Item 4: Advisory Business

A. Description of the Advisory Firm

Independent Wealth Advisors (hereinafter “IWA”) is a Limited Liability Company organized in the State of North Carolina. The firm was formed in October 2023, and the principal owners are David Joseph Hellinger and Jakub Martin Kreuter.

B. Types of Advisory Services

Portfolio Management Services

IWA offers ongoing portfolio management services based on the individual goals, objectives, time horizon, and risk tolerance of each client. IWA creates an Investment Policy Statement for each client, which outlines the client’s current situation (income, tax levels, and risk tolerance levels) and then constructs a plan to aid in the selection of a portfolio that matches each client's specific situation. Portfolio management services include, but are not limited to, the following:

- Investment strategy
- Asset allocation
- Risk tolerance
- Personal investment policy
- Asset selection
- Regular portfolio monitoring

IWA evaluates the current investments of each client with respect to their risk tolerance levels and time horizon. IWA will request discretionary authority from clients in order to select securities and execute transactions without permission from the client prior to each transaction. Risk tolerance levels are documented in the Investment Policy Statement, which is given to each client.

IWA seeks to provide that investment decisions are made in accordance with the fiduciary duties owed to its accounts and without consideration of IWA’s economic, investment or other financial interests. To meet its fiduciary obligations, IWA attempts to avoid, among other things, investment or trading practices that systematically advantage or disadvantage certain client portfolios, and accordingly, IWA’s policy is to seek fair and equitable allocation of investment opportunities/transactions among its clients to avoid favoring one client over another over time. It is IWA’s policy to allocate investment opportunities and transactions it identifies as being appropriate and prudent among its clients on a fair and equitable basis over time.

Strategic Wealth Management Platform (SWM) & Strategic Wealth Management Platform II (SWM II)

SWM and SWM II offer clients an asset management account that allows the IAR to direct and manage specified client assets. The difference between SWM and SWM II is the type of fee charged. On the SWM platform clients pay an asset based management fee and

separate transaction costs. On the SWM II platform, clients pay a single wrap fee for advisory services and execution of transactions. IWA employs a Portfolio Analyst who is responsible for the review, analysis and due diligence of various investment vehicles. The Portfolio Analyst presents information on these investment vehicles to the IWA's Investment Committee. The Investment Committee has created different models to be used by the IARs depending on the client's investment objective. The Investment Committee meets monthly, or more frequently as needed, to review the models and determine what, if any, changes may be needed based on market conditions, performance, etc. The IARs can choose to use these models within the SWM and SWM II platform; however, they still have the flexibility to deviate from the model to suit the individual client's needs.

Financial Planning

Financial plans and financial planning may include, but are not limited to: investment planning; life insurance; tax concerns; retirement planning; college planning; and debt/credit planning.

Services Limited to Specific Types of Investments

IWA generally limits its investment advice to mutual funds, fixed income securities, real estate funds (including REITs), equities, ETFs (including ETFs in the gold and precious metal sectors), treasury inflation protected/inflation linked bonds, commodities and non-U.S. securities. IWA may use other securities as well to help diversify a portfolio when applicable.

Written Acknowledgement of Fiduciary Status

When we provide investment advice to you regarding your retirement plan account or individual retirement account, we are fiduciaries within the meaning of Title I of the Employee Retirement Income Security Act and/or the Internal Revenue Code, as applicable, which are laws governing retirement accounts. We also have a fiduciary duty under the Investment Advisers Act of 1940 with respect to all client accounts. The way we make money creates some conflicts with your interests, so we operate under a special rule that requires us to act in your best interest and not put our interest ahead of yours. Under this special rule's provisions, we must:

- Meet a professional standard of care when making investment recommendations (give prudent advice);
- Never put our financial interests ahead of yours when making recommendations (give loyal advice);
- Avoid misleading statements about conflicts of interest, fees, and investments;
- Follow policies and procedures designed to ensure that we give advice that is in your best interest;
- Charge no more than is reasonable for our services; and
- Give you basic information about conflicts of interest.

C. Client Tailored Services and Client Imposed Restrictions

IWA offers the same suite of services to all of its clients. However, specific client investment strategies and their implementation are dependent upon the client Investment Policy Statement which outlines each client's current situation (income, tax levels, and risk tolerance levels). Clients may not impose restrictions in investing in certain securities or types of securities in accordance with their values or beliefs.

D. Wrap Fee Programs

IWA acts as portfolio manager in a wrap fee program, which is an investment program where the client pays one stated fee that includes management fees, transaction costs, and certain other administrative fees. The wrap fee program is sponsored by IWA and clients utilizing the wrap fee program should also review the sponsor's separate Wrap Fee Program Brochure. IWA manages the investments in the wrap fee program, but does not manage those wrap fee accounts any differently than it would manage non-wrap fee accounts. IWA receives the advisory fee set forth in the wrap fee brochure as a management fee under the wrap fee program.

Although clients do not pay a transaction charge for transactions in a SWM II account, clients should be aware that IWA pays LPL Financial transaction charges for those transactions. The transaction charges paid by IWA vary based on the type of transaction (e.g., mutual fund, equity or ETF) and for mutual funds based on whether or not the mutual fund pays 12b-1 fees and/or recordkeeping fees to LPL Financial. Transaction charges paid by the IWA for equities and ETFs are \$9. For mutual funds, the transaction charges range from \$0 to \$26.50. Because IWA pays the transaction charges in SWM II accounts, there is a conflict of interest in cases where the mutual fund is offered at both \$0 and \$26.50. Clients should understand that the cost to IWA of transaction charges may be a factor that IWA considers when deciding which securities to select and how frequently to place transactions in a SWM II account.

In many instances, LPL Financial makes available mutual funds in a SWM II account that offer various classes of shares, including shares designated as Class A Shares and shares designed for advisory programs, which can be titled, for example, as "Class I," "institutional," "investor," "retail," "service," "administrative" or "platform" share classes ("Platform Shares"). The Platform Share class offered for a particular mutual fund in SWM II in many cases will not be the least expensive share class that the mutual fund makes available, and was selected by LPL Financial in certain cases because the share class pays LPL Financial compensation for the administrative and recordkeeping services LPL Financial provides to the mutual fund. Clients should understand that another financial services firm may offer the same mutual fund at a lower overall cost to the investor than is available through SWM II. In other instances, a mutual fund may offer only Class A

Shares, but another similar mutual fund may be available that offers Platform Shares. Class A Shares typically pay LPL Financial a 12b-1 fee for providing shareholder services, distribution, and marketing expenses (“brokerage-related services”) to the mutual funds. Platform Shares generally are not subject to 12b-1 fees. As a result of the different expenses of the mutual fund share classes, it is generally more expensive for a client to own Class A Shares than Platform Shares. An investor in Platform Shares will pay lower fees over time and keep more of his or her investment returns than an investor who holds Class A Shares of the same fund.

E. Assets Under Management

IWA has the following assets under management:

Discretionary Amounts:	Non-discretionary Amounts:	Date Calculated:
\$0	\$0	December 2023

Item 5: Fees and Compensation

A. Fee Schedule

Portfolio Management Fees

Total Assets Under Management	Annual Fee
\$10,000 - AND UP	Up to 1.25%

The advisory fee is calculated using the value of the assets on the last business day of the prior billing period.

These fees are generally negotiable and the final fee schedule will be memorialized in the client’s advisory agreement. Clients may terminate the agreement without penalty, for full refund of IWA’s fees, within five business days of signing the Investment Advisory Contract. Thereafter, clients may terminate the Investment Advisory Contract immediately upon written notice.

Financial Planning Fees

Fixed Fees

The negotiated fixed rate for creating client financial plans is between \$500 and \$20,000.

Clients may terminate the agreement without penalty, for full refund of IWA's fees, within five business days of signing the Financial Planning Agreement. Thereafter, clients may terminate the Financial Planning Agreement generally upon written notice.

B. Payment of Fees

Payment of Portfolio Management Fees

Portfolio management fees are withdrawn directly from the client's accounts with client's written authorization on a quarterly basis. Fees are paid in advance.

Payment of Financial Planning Fees

Financial planning fees are paid via check and wire.

Fixed financial planning fees are paid 0-100% in advance, but never more than six months in advance, with the remainder due upon presentation of the plan or can be paid monthly as negotiated with the client.

C. Client Responsibility For Third Party Fees

Clients that are not in IWA's wrap program are responsible for the payment of all third party fees (i.e. custodian fees, brokerage fees, mutual fund fees, transaction fees, etc.). Those fees are separate and distinct from the fees and expenses charged by IWA. Please see Item 12 of this brochure regarding broker-dealer/custodian.

For clients in IWA's wrap program, IWA will wrap third party fees (i.e., custodian fees, brokerage fees, mutual fund fees, transaction fees, etc.) for wrap fee portfolio management accounts. IWA will charge clients one fee, and pay all transaction fees using the fee collected from the client. Accounts participating in the wrap fee program are not charged higher advisory fees based on trading activity, but clients should be aware that IWA has an incentive to limit trading activities for those accounts since the firm absorbs those transaction costs.

D. Prepayment of Fees

IWA collects fees in advance. Refunds for fees paid in advance but not yet earned will be refunded on a prorated basis and returned within fourteen days to the client via check, or return deposit back into the client's account.

For all asset-based fees paid in advance, the fee refunded will be equal to the balance of the fees collected in advance minus the daily rate* times the number of days elapsed in the billing period up to and including the day of termination. (*The daily rate is calculated by dividing the annual asset-based fee rate by 365.)

Fixed fees that are collected in advance will be refunded based on the prorated amount of work completed at the point of termination.

E. Outside Compensation For the Sale of Securities to Clients

David Joseph Hellinger and Jakub Martin Kreuter are registered representatives of a broker-dealer. David Joseph Hellinger and Jakub Martin Kreuter are also insurance agents. In these roles, they accept compensation for the sale of investment products to IWA clients.

1. This is a Conflict of Interest

Supervised persons may accept compensation for the sale of investment products, including asset based sales charges or service fees from the sale of mutual funds to IWA's clients. This presents a conflict of interest and gives the supervised person an incentive to recommend products based on the compensation received rather than on the client's needs. When recommending the sale of investment products for which the supervised persons receives compensation, IWA will document the conflict of interest in the client file and inform the client of the conflict of interest.

2. Clients Have the Option to Purchase Recommended Products From Other Brokers

Clients always have the option to purchase IWA recommended products through other brokers or agents that are not affiliated with IWA.

3. Commissions are not IWA's primary source of compensation for advisory services

Commissions are not IWA's primary source of compensation for advisory services.

4. Advisory Fees in Addition to Commissions or Markups

Advisory fees that are charged to clients are not reduced to offset the commissions or markups on investment products recommended to clients.

Item 6: Performance-Based Fees and Side-By-Side Management

IWA does not accept performance-based fees or other fees based on a share of capital gains on or capital appreciation of the assets of a client.

Item 7: Types of Clients

IWA generally provides advisory services to the following types of clients:

- ❖ Individuals
- ❖ High-Net-Worth Individuals

There is an account minimum of \$10,000, which may be waived by IWA in its discretion.

Item 8: Methods of Analysis, Investment Strategies, & Risk of Loss

A. Methods of Analysis and Investment Strategies

Methods of Analysis

IWA's methods of analysis include Cyclical analysis, Fundamental analysis, Modern portfolio theory and Quantitative analysis.

Cyclical analysis involves the analysis of business cycles to find favorable conditions for buying and/or selling a security.

Fundamental analysis involves the analysis of financial statements, the general financial health of companies, and/or the analysis of management or competitive advantages.

Modern portfolio theory is a theory of investment that attempts to maximize portfolio expected return for a given amount of portfolio risk, or equivalently minimize risk for a given level of expected return, each by carefully choosing the proportions of various asset.

Quantitative analysis deals with measurable factors as distinguished from qualitative considerations such as the character of management or the state of employee morale, such as the value of assets, the cost of capital, historical projections of sales, and so on.

Investment Strategies

IWA uses long term trading.

Investing in securities involves a risk of loss that you, as a client, should be prepared to bear.

B. Material Risks Involved

Methods of Analysis

Cyclical analysis assumes that the markets react in cyclical patterns which, once identified, can be leveraged to provide performance. The risks with this strategy are two-fold: 1) the markets do not always repeat cyclical patterns; and 2) if too many investors begin to implement this strategy, then it changes the very cycles these investors are trying to exploit.

Fundamental analysis concentrates on factors that determine a company's value and expected future earnings. This strategy would normally encourage equity purchases in stocks that are undervalued or priced below their perceived value. The risk assumed is that the market will fail to reach expectations of perceived value.

Modern portfolio theory assumes that investors are risk averse, meaning that given two portfolios that offer the same expected return, investors will prefer the less risky one. Thus, an investor will take on increased risk only if compensated by higher expected returns. Conversely, an investor who wants higher expected returns must accept more risk. The exact trade-off will be the same for all investors, but different investors will evaluate the trade-off differently based on individual risk aversion characteristics. The implication is that a rational investor will not invest in a portfolio if a second portfolio exists with a more favorable risk-expected return profile – i.e., if for that level of risk an alternative portfolio exists which has better expected returns.

Quantitative analysis Investment strategies using quantitative models may perform differently than expected as a result of, among other things, the factors used in the models, the weight placed on each factor, changes from the factors' historical trends, and technical issues in the construction and implementation of the models.

Investment Strategies

Long term trading is designed to capture market rates of both return and risk. Due to its nature, the long-term investment strategy can expose clients to various types of risk that will typically surface at various intervals during the time the client owns the investments. These risks include but are not limited to inflation (purchasing power) risk, interest rate risk, economic risk, market risk, and political/regulatory risk.

Investing in securities involves a risk of loss that you, as a client, should be prepared to bear.

C. Risks of Specific Securities Utilized

Clients should be aware that there is a material risk of loss using any investment strategy. The investment types listed below (leaving aside Treasury Inflation Protected/Inflation Linked Bonds) are not guaranteed or insured by the FDIC or any other government agency.

Mutual Funds: Investing in mutual funds carries the risk of capital loss and thus you may lose money investing in mutual funds. All mutual funds have costs that lower investment returns. The funds can be of bond “fixed income” nature (lower risk) or stock “equity” nature.

Equity investment generally refers to buying shares of stocks in return for receiving a future payment of dividends and/or capital gains if the value of the stock increases. The value of equity securities may fluctuate in response to specific situations for each company, industry conditions and the general economic environments.

Fixed income investments generally pay a return on a fixed schedule, though the amount of the payments can vary. This type of investment can include corporate and government debt securities, leveraged loans, high yield, and investment grade debt and structured products, such as mortgage and other asset-backed securities, although individual bonds may be the best known type of fixed income security. In general, the fixed income market is volatile and fixed income securities carry interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) Fixed income securities also carry inflation risk, liquidity risk, call risk, and credit and default risks for both issuers and counterparties. The risk of default on treasury inflation protected/inflation linked bonds is dependent upon the U.S. Treasury defaulting (extremely unlikely); however, they carry a potential risk of losing share price value, albeit rather minimal. Risks of investing in foreign fixed income securities also include the general risk of non-U.S. investing described below.

Exchange Traded Funds (ETFs): An ETF is an investment fund traded on stock exchanges, similar to stocks. Investing in ETFs carries the risk of capital loss (sometimes up to a 100% loss in the case of a stock holding bankruptcy). Areas of concern include the lack of transparency in products and increasing complexity, conflicts of interest and the possibility of inadequate regulatory compliance. Risks in investing in ETFs include trading risks, liquidity and shutdown risks, risks associated with a change in authorized participants and non-participation of authorized participants, risks that trading price differs from indicative net asset value (iNAV), or price fluctuation and disassociation from the index being tracked. With regard to trading risks, regular trading adds cost to your portfolio thus counteracting the low fees that one of the typical benefits of ETFs. Additionally, regular trading to beneficially “time the market” is difficult to achieve. Even paid fund managers struggle to do this every year, with the majority failing to beat the relevant indexes. With regard to liquidity and shutdown risks, not all ETFs have the same level of liquidity. Since ETFs are at least as liquid as their underlying assets, trading conditions are more accurately reflected in implied liquidity rather than the average daily volume of the ETF itself. Implied liquidity is a measure of what can potentially be traded in ETFs based on its underlying assets. ETFs are subject to market volatility and the risks of their underlying securities, which may include the risks associated with investing in smaller companies, foreign securities, commodities, and fixed income investments (as applicable). Foreign securities in particular are subject to interest rate, currency exchange rate, economic, and political risks, all of which are magnified in emerging markets. ETFs that target a small universe of securities, such as a specific region or market sector, are generally subject to greater market volatility, as well as to the specific risks associated with

that sector, region, or other focus. ETFs that use derivatives, leverage, or complex investment strategies are subject to additional risks. Precious Metal ETFs (e.g., Gold, Silver, or Palladium Bullion backed “electronic shares” not physical metal) specifically may be negatively impacted by several unique factors, among them (1) large sales by the official sector which own a significant portion of aggregate world holdings in gold and other precious metals, (2) a significant increase in hedging activities by producers of gold or other precious metals, (3) a significant change in the attitude of speculators and investors. The return of an index ETF is usually different from that of the index it tracks because of fees, expenses, and tracking error. An ETF may trade at a premium or discount to its net asset value (NAV) (or indicative value in the case of exchange-traded notes). The degree of liquidity can vary significantly from one ETF to another and losses may be magnified if no liquid market exists for the ETF’s shares when attempting to sell them. Each ETF has a unique risk profile, detailed in its prospectus, offering circular, or similar material, which should be considered carefully when making investment decisions.

Real estate funds (including REITs) face several kinds of risk that are inherent in the real estate sector, which historically has experienced significant fluctuations and cycles in performance. Revenues and cash flows may be adversely affected by: changes in local real estate market conditions due to changes in national or local economic conditions or changes in local property market characteristics; competition from other properties offering the same or similar services; changes in interest rates and in the state of the debt and equity credit markets; the ongoing need for capital improvements; changes in real estate tax rates and other operating expenses; adverse changes in governmental rules and fiscal policies; adverse changes in zoning laws; the impact of present or future environmental legislation and compliance with environmental laws.

Commodities are tangible assets used to manufacture and produce goods or services. Commodity prices are affected by different risk factors, such as disease, storage capacity, supply, demand, delivery constraints and weather. Because of those risk factors, even a well-diversified investment in commodities can be uncertain.

Non-U.S. securities present certain risks such as currency fluctuation, political and economic change, social unrest, changes in government regulation, differences in accounting and the lesser degree of accurate public information available.

Past performance is not indicative of future results. Investing in securities involves a risk of loss that you, as a client, should be prepared to bear.

Item 9: Disciplinary Information

A. Criminal or Civil Actions

There are no criminal or civil actions to report.

B. Administrative Proceedings

There are no administrative proceedings to report.

C. Self-regulatory Organization (SRO) Proceedings

There are no self-regulatory organization proceedings to report.

Item 10: Other Financial Industry Activities and Affiliations

A. Registration as a Broker/Dealer or Broker/Dealer Representative

As a registered representative of LPL Financial, David Joseph Hellinger accepts compensation for the sale of securities.

As a registered representative of LPL Financial, Jakub Martin Kreuter accepts compensation for the sale of securities.

As a registered representative of LPL Financial, Cristy Head accepts compensation for the sale of securities.

B. Registration as a Futures Commission Merchant, Commodity Pool Operator, or a Commodity Trading Advisor

Neither IWA nor its representatives are registered as or have pending applications to become either a Futures Commission Merchant, Commodity Pool Operator, or Commodity Trading Advisor or an associated person of the foregoing entities.

C. Registration Relationships Material to this Advisory Business and Possible Conflicts of Interests

David Joseph Hellinger is a registered representative of LPL Financial and from time to time, will offer clients advice or products from those activities. Clients should be aware that these services pay a commission or other compensation and involve a conflict of interest, as commissionable products conflict with the fiduciary duties of a registered investment adviser. IWA always acts in the best interest of the client, including with respect to the sale of commissionable products to advisory clients. Clients are in no way required to implement the plan through any representative of IWA in such individual's capacity as a registered representative.

David Joseph Hellinger is a licensed insurance agent with LPL Financial. This activity creates a conflict of interest since there is an incentive to recommend insurance products based on commissions or other benefits received from the insurance company, rather than

on the client's needs. Additionally, the offer and sale of insurance products by supervised persons of IWA are not made in their capacity as a fiduciary, and products are limited to only those offered by certain insurance providers. IWA addresses this conflict of interest by requiring its supervised persons to act in the best interest of the client at all times, including when acting as an insurance agent. IWA periodically reviews recommendations by its supervised persons to assess whether they are based on an objective evaluation of each client's risk profile and investment objectives rather than on the receipt of any commissions or other benefits. IWA will disclose in advance how it or its supervised persons are compensated and will disclose conflicts of interest involving any advice or service provided. At no time will there be tying between business practices and/or services (a condition where a client or prospective client would be required to accept one product or service conditioned upon the selection of a second, distinctive tied product or service). No client is ever under any obligation to purchase any insurance product. Insurance products recommended by IWA's supervised persons may also be available from other providers on more favorable terms, and clients can purchase insurance products recommended through other unaffiliated insurance agencies.

Jakub Martin Kreuter is a registered representative of LPL Financial and from time to time, will offer clients advice or products from those activities. Clients should be aware that these services pay a commission or other compensation and involve a conflict of interest, as commissionable products conflict with the fiduciary duties of a registered investment adviser. IWA always acts in the best interest of the client, including with respect to the sale of commissionable products to advisory clients. Clients are in no way required to implement the plan through any representative of IWA in such individual's capacity as a registered representative.

Jakub Martin Kreuter is a licensed insurance agent with LPL Financial. This activity creates a conflict of interest since there is an incentive to recommend insurance products based on commissions or other benefits received from the insurance company, rather than on the client's needs. Additionally, the offer and sale of insurance products by supervised persons of IWA are not made in their capacity as a fiduciary, and products are limited to only those offered by certain insurance providers. IWA addresses this conflict of interest by requiring its supervised persons to act in the best interest of the client at all times, including when acting as an insurance agent. IWA periodically reviews recommendations by its supervised persons to assess whether they are based on an objective evaluation of each client's risk profile and investment objectives rather than on the receipt of any commissions or other benefits. IWA will disclose in advance how it or its supervised persons are compensated and will disclose conflicts of interest involving any advice or service provided. At no time will there be tying between business practices and/or services (a condition where a client or prospective client would be required to accept one product or service conditioned upon the selection of a second, distinctive tied product or service). No client is ever under any obligation to purchase any insurance product. Insurance products recommended by IWA's supervised persons may also be available from other providers on more favorable terms, and clients can purchase insurance products recommended through other unaffiliated insurance agencies.

Cristy Diane Head is a registered representative of LPL Financial and from time to time, will offer clients advice or products from those activities. Clients should be aware that these services pay a commission or other compensation and involve a conflict of interest, as commissionable products conflict with the fiduciary duties of a registered investment adviser. IWA always acts in the best interest of the client, including with respect to the sale of commissionable products to advisory clients. Clients are in no way required to implement the plan through any representative of IWA in such individual's capacity as a registered representative.

D. Selection of Other Advisers or Managers and How This Adviser is Compensated for Those Selections

IWA does not utilize nor select third-party investment advisers.

Item 11: Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

A. Code of Ethics

IWA has a written Code of Ethics that covers the following areas: Prohibited Purchases and Sales, Insider Trading, Personal Securities Transactions, Exempted Transactions, Prohibited Activities, Conflicts of Interest, Gifts and Entertainment, Confidentiality, Service on a Board of Directors, Compliance Procedures, Compliance with Laws and Regulations, Procedures and Reporting, Certification of Compliance, Reporting Violations, Compliance Officer Duties, Training and Education, Recordkeeping, Annual Review, and Sanctions. IWA's Code of Ethics is available free upon request to any client or prospective client.

B. Recommendations Involving Material Financial Interests

IWA does not recommend that clients buy or sell any security in which a related person to IWA or IWA has a material financial interest.

C. Investing Personal Money in the Same Securities as Clients

From time to time, representatives of IWA may buy or sell securities for themselves that they also recommend to clients. This may provide an opportunity for representatives of IWA to buy or sell the same securities before or after recommending the same securities to clients resulting in representatives profiting off the recommendations they provide to clients. Such transactions may create a conflict of interest. IWA will always document any transactions that could be construed as conflicts of interest and will never engage in trading that operates to the client's disadvantage when similar securities are being bought or sold.

D. Trading Securities At/Around the Same Time as Clients' Securities

From time to time, representatives of IWA may buy or sell securities for themselves at or around the same time as clients. This may provide an opportunity for representatives of IWA to buy or sell securities before or after recommending securities to clients resulting in representatives profiting off the recommendations they provide to clients. Such transactions may create a conflict of interest; however, IWA will never engage in trading that operates to the client's disadvantage if representatives of IWA buy or sell securities at or around the same time as clients.

Item 12: Brokerage Practices

A. Factors Used to Select Custodians and/or Broker/Dealers

Custodians/broker-dealers will be recommended based on IWA's duty to seek "best execution," which is the obligation to seek execution of securities transactions for a client on the most favorable terms for the client under the circumstances. Clients will not necessarily pay the lowest commission or commission equivalent, and IWA may also consider the market expertise and research access provided by the broker-dealer/custodian, including but not limited to access to written research, oral communication with analysts, admittance to research conferences and other resources provided by the brokers that may aid in IWA's research efforts. IWA will never charge a premium or commission on transactions, beyond the actual cost imposed by the broker-dealer/custodian.

IWA will require clients to use LPL Financial LLC, CRD#6413.

IWA receives support services and/or products from LPL Financial, many of which assist IWA to better monitor and service program accounts maintained at LPL Financial; however, some of the services and products benefit IWA and not client accounts. These support services and/or products may be received without cost, at a discount, and/or at a negotiated rate, and may include the following:

- investment-related research
- pricing information and market data
- software and other technology that provide access to client account data
- compliance and/or practice management-related publications
- consulting services
- attendance at conferences, meetings, and other educational and/or social events
- marketing support
- computer hardware and/or software
- other products and services used by IWA in furtherance of its investment advisory business operations

LPL Financial may provide these services and products directly, or may arrange for third party vendors to provide the services or products to Advisor. In the case of third party vendors, LPL Financial may pay for some or all of the third party's fees.

These support services are provided to IWA based on the overall relationship between IWA and LPL Financial. It is not the result of soft dollar arrangements or any other express arrangements with LPL Financial that involves the execution of client transactions as a condition to the receipt of services. IWA will continue to receive the services regardless of the volume of client transactions executed with LPL Financial. Clients do not pay more for services as a result of this arrangement. There is no corresponding commitment made by the IWA to LPL or any other entity to invest any specific amount or percentage of client assets in any specific securities as a result of the arrangement. However, because Advisor receives these benefits from LPL Financial, there is a potential conflict of interest. The receipt of these products and services presents a financial incentive for Advisor to recommend that its clients use LPL Financial's custodial platform rather than another custodian's platform.

1. Research and Other Soft-Dollar Benefits

While IWA has no formal soft dollars program in which soft dollars are used to pay for third party services, IWA may receive research, products, or other services from custodians and broker-dealers in connection with client securities transactions ("soft dollar benefits"). IWA may enter into soft-dollar arrangements consistent with (and not outside of) the safe harbor contained in Section 28(e) of the Securities Exchange Act of 1934, as amended. There can be no assurance that any particular client will benefit from soft dollar research, whether or not the client's transactions paid for it, and IWA does not seek to allocate benefits to client accounts proportionate to any soft dollar credits generated by the accounts. IWA benefits by not having to produce or pay for the research, products or services, and IWA will have an incentive to recommend a broker-dealer based on receiving research or services. Clients should be aware that IWA's acceptance of soft dollar benefits may result in higher commissions charged to the client.

2. Brokerage for Client Referrals

IWA receives no referrals from a broker-dealer or third party in exchange for using that broker-dealer or third party.

3. Clients Directing Which Broker/Dealer/Custodian to Use

IWA will require clients to use a specific broker-dealer to execute transactions. Not all advisers require clients to use a particular broker-dealer.

B. Aggregating (Block) Trading for Multiple Client Accounts

IWA does not aggregate or bunch the securities to be purchased or sold for multiple clients. This may result in less favorable prices, particularly for illiquid securities or during volatile market conditions.

Item 13: Review of Accounts

A. Frequency and Nature of Periodic Reviews and Who Makes Those Reviews

Accounts are reviewed at least quarterly by David J Hellinger, Managing Partner and Chief Compliance Officer, with regard to clients' respective investment policies and risk tolerance levels.

All financial planning accounts are reviewed upon financial plan creation and plan delivery by David J Hellinger, Managing Partner and Chief Compliance Officer. Financial planning clients are provided a one-time financial plan concerning their financial situation. After the presentation of the plan, there are no further reports. Clients may request additional plans or reports for a fee.

B. Factors That Will Trigger a Non-Periodic Review of Client Accounts

Reviews may be triggered by material market, economic or political events, or by changes in client's financial situations (such as retirement, termination of employment, physical move, or inheritance).

With respect to financial plans, IWA's services will generally conclude upon delivery of the financial plan.

C. Content and Frequency of Regular Reports Provided to Clients

Each client will receive a quarterly account statement from the custodian.

Each financial planning client will receive the financial plan upon completion.

Item 14: Client Referrals and Other Compensation

A. Economic Benefits Provided by Third Parties for Advice Rendered to Clients (Includes Sales Awards or Other Prizes)

Other than soft dollar benefits as described in Item 12 above, outside compensation of investment adviser representatives in Item 5E above, and the below in Item 14 IWA does

not receive any economic benefit, directly or indirectly from any third party for advice rendered to IWA's clients.

IWA and/or its Dually Registered Persons are incented to join and remain affiliated with LPL Financial and to recommend that clients establish accounts with LPL Financial through the provision of Transition Assistance (discussed in Item 12 above). LPL also provides other compensation to IWA and its Dually Registered Persons, including but not limited to, bonus payments, repayable and forgivable loans, stock awards and other benefits.

The receipt of any such compensation creates a financial incentive for your representative to recommend LPL Financial as custodian for the assets in your advisory account. We encourage you to discuss any such conflicts of interest with your representative before making a decision to custody your assets at LPL Financial.

LPL Financial makes available to IWA various products and services designed to assist IWA in managing and administering client accounts. Many of these products and services may be used to service all or a substantial number of IWA's accounts, including accounts not held with LPL Financial. These include software and other technology that provide access to client account data (such as trade confirmation and account statements); facilitate trade execution (and aggregation and allocation of trade orders for multiple client accounts); provide research, pricing information and other market data; facilitate payment of IWA's fees from its clients' accounts; and assist with back-office functions; recordkeeping and client reporting.

LPL Financial also makes available to IWA other services intended to help IWA manage and further develop its business. Some of these services assist IWA to better monitor and service program accounts maintained at LPL Financial, however, many of these services benefit only IWA, for example, services that assist IWA in growing its business. These support services and/or products may be provided without cost, at a discount, and/or at a negotiated rate, and include practice management-related publications; consulting services; attendance at conferences and seminars, meetings, and other educational and/or social events; marketing support; and other products and services used by IWA in furtherance of the operation and development of its investment advisory business.

Where such services are provided by a third party vendor, LPL Financial will either make a payment to IWA to cover the cost of such services, reimburse IWA for the cost associated with the services, or pay the third party vendor directly on behalf of IWA.

The products and services described above are provided to IWA as part of its overall relationship with LPL Financial. While as a fiduciary IWA endeavors to act in its clients' best interests, the receipt of these benefits creates a conflict of interest because IWA's requirement that clients custody their assets at LPL Financial is based in part on the benefit to IWA of the availability of the foregoing products and services and not solely on the nature, cost or quality of custody or brokerage services provided by LPL Financial. IWA's receipt of some of these benefits may be based on the amount of

advisory assets custodied on the LPL Financial platform.

B. Compensation to Non - Advisory Personnel for Client Referrals

IWA does not directly or indirectly compensate any person who is not advisory personnel for client referrals.

Item 15: Custody

When advisory fees are deducted directly from client accounts at client's custodian, IWA will be deemed to have limited custody of client's assets and must have written authorization from the client to do so. Clients will receive all account statements and billing invoices that are required in each jurisdiction, and they should carefully review those statements for accuracy.

Item 16: Investment Discretion

IWA provides discretionary and non-discretionary investment advisory services to clients. The advisory contract established with each client sets forth the discretionary authority for trading. Where investment discretion has been granted, IWA generally manages the client's account and makes investment decisions without consultation with the client as to when the securities are to be bought or sold for the account, the total amount of the securities to be bought/sold, what securities to buy or sell, or the price per share.

Item 17: Voting Client Securities (Proxy Voting)

IWA will not ask for, nor accept voting authority for client securities. Clients will receive proxies directly from the issuer of the security or the custodian. Clients should direct all proxy questions to the issuer of the security.

Item 18: Financial Information

A. Balance Sheet

IWA neither requires nor solicits prepayment of more than \$1,200 in fees per client, six months or more in advance, and therefore is not required to include a balance sheet with this brochure.

B. Financial Conditions Reasonably Likely to Impair Ability to Meet Contractual Commitments to Clients

Neither IWA nor its management has any financial condition that is likely to reasonably impair IWA's ability to meet contractual commitments to clients.

C. Bankruptcy Petitions in Previous Ten Years

IWA has not been the subject of a bankruptcy petition in the last ten years.
