MitoPharm Corporation

This Month The Bullrun Report is profiling: (MTPM) MitoPharm Corp

Mitopharm Corporation is a biotechnology company in the research, development, marketing, and sales of functional beverages, dietary supplements, and drugs. It focuses on Traditional Chinese Medicinal (TCM) formulas for product sources, and employs the latest technology in Biochemistry and Pharmacology for scientific research and product development.

Mitopharm [products](#) are about **anti-aging** and **stamina improvement**. The key ingredient of the products is a novel compound (the [Compound](#)), which is the result of over 15 years of research and development by one of its founding shareholders, the Hong Kong University of Science and Technology ([HKUST](#)). There are over 67 research papers published on the Compound; all consistently corroborating its remarkable biochemical properties in counteracting [aging](#) and improving body stamina.

Product Line

Restorade

Available as a functional beverage or as a soft-gel capsule, the scientifically optimized **Restorade** provides holistic anti-aging benefits:

- **Counteracts directly and effectively the leading cause of aging – mitochondrial decay, and simultaneously increases cellular anti-oxidant capacity.**
- **Enhances mitochondrial functional capacity of vital organs - delivering improved and balanced health as added benefits.**
- **Functional benefits well supported by science.**
- **Not hormonal stimulants/replenishments, nor merely anti-oxidants.**

Stamina Solution

Available as functional drink and as soft-gel capsule, the patent pending formula of Stamina Solution delivers long-term and balanced energy improvement:

- **Improves stamina through rejuvenation of functional capacities of vital organs.**
- **Increases exercise performance and endurance by (i) enhancement of the metabolism of liver glutathione and, (ii) rejuvenated innate body conditions.**
- **Protects skeletal muscles from exercise-induced injuries through (i) the induction of the expression of Heat Shock Proteins and, (ii) enhancement of the metabolism of the liver**

glutathione.

- **Functional benefits well supported by science.**
- **Not a short-term alertness stimulant.**
