

DRAFT

# EDGAR® Form TA XML Technical Specification

Version 1.32

~~September 2017~~ July 2018

DRAFT

DRAFT DISCLAIMER:

This draft EDGAR Form TA XML Technical Specification, posted before Commission approval of potential regulatory changes in this release, is provided as a service to our filing community to assist filers, agents, and software developers in their preparation of responses to potential changes the staff anticipates. Since this is a draft technical specification, the SEC retains the right to change any part of the technical specification before the new system release is made final. In addition, the final EDGAR Form TA XML Technical Specification is subject to Commission approval and may be revised before approval or not approved at all. Similarly, the posting of the draft technical specification does not indicate Commission approval of any pending proposed changes relating to the potential changes reflected in the draft technical specification. The changes outlined in this draft technical specification, if approved, are scheduled to take effect on July 9, 2018. The final version of the technical specification will be made available if approved by the Commission on or about July 9, 2018 on the SEC's Public Website.

# 1 INTRODUCTION

## 1.1 Purpose

This document details the valid structure and content of the TA Electronic Data Gathering, Analysis, and Retrieval (EDGAR) Extensible Markup Language (XML) submission types. The following table lists the submission types for TA.

**Table 1-1: TA Submission Types**

SUBMISSION TYPE	DESCRIPTION
TA-1	Uniform form for registration as a transfer agent.
TA-1/A	Amendment of a previous Form TA-1.
TA-2	Form for reporting activities of transfer agents.
TA-2/A	Amendment of a previous Form TA-2.
TA-W	Notice of withdrawal from registration as a transfer agent.

This specification provides the basis for creating the aforementioned submission types for TA XML submissions. Filers must use this technical specification to generate a TA XML submission that can be successfully parsed by the EDGAR system.

The TA submission file must conform to the EDGAR TA Submission Taxonomy. This taxonomy is comprised of a collection of XML Schema Definition (.xsd) files that define the structures of EDGAR TA submissions.

The TA XML submissions can be transmitted to the SEC via the EDGAR FilerWeb (<https://www.edgarfiling.sec.gov>) or the “Transmit XML Submission” option from the EDGAR OnlineForms/XML Website (<https://www.onlineforms.edgarfiling.sec.gov>).

In order to use the EDGAR FilerWeb or OnlineForms/XML Website, you must have a Central Index Key (CIK) and EDGAR access codes (password, CIK confirmation code (CCC)). If you currently have a CIK and access codes, you can proceed to the EDGAR FilerWeb or OnlineForms/XML Website to submit your submission. If you do not have access codes, you will need to obtain access codes through the EDGAR Filer Management website, <https://www.filermanagement.edgarfiling.sec.gov>. For further information regarding how to obtain access codes, refer to the “Becoming an EDGAR Filer” section of the EDGAR Filer Manual, Volume I (General Information).

For further information regarding the EDGAR FilerWeb or OnlineForms/XML Website, specifically in regards to the transmission of filer-constructed submissions, refer to the Filer-Constructed XML Submissions section of the EDGAR Filer Manual, Volume II (EDGAR Filing).

## 1.2 Summary of Changes

On July 09, 2018, EDGAR Release 18.2 introduced the following changes to TA form stylesheets:

- Added hyperlinks to all CIKs.
- Added hyperlinks to all file numbers.
- Formatted all number fields to use a “,” to separate numbers in the thousandths.
- Expressed all data values related to US currency by using the dollar sign (“\$”).
- Displayed items 2(b), 2(d), 5, 6, 8, and 11 in a tabular format on the TA-2 form.

There were no updates to the schema files, sample files, or the content of the document.

~~The following changes were made to the stylesheets for submission types TA-1 and TA-1/A:~~

- ~~• Added the field “1(e). Is this filing an amendment to a previous filing?”.~~
- ~~• The field “1(e)(1). File Number” was changed to “1(e)(i). File Number:”.~~
- ~~• Added the field “1(e)(i). File Number:”.~~

~~There were no updates to the schema files or the content of the document.~~

## 2 EDGAR SCHEMA FILES

Table 2-1: TA Schema Files This document details the valid structure and content of the three EDGAR Form TA submission types. Table 2-1: TA Schema Files provides a description of the Form TA submission types.

**Table 2-1: TA Schema Files**

XML Schema File	Scope of File
eis_Common.xsd	Defines the submission fields that are common in EDGAR submissions.
eis_stateCodes.xsd	Defines the state code element.
eis_TA_1_Filer.xsd	Defines the elements of the Form TA-1 and TA-1/A submissions.
eis_TA_2_Filer.xsd	Defines the elements of the Form TA-2 and TA-2/A submissions.
eis_TA_W_Filer.xsd	Defines the elements of the Form TA-W submissions.

The schema files define the valid data elements for TA submissions, the hierarchy and sequencing of these elements, data types, valid values, maximum lengths, and number of occurrences, etc.

It is recommended that you download these files and use them for your own validation prior to filing a submission. This will greatly reduce the likelihood of receiving an EDGAR Suspend error. These schema files contain several annotations that describe the nature of the content of some of the elements.

EDGAR performs several validation checks that are not related to the schema files, so it is possible for a submission to meet all the schema constraints and still be SUSPENDED or BLOCKED. For instance, EDGAR verifies that each CIK/CCC pair is valid.

### 2.1 Schema Table Column Definitions

We assume the filer is familiar with the basics of the XML language, Namespaces, and the XML Schema Definition language. If not, you can find numerous references on the World Wide Web. One recommended website that provides several useful tutorials and examples is <http://www.w3schools.com/>.

The table below highlights the schema language features used most heavily in the EDGAR TA submission schema files. These are:

**Table 2-2: Schema Language**

Indicator	Purpose
<sequence>	Specifies that child elements must appear in a specific order. This indicator is used with each element hierarchy. Elements must always appear in the order shown in Section 3.4.
<choice>	Specifies that only one of the child elements can be present within the containing element.
<minOccurs>	Specifies the minimum number of times that an element can occur.
<maxOccurs>	Specifies the maximum number of times that an element can occur.

The default value for the <minOccurs> and <maxOccurs> indicator is 1. An optional field will have a <minOccurs> value of zero.

This excerpt is from the eis\_TA\_2\_Filer.xsd schema file and includes some of these indicators:

```
<xs:sequence>
    <xs:element name="numberItemsReceivedForTransfer"
type="ns1:INTEGER_NONNEGATIVE_12" minOccurs="0" />
    <xs:element name="numberMasterSecurityHolderFilings"
type="ns1:INTEGER_NONNEGATIVE_12" minOccurs="0" />
    <xs:element name="numberIndividualAccounts"
type="ns1:INTEGER_NONNEGATIVE_12" minOccurs="0" />
    <xs:element name="numberDivReinvDirPurPlanAccounts"
type="ns1:INTEGER_NONNEGATIVE_12" minOccurs="0" />
```

This is a sample of XML that conforms to the schema definition above:

```
<formData>
  <engagedServiceCompany>
    <serviceCompany>Some</serviceCompany>
    <serviceCompanyTransferAgent>
      <entityName>Test Co Name</entityName>
      <fileNumber>084-55658</fileNumber>
    </serviceCompanyTransferAgent>
    <registrantEngagedService>N</registrantEngagedService>
  </engagedServiceCompany>
  <registrantRegulatoryAgency>
    <regulatoryAgency>Securities and Exchange
Commission</regulatoryAgency>
    <amendmentFiled>Not applicable</amendmentFiled>
  </registrantRegulatoryAgency>
  <serviceCompanyData>

<numberItemsReceivedForTransfer>999999999999</numberItemsReceivedForTr
ansfer>
```

<numberMasterSecurityHolderFilings>999999999999</numberMasterSecurityHolderFilings>

<numberIndividualAccounts>999999999999</numberIndividualAccounts>

<numberDivReinvDirPurPlanAccounts>999999999999</numberDivReinvDirPurPlanAccounts>

<numberDirectRegistSystemAccounts>999999999999</numberDirectRegistSystemAccounts>

    <securityHolderAccounts>

        <equitySecurity>80.00</equitySecurity>

        <debtSecurity>10.00</debtSecurity>

        <openEndInvestmentCompany>0.00</openEndInvestmentCompany>

        <limitedPartnership>10.00</limitedPartnership>

        <municipalDebt>0.00</municipalDebt>

        <other>0.00</other>

    </securityHolderAccounts>

### 3 XML SCHEMAS

This section summarizes the restrictions and constraints imposed on the content of the TA submission types. These rules are enforced by the schema files and by EDGAR submission processing applications.

#### 3.1 Schema Table Column Definitions

The following table defines the columns in the three schema summation tables provided in Sections 3.4:

**Table 3-1: Column Definitions for the Tables in Section 3-4**

Column Name	Description
Level	Depth of element in the XML node hierarchy.
Order	Order in which elements must appear.
Data Type	See Table in Section 3.2 for a detailed description.
Element Name	Name of the XML element. This is case-sensitive.
Max Length	Maximum length for elements. EDGAR database stores up to this number of characters. "Unlimited" means no maximum length constraint for the element value.
Data Value Constraint	The paragraph that describes the data value constraint for the element. The values specified are case sensitive.
Max Occur	Maximum times a set of elements may be repeated. The maximum occurrence is 1, if not specified.
Applicability of Element	Indicates applicability of the element. m = Mandatory o = Optional NA = Does not apply. EDGAR uses this element for server-side processing. Do not provide a value for this element.

#### 3.2 Data Type Constraints

Each entry in the "Data Type" column of these tables will be one of these values:

**Table 3-2: Data Type Constraints Table**

Data Type	Constraints
integer	Only valid characters are 0-9. Cannot contain commas, a minus sign, a dollar sign, or parentheses. An integer element may not have a null or blank value. This is a schema violation and will cause a SUSPENDED error.
decimal	Valid characters are 0-9. Cannot contain commas, dollar sign, or parentheses. May contain period and decimal places.
boolean	Indicate with the word "true" or "false". A boolean element may not have a null or blank value. This is a schema violation and will cause a SUSPENDED error.
date	Must be of the format MM/DD/YYYY. A date element may not have a null or blank value. This is a schema violation and will cause a SUSPENDED error. Do not include a date element at all if your goal is to not provide an optional date.
string	Should not be longer than the length specified in "Max Length" column of Table 3-3: Form TA Schema Definitions.  You must use special escape sequences to represent these four characters:

Data Type	Constraints
	For the < character use the escape sequence "&lt;" or "&#60;". For the > character use the escape sequence "&gt;" or "&#62;". For the & character use the escape sequence "&amp;" or "&#38;". For the " character use the escape sequence "&quot;" or "&#34;".
NV	These elements cannot have a value. They are parent element nodes that contain other XML elements. These elements need to be present for proper validation.

### 3.3 Applicability of Schema Elements

Each entry in the submission/document type column in Section 3.4 will have one of these values:

**Table 3-3: Applicability of Schema Elements Table**

Value	Description
M	Mandatory
O	Optional
O(1)	The element is optional in the Schemas, but it is truly mandatory for input processing. It is marked as optional so the element can be removed from the version of the document that is disseminated. In this way, the disseminated document will still conform to this specification
O(2)	The element is optional, but is only applicable when <submissionType> is TA-1/A (Element is not applicable when <submissionType> is TA-1). Or TA-2/A (Element is not applicable when <submissionType> is TA-2).
O(3)	If <registrantType> is Not Applicable then the element is optional.
TA-1_CM(1)	The element is mandatory if its parent element is included
TA-1_CM(2)	If <submissionType> is TA-1/A, then the element becomes mandatory.
TA-1_CM(3)	If <differentMailingAddress> is true, then the element becomes mandatory.
TA-1_CM(4)	If <conductBusinessInOtherLocations> is true, then at least one element is mandatory.
TA-1_CM(5)	If <engagedServiceCompany> is true, then at least one element is mandatory
TA-1_CM(6)	If <engagedAsServiceCompany> is true, then at least one element is mandatory
TA-1_CM(7)	If <registrantType> is Other, then the element becomes mandatory.
TA-1_CM(8)	If <registrantType> is Corporation or Partnership, then at least one element is mandatory. Element is not applicable when <registrantType> is SoleProprietorship or Other.
TA-1_CM(9)	If <registrantType> is Sole Proprietorship or Other, then at least one element is mandatory. The element is not applicable when <registrantType> is Corporation or Partnership.

Value	Description
TA-1_CM(10)	If <otherEntity> is true within the parent element, then at least one element is mandatory within the parent element. The element is not applicable within the parent element when <otherEntity> is false within the parent element.
TA-1_CM(11)	If <involved> is true within the parent element, then at least one element is mandatory within the parent element. The element is not applicable within the parent element when <involved> is false within the parent element.
TA-2_CM(1)	The element is mandatory if its parent element is included.
TA-2_CM(2)	If <function> is ALL or SOME within parent, then at least one element is mandatory within parent element. The element is not applicable within parent element when <function> is NONE within parent element.
TA-2_CM(3)	If <function> is true within parent, then at least one element is mandatory within parent element. The element is not applicable within parent element when <function> is false within parent.
TA-2_CM(4)	If <amendmentFiled> is NO, then element is mandatory. The element is not applicable when <amendmentFiled> is YES or NA.
TA-2_CM(5)	If <engagedServiceCompany>.<function> is SOME or NONE, element is mandatory. The element is not applicable when <engagedServiceCompany>.<function> is ALL.
TA-2_CM(6)	If <numberItemsReceivedForTransfer> is greater than or equal 1000 and numberMasterSecurityHolderFilings is greater than 1000, then element is mandatory; otherwise the element is not applicable.
TA-2_CM(7)	If <numberFiled> is greater than 0, then element is mandatory. The element is not applicable when <numberFiled> is 0.
TA-2_CM(8)	If <fileAll> is NO, then element is mandatory. The element is not applicable when <fileAll> is YES or NA.
TA-2_CM(9)	If <alwaysCompliant> is NO, then element is mandatory. The element is not applicable when <alwaysCompliant> is YES or NA.

### 3.4 Mapping of TA Submission Schemas to Submission Types

**Table 3-4: Mapping of TA-1 and Variants Submission Schema to Submission Type**

Level	Order	Data Type	Element Name	Max Length	Choice List	Max Occur	TA-1	TA-1/A
1	1	NV	edgarSubmission				M	M
2	1	String	schemaVersion	5			NA	NA

## 4 TA SCHEMA DATA VALUE CONSTRAINTS

### 4.1 SUBMISSION\_TYPE

These are the valid values for the <SUBMISSION\_TYPE> element in the submission file:

**Table 4-1: Submission Type List Values**

Value	CODE DESCRIPTION
TA-1	Uniform form for registration as a transfer agent.
TA-1/A	Amendment of a previous Form TA-1.
TA-2	Form for reporting activities of transfer agents.
TA-2/A	Amendment of a previous Form TA-2.
TA-W	Notice of withdrawal from registration as a transfer agent.

### 4.2 Document Type List

lists the valid values for the <documentType> of the <edgarDocument> (<edgarDocument.documentType>) element.

**Table 4-2: Supporting Document Type List Values**

Value for Supporting Documents
COVER
CORRESP
GRAPHIC

You can append optional text to these document type values. This optional text must begin with a period. The overall length of the document type value cannot exceed 20 characters. Some examples of a valid document types are:

COVER.document 1  
CORRESP.document 2

### 4.3 State Code List

EDGAR recognizes 302 two-character designators for the <stateOrCountryCode> element. These are provided in Appendix A, State and Country Codes. These codes are a combination of values for the 50 U.S. states, the Canadian Provinces, and other countries and territories.

### 4.4 Test Live List

Test Live List Values lists the valid values for the <testOrLive> element.

**Table 4-4: Test Live List Values**

Value
LIVE
TEST

#### **4.5 SEC Type List**

SEC Type List Value lists the valid values for the <regulatoryAgency> element.

**Table 4-5: SEC Type List Value**

Value
SEC

#### **4.6 Regulatory Agency List**

Regulatory Agency List Values lists the valid values for the <regulatoryAgency> element.

**Table 4-6: Regulatory Agency List Values**

Value
Securities and Exchange Commission
Federal Deposit Insurance Corporation
Board of Governors of the Federal Reserve System
Comptroller of the Currency

#### **4.7 Service Company Type List**

Service Company Type Values lists the valid values for the <serviceCompany> element.

**Table 4-7: Service Company Type Values**

Value
All
Some
None

#### 4.8 Registrant List

Registrant List Values lists the valid values for the <registrantType> element.

**Table 4-8: Registrant List Values**

Value
Corporation
Partnership
Sole Proprietorship
Other
Not Applicable

#### 4.9 Amendment Field List

Amendment Field List Values lists the valid values for the <amendmentFiled > element.

**Table 4-9: Amendment Field List Values**

Value
Yes, filed amendment(s)
No, failed to file amendment(s)
Not applicable

#### 4.10 Ownership Code List

Ownership Code List Values lists the valid values for the <ownershipCode> element.

**Table 4-10: Ownership Code List Values**

Value	Ownership Description
NA	0 up to 5%
A	5% up to 10%
B	10% up to 25%
C	25% up to 50%
D	50% up to 75%
E	75% up to 100%

## 5 BASIC SUBMISSION CONSTRUCTION

### 5.1 General Formatting of XML Files

The following rules apply to the submission file of an XML-format TA submission:

1. The filename must end with an “.xml” extension.
2. The file cannot be compressed in any fashion.
3. We strongly recommend you format the submission as shown in the provided sample files. This makes the raw XML files easier to view in a text editor. The submission of ASCII XML files with no line breaks, while legal XML, is strongly discouraged. XML filings are required to be posted on public websites. While usually formatted via style sheets, the raw XML is frequently available for inspection and should be readable by a person. A single line XML file is not viewer-friendly and should be avoided.
4. The `<?xml version="1.0"?>` declaration line is optional; however, if it is included it must be the first line in the file. Any text entered before this line, even white space, will cause a SUSPENDED error. The version value must be “1.0.” Any other value for version will cause a SUSPENDED error.
5. For an XML element with a data value, keep the begin tag, data value, and end tag on the same line of text. Otherwise, you could get a schema violation error. As an example, for a filer ID value which cannot be longer than 10 characters, this specification is correct:

```
<cik>1212121212</cik>
```

6. The specification below will result in a parsing error because the extraneous white space and line feeds will be counted as part of the length of the data value. In other words, the CIK value will be regarded as longer than 10 characters.

```
<cik>
1212121212
</cik>
```

### 5.2 XML Submission File Rules

The following rules are specific to the submission file:

1. The order of any `<notificationEmailAddress>` element in the `<notificationAddresses>` element block does not matter. EDGAR will generate a WARNING for any duplicate values in the `<notificationEmailAddress>` element.
2. The submission file must conform to the `eis_TA_1_Filer.xsd` XML schema file for TA-1 and TA-1/A submissions, `eis_TA_2_Filer.xsd` XML schema file for TA-2 and TA-2/A submissions and `eis_TA_W_Filer.xsd` XML schema file for TA-W and TA-W/A submissions.. Any violation of this schema will result in the suspension of the filing.

### 5.3 Primary Document

EDGAR will construct the “document of record” from the XML submission that will be disseminated. The following provides information regarding the constructed primary document:

1. The <schemaVersion> element should not be included. If you do provide a value for this element, EDGAR will generate a WARNING and discard the value and replace it with the correct value.
2. The following elements will be removed, if provided:

<ccc>

<returnCopy>

<contactData>

<notificationAddresses>

<formVersion>

3. The <stateOrCountry> element should not be included. If you do provide a value for this element, EDGAR will replace the value with the correct value.

### 5.4 Supporting Documents

The <edgarDocument> element block specifies supporting documents. The following rules apply to this <edgarDocument> element block:

4. The submission file may also contain additional supporting documents. The additional support documents are specified using the <edgarDocument> element block. The order of the <edgarDocument> specifications does not matter, e.g., CORRESP documents may appear before the COVER document, and vice versa.
5. Allowable file extensions are .txt, .htm, .jpg, and .gif.

**Note:** The Form TA submission types do not allow the inclusion of PDF documents. EDGAR will discard any attached PDF documents and issue a WARNING to that effect.

6. The allowable document types are shown in the Table 4-2: Supporting Document Type List Values
7. You may enclose no more than 610 documents. The document count limits by type are provided in Table 5-4: Supporting Document Maximum Allowed.

**Table 5-4: Supporting Document Maximum Allowed**

Document Type	Maximum Allowed
CORRESP	100
COVER	10
GRAPHIC	500

8. The names of attached document files must follow the EDGAR file naming convention:
  - File names cannot exceed 32 characters, including the file extension.
  - Valid characters are lowercase letters, digits 0-9, up to one underscore, up to one hyphen, and up to one period.
  - First character must be a letter.
  - Spaces are not allowed.
  - File name must have a file type extension.
  - File extension of the primary document must be .xml.
  - File extension of all other documents must be .txt, .htm, .jpg, or .gif.
9. The <documentDescription> is optional, but all other elements must be present and must have a value.
10. The <documentMimeBlock> element must contain a MIME encoded document. You can use any standard 64-character set based MIME encoding algorithm to create a MIME document.
11. The XML for an enclosed supporting document looks like this:

```
<edgarDocument>  
  <documentName>cover01.txt</documentName>  
  <documentType>COVER</documentType>  
  <documentDescription>Cover Document</documentDescription>  
  <documentMimeBlock>  
    PT09PT09PT09PT09PT09PT09PT09PT09PT09PT09PSAgIGNvdmVyIGxldHRl  
    ciAghIDB09PT09PT09PT09PT09PT09PT09PT09PT09PT09PT09PT09NCg0KVghpcyBp  
    cyBgIHBYaXZhdGUyY292ZXIgbGV0dGvyIHROeXQqZG91cyBub3QgY29udGFp  
    biBhbngkgcmVkbGluzQ0kdGFncy4gVGhpcyBpcyBzdHJpY3RseSBhIHRLc3Qu  
    DQoNcj09PT09PT09PT09PT09PT09PT09PT09PT09PT09PT09PT09PT09PT09PT09PT09PT09PT09PT09PT09PT09PT09PT09DQo=  
  </documentMimeBlock>  
</edgarDocument>
```

## 6 ERROR REPORTING

EDGAR will generate an error for each violation of an XML schema constraint, as well as for each violation of a Form TA filing business rule. The schema files do not enforce all error checks, so it is possible to construct a submission that meets all the schema constraints yet is still SUSPENDED.

Table 6-1: EDGAR Processing Errors and Severity summarizes the errors that can result from violations of schema constraints and EDGAR business rules. This is not an all-inclusive list.

**Table 6-1: EDGAR Processing Errors and Severity**

Error Condition	Severity
Elements not in sequence prescribed in Table 3-3: Applicability of Schema Elements Table	SUSPENDED
Inclusion of XML-styleSheet reference or any other Processing Instruction	SUSPENDED
Inclusion of an element not prescribed in the schema	SUSPENDED
String value exceeds maximum length constraint	SUSPENDED
Element constrained by a Choice List has an invalid value	SUSPENDED
Mandatory element has no value or an invalid value	SUSPENDED
Special character (&, <, >) not provided as escape sequence	SUSPENDED
Date or Boolean element does not have a value	SUSPENDED
Duplicate notification email address (duplicate values for element <notificationEmailAddress>)	WARNING
Invalid CIK	SUSPENDED
Invalid CIK/CCC combination	SUSPENDED
Improperly formatted email address	SUSPENDED
Inclusion of a PDF document	WARNING
Exceeding a “Max Occur” limit from Table 3-3: Applicability of Schema Elements Table (e.g., value for element <notificationEmailAddress> contains more than 80 characters)	SUSPENDED
Invalid content in an enclosed ASCII document. Refer to the EDGAR Filer Manual for details.	SUSPENDED or WARNING
Invalid content in an enclosed HTML document. Refer to the EDGAR Filer Manual for details.	SUSPENDED or WARNING
Enclosed graphic document that is not referenced by an HTML document	SUSPENDED
Any XML schema violation not mentioned in previous table row	SUSPENDED
Inclusion of an element that is not applicable for the conditional mandatory condition.	SUSPENDED
No values provided for child elements of a parent element satisfying the conditional mandatory condition	SUSPENDED
Any date element (except <signatureDate>) with value after submission date	SUSPENDED

You may sometimes receive multiple error messages reporting the same error. The XML parser EDGAR uses to process an XML submission generates messages that are rather technical in

nature and require an understanding of the XML schema language. Whenever possible, EDGAR also generates a more “friendly” error message to give a precise description of the error.

## 7 EXAMPLE FORM TA SUBMISSION FILES

Table 7-1: Form TA Example Submission Files provides a list of example of Form TA submission files.

**Table 7-1: Form TA Example Submission Files**

Submission Type	Description	Submission File
TA-1	Submission with no enclosed documents.	TA-1_sampleXML_1.xml
TA-1/A	Amendment submission with no enclosed documents.	TA-1A_sampleXML.xml
TA-1	Submission with enclosed documents.	TA-1_sampleXML_2.xml
TA-2	Submission with no enclosed documents.	TA-2_sampleXML_1.xml
TA-2/A	Amendment submission with no enclosed documents.	TA-2A_sampleXML.xml
TA-2	Submission with enclosed documents.	TA-2_sampleXML_2.xml
TA-W	Submission with no enclosed documents.	TA-W_sampleXML_1.xml
TA-W	Submission with enclosed documents.	TA-W_sampleXML_2.xml

The submission files contain MIME versions of the supporting document. These MIME data blocks were copied from a 64-character set MIME version of the document and pasted into the submission file.

## 8 APPENDIX A - STATE/COUNTRY CODES

These are the valid designators for the <stateCountry> element in the primary document.

## 9 APPENDIX B - MAPPING OF FORM TA XML ELEMENTS TO PRINTED FORMS

Table 9-1: Mapping for Form TA-1 XML Elements to Printed Form maps the XML elements that have a displayable value to their corresponding fields on a printed Form 25. Not all elements map to the printed form, but the schema definition as provided in Table 9-1: Mapping of Form TA-1 XML Elements to Printed Form is repeated here for completeness.
