

ADV-Part 2A: *Firm Brochure*

ATIVO CAPITAL MANAGEMENT, LLC

120 N LaSalle Street, Suite 1045
Chicago, IL 60602

Telephone: 312-263-7600
Web Address: www.ativocapital.com

March 31, 2023

This brochure provides information about the qualifications and business practices of Ativo Capital Management, LLC (or “Ativo” or the “firm”). If you have any questions about the contents of this brochure, please contact Eric Pucek, Chief Compliance Officer, at 312-229-5205 or epucek@ativocapital.com. The information in this brochure has not been approved or verified by the United States Securities and Exchange Commission (“SEC”) or by any state securities authority.

Ativo is registered as an investment adviser with the SEC under the Investment Advisers Act of 1940, as amended (the “Advisers Act”). Registration with the SEC does not imply a certain level of skill or training.

Additional information about Ativo is available on the SEC’s website at <https://adviserinfo.sec.gov>. You can search this website by using our firm name, CRD number, or SEC number. These numbers are unique identifying numbers of our firm. Ativo’s CRD number is 125303 and SEC number is 801-65975.

Item 2 Material Changes

This Firm Brochure provides you with a summary of Ativo's advisory services and fees, professionals, certain business practices and policies, as well as actual or potential conflicts of interest, among other things. This Item is used to provide our clients with a summary of new and/or updated information.

This Firm Brochure has been updated to reflect that Ativo will now accept separately-managed accounts under \$5,000,000. There have been no other material updates since the last updated Firm Brochure dated March 30, 2022. We encourage all recipients to read this document in its entirety.

Item 4 Advisory Business

Ativo Capital Management, LLC (or “Ativo” or the “firm”) is an SEC-registered investment adviser with its principal place of business located in Chicago, Illinois. The firm is a Delaware limited liability company that began conducting business in 2001.

Ativo Holdings, LLC, a Delaware limited liability company, owns 59.66% of the firm. Ricardo Bekin, the firm’s Chief Executive Officer and Chief Investment Officer is the sole member of Ativo Holdings, LLC. Pinecliff Trust owns 22.80% of the firm. Mr. Bekin is the trustee of Pinecliff Trust. There are eight other members that collectively own the remaining portion of the firm as noted in Ativo’s Form ADV Part 1.

For information on Ativo’s portfolio management services please contact our marketing team at marketing@ativocapital.com or at 312-263-7600.

Ativo offers the following advisory services to our clients:

Portfolio Management for Separately Managed Accounts

Ativo offers a variety of long-only equity strategies to individual and institutional clients (“client(s)”) as separately-managed accounts (“SMAs”) permitting the client to select an appropriate strategy or strategies based on its needs. Once suitability is determined, the account is generally managed according to the strategy’s goal. Institutional clients generally determine suitability, at least in part, before selecting Ativo to manage its assets. For individual clients, suitability is generally determined while reviewing the client’s investment policy statement/investment management agreement. This aids Ativo in gathering relevant information to assist with making a suitability determination. Clients have the opportunity to place reasonable guidelines and restrictions on the account to be managed by Ativo. We manage these advisory accounts on a discretionary basis. Clients retain individual ownership of all securities.

Once the client’s account is established, we review its composition each week and make changes, as required, based on our current analysis. As part of our standard services, we monitor and advise clients’ investment portfolios on an ongoing basis.

We design and update our strategies in-house. Our strategies are generally comprised of the following securities:

- Domestic exchange-listed equity securities
- Domestic equity securities traded over-the-counter
- Foreign equity securities traded in the US
- Foreign equity securities traded in foreign markets
- Foreign equity securities traded over-the-counter

Model Portfolio Management

Our firm provides continuous portfolio management services to model-based unified managed account platforms (“UMA”) which may also be described as wrap fee programs. Each model portfolio is designed to meet a particular investment strategy. Ativo provides these model portfolios to select broker-dealers and investment advisers (“UMA Program Sponsors”). The UMA Program Sponsors initially determine whether the model is suitable to a particular client’s circumstances. The client portfolio is then managed by the UMA Program Sponsor according to the model’s strategy. We structure these models using the same approach as we do for our separately-managed account clients. Generally, the only differences are due to separately-managed client-imposed guidelines and restrictions. However, Ativo, at its discretion, structures custom models at the request of UMA Program Sponsors.

Ativo is not responsible for trade execution, reconciliation, and other functions within the UMAs it advises. Moreover, Ativo has no discretion over the client assets subscribed to our model portfolios made available through the UMA Program Sponsors. For that reason, we exclude these assets from our assets under management and instead report them as assets under advisement as noted below. The underlying UMA clients retain individual ownership of all securities.

Our investment recommendations are not limited to any specific product or service offered by a broker-dealer or investment adviser and will generally include the following securities:

- Domestic exchange-listed equity securities
- Domestic equity securities traded over-the-counter
- Foreign equity securities traded in the US
- Foreign equity securities traded in foreign markets
- Foreign equity securities traded over-the-counter

Private Funds

Ativo also serves as the investment manager of two private funds: Ativo International Equity Fund, LP and Ativo International Small Cap Equity Fund, LP (each a “Private Fund” and together the “Private Funds”). Ativo Global Funds, LLC, an affiliate of the firm, serves as the general partner of each private fund. Each Private Fund is offered exclusively to certain qualified investors under its Confidential Private Placement Memorandum (each a “Memorandum”). Please refer to a Private Fund’s Memorandum for additional details of the terms of an investment in that Private Fund.

Impact of COVID-19

As discussed more fully in Item 8, disease outbreaks such as the novel coronavirus (COVID-19) that affect local economies or the global economy may materially and adversely impact Ativo’s investment funds and portfolios and/or our business. We are pleased to report that the firm’s IT infrastructure and collaboration model have allowed Ativo to provide our clients the same level of service notwithstanding the travel and/or lockdown recommendations or restrictions that have impacted and may continue to impact our office location in Chicago,

Illinois. Further, in light of the economic uncertainty and market losses in early 2020 and Ativo's desire to retain all existing staff, the firm applied for and received a loan of \$422,700 in April 2020 under the Paycheck Protection Program of the Coronavirus Aid, Relief, and Economic Security (CARES) Act to support its ongoing operations. The firm used these funds to pay qualifying expenses over a twenty-four week period, including: payroll costs, healthcare benefits for employees, rent, utilities, and other relevant firm expenses. The loan was forgiven in August 2021. Absent unforeseen events, Ativo clients should expect no material changes in service due to the current health and economic uncertainties.

Amount of Managed and Advised Assets

As of 2/28/2023, Ativo actively managed approximately \$985,800,000 of total clients' assets or assets under management ("AUM"), all of which was discretionary.

As of 2/28/2023, Ativo provided UMA asset under advisement ("AUA") services for approximately \$185,500,000 in underlying client assets.

Item 5 Fees and Compensation

Ativo's fees for Portfolio Management Services are typically based upon a percentage of assets under management. Upon agreement with a client or in other circumstances, we may also charge performance-based fees exclusively or in addition to other types of fees. Please see Item 6 below for more information about performance fees.

Fee Schedule for Separately-Managed Accounts

The following fee schedules are for separately-managed accounts investing in the noted strategies.

International Developed - The Ativo International Developed strategy seeks to invest primarily in undervalued companies domiciled in developed Non-US countries.

Mandate Size	Fee Quote (bps)
First \$50 million	50
Next \$50 million	45
Next \$100 million	40
Remaining Balance	35

International All Country ex US - The Ativo International All Country ex US strategy seeks to invest primarily in undervalued companies domiciled in both developed and emerging Non-US countries.

Mandate Size	Fee Quote (bps)
First \$50 million	55
Next \$50 million	50
Next \$100 million	45
Remaining Balance	40

International Small Cap All Country ex US - The International Small Cap All Country ex US strategy seeks to invest primarily in undervalued companies with capitalizations of less than \$5 billion that are domiciled in both developed and emerging Non-US countries.

Mandate Size	Fee Quote (bps)
First \$50 million	75
Next \$50 million	70
Next \$100 million	65
Remaining Balance	60

International Small Cap Developed - The International Small Cap Developed strategy seeks to invest primarily in undervalued companies with capitalizations of less than \$5 billion that are domiciled in developed Non-US countries.

Mandate Size	Fee Quote (bps)
First \$50 million	70
Next \$50 million	65
Next \$100 million	60
Remaining Balance	55

International Small Cap Emerging - The International Small Cap Emerging strategy seeks to invest primarily in undervalued companies with capitalizations of less than \$5 billion that are domiciled in emerging Non-US countries.

Mandate Size	Fee Quote (bps)
First \$50 million	80
Next \$50 million	75
Next \$100 million	70
Remaining Balance	65

Global Institutional - The Ativo Global Institutional strategy seeks to invest primarily in undervalued companies globally.

Mandate Size	Fee Quote (bps)
First \$50 million	50
Next \$50 million	45
Next \$100 million	40
Remaining Balance	35

International ADR/International ADR Concentrated - The Ativo International ADR strategy seeks to invest primarily in undervalued American Depositary Receipts (“ADR’s”) and other foreign companies traded on American exchanges. The Ativo International ADR Concentrated strategy is a subset of the Ativo International ADR strategy and holds approximately 20 securities. The Ativo International ADR Concentrated strategy is targeted for individual investors. By focusing on the best ideas of the Ativo International ADR, we believe the Ativo International ADR Concentrated strategy can maintain the risk/return trade-off while having lower expected turnover. However, with fewer holdings, the concentrated strategy is not as diversified from a country, sector, and industry perspective.

Mandate Size	Fee Quote (bps)
First \$50 million	50
Next \$50 million	45
Next \$100 million	40
Remaining Balance	35

Domestic Large Cap/Domestic Large Cap Concentrated - The Ativo Large Cap strategy seeks to invest primarily in domestically traded, undervalued companies with market capitalizations in excess of \$20 billion. The Ativo Large Cap Concentrated strategy is a subset of the Large Cap strategy and holds approximately 20 securities. The Ativo Large Cap Concentrated strategy is targeted for individual investors. By focusing on the best ideas of the Domestic Large Cap, we believe the Ativo Large Cap Concentrated strategy can maintain the risk/return trade-off while having lower expected turnover. However, with fewer holdings, the concentrated strategy is not as diversified from a sector and industry perspective.

Mandate Size	Fee Quote (bps)
First \$25 million	30
Next \$100 million	25
Remaining Balance	20

Domestic Small Cap/Domestic Small Cap Concentrated - The Ativo Small Cap strategy seeks to invest primarily in domestically traded, undervalued companies with market capitalizations between \$500 million and \$5 billion. The Ativo Small Cap Concentrated strategy is a subset of the Small Cap strategy and holds approximately 20 securities. The Ativo Small Cap Concentrated strategy is targeted for individual investors. By focusing on the best ideas of the Domestic Small Cap, we believe the Ativo Small Cap Concentrated strategy can maintain the risk/return trade-off while having lower expected turnover. However, with fewer holdings, the concentrated strategy is not as diversified from a sector and industry perspective.

Mandate Size	Fee Quote (bps)
First \$50 million	60
Next \$50 million	55
Next \$100 million	50
Remaining Balance	45

Domestic Smid Cap - The Ativo Smid Cap strategy seeks to invest primarily in domestically traded, undervalued companies with market capitalizations between \$500 million and \$20 billion.

Mandate Size	Fee Quote (bps)
First \$50 million	50
Next \$50 million	45
Next \$100 million	40
Remaining Balance	35

Domestic Mid Cap/Domestic Mid Cap Concentrated - The Ativo Mid Cap strategy seeks to invest primarily in domestically traded, undervalued companies with market capitalizations between \$5 billion and \$20 billion. The Ativo Mid Cap Concentrated strategy is a subset of the Mid Cap strategy and holds approximately 20 securities. The Ativo Mid Cap Concentrated strategy is targeted for individual investors. By focusing on the best ideas of the Domestic Mid Cap, we believe the Ativo Mid Cap Concentrated strategy can maintain the risk/return trade-off while having lower expected turnover. However, with fewer holdings, the concentrated strategy is not as diversified from a sector and industry perspective.

Mandate Size	Fee Quote (bps)
First \$50 million	40
Next \$50 million	35
Next \$100 million	30
Remaining Balance	25

Limited Negotiability of Advisory Fees

Although Ativo has established the aforementioned fee schedules, we retain the discretion to negotiate alternative fees on a client-by-client basis. Client facts, circumstances and needs will be considered in determining the fee schedule. These include the complexity of the client relationship, assets to be placed under management, anticipated future additional assets, related accounts, portfolio style, account composition, and reports, among other factors. The specific annual fee schedule will be identified in the contract between the adviser and each client.

Discounted fees, not generally available to our clients, are offered to certain employees, employee family members, and other associated persons of our firm.

Generally, our fees are billed quarterly, in arrears, at the end of each calendar quarter based upon the average market value on the last business day of each month in the quarter. However, billing arrangements vary from client to client. Ativo generally invoices clients directly or through their custodians.

Lastly, please refer to Item 6 for information related to performance fees.

Model Portfolio Management Fees

Our fees for Model Portfolio Management Services are negotiated with the model-based UMA Program Sponsors. Ativo's advisory fees are not negotiable by the account owner. Accounts subscribing to Ativo models through UMA platforms generally have fees collected quarterly, in advance, at the beginning of each calendar quarter based upon the value (market value or fair market value in the absence of market value), of the account at the end of the previous quarter by the UMA platform provider with a portion remitted to Ativo. However, billing arrangements may vary.

Account minimums vary and are generally determined by the UMA Program Sponsors. Please refer to Ativo's ADV Part 1, Section 5.I.(2) for a list of active UMA Program Sponsors to which Ativo makes model portfolios available.

Private Fund Fees

Each Private Fund charges the management fees and expenses as described in the Memorandum for such Private Fund. The Private Funds are not subject to performance fees. The Private Funds have the discretion to enter into side letter agreements with certain investors as described in the Memorandum for each Private Fund.

General Information

Termination of the Advisory Relationship: Generally, a client agreement may be terminated at any time, without the payment of any penalty, by either party on thirty (30) days' written notice to the other party. As disclosed above, certain fees may be paid in advance of services provided. Upon termination of any account, any prepaid, unearned fees will be promptly refunded. In calculating a client's reimbursement of fees, we will prorate the reimbursement according to the number of days remaining in the billing period.

UMA Fees: Certain UMA accounts are charged various program fees in addition to the advisory fee received by our firm. Such fees may include the investment advisory fees of the independent advisers, which may be charged as part of a wrap fee arrangement. In a wrap fee arrangement, accounts pay a single fee for advisory, brokerage and custodial services. Portfolio transactions may be executed without a commission charge in a wrap fee arrangement. In evaluating such an arrangement, one should also consider that, depending upon the level of the wrap fee charged by the broker-dealer, the amount of portfolio activity in the account, and other factors, the wrap fee may or may not exceed the aggregate cost of such services if they were to be provided separately. Those evaluating whether to participate in such arrangements should carefully consider these items.

Additional Fees and Expenses: In addition to our advisory fees, clients (other than clients in certain wrap fee based UMAs) are also responsible for the fees and expenses charged by custodians and imposed by broker-dealers, including, but not limited to, any transaction charges imposed by a broker-dealer with which an independent investment manager effects transactions for the client's account(s). Please refer to the "Brokerage Practices" section (Item 12) of this Form ADV Part 2A for additional information.

Grandfathering of Minimum Account Requirements: Pre-existing advisory clients are subject to Ativo's minimum account requirements and advisory fees in effect at the time the client entered into the advisory relationship. Therefore, our firm's minimum account requirements will differ among clients.

ERISA Accounts: Ativo is deemed to be a fiduciary to advisory clients that are employee benefit plans pursuant to the Employee Retirement Income and Security Act of 1974, as amended ("ERISA"). As such, our firm is subject to specific duties and obligations under ERISA and the Internal Revenue Code that include, among other things, restrictions concerning certain forms of compensation. To avoid engaging in prohibited transactions under ERISA, Ativo will only charge fees for investment advice for which our firm and/or our related persons do not receive other compensation, such as any commissions or 12b-1 fees'.

Advisory Fees in General: Clients should note that similar advisory services may (or may not) be available from other registered (or unregistered) investment advisers for similar or lower fees.

Item 6 Performance-Based Fees and Side-By-Side Management

Performance-based fees are available to clients as mutually agreed. Such a performance-based fee is calculated based on a share of the capital changes of the assets of the client.

These performance-based fees create an incentive for Ativo to favor performance fee paying accounts over accounts that do not pay performance fees. Ativo has policies and procedures in place to mitigate this conflict and whether a performance-based fee or a flat percentage of assets fee is utilized, clients should be aware that accounts using the same portfolio strategy will be managed identically but for client imposed guidelines and restrictions.

Item 7 Types of Clients

Ativo provides investment management services to the following types of clients:

- Corporate pension and profit-sharing plans (other than plan participants)
- Hospital or healthcare plans
- Public plans such as state or municipal government entities
- Endowments and foundations
- Outsourced CIO firms
- Taft-Hartley or multiemployer plans
- The Private Funds as well as other unregistered pooled investment vehicles
- Model-based unified managed account (UMA) platforms
- Individuals

Ativo's current account minimum is \$100,000. For client accounts with initial balances from \$100,000 to \$5,000,000, Ativo generally requires the client to maintain the account at Goldman Sachs Custody Solutions ("GSCS") where GSCS acts as custodian and executes trade orders entered by Ativo. For more information about GSCS and its trading processes please visit <https://folioinstitutional.com/clienthelp/invest-with-us.jsp>. For client accounts with initial balances above \$5,000,000, a client can generally choose its own custodian and trades are executed by one of Ativo's approved brokers as described in Item 12 Trading/Brokerage Practices. Ativo may accept clients below these minimums at its discretion. It is important to note that only Ativo's Concentrated Strategies are available for initial investment amounts under \$5,000,000.

Item 8 Methods of Analysis, Investment Strategies and Risk of Loss

Methods of Analysis

Ativo's investment approach is firmly rooted in sound financial theory—we apply discounted cash flow return on investment methodologies. We combine quantitative methodologies with a fundamental overlay to actively manage long-only international and domestic equity portfolios in a systematic and disciplined way. We also incorporate Environmental, Social and Governance (ESG) factors in our systematic process.

The portfolio decision making process is primarily quantitative and driven by multiple factors. The most heavily weighted factor is valuation. Ativo establishes the intrinsic value of each stock in our investable universe by converting publicly available accounting data into a current cost accounting format to calculate real economic performance and growth rates of firms. We also calculate company-specific discount rates and utilize life-cycle theory to determine fade-rates in company growth. Stocks with the highest discount to intrinsic value are thereby identified. Ativo ranks stocks based on operating momentum factors such as growth rates in assets, sales, earnings, and return on investment. We utilize a set of proprietary momentum factors that allow us to determine the stocks that are likely to outperform in the short to mid-term. Ativo screens for low volatility stocks, which the market tends to systematically underprice. We also use ESG factors to identify stocks with favorable ESG characteristics and sentiment. These five primary factors are combined to assign an Ativo Attractiveness Score to each stock in our investment universe. The stocks ranked highest are given first preference for inclusion in a portfolio, however, due to factors discussed below, the highest ranked stock may not necessarily be selected for the portfolio.

Portfolio construction begins with the Ativo Attractiveness Scores, along with ranking each security subject to market cap, trading volume, and compliance screens. We then scale and adjust the rank of each security based on four factors – country ranking under our proprietary Country Attractiveness Model (if applicable), current portfolio exposure to sectors and industries, market cap, and style. We then consider the securities with the highest adjusted rank as portfolio candidates, subject to a final qualitative assessment that includes news about each company, such as M&A, regulatory, and political events. We size portfolio positions by 1) overweighting sectors where we see the greatest value, 2) using our top-down Country Attractiveness Model to adjust country exposure, and 3) appropriately adjusting the weights between large cap and small cap stocks to mitigate any bias that develops (if

applicable). Due to the above portfolio construction factors, the highest ranked stock might not be selected for a portfolio. Additionally, the portfolio management team uses third-party optimization software combined with risk models to guide portfolio changes subject to client specified constraints. Moreover, the portfolio manager(s) of each portfolio ultimately has discretion to make changes to the portfolio and may use experience and other factors that are not directly attributed to the model to determine the final selections and liquidations for the portfolio. The underlying model output is archived as support for these changes.

For the Concentrated strategies, the portfolio manager begins with a universe of securities based upon the holdings of the non-Concentrated version of the same strategy and then repeats the above process to select a portfolio of approximately 20 securities.

Please see the Memorandum of each Private Fund for a more detailed discussion of the methods of analysis used with respect to such Private Fund.

Risk of Loss

Ativo attempts to mitigate portfolio risks by incorporating risk management throughout the entire investment process. Our approach to risk management has six pillars: risk model, client constraints and exclusions, attribution analysis, daily compliance monitoring, a weekly portfolio review, and current-event monitoring. These risks include, but are not limited to, decisions based on quantitative models, equity market risk, liquidity risk, market capitalization risk, model construction risk, and the risk of investing in non-US and emerging market securities.

All investments involve risks, including the loss of principal invested. Past performance does not guarantee future results or success. In addition, the performance of foreign securities can be adversely affected by the different political, regulatory, and economic environments and other overall economic conditions in the countries where the portfolio is invested.

The portfolio is actively managed, which means that Ativo will at times frequently buy and sell securities. Frequent trading increases a portfolio's turnover rate and will ordinarily increase transaction costs, such as brokerage commissions and taxes. Increased transaction costs could detract from the portfolio's performance.

Portfolios utilizing our Concentrated strategies will be less diversified as compared to portfolios using our non-Concentrated strategies in terms of the number issuers in the portfolio, as well as country, industry, and/or sector. This lack of diversification can lead to greater volatility in these portfolios.

It is possible that Ativo's information and technology systems will, from time to time, be vulnerable to damage or interruption from computer viruses, network failures, computer and telecommunication failures, infiltration by unauthorized persons and security breaches, usage errors by its professionals, power outages and catastrophic events such as fires, tornadoes, floods, hurricanes and earthquakes. Although Ativo has implemented various measures to protect the confidentiality of its internal data and to manage risks relating to these types of events, if these systems are compromised, become inoperable for extended periods of time or cease to function properly, Ativo will likely have to make a significant investment to fix or replace them. The failure of these systems and/or of disaster recovery plans for any reason

could cause significant interruptions in Ativo's operations and result in a failure to maintain the security, confidentiality or privacy of sensitive data, including personal information relating to clients.

Disease outbreaks that affect local economies or the global economy have the potential to materially and adversely impact our investment funds and portfolios and/or our business. For example, uncertainties regarding the novel coronavirus (COVID-19) outbreak have resulted in serious economic disruptions throughout the world. These types of outbreaks can be expected to cause severe decreases in core business activities such as manufacturing, purchasing, tourism, business conferences and workplace participation, among others. These disruptions lead to instability in the marketplace, including stock market losses and overall volatility, as has occurred in connection with COVID-19. In the face of such instability, governments may take extreme and unpredictable measures to combat the spread of disease and mitigate the resulting market disruptions and losses. We have in place business continuity plans reasonably designed to ensure that we maintain normal business operations, and that our investment funds, portfolios and client assets are protected, and we periodically test those plans. However, in the event of a pandemic or an outbreak, there can be no assurance that we or our investment funds' and portfolios' service providers will be able to maintain normal business operations for an extended period of time or will not lose the services of key personnel on a temporary or long-term basis due to illness or other reasons. The full impacts of a pandemic or disease outbreaks are unknown, resulting in a high degree of uncertainty for potentially extended periods of time.

Please see the Memorandum of each Private Fund for a more detailed discussion of the primary risks associated with an investment in that Private Fund.

Item 9 Disciplinary Information

We are required to disclose any legal or disciplinary events that are material to a client's or prospective client's evaluation of our advisory business or the integrity of our management.

Our firm and our management personnel have no reportable disciplinary events to disclose.

Item 10 Other Financial Industry Activities and Affiliations

Ativo's affiliate, Ativo Global Funds, LLC, serves as the general partner of each Private Fund. Ativo and its principals have no other financial industry activities or affiliations.

Item 11 Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

Our firm has adopted a Code of Ethics which sets forth high ethical standards of business conduct that we require of our employees, including compliance with applicable federal securities laws.

Ativo and our personnel owe a duty of loyalty, fairness and good faith towards our clients, and have an obligation to adhere not only to the specific provisions of the Code of Ethics but to the general principles that guide the Code.

Our Code of Ethics includes policies and procedures for the completion of quarterly employee securities transactions reports, as well as initial and annual securities holdings reports that must be submitted by the firm's access persons. Among other things, our Code of Ethics also prohibits the acquisition of certain securities including those in a limited offering (e.g., private placement) or an initial public offering with limited exceptions. Persons associated with our firm are required to report any violations of our Code of Ethics. Our code also provides for oversight, enforcement and recordkeeping provisions.

Ativo's Code of Ethics further includes the firm's policy prohibiting the use of material non-public information. While we do not believe that we have any particular access to non-public information, all employees are reminded that such information must not be used in a personal or professional capacity.

A copy of our Code of Ethics is available to our advisory clients and prospective clients. You may request a copy by e-mail sent to epucek@ativocapital.com or rbekin@ativocapital.com, or by calling us at 312-263-7600.

Ativo and individuals associated with our firm are prohibited from engaging in principal transactions and cross transactions.

Our Code of Ethics is designed to assure that the personal securities transactions, activities and interests of our employees will not interfere with (i) making fiduciary decisions in the best interest of advisory clients and (ii) implementing such decisions in accordance with our fiduciary duty owed to our clients. No principal or employee of our firm may put his or her own interest above the interest of an advisory client. No principal or employee of our firm may buy or sell securities for their personal portfolio(s) where their decision is a result of information received as a result of his or her employment unless the information is also available to the investing public.

It is the general policy of our firm that no personal trading is permitted in individual equity securities unless as part of such employee's account at the Firm, as a client, which the firm's portfolio managers are investing in one or more investment strategies or portfolios that Ativo manages for or makes available to its clients. The firm's Chief Compliance Officer makes exceptions to this general policy in limited circumstances.

Ativo's principals and employees invest alongside Ativo's clients in a SMA or Private Fund. Ativo has policies and procedures in place to ensure that the holdings of its principals and employees are not favored over other client accounts.

We require written acknowledgment of the Code of Ethics by each supervised person of our firm annually. Any firm staff member who violates any of the above restrictions will ordinarily be subject to internal sanctions, including and up to termination.

Item 12 Trading/Brokerage Practices

Broker-Dealer Selection and Soft Dollars

For client accounts with initial balances from \$100,000 to \$5,000,000, Ativo generally requires the client to maintain the account at Goldman Sachs Custody Solutions (“GSCS”) where GSCS acts as custodian and executes trade orders entered by Ativo. For more information about GSCS and its trading processes please visit <https://folioinstitutional.com/clienthelp/invest-with-us.jsp>. For accounts with initial balances above \$5,000,000, a client can generally choose its own custodian and trades are executed by one of Ativo’s approved brokers as described below.

For client accounts with initial balances above \$5,000,000, Ativo generally requires these clients to provide us with written authority to determine the broker-dealer to use and the commission costs that will be charged to these clients for these transactions.

These clients must include any limitations on this discretionary authority in this written authority statement. Clients may change/amend these limitations as required. Such amendments must be provided to us in writing.

Ativo will endeavor to select those brokers or dealers which will provide the best services at the lowest commission rates. The reasonableness of commissions is based on a number of factors, including the execution method, broker’s stability, reputation, ability to provide professional services, responsiveness, competitive commission rates and prices, market settlement capabilities, research, trading platform, and other services which will help Ativo in providing investment management services to clients. It is therefore possible that Ativo will recommend the use of, or engage, a broker who provides useful research and/or securities transaction services even though a lower commission is charged by a broker who offers no research services and/or minimal securities transaction assistance. Research or security transaction services may be useful in servicing all our clients, and not all of such research or services may be useful for the account for which the particular transaction was affected.

Consistent with seeking best execution for clients, Ativo has the option to direct brokerage transactions for clients’ portfolios to brokers who provide research and execution services to Ativo and, indirectly, to Ativo’s clients. These services, sometimes referred to as “soft dollar” services or client commission arrangements, are of the type described in Section 28(e) of the Securities Exchange Act of 1934 and are designed to augment our own internal research and investment strategy capabilities. This will ordinarily be done without prior agreement or understanding by the client (and done at our discretion).

Research products and services obtained through the use of soft dollars or client commission arrangements are often developed by third-parties which are compensated by the broker. Ativo believes that the research we receive will help us to fulfill our overall duty to our clients. Ativo will not always use each research product or service, however, to service each client.

As a result, a client may pay brokerage commissions that are used, in part, to purchase research products or services that are not used to benefit that specific client. Conversely, certain clients and accounts, including but not limited to accounts of employees, employee family members, and other associated persons, as well as model-based UMA Program Sponsors, accounts that require directed brokerage, and accounts that restrict the generation

of soft-dollars, benefit from the research obtained through soft dollars even if such clients and accounts ordinarily do not generate soft dollars themselves. A portion of the commission for each executed trade for clients that allow the generation of soft dollar commission credits is used to pay for soft dollar eligible products and services. Clients that restrict the generation of soft dollar credits to pay for such eligible products and services pay the same commission rates as clients that generate soft dollar credits since the use of the underlying products and services is designed to benefit all client portfolios. However, Ativo is not required to use each eligible product or service to service each client.

Broker-dealers we select will from time to time be paid commissions for effecting transactions for our clients that exceed the amounts other broker-dealers would have charged for effecting these transactions if Ativo determines in good faith that such amounts are reasonable in relation to the value of the brokerage and/or research services provided by those broker-dealers, viewed either in terms of a particular transaction or our overall duty to our (“brokerage”) discretionary client accounts.

Certain items obtainable with soft dollars will not be used exclusively for either execution or research services. The cost of such “mixed-use” products or services will be reasonably allocated and Ativo makes a good faith effort to determine the percentage of such products or services which should be qualified as eligible research and brokerage products or services. The portions of the costs attributable to non-research usage of such products or services are paid by our firm to the broker-dealer or third-party vendor in accordance with the provisions of Section 28(e) of the Securities Exchange Act of 1934. When Ativo makes a “mixed use” determination it results in a conflict of interest because the firm has an incentive to determine that the greatest portion of a “mixed use” product or service is eligible to be paid for with soft dollar commission credits rather than directly by the firm.

When Ativo uses client brokerage commissions to obtain research or brokerage services, we receive a benefit to the extent that Ativo does not have to produce such products internally or compensate third-parties with our own money for the delivery of such services. Therefore, such use of client brokerage commissions results in a conflict of interest, because we have an incentive to direct client brokerage to those brokers who provide research and services we utilize, even if these brokers do not offer the best price or commission rates for our clients.

The types of research and brokerage services we could obtain on a soft-dollar basis include, but are not limited to: compilations of securities prices, earnings, dividends and similar market, financial and other economic data; software that provides analyses of securities portfolios; software and communications services related to the execution, clearing and settlement of securities transactions; transaction cost analysis; and other brokerage and research services.

Examples of specific products and services include those provided by Standard & Poor’s, MSCI, and FactSet. Ativo utilizes a soft dollar broker administrator for the implementation of client commission arrangements, including soft dollar reconciliation with brokers and third-party payments for Section 28(e) eligible products and services.

Ativo will from time to time execute trades in the market on behalf of clients using tools provided by brokers to access market liquidity. These tools include, but are not limited to, algorithmic market access and buy-side liquidity pools. During the course of such trading,

Ativo is bound by the best execution guidelines noted above. These trades will usually be executed at a lower commission than those executed by third-party brokers and typically will not be eligible for soft dollars.

Trade Generation

Ativo's trade generation process is designed to be equitable across strategies as described below:

- 1) Trade order is determined using a random number generator. Each week, the CIO will determine execution order by generating a random number to be assigned to each strategy. The strategies will then be organized in ascending order to ensure that no strategy consistently gains an execution advantage over the others.
- 2) The portfolio manager enters trades through the Order Management System (OMS) or utilizing risk management and optimization software (RMS). When generating orders, the portfolio manager will consider cash availability, client restrictions, and any other relevant factors. Trades may be generated as part of a basket or on an ad-hoc basis by the portfolio manager. The portfolio manager will occasionally direct the trader to enter trades manually.
- 3) Trades may be generated externally and imported into the OMS. In such cases, the OMS Compliance System will ensure that all relevant factors are considered and will alert the portfolio manager of any violations.
- 4) The portfolio manager will then send the order and allocations to the trade blotter via the OMS or by importing trades generated by the RMS.
- 5) The trader may adjust allocations to minimize odd-lot purchases, which could hinder execution or prevent best execution.
- 6) The trader will attempt to aggregate any orders into a block where those orders are pre-existing.

Aggregation and Block Trading

Ativo will aggregate or block trades where possible and when advantageous to clients. This blocking of trades permits the trading of aggregate blocks of securities composed of assets from multiple client accounts, so long as transaction costs are shared equally, at an average share price, and on a pro-rata basis between all accounts included in any such block.

Block trading can allow us to execute equity trades in a timelier, more equitable, and efficient manner, while seeking to reduce overall commission charges to clients. Ativo will typically aggregate trades among clients whose accounts can be traded at a given broker. In the event trades cannot be aggregated, and where various brokers are required, we will rotate or vary the order of clients for whom trades are placed in order to ensure that no client is favored. Ativo's block trading policy and procedures are as follows:

- 1) Transactions for any client account will not be aggregated for execution if the practice is prohibited by or inconsistent with the client's advisory agreement with Ativo, or our firm's order allocation policy.
- 2) The portfolio manager must reasonably believe that the order aggregation will benefit

each client by enabling Ativo to seek best execution for all clients participating in the aggregated order. This requires a good faith judgment at the time the order is placed for the execution. It does not mean that the determination made in advance of the transaction must always prove to have been correct in the light of a “20-20 hindsight” perspective. Best execution includes the duty to seek the best quality of execution, as well as the best net price.

- 3) If the trader receives a new trade order for an investment where a block trade is already executed and allocated, the blocks will not be combined.
- 4) The trader will select a broker for each trade while considering strategy and security specific trading factors such as liquidity, market idiosyncratic factors and the capabilities of the broker in the market where the security is to be traded. Trades will not be blocked in the event such factors impede the ability to manage the risks involved.
- 5) Trades are sent to brokers using the OMS and are acknowledged by the broker(s).
- 6) Trades are executed and fills are electronically received into the system for allocation and settlement.
- 7) Ativo’s client account records separately reflect, for each account in which the aggregated transaction occurred, the securities which are held by, and bought and sold for, that account.
- 8) Funds and securities for aggregated orders are clearly identified on Ativo’s records and to the broker-dealers or other intermediaries handling the transactions, by the appropriate account numbers for each participating client.

Allocation

As a matter of policy, an adviser’s allocation procedures must be fair and equitable to all clients with no particular group or client(s) being favored or disfavored over any other clients. Ativo’s policy prohibits any allocation of trades in a manner that any particular client(s) or group of clients receive more favorable treatment than other client accounts. Ativo’s allocation policy and procedures are as follows:

- 1) Trades will be allocated on a basis believed to be fair and equitable; no client will be favored over any other. Nevertheless, different accounts will receive different prices for securities trades from time to time.
- 2) The portfolio management team will take steps to ensure that no participating client will be systematically disadvantaged by the aggregation, placement, or allocation of trades.
- 3) Transactions are allocated promptly, usually on trade date, and no reallocations are permitted from one account to another except where the original allocation was done in error or there was an associated trade error where, after careful review, a reallocation is appropriate given the circumstances. Reallocations will be reported and approved by members of the Trading Oversight Committee.
- 4) Executed orders will be allocated on a pro-rata basis until the orders are filled.

- 5) The trader may utilize manual allocations in cases where round lots prohibit the use of pro-rata allocation to ensure fairness in cases of where partial execution would normally result in biased allocations.

Directed Brokerage

Ativo permits clients to direct the use of a particular broker-dealer for securities transactions, but such direction must be in writing. A client who directs Ativo to use a particular broker-dealer should understand that doing so will likely increase trading costs for the client. The use of directed broker-dealers will, on occasion, also prevent Ativo from achieving best overall execution. Clients should be certain that the directed broker-dealer can provide adequate price and executions of transactions. A client who designates use of a particular broker-dealer should understand that it will lose the possible advantage which non-designating clients derive from aggregation or block trading of orders for several clients as a single transaction for the purchase or sale of a particular security.

If a client directs the use of a particular broker-dealer, Ativo requests the client specify (1) the general types of securities for which the designated firm should be used and (2) whether the designated firm should be used for all transactions, even though Ativo might be able to obtain a more favorable net price and execution from another broker-dealer in particular transactions. A client who designates use of a particular broker-dealer, including a client who directs use of a broker-dealer who will also serve as custodian (whether or not recommended by Ativo) should consider whether, under that designation, commission expenses, execution, clearance and settlement capabilities, and whatever amount is regarded as allocable to custodian fee, if applicable, will be comparable to those otherwise obtainable by Ativo.

Many of Ativo's clients have established minority, woman, and disadvantage business enterprise ("MWDBE") brokerage goals and either require or strongly encourage the utilization of such brokers. Ativo's policy is to generally allocate at least twenty percent of its brokerage orders to firms that qualify as MWDBE. Therefore, Ativo will ordinarily seek to utilize MWDBE brokers so long as such brokers satisfy all of Ativo's best execution requirements.

Trade Errors

Ativo's policy and practice is to monitor and reconcile all trading activity, identify and resolve any trade errors promptly, document each trade error with appropriate review, and maintain a trade error file.

As a fiduciary, Ativo has the responsibility to effect orders correctly, promptly and in the best interests of our clients. In the event any error occurs in the handling of any client transactions, due to Ativo's actions, or inaction, or actions of others, Ativo's policy is to seek to identify and correct any errors as promptly as possible without disadvantaging the client or benefiting Ativo in any way. Ativo will research the details of the trade error and seek to provide prompt notification to the client(s) impacted after the firm learns the circumstances and details surrounding the error. All trade errors will be escalated to members of the firm's Trading Oversight Committee for review. If there is no client financial loss associated with a noted trade error, members of the Trade Oversight Committee may determine that notification to the client is not needed.

Unless the client is responsible for the error, the client will be made whole for any loss that may have occurred. Ativo will coordinate reimbursement, if necessary, with a representative of the impacted client(s). If a trade error results in a financial gain to a client, the gain will be left in the client's account.

Cross Trades

Cross-trades are an area that can present potential conflicts of interest in that they have the potential to be viewed as favoring one client over another. Ativo prohibits the buying or selling of securities from one client separately managed account to another such account (typically referred to as a "cross trade"). All trades made for client accounts will be executed through domestic and foreign stock exchanges, broker-dealers, and over-the-counter markets. However, in the event of any change in the firm's policy, any such change must be approved by management, any cross transactions would only be allowed after appropriate authorizations, reviews, approvals, disclosures, reporting and meeting appropriate regulatory requirements and maintaining proper records.

Short Sales and Risk Limits

Ativo restricts shorting equity securities in client portfolios. Also, Ativo established risk limits to help prevent trade execution errors. The below limits were communicated to all Approved Broker-Dealers. These limits are communicated to any new brokers that the Trading Oversight Committee approves. These limits will be periodically reviewed by the Trading Oversight Committee and updated, if needed.

- Single Stock Limit: \$10,000,000
- Basket Limit: \$20,000,000

Brokers will require verbal or written approval to continue with the execution if, at any time, these limits are exceeded. Moreover, for international baskets, Ativo recommends that its brokers confirm orders (shares, dollar totals) with an Ativo trader before commencing with execution of the order.

Item 13 Review of Accounts

The underlying security positions in client accounts are continuously monitored. Separately managed accounts are ordinarily reviewed and reconciled daily to ensure conformity with portfolio strategy and client guidelines. The Operations Manager and Chief Compliance Officer oversee such reviews.

Statements and confirmations of transactions are provided by the client's broker or custodian with copies or access to/for Ativo. The Marketing Team also provides a quarterly analysis of accounts to clients which will include reports on performance, income and expense, realized and unrealized gains and losses, purchases and sales and largest holdings. Alternatively, the Marketing Team will provide client reports according to client requirements and frequency.

Item 14 Client Referrals and Other Compensation

Client Referrals

Our firm does not currently pay referral fees to independent persons or firms ("Solicitors") for

introducing clients to us, but we are not restricted from determining to do so in the future. If we were to pay a referral fee pursuant to a written agreement, we would require the Solicitor to provide the prospective client with a copy of this document (our *Firm Brochure*) and a separate disclosure statement that includes the following information:

- the Solicitor's name and relationship with our firm;
- the fact that the Solicitor is being paid a referral fee;
- the amount of the fee; and
- whether the fee paid to us by the client will be increased above our normal fees in order to compensate the Solicitor.

As a matter of firm practice, the advisory fees paid to us by clients referred by solicitors will not be increased as a result of any referral.

It is Ativo's policy not to accept or allow our related persons to accept any form of compensation, including cash, sales awards or other prizes, from a non-client in conjunction with the advisory services we provide to our clients.

Item 15 Custody

As part of Ativo's billing process, the client's custodian is advised of the amount of the fee to be deducted from that client's account. On at least a quarterly basis, the custodian is required to send to the client a statement showing all transactions within the account during the reporting period.

Because the custodian generally does not calculate the amount of the fee to be deducted, it is important for clients to carefully review their custodial statements to verify the accuracy of the calculation, among other things. Clients should contact us directly if they believe that there may be an error in their statement.

In addition to the periodic statements that clients receive directly from their custodians, we also send account statements or other customized reports directly to our clients on a monthly or quarterly basis. We urge our clients to carefully review this information to ensure that all account transactions, holdings and values are correct and current.

Ativo and Ativo Global Funds, LLC are deemed to have custody of each Private Fund's assets under the Advisers Act and related SEC rules. Ativo and Ativo Global Funds, LLC comply with the Advisers Act custody rules by delivering audited financial statements for each Private Fund to its investors within 120 days after the end of the Private Funds' fiscal year.

Our firm does not otherwise have actual or constructive custody of client accounts.

Item 16 Investment Discretion

Clients generally hire us to provide discretionary asset management services. We typically place trades in a client's account without contacting the client prior to each trade to obtain the client's permission.

Our discretionary authority includes the ability to do the following without contacting the client:

- Determine the security to buy or sell; and/or
- Determine the amount of the security to buy or sell

Clients give us discretionary authority when they sign a discretionary Investment Management Agreement with our firm, and may limit this authority by giving us written instructions. Clients may also change/amend such limitations by once again providing us with written instructions.

Item 17 Voting Client Securities

Where agreed to by a client, we will vote proxies in its best interests and in accordance with our established policies and procedures. Ordinarily, this will involve reliance on the recommendations of Glass Lewis, a proxy consultant. Ativo ordinarily does not vote proxies for accounts maintained at GSCS.

Ativo will vote or abstain from voting proxies for the Private Funds in its discretion. To the extent that Ativo votes proxies on behalf of a Private Fund, it will do so in the best interest of the Private Fund. Ordinarily, this will involve reliance on the recommendations of Glass Lewis, a proxy consultant.

Our firm will retain all proxy voting books and records for the requisite period of time, including a copy of each proxy statement received, a record of each vote cast, a copy of any document created by us that was material to making a decision how to vote proxies, and a copy of each written client request for information on how the adviser voted proxies. If our firm has a conflict of interest in voting a particular action, we will notify the client of the conflict and retain an independent third-party to cast a vote.

Clients may obtain a copy of our complete proxy voting policies and procedures by contacting Ativo's Operations Team (312-263-7600 or operations@ativocapital.com) by telephone, e-mail, or in writing. Clients may request, in writing, information on how proxies for its shares were voted. If a client requests a copy of our complete proxy policies and procedures or how we voted proxies for its account(s), we will promptly provide such information to the client.

We will neither advise nor act on behalf of the client in legal proceedings involving companies whose securities are held in the client's account(s), including, but not limited to, the filing of "Proofs of Claim" in class action settlements. If desired, clients may direct us to transmit copies of class action notices to the client or a third-party. Upon such direction, we will make commercially reasonable efforts to forward such notices in a timely manner.

With respect to ERISA accounts, we will vote proxies unless the plan documents specifically reserve the plan sponsor's right to vote proxies. To direct us to vote a proxy in a particular manner, clients should contact Ativo's Operations Team (312-263-7600 or operations@ativocapital.com) by telephone, e-mail, or in writing.

You can instruct us to vote proxies according to particular criteria (for example, to always vote with management, or to vote for or against a proposal to allow a so-called "poison pill" defense against a possible takeover). These requests must be made in writing. You can also instruct us on how to cast your vote in a particular proxy contest by contacting Ativo's Operations Team (312-263-7600 or operations@ativocapital.com).

Item 18 Financial Information

Registered investment advisers are required in this section to provide you with certain financial information or disclosures about the firm's financial condition. Ativo has no financial commitment that impairs its ability to meet contractual and fiduciary commitments to clients, and has not been the subject of a bankruptcy proceeding.
