March 31, 2023

This Brochure provides information about the qualifications and business practices of SEI Investments Management Corporation (“SIMC”). If you have any questions about the contents of this Brochure, please contact us at 1-800-DIAL-SEI. The information in this Brochure has not been approved or verified by the United States Securities and Exchange Commission (“SEC”) or by any state securities authority.

SIMC is a registered investment advisor. Registration of an investment advisor does not imply any level of skill or training.

Additional information about SIMC is available on the SEC’s website at www.adviserinfo.sec.gov.

Item 2 - Material Changes

We have not made any material changes to this Brochure since its last annual amendment filed on March 30, 2022. This March 31, 2023 annual amendment includes updates made within Item 4 (update to assets under management and separately managed accounts) Item 8 (investment philosophy and material risk) and Item 11 (Code of Ethics). Currently, our Brochure may be requested by contacting the SIMC Compliance Team at 610-676-3482 or SIMCCompliance@seic.com.

Additional information about SIMC is also available via the SEC's web site www.adviserinfo.sec.gov. The SEC's web site also provides information about any persons affiliated with SIMC who are registered, or are required to be registered, as investment advisor representatives of SIMC.

Item 15 - Custody.....	37
Item 16 - Investment Discretion	38
Item 17 - Voting Client Securities	39
Item 18 - Financial Information.....	41

Item 4 - Advisory Business

SIMC is an investment advisor registered under the Investment Advisers Act of 1940 (“Advisers Act”) with the SEC. It is an indirect wholly-owned subsidiary of SEI Investments Company (“SEIC”), a publicly traded diversified financial services firm (NASDAQ: SEIC) headquartered in Oaks, Pennsylvania, a suburb of Philadelphia. SIMC and its predecessor entities were originally incorporated in 1969.

SIMC is investment advisor to various types of investors, including but not limited to, corporate and union sponsored pension plans, public plans, defined contribution plans (including 401(k) plans), endowments, charitable foundations, hospital organizations, banks, trust departments, registered investment advisors, trusts, corporations, high net worth individuals and retail investors. SIMC also serves as the investment advisor to a number of pooled investment vehicles, including mutual funds, hedge funds, private equity funds, collective investment trusts and offshore investment funds (together, the “Pooled Investment Vehicles”). Additionally, SIMC serves as the sponsor of and advisor to, managed accounts.

SIMC’s total assets under management as of December 31, 2022 were \$180,855,686,615, \$174,243,140,798 of which it manages on a discretionary basis and \$6,612,545,367 on a non-discretionary basis.

Institutional Group

SIMC offers investment management and investment advisory services directly to institutional clients through SEIC’s business segment called Institutional Investors (the “Institutional Group”). SIMC’s Institutional Group delivers integrated healthcare, retirement and non-profit investment solutions to institutional clients including, but not limited to, corporate and union sponsored pension plans, public plans, defined contribution plans (including 401(k) plans), endowments, charitable foundations, and hospital organizations (each a, “Client” and together the “Clients”). Although we may use “SIMC” and “Institutional Group” interchangeably in this Brochure, when we refer to advisory services, SIMC provides those services.

The solutions offered by the Institutional Group are designed to enable Clients to meet financial objectives, reduce business risks and fulfill their due diligence requirements through implemented fiduciary management strategies for defined benefit plans, defined contribution plans, endowments, foundations and other balance sheet assets. The Institutional Group provides customized asset allocation advice to Clients based on the financial objectives, investment objectives, risk tolerance and investment restrictions of the individual Client (“Investment Guidelines”). SIMC uses a proprietary asset allocation methodology to make its initial and ongoing recommendations. SIMC’s methodology uses estimates of the long-term rates of return, volatility and correlations of various asset classes. SIMC also provides comparisons of its performance to relevant benchmarks.

SIMC maintains an open architecture investment management platform. The foundation of our approach is active management, and our portfolios are designed to capture opportunities over both the short-term and the long-term. SIMC recommends a strategic asset allocation for each Client based on such Client’s Investment Guidelines. While this allocation should be the primary focus for a Client to achieve its investment objectives, there may be periods of time in which it is possible to capture shorter-term market opportunities. We seek to implement our advice in the most efficient manner. Further, asset allocation changes are recommended to attempt to improve portfolio returns as well as to reduce risks.

In addition to acting as Clients’ investment manager for certain accounts, SIMC may also provide non-fiduciary/non-discretionary oversight services for other Client accounts, or a portion of that other account or security/strategy (“Oversight Services”). These services may include reviews of the investment performance and risk metrics of third-party investment products or managers utilized by such Clients, consolidated reporting, financial modeling, asset allocation studies, shadowing of activities, as well as periodic recommendations regarding the investment policy statement and benchmarks relating to assets held within such an account.

When recommending or implementing a Client's customized asset allocation portfolio, the Institutional Group may invest Client assets in: (i) SIMC's registered investment companies (mutual funds) ("SEI Funds"); (ii) SIMC's private funds ("SEI Alternative Funds"); (iii) SEI Trust Company's collective investment trusts ("SEI CITs"); (iv) third-party public or private funds; (v) individual equities or fixed income vehicles; (vi) derivatives; and/or (vii) other investments as otherwise may be agreed.

Clients may choose to custody assets at SEI Private Trust Company ("SPTC"), an affiliate of SIMC. Please see [Item 15](#) for additional information.

Direct Alternative Private Fund Investments

To the extent that certain of SIMC's advisory Clients qualify, they will be eligible to invest directly into privately offered third party alternative funds. Investment in these funds involves a significant degree of risk and is an appropriate investment only for those investors who do not require a liquid investment. These funds may be managed by third-party investment advisors selected and overseen by SIMC or selected by the Client either before or after retaining SIMC's services and overseen by SIMC. SIMC may work with Clients to tailor the direct alternative fund investment strategy to each Client. Since certain affiliates of SIMC provide funds' accounting and other services to third-party hedge funds, it is possible that some funds in the direct alternative fund program may use a SIMC affiliate for such services, for which that affiliate will earn fees. SIMC seeks to mitigate the risk of such a conflict by conducting the same comprehensive due diligence and selection process with respect to all funds, without any consideration to whether or not the fund has any business relationship with a SIMC affiliate.

Derivatives

SIMC may recommend certain derivatives for certain Clients. These derivatives may be entered into by SIMC as agent and/or investment adviser to the Client.

SIMC'S Pooled Investment Vehicles

The Institutional Group may also invest Client assets in the following SIMC Pooled Investment Vehicles to seek to achieve the Client's investment goals.

(a) SEI Funds

SIMC serves as the investment advisor to the SEI Funds, which is a family of SEC-registered mutual funds. Most of the SEI Funds are manager-of-managers funds, which means that SIMC: (i) hires one or more sub-advisors to manage the SEI Funds on a day-to-day basis; (ii) monitors the sub-advisors; (iii) allocates, on a continuous basis, assets of a SEI Fund among the sub-advisors (to the extent a fund has more than one sub-advisor) and, (iv) when necessary replaces sub-advisors. Each sub-advisor makes investment decisions for the assets it manages and continuously reviews, supervises and administers its investment program. SIMC is generally responsible for establishing, monitoring, and administering the investment program of each SEI Fund. While most SEI Funds are managed by sub-advisors, SIMC directly manages all or a portion of certain SEI Funds' assets directly. Please see [Item 8](#) for additional information on the sub-advisor selection process.

SIMC develops various SEI Funds, each of which seeks to achieve particular investment goals. These SEI Funds are not tailored to accommodate the needs or objectives of specific individuals, but rather the program is designed to enable SIMC to match its Clients with SEI Funds that are consistent with the Client's Investment Guidelines. Additionally, Clients invested in the SEI Funds may not impose restrictions on investing in certain securities or types of securities within each SEI Fund.

(b) SEI Alternative Funds

SIMC also serves as investment advisor for several privately offered investment funds referred to as the “SEI Alternative Funds”. To the extent that certain of SIMC’s Clients qualify, they will be eligible to participate as investors in the SEI Alternative Funds. Investment in the SEI Alternative Funds involves a significant degree of risk and is an appropriate investment only for those investors who do not require a liquid investment.

The SEI Alternative Funds may currently be structured in one of three ways; (a) *fund-of-funds*, meaning that the fund invests in underlying third-party funds; (b) *direct*, meaning that the fund invests in direct holdings as selected by SIMC or by SIMC appointed third-party sub-advisors; and/or (c) *customizable*, meaning that a segregated portfolio within a fund, or a dedicated fund, could invest as set forth in (a) and (b) above along with a customizable component wherein the Client participates in tailoring the investments to accommodate its individualized needs or objectives.

SIMC has the ultimate responsibility for the investment performance of the SEI Alternative Funds due to its responsibility to select and oversee the underlying funds and their managers. Since certain affiliates of SIMC provide accounting and other services to third-party hedge funds, it is possible that some underlying funds in which the SEI Alternative Funds invest may use a SIMC affiliate for such services, for which that affiliate will earn fees. SIMC seeks to mitigate the risk of such a conflict by conducting the same comprehensive due diligence and selection process with respect to all underlying funds, without any consideration to whether or not the underlying funds and their managers have any business relationship with a SIMC affiliate.

SIMC offers various SEI Alternative Funds, each of which seeks to achieve particular investment goals. The SEI Alternative Funds are not tailored to accommodate the needs or objectives of specific individuals, but rather are designed to enable Clients to be matched with an SEI Alternative Fund that is consistent with the Client’s Investment Guidelines. Additionally, Clients invested in the SEI Alternative Funds may not impose restrictions on investing in certain securities or types of securities within each SEI Alternative Fund, except as described above.

SIMC receives compensation either directly as the investment advisor to the SEI Alternative Fund or is paid an advisory fee directly from Clients investing into the SEI Alternative Fund, with the application of proper fee offsetting/crediting in accordance with applicable law.

(c) SEI Collective Investment Trusts

SIMC may make available certain SEI CITs to its eligible Clients. The SEI CITs are bank-maintained pooled investment vehicles for the collective investment of tax qualified retirement plans and governmental plans and are each intended to be exempt from SEC registration as a security under Section 3(a) (2) of the Securities Act of 1933 and an investment company under Section 3(c) (11) of the Investment Company Act of 1940.

SEI Trust Company, an affiliate of SIMC, is a state chartered trust company regulated by the Pennsylvania Department of Banking and Securities, which serves as trustee of the SEI CITs, and for which it receives compensation. As the trustee of each SEI CIT, it has retained SIMC to provide investment advice with respect to each SEI CIT. Each SEI CIT invests primarily in one or more underlying SEI Funds, or in an individual SEI Alternative Fund. For certain SEI CITs, SIMC may also perform investment advisory services with respect to managing the asset allocation of the SEI CIT’s underlying investment portfolios. Please see [Item 10](#) for additional information.

SIMC receives compensation either directly as the investment advisor to the SEI CIT or is paid an advisory fee directly from Clients investing into the SEI CIT, with the application of proper fee offsetting/crediting in accordance with applicable law.

Separately Managed Accounts

The Institutional Group may also invest Client assets in separately managed accounts, which may either be managed directly by SIMC or by third party investment advisors selected and overseen by SIMC. When a SIMC-appointed investment advisor directly manages Client assets, the investment advisor will retain discretion to select broker-dealers to execute orders. SIMC, and sub-advisors retaining discretion to manage Client assets, may execute trades directly through third party broker-dealers or through SEI Investments Distribution Co. (“SIDCO”), SIMC’s affiliated broker-dealer, consistent with their duty to seek best execution. In certain cases, when managing equity-based Separately Managed Accounts strategies, SIMC is provided with the third party investment advisor’s investment strategy model (each, a “Model Strategy”) and SIMC will generally execute all equity trades through SIDCO. In each case, these trades will incur commission charges. See [Items 10](#) and [12](#) below for more information on SIMC’s brokerage practices. SIMC has a conflict of interest when selecting SIDCO to execute these orders as SIDCO will earn a commission on these orders and SIMC may be motivated to pay a higher commission for trades involving SIDCO compared to a third party broker. SIMC mitigates this conflict through its duty to seek to obtain best execution. In certain cases when executing Model Strategy trades through SIDCO, SIMC has arranged for SIDCO to waive the commission SIDCO would otherwise charge and, instead, a portion of the advisory fee SIMC charges the Client covers these trading costs.

Client assets will be invested in accordance with such Client’s investment guidelines. Clients may, at any time, impose reasonable restrictions on the management of the Client’s assets invested in individual securities. Costs paid by a Client may be more or less than other advisors and/or if such Client paid separately for investment advice, brokerage and other services. To the extent Client wishes to retain a third-party investment advisor selected by the Client, SIMC will also perform a review of the investment advisor.

SIMC in its sole discretion may provide due diligence on third party funds or managers selected by a Client (“third party strategies”), including third party strategies that the Client established prior to its relationship with SEI. SIMC does not provide recommendations with respect to such third party strategies, and does not perform due diligence on such third party strategies to the same extent as SIMC selected strategies unless specifically requested. SIMC will perform a lower level of due diligence with respect to third party strategies as disclosed to the Client that (i) are below certain asset thresholds within the client portfolio; or (ii) that are anticipated to be removed from the Client portfolio following an initial transition period to SIMC.

Additional restrictions may include one or more “screens” offered by SIMC that restrict or permanently remove securities from the Client’s selected strategy on the basis of ESG or other criteria. SEI has selected and engaged Institutional Shareholder Services Inc. and MSCI ESG Research LLC, as “vendors” to provide the selected screens. Each vendor can vary materially from other ESG vendors and advisers with respect to its methodology for constructing screens, including with respect to the factors and data that it collects and applies as part of its process. As a result, Clients can expect that the vendors’ screens will differ from or contradict the conclusions reached by other ESG vendors or advisers with respect to the same issuers. A client restriction, including the selection of a screen, will likely contribute to performance deviations from the strategy, including underperformance.

For temporary defensive or liquidity purposes during unusual economic or market conditions, SIMC and/or sub-advisors may (i) invest all or a portion of investor portfolios in cash, money market instruments, repurchase agreements and other short-term obligations that would not ordinarily be consistent with a portfolio’s strategy; and/or (ii) delay or suspend purchases and sales of securities. SIMC or a sub-advisor will only do so only if it believes that the risk of loss outweighs the opportunity for capital gains or higher income. During such time, a portfolio may not achieve its investment goal.

LDI Fixed Income Strategy

In addition, SIMC may implement a custom liability driven investment strategy for certain Clients. The LDI strategy may include a combination of relevant fixed income SEI Funds (e.g., Long Duration Credit Bond Fund, Core Fixed Income, etc.) and also invest directly in the following types of investments: fixed income securities, mutual funds, exchange traded funds, U.S. Government securities, including U.S. Treasury obligations consisting of separately traded interest and principal component parts of such obligations known as Separately Traded Registered Interest and Principal Securities ("STRIPS"), and interest rate swaps or other interest-rate derivatives entered into by SIMC on behalf of the Client.

Use of Affiliates

For each of the programs and products described in this Brochure, SIMC hires one or more of its affiliates to perform various services, including transition management services when transitioning Client assets to SIMC from its previous service providers, sub-advisory services, administrative services, custodial services, brokerage and/or other services and such affiliates receive compensation for providing such services. Please refer to [Item 10](#) for additional information.

Item 5 - Fees and Compensation

Asset Allocation Implementation through SEI Funds, Separately Managed Accounts and /or LDI (a type of Separately Managed Account) (for which SIMC may serve as the investment advisor): Maximum Fee of 125 bps

SIMC charges Clients an investment management fee based on the Client's assets under management, which may be tiered. These fees will be a percentage of the average of the market value of all assets under management on the last trading day of each month in the calendar quarter and of the month immediately preceding the commencement of the calendar quarter. Clients will pay these fees quarterly in arrears. SIMC will either invoice Clients for fees or, with Client's approval, deduct such fees directly from their custody account if such custody account is maintained with SEI Private Trust Company. The above fees are negotiable. SIMC's affiliates or third parties may charge Clients additional trust, custody and benefit payment fees.

SIMC will offset or credit against the account level investment management fee charged to a Client an amount equal to any advisory fees received by SIMC or its affiliates from an SEI Fund attributable to that Client's investment in such product. In certain cases, the amount of the offset or credit could be reduced by the amount of the sub-advisory fees paid by SIMC to the underlying sub-advisors in the product if the Client is separately invoiced for sub-advisory fees.

SIMC may also charge Clients performance-based fees. Please see [Item 6](#) for additional information.

Asset Allocation Implementation fees will be negotiated on a Client-by-Client basis.

Asset Allocation Implementation through SEI's Alternative Funds and/or SEI Collective Trust Funds: Maximum Fee of 150 bps

The maximum investment management fee set forth above may be charged as a product fee or as an investment management fee; therefore, the frequency upon which SIMC will charge a Client these fees will vary. The investment management fees SIMC charges may be calculated differently based on the type of Alternative Fund product (i.e., hedge fund vs. private equity) including, but not limited to, (i) a percentage of the net asset value of the Client's investment in the applicable product (generally the case for hedge fund products); and (ii) a percentage of the commitment made by a Client to the applicable product which may change to a net asset based fee after a certain period of time (generally the case for private equity products). SIMC will either invoice Clients for fees or, with Client's approval, deduct such fees directly from their custody account if such custody account is maintained with SEI Private Trust Company. These Alternative Fund fees are negotiable. For certain products, fees may be charged at the fund level (rather than invoiced) and may not be negotiable.

For Clients engaging in derivative transactions, SIMC may charge a basis point fee for derivative implementation based upon a notional value of the transaction involved.

Asset Allocation Implementation Fees will be negotiated on a Client-by-Client basis.

The fees charged by SIMC for these services may be higher or lower than those charged by other investment advisors for similar services.

Product Level Fees

1. Fees for SEI Funds

Each SEI Fund pays an advisory fee to SIMC that is based on a percentage of the portfolio's average daily net assets, as described in the mutual fund's prospectus. From such amount, SIMC pays the sub-advisor(s) to the SEI Fund. SIMC's fund advisory fee varies, but it typically ranges from 0.01% - 1.50% of the

portfolio's average daily net assets for its advisory services. Additionally, affiliates of SIMC provide administrative, distribution and transfer agency services to all of the SEI Funds, as described in the SEI Funds' registration statements. These fees and expenses are paid by the SEI Funds but ultimately are borne by each shareholder of the SEI Funds. SIMC and/or its affiliates may voluntarily waive a portion of the fees to be paid, respectively, by the SEI Funds to SIMC or its affiliates. Clients may have the option to purchase certain SIMC investment products, including the SEI Funds, that SIMC recommends through other brokers or agents not affiliated with SIMC.

2. Fees for Separately Managed Accounts

Separate accounts that implement via individual securities will be charged an investment management fee that is a percentage of the average of the market value of all assets in the separate account on the last trading day of each month in the calendar quarter and of the month immediately preceding the commencement of the calendar quarter. The fee is paid quarterly in arrears and/or pro-rated, based on the number of days in which the account was open during the quarter. This fee will either include or be in addition to a separate charge for retained separate account sub-advisors' fees as set forth in each Client's investment agreement with SIMC. Except in limited cases when investing through Model Strategies where SIMC has arranged for SIDCO to waive its commission charges (see [Item 4](#) and [12](#) for more information), SIMC's fee is separate from and does not include brokerage commissions, dealer spreads and other costs associated with the purchase or sale of securities, Custodian fees, interest, taxes and other separate account expenses. These expenses are the responsibility of the Client. As discussed in [Item 4](#) and [12](#), for certain Separately Managed Account Model Strategies SIMC has arranged for SIDCO to waive commissions that SIDCO would otherwise charge to execute such trades.

3. Fees for SEI Alternative Funds

To the extent an SEI Alternative Fund pays SIMC a fee, such fees are disclosed in the private placement memorandum. Otherwise, SIMC will negotiate account level fees on a Client-by-Client basis.

4. SEI Fixed Income Portfolio Management

The Client's investment advisory fees for SEI Fixed Income Portfolio Management ("SFIPM") services may be up to .65% of the assets managed by SFIPM, and will be calculated and charged as set forth in each Client's respective investment management agreement. The Client's assets in SFIPM are directly managed by SIMC. SIMC may charge a lesser management fee based upon certain criteria (e.g. anticipated future earning capacity, anticipated future additional assets, dollar amount of assets to be managed, related accounts, type of services required, account composition, negotiations with the Client, etc). SIMC may invest Client assets in affiliated money market funds (where SIMC serves as investment advisor) and this investment may cause the Client to indirectly pay an additional fee to SIMC and/or its affiliates which would be offset/credited against the account level investment management fee charged to a Client in an amount equal to any advisory fees received by SIMC or its affiliates from an affiliated money market fund attributable to that Client's investment in such product. The fee structure is determined on a Client-by-Client basis and may be negotiable.

5. Oversight Services

SIMC may charge Clients a fee for Oversight Services, as described in [Item 4](#) of this Brochure. The Client will be charged a fee which will vary from Client to Client, based on the size and complexity of the Client's portfolio. The Client may be invoiced for this fee or have the fee deducted from their custody account if such custody account is maintained with SEI Private Trust Company.

Item 6 - Performance Based Fees and Side-By-Side Management

In some cases, SIMC has entered into performance fee arrangements with qualified Clients. Unless otherwise noted below, SIMC negotiates its performance fees arrangements on a Client-by-Client basis. SIMC will structure any performance or incentive fee arrangement subject to Section 205(a) (1) of the Advisers Act in accordance with the available exemptions thereunder, including the exemption set forth in Rule 205-3. SIMC's fee structure generally consists of a base fee and a performance fee. The base fee is negotiable on a Client-by-Client basis, and is paid regardless of the account's performance. The performance fee is calculated by comparing the performance of the specific Client's portfolio to a benchmark index. The benchmark index is a blend of standard industry benchmarks (e.g., S&P 500 Index) customized to match the specific Client's portfolio allocation. SIMC is entitled to a performance fee if the actual return for the specific Client's portfolio exceeds the benchmark index. Typically the performance fee is a percentage of the excess return. The percentage is negotiated on a Client-by-Client basis, and may range from 5% to 60%. For purposes of calculating the fees, the performance measurement period can range from one to three years. In measuring Clients' assets for the calculation of performance-based fees, SIMC includes realized and unrealized capital gains and losses. Currently, both the base fee and performance fee are paid quarterly in arrears. SIMC will either invoice the Client or deduct the fees from the Client's accounts if such custody account is maintained with SPTC.

For certain SEI Alternative Funds, SIMC or its affiliate is entitled to a payment in respect of a portion of the profits generated by the fund (i.e., a "carried interest") which is not negotiated on a Client-by-Client basis. The carried interest payments are payable in either one of two ways (i) once investors have received a certain level of distributions or (ii) the investor's investment has surpassed certain fixed appreciation thresholds.

Performance based fee arrangements may create an incentive for SIMC to recommend investments which may be riskier or more speculative than those which would be recommended under a different fee arrangement. Performance based fee arrangements also could create an incentive for SIMC to favor higher fee paying accounts over other accounts in the allocation of investment opportunities. As a result, SIMC may have a financial incentive to invest Client assets through the SEI Alternative Funds. SIMC has a robust Client review process designed and implemented to review the suitability of investments for Client accounts, to ensure that all Clients are treated fairly, and to prevent this conflict from influencing the allocation of investment opportunities among Clients.

Item 7 - Types of Clients

Please refer to [Item 4](#) for a description of the Clients to whom SIMC generally provides its services.

Accounts serviced by the Institutional Group are typically greater than \$25 million; however, there is no required minimum account size. SIMC reserves the right to accept accounts less than \$25 million in its sole discretion.

Item 8 - Methods of Analysis, Investment Strategies and Risk of Loss

SIMC's Overall Investment Philosophy

SIMC's philosophy is based on five key components: asset allocation, portfolio design, sub-advisor selection, portfolio construction and risk management. SIMC's philosophy and process offers Clients personalization, diversification, coordination and management and represents a strategy geared toward achieving long-term investment goals in various financial climates.

Asset Allocation. SIMC's approach to asset allocation takes clients' goals into account, along with more traditional yardsticks like market indices and standard deviation. We believe that acknowledging and accounting for common behavioral biases while simultaneously harnessing the power of efficient portfolio construction can help investors maximize the chances of achieving their financial objectives. We also believe that constructing portfolios according to investors' major financial goals (such as retirement, education or lifestyle) and aligned with the risk tolerance associated with each of those objectives provides a greater understanding of how the goals and investments align. This should allow for a higher level of comfort with the overall investment strategy—thereby increasing the odds that investors will remain invested in the financial markets and focused on achieving their goals rather than making portfolio changes as a reaction to short-term market volatility. We believe that maintaining consistent exposure to the markets over time is the surest way to earn attractive returns, and that doing so with a goals-based approach should help investors achieve their financial goals. In constructing portfolios that correspond with a particular objective, we seek to deliver the maximum expected return available given the goal's risk tolerance. SIMC constructs multiple model portfolios to address a wide variety of client goals and dedicate considerable resources to active asset allocation decisions that help our investment offerings keep pace with an evolving market environment.

Portfolio Design. In terms of portfolio design, SIMC generally attempts to identify alpha source(s), or opportunities for returns in excess of the benchmark, across equity, fixed-income and alternative-investment portfolios. SIMC looks for potential sources of excess return that have demonstrated staying power over the long term across multiple markets in a given geographic region. Alpha sources are classified into broad categories; categorizing them in this manner allows us to create portfolios that are not simply diversified between asset classes (e.g., equity and fixed-income strategies), but also diversified across the underlying drivers of alpha.

Sub-advisor Selection. When it comes to security selection within client portfolios, SIMC operates primarily with multi-manager implementation, which means that SIMC typically hires sub-advisors (third-party and affiliated) to select individual securities. As a multi-manager, SIMC aims to identify, classify and validate manager skill when choosing sub-advisors. Differentiating manager skill from market-generated returns is one of SIMC's primary objectives, as it seeks to identify sub-advisors that it believes can deliver superior results over time. SIMC develops forward-looking expectations regarding how a manager will execute a given investment mandate, environments in which the strategy should outperform and environments in which the strategy might underperform.

SIMC selects sub-advisors based on SIMC's manager research process. SIMC uses proprietary databases and software, supplemented by data from various third parties, to perform a qualitative and quantitative analysis of sub-advisors. The qualitative analysis focuses on a manager's investment philosophy, process, personnel, portfolio construction and performance. Quantitative analysis identifies the sources of a manager's return relative to a benchmark. SIMC uses proprietary performance attribution models as well as models developed by Axioma, BlackRock and others in its manager research process. SIMC typically appoints several sub-advisors within a stated asset class. (For instance, SIMC will generally have more than one sub-advisor assigned to the large cap growth asset class.) This same manager research process is also the basis for the manager research services provided by SIMC.

Portfolio Construction. The portfolio construction process seeks to maximize the risk-adjusted rate of return by finding a proper level of diversification between alpha sources and the sub-advisors

implementing them. Based on SIMC's asset-class-specific analysis, as well as client's typical risk tolerances, SIMC sets strategic alpha source allocation targets at the investment product level. With certain exceptions, SIMC uses a multi-manager approach to construct its portfolios.

Risk Management. SIMC relies on a risk management group to focus on common risks across and within asset classes. Daily monitoring of assigned portfolio tolerances and deviations result in an active risk mitigation program. We employ a multi-asset risk-management system to provide a consistent view of risk across asset classes—while preserving a distinct separation between risk oversight and portfolio management in order to preserve objectivity. The Risk Management team is responsible for determining whether the risks of SEI's investment strategies are consistent with their mandates. It reports directly to the head of the Investment Management Unit (IMU), which helps maintain impartiality and allows for direct access and support from senior management.

Governance. In an effort to remain unbiased, our governance structure is independent of portfolio management. It includes various oversight committees, which are each chaired by the head of Risk Management.

Implementation Through Investment Products

The foregoing discusses SIMC's investment philosophy in designing diversified investment portfolios for SIMC's clients. In most cases, implementation of a client's investment portfolio is accomplished through investing in a range of investment products, which may include mutual funds, hedge funds, ETFs, closed-end funds, private equity funds, collective investment trusts, or individual securities.

In order to provide clients with sufficient diversification and flexibility, SIMC manages products across a very wide range of investment strategies. These would include, to varying degrees, large and small capitalization U.S. equities, foreign developed markets equities, foreign emerging markets equity, real estate securities, U.S. investment grade fixed income securities, U.S. high yield (below investment grade) fixed income securities, foreign developed market fixed income securities, emerging markets debt, U.S. and foreign government securities, currencies, structured or asset-backed fixed income securities (including mortgage-backed), municipal bonds and other types of asset classes. SIMC also manages Collateralized Debt Obligations ("CDOs") investments and Collateralized Loan Obligations ("CLO") investments within certain investment products. CDOs and CLOs are securities backed by an underlying portfolio of debt and loan obligations, respectively. SIMC may also seek to achieve a product's investment objectives by investing in derivative instruments, such as futures, forwards, options, swaps or other types of derivative instruments. Additionally, SIMC may also seek to achieve an investment product's objective by investing some or all of its assets in affiliated and unaffiliated mutual funds, including money market funds. Within a mutual fund product, SIMC may also seek to gain exposure to the commodity markets, in whole or in part, through investments in a wholly owned subsidiary of the mutual fund organized under the laws of the Cayman Islands. Certain of SIMC's product strategies may also attempt to utilize tax-management techniques to manage the impact of taxes.

Further, SIMC may invest SEI Alternative Funds in third-party hedge funds or private equity funds that engage in a wide variety of investment techniques and strategies that carry varying degrees of risks. This may include long-short equity strategies, equity market neutral, merger arbitrage, credit hedging, distressed debt, sovereign debt, real estate, private equity investments, derivatives, currencies or other types of investments.

While SIMC's investment strategies are normally implemented through pooled investment products, certain clients' assets are invested directly in the target investments through a managed account or other means. The strategies that SIMC implements in such accounts is currently more limited than the breadth of strategies contained in SIMC's funds, and generally covers U.S. large and small capitalization equity securities, international and emerging market ADRs, REITs, and U.S. fixed income securities, including government securities and municipal bonds. SIMC may also implement strategies involving derivative securities directly within a client's accounts.

Investment Product Strategies

Since SIMC implements such a broad range of strategies within its investment products, it would not be practical to set forth in detail each strategy that SIMC has developed for use across its products. The disclosure in this Brochure is not intended to supplant any product-specific disclosure documents. Clients should refer to the prospectus or other offering materials that it receives in conjunction with investing in a SIMC investment product for a detailed discussion of the strategy and risks associated with such product. Moreover, this Form ADV disclosure addresses strategies designed and implemented by SIMC and does not address strategies that are implemented by third parties (e.g., unaffiliated investment advisors, banks, institutions or other intermediaries) through the use of SIMC products.

A strategy's exposure to the foregoing asset classes, including the degree of exposure, is subject to change at any time due to evolving investment philosophies and market conditions. The risks associated with such strategies are also therefore subject to change at any time.

Material Risks

All strategies implemented by SIMC involve a risk of loss that Clients should understand, accept and be prepared to bear.

Given the very wide range of investments in which a Client's assets may be invested, either directly by investing in individual securities and/or through one or more pooled investment vehicles or funds, there is similarly a very wide range of risks to which a Client's assets may be exposed. This Brochure does not include every potential risk associated with an investment strategy, or all of the risks applicable to a particular advisory account. Rather, it is a general description of the nature and risks of the strategies and securities and other financial instruments in which advisory accounts may invest. The particular risks to which a specific Client might be exposed will depend on the specific investment strategies incorporated into that Client's portfolio. As such, for a detailed description of the material risks of investing in a particular product, the Client should, on or prior to investing, also refer to such product's prospectus or other offering materials.

Set forth below are certain material risks to which a Client might be exposed in connection with SIMC's implementation of a strategy for Client accounts:

Absolute Return - A portfolio that seeks to achieve an absolute return with reduced correlation to stock and bond markets may not achieve positive returns over short or long term periods. Investment strategies that have historically been non-correlated or have demonstrated low correlations to one another or to stock and bond markets may become correlated at certain times and, as a result, may cease to function as anticipated over either short or long term periods.

Asset Allocation Risk - The risk that an investment advisor's decisions regarding a portfolio's allocation to asset classes or underlying funds will not anticipate market trends successfully.

Asset-Backed Securities Risk - Payment of principal and interest on asset-backed securities is dependent largely on the cash flows generated by the assets backing the securities. Securitization trusts generally do not have any assets or sources of funds other than the receivables and related property they own, and asset-backed securities are generally not insured or guaranteed by the related sponsor or any other entity. Asset-backed securities may be more illiquid than more conventional types of fixed-income securities that the portfolio may acquire.

Below Investment Grade Securities (Junk Bonds) Risk - Fixed income securities rated below investment grade (junk bonds) involve greater risks of default or downgrade and are generally more volatile than investment grade securities because the prospect for repayment of principal and interest of many of these securities is speculative. Because these securities typically offer a higher rate of return to compensate investors for these risks, they are sometimes referred to as "high yield bonds," but there is

no guarantee that an investment in these securities will result in a high rate of return. These risks may be increased in foreign and emerging markets.

Call Risk – Issuers of callable bonds may call (redeem) securities with higher coupons or interest rates before their maturity dates. A portfolio may be forced to reinvest the unanticipated proceeds at lower interest rates, resulting in a decline in the portfolio's income. Bonds may be called due to falling interest rates or non-economic circumstances.

Collateralized Debt Obligations (CDOs) and Collateralized Loan Obligations (CLOs) Risk - CDOs and CLOs are securities backed by an underlying portfolio of debt and loan obligations, respectively. CDOs and CLOs issue classes or "tranches" that vary in risk and yield and may experience substantial losses due to actual defaults, decrease in market value due to collateral defaults and removal of subordinate tranches, market anticipation of defaults and investor aversion to CDO and CLO securities as a class. The risks of investing in CDOs and CLOs depend largely on the tranche invested in and the type of the underlying debts and loans in the tranche of the CDO or CLO, respectively, in which the portfolio invests. CDOs and CLOs also carry risks including, but not limited to, interest rate risk and credit risk, which are described below. For example, a liquidity crisis in the global credit markets could cause substantial fluctuations in prices for leveraged loans and high-yield debt securities and limited liquidity for such instruments. When a portfolio invests in CDOs or CLOs, in addition to directly bearing the expenses associated with its own operations, it may bear a pro rata portion of the CDO's or CLO's expenses. The impact of expenses is especially relevant when a portfolio invests in the lowest tranche (the "equity tranche") of a CDO or CLO. At the equity tranche level, expenses of a CDO or CLO may reduce distributions available to the portfolio before impacting distributions available to investors above the equity tranche and thereby disproportionately impact the portfolio's investment in such CDO or CLO.

Convertible and Preferred Securities Risk - Convertible securities are bonds, debentures, notes, preferred stock or other securities that may be converted into or exercised for a prescribed amount of common stock at a specified time and price. The value of a convertible security is influenced by changes in interest rates, with investment value typically declining as interest rates increase and increasing as interest rates decline, and the credit standing of the issuer. The price of a convertible security will also normally vary in some proportion to changes in the price of the underlying common stock because of the conversion or exercise feature. Convertible securities may also be rated below investment grade (junk bonds) or may not be rated and are subject to credit risk and prepayment risk. Preferred stocks are nonvoting equity securities that pay a stated fixed or variable rate dividend. Due to their fixed income features, preferred stocks provide higher income potential than issuers' common stocks, but are typically more sensitive to interest rate changes than an underlying common stock. Preferred stocks are also subject to equity market risk. The rights of preferred stocks on the distribution of a corporation's assets in the event of a liquidation are generally subordinate to the rights associated with a corporation's debt securities. Preferred stock may also be subject to prepayment risk.

Corporate Fixed Income Securities Risk - Corporate fixed income securities respond to economic developments, especially changes in interest rates, as well as to perceptions of the creditworthiness and business prospects of individual issuers.

Credit Risk - The risk that the issuer of a security, or the counterparty to a contract, will default or otherwise become unable to honor a financial obligation.

Currency Risk - As a result of investments in securities or other investments denominated in, and/or receiving revenues in, foreign currencies a portfolio will be subject to currency risk. Currency risk is the risk that foreign currencies will decline in value relative to the U.S. dollar, or, in the case of hedging positions, that the U.S. dollar will decline in value relative to the currency hedged. In either event, the dollar value of an investment in the portfolio would be adversely affected. To the extent that a portfolio takes active or passive positions in securities denominated in foreign currencies it will be subject to the risk that currency exchange rates may fluctuate in response to, among other things, changes in interest rates, intervention (or failure to intervene) by U.S. or foreign governments, central banks or

supranational entities, or by the imposition of currency controls or other political developments in the United States or abroad

Depository Receipts Risk - Depository receipts, such as American Depositary Receipts (ADRs), are certificates evidencing ownership of shares of a foreign issuer that are issued by depository banks and generally trade on an established market. Depository receipts are subject to many of the risks associated with investing directly in foreign securities, including among other things, political, social and economic developments abroad, currency movements, and different legal, regulatory, tax, accounting and audit environments.

Derivatives Risk - A portfolio's use of futures contracts, forward contracts, options and swaps is subject to market risk, leverage risk, correlation risk and liquidity risk. Leverage risk, liquidity risk and market risk are described below. Many over-the-counter (OTC) derivatives instruments will not have liquidity beyond the counterparty to the instrument. Correlation risk is the risk that changes in the value of the derivative may not correlate perfectly with the underlying asset, rate or index. A portfolio's use of forward contracts and swap agreements is also subject to credit risk and valuation risk. Valuation risk is the risk that the derivative may be difficult to value and/or valued incorrectly. Credit risk is described above. Each of these risks could cause a portfolio to lose more than the principal amount invested in a derivative instrument. Some derivatives have the potential for unlimited loss, regardless of the size of the portfolio's initial investment. The other parties to certain derivative contracts present the same types of credit risk as issuers of fixed income securities. The portfolio's use of derivatives may also increase the amount of taxes payable by investors. Both U.S. and non-U.S. regulators have adopted and implemented regulations governing derivatives markets, the ultimate impact of which remains unclear.

Duration Risk - Longer-term securities in which a portfolio may invest tend to be more volatile than shorter term securities. A portfolio with a longer average portfolio duration is more sensitive to changes in interest rates than a portfolio with a shorter average portfolio duration.

Economic Risk of Global Events, Including Health Related Events – The market value of a portfolio's investments may decline in tandem with a drop in the overall value of the markets in which the portfolio invests and/or other markets based on negative developments in the U.S. and global economies. Economic, political, and financial conditions or industry or economic trends or developments may, from time to time, and for varying periods of time, cause volatility, illiquidity or other potentially adverse effects in the financial markets, including the equity and fixed-income markets. The commencement, continuation or ending of government policies and economic stimulus programs, changes in money policy, increases or decreases in interest rates, war, acts of terrorism, recessions, or other actual or perceived factors or events that affect the financial markets, including the equity and fixed-income markets, may contribute to the development of or increase in volatility, illiquidity and other adverse effects that could negatively impact a portfolio's performance. Similarly, the impact of any epidemic, pandemic or natural disaster, or widespread fear that such events may occur, could negatively affect the global economy, as well as the economies of individual countries, the financial performance of individual companies and sectors, and the markets in general in significant and unforeseen ways. Any such impact could adversely affect the prices and liquidity of the securities and other instruments in which a portfolio invests, which in turn could negatively impact the portfolio's performance and cause losses on your investment in the portfolio. Recent examples include pandemic risks related to a coronavirus (COVID-19) and aggressive measures taken worldwide in response by governments, including closing borders, restricting international and domestic travel, and the imposition of prolonged quarantines of large populations, and by businesses, including changes to operations and reducing staff. The ongoing effects of COVID-19 are unpredictable and may result in significant and prolonged effects on a portfolio's performance.

Equity Market Risk - The risk that the market value of a security may move up and down, sometimes rapidly and unpredictably. Equity market risk may affect a single issuer, an industry, a sector or the equity or bond market as a whole.

Environment, Social and Governance Investment Criteria Risk - If a portfolio is subject to certain environmental, social and governance (ESG) investment criteria it may avoid purchasing certain securities for ESG reasons when it is otherwise economically advantageous to purchase those securities, or may sell certain securities for ESG reasons when it is otherwise economically advantageous to hold those securities. In general, the application of portfolio's ESG investment criteria may affect the portfolio's exposure to certain issuers, industries, sectors and geographic areas, which may affect the financial performance of the portfolio, positively or negatively, depending on whether these issuers, industries, sectors or geographic areas are in or out of favor. An adviser or vendor can vary materially from other ESG advisers and vendors with respect to its methodology for constructing ESG portfolios or screens, including with respect to the factors and data that it collects and evaluates as part of its process. As a result, an adviser's or vendor's ESG portfolio or screen may materially differ from or contradict the conclusions reached by other ESG advisers or vendors with respect to the same issuers. Further, ESG criteria is dependent on data and is subject to the risk that such data reported by issuers or received from third party sources may be subjective, or may be objective in principal but not verified or reliable.

Exchange-Traded Funds (ETFs) Risk (including leveraged ETFs) - The risks of owning shares of an ETF generally reflect the risks of owning the underlying securities or other instruments the ETF is designed to track, although lack of liquidity in an ETF could result in its value being more volatile than the underlying portfolio securities. Leveraged ETFs contain all of the risks that non-leveraged ETFs present. Additionally, to the extent the portfolio invests in ETFs that achieve leveraged exposure to their underlying indexes through the use of derivative instruments, the portfolio will indirectly be subject to leverage risk, described below. Leveraged Inverse ETFs seek to provide investment results that match a negative multiple of the performance of an underlying index. To the extent that the portfolio invests in Leveraged Inverse ETFs, the portfolio will indirectly be subject to the risk that the performance of such ETF will fall as the performance of that ETF's benchmark rises. Leveraged and Leveraged Inverse ETFs often "reset" daily, meaning that they are designed to achieve their stated objectives on a daily basis. Due to the effect of compounding, their performance over longer periods of time can differ significantly from the performance (or inverse of the performance) of their underlying index or benchmark during the same period of time. These investment vehicles may be extremely volatile and can potentially expose a portfolio to significant losses. When a portfolio invests in an ETF, in addition to directly bearing the expenses associated with its own operations, it will bear a pro rata portion of the ETF's expenses. See also, "Exchange-Traded Products Risk", below.

Exchange-Traded Products (ETPs) Risk —The risks of owning interests of an ETP, such as an ETF, ETN or exchange-traded commodity pool, generally reflect the same risks as owning the underlying securities or other instruments that the ETP is designed to track. The shares of certain ETPs may trade at a premium or discount to their intrinsic value (i.e. the market value may differ from the net asset value of an ETP's shares). For example, supply and demand for shares of an ETF or market disruptions may cause the market price of the ETF to deviate from the value of the ETF's investments, which may be emphasized in less liquid markets. The value of an ETN may also differ from the valuation of its reference market or instrument due to changes in the issuer's credit rating. By investing in an ETP, in addition to directly bearing the expenses associated with its own operations, the portfolio indirectly bears the proportionate share of any fees and expenses of the ETP. Because certain ETPs may have a significant portion of their assets exposed directly or indirectly to commodities or commodity-linked securities, developments affecting commodities may have a disproportionate impact on such ETPs and may subject the ETPs to greater volatility than investments in traditional securities.

Extension Risk - The risk that rising interest rates may extend the duration of a fixed income security, typically reducing the security's value.

Fixed Income Market Risk—The prices of fixed income securities respond to economic developments, particularly interest rate changes, as well as to perceptions about the creditworthiness of individual issuers, including governments and their agencies. Generally, fixed income securities will decrease in value if interest rates rise and vice versa. In a low interest rate environment, risks associated with rising rates are heightened. Declines in dealer market-making capacity as a result of structural or regulatory

changes could decrease liquidity and/or increase volatility in the fixed income markets. Markets for fixed income securities may decline significantly in response to adverse issuer, political, regulatory, market, economic or other developments that may cause broad changes in market value, public perceptions concerning these developments, and adverse investor sentiment or publicity. Similarly, environmental and public health risks, such as natural disasters, epidemics, pandemics or widespread fear that such events may occur, may impact markets adversely and cause market volatility in both the short- and long-term. In response to these events, a portfolio's value may fluctuate.

Foreign Investment/Emerging Markets Risk - The risk that non-U.S. securities may be subject to additional risks due to, among other things, political, social and economic developments abroad, currency movements and different legal, regulatory, tax, accounting and audit environments. These additional risks may be heightened with respect to emerging market countries because political turmoil and rapid changes in economic conditions are more likely to occur in these countries. Investments in emerging markets are subject to the added risk that information in emerging market investments may be unreliable or outdated due to differences in regulatory, accounting or auditing and financial record keeping standards, or because less information about emerging market investments is publicly available. In addition, the rights and remedies associated with emerging market investments may be different than investments in developed markets. A lack of reliable information, rights and remedies increase the risks of investing in emerging markets in comparison to more developed markets. In addition, periodic U.S. Government restrictions on investments in issuers from certain foreign countries may require the portfolio to sell such investments at inopportune times, which could result in losses to the portfolio.

Foreign Sovereign Debt Securities Risk — The risks that: (i) the governmental entity that controls the repayment of sovereign debt may not be willing or able to repay the principal and/or interest when it becomes due because of factors such as debt service burden, political constraints, cash flow problems and other national economic factors; (ii) governments may default on their debt securities, which may require holders of such securities to participate in debt rescheduling or additional lending to defaulting governments; and (iii) there is no bankruptcy proceeding by which defaulted sovereign debt may be collected in whole or in part.

Income Risk - The possibility that a portfolio's yield will decline due to falling interest rates.

Inflation Protected Securities Risk - The value of inflation protected securities, including TIPS, generally will fluctuate in response to changes in "real" interest rates, generally decreasing when real interest rates rise and increasing when real interest rates fall. Real interest rates represent nominal (or stated) interest rates reduced by the expected impact of inflation. In addition, interest payments on inflation-indexed securities will generally vary up or down along with the rate of inflation.

Interest Rate Risk - The risk that a change in interest rates will cause a fall in the value of fixed income securities, including U.S. Government securities in which the portfolio invests. Generally, the value of a portfolio's fixed income securities will vary inversely with the direction of prevailing interest rates. Changing interest rates may have unpredictable effects on the markets and may affect the value and liquidity of instruments held by a portfolio. Although U.S. Government securities are considered to be among the safest investments, they are not guaranteed against price movements due to changing interest rates. A low interest rate environment may present greater interest rate risk, because there may be a greater likelihood of rates increasing and rates may increase more rapidly.

Investment Company Risk - When a portfolio invests in an investment company, in addition to directly bearing the expenses associated with its own operations, it will bear a pro rata portion of the investment company's expenses. In addition, while the risks of owning shares of an investment company generally reflect the risks of owning the underlying investments of the investment company, a portfolio may be subject to additional or different risks than if the portfolio had invested directly in the underlying investments. For example, the lack of liquidity in an ETF could result in its value being more volatile than the underlying portfolio securities. Closed-end investment companies issue a fixed number of shares that trade on a stock exchange or over-the-counter at a premium or a discount to their net asset value.

As a result, a closed-end fund's share price fluctuates based on what another investor is willing to pay rather than on the market value of the securities in the fund. See also, "Exchange Traded Products (ETPs) Risk," above.

Investment Style Risk - The risk that the portfolio's strategy may underperform other segments of the markets or the markets as a whole.

Large Capitalization Risk - The risk that larger, more established companies may be unable to respond quickly to new competitive challenges such as changes in technology and consumer tastes. Larger companies also may not be able to attain the high growth rates of successful smaller companies.

Leverage Risk - A portfolio's use of derivatives may result in the portfolio's total investment exposure substantially exceeding the value of its securities and the portfolio's investment returns depending substantially on the performance of securities that the portfolio may not directly own. The use of leverage can amplify the effects of market volatility on the portfolio's value and may also cause the portfolio to liquidate portfolio positions when it would not be advantageous to do so in order to satisfy its obligations. The portfolio's use of leverage may result in a heightened risk of investment loss.

LIBOR Replacement Risk - The U.K. Financial Conduct Authority stopped compelling or inducing banks to submit certain London Inter-Bank Offered Rate (LIBOR) rates and will do so for the remaining LIBOR rates immediately after June 30, 2023. The elimination of LIBOR may adversely affect the interest rates on, and value of, certain portfolio investments.

Liquidity Risk - The risk that certain securities may be difficult or impossible to sell at the time and the price that the portfolio would like. The portfolio may have to lower the price of the security, sell other securities instead or forego an investment opportunity, any of which could have a negative effect on portfolio management or performance.

Master Limited Partnership (MLP) Risk - Investments in units of master limited partnerships involve risks that differ from an investment in common stock. Holders of the units of master limited partnerships have more limited control and limited rights to vote on matters affecting the partnership. There are also certain tax risks associated with an investment in units of master limited partnerships. In addition, conflicts of interest may exist between common unit holders, subordinated unit holders and the general partner of a master limited partnership, including a conflict arising as a result of incentive distribution payments. The benefit the portfolio derives from investment in MLP units is largely dependent on the MLPs being treated as partnerships and not as corporations for federal income tax purposes. If an MLP were classified as a corporation for federal income tax purposes, there would be reduction in the after-tax return to the portfolio of distributions from the MLP, likely causing a reduction in the value of the portfolio. MLP entities are typically focused in the energy, natural resources and real estate sectors of the economy. A downturn in the energy, natural resources or real estate sectors of the economy could have an adverse impact on the portfolio. At times, the performance of securities of companies in the energy, natural resources and real estate sectors of the economy may lag the performance of other sectors or the broader market as a whole.

Money Market Funds - With respect to an investment in money market funds, an investment in the money market fund is not a bank deposit nor is it insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Although a money market fund may seek to maintain a constant price per share of \$1.00, you may lose money by investing in the money market fund. The Fund may experience periods of heavy redemptions that could cause the Fund to liquidate its assets at inopportune times or at a loss or depressed value, particularly during periods of declining or illiquid markets. This could have a significant adverse effect on the Fund's ability to maintain a stable \$1.00 share price, and, in extreme circumstances, could cause the Fund to suspend redemptions and liquidate completely.

Mortgage-Backed Securities Risk - Mortgage-backed securities are affected significantly by the rate of prepayments and modifications of the mortgage loans backing those securities, as well as by other factors such as borrower defaults, delinquencies, realized or liquidation losses and other shortfalls. Mortgage-backed securities are particularly sensitive to prepayment risk, which is described below, given that the term to maturity for mortgage loans is generally substantially longer than the expected lives of those securities; however, the timing and amount of prepayments cannot be accurately predicted. The timing of changes in the rate of prepayments of the mortgage loans may significantly affect the portfolio's actual yield to maturity on any mortgage-backed securities, even if the average rate of principal payments is consistent with the portfolio's expectation. Along with prepayment risk, mortgage-backed securities are significantly affected by interest rate risk, which is described above. In a low interest rate environment, mortgage loan prepayments would generally be expected to increase due to factors such as refinancing and loan modifications at lower interest rates. In contrast, if prevailing interest rates rise, prepayments of mortgage loans would generally be expected to decline and therefore extend the weighted average lives of mortgage-backed securities held or acquired by the portfolio.

Municipal Securities Risk - Municipal securities, like other fixed income securities, rise and fall in value in response to economic and market factors, primarily changes in interest rates, and actual or perceived credit quality. Rising interest rates will generally cause municipal securities to decline in value. Longer-term securities usually respond more sharply to interest rate changes than do shorter-term securities. A municipal security will also lose value if, due to rating downgrades or other factors, there are concerns about the issuer's current or future ability to make principal or interest payments. State and local governments rely on taxes and, to some extent, revenues from private projects financed by municipal securities, to pay interest and principal on municipal debt. Poor statewide or local economic results or changing political sentiments may reduce tax revenues and increase the expenses of municipal issuers, making it more difficult for them to repay principal and to make interest payments on securities owned by a portfolio. Actual or perceived erosion of the creditworthiness of municipal issuers may reduce the value of a portfolio's holdings. As a result, a portfolio will be more susceptible to factors that adversely affect issuers of municipal obligations than a portfolio that does not have as great a concentration in municipal obligations. Municipal obligations may be underwritten or guaranteed by a relatively small number of financial services firms, so changes in the municipal securities market that affect those firms may decrease the availability of municipal instruments in the market, thereby making it difficult to identify and obtain appropriate investments for the portfolio. Also, there may be economic or political changes that impact the ability of issuers of municipal securities to repay principal and to make interest payments on securities owned by the portfolio. Any changes in the financial condition of municipal issuers also may adversely affect the value of the portfolio's securities.

Non-Diversified Risk - To the extent that a portfolio is non-diversified, which means that it may invest in the securities of relatively few issuers. The portfolio may be more susceptible to a single adverse economic or political occurrence affecting one or more of these issuers, and may experience increased volatility due to its investments in those securities.

Opportunity Risk - The risk of missing out on an investment opportunity because the assets necessary to take advantage of it are tied up in other investments.

Options – An option is a contract between two parties for the purchase and sale of a financial instrument for a specified price at any time during the option period. Unlike a futures contract, an option grants the purchaser, in exchange for a premium payment, a right (not an obligation) to buy or sell a financial instrument. An option on a futures contract gives the purchaser the right, in exchange for a premium, to assume a position in a futures contract at a specified exercise price during the term of the option. The seller of an uncovered call (buy) option assumes the risk of a theoretically unlimited increase in the market price of the underlying security above the exercise price of the option. The securities necessary to satisfy the exercise of the call option may be unavailable for purchase except at much higher prices. Purchasing securities to satisfy the exercise of the call option can itself cause the price of the securities to rise further, sometimes by a significant amount, thereby exacerbating the loss. The buyer of a call option assumes the risk of paying an entire premium in the call option without ever getting the

opportunity to execute the option. The seller (writer) of a covered put (sell) option (e.g., the writer has a short position in the underlying security) will suffer a loss if the increase in the market price of the underlying security is greater than the premium received from the buyer of the option. The seller of an uncovered put option assumes the risk of a decline in the market price of the underlying security below the exercise price of the option. The buyer of a put option assumes the risk of paying an entire premium in the put option without ever getting the opportunity to exercise the option. An option's time value (i.e., the component of the option's value that exceeds the in-the-money amount) tends to diminish over time. Even though an option may be in-the-money to the buyer at various times prior to its expiration date, the buyer's ability to realize the value of an option depends on when and how the option may be exercised. For example, the terms of a transaction may provide for the option to be exercised automatically if it is in-the-money on the expiration date. Conversely, the terms may require timely delivery of a notice of exercise, and exercise may be subject to other conditions (such as the occurrence or non-occurrence of certain events, such as knock-in, knock-out or other barrier events) and timing requirements, including the "style" of the option.

Overlay Risk - To the extent that a client's portfolio is implemented through an overlay manager, it is subject to the risk that its performance may deviate from the performance of a sub-advisor's model or the performance of other proprietary or client accounts over which the sub-advisor retains trading authority ("Other Accounts"). The overlay manager's variation from the sub-advisor's model portfolio may contribute to performance deviations, including under performance. The overlay manager will vary from a model portfolio to, among other reasons, implement tax management strategies, as applicable, and security restrictions. The overlay manager is restricted from purchasing certain securities due to the issuer's affiliation with SEI or the overlay manager, or due to the overlay manager's compliance with laws, regulations, and policies that apply to the business activities of its affiliates. In addition, a sub-advisor may implement its model portfolio for its Other Accounts prior to submitting its model to the overlay manager. In these circumstances, trades placed by the overlay manager pursuant to a model portfolio may be subject to price movements that result in the client's portfolio receiving prices that are different from the prices obtained by the sub-advisor for its Other Accounts, including less favorable prices. The risk of such price deviations may increase for large orders or where securities are thinly traded.

Portfolio Turnover Risk - To the extent that a portfolio buys and sells securities frequently, such activity may result in higher transaction costs and taxes subject to ordinary income tax rates as opposed to more favorable capital gains rates, which may affect the portfolio's performance. To the extent that a portfolio invests in an underlying fund the portfolio will have no control over the turnover of the underlying fund.

Prepayment Risk - The risk that, in a declining interest rate environment, fixed income securities with stated interest rates may have the principal paid earlier than expected, requiring a portfolio to invest the proceeds at generally lower interest rates.

Private Placements Risk - Investment in privately placed securities, including interests in private equity and hedge funds, may be less liquid than in publicly traded securities. Although these securities may be resold in privately negotiated transactions, the prices realized from these sales could be less than those originally paid by the portfolio, the carrying value of such securities or less than what may be considered the fair value of such securities. Furthermore, companies whose securities are not publicly traded may not be subject to the disclosure and other investor protection requirements that might be applicable if their securities were publicly traded.

Quantitative Investing - A quantitative investment style generally involves the use of computers to implement a systematic or rules-based approach to selecting investments based on specific measurable factors. Due to the significant role technology plays in such strategies, they carry the risk of unintended or unrecognized issues or flaws in the design, coding, implementation or maintenance of the computer programs or technology used in the development and implementation of the quantitative strategy. These issues or flaws, which can be difficult to identify, may result in the implementation of a portfolio that is

different from that which was intended, and could negatively impact investment returns. Such risks should be viewed as an inherent element of investing in an investment strategy that relies heavily upon quantitative models and computerization. Utility interruptions or other key systems outages also can impair the performance of quantitative investment strategies.

Reallocation Risk - SIMC constructs and maintains global asset allocation strategies for certain Clients, and the SEI funds are designed in part to implement those Strategies. Within the Strategies, SIMC periodically adjusts the target allocations among the mutual funds to ensure that the appropriate mix of assets is in place. SIMC also may create new Strategies that reflect significant changes in allocation among the mutual funds. Because a significant portion of the assets in the mutual funds may be attributable to investors in Strategies controlled or influenced by SIMC, this reallocation activity could result in significant purchase or redemption activity in the mutual funds. Although reallocations are intended to benefit investors that invest in the mutual funds through the Strategies, they could, in certain cases, have a detrimental effect on the mutual funds. Such detrimental effects could include: transaction costs, capital gains and other expenses resulting from an increase in portfolio turnover; and disruptions to the portfolio management strategy, such as foregone investment opportunities or the inopportune sale of securities to facilitate redemptions.

Real Estate Industry Risk - Securities of companies principally engaged in the real estate industry may be subject to the risks associated with direct ownership of real estate. Risks commonly associated with the direct ownership of real estate include fluctuations in the value of underlying properties, defaults by borrowers or tenants, changes in interest rates and risks related to general or local economic conditions. If a portfolio's investments are concentrated in issuers conducting business in the real estate industry, the portfolio is subject to risks associated with legislative or regulatory changes, adverse market conditions and/or increased competition affecting that industry.

Real Estate Investment Trusts (REITs) - REITs are trusts that invest primarily in commercial real estate or real estate-related loans. Investments in REITs are subject to the risks associated with the direct ownership of real estate which is discussed above. Some REITs may have limited diversification and may be subject to risks inherent in financing a limited number of properties.

Sampling Risk - With respect to investments in index funds or a portfolio designed to track the performance of an index, a fund or portfolio may not fully replicate a benchmark index and may hold securities not included in the index. As a result, a fund or portfolio may not track the return of its benchmark index as well as it would have if the fund or portfolio purchased all of the securities in its benchmark index.

Small and Medium Capitalization Risk - Small and medium capitalization companies may be more vulnerable to adverse business or economic events than larger, more established companies. In particular, small and medium capitalization companies may have limited product lines, markets and financial resources, and may depend upon a relatively small management group. Therefore, small capitalization and medium capitalization stocks may be more volatile than those of larger companies. Small capitalization and medium capitalization stocks may be traded over the counter (OTC). OTC stocks may trade less frequently and in smaller volume than exchange-listed stocks and may have more price volatility than that of exchange-listed stocks.

Taxation Risk - SIMC does not represent in any manner that the tax consequences described as part of its tax-management techniques and strategies will be achieved or that any of SIMC's tax-management techniques, or any of its products and/or services, will result in any particular tax consequence. The tax consequences of the tax-management techniques, including those intended to harvest tax losses, and other strategies that SIMC may pursue are complex and uncertain and may be challenged by the IRS. A portfolio that is managed to minimize tax consequences to Clients will likely still earn taxable income and gains from time to time. In order to pay tax-exempt interest, tax-exempt securities must meet certain legal requirements. Failure to meet such requirements may cause the interest received and distributed by the portfolio to shareholders to be taxable. Changes or proposed changes in federal tax

laws may cause the prices of tax-exempt securities to fall. The federal income tax treatment on payments with respect to certain derivative contracts is unclear. Consequently, a portfolio may receive payments that are treated as ordinary income for federal income tax purposes. Neither SIMC nor its affiliates provide tax advice.

Tracking Error Risk - The risk that the performance of a portfolio designed to track an index may vary substantially from the performance of the benchmark index it tracks as a result of cash flows, portfolio expenses, imperfect correlation between the portfolio's investments and the components of the index and other factors.

Underlying Funds Risk - With respect to portfolios that invest in underlying funds, additional investment risk exists because the value of such investments is based primarily on the performance of the underlying funds. Specifically with respect to alternative funds, the entity's sponsors will make investment and management decisions. Therefore, an underlying fund's returns are dependent on the investment decisions made by its management and the portfolio will not participate in the management or control the investment decisions of the alternative fund. Further, the returns on a portfolio may be negatively impacted by liquidity restrictions imposed by the governing documents of an alternative fund such as "lock-up" periods, gates, redemption fees and management's ability to suspend redemptions (in certain cases). Such lock-up periods, gates or suspensions may restrict the portfolio's ability to exit from an alternative fund in accordance with the intended business plan and prevent the portfolio from liquidating its position upon favorable terms. All of these factors may limit the portfolio's return under certain circumstances.

U.S. Government Securities Risk - Although U.S. Government securities are considered to be among the safest investments, they are still subject to the credit risk of the U.S. Government and are not guaranteed against price movements due to changing interest rates. Obligations issued by some U.S. Government agencies are backed by the U.S. Treasury, while others are backed solely by the ability of the agency to borrow from the U.S. Treasury or by the agency's own resources. No assurance can be given that the U.S. Government will provide financial support to its agencies and instrumentalities if it is not obligated by law to do so.

Item 9 - Disciplinary Information

Registered investment advisors are required to disclose all material facts regarding any legal or disciplinary events that would be material to your evaluation of SIMC or the integrity of SIMC's management. SIMC has no information applicable to this Item.

Item 10 - Other Financial Industry Activities and Affiliations

SIMC, which is an indirect, wholly owned subsidiary of SEIC hires affiliates and third parties to perform services for SIMC and its clients. Some of these relationships could create conflicts of interest. These relationships are described below.

Hiring of Managers and Sub-Advisors

As a manager-of-managers, SIMC hires sub-advisors to provide day-to-day securities selection for its investment products. SIMC has hired an affiliated advisor, LSV Asset Management (“LSV”), to serve as sub-advisor to some of SIMC’s investment products. Specifically, SIMC’s parent company, SEIC, maintains a minority ownership interest (approximately 39% as of December 31, 2022) in LSV, which is a sub-advisor in the Funds and some separately managed accounts. To mitigate this conflict of interest, each sub-advisor, regardless of whether it provides or receives the affiliated services noted above, is subject to SIMC’s standard manager due diligence and selection process for the applicable program and/or strategy offering. Additionally, to the extent LSV is managing SEI Fund assets, it is subject to the same Board of Trustees approval process as non-affiliated sub-advisors and the affiliation is disclosed in the SEI Fund prospectuses.

SIMC also hires sub-advisors for its investment products who may also be investment advisors/sub-advisors to other investment products offered by SIMC’s affiliates and partners. Therefore, SIMC has an incentive to recommend a firm for sub-advisory services for its investment products because they are also providing services to SIMC’s affiliates and partners. To address this conflict, SIMC conducts the same due diligence on all sub-advisors regardless of whether they provide other services to SIMC’s affiliates and partners.

Additionally, some of the sub-advisors that SIMC selects for its Funds and Separately Managed Accounts may also be customers of SEIC for other services and products (e.g., technology solutions, middle and back office platform solutions, turn-key pooled product solutions) for which SIMC’s affiliates may be compensated, which could influence SIMC’s decisions when recommending or retaining sub-advisors. To mitigate these conflicts of interest, each sub-advisor, regardless of whether it provides or receives the affiliated services noted above, is subject to SIMC’s standard manager due diligence and selection process for the applicable SEI program and/or strategy offering. Also, potential conflicts identified are raised to the Board of Trustees of the SEI Funds or to SIMC Compliance prior to the sub-advisor being hired by SIMC.

Investment Products

SIMC not only provides investment management and advisory services to individuals and institutions, it also serves as the investment advisor to its investment products, including the SEI Funds (including subsidiaries of such Funds), SEI Alternative Funds, and SEI CITs. Additionally, SIMC is the sponsor to, and the advisor of, managed accounts, including Managed Account Solutions (“MAS”) and Distribution Focused Strategies (each of which is offered to clients through a separate market unit). SIMC may invest its Clients into these and other products. Therefore, the Client may pay SIMC investment advisory fees which are agreed to in the Client’s investment advisory agreement, and pay SIMC investment advisory fees through the underlying investment products. However, SIMC generally, and to the extent required by the Employee Retirement Income Security Act of 1974 (“ERISA”) and other applicable law, will offset or credit any advisory fees earned by SIMC with respect to a Client’s investment in an underlying investment product against that Client’s account level fee.

SEI Funds

Other affiliates of SIMC provide various services to the SEI Funds (including subsidiaries of such Funds), for which they receive compensation. Specifically, SEI Investments Global Funds Services (“SGFS”) serves as administrator, SEI Institutional Transfer Agent, Inc. (“SITA”) serves as transfer agent, and SEI Investments Distribution Co. (“SIDCO”), serves as the distributor of the SEI Funds. SIDCO and SPTC also

provide services with respect to the Funds. SIMC, SGFS, SITA, SIDCO and SPTC receive fees from the SEI Funds determined as a percentage of the SEI Fund's total assets. Therefore, to the extent that SIMC recommends that a Client invests in the SEI Funds, SIMC's affiliates benefit from the investment in the SEI Funds. To the extent that a particular investment is suitable for a Client, if applicable, such investments will be allocated in a manner which SIMC determines is fair and equitable under the circumstances in respect to all of its other clients.

Some SEI Funds are "funds-of-funds," meaning that an SEI Fund will invest in underlying funds, which in most cases will be other SEI Funds. When an SEI Fund invests in underlying SEI Funds, SIMC is advisor to both the fund-of-funds and the underlying SEI Funds and is paid an advisory fee by both Funds. As a result, SIMC could select those underlying SEI Funds that pay higher advisory fees to SIMC. To mitigate this risk, the SEI Funds are overseen by the SEI Funds' Board of Trustees, which ensures that SIMC does not factor in the level of fees in its decision in the allocation of underlying SEI Funds in the fund-of-funds.

A number of SEI Funds participate in securities lending. When an SEI Fund lends a security, it receives cash or collateral from the borrower. Currently the SEI Funds reinvest that cash or collateral into a Pooled Investment Vehicle. This lending activity takes place within each participating SEI Fund portfolio and not in a Client's individual account. SIMC and its affiliate are paid fees for the management and administration of the collateral investment pool and, consequently, have an incentive to lend securities and/or use the collateral investment pool in order to generate more fees. To manage and mitigate this risk, SIMC's use of the collateral pool and the SEI Funds' lending activities are overseen by the SEI Funds' Board of Trustees.

SEI Alternative Funds

Affiliates of SIMC (SEI Funds, Inc. and SEI Investment Strategies, LLC) serve as the general partner or director to several of the SEI Alternative Funds. SEI Global Services, Inc. or SEI Investments Global (Cayman) Limited also serves as administrator and transfer agent to certain SEI Alternative Funds.

Collective Trust Funds

SEI Trust Company ("STC"), a Pennsylvania chartered trust company, serves as trustee and investment manager to various collective trust funds in which SIMC invests certain Client's assets (to the extent they are eligible). SIMC also acts as an investment advisor to STC, and SITA as transfer agent, with respect to the various collective trust funds offered by STC.

Non-U.S. Investors

SIMC serves as investment advisor to proprietary Irish-regulated UCITS Funds (and other alternative funds), which are sold to non-US investors. SIMC also serves as sub-advisor to several proprietary Canadian-registered mutual funds to which SIMC's affiliates serve as advisor and also serves as advisor to its UK affiliate on behalf of its institutional Clients. Non-US institutional clients of SIMC affiliates may also invest in the SEI Alternative Funds.

Affiliated Custodian

Clients typically choose to custody their accounts at SIMC's affiliate, SPTC, a limited purpose federal savings association. SPTC charges the client a fee for these services. SPTC may also provide trust, custody and/or record-keeping services to SIMC's clients, including some of the Pooled Investment Vehicles. SPTC's services may be provided at a discount or without additional client charge. In connection with providing shareholder services to clients invested in the SEI Funds, SPTC receives a shareholder service fee from the SEI Funds for providing those services. If a client custodies assets at SPTC, SPTC provides a cash sweep service into an SEI money market mutual fund, and if elected, SIMC will earn additional fees, as an advisor to the SEI money market fund. Please see [Item 5](#) for additional information on fees.

Affiliated Broker-Dealer

As explained in this Brochure, SIMC or sub-advisors will execute certain brokerage transactions using SIMC's affiliated broker-dealer, SIDCO. SIDCO also receives shareholder service, administration service and/or distribution fees from the SEI Funds, portions of which are paid by SIDCO to affiliates or third parties that provide such services. SIDCO also receives distribution or creation unit servicer fees from certain third-party ETFs and their sponsors when providing services to those firms under services agreement between SIDCO and such firms. A conflict of interest exists because SIDCO may earn additional fees to the extent that such ETFs are purchased by an SEI Fund. SIMC anticipates that any resultant increase in fees payable to SIDCO would be immaterial. In addition, certain SIMC employees are also registered representatives of SIDCO. Such individuals do not receive additional compensation by virtue of their role with SIDCO. See [Item 4](#) and [12](#) for additional information on SIMC's use of broker-dealers, including SIDCO.

Commodity Pool Operator

SIMC is registered as a Commodity Pool Operator ("CPO") with the Commodities Futures Trading Commission ("CFTC"), and certain SIMC employees are registered with the CFTC as Principals and/or Associated Persons.

Item 11 - Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

Code of Ethics and Personal Trading

When SIMC employees have access to nonpublic information, conflicts may arise between the interests of the employee and those of a client. For example, a SIMC employee could gain information on the purchase or sale of securities by a SIMC client, or portfolio holdings information for a particular client. The SIMC employee could use this information to take advantage of available investment opportunities, take an investment opportunity from a client for the employee's own portfolio, or front-run (which occurs when an employee trades in his or her personal account before making client transactions). As a fiduciary, SIMC owes a duty of loyalty to clients, which requires that a SIMC employee must always place the interests of clients first and foremost and shall not take inappropriate advantage of his/her position. Thus SIMC personnel must conduct themselves and their personal securities transactions in a manner that does not create conflicts with the firm.

SIMC has adopted a Code of Ethics to reinforce to its employees our SIMC principles of integrity and ethics, and to enforce compliance with applicable regulations and best practices. Under the SIMC Code of Ethics, SIMC employees that are characterized as Access Persons and their family members with whom they reside must disclose personal securities holdings and personal securities transactions. Access Persons are SIMC employees that have access to non-public information regarding any client's purchase or sale of securities or who are involved in making, or have non-public access to, securities recommendations to clients. Access Persons are also subject to certain trade pre-clearance and reporting standards for their personal securities transactions. Additionally, certain Access Persons may not purchase or sell, directly or indirectly, any "Covered Security" (which is defined in the Code of Ethics) within 24 hours before or after the time that the same Covered Security is being purchased or sold in any SIMC client account. Some Access Persons may not purchase or sell such securities within seven days of a transaction for a SIMC client account. Certain Access Persons also may not profit from the purchase and sale or sale and purchase of a Covered Security within 60 days of acquiring or disposing of beneficial ownership of that Covered Security. Finally, Access Persons may not acquire securities as part of an initial public offering or a private placement transaction without the prior consent of SIMC Compliance. The Code of Ethics also includes provisions relating to the confidentiality of client information and market timing, and also incorporates SEIC's insider trading policy by reference. All supervised persons at SIMC are trained on the Code of Ethics and must acknowledge the terms of the Code of Ethics upon hire and on an annual basis.

SIMC anticipates that, in appropriate circumstances, consistent with clients' investment objectives, it will cause accounts over which SIMC has management authority to effect, and will recommend to investment advisory clients or prospective clients, the purchase or sale of securities in which SIMC, its affiliates and/or clients, directly or indirectly, have a position of interest. SIMC's employees and persons associated with SIMC are required to follow SIMC's Code of Ethics. Subject to satisfying this policy and applicable laws, officers, directors and employees of SIMC and its affiliates may trade for their own accounts in securities which are recommended to and/or purchased for SIMC's clients. The Code of Ethics is designed to ensure that the personal securities transactions, activities and interests of the employees of SIMC will not interfere with (i) making decisions in the best interest of advisory clients and (ii) implementing such decisions while, at the same time, allowing employees to invest for their own accounts. Nonetheless, because the Code of Ethics in some circumstances would permit employees to invest in the same securities as clients, there is a possibility that employees might benefit from market activity by a client in a security held by an employee. Employee trading is monitored under the Code of Ethics, to seek to prevent conflicts of interest between SIMC and its clients.

Clients and prospects may request a copy of SIMC's Code of Ethics by e-mailing SIMCCompliance@seic.com or sending a request to: SEI Investments Management Corporation, Attn: SIMC Compliance, One Freedom Valley Drive, Oaks, PA 19456.

Participation or Interest in Client Transactions

As explained above, among its other recommendations, SIMC recommends its Clients invest in Pooled Investment Vehicles to which SIMC also serves as investment advisor when SIMC believes such recommendation is appropriate for the Client. For example, SIMC, as investment manager to a Client, may recommend that they invest in the SEI Funds, SEI's proprietary Managed ETFs, a managed account, or a private fund, where SIMC also serves as investment advisor and receives a fee for those services. This creates a conflict of interest whereby SIMC has a financial incentive to recommend an unsuitable SIMC investment product to a SIMC Client in order for SIMC and its affiliates to receive additional fees. SIMC discloses its fees in the offering documents for each Pooled Investment Vehicle. To the extent that a particular investment is suitable for a client, if applicable, such investments will be allocated in a manner which SIMC determines is fair and equitable under the circumstances in respect to all of its other clients.

SIMC and its affiliates in some instances advise one client or take actions for a client, for itself, for its affiliates, or for their related persons that are different from the advice given or actions taken for other clients. SIMC, its affiliates, and their related persons are not obligated to buy or sell for a client any investment that they may buy, sell, or recommend for any other client or for their own accounts. Persons associated with SIMC or its affiliates have investments in any such products.

It is SIMC's policy that the firm will not affect any principal securities transactions for client accounts. Principal transactions are generally defined as transactions where SIMC, acting as principal for its own account or the account of an affiliate (i.e., SIDCO), buys from or sells any security to any advisory client. In limited circumstances, SIMC affects cross-transactions in which SIMC effects transactions between two of its managed client accounts (i.e., arranging for the clients' securities trades by "crossing" these trades when SIMC believes that such transactions are beneficial to its clients and subject to applicable law). To the extent permitted by law, SIDCO may act as a broker, and may receive a commission. The client may revoke SIMC's cross-transaction authority at any time upon written notice to SIMC.

Item 12 - Brokerage Practices

Broker Selection

SIMC has a duty to seek best execution of the transactions executed by SIMC for its clients' accounts. Although commission rates are an important consideration in determining whether "best execution" is being obtained, they are not determinative, as many other factors also are relevant in determining whether SIMC has achieved the best result for clients under the circumstances. As the SEC has acknowledged, there is no precise definition for "best execution," since it is a facts and circumstances determination. SIMC may consider numerous factors in arranging for the purchase and sale of clients' portfolio securities. These include any legal restrictions, such as those imposed under the securities laws and ERISA, and any client-imposed restrictions. Within these constraints, SIMC shall employ or deal with members of securities exchanges and other brokers and dealers or banks as SIMC approves and that will, in the portfolio manager's judgment, provide "best execution" (i.e., prompt and reliable execution at the most favorable price obtainable under the prevailing market conditions) for a particular transaction for the client's account. SIMC periodically evaluates the quality of these brokerage services as provided by various firms.

In determining the abilities of a broker-dealer or bank to obtain best execution of portfolio transactions, SIMC will consider all relevant factors, including:

- The execution capabilities the transactions require;
- Electronic routing capabilities to underlying brokers;
- The ability and willingness of the broker-dealer or bank to facilitate the accounts' portfolio transactions by participating for its own account;
- The importance to the account of speed, efficiency, and confidentiality;
- The apparent familiarity of the broker-dealer or bank with sources from or to whom particular securities might be purchased or sold;
- The reputation and perceived soundness of the broker-dealer or bank; and
- Other matters relevant to the selection of a broker-dealer or bank for portfolio transactions for any account.

SIMC will not seek in advance competitive bidding for the most favorable commission rate applicable to any particular portfolio transaction or select any broker-dealer or bank on the basis of its purported or "posted" commission rate structure. Certain types of trades, such as most fixed income securities transactions, do not involve the payment of a commission.

Affiliated Brokerage

SIMC and SIMC appointed sub-advisors use SIMC's affiliated broker-dealer, SIDCO, for various services for its clients, which are described below. Other than trading in the SEI Funds, Separately Managed Accounts, MAS (which is distributed through a separate business unit) or other accounts where SIMC has investment discretion, it is the client's decision whether to execute a particular securities transaction using SIDCO. SIMC discloses the use of its affiliated broker-dealer in the investment management agreement that the client signs with SIMC for services. By directing brokerage to SIDCO, SIMC may be unable to achieve most favorable execution of client transactions and this practice may cost clients more money.

1. SEI Funds

Generally, portfolio transactions in the SEI Funds are effected by sub-advisors pursuant to each sub-advisor's own brokerage policies and practices. However, SIMC does affect trades in the SEI Funds in certain situations. SIMC, and sub-advisors electing to do so, execute trades through SIDCO for the SEI Funds, subject to the duty to obtain best execution and to applicable law. Generally, under these provisions, SIDCO is permitted to receive and retain compensation for effecting portfolio transactions if

such compensation does not exceed “usual and customary” brokerage commissions. SIMC’s brokerage discretion practices with respect to the SEI Funds are reviewed at least annually by the SEI Funds’ Board of Trustees and in compliance with Section 17(e) (1) of the Investment Company Act of 1940, as amended. The following are examples of situations where portfolio trades in the SEI Funds may be executed through SIDCO.

a. Manager Transitions

SIMC executes transactions through SIDCO in connection with portfolio transitions that accompany SIMC’s reallocation of assets due to the hiring or termination of sub-advisors. Assets may be reallocated to existing sub-advisors. SIDCO serves as an introducing broker-dealer for these transactions, which means that SIDCO will introduce the transaction to one or more clearing brokers. SIDCO and the applicable clearing brokers will receive and retain compensation (i.e., commissions) for executing such transactions. Since SIDCO earns fees in connection with these transactions, SIMC has an incentive to change sub-advisors more frequently than necessary in order for its affiliate to earn additional fees. This risk is managed and mitigated by SIMC’s robust manager due diligence process and oversight structure, and the fact that manager changes require approval by the Funds’ Board of Trustees. Additionally, the use of SIDCO in manager transitions is reviewed by the SEI Funds Board of Trustees.

b. Trading for Internally Managed Equity Portfolios

In connection with internally managed equity portfolios, SIMC executes those trades through SIDCO as introducing broker, using one of the executing brokers that are available through SIDCO. As with the transition management trades, SIMC generally expects that SIDCO will serve as introducing broker on all such equity trades. There is an inherent conflict of interest in SIMC’s use of SIDCO for trading. SIMC may be motivated to pay a higher commission for trades involving SIDCO compared to a third party broker. SIMC is subject to its duty to seek to obtain best execution.

c. Sub-Advisor Trading Through SIDCO

Sub-advisors to certain SEI Funds have trading relationships with SIDCO and may execute a portion of an SEI Fund’s portfolio transactions through SIDCO. These relationships may involve soft dollar trading or execution only arrangements. The commission rate is negotiated between the sub-advisor and SIDCO. SIMC neither encourages nor discourages sub-advisors from trading through SIDCO, and does not take such trading into consideration in determining whether to recommend that a manager be hired or terminated. All such trading is, of course, subject to the sub-advisor’s duty to achieve best execution. Further, each sub-advisor that trades through SIDCO is required to report such trades on a quarterly basis to the Funds’ chief compliance officer.

2. Client Transitions

When transitioning Clients, SIMC, in some instances, uses SIDCO to liquidate a client’s securities portfolio. SIMC may undertake such liquidations to make cash and/or in-kind securities investments in one or more of the SEI Funds. SIDCO serves as an introducing broker-dealer for these transactions, which means that SIDCO will introduce the transaction to one or more clearing brokers. SIDCO and the applicable clearing brokers will receive and retain compensation (i.e., commissions) for executing such transactions. Information regarding the relationship between SIMC and SIDCO are disclosed to the client in the investment management agreement. In the case of clients subject to ERISA, SIMC’s use of SIDCO for transition services will be in accordance with applicable law and regulation. In order to comply with applicable law, the client is permitted to withdraw its consent to the use of SIDCO for client transactions by sending a written notice to SIMC.

3. Separately Managed Accounts

For separately managed accounts, other than accounts invested in Model Strategies, SIMC or the third party sub-advisors have the option, but are not required to execute trades through SIDCO as introducing broker, using one of the executing brokers available through SIDCO. There is an inherent conflict of interest in SIMC's use of SIDCO for trading. SIMC may be motivated to pay a higher commission for trades involving SIDCO compared to a third party broker. This conflict is mitigated by SIMC's duty to seek best execution. In addition, SIMC and sub-advisors execute trades for fixed income securities through third-party broker-dealers and the spread, mark-up or markdown on such a transaction is borne by the Client.

In most cases, for Separately Managed Accounts invested in Model Strategies the third party sub-advisor will provide SIMC with the investment advisor's investment model and SIMC will implement that model and execute all transactions allocated to that strategy through SIDCO. In certain cases, as set forth in the Client's contract, SIMC has arranged for SIDCO to waive the commission SIDCO would otherwise charge and, instead, a portion of the advisory fee SIMC charges the Client covers these trading costs. In these cases trades will still incur certain standard trading fees including auction fees; fees charged by exchanges on a per transaction basis; certain odd-lot differentials; transfer taxes; electronic fund and wire transfer fees; fees on NASDAQ transactions; certain costs associated with trading in foreign securities; and any other charges mandated by law. In other cases the Model Strategy sub-advisor is responsible for trading its own investment strategy and has determined not to execute orders through SIDCO, consistent with such advisor's duty to seek best execution, and commissions will be charged to Clients on these trades as determined by the third party investment advisor. In addition, SIMC and sub-advisors execute trades for fixed income securities through third-party broker-dealers and the spread, mark-up or markdown on such a transaction is borne by the Client. In the case of clients subject to ERISA, clients are permitted to withdraw their consent to the use of SIDCO for client transactions by sending a written notice to SIMC.

Soft Dollar Practices

SIMC does not intend to cause an account to pay more in commissions in return for research products and/or services provided to SIMC. However, brokers with which SIMC trades may provide proprietary research materials or technology to SIMC. While SIMC does not necessarily consider receipt of such information, or access to such technology, to constitute soft dollar arrangements, it does present a conflict of interest for SIMC in connection with the selection of brokers for the execution of trades to the extent that SIMC considers such research or technology to be valuable. Sub-advisors to the SEI Funds may engage in soft dollar transactions pursuant to the sub-advisors' own policies and procedures.

Client Referrals

SIMC does not consider, in selecting or recommending broker-dealers, whether SIMC or a related person receives client referrals from a broker-dealer or third-party and the conflicts this creates.

Directed Brokerage

In limited circumstances, a client may direct SIMC to use a particular broker-dealer (subject to SIMC's right to decline and/or terminate the engagement) to execute some or all transactions for the client's account. In such event, the client will negotiate terms and arrangements for the account with that broker-dealer, and SIMC will not seek better execution services or prices from other broker-dealers or be able to "batch" the client's transactions for execution through other broker-dealers with orders for other accounts managed by SIMC. As a result, client may pay higher commissions or other transaction costs or greater spreads, or receive less favorable net prices, on transactions for the account than would otherwise be the case.

Trade Aggregation

SIMC is permitted to aggregate or “batch” orders placed at the same time for the accounts of two or more clients if it is in the best interests of its clients. By batching trade orders, SIMC may obtain more favorable executions and net prices for the combined order, and ensure that no participating client is favored over any other client. Typically, SIMC will affect block orders for the purchase and sale for the same security for client accounts to facilitate best execution and to reduce transaction costs. When an aggregated order is filled in its entirety, each participating client account generally will receive the block price obtained on all such purchases or sales with respect to such order. The portfolio manager for each account must determine that the purchase or sale of the particular security involved is appropriate for the client and consistent with the client’s investment objectives and with any investment guidelines or restrictions applicable to the client’s account. The portfolio manager for each account must reasonably believe that the block trading will benefit, and will enable SIMC to seek best execution for each client participating in the block order. This requires a reasonable good faith judgment at the time the order is placed for execution.

Item 13 - Review of Accounts

Servicing of the Client accounts is conducted by the Institutional Group's Client Portfolio Managers. Each Client Portfolio Manager is assigned to accounts, conducts reviews of account status periodically and is available to Clients on an on-going basis. Each account is subject to an annual review of the Client's Investment Guidelines and their financial objectives and goals (or more frequently if or when appropriate) to ensure that the current asset allocation is designed to meet the Client's needs, considering financial situation, return expectation, risk tolerance, time horizon and asset class preferences. Client Service Directors additionally serve as the primary correspondent with the account administrators of the Client's custodian bank (generally, but not always SPTC).

Item 14 - Client Referrals and Other Compensation

SIMC and its affiliates receive fees from the SEI Funds, which are determined as a percentage of the SEI Funds' total assets. Therefore, to the extent that SIMC recommends that a Client invest in the SEI Funds, SIMC and its affiliates benefit from investment in the SEI Funds. Please see [Items 4](#) and [12](#) for additional information.

SIMC and its affiliates may assist certain Clients with their marketing activities, including providing brochures and other forms of marketing materials that Clients may use with their donors.

SIMC enters into solicitation arrangements with third parties who will receive a solicitation fee from SIMC for introducing prospective clients to SIMC or SIMC investment products. Additionally, SIMC may compensate SIMC employees who will receive a fee (determined based on the fee paid to SIMC by the client) for introducing prospective clients to SIMC or SIMC investment products. In all cases these solicitation arrangements are designed and implemented in a manner to comply with Investment Adviser Act Rule 206(4)-1 and applicable state laws.

Item 15 - Custody

In most cases, SPTC, an affiliate of SIMC, serves as custodian for SIMC clients (with the exception of the SEI Funds and some of SIMC's other Pooled Investment Vehicles). As custodian, SPTC will send periodic account statements directly to SIMC clients. Additionally, SPTC provides SIMC clients with other reporting services, including quarterly performance reports, year-end tax reports and online account access. SPTC charges a fee for its services.

SIMC clients whose assets are custodied with SPTC are encouraged to carefully review the account statements they receive from SPTC. In addition, SIMC clients are urged to compare any reports received from SIMC to the account statements received from SPTC (or other third-party custodian). Comparing statements will allow clients to determine whether account transactions, including deductions to pay advisory fees, are accurate.

As a result of its affiliation with the general partner or director to the SEI Alternative Funds, SIMC is deemed to have custody of the SEI Alternative Funds' assets. Pursuant to Rule 206(4)-2 of the Investment Advisers Act of 1940, SIMC maintains compliance by ensuring that each SEI Alternative Fund:

- is audited on an annual basis by an independent accountant that is registered with, and subject to regular inspection by, the Public Company Accounting Oversight Board in accordance with its rules.
- distributes audited financial statements prepared in accordance with generally accepted accounting principles to all limited partners (or members or other beneficial owners) within the distribution timeframes set forth in Rule 206(4)-2 specific to the type of private fund.

SIMC does not maintain custody of certain legacy hedge investments held by Clients but may provide certain reporting services on such investments. In these cases, Clients should receive at least quarterly statements from the broker dealer, bank or other qualified custodian that holds and maintains Clients' investment assets or receive annual audited financial statements from the private fund sponsor. SIMC urges you to carefully review such statements and compare such official custodial records to the account statements that SIMC may provide to you. Our statements may vary from custodial statements based on accounting procedures, reporting dates, or valuation methodologies of certain securities.

Item 16 - Investment Discretion

SIMC receives discretionary authority from the Client to manage Client's account assets in accordance with Client's Investment Guidelines via the agreement they enter into with SIMC. Some Clients have assigned SIMC greater discretion with respect to determining the proper asset allocation of their portfolio in which SIMC may periodically change the asset allocation without seeking prior Client approval. These Clients have also given SIMC the discretion to add or remove asset class exposures as SIMC deems prudent to seek to meet Clients' objectives.

SIMC also maintains discretionary authority: (1) as investment advisor to the SEI Funds; (2) to determine the re-balancing allocation of a Client's assets among the individual SEI Funds or other pooled investment vehicles (no commissions are incurred on these transactions); (3) in certain circumstances, to dispose of a Client's securities in order to raise cash to purchase SEI Funds, liquidate the account or invest in other pooled investment vehicles; and (4) for purchase and sale of individual securities.

Item 17 - Voting Client Securities

SIMC has adopted and implemented written policies and procedures that are reasonably designed to ensure that SIMC votes proxies in the best interest of its clients. SIMC has retained a third-party proxy voting service provider (the “Service”), to vote proxies with respect to applicable clients in accordance with approved guidelines (the “Guidelines”), and may deviate from voting in accordance with the Guidelines in certain limited exception scenarios (see below). SIMC also has a proxy voting committee (the “Committee”), comprised of SIMC employees, which approves the proxy voting guidelines or approves how SIMC should vote in certain scenarios. So long as the Service votes proxies in accordance with the Guidelines, SIMC maintains that there is an appropriate presumption that the manner in which SIMC voted was not influenced by, and did not result from, a conflict of interest.

In addition to retaining the Service, SIMC has also engaged a separate third- party vendor to assist with company engagement services (the “Engagement Service”). The Engagement Service strives to help investors manage reputational risk and increase corporate accountability through proactive, professional and constructive engagement. As a result of this process, the Engagement Service will at times provide to SIMC recommendations that may conflict with the Guidelines (see below for more detail).

SIMC retains the authority to override the Service’s recommendation, in certain/limited scenarios, and instruct the Service to vote in a manner at variance with the Service’s recommendation. The exercise of such right could implicate a conflict of interest. As a result, SIMC may not overrule the Service’s recommendation with respect to a proxy unless the following steps are taken:

- a. The Committee meets to consider the proposal to overrule the Service’s recommendation.
- b. The Committee determines whether SIMC has a conflict of interest with respect to the issuer that is the subject of the proxy. If the Committee determines that SIMC has a conflict of interest, the Committee then determines whether the conflict is “material” to any specific proposal included within the proxy. If not, then SIMC can vote the proxy as determined by the Committee.
- c. For any proposal where the Committee determines that SIMC has a material conflict of interest, SIMC may vote a proxy regarding that proposal in any of the following manners:
 1. Obtain Client Consent or Direction - If the Committee approves the proposal to overrule the recommendation of the Service, SIMC must fully disclose to each client holding the security at issue the nature of the conflict, and obtain the client’s consent to how SIMC will vote on the proposal (or otherwise obtain instructions from the client as to how the proxy on the proposal should be voted).
 2. Use Recommendation of the Service - Vote in accordance with the Service’s recommendation.
- d. For any proposal where the Committee determines that SIMC does not have a material conflict of interest, the Committee may overrule the Service’s recommendation if the Committee reasonably determines that doing so is in the best interests of SIMC’s clients. If the Committee decides to overrule the Service’s recommendation, the Committee will maintain a written record setting forth the basis of the Committee’s decision.

Notwithstanding these policies and procedures, actual proxy voting decisions of SIMC may have the effect of favoring the interests of other clients or businesses of SIMC and/or its affiliates, provided that SIMC believes such voting decisions to be in accordance with its fiduciary obligations. In some cases, the Committee may determine that it is in the best interests of SIMC’s clients to abstain from voting certain proxies. SIMC will abstain from voting in the event any of the following conditions are met with regard to a proxy proposal:

- Neither the Guidelines nor specific client instructions cover an issue;
- The Service does not make a recommendation on the issue;
- In circumstances where, in SIMC's judgment, the costs of voting the proxy exceed the expected benefits to clients;
- Positions on loan related to fund securities lending programs;
- Share blocking;
- The Committee is unable to convene on a proxy proposal to make a determination as to what would be in the client's best interest; and
- Proxies in foreign jurisdictions where the requirements necessary to vote are not practical and create an administrative hurdle that SIMC is unable to clear in the required (usually limited) time frame.

Clients retain the responsibility for receiving and voting mutual fund proxies for any and all mutual funds maintained in client portfolios.

With respect to proxies of an affiliated investment company or series thereof (e.g., the SEI U.S. mutual funds) SIMC will vote such proxies in the same proportion as the vote of all other shareholders of the investment company or series thereof (i.e., "echo vote" or "mirror vote").

Client Directed Votes. SIMC clients who have delegated voting responsibility to SIMC with respect to their account may from time to time contact their client representative if they would like to direct SIMC to vote in a particular solicitation. SIMC will use its commercially reasonable efforts to vote according to the client's request in these circumstances, and cannot provide assurances that such voting requests will be implemented. Clients may only direct votes with respect to securities held directly by the client. The Client may not direct votes for securities held by an SEI Fund or Pooled Investment Vehicle.

As noted above, SIMC retains the authority to overrule the Service's recommendations in certain scenarios and instruct the Service to vote in a manner at variance with the Guidelines. In all such cases, this requires the Committee to rule out any material conflict (as noted above) prior to overriding the Guidelines. Areas where SIMC may consider overriding the Guidelines include:

- Requests by third-party sub-advisers within the SEI U.S. mutual funds to direct certain votes; and
- Recommendations by the Engagement Service.

Clients may obtain a copy of SIMC's complete proxy voting policies and procedures upon request. Clients may also obtain information from SIMC about how SIMC voted any proxies on behalf of their account(s) by either referring to Form N-PX (for SEI Funds) or by contacting your client service representative.

Certain SIMC clients have either retained the ability to vote proxies with respect to their account, or have delegated that proxy voting authority to a third-party selected by the client. In those circumstances, SIMC is not responsible for voting proxies in the account or for overseeing the voting of such proxies by the client or its designated agent.

With respect to those clients for which SIMC does not conduct proxy voting, Clients should work with their custodians to ensure they receive their proxies and other solicitations for securities held in their account. Clients may contact their client service representative if they have a question on particular proxy voting matters or solicitations.

Item 18 - Financial Information

Registered investment advisors are required in this Item to provide you with certain financial information or disclosures about SIMC's financial condition. SIMC has no financial commitment that impairs its ability to meet contractual and fiduciary commitments to clients and has not been the subject of a bankruptcy proceeding.
