FEES AND COMPENSATION

The following are the types of costs and expenses for clients availing the Discretionary portfolio management Advisory Services of SHI. The fee can be in the form of a recurring charge based on the asset size held within the Portfolio. Management fees range from 1% to 2% (depending on the size of the portfolio) each year of the value of the Client's Portfolio. **The Fee structure will be agreed and listed in the Discretionary Portfolio Management Agreement.**

SHI charges a fee between 1% and 2% annually (payable quarterly), in advance, on the total market value of the assets in the client's portfolio. The portfolio value is determined on the last day of the calendar quarter. Unless SHI has approved a prior arrangement, fees are paid directly from the client's account.

The management fee for a portfolio that is opened and/or funded during a calendar quarter will be prorated based on the value of the portfolio assets as of the date SHI assumes management authority and the remaining days of that quarter.

A client has the right to rescind the management contract within thirty (30) days of its execution by client and the client shall owe no advisory fee to SHI. Following the thirty day rescission period, either SHI or the client may terminate the services agreement at any time by written notice to the other.

If either party terminates the services agreement during a quarter for which fees have been paid, SHI will prorate the fee paid on the basis of the number of days in the calendar quarter, and promptly return the unearned portion of the fee to the client.

Clients may incur additional brokerage and transaction fees and costs imposed by the portfolio custodian on purchases or sales of assets in the clients' portfolio. These transaction charges are usually small and incidental to the purchase or sale of an asset.

SHI does not represent that its fees are the lowest available and clients are advised that lower fees for comparable services may be available from other sources.

ITEM 6

PERFORMANCE-BASED FEES AND SIDE-BY-SIDE MANAGEMENT

SHI does not base its fees on a share of the capital gains or capital appreciation of managed portfolios. SHI does not use a performance base fee structure.

ITEM 7

ITEM 8

METHODS OF ANALYSIS, STRATEGIES AND RISK

SHI management incorporates direct assets analysis, which is the technical side of our discretionary portfolio management advisory service. This makes our portfolio approach valuable for clients.

Portfolio Analysis:

For new or existing portfolios, we evaluate assets based on their individuality and their contribution to the aggregate performance rather than simply on the isolated characteristics of the assets themselves. When performing portfolio analysis, we gather information about the individual assets available and then look at adjustments that would assist the clients to meet their goals. We use portfolio modeling to investigate scenarios, and understand the probability of meeting goals. Our approach incorporates several steps, each customized to the client's unique situation:

- i. Understand the client's business needs and expectations
- ii. Data Collection: Economic (Cross Border) and Performance
- iii. Calculate computed metrics
- iv. Breakdown of Dependencies & Targets
- v. Synthesized and Summarized Analysis

Portfolio Managing

With good judgment we aggressively administrate clients' assets - Jointly we will define clients goals, terms, and risk levels - We provide our client with economic analysis and individual industry analysis **[TAILORED MADE FOR CLIENTS]**. Our executives maintain continuous vigilance throughout the entire Portfolio's lifecycle thereby being able to provide clients with strategic information on rapid changes to assets.

Risk

Ongoing active monitoring of risk positions is an integral part of SHI management activities. This task is primarily performed by a risk team in close cooperation with our portfolio managers.

We continuously enhance our team with the most modern technology to know more about business risk and country risk. SHI is smarter about how it does business locally and abroad by working with & developing the people directly involved in the day to day operation of the assets thereby increases performance and enhances the assets profit.

Each member of our risk unit has relevant expertise and experience in risks assessment. SHI also have procedures in place intended to identify at an early stage risk exposures for which there may be an increase of loss for client. When we identify where problems might arise, the respective exposure is generally placed on a watch list and details are informed to clients.

Industry Risk Management

To manage industry risk, we have grouped our corporate and consultants counterparties into various industry sub-portfolios. For each of these sub-portfolios we gather and prepare reports to keep track of industry developments and risks to clients' portfolio and reviews concentration risks.

In addition the development of the industry sub-portfolios is constantly monitored during the year and is compared to the sub-portfolio strategies. Regular overviews are prepared on recent development to discuss with client clients and for them to take action if necessary.

Cross Border Portfolio Assets Risk

In the case of cross border assets our main target is to identify and manage the excess of risks associated with conducting businesses or managing commercial real estate abroad – and how to think outside the box to be able to anticipate the impact of change on business operations or commercial real estate management. Effective country risk assessment is all about combining the right information with the right tools, instincts and response to identify, avoid, and report to client.
