Description of Our Services

Shilanski & Associates, Inc. ("SAAI" or the "Firm") was formed in 1981 and its registration as an Investment Adviser was granted by the State of Alaska on January 18, 1990. Floyd Lee Shilanski owns thirty-nine (39%) percent of the equity of SAAI and is the President. Rosa Carlene Shilanski is also a forty (40%) percent shareholder of the equity of SAAI and is its Vice President. SAAI is not publicly owned or traded. There are no indirect owners of SAAI.

We offer wrap fee programs as described in this Wrap Fee Program Brochure. Our wrap fee accounts are managed on an individualized basis according to the client's investment objectives, financial goals, risk tolerance, etc.

Types of Advisory Services

Investment Management Services

Our Investment Management Service encompasses asset management as well as providing financial planning/financial consulting to clients. It is designed to assist clients in meeting their financial goals through the use of financial investments. We conduct at least one, but sometimes more than one meeting (in person if possible, otherwise via telephone conference) with clients in order to understand their current financial situation, existing resources, financial goals, and tolerance for risk. Based on what we learn, we propose an investment approach to the client. We may propose an investment portfolio, consisting of exchange traded funds, mutual funds, individual stocks or bonds, or other securities. Upon the client's agreement to the proposed investment plan, we work with the client to establish or transfer investment accounts so that we can manage the client's portfolio. Once the relevant accounts are under our management, we review such accounts on a regular basis and at least quarterly. We may periodically rebalance or adjust client accounts under our management. If the client experiences any significant changes to his/her financial or personal circumstances, the client must notify us so that we can consider such information in managing the client's investments.

Additional Bundled Service Cost Considerations

A wrap fee program allows our clients to pay a specified fee for investment advisory services and the execution of transactions. The advisory services may include portfolio management and the fee is not based directly upon transactions in your account. Your fee is bundled with our costs for executing transactions in your account(s). This results in a higher advisory fee to you. We do not charge our clients higher advisory fees based on their trading activity and we pay the broker/dealer a fee based on the percentage of assets in the account, not on a per-trade basis so that we are not incentivized to limit our trading activities in your account(s). By participating in a wrap fee program, you may end up paying more or less than you would through a non-wrap fee program where a lower advisory fee is charged, but trade execution costs are passed directly through to you by the executing broker. Because our wrap fees are not tied to an account's frequency of trading and apply generally to all assets in the account, this fee arrangement is not appropriate for all accounts. For example, a wrap fee

agreement would not be appropriate for an account that holds primarily cash and cash equivalents, fixed income securities or no-transaction-fee mutual funds for a substantial period of time.

Effective October 7, 2019, Schwab has eliminated commissions for online trades of U.S. equities, ETFs and options (subject to \$0.65 per contract fee). We encourage clients to review Schwab's pricing to compare the total costs of entering into a wrap fee arrangement versus a non-wrap arrangement. Clients will still incur commissions and fees for certain types of transactions in a non-wrap fee arrangement. To see what they would pay for transactions in a non-wrap account they will need to refer to Schwab's most recent pricing schedules available at www.schwab.com/aspricingguide.

Charles Schwab & Co., Inc.

For wrap accounts, SAAI requires that clients establish brokerage accounts with the Schwab Advisor Services division of Charles Schwab & Co., Inc. (Schwab), a registered broker-dealer, member SIPC, to maintain custody of clients' assets and to effect trades for their accounts. The final decision to custody assets with Schwab is at the discretion of the Client, including those accounts under ERISA or IRA rules and regulations, in which case the client is acting as either the plan sponsor or IRA account holder. SAAI is independently owned and operated and not affiliated with Schwab. Schwab provides SAAI with access to its institutional trading and custody services, which are typically not available to Schwab retail investors. These services generally are available to independent investment advisors on an unsolicited basis, at no charge to them so long as a total of at least \$10 million of the advisor's clients' assets are maintained in accounts at Schwab Advisor Services. Schwab's services include brokerage services that are related to the execution of securities transactions, custody, research, including that in the form of advice, analyses and reports, and access to mutual funds and other investments that are otherwise generally available only to institutional investors or would require a significantly higher minimum initial investment.

For SAAI client accounts maintained in its custody, Schwab generally does not charge separately for custody services but is compensated by account holders through commissions or other transaction-related or asset-based fees for securities trades that are executed through Schwab or that settle into Schwab accounts.

Schwab also makes available to SAAI other products and services that benefit SAAI but may not benefit its clients' accounts. These benefits may include national, regional or SAAI specific educational events organized and/or sponsored by Schwab Advisor Services. Other potential benefits may include occasional business entertainment of personnel of SAAI by Schwab Advisor Services personnel, including meals, invitations to sporting events, including golf tournaments, and other forms of entertainment, some of which may accompany educational opportunities. Other of these products and services assist SAAI in managing and administering clients' accounts. These include software and other technology (and related technological training) that provide access to client account data (such as trade confirmations and account statements), facilitate trade execution (and allocation of aggregated trade orders for multiple client accounts), provide research, pricing information and other market data, facilitate payment of SAAI's fees from its clients' accounts, and assist with back-office training and support functions, recordkeeping and client reporting. Many of these services generally may be used to service all or some substantial number of SAAI's accounts, including accounts not maintained at Schwab Advisor Services. Schwab Advisor Services also makes available to SAAI other services intended to help SAAI

manage and further develop its business enterprise. These services may include professional compliance, legal and business consulting, publications and conferences on practice management, information technology, business succession, regulatory compliance, employee benefits providers, human capital consultants, insurance and marketing. In addition, Schwab may make available, arrange and/or pay vendors for these types of services rendered to SAAI by independent third parties. Schwab Advisor Services may discount or waive fees it would otherwise charge for some of these services or pay all or a part of the fees of a third-party providing these services to SAAI. While, as a fiduciary, SAAI endeavors to act in its clients' best interests, and their recommendation that clients maintain their assets in accounts at Schwab may be based in part on the benefit to SAAI of the availability of some of the foregoing products and services and other arrangements and not solely on the nature, cost or quality of custody and brokerage services provided by Schwab, which may create a potential conflict of interest.

Additional Expenses Not Included in the Wrap Program Fee

You may pay custodial fees, charges imposed directly by a mutual fund, index fund, or exchange traded fund which shall be disclosed in the fund's prospectus (i.e., fund management fees and other fund expenses), mark-ups and mark-downs, spreads paid to market makers, wire transfer fees and other fees and taxes on brokerage accounts and securities transactions. These fees are not included within the wrap-fee you are charged by our firm.

Compensation

Our standard advisory fee is a flat fee and based on the market value of the assets under management and, dependent on the needs of the client, can range between an annual rate of 0.00% and 2.0% and is an all-inclusive wrap fee which includes charges for advisory services, custody, clearing, transaction execution and account reporting. The annual fees are negotiable and are pro-rated and paid in advance on a quarterly basis. No increase in the annual fee shall be effective without agreement from the client by signing a new agreement or amendment to their current advisory agreement.

Advisory fees are directly debited from client accounts. Accounts initiated or terminated during a calendar quarter will be charged a pro-rated fee based on the amount of time remaining in the billing period. An account may be terminated with written notice at least 30 calendar days in advance. Upon termination of the account, any unearned fee will be refunded to the client.

Item 5: Account Requirements and Types of Clients

We provide investment management services to individuals, pension and profit sharing plans, charitable organizations, corporations and other business entities. We do not have a minimum account size requirement.

Item 6: Portfolio Manager Selection and Evaluation

Outside Portfolio Managers

We may hire outside Portfolio Managers as part of the Wrap Program. In selecting our outside Portfolio Manager, we evaluate their models and how it would work with our clients' goals. We then recommend the exact model that is appropriate for that client.

We currently utilize Envestnet Asset Management, Inc. ("Envestnet") as an outside manager. SAAI charges its clients between 1.5% and 2.0% and, out of these fees, SAAI then pays Envestnet 0% to 2% of the fee depending on the product.

Shilanski & Associates, Inc. Portfolio Managers

Our firm and its related persons, Floyd, Micah, and Ed Hoyt, act as portfolio managers for the wrap fee program previously described in this Wrap Fee Program Brochure. This may create a conflict of interest in that other investment advisory firms may charge the same or lower fees than our firm for similar services.

Advisory Business

See Item 4 of this Wrap Fee Program Brochure for information about our wrap fee advisory programs.

Individual Tailoring of Advice to Clients

We offer individualized investment advice to clients.

Ability of Clients to Impose Restrictions on Investing in Certain Securities or Types of Securities

We do allow clients to impose reasonable restrictions on investing in certain securities or types of securities.

Participation in Wrap Fee Programs

Our wrap fee and non-wrap fee accounts are managed on an individualized basis according to the client's investment objectives, financial goals, risk tolerance, etc. We do not manage wrap fee accounts in a different fashion than non-wrap fee accounts.

Performance-based fees and side-by-side management

We do not charge performance-based fees.

Methods of Analysis, Investment Strategies and Risk of Loss

Our primary methods of investment analysis are fundamental, technical, cyclical and charting analysis.

Fundamental analysis involves analyzing individual companies and their industry groups, such as a company's financial statements, details regarding the company's product line, the experience, and expertise of the company's management, and the outlook for the company's industry. The resulting data is used to measure the true value of the company's stock compared to the current market value. The risk of fundamental analysis is that information obtained may be incorrect and the analysis may not provide an accurate estimate of earnings, which may be the basis for a stock's value. If securities prices adjust rapidly to new information, utilizing fundamental analysis may not result in favorable performance.

Technical analysis involves using chart patterns, momentum, volume, and relative strength in an effort to pick sectors that may outperform market indices. However, there is no assurance of accurate forecasts or that trends will develop in the markets we follow. In the past, there have been periods without discernible trends and similar periods will presumably occur in the future. Even where major trends develop, outside factors like government intervention could potentially shorten them.

Furthermore, one limitation of technical analysis is that it requires price movement data, which can translate into price trends sufficient to dictate a market entry or exit decision. In a trendless or erratic market, a technical method may fail to identify trends requiring action. In addition, technical methods may overreact to minor price movements, establishing positions contrary to overall price trends, which may result in losses. Finally, a technical trading method may under-perform other trading methods when fundamental factors dominate price moves within a given market.

Cyclical analysis is a type of technical analysis that involves evaluating recurring price patterns and trends based upon business cycles. Economic/business cycles may not be predictable and may have many fluctuations between long term expansions and contractions. The lengths of economic cycles may be difficult to predict with accuracy and therefore the risk of cyclical analysis is the difficulty in predicting economic trends and consequently the changing value of securities that would be affected by these changing trends.

Material Risks Involved

All investing strategies we offer involve risk and may result in a loss of your original investment which you should be prepared to bear. Many of these risks apply equally to stocks, bonds, commodities and any other investment or security. Material risks associated with our investment strategies are listed below.

Market Risk: Market risk involves the possibility that an investment's current market value will fall because of a general market decline, reducing the value of the investment regardless of the operational success of the issuer's operations or its financial condition.

Strategy Risk: The Adviser's investment strategies and/or investment techniques may not work as intended.

Small and Medium Cap Company Risk: Securities of companies with small and medium market capitalizations are often more volatile and less liquid than investments in larger companies. Small and medium cap companies may face a greater risk of business failure, which could increase the volatility of the client's portfolio.

Turnover Risk: At times, the strategy may have a portfolio turnover rate that is higher than other strategies. A high portfolio turnover would result in correspondingly greater brokerage commission expenses and may result

in the distribution of additional capital gains for tax purposes. These factors may negatively affect the account's performance.

Limited markets: Certain securities may be less liquid (harder to sell or buy) and their prices may at times be more volatile than at other times. Under certain market conditions we may be unable to sell or liquidate investments at prices we consider reasonable or favorable or find buyers at any price.

Concentration Risk: Certain investment strategies focus on particular asset-classes, industries, sectors or types of investment. From time to time these strategies may be subject to greater risks of adverse developments in such areas of focus than a strategy that is more broadly diversified across a wider variety of investments.

Interest Rate Risk: Bond (fixed income) prices generally fall when interest rates rise, and the value may fall below par value or the principal investment. The opposite is also generally true: bond prices generally rise when interest rates fall. In general, fixed income securities with longer maturities are more sensitive to these price changes. Most other investments are also sensitive to the level and direction of interest rates.

Legal or Legislative Risk: Legislative changes or Court rulings may impact the value of investments, or the securities' claim on the issuer's assets and finances.

Inflation: Inflation may erode the buying-power of your investment portfolio, even if the dollar value of your investments remains the same.

Risks Associated with Securities

Apart from the general risks outlined above which apply to all types of investments, specific securities may have other risks.

Commercial Paper is, in most cases, an unsecured promissory note that is issued with a maturity of 270 days or less. Being unsecured the risk to the investor is that the issuer may default.

Common stocks may go up and down in price quite dramatically, and in the event of an issuer's bankruptcy or restructuring could lose all value. A slower-growth or recessionary economic environment could have an adverse effect on the price of all stocks.

Corporate Bonds are debt securities to borrow money. Generally, issuers pay investors periodic interest and repay the amount borrowed either periodically during the life of the security and/or at maturity. Alternatively, investors can purchase other debt securities, such as zero-coupon bonds, which do not pay current interest, but rather are priced at a discount from their face values and their values accrete over time to face value at maturity. The market prices of debt securities fluctuate depending on such factors as interest rates, credit quality, and maturity. In general, market prices of debt securities decline when interest rates rise and increase when interest rates fall. The longer the time to a bond's maturity, the greater its interest rate risk.

Bank Obligations including bonds and certificates of deposit may be vulnerable to setbacks or panics in the banking industry. Banks and other financial institutions are greatly affected by interest rates and may be adversely affected by downturns in the U.S. and foreign economies or changes in banking regulations.

Municipal Bonds are debt obligations generally issued to obtain funds for various public purposes, including the construction of public facilities. Municipal bonds pay a lower rate of return than most other types of bonds.

However, because of a municipal bond's tax-favored status, investors should compare the relative after-tax return to the after-tax return of other bonds, depending on the investor's tax bracket. Investing in municipal bonds carries the same general risks as investing in bonds in general. Those risks include interest rate risk, reinvestment risk, inflation risk, market risk, call or redemption risk, credit risk, and liquidity and valuation risk.

Investment Companies Risk. When a client invests in open end mutual funds or ETFs, the client indirectly bears its proportionate share of any fees and expenses payable directly by those funds. Therefore, the client will incur higher expenses, many of which may be duplicative. In addition, the client's overall portfolio may be affected by losses of an underlying fund and the level of risk arising from the investment practices of an underlying fund (such as the use of derivatives). ETFs are also subject to the following risks: (i) an ETF's shares may trade at a market price that is above or below their net asset value; (ii) the ETF may employ an investment strategy that utilizes high leverage ratios; or (iii) trading of an ETF's shares may be halted if the listing exchange's officials deem such action appropriate, the shares are de-listed from the exchange, or the activation of market-wide "circuit breakers" (which are tied to large decreases in stock prices) halts stock trading generally. The Adviser has no control over the risks taken by the underlying funds in which client's invest.

Voting Client Securities

We do not vote Client proxies. Therefore, Clients maintain exclusive responsibility for: (1) voting proxies, and (2) acting on corporate actions pertaining to the Client's investment assets. The Client shall instruct the Client's qualified custodian to forward to the Client copies of all proxies and shareholder communications relating to the Client's investment assets. If the client would like our opinion on a particular proxy vote, they may contact us at the number listed on the cover of this brochure.

In most cases, you will receive proxy materials directly from the account custodian. However, in the event we were to receive any written or electronic proxy materials, we would forward them directly to you by mail, unless you have authorized our firm to contact you by electronic mail, in which case, we would forward you any electronic solicitation to vote proxies.

Item 7: Client Information Provided to Portfolio Manager

We are required to describe the information about you that we communicate to your portfolio managers, and how often or under what circumstances we provide updated information. Our firm communicates with your portfolio managers on a regular basis as needed (daily, weekly, monthly, etc.) to ensure your most current investment goals and objectives are understood by your portfolio manager(s). In most cases, we will communicate such information as part of our regular investment management duties. Nevertheless, we will also communicate information to your portfolio manager(s) when you ask us to, when market or economic conditions make it prudent to do so, etc.

Item 8: Client Contact with Portfolio Manager

Our clients may directly contact their portfolio managers with questions or concerns by calling the number on this Brochure.

Item 9: Additional Information

Disciplinary Information

We have nothing to report.

Other Financial Industry Activities and Affiliations

Jamie Shilanski, Investment Advisor Representative of SAAI is also a Registered Representative of Cetera Advisor Networks LLC "Cetera". She may recommend securities, or insurance products offered through Cetera, and other insurance companies. Compensation received through her acting as Registered Representative of Cetera does not offset any advisory fees collected under SAAI. SAAI's principals, Floyd L. Shilanski, Jamie Shilanski and Micah Shilanski devote time to speaking, writing books and educating the industry in practice management procedures. Books written by Micah and Floyd Shilanski have been self-produced and self-published, though only Micah Shilanski's book is currently available for purchase.

Shilanski Family 2001 Limited Liability Company was created for personal estate and business planning for Floyd, Rosa, Micah and Jamie Shilanski. Floyd Shilanski is also part-owner of an airplane hangar located at Big Lake, Alaska. This hangar is co-owned with a SAAI client and is subleased to pilots for airplane storage.

Some of the advisors of our firm are licensed with several life, health, disability, and other insurance companies. We may recommend insurance products offered by these companies. If our clients purchase these products through us, we receive the normal commissions. Thus, a potential conflict of interest exists between our interests and those of our advisory clients. The client is under no obligation to purchase products we recommend or to purchase products either through us or through these insurance companies. From time to time the affiliates may receive overrides from insurance companies. SAAI also receives insurance commissions. A potential conflict of interest exists.

From time to time, other investment advisory firms will pay us for operations support. This includes back office support, website building, data recording and billing. For an additional fee, investment advisory firms may utilize our asset allocation models. Currently, we charge these firms up to 1% and an hourly fee for operations support and access to our asset allocation models.

While we provide operational support and access to our models, we do ensure that we do not over-burden our operations team so that at all times we are able to provide excellent service and process all client trades.

Micah Shilanski and Jamie Shilanski are actively engaged in The Perfect RIA, a coaching program for other financial advisors on how to deliver value to their clients. They spend approximately 1 to 5 hours a week on this activity.

Associates of Shilanski & Associates, Inc. are owners of Retirement Tax Services (RTS), a tax preparation company. Shilanski & Associates, Inc. does recommend RTS to advisory clients in need of tax preparation services. Tax preparation services provided by RTS are separate and distinct from our advisory services and are provided for separately and require typical compensation. There are no referral fee arrangements between our firms for these recommendations. No Shilanski & Associates, Inc. client is obligated to use RTS for any tax preparation services and conversely, no accounting client is obligated to use the advisory services provided by us. RTS's tax preparation services do not include the authority to sign checks or otherwise disburse funds on any of our advisory client's behalf.

Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

As a fiduciary, our firm and its associates have a duty of utmost good faith to act solely in the best interests of each client. Our clients entrust us with their funds and personal information, which in turn places a high standard on our conduct and integrity. Our fiduciary duty is a core aspect of our Code of Ethics and represents the expected basis of all of our dealings.

This code does not attempt to identify all possible conflicts of interest, and literal compliance with each of its specific provisions will not shield associated persons from liability for personal trading or other conduct that violates a fiduciary duty to advisory clients. A summary of the Code of Ethics' Principles is outlined below.

- Integrity - Associated persons shall offer and provide professional services with integrity.
- Objectivity - Associated persons shall be objective in providing professional services to clients.
- Competence - Associated persons shall provide services to clients competently and maintain the necessary knowledge and skill to continue to do so in those areas in which they are engaged.
- Fairness - Associated persons shall perform professional services in a manner that is fair and reasonable to clients, principals, partners, and employers, and shall disclose conflict(s) of interest in providing such services.
- Confidentiality - Associated persons shall not disclose confidential client information without the specific consent of the client unless in response to proper legal process, or as required by law.
- Professionalism - Associated persons' conduct in all matter shall reflect credit of the profession.
- Diligence - Associated persons shall act diligently in providing professional services.

We will, upon request, promptly provide a complete code of ethics.

Our firm and its "related persons" (associates, their immediate family members, etc.) may buy or sell securities the same as, similar to, or different from, those we recommend to clients for their accounts. A recommendation made to one client may be different in nature or in timing from a recommendation made to a different client. Clients often have different objectives and risk tolerances. At no time, however, will our firm or any related party receive preferential treatment over our clients.

In an effort to reduce or eliminate certain conflicts of interest involving SAAI or personal trading, our policy may require that we restrict or prohibit associates' transactions in specific securities transactions. Any exceptions or trading pre-clearance must be approved by our Chief Compliance Officer in advance of the transaction in an account, and we maintain the required personal securities transaction records per regulation.

Review of Accounts

Client accounts with the Investment Management Service will be reviewed on at least a semi-annual basis by their respected advisor. Clients will receive trade confirmations from the custodian for each transaction in their accounts as well as monthly or quarterly statements and annual tax reporting statements from their custodian showing all activity in the accounts, such as receipt of dividends and interest.

Client Referrals

We do not receive any economic benefit, directly or indirectly from any third party for advice rendered to our clients. Nor do we directly or indirectly compensate any person who is not advisory personnel for client referrals.

Financial Information

Registered investment advisers are required in this Item to provide you with certain financial information or disclosures about our financial condition. We have no financial commitment that impairs our ability to meet contractual and fiduciary commitments to clients, and we have not been the subject of a bankruptcy proceeding.
