Form D XML
Technical Specification

Version 2.1.0 | **December 2008**

DRAFT DISCLAIMER:

This DRAFT EDGAR Form D XML Technical Specification (Version 2), posted before Commission approval of potential regulatory changes in this release, is provided as a service to our filing community to assist filers, agents, and software developers in their preparation of responses to potential changes the staff anticipates. Since this is a draft specification, the SEC retains the right to change any part of the specification before the new system release is made final. In addition, the final EDGAR Form D Technical Specification is subject to Commission approval and may be revised before approval or not approved at all. Similarly, the posting of the DRAFT EDGAR Form D Technical Specification (Version 2) does not indicate Commission approval of any pending proposed changes relating to the potential changes reflected in the draft specification. The changes outlined in this draft specification, if approved, are scheduled to take effect on December 15, 2008. The final version of the specification will be made available as and if approved by the Commission on or about December 15, 2008 on the SEC's Public Website.

TABLE OF CONTENTS

1. INTRODUCTION

1.1 Purpose~~URPOSE~~

This document details the valid structure and content of the following Electronic Data Gathering, Analysis, and Retrieval (EDGAR) Form D Extensible Markup Language (XML) submission types.

Submission Type	Description
D	Notice of an offering of securities that is made without registration under the Securities Act in reliance on an exemption provided by Regulation D and Section 4(6) under the Act
D/A	Amendment of a previously filed Form D

This specification provides a basis for creating XML submissions without the use of the EDGAR OnlineForms/XML Website.

The Form D submission file must conform to the EDGAR Form D Submission Taxonomy. The primary enclosed document for the submission must adhere to the EDGAR Form D Document XML Taxonomy. These taxonomies are a collection of XML Schema Definition (.xsd) files that define the structures of EDGAR Form D submissions.

1.2 Summary of Changes

The following changes have been implemented:
- The FormDSubmission.xsd schema file has been updated to mandate that the Date of First Sale or the "First Sale Yet to Occur" checkbox be required if the filing is an amendment of a previous filing.
- Error messages have been modified.
- Corrections have been made to Table 3-4 and Appendix B.

2. EDGAR SCHEMA FILES

These are the Schema files that the EDGAR system uses to validate Form D submissions. They are considered part of this specification and are distributed with this document.

XML Schema File	Scope of File
edgarSubmissionCommon.xsd.xml	Defines the submission "header" fields that can be included in the submission file for Form D and D/A types.
formDSubmission.xsd.xml	Defines elements that are common to all Form D documents.
filedByCompany.xsd.xml	Defines elements that are common to all submission filings like CIK, CCC and Entity Type

stateCodes.xsd.xml	Defines states that are common to all the Form D documents

These files define the valid data elements for a~~n~~ Form D submission, the hierarchy and sequencing of these elements, data types, valid values, maximum lengths, number of occurrences, etc.

It is recommended that you download these files and use them for your own validation prior to transmitting a submission. This will greatly reduce the likelihood of receiving an EDGAR Suspense error. These Schema files contain several annotations that describe the nature of the content of some of the elements.

EDGAR does perform several validation checks that are not related to the Schema files, so it is possible for a submission to meet all the Schema constraints and still be SUSPENDED ~~or BLOCKED~~. For instance, EDGAR verifies that each Primary Issuer Central Index Key (CIK)/ CIK Confirmation Code (CCC) pair is valid.

2.1 Key Schema Indicators

We assume the filer is familiar with the basics of the XML language, Namespaces, and the XML Schema Definition language. If not, you can find numerous references on the World Wide Web. One recommended website that provides several useful tutorials and examples is *http://www.w3schools.com/*.

We would, however, like to highlight the Schema language features used most heavily in the EDGAR Form D Submission Schema files. These are:

Indicator	Purpose
<sequence>	Specifies that child elements must appear in a specific order. This indicator is used with each element hierarchy. Elements must always appear in the order shown in Sections 3.4 and 3.5.
<choice>	Specifies that either one child element or another can occur
<minOccurs>	Specifies the minimum number of times that an element can occur
<maxOccurs>	Specifies the maximum number of times that an element can occur

The default value for both the <minOccurs> and <maxOccurs> occurrence indicator is 1. An optional field will have a <minOccurs> value of zero.

This excerpt from the formDSubmission.xsd Schema file includes all four of these indicators.

```
<xs:complexType name="BUSINESS_COMBINATION_TRANSACTION_TYPE">
    <xs:sequence>
        <xs:element name="isBusinessCombinationTransaction" type="TRUE_FALSE_TYPE"/>
        <xs:element name="clarificationOfResponse" type="STRING_255_TYPE" minOccurs="0"/>
    </xs:sequence>
</xs:complexType>
<xs:complexType name="STATES_OF_SOLICITATION_LIST">
    <xs:choice>
        <xs:element name="state" type="STATE_COUNTRY_CODE" minOccurs="0"
maxOccurs="unbounded"/>
        <xs:element name="value" fixed="All States" minOccurs="0"/>
    </xs:choice>

</xs:complexType>
```

This is a section of XML that conforms to the Schema definition given above.

```
<businessCombinationTransaction>
        <isBusinessCombinationTransaction>yes</isBusinessCombinationTransaction>
        </businessCombinationTransaction>
<statesOfSolicitationList>
        <state>All States</state>
</statesOfSolicitationList>
```

3. XML SCHEMAS

This section summarizes the restrictions and constraints imposed on the content of the Form D submission types. These rules are enforced by the Schema files and by EDGAR submission processing applications.

The Schema files cannot enforce all the rules concerning data content, so it is possible for a submission to satisfy all the Schema constraints and still be SUSPENDED ~~or BLOCKED~~ by EDGAR.

3.1 Schema Table Column Definitions

The following defines the columns in the two Schema Summation tables provided in Sections 3.4 and 3.5.

Column Name	Description
Level	Depth of element in the XML node hierarchy
Order	Order in which elements must appear
Data Type	See the Data Type Constraints table for a detailed description
Element Name	Name of the XML element. This is case-sensitive
Max Length	Maximum length for String fields. EDGAR database stores up to this number of characters
Choice List	This name refers to a list of valid values for this field. The Choice List Values section provides the valid lists
Max Occur	Maximum times a set of elements may be repeated
D	Indicates applicability of this field to this submission type
D/A	Indicates applicability of this field to this submission type

3.2 Data Type Constraints

Each entry in the "Data Type" column of these tables will be one of these values.

Data Type	Constraints
boolean	Indicate a "true" value with either a "1" or the word "true." Indicate a "false" value with either a "0" or the word "false." A boolean element may not have a null or blank value. This is a Schema violation and will cause a SUSPENSE error.
date	Must be of the format YYYY-MM-DD. A date element may not have a null or blank value. This is a Schema violation and will cause a SUSPENSE error. Do not include a date element at all if your goal is to not provide an optional date.
decimal	Only valid characters are 0-9 and a period. Cannot contain commas, a minus sign, or a dollar sign, or parentheses. EDGAR stores up to four decimal places. A decimal element may not have a null or blank value. This is a Schema violation and will cause a SUSPENSE error. Do not include a decimal element at all if your goal is to not provide an optional number. Minimum allowable value = 0 Maximum allowable value = ~~99~~99999999999999
string	Should not be longer than the length shown in the tables in Sections 3.4 and 3.5. <signatureName>, and <contactEmailAddress> elements exactly as provided. All other values are stored in the database as uppercase. You must use special escape sequences to represent these four characters: <table><tr><th>Character</th><th>Escape Sequence</th></tr><tr><td><</td><td>&lt; or &#60;</td></tr><tr><td>></td><td>&gt; or &#62;</td></tr><tr><td>&</td><td>&amp; or &#38;</td></tr><tr><td>"</td><td>&quot; or &#34;</td></tr></table>
NV	These fields cannot have a value. They only contain other XML elements; however, they do need to be present for proper validation

3.3 Applicability of Schema Elements

Each entry in the Form D and D/A submission/document types columns in the tables in Sections 3.4 and 3.5 will have one of these values.

Value	Description
m	Mandatory
m(1)	While the Entity Name fields is mandatory, EDGAR will replace any provided value with the data from its database.
m(2)	The list of previous names must be provided or a value of "None" given.
m(3)	The totalRemaining value must equal the totalOfferingAmount – the totalAmountSold.
m(4)	One of the provided choices is mandatory.
m(5)	One or more of the provided choices must be supplied.
m(6)	The tag is mandatory but it may not have any value contained in it.
cm	Conditional Mandatory. The element is mandatory if its parent element is included. The element cannot be included if its parent is not included. This basic rule applies to next eight rows that detail additional "Conditional Mandatory" rules.
cm(1)	The \<value\> is mandatory if \< withinFiveYears\> under \< yearOfInc\> is true.
cm(1)	For the \< relatedPersonInfo \> group, at least one of the four boolean child elements must be true.
cm(2)	If \< SECURITIES_OFFERED_TYPE. \<isPooledInvestmentFundType \> under \<typesOfSecuritiesOffered\> is true, then \<industryGroup.InvestmentFundInfo\> becomes mandatory..
cm(3)	If \< INVESTMENT_FUND_LISTinvestmentFundType \> is "Hedge Fund" or "Other Investment Fund", then \<AGGREGATE_NET_ASSET_VALUE_RANGE_TYPEaggregateNetAssetValueRange\> becomes mandatory else \<revenueRange\> is mandatory..
o	Optional
o!	Optional but if you choose the top most choice .One from below choice list is mandatory
o(1)	The \<primaryIssuer.ccc\> and \<issuer.ccc\> tags are is optional in the Schemas, but it is mandatory for input processing. It is marked as optional so that the valueCCC can be removed from the version of the document that is disseminated. In this way, the disseminated document will still conform to this specification.
NA	Does not apply to submission type. EDGAR uses this field for server-side processing. Do not provide a value for this element.
blank	Does not apply to submission type

3.4 Mapping of Form D Submission Schemas to Submission Types

Level	Order	Data Type	Element Name	Max Length	Choice List	Max Occur	Submission Type D	Submission Type D/A
1	1	NV	edgarSubmission			1	m	m
2	1~~2~~	string	schemaVersion	5		1	o	o
2	2~~3~~	string	submissionType	~~3~~	SubTypeList	1	m	m

4. CHOICE LIST VALUES

4.1 EntityTypeList

These are the valid values for a <EntityType> element in the primary document.

Value
Corporation
Limited Partnership
Limited Liability Company
General Partnership
Business Trust
Other

4.2 RelationshipTypeList

These are the valid values for a < RelationshipType > element in the primary document.

Value
Executive Officer
Director
Promoter

4.3 AgricultureIndustryList

These are the valid values for a <AgricultureIndustryList> element in the primary document.

Value
Agriculture

4.4 StateCodeList

EDGAR recognizes 302 two-character designators for the <stateOrCountry> element in the primary document. These are provided in Appendix A. These codes are actually a combination of values for the 50 US states, the Canadian Provinces, and other countries and territories.

4.5 SubTypeList

These are the valid values for the <submissionType> element in the submission document and the <documentType> element in the primary document.

Value
D
D/A

4.6 TestLiveList

These are the valid values for the <testOrLive> element in the submission file.

Value
LIVE
TEST

4.7 BankingFinancialIndustryList

These are the valid values for a < BankFinancialIndustryList> element in the primary document.

Value
Commercial Banking
Insurance
Investing
Investment Banking
Pooled Investment Fund
Other Banking & Financial Services

4.8 InvestmentFundList

These are the valid values for a < InvestmentFundList> element in the primary document.

Value
Hedge Fund
Private Equity Fund
Venture Capital Fund
Other Investment Fund

4.9 BusinessServicesList

These are the valid values for a <BusinessServiceList> element in the primary document.

Value
Business Services

4.10   EnergyIndustryList

These are the valid values for a < EnergyIndustryList> element in the primary document.

Value
Coal Mining
Electric Utilities
Energy Conservation
Environmental Services
Oil & Gas
Other Energy

4.11 HealthCareIndustryList

These are the valid values for a <HealthCareIndustryList> element in the primary document.

Value
Biotechnology
Health Insurance
Hospitals & Physicians
Pharmaceuticals
Other Health Care

4.12 ManufacturingIndustryList

These are the valid values for a < ManufacturingIndustryList> element in the primary document.

Value
Manufacturing

4.13 RealEstateIndustryList

These are the valid values for a < RealEstateIndustryList> element in the primary document.

Value
Commercial
Construction
REITS & Finance
Residential
Other Real Estate

4.14 RetailingIndustryList

These are the valid values for a <RetailIndustryList> element in the primary document.

Value
Retailing

4.15 RestaurantsIndustryList

These are the valid values for a <RestuarantsIndustryList> element in the primary document.

Value
Restaurants

4.16   TechnologyIndustryList

These are the valid values for a <TechnologyIndustryList> element in the primary document.

Value
Computers
Telecommunications
Other Technology

4.17   TravelIndustryList

TRUE
FALSE

5. BASIC SUBMISSION CONSTRUCTION

5.1 General Submission and Formatting of XML Files

These rules apply to the submission files of an XML-format Form D and D/A submission:

1. The filename must end with an ".xml" extension.
2. The file cannot be compressed or encoded in any fashion.
3. We strongly recommend you format the submission file as shown in the provided sample files. This makes the raw XML files easier to view in a text editor. The submission of ASCII XML files with no line breaks, while legal XML, is strongly discouraged. XML filings are required to be posted on public websites. While usually formatted via style sheets, the raw XML is frequently available for inspection and should be readable by a person. The SEC will not be reformatting XML files for readability. A single line XML file is not viewer-friendly and should be avoided.
4. The <?xml version="1.0"?> declaration line is optional; however if it is included it must be the first line in the file. Any text before this line, even white space, will cause a SUSPENSE error. The version value must be "1.0." Any other value for version will cause a SUSPENSE error.
5. For an XML element with a data value, keep the begin tag, data value, and end tag on the same line of text. Otherwise, you could get a Schema violation error. As an example, for a Issuer CIK value which cannot be longer than 10 characters, this specification is correct:
   ```
   <cik>1212121212</cik>
   ```
6. This specification will result in a parsing error because the extraneous white space and line feeds will be counted as part of the length of the data value. In other words, the CIK value will be regarded as longer than 10 characters.
   ```
   <cik>
   1212121212
   </cik>
   ```
7. The submission file must contain a single "primary" XML document.
8. ~~EDGAR will generate a WARNING for any duplicate values in the single <contactData><contactEmailAddress> and the <notificationEmailAddress> elements.~~
9. ~~9.~~8. The submission file must conform to the ~~edgarSubmissionCommon~~FormDSubmission.xsd XML Schema file. Any violation of this Schema will result in the suspension of the filing.
9. A filer can choose to receive a return copy by supplying the <returnCopy> element in the xml file while assembling the filing manually. However, this option is not provided using EDGAR OnlineForms/XML Website.
10. All US Dollar amounts must be supplied as whole number values.

5.2 XML Document Rules

The primary document must conform to the formDSubmission.xsd XML Schema file. Any violation of this Schema will result in the suspension of the filing.The table in Section 3.5 provides a detailed summary of the XML elements that apply to each submission type. The following sections reinforce and supplement the contents of this table.

The <schemaVersion> element should not be included. If you do provide a value for this element, EDGAR will generate a WARNING and discard the value. Additionally, if the value you provide does not match the current version of the Schema file being used by EDGAR, then EDGAR will generate a second WARNING. EDGAR will insert the correct value for this element into the "document of record" that gets disseminated.

5.3 Specifying Issuer

You must provide a CIK and CCC. The CIK does not have to be conformed with leading zeroes.~~Do not provide an Issuer Name.~~ EDGAR will insert <u>or replace</u> the Issuer Name associated with the provided CIK into the "Name of the Issuer" that is disseminated. If you do include a value for the <issuerName> element, EDGAR will issue a WARNING and discard the provided value.

5.4 Specifying Signatures

A signature is not "tied" to a Primary Issuer. So, the order of multiple signatures does not matter.The number of signatures needs as to be the same as the number of issuers. If <u>the primary issuer is an authorized signatory for all other issuers, then there must only be a signature block for the primary issuer.</u>~~there is a authorized primary issuer for all other issuers then there can be only one signature.~~

6. ERROR REPORTING

EDGAR will generate an error for each violation of an XML SCHEMA constraint, as well as for each violation of an Form D filing business rule. The SCHEMA files do not enforce all error checks, so it is possible to construct a submission that meets all the SCHEMA constraints yet is still SUSPENDED.

This table summarizes the errors that can result from violations of SCHEMA constraints and EDGAR business rules. This is not an all-inclusive list.

Error Condition	Severity
~~You must indicate whether you are making a New Form D filing or retrieving an existing Form D filing.~~	~~WARNING~~
~~The Accession Number entered does not exist. Please enter a valid Accession Number.~~	~~WARNING~~
The Accession Number entered does not match the Accession Number of an accepted Form D filing and cannot be used for another Form D filing.	~~WARNING~~SUSPENDED
Error, The CIK Number entered is not valid. Please correct and try again.	SUSPENDED
Invalid CIK/CCC combination. Please correct and try again.	SUSPENDED
The Accession Number entered is not valid for a filing submitted by the issuer making this filing. You may only base this filing on a Form D filing made by the same issuer. Please enter an Accession Number for a Form D filing made by this issuer or indicate that this is a new Form D filing not based on a previous filing"	SUSPENDED
The email address you entered is not formatted correctly. All e-mail addresses should include one "@" and at least one "." after the "@"and have 80 or fewer characters."	SUSPENDED
PO Boxes are not acceptable as a Principal Place of Business. Please enter a valid address.	SUSPENDED
You selected the "Other" option for Types of Securities offered; therefore you must enter a description.	SUSPENDED
If you enter any data for a recipient, you must enter data in all required fields.	SUSPENDED

Only $1 million of securities is permitted to be offered within a 12-month period under Rule 504.	WARNING
Only $5 million of securities is permitted to be offered within a 12-month period under Rule 505.	WARNING
You have selected Rule 505 and/or Rule 506 in Item 6, Federal Exemption(s) and Exclusion(s) Claimed. Only 35 non-accredited investors are permitted in Rule 505 and Rule 506 offerings.	WARNING
~~You must select Accept in order to file.~~	~~WARNING~~
~~If you select Decline, you cannot file.~~	~~SUSPENDED~~
You entered $ 0 for the offering amount	WARNING
The selection Investment Company Act Section 3(C) in Section 6 has been chosen. However, the Pooled Investment Fund Interests option in Section 9 has not been selected.	WARNING

You may sometimes get multiple error messages reporting the same error. The XML parser EDGAR uses to process an Form D submission generates messages that are rather technical in nature and require an understanding of the XML SCHEMA language. Whenever possible, EDGAR also generates a more "friendly" error message to give a precise description of the error.

7. EXAMPLE FORM D SUBMISSION FILES

The submission files listed below provide examples of the Form D and D/A submissions.

Submission Type	Submission File
D	sampleFormD~~FullFormD~~.xml
D/A	sampleFormDA~~FullFormD_A~~.xml

APPENDICES

APPENDIX A.   STATE AND COUNTRY CODES

These are the valid designators for the <stateOrCountry> and <jurisdictioncOfInc> element in the primary document. These codes are actually a combination of values for the 50 U.S. states, the Canadian Provinces, and other countries and territories.

Code	State or Country Name
AL	ALABAMA
AK	ALASKA
AZ	ARIZONA
AR	ARKANSAS
CA	CALIFORNIA
CO	COLORADO
CT	CONNECTICUT
DE	DELAWARE
DC	DISTRICT OF COLUMBIA
FL	FLORIDA
GA	GEORGIA
HI	HAWAII
ID	IDAHO
IL	ILLINOIS
IN	INDIANA
