Advisory Business (Item 4)

Firm Description

Dominion Portfolio Management, Inc. ("hereinafter called DPM") was founded in 1995 and is a SEC registered investment adviser with its principal place of business located in Texas. DPM engages in fee based portfolio asset management on behalf of its clients.

Principal Owner

DPM is a wholly owned subsidiary of Dominion Financial Services, Inc. ("hereinafter called DFS").

Type of Advisory Services

DPM provides portfolio management services on a discretionary basis through a DPM Investment Advisor Representative. The Franklin Templeton Mutual Fund Program is managed by Drew Nixon, Investment Advisor Representative. Mr. Nixon's information can be found in Part 2B.

Asset Management

Client assets are invested in mutual fund shares of Franklin Templeton.

Termination of Agreement

DPM or the client may terminate an advisory contract with ten (10) days written notice to the other party. If Part 2 of Form ADV is not delivered to the client at least forty-eight (48) hours prior to the client entering into any written contract with this investment adviser, then the client has the right to terminate the contract without penalty within five (5) business days after entering into the contract. For the purposes of this provision, a contract is considered entered into when all parties to the contract have signed the contract.

In cases where the account is terminated, all pre-paid and unearned advisory fees will be promptly refunded to the client.

Fees and Compensation (Item 5)

Mutual fund Fees

Franklin Templeton Funds are purchased at net asset value. DPM's management fee is 2%. The 2% management fee is offset by 12b(1) fees that Franklin Templeton pays to DPM's affiliate Broker/Dealer.

Assets Under Management

DPM had \$188,055,684 under management in all of its advisory services offered as of December 31, 2022.

Fee Billing

Advisory fees will be billed quarterly in advance of the services provided. Amounts are based on the portfolio value on the last day of the previous quarter. For accounts that are opened or closed during a calendar quarter, the fee payable will be pro-rated for the period.

DPM or the client may terminate an advisory contract with ten (10) days written notice to the other party. In cases where the account is terminated, all pre-paid and unearned advisory fees will be promptly refunded to the client. The refund of a fee is determined as follows: the daily rate is calculated by dividing the quarterly fee by the number of days in the quarter. The refund is equal to the daily rate times the number of days remaining in the quarter including the day of notice from the client.

Typically, DPM will receive its fees on a directly deducted basis, that is, the client will authorize DPM to have the advisory fee directly deducted from the account through our advisory contract wherein the client advises their custodian to pay the fee. Each client will receive a statement from their custodian reflecting the fee deducted from the account and paid to DPM. If a client's account does not have sufficient cash or cash equivalents to pay fees due, an appropriate amount of assets will be liquidated to cover the fee.

Other Fees

Franklin Templeton internal fund fees.

Expense Ratios

Mutual funds generally charge a management fee for their services as investment managers. The management fee is called an expense ratio. For example, an expense ratio of 0.50 means that the mutual fund company charges 0.5% for their services. These fees are in addition to the fees paid by you to DPM.

Performance figures quoted by mutual fund companies in various publications are after their fees have been deducted.

Past Due Accounts and Termination of Agreement

DPM reserves the right to stop work on any account that is more than 30 days overdue. In addition, DPM reserves the right to terminate any management agreement where a client has willfully concealed or has refused to provide pertinent information about financial situations when necessary and appropriate, in DPM's judgment, to providing proper financial advice. Any unearned portion of fees collected in advance will be refunded within 5 days.

Performance-Based Fees (Item 6)

Sharing of Capital Gains

Fees are not based on a share of the capital gains or capital appreciation of managed securities.

DPM does not use a performance-based fee structure because of the potential conflict of interest. Performance-based compensation may create an incentive for the adviser to recommend an investment that may carry a higher degree of risk to the client.

Types of Clients (Item 7)

Description

DPM may provide investment advice to individuals, high net worth individuals and businesses. Client relationships vary in scope and length of service.

Methods of Analysis, Investment Strategies and Risk of Loss (Item 8)

Methods of Analysis

Mutual Funds: Investing in mutual funds carries the risk of capital loss and thus you may lose money investing in mutual funds. All mutual funds have costs that lower investment returns. They can be of bond "fixed income" nature (lower risk) or stock "equity" nature (mentioned above). Periods of underperformance by Franklin Templeton Funds may affect your account's performance. Additionally, as part of the strategy is to avoid downside volatility, there is risk of being out the market during sharp market reversals.

Risk of Loss

All investment programs have certain risks that are borne by the investor. Investing in securities involves risk of loss. Clients should be prepared to bear. Our investment approach constantly keeps the risk of loss in mind. Investors face the following investment risks:

- **Interest-rate Risk:** Fluctuations in interest rates may cause investment prices to fluctuate. For example, when interest rates rise, yields on existing bonds become less attractive, causing their market values to decline.
- **Market Risk:** The price of a security, bond, or mutual fund may drop in reaction to tangible and intangible events and conditions. This type of risk is caused by external factors independent of a security's particular underlying circumstances. For example, political, economic and social conditions may trigger market events.
- **Inflation Risk:** When any type of inflation is present, a dollar today will not buy as much as a dollar next year, because purchasing power is eroding at the rate of inflation.
- **Currency Risk:** Overseas investments are subject to fluctuations in the value of the dollar against the currency of the investment's originating country. This is also referred to as exchange rate risk.
- **Reinvestment Risk:** This is the risk that future proceeds from investments may have to be reinvested at a potentially lower rate of return (i.e. interest rate). This primarily relates to fixed income securities.
- **Business Risk:** These risks are associated with a particular industry or a particular company within an industry. For example, oil-drilling companies depend on finding oil and then refining it, a lengthy process, before they can generate a profit. They carry a higher risk of profitability than an electric company, which generates its income from a steady stream of clients who buy electricity no matter what the economic environment is like.
- **Liquidity Risk:** Liquidity is the ability to readily convert an investment into cash. Generally, assets are more liquid if many traders are interested in a standardized product. For example, Treasury Bills are highly liquid, while real estate properties are not.
- **Financial Risk:** Excessive borrowing to finance a business' operations increases the risk of profitability, because the company must meet the terms of its obligations in good times and bad. During periods of financial stress, the inability to meet loan obligations may result in bankruptcy and/or a declining market value.

Disciplinary Information (Item 9)

Legal and Disciplinary

The firm paid \$122,200 in 2019 and \$188,000 in 2020, \$150,000 in 2021 and \$73,000 in 2022 to settle client complaints against a former advisor.

Other Financial Industry Activities and Affiliations (Item 10)

Code of Ethics, Participation or Interest in Client Transactions and Personal Trading (Item 11)

It is the IAR'S responsibility to ensure copies of statements are delivered to DPM. IAR's holding accounts at other broker-dealers will be charged reasonable fees for supervision of outside accounts
