Nothing's happened since we last spoke. I'll gather the stuff, and figure out what we have. The article is from 2001, so they probably have the same intel we have.

Can you refresh my recollection abt what we did with this exam? I know we talked abt it the other month, but I forget.

John - we should discuss. Ocie has an open exam of madoff on this issue. I'm on road today, but am available tomorrow AM.

Eric

John,

We are currently conducting an exam at Madoff. Our major focus has been the possibility that Madoff is using his vast amounts of customer order flow to benefit the \$6 billion in hedge fund money that we believe he manages. In initial inquiries about managing outside money and supplying black box models (algorithms, etc.) to outside accounts he either denied it or was evasive.

When he finally admitted to "executing trades" for billions of dollars in customers' (hedge funds) money using specific proprietary trading algorithm, he said we should know about this as he told Lori Richards and John McCarthy about this 1.5 years ago. We are hoping that if what he is saying has any truth at all to it that you might have some info related to his hedge fund related activities that you could send us.

Thanks,

John Nee

P.S. See the attached article for our concerns. We also received some intelligence on a recent IA exam questioning his hedge fund involvement and trading practices.
