
Scoggin Management LP

654 Madison Avenue, 10th Floor

New York, NY 10065

(212) 355-5600

September 22, 2022

This Brochure provides information about the qualifications and business practices of Scoggin Management LP (“Scoggin”). If you have any questions about the contents of this Brochure, please contact us at (212) 355-5600. The information in this Brochure has not been approved or verified by the United States Securities and Exchange Commission (“SEC”) or by any state securities authority.

Scoggin is an investment adviser registered with the SEC. Registration with the SEC does not imply any level of skill or training.

Additional information about Scoggin also is available on the SEC’s website at www.adviserinfo.sec.gov.

Item 2 – MATERIAL CHANGES

This Item 2 discusses material changes to this Brochure that occurred since the last annual update of this Brochure filed on March 25, 2021. All undefined terms have the meanings ascribed to those terms in the Brochure.

Item 1 (the Cover Page of this Brochure) – Scoggin has noted in Item 1 (the Cover Page of this Brochure) that our Principal Office and Place of Business has moved from 660 Madison Avenue to 654 Madison Avenue in New York City.

Item 5 – Scoggin has provided information about additional compensation paid by the Flagship Funds to a Portfolio Manager who joined Scoggin in September 2022. Scoggin has also clarified that Affiliated Fund expenses can include compensation paid to sub advisors or portfolio managers that may be retained to manage a portion of the Affiliated Fund’s portfolio.

Item 8 – Scoggin has described the PM Trading Strategy which is the investment strategy the Portfolio Manager will use in managing the PM Portfolio. Scoggin has also clarified that it may retain portfolio managers, consultants, and/or sub-advisors to manage a portion of its Clients’ investment portfolios.

Item 8 – Updates have been made to the risk factors regarding (1) Market Volatility; (2) Derivatives; (3) Epidemics and Pandemics; and (4) Disaster Recovery and Data Security. Scoggin also has added risk factors describing (1) Increased Governmental and Regulatory Scrutiny; Litigation and Regulatory Risks; (2) Market Illiquidity; and (3) Termination of Trading Agreements with Brokers.

Item 10 – Scoggin has added information about Athena Partners Management LLC, an affiliated investment adviser.

Item 11 and Item 17 – Effective September 1, 2022, Todd Jablonsky became the Chief Compliance Officer of Scoggin. Mr. Jablonsky replaced Scoggin’s former Chief Compliance Officer who left the Firm voluntarily. As a result, Item 11 has been amended to note that Scoggin’s Code of Ethics is available to Clients or prospective Clients upon request from Mr. Jablonsky instead of instead of the former Chief Compliance Officer. Similarly, Item 17 has been amended to note that a Flagship Fund may obtain Scoggin’s proxy voting policy or a record of Scoggin’s proxy voting for such Flagship Fund by contacting Mr. Jablonsky instead of the former Chief Compliance Officer.

Item 4 – ADVISORY BUSINESS

Scoggin Management LP, a Delaware limited partnership established in 2015 (“Scoggin”) and its affiliates provide discretionary investment management services regarding securities and other financial instruments. Scoggin currently provides discretionary investment management services to the following private investment funds (1) its flagship funds (“Flagship Funds”) which include Scoggin Capital Management II LLC, Scoggin Capital Management LLC, Scoggin International Fund Ltd., and Scoggin Overseas Fund Ltd.; and (2) special purpose vehicles formed to make single investments (“SPVs” and collectively with the Flagship Funds, the “Scoggin Funds”). The SPVs are closed to new investments. In the future, Scoggin may advise separately managed accounts (“Separate Account Clients”) of individuals and/or entities who meet the definition of “qualified client” in Rule 205-3 under the Investment Advisers Act of 1940, as amended (“Advisers Act”) and other pooled investment vehicles (“Pooled Investment Vehicles” and together with the Scoggin Funds and Separate Account Clients, “Clients”). For the avoidance of doubt, as of the date of this brochure, Scoggin’s only Clients are the Scoggin Funds but may in the future also include Separate Account Clients and/or Pooled Investment Vehicles.

Scoggin directly or indirectly invests on behalf of Clients in securities of companies in which Scoggin believes that one or more potential catalysts may, upon occurrence, materially affect the value of those securities. These catalysts generally involve significant corporate events (such as mergers, acquisitions, divestitures, spin-offs, and reorganizations), financial distress or other special situations. Scoggin also invests in securities of distressed companies, bank debt, high yield bonds and other special situation securities. Scoggin is responsible for all of the investment and trading activities of its Clients. The investment objectives, strategies, fees and risks of each Flagship Fund and other material information are set forth more fully in each Flagship Fund’s confidential offering document and/or term sheet and term sheet supplement (each such confidential offering document and/or term sheet and term sheet supplement a “Memorandum”), which is available to investors and qualified prospective investors with whom Scoggin or its agents have a pre-existing substantive relationship.

Scoggin LLC, a New York limited liability company established in 1998 merged with and into Scoggin effective as of December 24, 2015. Effective at the time of the merger, Scoggin succeeded to the business of Scoggin LLC. The principals of Scoggin are Craig Effron and Curtis Schenker. Craig Effron and Curtis Schenker are Co-Chief Investment Officers for Event-Driven Strategies of Scoggin, and Dev Chodry is Chief Investment Officer for Distressed Credit Strategies.

Dev Chodry is also Chief Investment Officer of Old Bellows Partners L.P. (“Old Bellows”), an affiliate of Scoggin that is also a registered investment adviser. Old Bellows acts as investment adviser to the Scoggin Worldwide Funds (the “Worldwide Funds” and together with the Scoggin Funds, the “Affiliated Funds”). The Worldwide Funds are organized as two different classes of private investment funds in a master-feeder arrangement. In addition, Old Bellows may in the future manage other types of accounts (such other accounts, the Worldwide Funds and Clients, collectively, the “Affiliated Clients”).

Scoggin had approximately \$230,652,000 of regulatory assets under management on a discretionary basis at July 31, 2022. Scoggin does not manage assets on a non-discretionary basis.

Item 5 – FEES AND COMPENSATION

In connection with Scoggin’s management of the Flagship Funds, Scoggin receives a management fee calculated as a percentage of assets under management and charged quarterly in advance as compensation for performing its investment and trading services with respect to the Flagship Funds. The percentage of assets payable ranges between 1.5% and 2% and will vary depending on amounts invested by the particular investor and performance hurdles. Investors redeeming intra-quarter will be charged management fees only for the portion of the quarter that they were invested in a Flagship Fund.

An affiliate of Scoggin receives performance-based compensation from investors in certain of the Scoggin Funds that generally is equal to a percentage of new net capital appreciation. Such compensation generally is charged at the end of each calendar year or at the time of an intra-year redemption by an investor in such funds. For the Flagship Funds, the percentage of assets payable as performance-based compensation ranges from 15% to 20% and will vary depending on amounts invested by the particular investor and performance hurdles. For purposes of calculating the performance-based compensation, net profit includes both realized and unrealized gains. Losses must be recouped before performance-based compensation will be charged.

In addition to the foregoing fees, the Flagship Funds separately pay a single portfolio manager (the “**Portfolio Manager**”) who joined Scoggin in September 2022. The Portfolio Manager invests a portion of the assets of Scoggin International Fund Ltd. (the “**PM Portfolio**”) according to a short-term investment strategy (the “**PM Trading Strategy**”). As compensation for the investment management services it performs, the Portfolio Manager receives (x) an annual base salary (the “**Annual Salary**”); and (y) performance-based compensation equal to 20% of the annual cumulative net profits attributable to the PM Portfolio (the “**PM Performance Compensation**”).

The Annual Salary will be paid by the Flagship Funds provided that the Portfolio Manager has not been terminated. The PM Performance Compensation to the Portfolio Manager will be based solely on the basis of the performance of the PM Trading Strategy. The Flagship Funds therefore could have periods in which they are charged for the Portfolio Manager’s compensation even though the Flagship Funds as a whole sustains losses for the period.

All performance-based compensation is paid in conformity with Rule 205-3 under the Advisers Act. Additional information about the management fees and performance-based compensation is found in the applicable fund’s Memorandum.

The Flagship Funds’ administrator calculates the management fee and once approved by Scoggin, instructs the management fee to be sent to Scoggin. The Flagship Funds’ administrator also calculates the performance-based compensation. Once Scoggin approves the administrator’s performance-based compensation calculation, the administrator allocates the performance compensation to an account of Scoggin or its affiliate.

Each Affiliated Fund is also responsible for its (i) ongoing expenses, including, without limitation, legal, accounting, auditing, tax preparation (if applicable), and related charges, insurance costs, and filing and other regulatory fees; (ii) directors fees and expenses (if applicable);

(iii) administrators' fees and expenses; (iv) expenses associated with the offering of interests and/or shares, including, but not limited to, regulatory filing fees, legal, printing, solicitation and other related expenses; (v) operational expenses, including, but not limited to, photocopying, postage, telephone and facsimile expenses; and (vi) extraordinary expenses (including litigation costs and indemnification obligations), if any. In addition, each Affiliated Fund is also responsible for all transaction costs and investment related expenses incurred directly or indirectly in connection with its trading activities, including, without limitation, (i) execution and clearing charges; (ii) custodial charges; (iii) dealer markups; (iv) interest; (v) consulting fees and compensation paid to sub advisors or portfolio managers that may be retained to manage a portion of the Affiliated Fund's portfolio; (vi) other investment related expenses; (vii) legal charges directly related to investment activities; (viii) its proportionate share of the expenses of any entity in which it invests; and (ix) other expenses routinely incurred by investment managers engaged in investment activities similar to those of such Affiliated Fund or otherwise determined by Scoggin or its affiliate to be beneficial to the proper performance of its investment activities for such Affiliated Fund. When more than one Affiliated Fund incurs a shared expense, Scoggin or an affiliated entity allocates such shared expense among the applicable Affiliated Funds (i) in proportion to the net asset value of each applicable Affiliated Fund; (ii) in proportion to the size of the investment made by each Affiliated Fund to which the expense relates; or (iii) in such other manner as Scoggin or its affiliated entity considers fair and reasonable. At any time, Scoggin or its affiliates can elect to bear certain Affiliated Fund expenses, but have no obligation to do so.

When a particular product or service has a mixed-use such that only a portion of its costs constitutes allowable Affiliated Fund expenses, Scoggin or its affiliate makes a good faith effort to reasonably allocate the costs of such product or service according to its use and only allocates to each applicable Affiliated Fund the portion of such costs that constitutes allowable expenses for such Affiliated Fund. Those portions of the costs that are not allowable Affiliated Fund expenses and are not otherwise eligible to be paid for by another entity are paid for by Scoggin or its affiliates. In allocating the costs of a mixed-use product or service, Scoggin or its affiliate has an incentive to designate as much of the costs as possible to allowable Affiliated Fund expenses to minimize the amount that Scoggin or its affiliates must pay directly. To address this conflict of interest, Scoggin or its affiliate maintains documentation of its methodology for allocating the costs of mixed-use products and services between allowable and non-allowable Affiliated Fund expenses. Such documentation is reviewed periodically by Scoggin's Chief Compliance Officer to determine that the allocations were reasonable.

Scoggin has the ability to modify fees for Clients or investors on a case-by-case basis.

Fees for Separate Account Clients and Pooled Investment Vehicles will be negotiated on a case-by-case basis between Scoggin and the Separate Account Client and/or the Pooled Investment Vehicle. The terms of such arrangements may differ from those applicable to the Scoggin Funds. Such Client accounts managed by Scoggin will incur certain charges imposed by custodians, brokers and other third parties, such as commissions, custodial fees, and other fees and taxes on brokerage accounts and securities transactions, in addition to Scoggin's investment management fees.

See Item 12 below for additional information about brokerage charges.

Item 6 – PERFORMANCE-BASED FEES AND SIDE-BY-SIDE MANAGEMENT

As noted in Item 5, an affiliate of Scoggin receives performance-based compensation. Performance-based fee arrangements received by an affiliate of Scoggin create an incentive for Scoggin to make investments that are riskier or more speculative than those that would be recommended under a different fee arrangement. Such fee arrangements also create an incentive to favor higher fee paying accounts over other accounts in the allocation of investment opportunities.

The Affiliated Funds have differing management and performance fee structures. Such differing fee structures create certain conflicts of interest between Scoggin and its affiliates given the side-by-side management by Scoggin and its affiliates of such Affiliated Funds. See Item 10 for a discussion of Scoggin's affiliation with other investment advisers and policies and procedures to mitigate any conflicts of interest arising from such relationships and the side-by-side management of Affiliated Funds with different fee structures.

Item 7 – TYPES OF CLIENTS

Scoggin provides investment management services to U.S. and non-U.S. Funds. Each Flagship Fund has a minimum investment requirement for investors as set forth in the Flagship Fund's Memorandum, which is waivable in Scoggin's discretion, in the case of U.S. Funds, or the board of directors' discretion in the case of non-U.S. Funds. Investors also are required to meet certain eligibility standards as set forth in each Flagship Fund's Memorandum.

Scoggin may also from time to time provide investment management services to Pooled Investment Vehicles and a limited number of Separate Account Clients, which generally are expected to be institutions. Any such Clients will be accepted on a case-by-case basis.

Item 8 – METHODS OF ANALYSIS, INVESTMENT STRATEGIES AND RISK OF LOSS

Scoggin uses a multi-disciplined investment approach that relies on fundamental analysis to take advantage of market opportunities and mispricings and to realize gains when investments reach Scoggin's price targets. Scoggin's main sources of information include general sources of news and analysis, news releases, industry publications, industry analysts and sales people, industry research, and company specific information (e.g., indentures and financial statements). Scoggin representatives may also attend industry conferences, visit the offices of target companies and perform other types of due diligence.

Scoggin has the ability to make a broad range of investments (including derivatives) for Clients and to act opportunistically. Clients will, to a limited extent, invest in securities in which trading may be restricted under the Securities Act of 1933 Act, as amended. Scoggin sometimes uses leverage to attempt to increase returns to Clients.

Scoggin invests directly and indirectly for Clients utilizing the investment strategies described below. Additional information regarding the investment strategies for each Flagship Fund are set forth in its Memorandum.

1. Event Driven Investing. The Clients' investment objective is to maximize capital appreciation of assets primarily through event-driven investing, which consists of direct and indirect investments in securities of companies where Scoggin believes that one or more potential catalysts may, upon occurrence, materially affect the value of those securities. These catalysts generally involve significant corporate events (e.g., mergers, acquisitions, divestitures, spin-offs, reorganizations), financial distress and other special situations.

The profit (or loss) derived from such investments generally consists of the price differential between the price of the securities purchased and the value ultimately realized from their disposition, plus any dividends or interest received during the period that the securities are held, less transaction costs (consisting mainly of brokerage commissions). In implementing this technique, Scoggin analyzes information regarding the situation, the entities involved, the anticipated risks and the projected return in order to determine the optimum size of the Clients' positions, if any. Scoggin sometimes invests in situations potentially involving the following events:

- *Mergers and Acquisitions*. When a proposal for a merger or other acquisition is publicly announced, the value of the cash and/or securities proposed to be issued by the acquiring entity is typically greater than the market price of the securities of the target company for which they are to be exchanged. If Scoggin believes it probable that the transaction will be consummated, it may purchase shares of the target company or call options involving the underlying security for Client accounts. Scoggin also may buy or sell short securities of companies that have entered into definitive agreements where it believes that the transaction will not be consummated, thereby resulting in a material change in the valuation of the securities of the involved parties.
- *Corporate Restructuring*. Companies from time to time engage in restructuring transactions, such as self-tender offers or debt-for-equity or other exchange offers. If Scoggin believes it is probable that an announced restructuring transaction will be consummated and that the value to be received in the transaction will be greater than the current market price of the securities to be exchanged, it may purchase such securities for Clients.
- *Spin-Offs and Other Divestitures*. A spin-off is a form of corporate divestiture that results in a subsidiary or division of a company becoming an independent entity. As a result of such divestiture, shares of the new entity are distributed pro-rata to the parent corporation's shareholders. Scoggin evaluates the proposed spin-off and, if Scoggin believes that the transaction is likely to increase the value of the securities of the parent, it may purchase securities of the parent for Clients. If the transaction is consummated, it would expect to realize a profit from the increase in the value of the securities purchased. Scoggin also may purchase the shares of the new entity for Clients following the spin-off if it believes that the securities are undervalued.

- *Liquidations.* Companies also may undertake plans of liquidation under which all or substantially all of the assets of a company are to be sold and the proceeds of the sale ultimately are to be distributed to stockholders. If Scoggin believes that the assets of a company to be liquidated are worth more than the market price of its publicly traded securities and that it is likely that the liquidation proposal will receive the requisite approvals, a Client may invest in the company's securities.
- *Litigation and Regulatory Events.* Clients may purchase or sell short securities of companies that are involved in litigations and/or regulatory actions. Depending on the outcome of such litigation or regulatory action, the value of the involved company's securities may change materially, thereby presenting an opportunity to profit from such change.

2. Investments in Securities and Other Obligations of Financially Distressed Companies. Clients may invest as a secondary objective in securities of companies that have become financially distressed as a result of unexpectedly or chronically poor operating results, an excessive debt burden or a substantial liability. An investment in such distressed company's securities may be made if Scoggin believes that a successful restructuring or reorganization is likely to be completed and that the value of the new securities to be received, plus cash or any other consideration, if any, will exceed the current market price of such securities.

3. "Private" Investments. Scoggin may also determine in the future to pursue upon consent of the Scoggin Funds' investors certain illiquid and long-term private equity investments that do not have a discernable exit strategy for an extended period of time from their acquisition, but currently has not invested in any such private equity investments. Examples of such investments are late stage venture capital investments, investments in restricted securities and direct investments in private operating companies.

4. Short Sales. Scoggin makes short sales of securities for Clients which Scoggin believes are overvalued. A short sale is a transaction in which a Client sells a security it does not own in anticipation of a decline in market price. The profit realized, if any, will be the price differential between the price received in the short sale and the cost of the securities purchased to cover the short sale. However, a loss may be suffered if the price of the security which was sold short rises, thereby increasing the cost to purchase the securities to cover the short sale. Scoggin also makes short sales as a hedging device from time to time. For example, short sales may be made to offset a potential decline in a long position or a group of long positions or to protect against market fluctuations in the securities to be received upon the consummation of an exchange offer or merger.

5. Use of Options. Where deemed appropriate by Scoggin, a Client will engage in options transactions either in lieu of, or in combination with, the purchase of the underlying securities. A Client will buy and sell only those options that are listed on a national securities exchange and/or over-the-counter options. Stock options give the purchaser the right to purchase or sell an individual stock at a certain price during a certain time period. Options on the stock indices are similar to the options on individual stocks described above, except they are based upon an index.

6. Leverage/Borrowings. Scoggin will employ leverage when it deems it appropriate to do so by buying securities on margin and by arranging with banks, brokers and others to borrow money.

Scoggin does not intend to employ leverage through borrowings in a ratio exceeding 2:1 debt to equity. Historically, Scoggin has employed leverage through borrowings to a limited extent and expects that it will continue to use leverage on a limited basis in the future. In addition, to the extent that Scoggin utilizes futures and forward contracts, as well as other derivatives, these instruments are inherently leveraged.

7. Derivative Transactions. Scoggin also engages in various derivative transactions in futures contracts, forward contracts, and options thereon for hedging and speculative purposes. Related derivative, including swap, transactions also are effected, which may include swaps with affiliated non-U.S. investment entities and others which are related to Client securities transactions. The foregoing transactions generally involve foreign currencies, financial instruments, metals and other instruments and commodities, as well as other financial transactions. In addition, Scoggin may sell a participation interest in Client investments in certain instruments (e.g., bank debt) to other affiliated entities. Scoggin also engages in trading mortgage-backed securities and similar instruments for Clients.

8. Investment in Other Investment Vehicles. Scoggin has allocated a portion of Client assets (currently less than 10%) to investments in other pooled investment funds that engage in the same or related transactions to those that Scoggin enters into directly. These investments permitted Clients to gain access to other capable professional managers in an attempt to diversify the Client's investments and enhance its returns. The Client's investments in investment funds were accessed through direct purchases of investment fund interests and through affiliated participation agreements and/or swap transactions. Certain of these funds may engage in transactions which are significantly more illiquid than those engaged in directly by Scoggin. Although the certain Scoggin Funds hold legacy investments in other pooled investment funds, Scoggin does not currently, and does not intend in the future to, pursue these strategies.

9. The PM Trading Strategy. The PM Trading Strategy involves the buying and selling of equities on a short-term basis. The strategy seeks to leverage the Portfolio Manager's relationships in the investment community to implement short-term liquidity- based trading. The short-term trading strategy expects to capitalize on a need for liquidity in the equity trading market given the current market where primary market makers are providing less liquidity than they have historically due to various market conditions.

Scoggin is also permitted to make such other investments and to pursue such other investment strategies as it may determine, in its sole discretion, to be potentially profitable whether or not such investments are within the investment strategies discussed above. Scoggin may retain portfolio managers, consultants, and/or sub-advisors to manage a portion of its Clients' investment portfolios.

There can be no assurance that a Client will achieve its investment objective or that the strategies pursued and methods utilized by Scoggin will be successful under all or any market conditions.

Material Risks

Investing in securities involves a risk of loss that Clients and investors should be prepared to bear. A brief explanation of the material risks associated with Scoggin's significant investment

strategies and methods of analysis follows. Additional risk information for each Flagship Fund is set forth in its Memorandum.

- Market Volatility. Investments in securities are subject to the risks of market volatility, which may be severe. Such market volatility may be caused by, among other things, unpredictable domestic and international economic and political events, wars, governmental actions and sanctions, high government debt levels and credit rating downgrades, disruptions in the oil and gas markets and global supply chains, inflation, and epidemics, pandemics and overall financial market uncertainties and instability that, in turn, may cause sudden and severe reductions in the value of a Client's investments and/or the ability of the Scoggin Funds to respond on a timely basis to redemption requests, in whole or in part. Governments and applicable regulators from time to time intervene, directly and through regulation, in certain markets, often with the intent to influence prices. For example, in response to market conditions resulting from the COVID-19 pandemic, various regulators have imposed (and may in the future impose) limits or prohibitions on engaging in short sales, potentially impeding the ability of Scoggin fully execute its trading strategies. The short-term performance of a Client's investments may fluctuate significantly, although Scoggin seeks to achieve gains over the longer term.
- Market Illiquidity. Securities and derivatives thereon cannot always be liquidated at the desired price. In particular, it is difficult to execute a trade at a specific price when there is a relatively small volume of buy and sell orders in a market. Market disruptions, which may occur when governments take or are subject to political actions that disrupt the markets in their currency or their major exports, or when exchanges impose trading halts, circuit breakers, or other trading limitations or restrictions, can also affect market liquidity thereby making it difficult to liquidate a position. Periods of illiquidity have occurred from time to time, such as in connection with the 2008 global financial crisis. These periods of illiquidity and the events that trigger them are difficult to predict, and there can be no assurance that Scoggin will be able to do so. There can be no assurance that market illiquidity will not cause losses for Clients.
- Risk Arbitrage Investments. The risk arbitrage business is extremely competitive, and many of the major participants in the business are large investment banking firms with substantially greater financial resources, larger research staffs and more securities traders than will be available to Scoggin. Arbitrage activity by other larger firms may tend to narrow the spread between the price at which a security may be purchased by a Client and the price it expects to receive upon consummation of a transaction. The price offered for the securities of a company in a tender offer, merger or other acquisition transaction will generally be at a premium above the market price of the security prior to the offer. The announcement of such a transaction will generally cause the market price of the securities to begin rising. Occasionally, Scoggin will purchase a security in advance of such an announcement if it correctly anticipates the acquisition event. Scoggin generally purchases securities after the announcement of the transaction at a price that is higher than the pre-announcement market price, but which is lower than the price at which Scoggin expects the transaction to be consummated. In either event, if the proposed transaction is not consummated, the value of such securities purchased by the Client will likely decline significantly. It is also possible that the difference between the price paid by the Client for securities and the amount anticipated to be received upon consummation

of the proposed transaction may be very small. If a proposed transaction is in fact not consummated or is delayed, the market price of the securities will likely decline.

- Purchases of Securities and Other Obligations of Financially Distressed Companies. A company in financial distress may announce a restructuring plan, either in the form of a court-supervised bankruptcy or insolvency proceeding, or an out-of-court restructuring of its indebtedness and other liabilities. An investment in such distressed company's securities may be made if Scoggin believes that a successful restructuring or reorganization is likely to be completed and that the value of the new securities to be received, plus cash or any other consideration, if any, exceeds the current market price of such securities. Securities or other assets or investments acquired by a Client may have to be held for extended periods of time. Proposed reorganizations of companies that issue distressed securities may not be consummated, or may be significantly delayed, for several reasons, including: opposition by the management or shareholders of the company or companies involved in the reorganization, opposition by regulatory agencies whose approval may be required; discovery of undisclosed facts during the process of legal or commercial due diligence or by other means; a dispute over price or other terms among the parties to a negotiated reorganization; litigation; a material adverse change in the business of the company or companies involved in the reorganization or the securities markets generally; passage of legislation by governmental entities restricting certain types of reorganizations and other circumstances, including, but not limited to, the failure to meet certain conditions customarily specified in acquisition agreements. In addition, the markets for these securities may be illiquid and therefore significantly impair the Client's ability to buy or sell at advantageous prices.
- High Yield Securities. Clients may invest in "high yield" bonds and preferred stock that are rated in the lower rating categories by the various credit rating agencies (or in comparable non-rated securities). Securities in the lower rating categories are subject to greater risk of loss of principal and interest than higher rated securities and are generally considered to be predominately speculative with respect to the issuer's capacity to pay interest and dividends and repay principal. They are also generally considered to be subject to greater risk than securities with higher ratings in the case of a deterioration of general economic conditions. Because the marketplace generally perceives that there are greater risks associated with the lower rated securities, the yields and prices of such securities may tend to fluctuate more than those of higher rated securities. The market for lower rated securities is thinner and less active than that for higher rated securities, which can adversely affect the prices at which these securities can be sold. In addition, adverse publicity and investor perceptions about lower rated securities, whether or not based on fundamental analysis, may be a contributing factor in a decrease in the value and liquidity of such lower rated securities. Further, the markets for these securities may be illiquid and therefore significantly impair a Client's ability to buy or sell at advantageous prices.
- Speculative Purchases of Securities. Scoggin will make certain speculative purchases of securities that it believes to be undervalued, or securities in which a significant position has been taken by one or more other persons, or securities in an industry or related industry where companies have been the subject of acquisition attempts. There can be no assurances that securities that Scoggin believes to be undervalued are in fact undervalued, or that undervalued

securities will increase in value. If a Client purchases securities in anticipation of an acquisition attempt or reorganization that does not in fact occur, the Client likely will experience losses. Further, a substantial period of time may elapse between the Client's purchase of the securities and the acquisition attempt or reorganization. During this period, a portion of the Client's assets would be committed to the securities purchased and the Client may finance such purchase with borrowed funds on which it will have to pay interest.

- Speculative Short Sales of Securities. Scoggin also sells short certain securities which it believes are overvalued. There can be no assurances that securities which Scoggin believes to be overvalued are in fact overvalued, or that overvalued securities will decrease in value. If the price of such securities increases, a Client may be forced to cover its short position at a higher price than the short sale price, resulting in a loss. A short sale involves the risk of a theoretically unlimited increase in the market price of the security. Furthermore, if a Client has sold short the securities offered in an exchange offer or merger and has purchased the securities of the target company, the Client is exposed to the risk that, if the transaction is not consummated, it may suffer losses with respect to both its long and short positions.
- Options Trading. Scoggin may engage in options transactions, either in conjunction with or in lieu of investing in underlying securities. There are risks inherent in the sale and purchase of stock options and stock index options. The seller (writer) of a covered call option (*e.g.*, the writer has a long position in the underlying security) assumes the risk of a decline in the market price of the underlying security to a level below the purchase price of the underlying security, less the premium received on the call option. The writer of a covered call option also gives up the opportunity for gain on the underlying security above the exercise price of the call. The writer of an uncovered call option assumes the risk of a theoretically unlimited increase in the market price of the underlying security above the exercise price of the option. The buyer of a call option assumes the risk of losing the premium invested in the option. If the buyer of the call sells short the underlying security, the loss on the call is offset in whole or in part by any gain on the short sale of the security (if the market price of the underlying security declines.) Scoggin may purchase put options with respect to securities it anticipates receiving in an exchange offer or merger. If the proposed transaction is not consummated, the exercise price of the put options held by the Fund may be lower than the market price of the underlying securities, with the result that the options will not be exercised and the premiums paid will not be recovered. If Scoggin has purchased put options with respect to securities that are the subject of a proposed cash tender offer or cash merger and the transaction is consummated, Scoggin may not exercise its options and may lose the premiums paid therefor.
- Trade Claims. Trade claims represent the monies a company owes to its vendors and are usually unsecured. Trade claims may be, or may become, relatively illiquid and may have no ascertainable market value. Trade claims are often thinly traded and may be subject to transfer restrictions, including contractual limitations prohibiting the disposal of the trade claims or the proceeds thereof, for a specified period of time. Clients' ability to trade and to timely liquidate trade claims may be subject to legal risks, including the risks that the trade claims are not timely filed, may be expunged and the risk of fraud by trade vendors or risks inherent in the vendor's creditworthiness.

- Risks From Hedging Activities. Scoggin may, from time to time, employ various hedging techniques to reduce the risk of highly speculative investments. There remains a substantial risk, however, that hedging techniques likely will not always be effective in limiting losses. If Scoggin analyzes market conditions incorrectly or employs a strategy that does not correlate well with a Client's investments, the Client's hedging techniques could result in a loss, regardless of whether the intent was to reduce risk or increase return. These hedging techniques may also increase the volatility of a Client's account, may involve a small investment of cash relative to the magnitude of the risk assumed or result in a loss if the other party to the transaction does not perform as promised.
- Derivatives. Scoggin may enter into derivatives contracts in which the payment obligations of the parties are defined by reference to chosen market measures. Such derivatives may be linked to interest rates, currencies, credit and/or securities and may take the form of futures and forward contracts, swaps, swaptions, options, caps, collars and floors and other similar contracts. Scoggin may also invest in hybrid instruments mixing features of a debt security with those of a derivatives contract. Derivatives and hybrid instruments may be traded on exchanges or over-the-counter. Derivatives may expose Clients to different or increased risks relative to traditional investments involving the purchase and sale of property and assets. In general, every derivative involves some degree of all of the following risks — credit risk, market risk, liquidity risk, funding risk, operational risk, legal and documentation risk, regulatory risk and tax risk. Clients will always be subject to the credit risk and risk of nonperformance of its derivatives counterparties and the issuers of its hybrid instruments. This risk can be mitigated, but not eliminated, to the extent that the Client enters into derivatives that are cleared with a clearinghouse. Scoggin has flexibility to invest in derivatives and hybrid instruments, including new types of such transactions that may be developed in the future. Derivatives may be used as a primary strategy or as a hedging technique for other strategies. If a Client defaults on its own obligations in a derivative contract, the result could be premature termination of that contract and others with the same counterparty and substantial costs for damages suffered by the counterparty. Certain swaps that are regulated by the Commodity Futures Trading Commission (the "CFTC") are currently subject to mandatory clearing. Similarly, some regulatory regimes outside of the United States (such as European Union's OTC derivatives regime under the European Market Infrastructure Regulation and the Markets in Financial Instruments Directive II) also require that certain swaps be mandatorily cleared. When a swap or derivative is cleared, a Client's counterparty to the swap or derivative is a central clearing party and the cleared positions are held in an account with a clearing intermediary. Cleared swaps are subject to similar risks as those described under "Failure of a Broker" below.
- Leverage Through Borrowings. Scoggin sometimes uses borrowed funds in order to make investments. To the extent borrowings are used to create leverage, the risk of loss (and the possibility of gain) is increased in direct proportion to the level of a Client's borrowings. The level of interest rates generally, and the rates at which a Client can borrow in particular, will be an expense of the Client and therefore affect the operating results of the Client.
- Foreign Securities. Foreign securities have been highly volatile and often involve greater risks than comparable U.S. investments, because of, among other things, instability of some foreign

governments, the possibility of expropriation, limitations on the use or removal of funds or other assets, changes in governmental administration or economic or monetary policy (in the United States or abroad) or changed circumstances in dealings between nations. The application of foreign tax laws (e.g., the imposition of withholding taxes on dividend or interest payments) or confiscatory taxation may also affect investment in foreign securities. Higher expenses also may result from investment in foreign securities than domestic securities. Foreign securities markets also may be less liquid, more volatile and less subject to governmental supervision than in the United States.

- Failure of a Broker. In the event of the insolvency of a Broker utilized by Scoggin there is no assurance that a Client will be able to recover one hundred percent of either its assets on deposit with that prime broker or the value of those assets.
- Trading Agreements with Brokers May be Amended or Terminated. Client trading activities are conducted with several brokers or other financial intermediaries. These relationships are governed by negotiated agreements that can be amended or terminated, including upon the occurrence of a variety of events related to a Client, such as bankruptcy or failure to maintain required regulatory licenses or registrations. If any such event occurs, the counterparty may, depending on the terms of the agreement, have the ability to immediately terminate the relationship or change certain terms of the agreement, such as applicable financing rates. Any such termination or amendment can have an adverse effect on the Client's ability to continue to trade with that financial intermediary or the profitability of the Client.
- Concentration of Investments. Certain Clients maintain concentrated portfolios and do not limit the amount of capital that may be committed to any one investment. These Clients may hold a few (or even one), relatively large (in relation to their capital) securities positions, with the result that a loss in any one position could have a more adverse impact on the Client than would a loss in a position in a more diversified portfolio.
- Lack of Liquidity of Investments. Because of the nature of Scoggin's investment strategies, a large percentage of Scoggin's investments may have holding periods substantially in excess of six (6) months before they can be liquidated to a Client's greatest advantage or, in some cases, at all, including at substantial discounts. In addition, Scoggin may hold a significant number of securities for which no market exists and which have restricted transferability under U.S. Federal or state securities laws, and it may be able to dispose of these securities only at substantial discounts or losses.
- Futures Trading. Scoggin invests to a limited extent in futures contracts on behalf of certain Clients. Futures prices are highly volatile. Due to the small amount of margin required, trading in futures involves a high degree of leverage. Accordingly, a relatively small price movement may result in immediate and substantial gain or loss to a Client's assets. It is not always possible to execute a buy or sell order for futures contracts at the desired price, or to close out an open position, due to market conditions and/or price fluctuations. When the market price of certain futures contracts reaches its daily price fluctuation limit, no trades or only a limited number of trades can be executed. Daily price fluctuation limits are established by some of the exchanges on which Scoggin will trade and approved by appropriate regulatory bodies.

The holder of a futures contract may therefore be locked into a position for several days or more and during an adverse price move may lose considerably more than the initial margin paid to establish a position. For certain futures instruments, the daily price fluctuation limits may apply throughout the life of the contract. Difficult or impossible execution also occurs in thinly traded markets.

- Discontinuation of LIBOR. The London Interbank Offered Rate (“LIBOR”), which has been commonly used as a reference rate within various financial contracts (any such rate, a “Reference Rate”), will not be published after the year 2021 for certain instruments and after the year 2023 for any instrument. In anticipation of the end LIBOR, the U.S. and other countries are currently working to replace LIBOR with alternative Reference Rates. As a general matter, the expected discontinuation of LIBOR may significantly impact financial markets; specifically, discontinuation may impact financial contracts to which a Client is a party. Generally, the transition to alternative Reference Rates may (i) cause the value of a Reference Rate to be uncertain or to be lower or more volatile than it would otherwise be, (ii) result in uncertainty as to the functioning, liquidity or value of certain financial contracts, (iii) involve actions of regulators or rate administrators that adversely affect certain markets or specific financial contracts, and/or (iv) impact the strategy, products, processes, legal positions and information systems of market participants, including the Client and its counterparties. With respect to financial contracts to which the Client is a party, including corporate and municipal bonds and loans, consumer loans, bank loans, floating rate debt, certain asset-backed securities, and interest rate swaps and other derivatives, any such contract that has a maturity that extends beyond 2021 and uses LIBOR as a Reference Rate (other than contracts that include curative fallback language or other curative mechanisms) may need to be renegotiated, the process of which will consume resources and may result in disputes among counterparties, the result of which may be adverse to the Client. Considered in their entirety, the impact of the discontinuation of LIBOR on financial markets generally and on the specific financial contracts to which the Client is a party, may adversely affect the performance of the Client’s portfolio.
- Increased Governmental and Regulatory Scrutiny; Litigation and Regulatory Risks. Governmental scrutiny of the financial services industry has increased dramatically in the past several years. Routine and targeted examinations of hedge fund managers and hedge funds have increased and regulators have been more likely in recent years to commence investigations and bring enforcement actions against industry participants. Responding to examinations, investigations, and enforcement actions is both time consuming and expensive, and would divert the time and effort of Scoggin’s senior management from managing Client assets. The extent of an Affiliated Fund’s and Scoggin’s exposure to legal and regulatory matters is unpredictable.
- Epidemics and Pandemics. Many countries have been susceptible to epidemics, such as severe acute respiratory syndrome, avian flu, H1N1/09 flu and, currently, COVID-19 (commonly known as the “CORONAVIRUS”). The epidemic or pandemic outbreak of an infectious disease in a country or region of the world or globally, together with any resulting restrictions on travel, transportation or production of goods or quarantines imposed, could have a negative impact on the national, regional or global economy and business activity in any of the countries

in which Scoggin may invest and thereby adversely affect the performance of Client investments. While the economic impact of the ongoing global outbreak of the CORONAVIRUS is presently uncertain, such outbreak and any future outbreak of an infectious disease or any other serious public health concern in a country, region or globally could materially harm Client investments. Specifically, a continuation or escalation of the CORONAVIRUS outbreak could see a continual and drastic decline in global economic growth resulting in, among other things, recessions or depressions. In addition, the CORONAVIRUS has led to significant volatility in the securities markets and the CORONAVIRUS and any future outbreak of an infectious disease or any other serious public health concern may lead to additional volatility and illiquidity of the Client investments. The CORONAVIRUS could also lead to the imposition of emergency or extraordinary regulatory restrictions on markets and trading activities, which could materially harm Client investments. The CORONAVIRUS and any future outbreak of an infectious disease or any other serious public health concern may also lead to significant interruption in normal business activity of Scoggin and the Clients' other service providers which could negatively affect the performance of Client accounts. One such interruption is long term remote working by Scoggin employees which could cause delays in processing of important mail, changes in supervision of Scoggin employees, changes in responsibilities of employees, information technology failures and other disruptions to normal business operations that could negatively affect the performance of Client accounts.

- Disaster Recovery and Data Security. In implementing investment strategies, Scoggin relies heavily on information technology and data management systems, which can fail or be subject to interruption or destruction caused by natural or man-made occurrences such as extreme weather, fires or earthquakes; power loss or computer network or telecommunications failures, quarantines and other mobility and/or access restrictions, widespread or prolonged loss of access to key personnel; usage errors by personnel; infiltration by unauthorized persons, including through malware, ransomware, hacking, and other forms of cyber attacks, some of which may not be detected for an extended period of time ("**Cyber Attacks**"); terrorist attacks, hacking, break-ins, sabotage, intentional acts of destruction, vandalism, or similar events or misconduct. With the increasing interconnectedness of our global economy, a massive Cyber Attack aimed at a country's critical infrastructure and economic systems may create chaos more catastrophic than a terrorist attack, natural disaster, or pandemic. Any failure, interruption, or destruction of Scoggin's information technology systems or data could have a material adverse impact on Clients and the operations of Scoggin. In addition, a breach in the security of Scoggin's systems could result in the theft, disclosure, or loss of investor, proprietary, and other sensitive information relating to a Client, which in turn could lead to litigation in which a Client could incur liability. Scoggin has in place information security, incident response, backup, and disaster recovery procedures intended to prevent or mitigate damage if such an event occurs. However, a breach could nevertheless occur, and such procedures could fail or be insufficient to avoid, mitigate, or remedy the breach. Moreover, the ever-changing methods and technologies used to obtain unauthorized access to systems through means such as third-party acts, computer error, malicious code, employee error, or malfeasance often are not known until used against a potential target. Therefore, Scoggin may be unable to anticipate the destructive or invasive methods and technologies that could be used against its systems or to implement adequate protections.

The foregoing is a summary of the material risks involved in Scoggin's significant investment strategies. Further discussion of risk information related to each Flagship Fund is presented in its Memorandum, which is available to current and eligible prospective investors in such Flagship Fund.

Item 9 – DISCIPLINARY INFORMATION

Scoggin does not have any disciplinary or legal events to report.

Item 10 – OTHER FINANCIAL INDUSTRY ACTIVITIES AND AFFILIATIONS

Scoggin's affiliate, Scoggin Advisors LLC ("Scoggin Advisors"), acts as portfolio manager to Scoggin International Fund Ltd., and Scoggin Overseas Ltd. In that capacity, Scoggin Advisors primarily is responsible for monitoring that Scoggin is adhering to its investment strategies, including its investment policies and restrictions. In addition, Scoggin Advisors oversees the activities of such Flagship Funds' administrator and performs various tasks at the direction of Scoggin International Fund Ltd.'s board of directors. Scoggin Advisors also acts as administrative manager to Scoggin Capital Management II LLC and Scoggin Capital Management LLC. In that capacity, Scoggin Advisors is responsible for administration of such Flagship Funds, for monitoring Scoggin's compliance with its investment activities, strategies and limitations and overseeing the activities of such Flagship Funds' administrator.

Old Bellows, also a registered investment adviser, is an affiliate of Scoggin by virtue of partial common ownership. Old Bellows acts as the investment manager to the Worldwide Funds for which Dev Chodry is Chief Investment Officer. In addition, Athena Partners Management LLC ("Athena"), an affiliate of Scoggin and Old Bellows, is also a registered investment adviser that provides investment advice to one of the classes of the Worldwide Funds. The Athena investment strategy is not currently appropriate for the Scoggin Clients and Scoggin, generally, does not otherwise pursue the same investments as Athena. Therefore, conflicts are not expected to occur between Scoggin and Athena.

The various Affiliated Funds have differing fee structures. In addition, the Chief Investment Officers of Scoggin and Old Bellows own varying amounts of each investment adviser. Furthermore, the Chief Investment Officers of Scoggin and Old Bellows own different amounts of the various Affiliated Funds. The differing fee structures, the differing ownership levels of Scoggin and Old Bellows and the differing ownership levels of the various Affiliated Funds causes each Chief Investment Officer to derive different amounts of profits from Scoggin, Old Bellows and/or the various Affiliated Funds and thus creates an incentive for an individual Chief Investment Officer to favor one Affiliated Fund over another.

To avoid even the appearance of such impropriety, Scoggin and Old Bellows have adopted joint policies and procedures for allocation of investment opportunities and trades. It is the policy of Scoggin and Old Bellows that investment decisions for Affiliated Clients are to be made consistent with the investment objectives, guidelines and restrictions of such Affiliated Clients and that

investment opportunities and trades are to be allocated fairly and equitably among accounts participating in each transaction, taking into consideration their investment objectives and restrictions, and after consideration of such factors as their current holdings, available cash for investment and the size of their positions. While Scoggin's goal is to be fundamentally fair to all Clients on an overall basis with respect to the allocation of investment opportunities, on a trade-by-trade basis some Clients may be treated more favorably than other Clients.

For Clients that have similar investment strategies, Scoggin, generally attempts to manage such Client accounts in the same manner so that they have similar holdings and positions, and typically invests for the those Clients proportionally based upon relative net assets. In allocating investment opportunities among Clients that pursue different investment strategies and have different objectives and restrictions, given the differing holdings, available cash for investment and primary investment focus, if any, and the size of current positions each such Client will not necessarily participate in each transaction in a security or instrument that might be considered within the range of permissible investments for that Client account. Currently, all Affiliated Clients pursue different investment strategies.

Allocation of Distressed Credit Strategy Trades

With respect to distressed credit strategies, Scoggin and Old Bellows, periodically, establish trade allocation formulas for their flagship clients ("Flagship Clients") which include Scoggin International Fund Ltd., Class A of the Worldwide master fund and any other Affiliated Client accounts managed according to the same investment strategies as such funds. The trade allocation formulas are based on the relative amount of assets under management and investment strategies for the various Flagship Clients. Scoggin and Old Bellows can adjust the established allocation formulas based on changes to assets under management or adjustments to the investment strategies for each of the Flagship Clients.

It is generally the policy of Scoggin and Old Bellows that distressed credit strategy orders executed for Flagship Clients of the same security in the same direction on the same trading day will be aggregated for execution. For each aggregated or bunched distressed credit strategy order, when the trade is entered, the order management system utilized by Scoggin and Old Bellows automatically allocates that trade to each Flagship Client consistent with the existing allocation formula, and all Flagship Clients participating in such orders will receive the average price for the trading day.

Allocations of distressed credit strategy securities for Flagship Clients may be modified from the established trade allocation formulas after preparation of the allocation statement but prior to settlement under the following circumstances:

- *Investment Guidelines.* If it is determined that an allocation would result in a violation of any Flagship Client's investment objectives or guidelines. In addition, trades may be reallocated to one of the Flagship Clients if its investment objectives limit its potential universe of available securities provided the other Flagship Clients could, consistent with their investment objectives and guidelines, obtain substantially the same investment result by participating in another available investment opportunity.

- *Legal Requirements.* If it is determined that an allocation would result in a violation of any law or regulation applicable to the type of Flagship Client or transaction.
- *Portfolio Manager Discretion.* In other circumstances at the direction of, or with approval from, the Chief Investment Officer for Distressed Credit Strategies.
- *Rebalancing Trades.* Upon subscriptions to or redemptions from the Flagship Clients, the Chief Investment Officer for Distressed Credit Strategies may or may not choose to rebalance the portfolio, depending on market conditions at the time. Instead, the Chief Investment Officer for Distressed Credit Strategies may choose to adjust positions over time with rebalancing trades that result in deviations from pre-set allocations.

All exceptions to the established allocation formulas for Flagship Clients are required to be reviewed and approved by the Scoggin and Old Bellows portfolio managers. In addition, the Chief Compliance Officer, will periodically review samplings of portfolio manager approved exception reports for any anomalies that require further investigation.

Currently, the Worldwide Funds are solely owned by persons affiliated with Scoggin. Consequently, Old Bellows and Scoggin's aggregation of distressed credit strategy trades for Scoggin International Fund Ltd., and Class A of the Worldwide master fund in limited opportunity trades causes the participation by the affiliated Class A of the Worldwide master fund in such allocations to reduce the opportunity available to Scoggin International Fund Ltd. To address this conflict, it is the policy of Scoggin and Old Bellows that if a distressed debt security is of limited availability, generally, Scoggin will purchase or sell the amount of the security desired for International Fund Ltd. prior to Old Bellows transacting in the security for Class A of the Worldwide master fund.

In addition, trades for distressed debt securities for any Affiliated Clients other than Flagship Clients ("Non-Flagship Clients") will not be included in the trade allocation formulas established for Flagship Clients because of the differences in investment guidelines and restrictions between the Non-Flagship Clients and the Flagship Clients. Nonetheless, to the extent Scoggin and Old Bellows seek to make the same investment for Non-Flagship Clients and Flagship Clients at the same time, they will endeavor to allocate such investments fairly between Non-Flagship Clients and Flagship Clients based on the investment strategy of each of the participating Non-Flagship Clients and Flagship Clients funds and their available cash at the time of the trade. However, to the extent the proposed investment involves a distressed debt security which is of limited availability and one of the participating accounts in the investment will be Class A of the Worldwide master fund, generally, Scoggin and Old Bellows will purchase or sell the amount of the distressed debt security for all other participating Affiliated Clients prior to Old Bellows transacting in the security for Class A of the Worldwide master fund. In addition, the Chief Compliance Officer periodically reviews investments made on behalf of Flagship Clients to determine that Scoggin and Old Bellows are not favoring such clients over Non-Flagship Clients. It should be noted that as of the date of this brochure Scoggin and/or Old Bellows do not plan on making additional investments in distressed debt securities for any Non-Flagship Clients. However, the allocation policies described herein have been adopted because in the past Scoggin

and/or Old Bellows managed Non-Flagship Client that invested in distressed debt securities and may do so again in the future.

Allocation of Equity Security Trades between Scoggin and Old Bellows Clients

Mr. Chodry is responsible for making equity security decisions for Class A of the Worldwide master fund and Mr. Effron and Mr. Schenker are responsible for equity security decisions for Scoggin clients. If Mr. Chodry desires to transact in an equity security for Class A of the Worldwide master fund, he will first check whether Scoggin plans on transacting in such security that day for Scoggin clients. If Scoggin plans on trading such security that day for Scoggin clients, generally, Mr. Chodry will not transact in the security on that day for Class A of the Worldwide master fund until Scoggin finishes taking the position it desires in such security for its clients.

Item 11 – CODE OF ETHICS, PARTICIPATION OR INTEREST IN CLIENT TRANSACTIONS AND PERSONAL TRADING

Scoggin has adopted a Code of Ethics (the “Code”) that sets forth the ethical and fiduciary principles and related compliance requirements under which Scoggin operates and the procedures for implementing those principles. The Code includes provisions that govern fiduciary duty, Client opportunities, insider trading, personal trading, gifts and entertainment, political contributions, outside business activities and confidentiality.

Scoggin’s and its affiliates’ principals, employees and certain related persons of such principals and employees (principals, employees and such related persons, collectively, “Employees”) are subject to Scoggin’s personal trading policies. Under such policies, Employees are permitted to maintain personal securities accounts provided that such accounts are disclosed to Scoggin and that any personal trading is consistent with applicable law and with the Code.

The Code contains policies and procedures that, among other things:

- prohibit Employees from taking personal advantage of opportunities belonging to Clients;
- prohibit trading on the basis of material nonpublic information;
- place limitations on personal trading by Employees to avoid direct conflict with Client trading and impose preclearance (in most cases) and reporting obligations with respect to trading; and
- require initial and annual reports of securities holdings and quarterly transaction reports by Employees.

Subject to compliance with the Code, Employees may buy, sell or hold, for their own personal accounts, securities that Scoggin also may buy, sell or hold for Affiliated Clients. Similarly, Scoggin, consistent with Clients’ investment objectives and in accordance with applicable law, may cause accounts it manages to purchase or sell securities in which Scoggin or Employees of Scoggin, directly or indirectly, have a position or interest. To address conflicts of interest issues that may arise from personal trading, Employees are prohibited from trading for their personal

accounts on the same day that an Affiliated Client traded in such security. This trading restriction does not apply to certain securities (“Exempt Securities”) that Scoggin has determined will not raise a conflict of interest if Employees trade on the same day as Affiliated Client accounts. In addition, to the foregoing trading restriction, Employees need to preclear all personal securities transactions other than transactions in Exempt Securities. The Chief Compliance Officer reviews such trades for possible conflicts of interest.

As noted in Item 10 above, currently the Worldwide Fund is solely owned by persons affiliated with Scoggin and, therefore, is a related account of Scoggin. As further described in Item 10 above, Scoggin and Old Bellows have adopted procedures with respect to the trading of Class A of the Worldwide master fund to prevent it from taking away investment opportunities from Affiliated Clients.

Scoggin’s Code of Ethics is available to Clients or prospective Clients upon request from Todd Jablonsky, Scoggin’s Chief Compliance Officer, at (212) 355-5600.

Scoggin does not “solicit” Clients, all of which currently are private investment funds, to invest in other funds managed by it or its affiliates. From time to time, however, Scoggin, in the exercise of its investment discretion, invests assets of a Scoggin Fund in another fund managed by it or an affiliate. Such investments are expected to be infrequent.

Scoggin does not generally purchase securities for one Client account from another Client account or sell securities from one Client account to another Client account. (Such transactions between client accounts are commonly known as “cross trades”.) From time to time, however, Scoggin may determine that it is in the best interest of certain Clients to cross trade certain securities between their accounts, or with Affiliated Clients managed by Old Bellows. Any such transaction will be effected at the market price of the security determined at the time of the transaction. Cross trades will be effected only if consistent with the investment objectives and restrictions of the Affiliated Clients involved and with Scoggin’s internal cross trade policies and procedures.

Item 12 – BROKERAGE PRACTICES

In the exercise of its discretionary authority, Scoggin has the authority to determine, without obtaining specific Client consent, the broker-dealers (“Brokers”) to be used for each transaction and to negotiate the rates and commissions the Client will pay. In selecting Brokers to execute transactions, Scoggin need not solicit competitive bids and does not have an obligation to seek the lowest available commission cost. It is not Scoggin’s practice to negotiate “execution only” commission rates; thus, a Client may be deemed to be paying for other products and services provided by the Brokers which are included in the commission rate.

Scoggin attempts to enter into brokerage arrangements that are competitive, based on its knowledge of the industry. In making its selection of Brokers, Scoggin takes into account the Brokers’ reliability, reputation, financial responsibility, stability, ability to execute trades, nature and frequency of sales coverage, commission rate, if any, and the responsiveness of the Brokers. In addition, Scoggin considers the value of brokerage and research products and services, including, among other things, proprietary research from broker-dealers and research either

generated and provided by the Brokers, or provided by others and paid for by the Brokers (either by direct or reimbursement payment in whatever form, cash payments, commissions, or any other means). Research services may include, among other things, research concerning market, economic and financial data, a particular aspect of economics or on the economy in general, statistical information, data or pricing regarding securities, financial publications, electronic market quotations, performance analytics, analyses concerning specific securities, companies, industries or sectors and market, economic and financial studies and forecasts. Research may be in written or oral form.

Scoggin maintains a Best Execution Committee, which meets quarterly to review the quality of executions and the value of other services received from brokers used by Scoggin and based on such reviews the Best Execution Committee may add or remove approved brokers. The members of the Best Execution Committee are the CFO, the head trader, the Co-Chief Investment Officers for Event-Driven Strategies, the Chief Investment Officer for Distressed Credit Strategies and the CCO.

Section 28(e) of the Securities Exchange Act of 1934 provides a “safe harbor” for investment managers who use brokerage commissions or transaction fees (also known as “soft dollars”) generated by their client accounts to obtain certain products and services. Eligible Section 28(e) expenses include investment research that provides lawful and appropriate assistance to an investment manager in performing investment decision-making responsibilities and/or brokerage products and services (beyond traditional execution services) that perform functions incidental to transaction execution. Scoggin’s use of soft dollars to purchase products and services is intended to comply with the requirements of Section 28(e).

Nonetheless, Scoggin’s use of soft dollars under the Section 28(e) safe harbor to obtain products and services creates various conflicts of interest. For example, by using Client commissions to obtain products and services, Scoggin does not have to produce or pay for such products and services. Consequently, Scoggin has an incentive to select or recommend Brokers based on its interest in receiving products and services, rather than its Clients’ interests in receiving most favorable execution. In addition, when products and services are received, Clients may pay higher commissions than those charged by other Brokers (from or through whom such products and services were not received). In addition, some products and services will not necessarily be used by a particular Client even though the Client’s commission dollars were used to obtain the products and services. Therefore, under such circumstances, the Client will not be the direct or indirect beneficiary of the products and services generated by its brokerage transactions.

Some products and services may have a mixed-use and only partially be used for purposes that qualify for the Section 28(e) safe harbor. Under such circumstances, Scoggin makes a good faith effort to reasonably allocate the costs of such products and services according to their use and only allows those portions of the costs that are eligible under Section 28(e) to be paid for with commission dollars. Those portions of the costs that are not eligible to be paid for with commission dollars under Section 28(e) Scoggin allocates to Clients to the extent they are allowable Client expenses or to Scoggin to the extent they are ineligible Client expenses. In allocating the costs of a mixed-use product or service, Scoggin has an incentive to designate as much as possible of the costs to eligible Section 28(e) soft dollar expenses to minimize the amount that Scoggin and/or

Clients must pay directly. To address this conflict of interest, Scoggin maintains documentation of its methodology for allocating the costs of mixed-use products and services between allowable and non-allowable soft dollar expenses. Such documentation is periodically reviewed by the Chief Compliance Officer to determine that the allocations were reasonable.

Item 13 – REVIEW OF ACCOUNTS

Scoggin undertakes the following activities in an effort to ensure that investments for Clients are made in accordance with their respective investment objectives and restrictions:

- Operational personnel monitor and reconcile the cash and trades daily for each account and advise portfolio managers of any apparent anomalies.
- For any Separate Account Clients and/or Pooled Investment Vehicles that Scoggin may manage in the future, each such account's portfolio will be monitored by the portfolio manager or a member of the portfolio management team through the use of an electronic trading system for compliance with investment objectives and restrictions.
- For the Scoggin Funds, the portfolio manager or a member of the portfolio management team continuously monitors trading for consistency with each Scoggin Fund's investment objectives and restrictions.

Investors in the Flagship Funds generally are provided with written unaudited monthly statements of their account from the administrator and annually receive audited financial statements.

Item 14 – CLIENT REFERRALS AND OTHER COMPENSATION

Scoggin does not currently but may in the future pay certain brokers, finders and/or other third parties fees or similar compensation in connection with the referral of investors to the Scoggin Funds. Investors in the Scoggin Funds will not pay higher advisory fees based on such referrals.

Other than the soft-dollar benefits described in Item 12 above, Scoggin does not receive any economic benefit for providing advice to Clients from anyone other than its Clients.

Item 15 – CUSTODY

Scoggin does not have physical custody of any Client assets. Because Scoggin or related persons of Scoggin act as the managing member or general partner of certain Clients, Scoggin is deemed to have custody of the assets of those Clients under SEC rules. Scoggin maintains the assets of all Clients with qualified custodians, within the meaning of Rule 206(4)-2 under the Advisers Act. For the Flagship Funds, Scoggin satisfies reporting requirements under that rule by furnishing audited financial statements annually to all investors in such Flagship Funds within time periods required under the custody rule.

With respect to the SPVs, investors will receive statements directly from the qualified custodian of such private investment fund. Investors in the SPVs are urged to carefully review all qualified custodian account statements and contact Scoggin if they have any questions. Investors in the SPVs are also urged to review any communication they receive from Scoggin related to the SPVs and to contact Scoggin if they have any questions upon conducting such a review.

Scoggin would not typically have physical or constructive custody over Separate Account Client accounts or Pooled Investment Vehicles.

Item 16 – INVESTMENT DISCRETION

Scoggin has the authority to determine for Clients, without obtaining their specific consent, (1) securities or other instruments to be bought or sold, (2) the amount of the securities to be bought or sold, (3) the broker or dealer to be used, and (4) commission rates paid. Limitations on Scoggin's authority are imposed by the investment strategies and objectives of Clients. See Item 4.

Item 17 – VOTING CLIENT SECURITIES

Scoggin exercises discretion to vote proxies for Flagship Funds' securities. Scoggin, for itself and on behalf of Old Bellows, engages Institutional Shareholder Services ("ISS") to vote any proxies and Scoggin has so notified each Flagship Fund. The Chief Financial Officer manages Scoggin's relationship with ISS. The Chief Financial Officer ensures that ISS votes all proxies, consistent with Scoggin's agreement with ISS and Scoggin's general guidance and retains all required documentation associated with proxy voting. Scoggin reserves the right to vote any proxy instead of ISS, and Scoggin exercises such right on rare occasions. Scoggin does not disclose how it expects to vote on upcoming proxies. Additionally, Scoggin does not disclose the way it voted proxies to unaffiliated third parties who do not have a legitimate need to know such information.

Scoggin must act as a fiduciary when voting proxies on behalf of the Flagship Funds. In that regard, Scoggin will seek to avoid possible conflicts of interest in connection with proxy voting. Normally, conflicts of interest are addressed by having ISS vote the proxy consistent with Scoggin's general guidance on proxy voting but independent of Scoggin input on the particular proxy. However, in the limited cases when Scoggin chooses to exercise a vote itself, the Chief Financial Officer and the Chief Compliance Officer will consider whether Scoggin is subject to any material conflict and will take action to mitigate such conflict. ISS will retain and provide copies to Scoggin of information in connection with each proxy vote.

ISS and the Chief Financial Officer will maintain the following records with respect to proxies: (i) proxy statements received regarding Flagship Fund securities; (ii) records of votes cast on behalf of an Flagship Fund, including each security as to which votes were cast, the number of shares voted and how they were voted on each issue; (iii) written records of requests by Flagship Funds for proxy voting information; (iv) written responses to any written or oral requests; and (v) any documents prepared or used by Scoggin that were material to how a proxy was voted or that memorialized the basis for the voting decision.

Scoggin does not accept requests from Flagship Funds to vote proxies in a particular manner.

Scoggin's proxy voting policy and procedures are available upon request. A Flagship Fund may obtain Scoggin's proxy voting policy or a record of Scoggin's proxy voting for such Flagship Fund by contacting Todd Jablonsky, Scoggin's Chief Compliance Officer, at (212) 355-5600.

Item 18 – FINANCIAL INFORMATION

Scoggin has no financial condition that impairs its ability to meet contractual commitments to Clients, and has not been the subject of a bankruptcy proceeding.
