please refer to **Item 4** above.

ICON SBI Portfolios

The SBI Portfolios invest in mutual funds among which are typically, but not exclusively, certain ICON Funds and certain mutual funds advised by Shelton. AthenaInvest (“Athena”) is the sub-adviser to the SBI Portfolios. Athena measures equity manager behavior to determine asset allocation, strategy selection and manager selection. Athena attempts to identify the most attractive mutual funds based on manager behavior, including investment strategy as categorized by Athena, manager consistency and manager conviction. Athena provides ICON with a model portfolio of mutual funds. ICON has overall investment discretion in determining the funds to be utilized to achieve the investment strategy.

Athena’s proprietary “Diamond Ratings” rank actively managed equity mutual funds by behavioral factors which Athena and ICON believe are leading indicators of performance. Funds eligible to be rated include U.S.-domiciled, actively managed, U.S. and international equity mutual funds. Diamond Ratings are calculated each month and depend on the investment strategy being pursued by the fund, the consistency of that pursuit, and the conviction demonstrated by the construction of the resulting portfolio. Based on these criteria, funds are assigned a Diamond Rating (“DR”) score of DR1 to DR5, with DR5 representing the highest rating. Athena believes that behavioral factors such as strategy, consistency in following that strategy, and the conviction shown in the fund’s portfolio construction are better leading indicators of outperforming actively managed mutual funds than traditional approaches such as past performance. The SBI Portfolios will primarily use DR4 and DR5 rated funds in the strategies Athena sees as leading. However, regardless of the DR, the SBI Portfolios will hold ICON Funds, and certain funds advised by Shelton, whenever the model calls for a Valuation component, and in all cases where the model calls for bonds or fixed income.

Each month Athena will evaluate the returns for each fund as reported by the fund complex. At the end of the month, the covered funds are reconstituted into each DR group and the process begins again. The monthly DR group returns are net of all automatically deducted fees including management fees, administration fees, 12b-1 fees, trading costs, and other fees, but do not reflect the impact of sales loads. Returns are first averaged across all share classes of a given fund, then calculated as a simple average across all unique funds in a DR group.

For more information on the SBI Portfolios, please refer to **Item 4** above.

Investment Strategies

Please refer to **Item 4** for the different products and investment strategies offered by ICON, including the SBI Portfolios. More information about the risks within the ICON Funds can be found in the Registration Statement filed on Form N-1A with the U.S. Securities and Exchange Commission (www.sec.gov), which includes the Prospectus and Statement of Additional Information or at www.iconfunds.com. More information about the individual risks of the funds used within the SBI Portfolios can be found in the Registration Statements filed on Form N-1A, which Registration Statements include the Prospectus and Statement of Additional Information, and can be found at www.sec.gov.

The ICON Funds may invest in options on securities and indexes, enter into short-term forward contracts, and take short positions in equity securities in accordance with investment objectives and strategies.

The ICON Funds may also enter into margin arrangements to facilitate transactions in short sales, futures contracts, options on futures contracts or indexes and other financial instruments.

Account Liquidity Reserve

To meet your cash flow needs, approximately two percent (or more if the client is taking periodic distributions) of all ITAP and SBI Portfolios is maintained in assets that can more easily be sold (liquid assets), such as money market funds. This liquidity reserve is adjusted periodically.

Principal Investment Risks

Like all investing, there is a risk of loss. This risk could be the chance that the portfolio's return will be different than expected or the possibility of losing some or all of your original investment. Investing in securities involves risk of loss that clients should be prepared to bear. The main risks of investing in mutual fund portfolios and individual securities include:

All Investments

- **Market Risk:** Your overall risk level will depend on the market sectors/countries or investment strategies in which you are invested. The value of the stocks and other securities owned by your account will fluctuate depending on the performance of the companies that issued them, general market and economic conditions, and investor confidence. The market also may fail to recognize the intrinsic worth of an investment, ICON may misgauge that worth or the strategy picked may not perform.
- **Industry and Concentration Risk.** Companies that have similar lines of business are grouped together in broad categories called industries. Industries are grouped together in broader categories called sectors. ICON may overweight industries within a sector, which causes the account's performance to be susceptible to political, economic, business or other developments that affect those industries. For example, your performance may be impacted by general economic conditions, product cycles, competition and government regulation, among other things. Industry overweighting means an investment product may be less diverse and more volatile than its benchmark.
- **Non-Diversified Risk:** Your account may be "non-diversified" which means that it may own larger positions in a smaller number of securities than portfolios that are "diversified." This means that an increase or decrease in the value of a single security will likely have a greater impact on your account's value and investment return than a diversified account.
- **Small and Mid-Size Company Risk:** Your account may invest in small or mid-size companies which may involve greater risk of loss and price fluctuation. Small companies may have limited management experience or depth, limited access to capital, or limited products or services, or operate in markets that have not yet been established. Small company securities tend to be more volatile and less liquid than equity securities of larger companies. It might be harder to sell securities of small-cap issuers, and they often incur larger price swings than securities of larger companies.
- **Foreign Investment Risk:** Your account may be invested in or have investments that invest in foreign securities. Investments in foreign securities involve different risks than U.S. investments, including fluctuations in currency exchange rates, potentially unstable political and economic structures, less efficient trade settlement practices, reduced availability of public information, and lack of uniform financial reporting and regulatory practices such as those that apply to U.S. issuers. Foreign stock markets may also be less liquid than U.S. stock markets.
- **Developing and Emerging Markets Risk:** Your account may be invested in securities from developing or emerging market countries. The economies of developing or emerging market countries may be more dependent on relatively few industries that may be highly vulnerable to local and global changes than economies in more developed countries. The governments of developing and emerging market countries may be less stable than the governments of more developed countries. Countries in the emerging markets generally have less developed securities markets or exchanges, and less developed legal and accounting systems, reduced availability of public information, and lack of uniform financial reporting and regulatory practices, which in turn may adversely impact ICON's ability to calculate accurately the intrinsic value of the securities. Securities of emerging or developing market companies may be less liquid and more volatile than securities in countries with more mature markets. The value of developing or emerging market currencies may fluctuate more than the currencies of countries with more mature markets. Investments in developing or emerging market countries may be subject to greater risks of government restrictions, including confiscatory taxation, expropriation or nationalization of a company's assets, restrictions on foreign ownership of local companies and restrictions on withdrawing assets from the

country. Investments in securities of issuers in developing or emerging market countries may be considered speculative and higher risk.

- **Liquidity Risk:** Liquidity risk exists when particular investments or securities are difficult to sell. Investments in illiquid securities may reduce the returns of the account because it may be difficult to sell the illiquid securities at an advantageous time or price. Illiquid investments may be harder to value, especially in changing markets, and if the account is forced to sell these investments, you may suffer a loss.
- **Geographic Risk:** Your account may have higher risk due to concentrations in certain geographic regions. These concentrations may make your account more susceptible to the economic, market, regulatory, political, natural disasters and local risks of that region than an account that is more geographically diversified.
- **High Portfolio Turnover Risk:** Your account may engage in active and frequent trading of its portfolio securities. High portfolio turnover (more than 100%) may result in increased transaction costs to your account, including brokerage commissions, dealer mark-ups and other transaction costs on the sale of the securities and on reinvestment in other securities. The sale of securities may result in the realization and/or distribution to you of higher capital gains or losses as compared to an account with less active trading. The effects of higher than normal portfolio turnover may adversely affect the account's performance and affect your tax liability.
- **Leverage Risk:** Some transactions may give rise to a form of economic leverage, and may expose your account to greater risk and increase its costs. The use of leverage may also cause an account to liquidate portfolio positions when it may not be advantageous. Increases and decreases in the value of the accounts will be magnified when the account uses leverage.
- **Selection Risk:** Market risk is the risk that one or more markets in which your account invests will go down sharply and unpredictably. Selection risk is the risk that the securities selected by the investment manager will underperform the markets, the relevant indices or the securities selected by other accounts with similar investment objectives and investment strategies.
- **Preferred Securities Risk:** Preferred securities may pay fixed or adjustable rates of return. Preferred securities are subject to issuer-specific and market risks applicable generally to equity securities. In addition, a company's preferred securities generally pay dividends only after the company makes required payments to holders of its bonds and other debt. Preferred securities of smaller companies may be more vulnerable to adverse developments than preferred securities of larger companies.
- **Investment in Other Investment Companies Risk:** Your account may be invested in funds which may invest in other investment companies. As with other investments, investments in other investment companies, including closed-end funds (which include business development companies (BDCs)), unit investment trusts, open-end investment companies, and exchange traded funds, are subject to many of the same risks as investing directly in the underlying instruments, including market risk and, for non-index strategies, selection risk. In addition, if a fund acquires shares of investment companies, shareholders bear both their proportionate share of expenses in the fund (including management and advisory fees) and, indirectly, the expenses of the investment companies (including management and advisory fees). Further, the closed-end fund market is inefficient. Many closed-end funds (CEFs), including many in which the funds may invest, are small or microcap securities. There is little independent research published on CEFs and limited availability of data makes research difficult and time consuming. CEFs may trade unpredictably. The underlying assets may be unknown and their value not readily determinable. A fund may purchase CEFs believing they are trading at a discount to NAV, and an ongoing corporate action will cause the discount to narrow or disappear. With little independent analysis of the CEFs' individual assets, the funds essentially make a value based arbitrage strategy. The fund may look to events like pending or proposed tender offers, liquidations, take-over plays etc. If the event is not preceded by an official announcement – and is, instead, “pending” or “anticipated” – this strategy can be very risky. If the event is announced, there is still the possibility that it will not happen. In sum, investing in CEFs in

general, and CEF arbitrage plays in particular carry unique and arguably heightened risks.

- **Closed-End Fund Risk:** In addition, closed-end funds involve investment risks different from those associated with other investment companies. First, the shares of closed-end funds frequently trade at a premium or discount relative to their net asset value. When the Fund purchases shares of a closed-end fund at a discount to its net asset value, there can be no assurance that the discount will decrease, and it is possible that the discount may increase and affect whether the Fund will realize a gain or loss on the investment. Second, many closed-end funds use leverage, or borrowed money, to try to increase returns. Leverage is a speculative technique and its use by a closed-end fund entails greater risk and leads to a more volatile share price. If a closed-end fund uses leverage, increases and decreases in the value of its share price will be magnified. The closed-end fund will also have to pay interest or dividends on its leverage, reducing the closed-end fund's return. Third, many closed-end funds have a policy of distributing a fixed percentage of net assets regardless of the fund's actual interest income and capital gains. Consequently, distributions by a closed-end fund may include a return of capital, which would reduce the fund's net asset value and its earnings capacity. Finally, closed-end funds are allowed to invest in a greater amount of illiquid securities than open-end mutual funds. Investments in illiquid securities pose risks related to uncertainty in valuations, volatile market prices, and limitations on resale that may have an adverse effect on the ability of the fund to dispose of the securities promptly or at reasonable prices.
- **Derivatives Risk:** The use of derivatives may reduce the return and/or increase volatility. Volatility is defined as the characteristic of a security, an index or a market to fluctuate significantly in price within a short time period. A risk of the use of derivatives is that the fluctuations in their values may not correlate perfectly with the overall securities markets. Derivatives are also subject to counterparty risk, which is the risk that the other party in the transaction will not fulfill its contractual obligation. The possible lack of a liquid secondary market for derivatives and the resulting inability to sell or otherwise close a derivatives position could expose the account to losses and could make derivatives more difficult to value accurately. Valuation is more difficult in times of market turmoil since many investors and market makers may be reluctant to purchase complex instruments or quote prices for them. Derivatives also may expose the account to greater risk and increase its costs. Certain transactions in derivatives involve substantial leverage risk and may expose the account to potential losses that exceed the amount originally invested.

Fixed Income Investments

- **Bank Loan Risk:** The market for bank loans may not be highly liquid and these investments expose your account to the credit risk of both the financial institution and the underlying borrower.
- **Collateralized Bond Obligation Risk:** The pool of high yield securities underlying collateralized bond obligations is typically separated into groupings called tranches. Your account may invest in lower tranches, which carry greater risk but pay higher interest rates.
- **Convertible Securities Risk:** The market value of a convertible security performs like that of a regular debt security; that is, if market interest rates rise, the value of a convertible security usually falls. The market value of convertible securities may change based on changes in the issuer's credit rating or the market's perception of the issuer's creditworthiness. A convertible security is also subject to the same types of market and issuer risks that apply to the underlying common stock.
- **Debt Securities Risk:** Debt securities, such as bonds, involve interest rate risk, credit risk, extension risk, and prepayment risk, among other things.
- **Interest Rate Risk:** Bond prices tend to move inversely with changes in interest rates. For example, when interest rates rise, bond prices generally fall. Securities with longer maturities are more sensitive to changes in interest rates. Performance could also be affected if unexpected interest rate trends cause investments in mortgage- or asset-backed securities to be paid off substantially earlier or later than expected. Slower payoffs effectively increase maturity, also heightening interest rate risk. When interest rates fall, many mortgages are refinanced and mortgage-backed securities may be repaid early. As a result, your account may not experience the increase in market value from these securities that normally accompanies a decline in interest rates.
- **Credit Risk:** Your account could lose money if the issuer of a fixed income security is unable to meet its financial obligations or goes bankrupt. Failure of an issuer to make timely payments of principal and interest or a decline or perception of decline in the credit quality of a fixed income security can cause a security's price to fall, potentially affecting your account's value. If a credit rating agency gives a debt security a lower rating, the value or liquidity of the bond may be adversely affected. Your account may be invested in corporate bonds, which are not guaranteed by the U.S. government. If the corporate issuer or guarantor of a debt security is unable or unwilling to honor its obligations, the government will not intervene if the issuer defaults and your account will lose its investment in the issue.

- **Extension Risk:** When interest rates rise, certain obligations will be paid off by the obligor more slowly than anticipated, causing the value of these obligations to fall.
- **Prepayment Risk:** When interest rates fall, certain obligations will be paid off by the obligor more quickly than originally anticipated, and your account may have to invest the proceeds in securities with lower yields.
- **High Yield Risk:** High yield securities (commonly known as “junk bonds”) may be subject to greater levels of interest rate, credit and liquidity risk than investment grade securities. These securities may be considered speculative with respect to the issuer’s continuing ability to make principal and interest payments. An economic downturn or period of rising interest rates could adversely affect the market for junk bonds and reduce the investor’s ability to sell these securities (liquidity risk). If the issuer of a security is in default with respect to interest or principal payments, the investor may lose its investment in the issue.
- **Mortgage- and Asset-Backed Securities Risks:** Mortgage- and asset-backed securities represent interests in “pools” of mortgages or other assets, including consumer loans or receivables held in trust. Mortgage- and asset-backed securities are subject to credit, interest rate, prepayment and extension risks. Small movements in interest rates (both increases and decreases) may quickly and significantly reduce the value of certain mortgage-backed securities.

Please refer to the individual ICON Fund prospectuses that constitute your ITAP and your investment management agreement for more information about risks.

Risk Disclosures for the ITAPs:

These profiles reflect ICON’s goals for the ICON-managed portfolios relative to one another and should not be used to compare the portfolios to other types of investments. Each portfolio has its own strategy and risk/reward profile, and a portfolio’s risk profile is subject to change. Please consult your investment adviser before investing in the portfolios to determine that these strategies fit with your overall investment goals.

Growth: Generally, Growth portfolios utilize mutual funds with a greater exposure to equity investments relative to other ICON-managed portfolios, resulting in what may be considered a higher risk of loss than a more conservative ICON-managed portfolio.

Moderate: Generally, Moderate portfolios invest in mutual funds with equity investments as well as mutual funds with fixed income investments in an effort to preserve the value of your account (capital preservation) relative to an ICON-managed Growth portfolio.

Conservative: Generally, Conservative portfolios seek to preserve an investment portfolio’s value by investing in mutual funds which tend to have a higher exposure to fixed income investments while maintaining a smaller allocation to mutual funds with equity investments relative to an ICON-managed Growth or Moderate portfolio.

Income: Generally, the Income Portfolio seeks to provide income by investing in mutual funds which tend to have a higher exposure to fixed-income and dividend-paying investments. The Income Portfolio is structured to have the lowest potential relative risk of the ICON-managed portfolios.

Defensive Position: ICON, at its discretion, may invest up to 100% of the account value, during times of unstable or adverse market or economic conditions, in temporary defensive instruments in an effort to keep the value of your account stable and to be able to sell securities easily if needed. Temporary defensive investments generally include cash and very safe liquid investments (cash equivalents) such as money market instruments. A portfolio could also hold these types of securities pending the investment of proceeds from the sale of fund shares due to a rotation, to meet distribution requests, or when account documents have not been received in good order. The Portfolio may invest in temporary defensive investments for undetermined periods of time, depending on market or economic conditions. To the extent a Portfolio invests defensively in these securities, it might not achieve its investment objective.

Risk Disclosures for the SBI Portfolios

These profiles reflect ICON's goals for the SBI Portfolios relative to one another and should not be used to compare the portfolios to other types of investments. Each portfolio has its own strategy and risk/reward profile, and a portfolio's risk profile is subject to change. Please consult your investment adviser before investing in the portfolios to determine that these strategies fit with your overall investment goals.

Growth: Generally, the SBI Global Growth Portfolio utilizes mutual funds with a greater exposure to equity investments relative to other SBI portfolios, resulting in what may be considered a higher risk of loss than a more conservative SBI portfolio.

Moderate: Generally, the SBI Global Moderate Portfolio invests in mutual funds with equity investments as well as mutual funds with fixed income investments, in an effort to preserve the value of your account (capital preservation) relative to a SBI Global Growth portfolio. The SBI Global Moderate Portfolio may be considered a higher risk of loss than a more conservative SBI portfolio.

Conservative: Generally, the SBI Global Conservative portfolio seeks to preserve its value by investing in mutual funds which tend to have a higher exposure to fixed income investments while maintaining a smaller allocation to mutual funds with equity investments relative to other SBI portfolios.

Strategy: All investment strategies and models have flaws and weaknesses which can be evidenced only over time in various market conditions. Since the SBI strategy has limited history through varying market conditions, it may have weaknesses that are unknown, making the strategy riskier. Moreover, the portfolios invest in mutual funds over which ICON has no control and such mutual funds have their own unique risks which must be considered separately.

Please refer to **Item 4** for account minimums.

Item 9 - Disciplinary Information

Registered investment advisers are required to disclose all material facts regarding any legal or disciplinary events that would be material to your evaluation of ICON or the integrity of ICON's management. ICON has no information applicable to this Item.

Item 10 - Other Financial Industry Activities and Affiliations

On October 23, 2019, ICON entered into a transaction agreement with CCM Partners, LP d/b/a Shelton Capital Management, the investment adviser to the SCM Trust. Under the transaction agreement, ICON and Shelton agreed to recommend to their respective Board of Trustees that the ICON Funds be reorganized into the SCM Trust. In February 2020 both ICON's and SCM's Board of Trustees approved the plans of reorganization and recommended them to Fund shareholders. The plans of reorganization were approved by the Fund shareholders in the 3rd quarter of 2020.

Shelton Capital Management is the adviser to the ICON Funds, a series of registered investment companies. ICON Advisers is the sub-adviser to the ICON Funds and receives a portion of Shelton's management fee as noted in *Item 5*. ICON also receives compensation based on assets under management in certain other funds advised by Shelton as noted in *Item 5*.

RFS Partners, LP is a registered broker-dealer and is an affiliate of ICON Advisers. RFS Partners, LP acts as a distributor for the ICON Funds and certain ICON employees are registered representatives of RFS Partners, LP.

Athena, discussed in detail above, is a registered investment adviser, and is the licensor/sub-adviser for the SBI Portfolios. Two of ICON's portfolio managers, Brian Callahan and Scott Callahan, have indirect and direct, respectively, responsibility for the SBI Portfolios. Brian Callahan and Scott Callahan are beneficiaries of a trust that holds a 12.16% ownership interest in Athena which might incline them, consciously or unconsciously, to make a decision regarding Athena as the sub-adviser or regarding investments in the SBI Portfolios that is not disinterested.

Item 11 - Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

ICON's Code of Ethics ("Code") sets forth standards of conduct required of the advisory personnel of ICON and its affiliated companies for compliance with federal securities laws. ICON has adopted a Code of Ethics for all supervised persons of the firm describing its high standard of business conduct, and fiduciary duty to its clients. The Code includes provisions relating to the confidentiality of client information, a prohibition on insider trading, a prohibition of rumor mongering, restrictions on the acceptance of gifts and the reporting of certain gifts and business entertainment items, restrictions on political contributions and political activity, and personal securities trading procedures, among other things. Further, it addresses conflicts that arise from personal trading and requires that "Access Persons" (as defined by the Investment Advisers Act of 1940) of the adviser report their personal securities transactions and holdings, including transactions in the mutual funds managed by ICON. All supervised persons at ICON must acknowledge the terms of the Code of Ethics annually or when amended.

ICON may recommend to investment advisory clients or prospective clients, the purchase or sale of securities in which ICON, its affiliates and/or clients, directly or indirectly, have a position of interest. ICON's employees and persons associated with ICON are required to follow ICON's Code. Subject to satisfying this policy and applicable laws, officers, directors and employees of ICON and its affiliates may trade for their own accounts in securities which are recommended to and/or purchased for ICON's clients. The Code is designed to assure that the personal securities transactions, activities and interests of the employees of ICON will not interfere with (i) making decisions in the best interest of advisory clients and (ii) implementing such decisions while, at the same time, allowing employees to invest for their own accounts. Under the Code certain classes of securities have been designated as exempt for transactions, based upon a determination that these would not materially interfere with the best interest of ICON's clients. In addition, the Code requires pre-clearance of many transactions, and restricts trading in close proximity to client trading activity. Nonetheless, because the Code in some circumstances would permit employees to invest in the same securities as clients, there is a possibility that employees might benefit from market activity by a client in a security held by an employee. Employee trading is continually monitored under the Code, and to prevent reasonably conflicts of interest between ICON and its clients.

Certain affiliated accounts may trade in the same securities with client accounts on an aggregated basis when consistent with ICON's obligation of best execution. In such circumstances, the affiliated and client accounts will share commission costs pro rata and receive securities at an average price. ICON will retain records of the trade order (specifying each participating account) and its allocation, which will be completed prior to the entry of the aggregated order. Completed orders will be allocated as specified in the initial trade order. Partially filled orders will be allocated according to ICON's Trade Allocation Policy. Any exceptions will be documented and reviewed by Compliance. ICON does not cross trades between client accounts.

ICON will provide a copy of the Code to anyone upon their request at no charge. A copy may be requested by contacting ICON Advisers by telephone at 1-800-828-4881 or by written request sent to: Attention: Brian Callahan, President and Chief Compliance Officer, ICON Advisers, Inc., 8480 E Orchard Road, Suite 1200, Greenwood Village, Colorado 80111.

Item 12 - Brokerage Practices

Portfolio Transactions

ICON generally has the authority to determine the securities and the amount of securities to be bought or sold. ICON does not have custody or possession of a client's assets. Limitations on authority are provided in the investment policies and restrictions applicable to mutual fund accounts, and may also be provided in client-specified investment objectives, guidelines and restrictions applicable to other accounts.

ICON generally has the authority to select, without specific client consent, broker-dealers and the commission rates to be paid for portfolio transactions. The primary consideration in placing portfolio transactions with broker-dealers is to seek the best execution of orders at the most favorable prices. The determination of what constitutes best execution in a securities transaction involves a number of judgmental considerations, including the overall direct net economic result to a client (involving both price paid or received, any commissions and other costs), the efficiency with which a transaction is effected, the ability to handle transactions where a large block is involved, the availability of the broker to execute difficult transactions for ICON's clients in the future, and the financial strength and stability of the broker.

Because selection of executing broker-dealers is not based solely on net commissions and frequently includes "soft dollars" (see below for more detail), a client may pay an executing broker a higher commission for a securities transaction than might be charged by another broker-dealer for the same transaction. While it is not practical for ICON to solicit competitive bids for commissions on each portfolio transaction, consideration is regularly given to available information concerning the level of commissions charged in comparable transactions by various broker-dealers.

Use of Brokerage and Research Services under Section 28(e) Safe Harbor ("Soft Dollar")

Subject to the policy of seeking best execution of orders, ICON frequently executes transactions with brokerage firms whose commission rates generate credits ICON uses to obtain eligible research services and products, as defined in Section 28(e) of the Securities Exchange Act of 1934. Section 28(e) provides a "safe harbor" to investment managers who use commission dollars of their advised accounts to obtain investment research and brokerage services and products. These arrangements are often called "soft dollar" arrangements. Research and brokerage services and products that provide lawful and appropriate assistance to the manager in performing investment decision-making responsibilities fall within the safe harbor. When ICON executes trades that generate soft dollars, a client will pay a higher commission than when executing a regular trade. ICON receives a benefit because the firm does not have to produce or pay for the research services or products. There is an inherent conflict of interest in these arrangements where an incentive exists for ICON to select a broker-dealer based on ICON's interest in receiving research services and products, rather than on a client's interest in receiving most favorable execution.

The types of research services and products provided by brokerage firms or third parties to ICON include:

- historical and forecast earnings
- financial information and company news
- stock quote systems
- trading systems
- data feeds from stock exchanges
- order management systems and other execution services

These services and products permit ICON to supplement its own research and analysis.

Some of these research products or services may have both a research function and a non-research administrative function (a "mixed use"). If ICON determines that any research product or service has a mixed use, ICON will allocate in good faith the cost of such product or service accordingly. The portion of the product or service that ICON determines will assist it in the investment decision-making process may be paid for in soft dollars. The non-research portion is paid for by ICON in "hard dollars." Any such allocation creates a conflict of interest for ICON in that the more the firm can allocate a product's or service's use to purposes eligible under Section 28(e) under the Exchange Act, the more it can reduce its out-of-pocket expenses.

ICON generally considers the amount and nature of research, execution and other services provided by brokerage firms, as well as the extent to which such services are relied on, and attempts to allocate a portion of the brokerage business of its clients on the basis of that consideration. Neither the research service nor the amount of brokerage business given to a particular brokerage firm is made pursuant to any agreement or commitment with

any of the selected brokerage firms for research provided. ICON attempts to direct sufficient commissions to broker-dealers that generate soft dollars to ensure continued receipt of eligible research and services. Actual brokerage commissions received by a broker-dealer may be more or less than the suggested allocations.

ICON utilizes Westminster Research Associates ("WRA") for commission management services. WRA allows ICON to execute through a network of institutional trading desks, while consolidating the administration, servicing and reporting functions for our soft dollar usage.

ICON may receive a benefit from the research products and services that is not passed on to the client in the form of a direct monetary benefit. Further, research services and products may be useful to ICON in providing investment advice to any of the clients it advises. Soft dollar benefits are not limited to those clients who may have generated a particular benefit, although certain soft dollar allocations are connected to particular clients or groups of clients. Soft dollar benefits are not proportionally allocated to any accounts that may generate different amounts of the soft dollar benefits.

Directed Brokerage/Commission Recapture Programs

Certain clients may designate or recommend a brokerage firm for execution services. In a directed brokerage arrangement or commission recapture program, a client requests that its adviser direct commissions business to a particular broker that has agreed to provide certain services, pay obligations or make cash rebates to the client. Clients should understand that directed brokerage and commission recapture arrangements may have the following implications:

- (i) ICON may not be able to obtain best execution for the directed trade;
- (ii) An order for an individual client who directs that a particular broker(s) be used typically will be executed at the same time the non-directed broker orders are being traded as the share amounts are generally too small to have a material effect on a non-directed trade order. However, the directed brokerage order may receive a price and commission rate that is less favorable than the rate received in the non-directed order.
- (iii) Charles Schwab ("Schwab") custodies certain accounts ("Schwab Account(s)") under a transaction-based pricing regime ("TBP"). Schwab Accounts receive \$0 commissions on most securities trades and are subject to "trade-away" fees if executed at a broker other than Schwab. When the same security is ordered for the Schwab Account(s) and other ICON client accounts, the Schwab Account(s) order will be placed first. Depending on the security, trade size and liquidity, Schwab order execution can range from seconds to an hour or more. As a result, Schwab Accounts may have open orders in the same security at the same time as other ICON client accounts, potentially resulting in clients receiving different average prices while trading in the same security on the same day. Alternatively, the portfolio manager for the Schwab Accounts may choose to pay Schwab's "trade-away" fee and send the order along with other ICON client account(s) orders to a single broker. This would cause the Schwab Account(s) to pay the selected broker's commission in addition to the "trade-away" fee.

ICON generally limits directed brokerage arrangements and generally maintains discretion to determine which trades are to be included in the directed brokerage arrangement. ICON may also utilize step-out arrangements to satisfy the client's directed brokerage instructions.

Trade Aggregation/Allocation

ICON may purchase the same individual security for multiple managed accounts. Except as noted above for the Schwab Accounts under TBP, ICON generally aggregates multiple orders for the purchase or sale of the same security in order to take advantage of any resulting economies of scale ("bunched order"). As a general rule, securities purchased in a bunched order are allocated based on the desired target weighting of the security in the account. As a general matter, targeted weightings are determined prior to submitting an order to the trading desk. If a bunched order has been partially filled and a new order is placed in the same security, the first order will be stopped and allocated to all accounts included in the bunched order at the average price. A new bunched order will be created to include all accounts trading in the same security. When the new order is executed all accounts in the new order will receive the average price. The entry of the new bunched order may result in accounts that trade in the same security on the same day receiving different average prices.

ICON is not obligated to place the same security in all managed accounts with a similar investment objective. ICON may determine not to buy a particular security for an account based on the unique circumstances of each account, including, without limitation, cash availability, desired position size, the account's investment policies and restrictions.

ICON may also purchase shares of the same mutual fund for multiple managed accounts. ICON generally submits the mutual fund orders to the respective custodians on the same day; however, actual trade executions may vary based on the systems and process of the custodian. ICON may provide ITAP and SBI target weightings to certain advisory firms after the reallocations have been submitted to ICON's custodians. Due to the timing of this communication, these advisory firms and their clients are potentially not able to execute their trades on the same trading day as ICON.

Clients who limit ICON's discretion may not be included in bunched orders and may be traded after the trades of a bunched or non-directed order.

Trade Errors

As a fiduciary, ICON has the responsibility to execute trade orders correctly, promptly and in the best interests of our clients. In the event any error occurs in the handling of any client transaction, due to ICON's actions or inactions, or action of others, ICON's policy is to seek to identify and correct any errors as promptly as possible without disadvantaging the client or benefiting ICON Advisers in any way. ICON does not keep any client gains resulting from error corrections but we may offset gains and losses that result from the same error. ICON's policy may be different than that of the custodian or the broker executing the trade.

Item 13 - Review of Accounts

All accounts are managed in accordance with each portfolio's investment objectives and restrictions. Each Portfolio Manager is responsible for evaluating his respective sectors and/or countries and identifying themes and industries within his assigned sectors and/or countries based on *Value-to-Price Ratios* and relative strength metrics, the core of the ICON system. The day-to-day management of the accounts is system-based and continuously monitored by the responsible Portfolio Manager(s). Investment decisions are subject to an account's objective(s), policies, restrictions and the oversight of the Investment Committee. Craig Callahan is the chairman of the Investment Committee.

ICON Multi-Sector Funds

Craig Callahan, Brian Callahan and Scott Callahan are co-managers of the ICON Consumer Select Fund (which includes the consumer discretionary, consumer staples and financial sectors), ICON Health and Information Technology Fund, ICON Natural Resources and Infrastructure Fund (which includes the energy, industrials and materials sectors) and ICON Utilities and Income Fund.

ICON Diversified Funds

Craig Callahan is primarily responsible for the ICON Equity Fund; Donovan "Jerry" Paul, Brian Callahan and Scott Callahan are co-managers of the ICON Equity Income Fund; Donovan "Jerry" Paul is primarily responsible for the ICON Flexible Bond Fund.

Non-Fund Accounts and Portfolios

Craig Callahan is primarily responsible for the Multi-Cap U.S. Equity Portfolio and U.S. SRI Portfolio Separately Managed Accounts and Institutional Portfolios.

ICON Tactical and Strategic Allocation Portfolios

Scott Callahan is primarily responsible for the oversight and management of the ITAP and SBI Portfolios, with supervision by Craig Callahan. ICON's Operations Department reviews ITAP and SBI client accounts and initiates trades to invest assets in new accounts based on the target weightings or to reallocate holdings of existing accounts as necessary.

ICON and its service providers perform reviews on certain securities laws and regulations of each account. ICON's Compliance department maintains a calendar of the frequency of testing and the results of such tests. On an annual basis, the policies and procedures related to the activities of ICON Advisers are reviewed per the securities laws.

Not less than quarterly, ICON sends all clients portfolio updates/market reports and other correspondence designed to keep them fully apprised of ICON's investment decisions and strategies. Investment related information

is provided to Shelton Capital Management and/or the Trustees of the ICON Funds on a quarterly basis. Reports provided may include information related to sales and redemption statistics, performance statistics, brokerage commissions and soft dollar reports. Please refer to **Item 15** for information regarding statements mailed by the custodian.

Item 14 - Client Referrals and Other Compensation

Solicitation Agreements

ICON Advisers uses the services of broker-dealers and/or registered investment advisers as solicitors to introduce its investment management services to prospective clients. ICON compensates such entities for client referrals in the ITAP, SBI and separate account portfolios through payment of a cash referral fee in accordance with Rule 206(4)-1 (Marketing Rule). ICON remits as the cash referral fee a portion of the management fee received from clients referred by the broker-dealer or investment adviser.

Pinnacle Club Program

Pinnacle Club is an invitation-only program that recognizes financial professionals who, in ICON's sole discretion, have demonstrated a commitment to and interest in the ICON methodology and the ICON products. Individuals who are ICON Pinnacle Club members may take advantage of certain privileges from time to time that are offered exclusively to Pinnacle Club members. These privileges may include opportunities to hear directly from the investment professionals behind the ICON products, assistance in expediting paperwork and monitoring operational processing, customized messaging on certain client statements and waivers of certain custodial fees for client accounts. ICON reserves the right to modify or withdraw Pinnacle Club benefits at any time with or without prior notice.

Partner/Revenue Sharing

ICON Advisers, at its own expense, currently provides additional compensation to selected financial firms for services. A financial firm is a firm that, in exchange for compensation, sells, among other products, mutual fund shares or provides services for mutual fund shareholders. Financial firms include registered investment advisers, brokers, dealers, insurance companies and banks. In addition, ICON Advisers currently makes additional payments or provides other incentives to selected financial firms in an effort to obtain, among other things, providing the ICON Funds with "shelf space" or a higher profile for the financial firms' financial consultants and their customers, placing the ICON Funds on the financial firms' preferred or recommended fund list, granting ICON Advisers access to the financial firms' financial consultants, providing assistance in training and educating the financial firms' personnel, and furnishing marketing support and other services. These payments may be significant to the financial firms and may also take the form of sponsorship of seminars, conferences or informational meetings or payment for attendance by persons associated with the financial firms at seminars or informational meetings.

A number of factors will be considered in determining the amount of these additional payments to financial firms, including sales, assets, redemption rates, and the length of and quality of the financial firms' relationship with ICON and the ICON Funds. The additional payments described above are made at ICON Advisers' expense.

Representatives of ICON Advisers visit financial firms on a regular basis to educate financial advisers about the services and products offered by ICON and its affiliated companies and to encourage the sale of these services and products to the advisers' clients. The costs and expenses associated with these efforts may include travel, lodging, sponsorship at educational seminars and conferences, entertainment and meals.

If investment advisers, distributors or affiliates of mutual funds make payments (including, without limitation, sub-transfer agency fees, platform fees and incentives) in differing amounts, financial firms and their financial consultants may have financial incentives for recommending particular ICON products (including the ICON Funds) or services over other mutual funds, products and services. In addition, depending on the arrangements in place at any particular time, a financial firm and its financial consultants may also have a financial incentive for recommending a particular share class over other share classes.

You should consult with your financial adviser and review carefully any disclosure by the financial firm as to compensation received by that firm and/or your financial adviser. ICON has preferred partner and revenue sharing arrangements with the following firms and/or their affiliates:

- | | |
|-------------------------------|-------------------------------|
| ✓ Advisor Group | ✓ National Financial Services |
| ✓ Charles Schwab | ✓ Pershing |
| ✓ Envestnet Asset Management | ✓ Raymond James |
| ✓ Lincoln Investment Planning | ✓ TD Ameritrade |
| ✓ LPL Financial | ✓ Vanguard |
| ✓ MSCS Financial Services | ✓ Wells Fargo |

The list above includes only firms which ICON has paid more than \$25,000 to during the calendar year. Other firms not listed here may have partner and revenue sharing agreements with ICON.

Item 15 - Custody

ICON does not maintain actual custody of your assets, the custodian named in your Investment Management Agreement with ICON maintains actual custody of your assets. You should receive at least quarterly statements from your broker-dealer, fund, bank or other qualified custodian. ICON urges you to review carefully such statements and compare such official custodial records to the account statements that we may provide to you. Our statements may vary from custodial statements based on accounting procedures, reporting dates, or valuation methodologies of certain securities. The account custodian provides ICON clients, excluding the ICON Funds, with all required security cost-basis and year-end tax information.

ICON receives an economic benefit from Charles Schwab, and Equity Trust in the form of support products and services made available to us and other independent investment advisors whose clients maintain their accounts at these custodians. While ICON's receipt of these support products and services could be considered a conflict of interest, we believe our decision to custody client assets with these firms is in the best interest of our clients. Our continued selection of these custodians is supported by the scope, quality, and price of their services. The availability of Charles Schwab's and Equity Trust's products and services is not based on ICON giving particular investment advice, such as buying particular securities for our clients.

Item 16 - Investment Discretion

ICON usually receives discretionary authority from the client at the outset of an advisory relationship to select the identity and amount of securities to be bought or sold. In all cases, however, such discretion is to be exercised in a manner consistent with the stated investment objectives for the particular client account.

When selecting securities and determining amounts, ICON attempts to observe the investment policies, limitations and restrictions of the clients it advises. For registered investment companies, ICON's authority to trade securities may also be limited by certain federal securities and tax laws that require diversification of investments and favor the holding of investments once made.

Investment guidelines and restrictions must be provided to ICON in writing. ICON cannot accept trading restrictions within the ICON Funds.

Item 17 - Voting Client Securities

ICON is responsible for voting proxies for those securities held in client accounts, which have given ICON proxy voting authority, and over which ICON exercises investment discretion. To assist ICON in voting proxies and the overall proxy voting process, ICON has retained Institutional Shareholder Services ("ISS"), an unaffiliated company, as an expert in the proxy voting and corporate governance area. Votes are cast in accordance with ICON Advisers' Proxy Voting Policy Statement and Guidelines ("Policy Guidelines") unless directed otherwise in writing by the client. An overview of the policy is available at www.iconadvisers.com. The Policy Guidelines include procedures to address conflicts of interest between clients and ICON. You can obtain a copy of how your proxies were voted

by contacting ICON Advisers' Chief Compliance Officer at 1-800-828-4881 or sending a request to info@iconadvisers.com.

Shelton Capital Management has the authority to vote all proxies for securities held within the ICON Funds.

If you have an SMA or DCE account managed directly at ICON, you may provide ICON with specific voting instructions for a particular security.

ICON has authority to vote all proxies for ITAP and SBI clients custodied at Equity Trust and ITAP clients custodied at Charles Schwab per the investment management agreement. Because ICON Advisers is the sub-adviser to the ICON Funds as well as ITAP and SBI clients, proxy issues may pose a material conflict of interest among the adviser, sub-adviser, shareholders of the ICON Funds, and ITAP and SBI clients. Due to these potential conflicts, ICON Advisers has directed ISS to use its independent judgement to recommend how to vote affected proxies in accordance with its approved guidelines.

Item 18 - Financial Information

ICON is not aware of any financial condition that is reasonably likely to impair its ability to meet contractual commitments to clients and has not been the subject of a bankruptcy proceeding. However, amid the economic uncertainty created by COVID-19, in accordance with the CARES Act under the Paycheck Protection Program ("PPP"), ICON applied for and received a loan of \$611,000 in April 2020. The loan is forgivable if it is used to pay for qualifying payroll, rent and utility expenses over a 24-week period. ICON has applied for loan forgiveness under the terms of the program. ICON applied for and received a second loan under the PPP of \$424,000 in February 2021. ICON applied for loan forgiveness under the terms of the program and the loan forgiveness was granted.

For more information relating to any of these disclosures, please contact Brian Callahan ICON Advisers' President and Chief Compliance Officer at 1-800-828-4881.
