FORM ADV PART 2A BROCHURE

This brochure provides information about the qualifications and business practices of Family Wealth Partners, LLC. If you have any questions about the contents of this brochure, contact us at 704-321-0152 or samuel.dye@fwpnc.com. The information in this brochure has not been approved or verified by the United States Securities and Exchange Commission or by any state securities authority.

Additional information about Family Wealth Partners, LLC (IARD # 317764) is available on the SEC's website at www.adviserinfo.sec.gov.

Family Wealth Partners, LLC is a registered investment adviser. Registration with the United States Securities and Exchange Commission or any state securities authority does not imply a certain level of skill or training.

Item 2 Summary of Material Changes

Form ADV Part 2 requires registered investment advisers to amend their brochure when information becomes materially inaccurate. If there are any material changes to an adviser's disclosure brochure, the adviser is required to notify you and provide you with a description of the material changes.

Since the filing of our SEC initial registration dated December 21, 2021, we have had the following material changes:

- Item 4 of the ADV Part 2A has been amended to clarify that as part of our financial planning services we also offer family office coaching to high net worth clients. However, we do not offer separate Family Office and Wealth Planning Services. Please refer to Item 4 of the ADV Part 2A for information on our services.
- Item 5 of the ADV Part 2A has been amended to clarify our fees for financial planning services, financial consulting services and pension consulting services. Please refer to Item 5 of the ADV Part 2A for additional information on our fees.
- Item 12 of the ADV Part 2A has been amended to clarify we also recommend the brokerage and custodial services of LPL Financial LLC ("LPL").
- In addition, additional language in reference to TD Ameritrade has been added to Item 12 & Item 14 of the ADV Part 2A.
- Item 14 of the ADV Part 2A has been amended to clarify that we directly compensate non-employee (outside) consultants, individuals, and/or entities (solicitors) for client referrals. Please refer to Item 14 for additional information on this topic.
- In addition, Item 14 of the ADV Part 2A has been amended to clarify that employees are paid a onetime incentive bonus for new client relationships. You will not be charged additional fees based on this compensation arrangement. Please refer to Item 14 for additional information

Item 4 Advisory Business

Description of Firm

Family Wealth Partners, LLC is a registered investment adviser based in Matthews, North Carolina. We are organized as a limited liability company ("LLC") under the laws of the State of North Carolina. We are owned by Thomas Dundorf, Robert Samuel Dye, and Nathan Fulks.

The following paragraphs describe our services and fees. Refer to the description of each investment advisory service listed below for information on how we tailor our advisory services to your individual needs. As used in this brochure, the words "we," "our," and "us" refer to Family Wealth Partners, LLC and the words "you," "your," and "client" refer to you as either a client or prospective client of our firm.

Portfolio Management Services

We offer discretionary portfolio management services. Our investment advice is tailored to meet our clients' needs and investment objectives.

If you participate in our discretionary portfolio management services, we require you to grant us discretionary authority to manage your account. Subject to a grant of discretionary authorization, we have the authority and responsibility to formulate investment strategies on your behalf. Discretionary authorization will allow us to determine the specific securities, and the amount of securities, to be purchased or sold for your account without obtaining your approval prior to each transaction. We will also have discretion over the broker or dealer to be used for securities transactions in your account. Discretionary authority is typically granted by the investment advisory agreement you sign with our firm, a power of attorney, or trading authorization forms.

You may limit our discretionary authority (for example, limiting the types of securities that can be purchased or sold for your account) by providing our firm with your restrictions and guidelines in writing.

As part of our portfolio management services, we may use one or more sub-advisers to manage a portion of your account on a discretionary basis. The sub-adviser(s) may use one or more of their model portfolios to manage your account. We will regularly monitor the performance of your accounts managed by sub-adviser(s), and may hire and fire any sub-adviser without your prior approval. We may pay a portion of our advisory fee to the sub-adviser(s) we use; however, you will not pay our firm a higher advisory fee as a result of any sub-advisory relationships.

As part of our portfolio management services, in addition to other types of investments (see disclosures below in this section), we may invest your assets according to one or more model portfolios developed by an unaffiliated investment manager. These models are designed for investors with varying degrees of risk tolerance ranging from a more aggressive investment strategy to a more conservative investment approach. Clients whose assets are invested in model portfolios may not set restrictions on the specific holdings or allocations within the model, nor the types of securities that can be purchased in the model. Nonetheless, clients may impose restrictions on investing in certain securities or types of securities in their account. In such cases, this may prevent a client from investing in certain models that are managed by our firm.

Financial Planning Services

We offer financial planning services which typically involve providing a variety of advisory services to clients regarding the management of their financial resources based upon an analysis of their individual needs. These services can range from broad-based financial planning to consultative or single subject planning. If you retain our firm for financial planning services, we will meet with you to

gather information about your financial circumstances and objectives. We may also use financial planning software to determine your current financial position and to define and quantify your long-term goals and objectives. Once we specify those long-term objectives (both financial and non-financial), we will develop shorter-term, targeted objectives. Once we review and analyze the information you provide to our firm and the data derived from our financial planning software, we will deliver a written plan to you, designed to help you achieve your stated financial goals and objectives.

Family Office Coaching

As part of our financial planning services we also offer family office coaching to high net worth clients.

Financial plans are based on your financial situation at the time we present the plan to you, and on the financial information you provide to us. You must promptly notify our firm if your financial situation, goals, objectives, or needs change.

You are under no obligation to act on our financial planning recommendations. Should you choose to act on any of our recommendations, you are not obligated to implement the financial plan through any of our other investment advisory services. Moreover, you may act on our recommendations by placing securities transactions with any brokerage firm.

Financial Consulting Services

We offer financial consulting services that primarily involve advising clients on specific financial-related topics. The topics we address may include, but are not limited to, risk assessment/management, investment planning, financial organization, or financial decision making/negotiation.

Selection of Other Advisers

We may recommend that you use the services of a third party money manager ("TPMM") to manage all, or a portion of, your investment portfolio. After gathering information about your financial situation and objectives, we may recommend that you engage a specific TPMM or investment program. Factors that we take into consideration when making our recommendation(s) include, but are not limited to, the following: the TPMM's performance, methods of analysis, fees, your financial needs, investment goals, risk tolerance, and investment objectives. We will monitor the TPMM(s)' performance to ensure its management and investment style remains aligned with your investment goals and objectives.

The TPMM(s) will actively manage your portfolio and will assume discretionary investment authority over your account. We will assume discretionary authority to hire and fire TPMM(s) and/or reallocate your assets to other TPMM(s) where we deem such action appropriate.

Pension Consulting Services

We offer pension consulting services to employee benefit plans and their fiduciaries based upon the needs of the plan and the services requested by the plan sponsor or named fiduciary. In general, these services may include an existing plan review and analysis, plan-level advice regarding fund selection and investment options, education services to plan participants, investment performance monitoring, and/or ongoing consulting. These pension consulting services will generally be non-discretionary and advisory in nature. The ultimate decision to act on behalf of the plan shall remain with the plan sponsor or other named fiduciary.

We may also assist with participant enrollment meetings and provide investment-related educational seminars to plan participants on such topics as:

- Diversification;
- Asset allocation;
- Risk tolerance; and

- Time horizon

Our educational seminars may include other investment-related topics specific to the particular plan.

We may also provide additional types of pension consulting services to plans on an individually negotiated basis. All services, whether discussed above or customized for the plan based upon requirements from the plan fiduciaries (which may include additional plan-level or participant-level services) shall be detailed in a written agreement and be consistent with the parameters set forth in the plan documents.

Either party to the pension consulting agreement may terminate the agreement upon written notice to the other party in accordance with the terms of the agreement for services. The pension consulting fees will be prorated for the quarter in which the termination notice is given and any unearned fees will be refunded to the client.

Types of Investments

We offer advice on equity securities, warrants, corporate debt securities (other than commercial paper), commercial paper, certificates of deposit, municipal securities, variable life insurance, variable annuities, mutual fund shares, United States government securities, options contracts on securities, options contracts on commodities, money market funds, real estate, REITs, PIPEs, derivatives, structured products, ETFs, leveraged ETFs, digital assets, interests in partnerships investing in real estate and interests in partnerships investing in oil and gas interests.

Additionally, we may advise you on various types of investments based on your stated goals and objectives. We may also provide advice on any type of investment held in your portfolio at the inception of our advisory relationship.

Since our investment strategies and advice are based on each client's specific financial situation, the investment advice we provide to you may be different or conflicting with the advice we give to other clients regarding the same security or investment.

Assets Under Management

As of January 12, 2023, we provide continuous management services for \$159,388,568 in client assets on a discretionary basis, and \$0 in client assets on a non-discretionary basis.

Item 5 Fees and Compensation

Portfolio Management Services

Our fee for portfolio management services is based on a percentage of the assets in your account and is set forth in the following annual fee schedule:

Annual Fee Schedule

Assets Under Management	Annual Fee
\$0-\$500,000	1.75%
\$500,001-\$1,000,000	1.30%
\$1,000,001-\$2,000,000	0.85%
\$2,000,001-\$3,000,000	0.60%

\$3,000,001 and above

0.50%

Our annual portfolio management fee is billed and payable, quarterly in advance, based on the balance at end of billing period.

If the portfolio management agreement is executed at any time other than the first day of a calendar quarter, our fees will apply on a pro rata basis, which means that the advisory fee is payable in proportion to the number of days in the quarter for which you are a client. Our advisory fee is negotiable, depending on individual client circumstances.

At our discretion, we may combine the account values of family members living in the same household to determine the applicable advisory fee. For example, we may combine account values for you and your minor children, joint accounts with your spouse, and other types of related accounts. Combining account values may increase the asset total, which may result in your paying a reduced advisory fee based on the available breakpoints in our fee schedule stated above.

We will deduct our fee directly from your account through the qualified custodian holding your funds and securities. We will deduct our advisory fee only when you have given our firm written authorization permitting the fees to be paid directly from your account. Further, the qualified custodian will deliver an account statement to you at least quarterly. These account statements will show all disbursements from your account. You should review all statements for accuracy.

You may terminate the portfolio management agreement upon written notice. You will incur a pro rata charge for services rendered prior to the termination of the portfolio management agreement, which means you will incur advisory fees only in proportion to the number of days in the quarter for which you are a client. If you have pre-paid advisory fees that we have not yet earned, you will receive a prorated refund of those fees.

Financial Planning Services

We charge a fixed fee for financial planning services, which generally ranges from \$2,500 - \$15,000. Our fee is negotiable depending upon the complexity and scope of the plan, your financial situation, and your objectives. We do not require you to pay fees six or more months in advance and in excess of \$1,200. Should the engagement last longer than six months between acceptance of financial planning agreement and delivery of the financial plan, any prepaid unearned fees will be promptly returned to you less a pro rata charge for bona fide financial planning services rendered to date. Our planning fee is payable as invoiced.

You may terminate the financial planning agreement upon 30 days written notice to our firm. If you have pre-paid financial planning fees that we have not yet earned, you will receive a prorated refund of those fees. If financial planning fees are payable in arrears, you will be responsible for a prorated fee based on services performed prior to termination of the financial planning agreement.

Financial Consulting Services

We charge a fixed fee, which generally ranges from \$2,500 - \$15,000 or a hourly fee of \$200 for financial consulting services depending on the nature of the services requested. Our fees are negotiable depending on the scope and complexity of services rendered. Our consulting fee is payable as invoiced.

You may terminate the financial consulting agreement upon 30 days written notice to our firm. If you have pre-paid financial consulting fees that we have not yet earned, you will receive a prorated refund of those fees. If financial consulting fees are payable in arrears, you will be responsible for a prorated fee based on services performed prior to termination of the financial consulting agreement.

Selection of Other Advisers

We do not charge you a separate fee for the selection of other advisers. When we refer you to another adviser, we will enter into an agreement with you and the third-party that outlines fees and their services. The third-party advisor will be our firm for the fees associated with their management of your portfolio. We will pay their fee from the advisory fees you pay to our firm. You will not pay an additional fee for these services.

Pension Consulting Services

Pension consulting services fees will be negotiated with the plan sponsor or named fiduciary on a case-by-case basis. We charge an asset-based fee for pension consulting services not to exceed 2.00% annually. The fees are billed either monthly or quarterly in arrears or in advance based on the value of the plan assets at the end of the billing period. However, since pension consulting services are negotiable, the advisory fee and billing practices will be detailed and agreed to in the pension consulting agreement.

You may terminate the pension consulting services agreement upon to our firm. You will incur a pro rata charge for services rendered prior to the termination of the agreement, which means you will incur advisory fees only in proportion to the number of days in the quarter for which you are a client. If you have pre-paid advisory fees that we have not yet earned, you will receive a prorated refund of those fees.

Additional Fees and Expenses

As part of our investment advisory services to you, we may invest, or recommend that you invest, in mutual funds and exchange traded funds. The fees that you pay to our firm for investment advisory services are separate and distinct from the fees and expenses charged by mutual funds or exchange traded funds (described in each fund's prospectus) to their shareholders. These fees will generally include a management fee and other fund expenses. You will also incur transaction charges and/or brokerage fees when purchasing or selling securities. These charges and fees are typically imposed by the broker-dealer or custodian through whom your account transactions are executed. We do not share in any portion of the brokerage fees/transaction charges imposed by the broker-dealer or custodian. To fully understand the total cost you will incur, you should review all the fees charged by mutual funds, exchange traded funds, our firm, and others. For information on our brokerage practices, refer to the *Brokerage Practices* section of this brochure.

Item 6 Performance-Based Fees and Side-By-Side Management

We do not accept performance-based fees or participate in side-by-side management. Performance-based fees are fees that are based on a share of a capital gains or capital appreciation of a client's account. Side-by-side management refers to the practice of managing accounts that are charged performance-based fees while at the same time managing accounts that are not charged performance-based fees. Our fees are calculated as described in the *Fees and Compensation* section above, and are not charged on the basis of a share of capital gains upon, or capital appreciation of, the funds in your advisory account.

Item 7 Types of Clients

We offer investment advisory services to individuals including high net worth individuals, pension and profit sharing plans (but not the plan participants), charitable organizations and corporations and other businesses.

In general, we do not require a minimum dollar amount to open and maintain an advisory account; however, we have the right to terminate your Account if it falls below a minimum size which, in our sole opinion, is too small to manage effectively.

We may also combine account values for you and your minor children, joint accounts with your spouse, and other types of related accounts to meet the stated minimum.

Item 8 Methods of Analysis, Investment Strategies and Risk of Loss

Our Methods of Analysis and Investment Strategies

We may use one or more of the following methods of analysis or investment strategies when providing investment advice to you:

Fundamental Analysis - involves analyzing individual companies and their industry groups, such as a company's financial statements, details regarding the company's product line, the experience and expertise of the company's management, and the outlook for the company and its industry. The resulting data is used to measure the true value of the company's stock compared to the current market value.

Risk: The risk of fundamental analysis is that information obtained may be incorrect and the analysis may not provide an accurate estimate of earnings, which may be the basis for a stock's value. If securities prices adjust rapidly to new information, utilizing fundamental analysis may not result in favorable performance.

Modern Portfolio Theory - a theory of investment which attempts to maximize portfolio expected return for a given amount of portfolio risk, or equivalently minimize risk for a given level of expected return, by carefully diversifying the proportions of various assets.

Risk: Market risk is that part of a security's risk that is common to all securities of the same general class (stocks and bonds) and thus cannot be eliminated by diversification.

Long-Term Purchases - securities purchased with the expectation that the value of those securities will grow over a relatively long period of time, generally greater than one year.

Risk: Using a long-term purchase strategy generally assumes the financial markets will go up in the long-term which may not be the case. There is also the risk that the segment of the market that you are invested in or perhaps just your particular investment will go down over time even if the overall financial markets advance. Purchasing investments long-term may create an opportunity cost - "locking-up" assets that may be better utilized in the short-term in other investments.

Short-Term Purchases - securities purchased with the expectation that they will be sold within a relatively short period of time, generally less than one year, to take advantage of the securities' short-term price fluctuations.

Risk: Using a short-term purchase strategy generally assumes that we can predict how financial markets will perform in the short-term which may be very difficult and will incur a disproportionately higher amount of transaction costs compared to long-term trading. There are many factors that can affect financial market performance in the short-term (such as short-term interest rate changes, cyclical earnings announcements, etc.) but may have a smaller impact over longer periods of times.

ESG Investing - ESG Investing maintains a focus on Environmental, Social, and Governance issues. ESG investing may be referred to in many different ways, such as sustainable investing, socially responsible investing, and impact investing. ESG practices can include, but are not limited to, strategies that select companies based on their stated commitment to one or more ESG factors; for example, companies with policies aimed at minimizing their negative impact on the environment, social issues, or companies that focus on governance principles and transparency. ESG practices may also entail screening out companies in certain sectors or that, in the view of the investor, demonstrate poor management of ESG risks and opportunities or are involved in issues that are contrary to the investor's own principals.

Risk: "ESG Investing" is not defined in federal securities laws, may be subjective, and may be defined in different ways by different managers, advisers or investors. There is no SEC "rating" or "score" of ESG investments that could be applied across a broad range of companies, and while many different private ratings based on different ESG factors exist, they often differ significantly from each other. Different managers may weight environmental, social, and governance factors differently. Some ESG managers may consider data from third party providers which could include "scoring" and "rating" data compiled to help managers compare companies. Some of the data used to compile third party ESG scores and ratings may be subjective. Other data may be objective in principle, but are not verified or reliable. Third party scores also may consider or weight ESG criteria differently, meaning that companies can receive widely different scores from different third party providers. A portfolio manager's ESG practices may significantly influence performance. Because securities may be included or excluded based on ESG factors rather than traditional fundamental analysis or other investment methodologies, the account's performance may differ (either higher or lower) from the overall market or comparable accounts that do not employ similar ESG practices. Some mutual funds or ETFs that consider ESG may have different expense ratios than other funds that do not consider ESG factors. Paying more in expenses will reduce the value of your investment over time.

Cash Management

In managing the cash maintained in your account, we utilize the sole exclusive cash vehicle (money market) made available by the custodian. There may be other cash management options away from the custodian available to you with higher yields or safer underlying investments.

Tax Considerations

Our strategies and investments may have unique and significant tax implications. However, unless we specifically agree otherwise, and in writing, tax efficiency is not our primary consideration in the management of your assets. Regardless of your account size or any other factors, we strongly recommend that you consult with a tax professional regarding the investing of your assets.

Custodians and broker-dealers must report the cost basis of equities acquired in client accounts. Your custodian will default to the First-In First-Out ("FIFO") accounting method for calculating the cost basis of your investments. You are responsible for contacting your tax advisor to determine if this accounting method is the right choice for you. If your tax advisor believes another accounting method is more

advantageous, provide written notice to our firm immediately and we will alert your account custodian of your individually selected accounting method. Decisions about cost basis accounting methods will need to be made before trades settle, as the cost basis method cannot be changed after settlement.

Risk of Loss

Investing in securities involves risk of loss that you should be prepared to bear. We do not represent or guarantee that our services or methods of analysis can or will predict future results, successfully identify market tops or bottoms, or insulate clients from losses due to market corrections or declines. We cannot offer any guarantees or promises that your financial goals and objectives will be met. Past performance is in no way an indication of future performance.

Other Risk Considerations

When evaluating risk, financial loss may be viewed differently by each client and may depend on many different risks, each of which may affect the probability and magnitude of any potential losses. The following risks may not be all-inclusive, but should be considered carefully by a prospective client before retaining our services.

Liquidity Risk: The risk of being unable to sell your investment at a fair price at a given time due to high volatility or lack of active liquid markets. You may receive a lower price or it may not be possible to sell the investment at all.

Credit Risk: Credit risk typically applies to debt investments such as corporate, municipal, and sovereign fixed income or bonds. A bond issuing entity can experience a credit event that could impair or erase the value of an issuer's securities held by a client.

Inflation and Interest Rate Risk: Security prices and portfolio returns will likely vary in response to changes in inflation and interest rates. Inflation causes the value of future dollars to be worth less and may reduce the purchasing power of a client's future interest payments and principal. Inflation also generally leads to higher interest rates which may cause the value of many types of fixed income investments to decline.

Horizon and Longevity Risk: The risk that your investment horizon is shortened because of an unforeseen event, for example, the loss of your job. This may force you to sell investments that you were expecting to hold for the long term. If you must sell at a time that the markets are down, you may lose money. Longevity Risk is the risk of outliving your savings. This risk is particularly relevant for people who are retired, or are nearing retirement.

Recommendation of Particular Types of Securities

We recommend various types of securities and we do not primarily recommend one particular type of security over another since each client has different needs and different tolerance for risk. Each type of security has its own unique set of risks associated with it and it would not be possible to list here all of the specific risks of every type of investment. Even within the same type of investment, risks can vary widely. However, in very general terms, the higher the anticipated return of an investment, the higher the risk of loss associated with the investment. A description of the types of securities we may recommend to you and some of their inherent risks are provided below.

Money Market Funds: A money market fund is technically a security. The fund managers attempt to keep the share price constant at \$1/share. However, there is no guarantee that the share price will stay at \$1/share. If the share price goes down, you can lose some or all of your principal. The U.S. Securities and Exchange Commission ("SEC") notes that "While investor losses in money market funds have been rare, they are possible." In return for this risk, you should earn a greater return on your cash than you would expect from a Federal Deposit Insurance Corporation ("FDIC") insured

savings account (money market funds are not FDIC insured). Next, money market fund rates are variable. In other words, you do not know how much you will earn on your investment next month. The rate could go up or go down. If it goes up, that may result in a positive outcome. However, if it goes down and you earn less than you expected to earn, you may end up needing more cash. A final risk you are taking with money market funds has to do with inflation. Because money market funds are considered to be safer than other investments like stocks, long-term average returns on money market funds tends to be less than long term average returns on riskier investments. Over long periods of time, inflation can eat away at your returns.

Certificates of Deposit: Certificates of deposit ("CD") are generally a safe type of investment since they are insured by the Federal Deposit Insurance Company ("FDIC") up to a certain amount. However, because the returns are generally low, there is risk that inflation outpaces the return of the CD. Certain CDs are traded in the market place and not purchased directly from a banking institution. In addition to trading risk, when CDs are purchased at a premium, the premium is not covered by the FDIC.

Municipal Securities: Municipal securities, while generally thought of as safe, can have significant risks associated with them including, but not limited to: the credit worthiness of the governmental entity that issues the bond; the stability of the revenue stream that is used to pay the interest to the bondholders; when the bond is due to mature; and, whether or not the bond can be "called" prior to maturity. When a bond is called, it may not be possible to replace it with a bond of equal character paying the same amount of interest or yield to maturity.

Bonds: Corporate debt securities (or "bonds") are typically safer investments than equity securities, but their risk can also vary widely based on: the financial health of the issuer; the risk that the issuer might default; when the bond is set to mature; and, whether or not the bond can be "called" prior to maturity. When a bond is called, it may not be possible to replace it with a bond of equal character paying the same rate of return.

Stocks: There are numerous ways of measuring the risk of equity securities (also known simply as "equities" or "stock"). In very broad terms, the value of a stock depends on the financial health of the company issuing it. However, stock prices can be affected by many other factors including, but not limited to the class of stock (for example, preferred or common); the health of the market sector of the issuing company; and, the overall health of the economy. In general, larger, better established companies ("large cap") tend to be safer than smaller start-up companies ("small cap") are but the mere size of an issuer is not, by itself, an indicator of the safety of the investment.

Mutual Funds and Exchange Traded Funds: Mutual funds and exchange traded funds ("ETF") are professionally managed collective investment systems that pool money from many investors and invest in stocks, bonds, short-term money market instruments, other mutual funds, other securities, or any combination thereof. The fund will have a manager that trades the fund's investments in accordance with the fund's investment objective. While mutual funds and ETFs generally provide diversification, risks can be significantly increased if the fund is concentrated in a particular sector of the market, primarily invests in small cap or speculative companies, uses leverage (i.e., borrows money) to a significant degree, or concentrates in a particular type of security (i.e., equities) rather than balancing the fund with different types of securities. ETFs differ from mutual funds since they can be bought and sold throughout the day like stock and their price can fluctuate throughout the day. The returns on mutual funds and ETFs can be reduced by the costs to manage the funds. Also, while some mutual funds are "no load" and charge no fee to buy into, or sell out of, the fund, other types of mutual funds do charge such fees which can also reduce returns. Mutual funds can also be "closed end" or "open

end". So-called "open end" mutual funds continue to allow in new investors indefinitely whereas "closed end" funds have a fixed number of shares to sell which can limit their availability to new investors.

ETFs may have tracking error risks. For example, the ETF investment adviser may not be able to cause the ETF's performance to match that of its Underlying Index or other benchmark, which may negatively affect the ETF's performance. In addition, for leveraged and inverse ETFs that seek to track the performance of their Underlying Indices or benchmarks on a daily basis, mathematical compounding may prevent the ETF from correlating with performance of its benchmark. In addition, an ETF may not have investment exposure to all of the securities included in its Underlying Index, or its weighting of investment exposure to such securities may vary from that of the Underlying Index. Some ETFs may invest in securities or financial instruments that are not included in the Underlying Index, but which are expected to yield similar performance.

Leveraged Exchange Traded Funds:

Leveraged Exchange Traded Funds ("Leveraged ETFs" or "L-ETF") seeks investment results for a single day only, not for longer periods. A "single day" is measured from the time the L-ETF calculates its net asset value ("NAV") to the time of the L-ETF's next NAV calculation. The return of the L-ETF for periods longer than a single day will be the result of each day's returns compounded over the period, which will very likely differ from multiplying the return by the stated leverage for that period. For periods longer than a single day, the L-ETF will lose money when the level of the Index is flat, and it is possible that the L-ETF will lose money even if the level of the Index rises. Longer holding periods, higher index volatility and greater leverage both exacerbate the impact of compounding on an investor's returns. During periods of higher Index volatility, the volatility of the Index may affect the L-ETF's return as much as or more than the return of the Index. Leveraged ETFs are different from most exchange-traded funds in that they seek leveraged returns relative to the applicable index and only on a daily basis. The L-ETF also is riskier than similarly benchmarked exchange-traded funds that do not use leverage. Accordingly, the L-ETF may not be suitable for all investors and should be used only by knowledgeable investors who understand the potential consequences of seeking daily leveraged investment results.

Leveraged ETF Leveraged Risk: The L-ETF obtains investment exposure in excess of its assets in seeking to achieve its investment objective — a form of leverage — and will lose more money in market environments adverse to its daily objective than a similar fund that does not employ such leverage. The use of such leverage could result in the total loss of an investor's investment. For example: a 2X fund will have a multiplier of two times (2x) the Index. A single day movement in the Index approaching 50% at any point in the day could result in the total loss of a shareholder's investment if that movement is contrary to the investment objective of the L-ETF, even if the Index subsequently moves in an opposite direction, eliminating all or a portion of the earlier movement. This would be the case with any such single day movements in the Index, even if the Index maintains a level greater than zero at all times.

Leveraged ETF Compounding Risk: Compounding affects all investments, but has a more significant impact on a leveraged fund. Particularly during periods of higher Index volatility, compounding will cause results for periods longer than a single day to vary from the stated multiplier of the return of the Index. This effect becomes more pronounced as volatility increases.

Leveraged ETF Use of Derivatives: The L-ETF obtains investment exposure through derivatives. Investing in derivatives may be considered aggressive and may expose the L-ETF to greater risks than investing directly in the reference asset(s) underlying those derivatives. These risks include counterparty risk, liquidity risk and increased correlation risk (each as discussed below). When the L-ETF uses derivatives, there may be imperfect correlation between the value of the reference

asset(s) and the derivative, which may prevent the L-ETF from achieving its investment objective. Because derivatives often require only a limited initial investment, the use of derivatives also may expose the L-ETF to losses in excess of those amounts initially invested. The L-ETF may use a combination of swaps on the Index and swaps on an ETF that is designed to track the performance of the Index. The performance of an ETF may not track the performance of the Index due to embedded costs and other factors. Thus, to the extent the L-ETF invests in swaps that use an ETF as the reference asset, the L-ETF may be subject to greater correlation risk and may not achieve as high a degree of correlation with the Index as it would if the L-ETF only used swaps on the Index. Moreover, with respect to the use of swap agreements, if the Index has a dramatic intraday move that causes a material decline in the L-ETF's net assets, the terms of a swap agreement between the L-ETF and its counterparty may permit the counterparty to immediately close out the transaction with the L-ETF. In that event, the L-ETF may be unable to enter into another swap agreement or invest in other derivatives to achieve the desired exposure consistent with the L-ETF's investment objective. This, in turn, may prevent the L-ETF from achieving its investment objective, even if the Index reverses all or a portion of its intraday move by the end of the day. Any costs associated with using derivatives will also have the effect of lowering the L-ETF's return.

Commercial Paper: Commercial paper ("CP") is, in most cases, an unsecured promissory note that is issued with a maturity of 270 days or less. Being unsecured the risk to the investor is that the issuer may default. There is less risk in asset based commercial paper (ABCP). The difference between ABCP and CP is that instead of being an unsecured promissory note representing an obligation of the issuing company, ABCP is backed by securities. Therefore, the perceived quality of the ABCP depends on the underlying securities.

Variable Annuities: A variable annuity is a form of insurance where the seller or issuer (typically an insurance company) makes a series of future payments to a buyer (annuitant) in exchange for the immediate payment of a lump sum (single-payment annuity) or a series of regular payments (regular-payment annuity). The payment stream from the issuer to the annuitant has an unknown duration based principally upon the date of death of the annuitant. At this point, the contract will terminate and the remainder of the funds accumulated forfeited unless there are other annuitants or beneficiaries in the contract. Annuities can be purchased to provide an income during retirement. Unlike fixed annuities that make payments in fixed amounts or in amounts that increase by a fixed percentage, variable annuities, pay amounts that vary according to the performance of a specified set of investments, typically bond and equity mutual funds. Many variable annuities typically impose asset-based sales charges or surrender charges for withdrawals within a specified period. Variable annuities may impose a variety of fees and expenses, in addition to sales and surrender charges, such as mortality and expense risk charges; administrative fees; underlying fund expenses; and charges for special features, all of which can reduce the return. Earnings in a variable annuity do not provide all the tax advantages of 401(k)s and other before-tax retirement plans. Once the investor starts withdrawing money from their variable annuity, earnings are taxed at the ordinary income rate, rather than at the lower capital gains rates applied to other non-tax-deferred vehicles which are held for more than one year. Proceeds of most variable annuities do not receive a "step-up" in cost basis when the owner dies like stocks, bonds and mutual funds do. Some variable annuities offer "bonus credits." These are usually not free. In order to fund them, insurance companies typically impose mortality and expense charges and surrender charge periods. In an exchange of an existing annuity for a new annuity (so-called 1035 exchanges), the new variable annuity may have a lower contract value and a smaller death benefit; may impose new surrender charges or increase the period of time for which the surrender charge applies; may have higher annual fees; and provide another commission for the broker.

Real Estate: Real estate is increasingly being used as part of a long-term core strategy due to increased market efficiency and increasing concerns about the future long-term variability of stock and bond returns. In fact, real estate is known for its ability to serve as a portfolio diversifier and inflation hedge. However, the asset class still bears a considerable amount of market risk. Real estate has shown itself to be very cyclical, somewhat mirroring the ups and downs of the overall economy. In addition to employment and demographic changes, real estate is also influenced by changes in interest rates and the credit markets, which affect the demand and supply of capital and thus real estate values. Along with changes in market fundamentals, investors wishing to add real estate as part of their core investment portfolios need to look for property concentrations by area or by property type. Because property returns are directly affected by local market basics, real estate portfolios that are too heavily concentrated in one area or property type can lose their risk mitigation attributes and bear additional risk by being too influenced by local or sector market changes.

Real Estate Investment Trust: A real estate investment trust ("REIT") is a corporate entity which invests in real estate and/or engages in real estate financing. A REIT reduces or eliminates corporate income taxes. REITs can be publicly or privately held. Public REITs may be listed on public stock exchanges. REITs are required to declare 90% of their taxable income as dividends, but they actually pay dividends out of funds from operations, so cash flow has to be strong or the REIT must either dip into reserves, borrow to pay dividends, or distribute them in stock (which causes dilution). After 2012, the IRS stopped permitting stock dividends. Most REITs must refinance or erase large balloon debts periodically. The credit markets are no longer frozen, but banks are demanding, and getting, harsher terms to re-extend REIT debt. Some REITs may be forced to make secondary stock offerings to repay debt, which will lead to additional dilution of the stockholders. Fluctuations in the real estate market can affect the REIT's value and dividends.

Limited Partnerships: A limited partnership is a financial affiliation that includes at least one general partner and a number of limited partners. The partnership invests in a venture, such as real estate development or oil exploration, for financial gain. The general partner has management authority and unlimited liability. The general partner runs the business and, in the event of bankruptcy, is responsible for all debts not paid or discharged. The limited partners have no management authority and their liability is limited to the amount of their capital commitment. Profits are divided between general and limited partners according to an arrangement formed at the creation of the partnership. The range of risks are dependent on the nature of the partnership and disclosed in the offering documents if privately placed. Publicly traded limited partnership have similar risk attributes to equities. However, like privately placed limited partnerships their tax treatment is under a different tax regime from equities. You should speak to your tax adviser in regard to their tax treatment.

Warrants: A warrant is a derivative (security that derives its price from one or more underlying assets) that confers the right, but not the obligation, to buy or sell a security – normally an equity – at a certain price before expiration. The price at which the underlying security can be bought or sold is referred to as the exercise price or strike price. Warrants that confer the right to buy a security are known as call warrants; those that confer the right to sell are known as put warrants. Warrants are in many ways similar to options. The main difference between warrants and options is that warrants are issued and guaranteed by the issuing company, whereas options are traded on an exchange and are not issued by the company. Also, the lifetime of a warrant is often measured in years, while the lifetime of a typical option is measured in months. Warrants do not pay dividends or come with voting rights.

Options Contracts: Options are complex securities that involve risks and are not suitable for everyone. Option trading can be speculative in nature and carry substantial risk of loss. It is generally recommended that you only invest in options with risk capital. An option is a contract that gives the buyer the right, but not the obligation, to buy or sell an underlying asset at a specific price on or before a certain date (the "expiration date"). The two types of options are calls and puts:

A call gives the holder the right to buy an asset at a certain price within a specific period of time. Calls are similar to having a long position on a stock. Buyers of calls hope that the stock will increase substantially before the option expires.

A put gives the holder the right to sell an asset at a certain price within a specific period of time. Puts are very similar to having a short position on a stock. Buyers of puts hope that the price of the stock will fall before the option expires.

Selling options is more complicated and can be even riskier.

The option trading risks pertaining to options buyers are:

- Risk of losing your entire investment in a relatively short period of time.
- The risk of losing your entire investment increases if, as expiration nears, the stock is below the strike price of the call (for a call option) or if the stock is higher than the strike price of the put (for a put option).
- European style options which do not have secondary markets on which to sell the options prior to expiration can only realize its value upon expiration.
- Specific exercise provisions of a specific option contract may create risks.
- Regulatory agencies may impose exercise restrictions, which stops you from realizing value.

The option trading risks pertaining to options sellers are:

- Options sold may be exercised at any time before expiration.
- Covered Call traders forgo the right to profit when the underlying stock rises above the strike price of the call options sold and continues to risk a loss due to a decline in the underlying stock.
- Writers of Naked Calls risk unlimited losses if the underlying stock rises.
- Writers of Naked Puts risk substantial losses if the underlying stock drops.
- Writers of naked positions run margin risks if the position goes into significant losses. Such risks may include liquidation by the broker.
- Writers of call options could lose more money than a short seller of that stock could on the same rise on that underlying stock. This is an example of how the leverage in options can work against the option trader.
- Writers of Naked Calls are obligated to deliver shares of the underlying stock if those call options are exercised.
- Call options can be exercised outside of market hours such that effective remedy actions cannot be performed by the writer of those options.
- Writers of stock options are obligated under the options that they sold even if a trading market is not available or that they are unable to perform a closing transaction.
- The value of the underlying stock may surge or decline unexpectedly, leading to automatic exercises.

Other option trading risks are:

- The complexity of some option strategies is a significant risk on its own.
- Option trading exchanges or markets and option contracts themselves are open to changes at all times.
- Options markets have the right to halt the trading of any options, thus preventing investors from realizing value.
- Risk of erroneous reporting of exercise value.

- If an options brokerage firm goes insolvent, investors trading through that firm may be affected.
- Internationally traded options have special risks due to timing across borders.

Risks that are not specific to options trading include market risk, sector risk and individual stock risk. Option trading risks are closely related to stock risks, as stock options are a derivative of stocks.

PIPES: In a Private Investment in Public Equity ("PIPE") transaction, investors typically purchase securities directly from a publicly traded company in a private placement. Depending on the structure of the transaction, this can be done at a premium to or at a discount from the market price of the company's common stock. Because the sale of the securities is not pre-registered with the U.S. Securities and Exchange Commission ("SEC"), the securities are "restricted" and cannot be immediately resold by the investors into the public markets. Accordingly, the company will usually agree as part of the PIPE transaction to register the restricted securities with the SEC. Thus, the PIPE transaction can offer the company the speed and predictability of a private placement, while providing investors with a nearly liquid security. Risks of investing in PIPES include but may not be limited to substantial entry requirements, limited liquidity, limited investor control, potential for unfunded commitments, and loss of investment.

Derivatives: Derivatives are types of investments where the investor does not own the underlying asset. There are many different types of derivative instruments, including, but not limited to, options, swaps, futures, and forward contracts. Derivatives have numerous uses as well as various risks associated with them, but they are generally considered an alternative way to participate in the market. Investors typically use derivatives for three reasons: to hedge a position, to increase leverage, or to speculate on an asset's movement. The key to making a sound investment is to fully understand the characteristics and risks associated with the derivative, including, but not limited to counter-party, underlying asset, price, and expiration risks. The use of a derivative only makes sense if the investor is fully aware of the risks and understands the impact of the investment within a portfolio strategy. Due to the variety of available derivatives and the range of potential risks, a detailed explanation of derivatives is beyond the scope of this disclosure.

Structured Products: A structured product, also known as a market-linked product, is generally a pre-packaged investment strategy based on derivatives, such as a single security, a basket of securities, options, indices, commodities, debt issuances, and/or foreign currencies, and to a lesser extent, swaps. Structured products are usually issued by investment banks or affiliates thereof. They have a fixed maturity, and have two components: a note and a derivative. The derivative component is often an option. The note provides for periodic interest payments to the investor at a predetermined rate, and the derivative component provides for the payment at maturity. Some products use the derivative component as a put option written by the investor that gives the buyer of the put option the right to sell to the investor the security or securities at a predetermined price. Other products use the derivative component to provide for a call option written by the investor that gives the buyer of the call option the right to buy the security or securities from the investor at a predetermined price. A feature of some structured products is a "principal guarantee" function, which offers protection of principal if held to maturity. However, these products are not always Federal Deposit Insurance Corporation insured; they may only be insured by the issuer, and thus have the potential for loss of principal in the case of a liquidity crisis, or other solvency problems with the issuing company. Investing in structured products involves a number of risks including but not limited to: fluctuations in the price, level or yield of underlying instruments, interest rates, currency values and credit quality; substantial loss of principal; limits on participation in any appreciation of the underlying instrument; limited liquidity; credit risk of the issuer; conflicts of interest; and, other events that are difficult to predict.

Digital Assets: Generally refers to an asset that is issued and/or transferred using distributed ledger or blockchain technology, including, "virtual currencies (also known as crypto-currencies)," "coins," and "tokens". We may invest in and/or advise clients on the purchase or sale of digital assets. This advice or investment may be in actual digital coins/tokens/currencies or via investment vehicles such as exchange traded funds (ETFs) or separately managed accounts (SMAs). The investment characteristics of Digital Assets generally differ from those of traditional securities, currencies, commodities. Digital Assets are not backed by a central bank or a national, international organization, any hard assets, human capital, or other form of credit and are relatively new to the market place. Rather, Digital Assets are market-based: a Digital Asset's value is determined by (and fluctuates often, according to) supply and demand factors, its adoption in the traditional commerce channels, and/or the value that various market participants place on it through their mutual agreement or transactions. The lack of history to these types of investments entail certain unknown risks, are very speculative and are not appropriate for all investors.

Price Volatility of Digital Assets Risk: A principal risk in trading Digital Assets is the rapid fluctuation of market price. The value of client portfolios relates in part to the value of the Digital Assets held in the client portfolio and fluctuations in the price of Digital Assets could adversely affect the value of a client's portfolio. There is no guarantee that a client will be able to achieve a better than average market price for Digital Assets or will purchase Digital Assets at the most favorable price available. The price of Digital Assets achieved by a client may be affected generally by a wide variety of complex factors such as supply and demand; availability and access to Digital Asset service providers (such as payment processors), exchanges, miners or other Digital Asset users and market participants; perceived or actual security vulnerability; and traditional risk factors including inflation levels; fiscal policy; interest rates; and political, natural and economic events.

Digital Asset Service Providers Risk: Service providers that support Digital Assets and the Digital Asset marketplace(s) may not be subject to the same regulatory and professional oversight as traditional securities service providers. Further, there is no assurance that the availability of and access to virtual currency service providers will not be negatively affected by government regulation or supply and demand of Digital Assets. Accordingly, companies or financial institutions that currently support virtual currency may not do so in the future.

Custody of Digital Assets Risk: Under the Advisers Act, SEC registered investment advisers are required to hold securities with "qualified custodians," among other requirements. Certain Digital Assets may be deemed to be securities. Some Digital Assets do not currently fall under the SEC definition of security and therefore many of the companies providing Digital Assets custodial services fall outside of the SEC's definition of "qualified custodian". Accordingly, clients seeking to purchase actual digital coins/tokens/currencies may need to use nonqualified custodians to hold all or a portion of their Digital Assets.

Government Oversight of Digital Assets Risk: Regulatory agencies and/or the constructs responsible for oversight of Digital Assets or a Digital Asset network may not be fully developed and subject to change. Regulators may adopt laws, regulations, policies or rules directly or indirectly affecting Digital Assets their treatment, transacting, custody, and valuation.

Item 9 Disciplinary Information

We are required to disclose the facts of any legal or disciplinary events that are material to a client's evaluation of our advisory business or the integrity of our management. We do not have any required disclosures under this item.

Item 10 Other Financial Industry Activities and Affiliations

We have not provided information on other financial industry activities and affiliations because we do not have any relationship or arrangement that is material to our advisory business or to our clients with any of the types of entities listed below.

1. broker-dealer, municipal securities dealer, or government securities dealer or broker;
2. investment company or other pooled investment vehicle (including a mutual fund, closed-end investment company, unit investment trust, private investment company or "hedge fund," and offshore fund);
3. other investment adviser or financial planner;
4. futures commission merchant, commodity pool operator, or commodity trading adviser;
5. banking or thrift institution;
6. accountant or accounting firm;
7. lawyer or law firm;
8. insurance company or agency;
9. pension consultant;
10. real estate broker or dealer; and/or
11. sponsor or syndicator of limited partnerships.

Recommendation of Other Advisers

We may recommend that you use a third party money manager ("TPMM") based on your needs and suitability. We will receive compensation from the TPMM for recommending that you use their services. These compensation arrangements present a conflict of interest because we have a financial incentive to recommend the services of the third party adviser. You are not obligated, contractually or otherwise, to use the services of any TPMM we recommend. We do not have any other business relationships with the recommended TPMM(s). Refer to the *Advisory Business* section above for additional disclosures on this topic.

Item 11 Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

Description of Our Code of Ethics

We strive to comply with applicable laws and regulations governing our practices. Therefore, our Code of Ethics includes guidelines for professional standards of conduct for persons associated with our firm. Our goal is to protect your interests at all times and to demonstrate our commitment to our fiduciary duties of honesty, good faith, and fair dealing with you. All persons associated with our firm are expected to adhere strictly to these guidelines. Persons associated with our firm are also required to report any violations of our Code of Ethics. Additionally, we maintain and enforce written policies reasonably designed to prevent the misuse or dissemination of material, non-public information about you or your account holdings by persons associated with our firm.

Clients or prospective clients may obtain a copy of our Code of Ethics by contacting us at the telephone number on the cover page of this brochure.

Participation or Interest in Client Transactions

Neither our firm nor any persons associated with our firm has any material financial interest in client transactions beyond the provision of investment advisory services as disclosed in this brochure.

Item 12 Brokerage Practices

We recommend the brokerage and custodial services of TD Ameritrade ("TD Ameritrade") and LPL Financial LLC ("LPL") (whether one or more "Custodian"). Your assets must be maintained in an account at a "qualified custodian," generally a broker-dealer or bank. TD Ameritrade and LPL are members of FINRA/SIPC and are SEC-registered broker-dealers. In recognition of the value of the services the Custodian provides, you may pay higher commissions and/or trading costs than those that may be available elsewhere. Our selection of custodian is based on many factors, including the level of services provided, the custodian's financial stability, and the cost of services provided by the custodian to our clients, which includes the yield on cash sweep choices, commissions, custody fees and other fees or expenses.

We seek to recommend a custodian/broker that will hold your assets and execute transactions on terms that are, overall, the most favorable compared to other available providers and their services. We consider various factors, including:

- Capability to buy and sell securities for your account itself or to facilitate such services.
- The likelihood that your trades will be executed.
- Availability of investment research and tools.
- Overall quality of services.
- Competitiveness of price.
- Reputation, financial strength, and stability.
- Existing relationship with our firm and our other clients.

Research and Other Soft Dollar Benefits

We do not have any soft dollar arrangements.

Economic Benefits

As a registered investment adviser, we have access to the institutional platform of your account custodian. As such, we will also have access to research products and services from your account custodian and/or other brokerage firm. These products may include financial publications, information about particular companies and industries, research software, and other products or services that provide lawful and appropriate assistance to our firm in the performance of our investment decision-making responsibilities. Such research products and services are provided to all investment advisers that utilize the institutional services platforms of these firms, and are not considered to be paid for with soft dollars. However, you should be aware that the commissions charged by a particular broker for a particular transaction or set of transactions may be greater than the amounts another broker who did not provide research services or products might charge.

TD Ameritrade Institutional

We participate in the institutional adviser program (the "Program") offered by TD Ameritrade Institutional. TD Ameritrade Institutional is a division of TD Ameritrade Inc., member FINRA/SIPC ("TD Ameritrade"), an unaffiliated SEC-registered broker-dealer and FINRA member. TD Ameritrade offers to independent investment advisers services which include custody of securities, trade execution, clearance and settlement of transactions. We receive some benefits from TD Ameritrade through our participation in the Program.

As disclosed above, we participate in TD Ameritrade's institutional customer program and we may recommend TD Ameritrade to you for custody and brokerage services. There is no direct link between our participation in the Program and the investment advice we give you, although we receive economic benefits through our participation in the Program that are typically not available to TD Ameritrade retail investors. These benefits include the following products and services (provided without cost or at a

discount): receipt of duplicate Client statements and confirmations; research related products and tools; consulting services; access to a trading desk serving our participants; access to aggregated trading (which provides the ability to aggregate securities transactions for execution and then allocate the appropriate shares to your accounts); the ability to have advisory fees deducted directly from your accounts; access to an electronic communications network for order entry and account information; access to mutual funds with no transaction fees and to certain institutional money managers; and discounts on compliance, marketing, research, technology, and practice management products or services provided to us by third party vendors. TD Ameritrade may also have paid for business consulting and professional services received by our related persons. Some of the products and services made available by TD Ameritrade through the Program may benefit us but may not benefit your accounts. These products or services may assist us in managing and administering your accounts, including accounts not maintained at TD Ameritrade. Other services made available by TD Ameritrade are intended to help us manage and further develop our business enterprise. The benefits received by us or our personnel through participation in the Program do not depend on the amount of brokerage transactions directed to TD Ameritrade. As part of our fiduciary duties to you, we endeavor at all times to put your interests first. You should be aware, however, that the receipt of economic benefits by us or our related persons in and of itself creates a potential conflict of interest and may indirectly influence our choice of TD Ameritrade for custody and brokerage services.

Brokerage for Client Referrals

We do not receive client referrals from broker-dealers in exchange for cash or other compensation, such as brokerage services or research.

Directed Brokerage

We routinely require that you direct our firm to execute transactions through TD Ameritrade or LPL. As such, we may be unable to achieve the most favorable execution of your transactions and you may pay higher brokerage commissions than you might otherwise pay through another broker-dealer that offers the same types of services. Not all advisers require their clients to direct brokerage.

Aggregated Trades

We combine multiple orders for shares of the same securities purchased for discretionary advisory accounts we manage (this practice is commonly referred to as "aggregated trading"). We will then distribute a portion of the shares to participating accounts in a fair and equitable manner. Generally, participating accounts will pay a fixed transaction cost regardless of the number of shares transacted. In certain cases, each participating account pays an average price per share for all transactions and pays a proportionate share of all transaction costs on any given day. In the event an order is only partially filled, the shares will be allocated to participating accounts in a fair and equitable manner, typically in proportion to the size of each client's order. Accounts owned by our firm or persons associated with our firm may participate in aggregated trading with your accounts; however, they will not be given preferential treatment.

We do not aggregate trades for non-discretionary accounts. Accordingly, non-discretionary accounts may pay different costs than discretionary accounts pay. If you enter into non-discretionary arrangements with our firm, we may not be able to buy and sell the same quantities of securities for you and you may pay higher commissions, fees, and/or transaction costs than clients who enter into discretionary arrangements with our firm.

Mutual Fund Share Classes

Mutual funds are sold with different share classes, which carry different cost structures. Each available share class is described in the mutual fund's prospectus. When we purchase, or recommend the purchase of, mutual funds for a client, we select the share class that is deemed to be in the client's best interest, taking into consideration cost, tax implications, and other factors. When the fund is

available for purchase at net asset value, we will purchase, or recommend the purchase of, the fund at net asset value. We also review the mutual funds held in accounts that come under our management to determine whether a more beneficial share class is available, considering cost, tax implications, and the impact of contingent deferred sales charges.

Item 13 Review of Accounts

Thomas Dundorf and Robert Dye will monitor your accounts on an ongoing basis and will conduct account reviews at least annually, to ensure the advisory services provided to you are consistent with your investment needs and objectives. Additional reviews may be conducted based on various circumstances, including, but not limited to:

- contributions and withdrawals;
- year-end tax planning;
- market moving events;
- security specific events; and/or
- changes in your risk/return objectives.

The individuals conducting reviews may vary from time to time, as personnel join or leave our firm.

We will not provide you with regular written reports. You will receive trade confirmations and monthly or quarterly statements from your account custodian(s).

Thomas Dundorf, Nathan Fulks, and Robert Dye will review financial plans as needed, depending on the arrangements made with you at the inception of your advisory relationship to ensure that the advice provided is consistent with your investment needs and objectives. Generally, we will contact you periodically to determine whether any updates may be needed based on changes in your circumstances. Changed circumstances may include, but are not limited to marriage, divorce, birth, death, inheritance, lawsuit, retirement, job loss and/or disability, among others. We recommend meeting with you at least annually to review and update your plan if needed. Additional reviews will be conducted upon your request. Such reviews and updates may be subject to our then current hourly rate. We will not provide regular written reports for financial planning and consulting services. If you implement financial planning advice, you will receive trade confirmations and monthly or quarterly statements from relevant custodians.

Item 14 Client Referrals and Other Compensation

TD Ameritrade Institutional Customer Program

As disclosed above under *Item 12 Brokerage Practices*, we participate in TD Ameritrade's Institutional Customer Program ("Institutional Program") and we may recommend TD Ameritrade to clients for custodial and brokerage services. There is no direct link between our participation in the program and the investment advice we give to our clients, although we receive economic benefits through our participation in the program that are typically not available to TD Ameritrade retail investors. These benefits include the following products and services (provided without cost or at a discount): receipt of duplicate client statements and confirmations; research related products and tools; consulting services; access to a trading desk serving adviser participants; access to aggregated trading (which provides the ability to aggregate securities transactions for execution and then allocate the appropriate shares to client accounts); the ability to have advisory fees deducted directly from client accounts; access to an electronic communications network for client order entry and account information; access to mutual funds with no transaction fees and to certain institutional money managers; and discounts on compliance, marketing, research, technology, and practice management products or services provided to our firm by third party vendors. TD Ameritrade may also have paid for

business consulting and professional services received by our Associated Persons. Some of the products and services made available by TD Ameritrade through the program may benefit our firm but may not benefit our client accounts. These products or services may assist us in managing and administering client accounts, including accounts not maintained at TD Ameritrade. Other services made available by TD Ameritrade are intended to help us manage and further develop our business enterprise. The benefits received by our Firm or our Associated Persons through participation in the program do not depend on the amount of brokerage transactions directed to TD Ameritrade. As part of our fiduciary duties to our clients, we endeavor at all times to put the interests of our clients first. Clients should be aware, however, that the receipt of economic benefits by our firm or our Associated Persons in and of themselves creates a potential conflict of interest and may indirectly influence our choice of TD Ameritrade for custody and brokerage services.

We directly compensate non-employee (outside) consultants, individuals, and/or entities (solicitors) for client referrals. We compensate them based on a flat monthly fee or by paying them a one-time fixed fee for each referral they send us. In order to receive a cash referral fee from us, solicitors must comply with the requirements of the jurisdictions in which they operate. If you were referred to us by a solicitor, you should have received a copy of this brochure along with the solicitor's disclosure statement at the time of the referral. You will not pay additional fees because of this referral arrangement.

Solicitors that refer business to more than one investment adviser may have a financial incentive to recommend advisers with more favorable compensation arrangements. We request that our solicitors disclose to you whether multiple referral relationships exist and that comparable services may be available from other advisers for lower fees and/or where the solicitor's compensation is less favorable.

Employees are paid a onetime incentive bonus for new client relationships. You will not be charged additional fees based on this compensation arrangement. Incentive based compensation is contingent upon you entering into an advisory agreement with us. Therefore, the individual has a financial incentive to recommend us to you for advisory services. This creates a conflict of interest; however, you are not obligated to retain our firm for advisory services. Comparable services and/or lower fees may be available through other firms.

We do not receive any compensation from any third party in connection with providing investment advice to you nor do we compensate any individual or firm for client referrals.

Refer to the *Brokerage Practices* section above for disclosures on research and other benefits we may receive resulting from our relationship with your account custodian.

Item 15 Custody

Your independent custodian will directly debit your account(s) for the payment of our advisory fees. This ability to deduct our advisory fees from your accounts causes our firm to exercise limited custody over your funds or securities. We do not have physical custody of any of your funds and/or securities. Your funds and securities will be held with a bank, broker-dealer, or other qualified custodian. You will receive account statements from the qualified custodian(s) holding your funds and securities at least quarterly. The account statements from your custodian(s) will indicate the amount of our advisory fees deducted from your account(s) each billing period. You should carefully review account statements for accuracy.

We are not affiliated with the custodian. The custodian does not supervise our firm, person affiliated with our firm or activities.

Item 16 Investment Discretion

Before we can buy or sell securities on your behalf, you must first sign our discretionary management agreement and the appropriate trading authorization forms.

Item 17 Voting Client Securities

We will not vote proxies on behalf of your advisory accounts. At your request, we may offer you advice regarding corporate actions and the exercise of your proxy voting rights. If you own shares of applicable securities, you are responsible for exercising your right to vote as a shareholder.

In most cases, you will receive proxy materials directly from the account custodian. However, in the event we were to receive any written or electronic proxy materials, we would forward them directly to you by mail, unless you have authorized our firm to contact you by electronic mail, in which case, we would forward any electronic solicitations to vote proxies.

Item 18 Financial Information

Our firm does not have any financial condition or impairment that would prevent us from meeting our contractual commitments to you. We do not take physical custody of client funds or securities, or serve as trustee or signatory for client accounts, and, we do not require the prepayment of more than \$1,200 in fees six or more months in advance. Therefore, we are not required to include a financial statement with this brochure.

We have not filed a bankruptcy petition at any time in the past ten years.

Item 19 Requirements for State-Registered Advisers

We are a federally registered investment adviser; therefore, we are not required to respond to this item.

Item 20 Additional Information

Trade Errors

In the event a trading error occurs in your account, our policy is to restore your account to the position it should have been in had the trading error not occurred. Depending on the circumstances, corrective actions may include canceling the trade, adjusting an allocation, and/or reimbursing the account.

Class Action Lawsuits

We do not determine if securities held by you are the subject of a class action lawsuit or whether you are eligible to participate in class action settlements or litigation nor do we initiate or participate in litigation to recover damages on your behalf for injuries as a result of actions, misconduct, or negligence by issuers of securities held by you.
