

EDGAR® Form N-PORT XML Technical Specification

Version 1.67

~~April~~-June 2019

DRAFT

DRAFT DISCLAIMER:

This draft EDGAR Form N-PORT XML Technical Specification, posted before Commission approval of potential regulatory changes in this release, is provided as a service to our filing community to assist filers, agents, and software developers in their preparation of responses to potential changes the staff anticipates. Since this is a draft technical specification, the SEC retains the right to change any part of the technical specification before the new system release is made final. In addition, the final EDGAR Form N-PORT XML Technical Specification is subject to Commission approval and may be revised before approval or not approved at all. Similarly, the posting of the draft technical specification does not indicate Commission approval of any pending proposed changes relating to the potential changes reflected in the draft technical specification. The changes outlined in this draft technical specification, if approved, are scheduled to take effect on June 10, 2019. The final version of the technical specification will be made available if approved by the Commission on or about, June 10, 2019, on the SEC's Public Website.

Table 8-1: Submission Errors and Severity	8-1

1. INTRODUCTION

1.1. Purpose

This document details the valid structure and content of the Form N-PORT Electronic Data Gathering, Analysis, and Retrieval (EDGAR) Extensible Markup Language (XML) submission types. The following table lists the submission types for the N-PORT Forms.

Table 1-1: Form N-PORT Submission Types

SUBMISSION TYPE	DESCRIPTION
NPORT-P	Quarter period public submission
NPORT-P/A	Amended public quarter period submission
NPORT-NP	Monthly non-public submission
NPORT-NP/A	Amended non-public monthly submission

This specification provides the basis for creating the aforementioned submission types for the Form N-PORT XML submissions. Filers must use this technical specification to generate a Form N-PORT XML submission that can be successfully parsed by the EDGAR system.

The Form N-PORT submission file must conform to the EDGAR Form N-PORT Submission Taxonomy. This taxonomy is comprised of a collection of XML Schema Definition (.xsd) files that define the structures of EDGAR Form N-PORT submissions.

The Form N-PORT XML submissions can be transmitted to the SEC via the EDGAR FilerWeb (<https://www.edgarfiling.sec.gov/>) or the “Transmit XML Submission” option from the EDGAR OnlineForms Website (<https://www.onlineforms.edgarfiling.sec.gov>).

In order to use the EDGAR FilerWeb or OnlineForms/XML Website, you must have a Central Index Key (CIK) and EDGAR access codes (password, CIK confirmation code (CCC)). If you currently have a CIK and access codes, you can proceed to the EDGAR FilerWeb or OnlineForms Website to submit your submission. If you do not have access codes, you will need to obtain access codes through the EDGAR Filer Management website (<https://www.filermanagement.edgarfiling.sec.gov>). For further information regarding how to obtain access codes, refer to the “Becoming an EDGAR Filer” section of the EDGAR Filer Manual, Volume I (General Information).

For further information regarding the EDGAR FilerWeb or OnlineForms Website, specifically in regards to the transmission of filer-constructed submissions, refer to the Filer Constructed XML Submissions section of the EDGAR Filer Manual, Volume II (EDGAR Filing).

1.2. Summary of Changes

The following changes have been implemented in Release 19.1.2:

- Section 3.4, corrected the documentation of “rtn1”, “rtn2” and “rtn3” to reflect the schema.
- ~~Section 3.4, added new mandatory element “isConfidential”.~~
- ~~Release 19.1.1 will also add new exhibit document type NPORT EX to NPORT P and NPORT P/A submissions. This change will impact filings with period dates after August 31, 2019.~~
- ~~During the first six months of EDGAR filings on Form N-PORT (i.e., reports filed with period dates ranging from March 31, 2019 through August 31, 2019), filers should submit the exhibit required by Part F of Form N-PORT under submission type NPORT EX. Following this period, filers should attach their exhibit directly to their NPORT P or NPORT P/A filing rather than making a separate submission.~~

This is only a text change update and no change was made to the schema.

DRAFT

2. EDGAR SCHEMA FILES

Table 2-1: Form N-PORT Schema Files describe the schema files that the EDGAR system uses to validate N-PORT Forms submissions. These schemas are considered part of this specification and are distributed with this document.

Table 2-1: Form N-PORT Schema Files

XML Schema File	Scope of File
eis_NPORT_Filer.xsd	Defines the elements for a Form N-PORT submission
eis_NPORT_common.xsd	Defines the common elements for all EDGAR Form N-PORT submissions
eis_Common.xsd	Defines the submission fields that are common in all EDGAR submissions.
eis_stateCodes.xsd	Defines the country and state codes for all EDGAR submissions
eis_ISO_StateCodes.xsd	Defines the ISO country and state codes for all EDGAR submissions

The schema files define the valid data elements for a Form N-PORT submission, the hierarchy and sequencing of these elements, data types, valid values, maximum lengths, and number of occurrences, etc.

It is recommended that you download these files and use them for your own validation prior to filing a submission. This will greatly reduce the likelihood of receiving an EDGAR Suspend error. These schema files contain several annotations that describe the nature of the content of some of the elements.

EDGAR performs several validation checks that are not related to the schema files, so it is possible for a submission to meet all the schema constraints and still be SUSPENDED or BLOCKED. For instance, EDGAR verifies that each CIK/CCC pair is valid.

2.1. Schema Table Column Definitions

We assume the filer is familiar with the basics of the XML language, Namespaces, and the XML Schema Definition language. If not, you can find numerous references on the World Wide Web. One recommended website that provides several useful tutorials and examples is <http://www.w3schools.com/>.

The table below highlights the schema language features used most heavily in the EDGAR Form N-PORT submission schema files. These are:

Table 2-2: Schema Language

Indicator	Purpose
<sequence>	Specifies that child elements must appear in a specific order. This indicator is used with each element hierarchy. Elements must always appear in the order shown in Section 3.4.
<choice>	Specifies that only one of the child elements can be present within the containing element.
<minOccurs>	Specifies the minimum number of times that an element can occur.
<maxOccurs>	Specifies the maximum number of times that an element can occur.

3. XML SCHEMAS

This section summarizes the restrictions and constraints imposed on the content of the Form N-PORT Forms submission types. These rules are enforced by the schema files and by EDGAR submission processing applications.

The schema files cannot enforce all the rules concerning data content, so it is possible for a submission to satisfy all the schema constraints and still be SUSPENDED or BLOCKED by EDGAR.

3.1. Schema Table Column Definitions

The following table defines the columns in the two schema summation tables provided in Sections 3.4:

Table 3-1: Column Definitions for the Tables in Section 3-4

Column Name	Description
Level	Depth of element in the XML node hierarchy.
Order	Order in which elements must appear.
Data Type	See Table in Section 3.2 for a detailed description.
Element Name	Name of the XML element. This is case-sensitive.
Max Length	Maximum length for elements. EDGAR database stores up to this number of characters. "Unlimited" means no maximum length constraint for the element value.
Data Value Constraint	The paragraph that describes the data value constraint for the element. The values specified are case sensitive.
Applicability of Element	Indicates applicability of the element. m = Mandatory, o = Optional, NA = Does Not Apply. EDGAR uses this element for server-side processing. Do not provide a value for an "NA" element.
Max Occur	Maximum times a set of elements may be repeated. The maximum occurrence is 1, if not specified.

3.2. Data Type Constraints

Each entry in the "Data Type" column of these tables will be one of these values:

Data Type	Constraints
Boolean	Indicate a "true" value with the word "true". Indicate a "false" value with the word "false". A Boolean element may not have a null or blank value. This is a schema violation and will cause a SUSPENSE error.
date	Must be of the format YYYY-MM-DD. A date element may not have a null or blank value. This is a schema violation and will cause a SUSPENSE error.
integer	Only valid characters are 0-9. Cannot contain commas, a minus sign, a dollar sign, or parentheses. An integer element may not have a null or blank value. This is a schema violation and will cause a SUSPENSE error.

Data Type	Constraints										
Decimal	Only valid characters are 0-9 and a period. Cannot contain commas, dollar sign, or parentheses. EDGAR stores up to twenty-four total digits depending on the actual type. A decimal element may not have a null or blank value. This is a schema violation and will cause a SUSPENSE error. Do not include a decimal element at all if your goal is to not provide an optional number. In the max length column, the number before the comma represents the whole number i.e., Total Digits including the fraction digits and the number after the comma represents the total number of allowed decimals.										
String	<p>Should be no longer than the length shown in the tables in Section 3.4.</p> <p>EDGAR stores values in the <signatureName>, and <contactEmailAddress> elements exactly as provided. All other values are stored in the database as uppercase.</p> <p>You must use special escape sequences to represent these four characters:</p> <table border="1" data-bbox="602 709 1057 940"> <thead> <tr> <th>Character</th><th>Escape Sequence</th></tr> </thead> <tbody> <tr> <td><</td><td>&lt; or &#60;</td></tr> <tr> <td>></td><td>&gt; or &#62;</td></tr> <tr> <td>&</td><td>&amp; or &#38;</td></tr> <tr> <td>"</td><td>&quot; or &#34;</td></tr> </tbody> </table>	Character	Escape Sequence	<	< or <	>	> or >	&	& or &	"	" or "
Character	Escape Sequence										
<	< or <										
>	> or >										
&	& or &										
"	" or "										
NV	These fields cannot have a value. They are parent element nodes that contain other XML elements. These elements need to be present for proper validation.										
attr	Attribute property for an XML element.										

3.3. Applicability of Schema Elements

Each entry in the submission/document type column in Section 3.4 will have one of these values:

Value	Description
m	Mandatory.
m#	Conditional Mandatory. The element or attribute is mandatory if its parent element is included. The element cannot be included if its parent is not included.
m#1	If <confirmingCopyFlag> is true, then the element or attribute becomes mandatory.
m#2	If <investmentCompanyType> is N-1A or N-3 or N-4 or N-6, then the element or attribute becomes mandatory.
m#3	If <seriesId> is provided, then the element or attribute becomes mandatory.
m#4	If <regCountry> is US, then the element or attribute becomes mandatory.
m#5	If <curCd> is provided, then the element or attribute becomes mandatory.

Value	Description
m#6	If <creditSprdRiskNonInvstGrade><period3Mon> is provided, then the element or attribute becomes mandatory
m#7	If <borrower><name> is provided, then the element or attribute becomes mandatory
m#8	If <aggregateCondition><is Non Cash Collateral> is provided, then the element or attribute becomes mandatory
m#9	If <invstCatConditional><invstCat> is provided, then the element or attribute becomes mandatory
m#10	If <commodityContracts>, <creditContracts>, <equityContracts>, <foreignExchgContracts>, <interestRtContracts>, or <otherContracts> is provided, then the element or attribute becomes mandatory
m#11	If <forwardCategory>, <futureCategory>, <optionCategory>, <swaptionCategory>, <swapCategory>, <warrantCategory>, or <otherCategory> is provided, then the element or attribute becomes mandatory
m#12	If <highlyLiquidInvst> is provided, then the element or attribute becomes mandatory
m#13	If <liquidInvConditional><isChangeRepPd> is 'Y', then the element or attribute becomes mandatory
m#14	If <fundCat> is provided, then the element or attribute becomes mandatory
m#15	If <derivTran><classification> is provided, then the element or attribute becomes mandatory
m#16	If <invstOrSec><name> is provided, then the element or attribute becomes mandatory
m#17	If <identifiers><isin> is provided, then the element or attribute becomes mandatory
m#18	If <identifiers><ticker> is provided, then the element or attribute becomes mandatory
m#19	If <identifiers><other> is provided, then the element or attribute becomes mandatory
m#20	If <balance> is provided, then the element or attribute becomes mandatory
m#21	If <curCd> is not provided, then the element or attribute becomes mandatory
m#22	If <assetCat> is not provided, then the element or attribute becomes mandatory
m#23	If <assetConditional><assetCat> is provided, then the element or attribute becomes mandatory
m#24	If <issuerCat> is not provided, then the element or attribute becomes mandatory
m#25	If <issuerConditional><issuerCat> is provided, then the element or attribute becomes mandatory

Value	Description
m#26	If <maturityDt> is provided, then the element or attribute becomes mandatory
m#27	If <isMandatoryConvrtbl> is provided, then the element or attribute becomes mandatory
m#28	If <name> is provided, then the element or attribute becomes mandatory
m#29	If <identifiers><cusip> is provided, then the element or attribute becomes mandatory
m#30	If <identifiers><isin> is provided, then the element or attribute becomes mandatory
m#31	If <identifiers><ticker> is provided, then the element or attribute becomes mandatory
m#32	If <identifiers><other> is provided, then the element or attribute becomes mandatory
m#33	If <currencyInfo> is provided, then the element or attribute becomes mandatory
m#34	If <transCat> is provided, then the element or attribute becomes mandatory
m#35	If <principalAmt> is provided, then the element or attribute becomes mandatory
m#36	If <collateralVal> is provided, then the element or attribute becomes mandatory
m#37	If <collateralCd> is provided, then the element or attribute becomes mandatory
m#38	If <othDeriv> is provided, then the element or attribute becomes mandatory
m#39	If <isCashCollateral> is provided, then the element or attribute becomes mandatory
m#40	If <isNonCashCollateral> is provided, then the element or attribute becomes mandatory
m#41	If <isLoanByFund> is provided, then the element or attribute becomes mandatory
m#42	If <notelItem> is provided, then the element or attribute becomes mandatory
m#44	If <fw dDeriv>, <futrDeriv>, <sw apDeriv>, <optionSw apWarrantDeriv>, or <othDeriv> is provided, then the element or attribute becomes mandatory
m#45	If <amtCurSold> is provided, then the element or attribute becomes mandatory
m#46	If <payOffProf> is provided, then the element or attribute becomes mandatory

Value	Description
m#47	If <notionalAmt > is provided, then the element or attribute becomes mandatory
m#48	If <futrDeriv> is provided, then the element or attribute becomes mandatory
m#49	If <sw apFlag> is provided, then the element or attribute becomes mandatory
m#50	If <fixedRecDesc> is provided, then the element or attribute becomes mandatory
m#51	If <floatingRecDesc> is provided, then the element or attribute becomes mandatory
m#52	If <fixedPmntDesc> is provided, then the element or attribute becomes mandatory
m#53	If <floatingPmntDesc> is provided, then the element or attribute becomes mandatory
m#54	If <upfrontPmnt> is provided, then the element or attribute becomes mandatory
m#55	If <upfrontRcpt> is provided, then the element or attribute becomes mandatory
m#56	If <notionalAmt> is provided, then the element or attribute becomes mandatory
m#57	If <optionSw aptionWarrantDeriv> is provided, then the element or attribute becomes mandatory
m#58	If <principalAmt> is provided, then the element or attribute becomes mandatory
m#59	If <indexName> is provided, then the element or attribute becomes mandatory
m#60	If <fw dDeriv> is provided, then the element or attribute becomes mandatory
m#61	If <othIndName> is provided, then the element or attribute becomes mandatory
m#62	If <othIndValue> is provided, then the element or attribute becomes mandatory
m#63	If <issuerName> is provided, then the element or attribute becomes mandatory
m#64	If <otherRecDesc> is provided, then the element or attribute becomes mandatory
m#65	If <otherPmntDesc> is provided, then the element or attribute becomes mandatory
m#66	If <units> is other, then the element or attribute becomes mandatory

Value	Description
m#67	If <fundCat> is provided then mandatory.
m#68	If more than one <fundCat><pct>attribute is provided are greater than zero (0) then the element is mandatory.
c#1	Choice between <identifiers><isin>, <identifiers><ticker>, and <identifiers><other>
c#2	Choice between <identifiers><cusip>, <identifiers><isin>, <identifiers><ticker>, and <identifiers><other>
c#3	Choice between <clearedCentCparty> and <notClearedCentCparty>
c#4	Choice between <invstCat>, and <invstCatConditional>
c#5	Choice between <fw dDeriv>, <futrDeriv>, <sw aPDeriv>, <optionSw aptionWarrantDeriv>, and <othDeriv>
c#6	Choice between <isCashCollateral > and <cashCollateralCondition>
c#7	Choice between <isNonCashCollateral> and <nonCashCollateralCondition>
c#8	Choice between <isLoanByFund> and <loanByFundCondition>
c#9	Choice between <fixedRecDesc>, <floatingRecDesc > and < otherRecDesc>
c#10	Choice between <fixedPmntDesc>, <floatingPmntDesc> and < otherPmntDesc>
c#11	Choice between <nestedDerivInfo>, <indexBasketInfo> and < otherRefInst >
c#12	Choice between <regStateConditional> and <regCountry>
c#13	Choice between <isNonCashCollateral> and <aggregateCondition>
c#14	Choice between <invstCat> and < invstCatConditional>
c#15	Choice between <assetCat> and <monthlyReturnCats>
c#16	Choice between < isChangeRepPd> and <liquidInvConditional>
c#17	Choice between <fundCat> and <aggrInvs>
c#18	Choice between <classification> and <derivTrans>
o	Optional.

Value	Description
o#1	If <invCountry> is provided, then the element or attribute becomes mandatory
o#2	If <explntrNote> is provided, then the element or attribute becomes mandatory
o#3	If <fw dDeriv> is provided, then the element or attribute becomes optional
o#4	If <sw apDeriv> is provided, then the element or attribute becomes optional
o#5	If <optionSw aptionWarrantDeriv> is provided, then the element is choice between <shareNo> and (<principalAmt> , <curCd>). Choice selection is mandatory if <optionSw aptionWarrantDeriv> is provided.
o#6	Option between <fundCat> or <fundCats>.
o#7	Optional, Choice between <classification> and <derivTrans>
na	Does not apply to the submission type. EDGAR uses this field for server-side processing. Do not provide a value for this element or attribute.
blank	Does not apply to submission type.

3.4. Mapping of Form N-PORT Submission Schemas to Submission Type

Note: The comments made to a Part D item (element “investOrSec” identified by the value of the element <notDissem> when “true”) will never be disseminated.

Level	Order	Data Type	Element/Attribute/Group Name	Max Length	Choice List	NPORT-P	NPORT-P/A	NPORT-NP	NPORT-NP/A	Max Occur

4. FORM N-PORT SCHEMA DATA VALUE CONSTRAINTS

4.1. SUBMISSION_TYPE

These are the valid values for the <SUBMISSION_TYPE> element in the submission file:

VALUE	CODE DESCRIPTION
NPORT-P	Quarter period public submission
NPORT-P/A	Amended public quarter period submission
NPORT-NP	Monthly non-public submission
NPORT-NP/A	Amended non-public monthly submission

4.2. INVESTMENT_COMPANY_TYPE

These are the valid values for the <INVESTMENT_COMPANY_TYPE> element in the submission file:

VALUE
N-1A
N-2
N-3
N-4
N-5
N-6
S-6

4.3. OSW_CATEGORY_TYPE

These are the valid values for the <OSW_CATEGORY_TYPE> element in the submission file:

VALUE	CODE DESCRIPTION
OPT	Option
SWO	Swaption
WAR	Warrant

4.4. FUND_CATEGORY_TYPE

These are the valid values for the <FUND_CATEGORY_TYPE> element in the submission file:

VALUE	CODE DESCRIPTION
HLI	Highly Liquid Investments
MLI	Moderately liquid investments
LLI	Less liquid investments
ILI	Illiquid investments

4.5. LIQUIDITY_INFO_TYPE

These are the valid values for the <LIQUIDITY_INFO_TYPE> element in the submission file:

VALUE	CODE DESCRIPTION
HLI	Highly Liquid Investments
MLI	Moderately liquid investments
LLI	Less liquid investments
ILI	Illiquid Investments
N/A	Not applicable

4.6. LIQUID_CATEGORY_TYPE

These are the valid values for the <LIQUID_CATEGORY_TYPE> element in the submission file:

VALUE	CODE DESCRIPTION
MLI	Moderately liquid investments
LLI	Less liquid investments
ILI	Illiquid investments

4.7. UNIT_TYPE

These are the valid values for the <UNIT_TYPE> element in the submission file:

VALUE	CODE DESCRIPTION
NS	Number of shares
PA	Principal amount
NC	Number of contracts
OU	Other units

4.8. PAYOFF_PROFILE_TYPE

These are the valid values for the <PAYOFF_PROFILE_TYPE> element in the submission file:

VALUE
Long
Short
N/A

4.9. ASSET_CATEGORY_TYPE

These are the valid values for the <ASSET_CATEGORY_TYPE> element in the submission file:

VALUE	CODE DESCRIPTION
STIV	Short-term investment vehicle
RA	Repurchase agreement

VALUE	CODE DESCRIPTION
EC	Equity-common
EP	Equity-preferred
DBT	Debt
DCO	Derivative-commodity
DCR	Derivative-credit
DE	Derivative-equity
DFE	Derivative-foreign exchange
DIR	Derivative-interest rate
DO	Derivatives-other
SN	Structured note
LON	Loan
ABS-MBS	ABS-mortgage backed security
ABS-APCP	ABS-asset backed commercial paper
ABS-CBDO	ABS-collateralized bond/debt obligation
ABS-O	ABS-other
COMM	Commodity
RE	Real estate

4.10. FAIR_VALUE_TYPE

These are the valid values for the <FAIR_VALUE_TYPE> element in the submission file:

VALUE
1
2
3
NA

4.11. COUPON_CATEGORY_TYPE

These are the valid values for the <COUPON_CATEGORY_TYPE> element in the submission file:

VALUE
Fixed
Floating
Variable
None

4.12. TRANSACTION_TYPE

These are the valid values for the <TRANSACTION_TYPE> element in the submission file:

VALUE
Repurchase
Reverse repurchase

4.13. REPURCHASE_CATEGORY_TYPE

These are the valid values for the <REPURCHASE_CATEGORY_TYPE> element in the submission file:

VALUE	CODE DESCRIPTION
ABS	Asset-backed securities
ACMO	Agency collateralized mortgage obligations
ADAS	Agency debentures and agency strips
AMBS	Agency mortgage-backed securities
PLCMO	Private label collateralized mortgage obligations
CDS	Corporate debt securities
EQT	Equities
MM	Money market
UST	U.S. Treasuries (including strips)

4.14. INVESTMENT_CATEGORY_TYPE

These are the valid values for the <INVESTMENT_CATEGORY_TYPE> element in the submission file:

VALUE	CODE DESCRIPTION
ABS	Asset-backed securities
ACMO	Agency collateralized mortgage obligations
ACMBS	Agency debentures and agency strips
AMBS	Agency mortgage-backed securities
UST	U.S. Treasuries (including strips)
N/A	Not applicable

4.15. ISSUER_CATEGORY_TYPE

These are the valid values for the <ISSUER_CATEGORY_TYPE> element in the submission file:

VALUE	CODE DESCRIPTION
-------	------------------

VALUE	CODE DESCRIPTION
CORP	Corporate
UST	U.S. Treasury
USGA	U.S. government agency
USGSE	U.S. government sponsored entity
MUN	Municipal
NUSS	Non-U.S. sovereign
PF	Private fund
RF	Registered fund

4.16. RESPOND_CALL_TYPE

These are the valid values for the <RESPOND_CALL_TYPE> element in the submission file:

VALUE

7. BASIC SUBMISSION CONSTRUCTION

7.1. General Formatting of XML Files

The following rules apply to the submission file of an XML-format Form N-PORT submission:

1. The filename must end with an “.xml” extension.
2. The file cannot be compressed in any fashion.
3. We strongly recommend you format the submission as shown in the provided sample files. This makes the raw XML files easier to view in a text editor. The submission of ASCII XML files with no line breaks, while legal XML is strongly discouraged. XML filings are required to be posted on public websites. While usually formatted via style sheets, the raw XML is frequently available for inspection and should be readable by a person. A single line XML file is not viewer-friendly and should be avoided.
4. The `<?xml version="1.0"?>` declaration line is optional; however, if it is included it must be the first line in the file. Any text entered before this line, even white space, will cause a SUSPENSE error. The version value must be “1.0”. Any other value for version will cause a SUSPENSE error.
5. For an XML element with a data value, keep the begin tag, data value, and end tag on the same line of text. Otherwise, you could get a schema violation error. As an example, for a filer ID value which cannot be longer than 10 characters, this specification is correct:

```
<cik>1212121212</cik>
```

6. The specification below will result in a parsing error because the extraneous white space and line feeds will be counted as part of the length of the data value. In other words, the CIK value will be regarded as longer than 10 characters.

```
<cik>
1212121212
</cik>
```

7.2. XML Submission File Rules

The following rules apply to the supporting document XML-format:

1. The `<?xml version="1.0"?>` declaration line is optional; however, if it is included it must be the first line in the file. Any text entered before this line, even white space, will cause an error. The version value must be “1.0”. Any other value for version will cause an error.
2. The XML elements cannot have any namespaces.
For e.g.: It has to be `<contactName>` and not `<ns1:contactName>`
3. The order of any `<notificationEmailAddress>` elements does not matter.
4. The submission file must conform to the XML schema files. Any violation of this schema will result in the suspension of the filing.

7.2.1. Enclosing a Document

1. Allowable file extensions are .pdf, .txt, .htm, .jpg, .xml and .gif.
2. The names of attached document files must follow the EDGAR file naming conventions:
 - File names cannot exceed 32 characters, including the file extension.
 - Valid characters are lowercase letters, digits 0-9, up to one underscore, up to one hyphen, and up to one period.
 - First character must be a letter.
 - Spaces are not allowed.
 - File name must have a file type extension.
 - File extension of the primary document must be .xml.
 - File extension of all other documents must be .pdf, .txt, .htm, .jpg, or .gif.
3. The <description> is optional, but all other elements must be present and must have a value.
4. The <contents> element must contain a MIME encoded document. You can use any standard 64-character set based MIME encoding algorithm to create a MIME document.
5. The XML for an enclosed supporting document looks like this:

```
<documents>
  <document>
    < conformedName>test1.txt</ conformedName>
    < conformedDocumentType>????</ conformedDocumentType>
    < description> Description field text here... </ description>
    < contents> dGVzdGA= </ contents>
  </document>
  <document>
    < conformedName>test2.txt</ conformedName>
    < conformedDocumentType>????</ conformedDocumentType>
    < description> Description field text here... </ description>
    < contents> dGVzdGA= </ contents>
  </document>
</documents>
```

8. ERROR REPORTING

EDGAR will generate an error for each violation of an XML schema constraint, as well as for each violation of a Form N-PORT filing business rule. The schema files do not enforce all error checks, so it is possible to construct a submission that meets all the schema constraints yet is still SUSPENDED.

This table summarizes the errors that can result from violations of schema constraints and EDGAR business rules. This is not an all-inclusive list.

Table 8-1: Submission Errors and Severity

Error Condition	Severity
Elements not in sequence prescribed in Section 3.4	SUSPENDED
Inclusion of XML-stylesheet reference or any other Processing Instruction	SUSPENDED
Inclusion of an element not prescribed in the schema	SUSPENDED
String value exceeds maximum length constraint	SUSPENDED
Element constrained by a Choice List has an invalid value	SUSPENDED
Mandatory element has no value or an invalid value	SUSPENDED
Special character (&, <, >) not provided as escape sequence	SUSPENDED
Date, Boolean, or Decimal element does not have a value	SUSPENDED
Duplicate Notification Address	WARNING
"NA" or blank field has a value	WARNING
Invalid Issuer CIK	SUSPENDED
Improperly formatted email address	SUSPENDED
Exceeding a "Max Occur" limit from Section 3.4	SUSPENDED

You may sometimes get multiple error messages reporting the same error. The XML parser EDGAR used to process a Form N-PORT submission generates messages that are rather technical in nature and require an understanding of the XML schema language. Whenever possible, EDGAR generates a more "friendly" error message to give a precise description of the error.

Note: Maximum of five nested derivatives as reference instruments

Appendix A ACRONYMS

Acronym	Description
ASCII	American Standard Code for Information Interchange
CCC	CIK Confirmation Code
CIK	Central Index Key
EDGAR	Electronic Data Gathering, Analysis, and Retrieval
PDF	Portable Document Format
