Today, stock marketing letters recommend Calypso Wireless Inc. ([PINK:CLYW](#), [CLYW message board](#)) to be included in investors' basket, just because of the unusual amount of daily shares traded, not for the company's activity.

Over the week, CLYW stock has been running wild, making its best volume performance for the last decade. The price performance was notable as well.

Yesterday, CLYW shares hit a new 52 week high, which became the highest price bid over the last two years.

This CLYW stock rush happened just like that, on no company's news and on old, well known SEC filings, done for the investment community.

The last one, from the end of this July, was related to company's Directors' donations for the payment of annual fees for European Patents.

And if CLYW stock rush happened just like that, the performance of the stock, was not achieved without a reason.

Since last Friday, when the huge volume was played first, up to now, CLYW shares have surged 337%, granting the rights to investors to a huge speculative gain

Yesterday, CLYW closed the market at \$0.131 per share in a volume, exceeding almost eleven times the average volume of the company.
