## Item 4. Advisory Business

---

DNDRO INC. is an Internet Adviser (Robo-Advisor) and is formed as a C corporation under the laws of the State of Washington.

Mr. Zhenhan Huang is the President, Chief Executive Officer, Chief Investment Officer, and Chief Compliance Officer of the firm.

### Financial Planning Services

Our principal service is providing subscription fee-based investment advisory services and financial planning services over internet.

As an internet advisor, we utilize algorithmic-based programs, which clients interact with directly, to provide financial planning advice per clients' personal situation and objectives.

The potential clients are required to answer key questions regarding their risk-tolerance levels, financial information, and objectives, as well as their personal information, including but not limited to age, education level, and annual income.

Our algorithms construct and recommend investment portfolios or specific stocks based on client's financial situation and objectives. Due to the volatility of the financial markets, our algorithms may recommend asset allocations or suggest operations on specific stocks to reduce the overall risk and increase performance of the portfolios formulated. We disclose the potential risks of the financial advices generated by our algorithms to the clients.

Our financial advice is automated through our software. Investment Advisor Representatives of DNDRO INC. develop the automated software, and they may answer the non-securities and non-financial Conversation Starter questions in Form CRS (which stands for client relationship summary) at no cost.

DNDRO INC. does not practice discretionary management of clients' financial accounts and at no time will accept or maintain custody of clients' funds or securities, nor provide other administrative services.

### Types of Investments

Although we do not recommend one particular type of security over other types of securities, we do provide advice majorly on two types of securities: Exchange Traded Fund ("ETF") and Publicly-traded Equity Securities. You may impose restrictions on investments in particular securities or certain types of securities. You must provide these restrictions to our firm in writing.

## Item 5. Fees and Compensation

---

In order to use services from DNDRO INC., clients are required to subscribe through our website or mobile application and pay a subscription fee. Subscription fee-based clients are billed on a monthly basis. Due to the value-added services clients may select, the range of subscription fee varies. Our non-negotiable subscription fee will typically be billed at a rate of \$5.00 to \$30.00 per month, regardless of clients' financial situations.

Fees are payable by debit or credit card through a designated third party payment processor.

Prior to engaging DNDRO INC. to provide financial planning and consulting services, the client will be required to enter into a written agreement with us. The agreement will set forth the terms and conditions of the engagement and describe the scope of the services to be provided and the fee payable by the client to DNDRO INC.

Either client or DNDRO INC. can terminate the agreement at any time by written notice to the other following the terms of the agreement. Any prepaid, unearned fees will be promptly refunded to the client. Any remaining balance due to DNDRO INC. will be payable as invoiced.

Our models require heterogeneous data sources, including structured (e.g., historical stock prices) and unstructured data (e.g., financial news, financial statement, or clients' financial situation).

The investment advice provided by DNDRO INC. will vary depending on your specific financial situation and goals.

Investing involves substantial risks, including complete possible loss of principal plus other losses, and may not be suitable for everyone. Unlike savings and checking accounts at a bank, investments are not insured by the government to protect against market losses. Different market instruments carry different types and degrees of risk, and you should familiarize yourself with the risks involved in the particular market instruments in which you intend to invest. You should fully understand the nature of the contractual relationship(s) into which you are entering and your risk preference.
