

Commission hereby amends the Code of Federal Regulations, Title 16, Chapter II, Subchapter D, as follows:

PART 1615—STANDARD FOR THE FLAMMABILITY OF CHILDREN'S SLEEPWEAR: SIZES 0 THROUGH 6X (FF 3-71)

Part 1615, Subpart B is amended by revising § 1615.31(b)(1) to read as follows:

§ 1615.31 Labeling, recordkeeping, advertising, retail display, and guaranties.

(b) *Labeling.* (1) Where any agent or treatment is known to cause deterioration of flame resistance or otherwise enhances the flammability characteristics of an item, such item shall be prominently, permanently, conspicuously, and legibly labeled with precautionary care and treatment instructions to protect the item from such agent or treatment: Provided,

(i) Where items required to be labeled in accordance with this paragraph are marketed at retail in packages, and the required label is not readily visible to the prospective purchaser, the packages must also be prominently, conspicuously, and legibly labeled with the required information, and

(ii) Where items are required to be labeled in accordance with this paragraph, the precautionary care and treatment instructions may appear on the reverse side of the permanent label if

(A) The precautionary care and treatment instructions are legible, prominent and conspicuous, and

(B) The phrase "CARE INSTRUCTIONS ON REVERSE" or the equivalent appears permanently, prominently, conspicuously, and legibly on the side of the permanent label that is visible to the prospective purchaser when the item is marketed at retail, and

(C) The item which is so labeled is marketed at retail in such a manner that the prospective purchaser is able to manipulate the label so the entire text of the precautionary care and treatment instructions is visible and legible; however, where the label cannot be manipulated so the instructions are visible to the prospective purchaser and legible, the packages must also be prominently, conspicuously and legibly labeled with the required precautionary care and treatment information or such information must appear prominently, conspicuously and legibly on a hang tag attached to the item.

PART 1616—STANDARD FOR THE FLAMMABILITY OF CHILDREN'S SLEEPWEAR: SIZES 7 THROUGH 14 (FF 5-74)

Part 1616, Subpart B is amended by revising § 1616.31(b) (1) and (4) to read as follows:

§ 1616.31 Labeling, recordkeeping, retail display, and guaranties.

(b) *Labeling.* (1) Where any agent or treatment is known to cause deterioration of flame resistance or otherwise causes an item to be less flame resistant, such item shall be prominently, permanently, conspicuously, and legibly labeled with precautionary care and treatment instructions to protect the item from such agent or treatment: Provided:

(i) Where items required to be labeled in accordance with this paragraph are marketed at retail in packages, and the required label is not readily visible to the prospective purchaser, the packages must also be prominently, conspicuously, and legibly labeled with the required information, and

(ii) Where items are required to be labeled in accordance with this paragraph, the precautionary care and treatment instructions may appear on the reverse side of the permanent label if

(A) The precautionary care and treatment instructions are legible, prominent and conspicuous, and

(B) The phrase "Care Instructions On Reverse" or the equivalent appears permanently, prominently, conspicuously, and legibly on the side of the permanent label that is visible to the prospective purchaser when the item is marketed at retail, and

(C) The item which is so labeled is marketed at retail in such a manner that the prospective purchaser is able to manipulate the label so the entire text of the precautionary care and treatment instructions is visible and legible; however, where the label cannot be manipulated so the instructions are visible to the prospective purchaser and legible, the package must also be prominently, conspicuously and legibly labeled with the required precautionary care and treatment information or such information must appear prominently, conspicuously and legibly on a hang tag attached to the item

(4)(i) Where items required to be labeled in accordance with paragraphs (b)(2), and/or, (b)(3) of this section and fabrics required to be labeled or stamped in accordance with paragraph (b)(7) of this section are marketed at

retail in packages, and the required label or stamp is not readily visible to the prospective purchaser, the packages must also be prominently, conspicuously, and legibly labeled with the required information

(Sec 5 Pub L 90-189 81 Stat 509 15 U.S.C. 1194 sec 30 Pub L 92-573, 86 Stat 3231 15 U.S.C 2079)

Dated January 19 1984

SECURITIES AND EXCHANGE COMMISSION

17 CFR Parts 200 and 240

(Release No. 34-20581, File No. S7-969)

Processing of Tender Offers Within the National Clearance and Settlement System

AGENCY: Securities and Exchange Commission.

ACTION: Final rule.

SUMMARY: The Commission is adopting Rule 17Ad-14 under the Securities Exchange Act of 1934 (the "Act"). The rule requires transfer agents acting on behalf of bidders as tender agents to establish and maintain special accounts with all qualified registered securities depositories holding the subject company's securities. These accounts will permit depository participants to move securities to and from the tender agent by book-entry. The rule is intended to reduce substantially processing costs and trading market inefficiencies that have occurred when tender and exchange offers have been processed in a physical-certificate environment.

EFFECTIVE DATE: March 1, 1984.

FOR FURTHER INFORMATION CONTACT:

Thomas V. Sjoblom, Esq., at (202) 272-7379, or Stuart J. Kaswell, Esq., at (202) 272-2378, Division of Market Regulation, Securities and Exchange Commission, 450 Fifth Street, NW, Washington, D.C. 20549.

SUPPLEMENTARY INFORMATION: On April 15, 1983, the Commission issued Securities Exchange Act Release No 19678 (the "Proposing Release"),¹ in

¹ 57 SEC Docket 1158 (May 3, 1983), 48 FR 17603 (April 25, 1983).

which the Commission solicited comments on: (i) The causes and effects of clearance and settlement and secondary trading market inefficiencies that occur when tender offers are not processed by book-entry; and (ii) proposed Rule 17Ad-14. The Commission received 36 comment letters from banks, broker-dealers, industry associations, clearing agencies (including securities depositories), corporations that have participated in tender offers, transfer agents, and individuals.² Virtually all commentators favored prompt adoption of the proposed rule. As discussed in more detail below, many of these letters included thoughtful suggestions about technical aspects of the rule as well as discussions of the securities processing problems generally associated with tender offers and related issues. The Commission has addressed all of the commenters' principal concerns in this release.

I. Background

As discussed in detail in the Proposing Release,³ when a bidder's depository⁴ fails to establish an account with a securities depository, all of the subject company's securities must be tendered in physical certificate form, rather than by book-entry, causing a number of problems for securityholders, broker-dealers, bidders, tender agents, and others. For example, securityholders often have great difficulty obtaining properly denominated physical certificates for tender to the bidder's depository prior to the offer's expiration date.⁵ In addition, inventory management problems at securities depositories can compel those depositories to declare the subject company's securities ineligible for deposit. That declaration forces buyers and sellers of securities in the secondary market to settle individual trades by delivering physical certificates and

deprives broker-dealers of the tremendous cost savings and enhanced efficiencies available through settling net obligations by book-entry.⁶ Further, the unavailability of book-entry settlement processing results in a substantially higher number of fails to deliver between broker-dealers. Consequently, broker-dealers that are unable to obtain certificates to satisfy tender or other obligations must buy securities in the cash market (for same day delivery),⁷ often creating significant disparities between the cash-market price and the regular-way market price of the target company's securities.

Many of these securities processing problems and market distortions can be avoided when the subject company's securities remain eligible for automated clearing agency processing during the tender offer. The Depository Trust Company ("DTC"), a securities depository registered with the Commission as a clearing agency, operates a system—called the Voluntary Offering Program ("VOP")—that allows tender offers to be handled by centralized book-entry, rather than by universal delivery of physical certificates.⁸ In general, each bidder, its depository (or exchange agent), and DTC agree on the procedures to be followed in processing each tender offer. By permitting participants to tender securities to the bidder's agent through DTC by book-entry, the VOP mitigates many of the problems discussed above.⁹

In the Proposing Release, the Commission expressed its view that bidders and their agents should be encouraged voluntarily to use depository tender offer programs, such as the VOP, so that bidders, depositories, registered transfer agents, and the investing public could enjoy the benefits of such programs.¹⁰ The Commission recognized, however, that because of the one-time transactional nature of tender offers, bidders may decide not to have their agents use automated book-entry processing for those offers. Accordingly, for this and

other reasons,¹¹ the Commission proposed Rule 17Ad-14

Rule 17Ad-14 would require a registered transfer agent,¹² acting as a tender agent for a bidder (i.e., as a depository, in connection with a cash tender offer, or as an exchange agent, in connection with a registered exchange offer), to establish with all qualified registered securities depositories¹³ special accounts for the book-entry movement of tendered securities between that agent and depository participants.¹⁴ The tender agent would have to establish the account within two business days after the offer is commenced.¹⁵

As indicated above, virtually all of the commenters supported adoption of Rule 17Ad-14 at this time.¹⁶ In addition, the Commission's Advisory Committee on Tender Offers reviewed Proposed Rule 17Ad-14 and stated that it:

supports the use of book-entry delivery of tendered securities to the extent practicable and in concept favors (without commenting on the technical aspects of the proposal) proposed Rule 17Ad-14 that would require bidders' tender agents to establish during tender offers an account with qualified registered securities depositories to permit financial institutions participating in such depository systems to use the services of the depository to tender shares, if desired.¹⁷

² *Id.*

³ See Sections 3(a)(25) and 17A(c) of the Act

⁴ A qualified registered securities depository under proposed Rule 17Ad-14 is a registered clearing agency that at the time a tender offer is commenced under Rule 14d-2 of the Act (17 CFR 240.14d-2) has an automated tender offer processing program approved by the Commission pursuant to Section 19(b) of the Act. The program must provide for book entry delivery and any needed return of the subject company's securities. Currently, only one securities depository (DTC) would be deemed a qualified registered securities depository under Rule 17Ad-14. See Proposing Release *supra* note 1 at n 44. Ultimately, the Commission hopes that all registered securities depositories will provide book entry tender and delivery services during tender offers.

⁵ Despite the rule, depository participants will choose in some circumstances to tender physical certificates directly to the tender agent. Moreover, persons who are not participants in securities depositories may continue to tender their securities directly to the bidder's tender agent. The rule would permit these direct tenders.

⁶ Unless the context otherwise requires commencement of an offer will be determined under Rule 14d-2 [17 CFR 240.14d-2].

⁷ Notably, the Stock Transfer Association, Inc. ("STA"), the major industry association for transfer agents, strongly endorsed adoption and implementation of proposed Rule 17Ad-14. See letter to Dan W. Schneider, Division of Market Regulation, SEC, from Nicholas G. Baldino, President, STA, December 8, 1983.

⁸ Securities and Exchange Commission Advisory Committee on Tender Offers, Report of Recommendations, at 50-51 (July 6, 1983) [hereinafter cited as "Advisory Committee"].

² See File No. S7-969.

³ For a thorough discussion of tender offer and trade processing problems that arise when depository book-entry services are not used during tender offers, see Proposing Release, *supra* note 1 at 17605-09.

⁴ For a description of services performed by the bidder's depository, see Proposing Release, *supra* note 1 at n 13.

⁵ See 48 FR at 17605-17609. For example, securities depositories hold large denomination certificates (jumbo certificates) in their vaults representing aggregated participants' positions. The securities depository may not be able to accommodate a participant's withdrawal request for a certificate of a specified denomination until a jumbo certificate has been presented to the transfer agent for breakdown and reissued in smaller denominations. These processing delays may impact a participant's ability to tender securities before the offer expires. *Id.* at n 16.

⁶ Additional problems result from the inability of institutions to settle transactions with their brokers at the securities depository. See Proposing Release, *supra* note 1 at 17607.

⁷ For a description of the cash market, see Proposing Release, *supra* note 1, at n 43.

⁸ See Proposing Release, *supra* note 1 at 17609-11 for a detailed description of the VOP.

⁹ The VOP also accommodates special needs of the parties involved in the tender offer, such as preventing the bidder's depository from withdrawing physical certificates representing tendered stock until participants' withdrawal rights have expired. *Id.* at 17609.

48 FR at 17611.

II. The Need for Rule 17Ad-14

A. Problems Resulting From Use of Physical Certificates

As discussed more fully in the Proposing Release, when a bidder's agent does not establish an account with a securities depository for the book-entry delivery of securities and the depository thereafter declares the securities ineligible, tender offer and trade processing problems often result.¹⁸ Many commenters indicated that processing physical certificates outside the book-entry environment is risky and inefficient. They noted their loss experience in offers in which they could not obtain properly denominated certificates in time to deliver them to the tender agent before the end of the "protect period".¹⁹ They emphasized that such problems are exacerbated in competing offers, when tenderors attempt to withdraw securities from the agent for one bidder and submit them to the agent for the other bidder.²⁰

In addition, commenters stated that when a bidder or its agent fails to establish an account with a securities depository and the depository thereafter declares the securities ineligible, trade processing problems occur that make it more difficult to settle secondary market transactions on time. In particular, the unavailability of modern automated clearance and settlement systems results in a substantial increase in the number of fails to deliver between broker-dealers. This, in turn, forces firms to incur substantial financing costs. In addition, because of the absence of an adequate supply of physical certificates during competing offers, it becomes increasingly difficult to settle secondary market transactions and options exercises in a timely manner. Commenters explained that fewer physical certificates generally are available because, among other reasons, many have been tendered by

securityholders to the tender agent. At the same time, the demand for certificates multiplies as certificates are needed to settle the increased number of trades, including options exercises, and to cover buy-ins. Under these circumstances, the number of persons who cannot obtain certificates to satisfy their settlement obligations may rise dramatically.²¹ The inability to obtain certificates during competing tender offers became so severe in one instance, that OCC resorted to its extraordinary cash settlement procedures to eliminate participants' obligations to obtain certificates.²²

B. Benefits of Rule 17Ad-14

Every commenter stated that the processing of tender offers by book-entry would afford significant benefits to the securities industry and to the investing public. For example, the Securities Industry Association ("SIA") Operations Committee stated that "it has always been a strong advocate of the expansion of book-entry systems * * *. Requiring [tender] agents to accept [securities by] book-entry, would in our opinion, be a major step in eliminating many of the operational problems associated with tendering securities."²³

Commenters generally noted that DTC's existing VOP greatly simplifies tender offer and trade processing. Some commenters also discussed specific significant or additional benefits afforded to the financial community by using the VOP. For example, several commenters indicated that, during competing bids, depository processing of tendered securities by book-entry permitted return and re-tender of withdrawn securities almost simultaneously and without the inefficiencies and delays associated with receiving physical certificates from the tender agent and redelivering them to another bidder.²⁴ Another commenter

indicated that the VOP permits bidders to pay tendering depository participants more quickly²⁵ which, in turn, enables participants to pay their customers faster.²⁶ These comments support the views stated in the Proposing Release regarding the cost savings, enhanced safety, and tender offer and trade processing efficiencies afforded by the VOP.²⁷ Accordingly, the Commission

Fitzsimmons, Secretary, SEC, May 26, 1983. Under DTC's procedures, a participant withdrawing tendered securities submits withdrawal instructions directly to the tender agent, which then determines whether the instructions have been timely submitted and are in proper form. If the tender agent accepts the withdrawal instructions, it submits appropriate instructions to DTC, which returns the securities to the tendering participant by book-entry movement. DTC has no obligation under its procedures to examine the withdrawal instructions. See DTC, Participant Operating Procedures, Voluntary Offering, (Dec. 1977), at 6-8 (hereinafter cited as "VOP Procedures"). While the tender agent is required to respect tenderers' withdrawal rights, see note 57 *infra*, the Commission believes that the tender agent should remain the person responsible for overseeing the withdrawal of securities. The Commission also believes that, as in the case of the letters of transmittal (see Proposing Release, *supra* note 1, at n. 13), examination of the withdrawal instructions should be the tender agent's responsibility. Further, consistent with Rule 14d-7(d) [17 CFR 240.14d-7(d)], the Commission believes that the timeliness of the withdrawal instructions should be determined by reference to the tender agent's receipt. Accordingly, the Commission believes that withdrawal instructions should continue to be directed to the tender agent.

¹⁸ Proposing Release, *supra* note 1, at 17610-11.

¹⁹ Two commenters indicated, however, that under some circumstances, payment may be one day slower when tenders are made by book-entry than by physical certificate delivery to the tender agent. These commenters suggested that when a bidder pays for tendered securities after the end of the withdrawal period, a tenderor who delivered physical certificates will receive payment on that day, whereas tenderors who delivered securities by book-entry would not be credited with funds until the following day. The Commission notes that a securityholder tendering certificates would be paid more quickly only if the tender agent pays in immediately available funds (e.g., through the Federal Reserve wire system ("Fed Funds")). The Commission believes, however, that payment to tenderors outside of the book-entry environment in Fed Funds is relatively rare. Conversely, DTC customarily receives payment from the tender agent in Fed Funds and credits those funds to tendering participants in DTC's clearinghouse (next day) funds settlement system. DTC invests those funds overnight and allocates the income among the tendering participants' accounts. Accordingly, the Commission believes that it would be unlikely for a tendering securityholder to obtain usable funds more quickly by tendering certificates directly to the agent. See generally Proposing Release, *supra* note 1, at 17610, and nn. 55 & 64.

²⁰ See Proposing Release, *supra* note 1, at 17609-11. As noted in the Proposing Release, the VOP allows securities to be tendered in a safe, central, and immobilized system that simplifies processing for both the tendering participant and the tender agent. In addition, if the subject company's securities are part of an automatic transfer program, such as the Fast Automated Securities Transfer program, the registration and reissuance of tendered certificates in the bidder's name is greatly simplified. See discussion *id.* at 17610 and n. 58.

²¹ When certificates are not available for settlement, tendering securityholders also may have difficulty meeting timely tender offer deposit requirements. As OCC stated, failures to deliver or failures to receive securities "anywhere in the settlement process can trigger a chain reaction that ultimately prevents purchasers who lawfully tendered from promptly depositing certificates." OCC Letter, at 2.

²² *Id.* See generally Proposing Release, *supra* note 1, at n. 41.

²³ Letter from Gerard P. Lynch, Chairman, SIA Operations Committee, to George A. Fitzsimmons, Secretary, SEC, dated May 10, 1983.

²⁴ One commenter suggested, however, that book-entry withdrawal of securities could be simplified further. This commenter believed that tenderors should be able to submit withdrawal instructions directly to the securities depository, rather than to the tender agent which, in turn, must forward them to the depository. See letter from William C. Ries, Vice President, Mellon Bank, N.A., to George A.

¹⁸ For a detailed discussion of these problems, see Proposing Release, *supra* note 1, at 17605-09.

¹⁹ A "protect period" or "Protection period" refers to that period of time after expiration of an offer during which securities of the subject company may be delivered to the bidder's depository in accordance with letters of transmittal, guarantees of delivery or other documentation (e.g., telegrams, facsimile transmissions, or letters from eligible institutions) submitted prior to expiration. During large tender offers, bidders commonly provide for a protection period of eight days.

²⁰ See, e.g., letter from W. Cresham O'Malley, III, Sr. Vice President & Secretary, Janney Montgomery Scott, Inc., to George A. Fitzsimmons, Secretary, SEC, May 10, 1983, at 1. See generally, letter from Marc L. Berman, Executive Vice President and General Counsel, The Options Clearing Corporation ("OCC"), to George A. Fitzsimmons, Secretary, SEC, May 26, 1983, at 2 (hereinafter cited as "OCC Letter").

believes that the VOP offers important benefits to the financial community and to the investing public and that widespread use of those programs must become routine.

C. Non-Use of Existing VOPs and Mandatory Use of Securities Depositories

Because the VOP provides a solution to the problems discussed in the Proposing Release, and because the VOP offers such substantial benefits to the financial community, the Commission's Proposing Release requested comment on why DTC's existing VOP had not been used in some tender offers. Commenters provided several explanations—some of an economic nature and some of a procedural nature. They included the following: (i) Since payment for tendered securities would be made by the bidder to the securities depository, tender agents would not be able to earn interest overnight on funds paid for those securities prior to distribution; (ii) tender agents earned less revenue by using DTC's VOP, since their fees commonly were based on the number of letters of transmittal submitted to them; (iii) some transfer agents and bidders were unfamiliar with, or did not understand the mechanics or advantages of, book-entry processing;²⁸ (iv) tender agents located outside of New York City may experience some delays in reconciling their books with DTC;²⁹ (v) bidders have been concerned that book-entry transfer at DTC would be subject to New York State's stock transfer tax;³⁰ and (vi) bidders and their agents had no incentive to standardize their operating procedures to be compatible with book-entry processing.

The Commission believes that the reasons offered for the failure to use the VOP suggest a degree of unfamiliarity with the VOP and its benefits and do not suggest any inherent weakness in, or substantive objection to, that program. Indeed, increased use of the VOP in

recent years has demonstrated the advantages of the VOP. In addition, many responses to the Proposing Release concerned the operational details of processing particular tender offers. However, for the time being at least, the Commission believes that such particular refinements should be resolved through conversations between bidders' agents and the securities depository and not through Rule 17Ad-14. In addition, the Commission recognizes that processing tender offers outside of a depository environment creates special revenues for tender agents that may be reduced by the rule.³¹ The Commission understands, however, that the principal loss of revenue will result from transferring the float from bidders' agents to tenderors through timely payment mechanisms. We further believe such prompt payment constitutes an important and appropriate public benefit associated with the use of the VOP.

The Commission acknowledges that DTC's VOP may occasionally produce minor operating problems or temporary record discrepancies for tender agents. For example, one commenter noted that tender agents located outside of New York City may be disadvantaged when examining letters of transmittal submitted by tendering participants. Since DTC does not examine letters of transmittal for accuracy and sends them to the tender agent for its examination,³² a tender agent located outside of New York faces a brief delay in determining whether the letters are in proper form and whether the corresponding securities will be delivered by book-entry or directly.³³ Another commenter³⁴ suggested that similar delays and balancing problems may occur when a tender agent, located outside of New York, attempts to reconcile tendering participant's letters of transmittal and delivery instructions with the number of shares DTC reports as delivered by book-entry.³⁵

²⁸ For example, as noted in the Proposing Release, *supra* note 1, at nn. 55 & 88, DTC's money settlement system permits a tender agent to pay tendering participants quickly for their stock. As a result, a bidder may not earn as much income on the "float" from funds paid to tendering security-holders as it would if slower conventional methods were used.

²⁹ See VOP Procedures at 5.

³⁰ See Letter from Robert E. L. Walker, Vice President and Associate General Counsel, Continental Illinois National Bank, to George A. Fitzsimmons, Secretary, SEC, May 31, 1983, at 2-3.

³¹ See Letter from Robert J. Vondrasek, President, Midwest Stock Transfer Association, to George A. Fitzsimmons, Secretary, SEC, May 16, 1983, at 1 (hereafter cited as "MSTA Letter").

³² For example, a tendering participant may submit a letter of transmittal for 100 shares of stock to the tender agent through DTC and may instruct DTC to deliver 100 shares by book-entry to the

The Commission believes that DTC has developed responsible procedures to minimize these problems. As noted in the Proposing Release,³⁶ on the day DTC receives letters of transmittal, it sends copies or originals of those letters to the tender agent for next day delivery. DTC also maintains daily and cumulative records of the number of shares successfully tendered and assists the tender agent in balancing mutual records each day. Moreover, in practice, the Commission believes that difficulties experienced using the VOP have been *de minimis*, while the benefits to tenderors and tender agents have been substantial.

In the Proposing Release, the Commission expressed its hope that if the advantages of DTC's VOP became better known and voluntary usage increased, a mandatory rule might be unnecessary. Although the Commission notes that voluntary use of DTC's VOP has increased significantly during the past several years,³⁷ commenters generally concurred that universal voluntary participation, while likely, would take much too long.³⁸ In addition, as outlined in the Proposing Release,³⁹ and as confirmed by the commenters,⁴⁰ processing tender offers outside of a book-entry environment has significant adverse effects on the nation's securities markets, the national clearance and settlement system,⁴¹ and the public. Accordingly, although the commenters were able to identify several reasons why DTC's VOP has not been used in the past, the majority of commenters, including the Stock Transfer Association, urged that the Commission adopt Rule 17Ad-14 promptly because of the significant benefits it would provide.

tender agent. If that participant's free account contains only 90 shares, DTC will not deliver the 90 shares by book-entry, but, instead, will return the instruction to the participant for modification.

³⁶ See Proposing Release, *supra* note 1, at n. 49.

³⁷ In 1982, DTC processed only 53% of all eligible offers. Letter from William T. Dentzer, Chairman and Chief Executive Officer, DTC, to George A. Fitzsimmons, Secretary, SEC, June 1, 1983, at 2 (hereinafter "DTC Letter"). During the first quarter of 1983, bidders or their agents used DTC to process only 57% of the offers that could have been handled at DTC. Statement of Kenneth M. Scholl, Vice President, DTC, in *DTC Newsletter*, at 8, (June 1983). In contrast, DTC has estimated that approximately 70% of all tender offers were processed through DTC's VOP for the first three financial quarters of 1983.

³⁸ See, e.g., letter from Gerard P. Lynch, Managing Director, Morgan Stanley & Co., Inc., to George A. Fitzsimmons, Secretary, SEC, May 10, 1983.

³⁹ 48 FR at 17605-09.

⁴⁰ See discussion accompanying notes 19-22 *supra*.

⁴¹ See Section 17A of the Act and Proposing Release, *supra* note 1, at 17604-05

²⁸ Additional reasons of a procedural nature suggested by the commenters for the failure to use the VOP included: (i) the securities that were the subject of the tender offer were not eligible for deposit in DTC; (ii) tender agents lacked the capability to accept securities by book-entry; (iii) tender agents lacked confidence in depositories' ability properly to process tender offers; (iv) DTC allegedly is not sufficiently flexible in negotiating special arrangements with tender agents to accommodate unusual operational requirements; and (v) there could be disparities among the depositories' procedures and requirements.

²⁹ See discussion accompanying notes 33-36 *infra*.

³⁰ New York State imposes a tax on certain transfers of securities. See N.Y. Tax Law section 270 *et seq.* (McKinney 1966). This tax has been suspended, in effect, by a one hundred percent rebate of taxes paid. *Id.* at section 280-a.

The Commission, therefore, believes it is appropriate to adopt Rule 17Ad-14. We believe that the benefits of book-entry processing of tender offers should be uniformly available as soon as possible to the financial industry and the public. We hope that adoption of the rule will encourage other registered depositories to develop and file programs similar to DTC's VOP,⁴² which will further reduce the need for multiple physical deliveries. Accordingly, in light of the favorable comments received, the benefits that can be achieved nationwide, and the desire of depository participants and securityholders to use VOP-type programs, the Commission believes that efficient processing can best occur during tender offers when the availability of securities depositories is ensured.⁴³

III. Discussion of Rule 17Ad-14

A. Tender Offers to Which Rule 17Ad-14 Should Apply

The Proposing Release asked for comment on whether depository availability should be mandatory for only certain tender offers.⁴⁴ While some

⁴²As noted in the Proposing Release, *id.*, at n. 71, a registered securities depository must submit to the Commission for approval under Section 19(b) of the Act and Rule 19b-4 [17 CFR 240.19b-4] thereunder, any plan for the book-entry processing of tender or exchange offers. The Commission intends to review each plan carefully and to encourage appropriate uniformity among VOPs.

⁴³In the Proposing Release, the Commission also asked whether depository processing of tender offers had any effect on the timing of critical events—such as accrual of voting rights by the bidder for tendered securities. See Proposing Release, *supra* note 1, at 17610-11. Letters of transmittal commonly provide that the purchaser controls the securities' voting rights after the purchaser pays for the securities. Under DTC's VOP procedures, agents agree to make payment to DTC at the same time similar payments are made to persons who tender their securities directly to the bidder's agent. Thus, the availability of depository processing does not alter the time when voting rights accrue under state law or when purchase payments are made under the terms of the offer, since these matters are determined largely by contract (e.g., letter of transmittal) among the parties. See generally, Fletcher, *Cyclopedia of Corporations* section 2029.

⁴⁴48 FR at 17613. The Proposing Release also asked for comment on whether Rule 17Ad-14 should require the bidder (rather than the bidder's agent) to establish an account with a securities depository. See *id.* at 17613. This question drew comments both legal and practical in nature. While some commenters suggested that bidders should be directly responsible for establishing depository accounts so that all tender offers would be processed by book-entry, most commenters believed that imposing this obligation on the tender agent would achieve essentially the same results as imposing it on the bidder. These commenters stated that most transfer agents are likely to be more familiar than most bidders with the existence of depositories and with the mechanics of VOPs and tender offer processing. In addition, although some of these commenters correctly noted that Rule 17Ad-14, as currently drafted, would not apply to

commenters, including representatives of the transfer agent community, believed that the proposed limitations in paragraph (b) on the scope of Rule 17Ad-14 were appropriate, other commenters favored processing as many tender offers as possible by book-entry and recommended that the scope of the proposed rule be broadened. Only a few commenters recommended expanding the exclusions to reduce the number of tender offers for which tender agents would have to establish depository accounts.

1. Number of Securityholders and Shares Outstanding of Subject Company

As proposed, Rule 17Ad-14 would not apply to a subject company having fewer than 500 securityholders of record of the class of securities sought by the bidder and fewer than 500,000 shares of that class outstanding. Section 14(d) of the Act, one of the central provisions of the Act governing tender offers, is most commonly triggered when a tender offer is made for a class of securities registered under Section 12 of the Act. Registration is required under Section 12(g)(1)(B) of the Act when, among other things, the issuer has a class of equity securities (other than exempt securities) held of record by 500 or more persons. Thus, like Section 14(d)(1) of the Act, paragraph (b)(1) of Rule 17Ad-14 uses the securityholder count contained in Section 12(g)(1)(B) as the threshold for determining when book-entry facilities must be available.

The requirement that the subject company have 500,000 shares of the target class outstanding was based on several considerations. First, the benefits of book-entry processing are needed most in tender offers for large companies that have substantial shareholder bases and actively traded issues. Second, nearly all issuers whose securities attract appreciable trading activity warrant depository services, even though some of those issuers are relatively small.⁴⁵ Moreover, most commenters favored including under Rule 17Ad-14 as many tender offers as possible, so that book-entry efficiencies in depository-eligible securities would be available on a routine basis.

tender agents that are not registered transfer agents, nearly all tender offers are handled by tender agents that would be subject to the rule. Accordingly, the Commission believes that Rule 17Ad-14 will apply to nearly all tender offers and certainly to those tender offers that will benefit most from depository processing.

⁴⁵See, e.g., DTC Rule 5, Midwest Securities Trust Co., Rule 2 Section 2, and Philadelphia Depository Trust Co., Rule 5. Only a few publicly traded companies with fewer than 500,000 shares of common stock outstanding have the same shares on deposit at securities depositories.

Accordingly, the Commission believes that the size criteria contained in Rule 17Ad-14(b)(1), which will reach tender offers for nearly all depository-eligible securities, are appropriate.

2. Odd Lot Tender Offers

Several commenters discussed the proposed exclusion in paragraph (b)(2) for odd-lot tender offers (*i.e.*, tender offers to persons holding fewer than 100 shares). Some commenters, believing that Rule 17Ad-14 should apply to tender offers for odd-lots of the subject company's securities, stated that securityholders whose odd-lots are held by banks, brokers, or other intermediaries should be able to take advantage of book-entry delivery and should not have to endure the delays and risks of missing an offer while waiting for their securities to be reissued in their names.⁴⁶ Other commenters, however, including representatives of the transfer agent community, noted the limited secondary trading market effects during odd-lot offers and argued that those limited effects justified the exclusion of odd-lot offers. Specifically, when an odd-lot tender offer occurs, there usually is very little, if any, impact on the market price of securities trading in round-lots. Indeed, the price of securities trading in odd-lots is derivatively priced from the round-lots. For those reasons, in part, DTC indicated that it generally will not make a security ineligible for depository services simply because it is subject to an odd-lot tender offer. Thus, to the extent that one of the underlying objectives of Rule 17Ad-14 is to reduce adverse effects on the secondary trading markets and on the processing of secondary market transactions during tender offers, those concerns normally are not present in odd-lot tender offers.⁴⁷ Accordingly, while the Commission encourages bidders and their agents to use VOP-type programs for odd-lot tender offers when cost effective and efficient to do so, the Commission has determined not to include odd-lot tender offers within the scope of Rule 17Ad-14 at this time.

⁴⁶Many retail customers owning odd-lots leave those securities with their broker-dealer or bank. Many other odd-lot positions, however, are held outside securities depositories. See generally, Proposing Release, *supra* note 1, at nn. 16 & 23.

⁴⁷The Commission recently amended Rules 13e-3 and 13e-4 to exclude odd-lot tender offers [17 CFR 240.13e-3 and 13e-4]. Exclusion of odd lot tender offers from Rule 17Ad-14, therefore, is consistent with the Commission's treatment of odd-lot tender offers under other rules.

B. Number of Depository Accounts

Another question posed in the Proposing Release was whether Rule 17Ad-14 should require the bidder's agent to establish and maintain an account with one or more, rather than all, qualified securities depositories.⁴⁸ Many commenters who addressed this issue suggested that the rule would best promote safety and efficiency if accounts were required at all depositories, including regional depositories.⁴⁹

Certain commenters, however, including some transfer agents, recommended that a tender agent be required to establish an account with only one securities depository. These commenters noted that establishing an account at only one securities depository could simplify several of the tender agent's tasks, such as balancing depository accounts, since it would not have to deal with several depositories.⁵⁰ Many of these commenters also suggested, however, that all depositories should be required to keep the subject company's securities eligible for depository services and that those depositories not under contract with the tender agent should be required to operate interfaces or links with the primary depository ("interfaced system").

The Commission has monitored the operation of depository and clearing corporation interfaces for several years⁵¹ and believes that, under most circumstances, interfaces effectively link components of the national clearance and settlement system. Nonetheless, the Commission believes that depository interfaces may not be particularly well-suited to the demands of tender agents and depository participants during a tender offer. During a tender offer, a depository needs to control its participants' securities positions and

⁴⁸ 48 FR at 17613. Currently, only DTC is a qualified securities depository. See notes 13 and 42 *supra*. One commenter recommended that Rule 17Ad-14 not be adopted until all depositories have approved systems in place. MSTA Letter at 1.

⁴⁹ See, e.g., letter from Charles M. Viviano, First Vice President and Executive Cashier, Prudential-Bache Securities, to George A. Fitzsimmons, Secretary, SEC, May 26, 1983, at 1-2. Some of these commenters stated, however, that a linked system, described *infra*, could be an acceptable alternative under certain circumstances. See, e.g., letter from Herbert I. Levitt, General Partner, Spear, Leeds & Kellogg, to George A. Fitzsimmons, Secretary, SEC, May 24, 1983, at 1.

⁵⁰ In this connection, a number of commenters noted that it can be more difficult for a tender agent located outside of New York City to balance accounts with DTC on a remote basis than with a local depository.

⁵¹ See the discussion in Securities Exchange Act Release No. 20461 (December 7, 1983), 48 FR 55654 (December 14, 1983).

certificates closely to assure that it can satisfy its participants' instructions efficiently and fairly. Requiring depositories to use interfaces to tender securities imposes an intermediary step in the process, which can create substantial liabilities for the participants, tender agents and all linked depositories. At the same time, universal dependence on interfaces could increase the risk to tenderors and bidders that securities committed by letters of transmittal will not be physically delivered on a timely basis due to fails at an interfacing depository. At the very least, in any instance in which a tender agent depends on depository interfaces, the agent will experience reduced control over interfaced depositories, and remote participants may face early cut-off times. While we recognize the difficulties associated with establishing accounts with each of the four qualified securities depositories, the Commission believes that these difficulties for tender agents are substantially outweighed by the potential for reduced control and financial exposure that could result from universal dependence on an interfaced system. Accordingly, the Commission believes that Rule 17Ad-14 should require tender agents to establish accounts at all qualified securities depositories.⁵²

In addition, one commenter noted that Rule 17Ad-14 may require several registered transfer agents, each acting on behalf of a single bidder, to establish redundant accounts with qualified securities depositories. For example, if a bidder appointed one registered transfer agent as the depository and another registered transfer agent in a different city as a forwarding agent, both would be required under paragraph (a) of Proposed Rule 17Ad-14 to establish depository accounts. Since the securities depository could then make book-entry deliveries of securities to either transfer agent, the commenter suggested that establishing two separate accounts is unnecessary and potentially confusing.⁵³

The Commission agrees with this suggestion. The Commission believes that only one registered transfer agent, acting on behalf of the bidder, need establish an account with a qualified

⁵² As discussed *infra*, the Commission intends to monitor the effect of Rule 17Ad-14 on the financial community, including the requirement of establishing accounts at all qualified depositories. The Commission will consider amending paragraph (a) of Rule 17Ad-14 in the future if necessary or appropriate.

⁵³ See letter from Nicola L. Caporale, Vice President, Goldman, Sachs & Co., to George A. Fitzsimmons, Secretary, SEC, June 2, 1983, at 2.

securities depository to permit book-entry tender and withdrawal of securities. That agent should be the one receiving tendered securities and making payments therefor. Those responsibilities will usually be borne by the depository, in the case of a tender offer, and the exchange agent, in the case of an exchange offer. The Commission does not believe that duplicative accounts will afford any additional benefits to the financial community or the public. Accordingly, paragraph (a) of Rule 17Ad-14 has been modified to address this concern.⁵⁴

C. Continued Eligibility of the Subject Company's Securities

The Proposing Release asked for comments on whether a qualified securities depository should be permitted, under any circumstances, to declare the subject company's securities ineligible for depository services after the bidder (or its agent) has established a depository account for receiving tendered securities.⁵⁵ Many commenters, including DTC, stated that once the depository and the tender agent reach agreement to establish an account, a securities depository should not be able to make the subject company's securities ineligible for depository services.

Securities depositories filing proposals for qualified programs, pursuant to Section 19 of the Act, should specify the times and circumstances under which the depository would declare as subject company's securities ineligible for depository services. In that regard, the Commission expects that securities depositories will not exit securities from their systems absent very compelling reasons.⁵⁶

⁵⁴ Rule 17Ad-14, as adopted, would define "depository" as an agent of the bidder receiving securities from tendering depository participants and paying those participants for shares tendered and defines the term "exchange agent" as the agent performing like functions in connection with an exchange offer.

⁵⁵ 48 FR at 17613.

⁵⁶ See Section 17A(b)(3) of the Act. DTC indicated that there are two types of offers that it could not agree to process. First, DTC said it would not process offers that can be terminated at any time during a processing day on the occurrence of some event (e.g., the tender of a specified percentage of shares outstanding). DTC explained that, while instructions from a participant to tender shares might be received by DTC before the offer ended, book-entry movement would not occur until after the offers expired. DTC suggested that it could accommodate even such offers if the bidder agreed to purchase all shares tendered on the last day or purchase them *pro rata*. Second, DTC said it would not process offers without any protect period (see note 19, *supra*). DTC explained, for example, that a participant could purchase securities on trade date ("T") three days before an offer expires, send a

Continued

D. Withdrawal by Book-Entry

Rule 17Ad-14, as proposed, addressed only book-entry delivery and receipt of securities. In the interest of providing a complete tender offer service, however, DTC's VOP permits tender agents to return previously tendered securities, provided an appropriate withdrawal request is submitted to the tender agent within the permitted time period.⁵⁷ In addition, several commenters indicated that return of securities by book-entry in response to a demand for withdrawal during competing bids is substantially easier and more efficient than physical certificate processing ex-depository. Since commenters and the Commission believe that the benefits of book-entry processing should be available in connection with tender offers to the greatest extent possible, Rule 17Ad-14 has been changed to include the process of returning previously tendered securities that have been withdrawn.

E. Tendering Physical Certificates Directly to the Bidder's Agent

Some commenters pointed out that there may be situations in which it is necessary to deliver physical certificates directly to the bidder's agent outside of the securities depository. For example, it may be quicker to deliver directly pursuant to a guarantee as the end of the protection period approaches.⁵⁸ As a result, the Commission emphasizes that the rule does not prevent a participant from tendering physical certificates to the tender agent outside of the book-entry environment, and a tender agent is not prohibited from

letter of guarantee directly to the tender agent on T + 1, receive delivery of the securities from the seller on T + 5, but be unable to have DTC deliver the shares before the end of T + 3. DTC suggested that this problem can be avoided only in offers in which there is a minimum protect period sufficient to enable normal depository processing. See DTC Letter, *supra* note 37, at 2-3.

The Commission recognizes that there may be offers made under circumstances like those described above, in which book-entry processing may be counter-productive and inconsistent with the needs of the financial community and the public. The Commission urges bidders' agents and the depositories to work out potential difficulties before an account is required to be established.

⁵⁷ See Section 14(d)(5) of the Act (withdrawal permitted until expiration of seven days after giving notice of definitive offer to securityholders and at any time after sixty days of original offer) and Rule 14d-7 (withdrawal permitted until expiration of fifteen business days from the date of offer's commencement and also permitted under certain conditions until expiration of ten days following commencement of a competing offer) [17 CFR 240.14d-7].

⁵⁸ See, e.g., letter from William A. Schreyer, President, Merrill Lynch & Co., Inc., to George A. Fitzsimmons, Secretary, SEC, May 27, 1983, at 2-4 (hereinafter cited as "Merrill Lynch letter").

accepting securities so tendered.⁵⁹ Indeed, under Rule 17Ad-14, a depository participant may choose the method of tendering most appropriate to its needs.

IV. Related Matters Raised by Comments

The Proposing Release and the commenters' responses raised a variety of other issues related to tender offer processing and the national clearance and settlement system. Some of these concerns, to the extent they bear significantly on tender offer processing, are discussed below.⁶⁰ For example, some commenters believe that the Commission could foster greater use of automated clearance and settlement systems by requiring greater uniformity of procedures among all clearing agencies. Specific suggestions included: (i) Requiring clearing corporations to establish uniform buy-in and liability notice rules;⁶¹ and (ii) requiring all securities depositories to have the same eligibility criteria for securities. Under current practice, the Commission understands that securities depositories customarily grant eligibility to a security upon a participant's request even if that security is traded infrequently. Therefore, the Commission believes that differences in depository-eligibility lists for equity securities do not raise a serious concern at this time.⁶² The Commission agrees that the present differences in buy-in and letter of liability procedures substantially impair the efficiency of, and increase the risks for, the safe clearance and settlement of securities transactions during tender offers. The Commission understands, however, that the clearing agencies are actively resolving these disparities in cooperation with Commission staff members.⁶³

⁵⁹ The Commission notes this result comports with the recommendation of the Advisory Committee. See note 17 *supra* and accompanying text.

⁶⁰ Several other comments would appear to fall outside this rulemaking proceeding. For example, one commenter suggested that the bidder's depository should receive from the transfer agent both a list of the shareholders of record and a stop list. The Commission believes that some of these concerns may have been addressed in Rule 14d-5(c) [17 CFR 240.14d-5(c)].

⁶¹ See Proposing Release, *supra* note 1, at 17607-08.

⁶² For a discussion of the clearing agency eligibility problems respecting municipal securities see Securities Exchange Act Release No. 20365 (November 14, 1983), 48 FR 52531 (November 18, 1983).

⁶³ If the clearing agencies cannot reach a consensus within a reasonable time, the Commission will consider taking further regulatory action, such as adopting a uniform rule.

Several commenters believed that all tender offers should require a "protection period"⁶⁴ and suggested that the Commission adopt a rule—for example, under Section 14(e) of the Act—establishing a minimum protect period.⁶⁵ While the Commission appreciates that a protection period reduces processing difficulties,⁶⁶ the Commission does not believe that at this time it should establish by rule a standard protection period. Industry custom provides an eight day protection period for almost all offers. While a rule requiring a minimum protect period may be necessary at some point if custom changes, we are not persuaded that a regulatory requirement is needed now.⁶⁷

The Commission similarly believes that other matters raised by commenters involve business considerations to be resolved among the bidder, its agent, and the securities depository prior to processing the tender offer.⁶⁸ Accordingly, while the Commission will monitor the use of VOP programs during tender offers to determine whether these concerns warrant further attention or amendments to rules and procedures of the securities depositories, the Commission does not believe it is appropriate at this time to address these concerns in Rule 17Ad-14.⁶⁹

⁶⁴ See note 19 *supra*.

⁶⁵ See Merrill Lynch letter, *supra* note 58, at 4-5 and letter from A. M. Ricci, Drexel Burnham Lambert, Inc., to George A. Fitzsimmons, Secretary, SEC, May 27, 1983.

⁶⁶ See note 56 *supra*.

⁶⁷ If it appears that the absence of uniform protect periods adversely affect secondary market trading or clearance and settlement of securities subject to a tender offer, the Commission will consider whether further regulatory action is necessary.

⁶⁸ For example, commenters suggested certain tender offer securities processing enhancements, including: (i) Synchronizing the VOP "cut-off time" (i.e., the time by which depository participants must instruct, for example, DTC to deliver securities to the tender agent by book-entry) with the expiration dates in each tender offer; (ii) requiring DTC to adjust its VOP system in each offer to each tender agent's procedures; (iii) expanding the Fast Automated Securities Transfer program (see Proposing Release, *supra* note 1, at 17610 and n. 58) to simplify delivery of odd-lot certificates to customers; and (iv) providing that book-entry tenders be accepted even if those tenders are submitted after the offer expires. See Proposing Release, *supra* note 1, at n. 47. In addition, although one commenter suggested that Rule 17Ad-14 should provide that book-entry delivery of tendered securities is legally equivalent to delivery of physical certificates, we note that state law already provides that securities may be effectively transferred by book-entry delivery at a registered securities depository. See e.g., N.Y. U.C.C. section 8-320 (McKinney, Supp., July 1983); Cal. Com. Code §8320 (West Supp. 1983); Ill. Ann. Stat. ch. 26 section 8-320 (Smith-Hurd 1974); 13 Pa. Cons. Stat. Ann. section 8-320 (Purdon Supp. 1983).

⁶⁹ See also note 52, *supra*.

Furthermore, as indicated above, the Commission intends to monitor the effects of Rule 17Ad-14 generally and to modify the rule, as appropriate, to foster or accommodate further developments in tender offer processing and in the national clearance and settlement system.

V. Statutory Authority

Rule 17Ad-14 is being adopted pursuant to Section 2, 11A(a)(1)(B), 14(d)(4), 15(c)(3), 15(c)(6), 17A(a), 17A(d)(1), and 23(a) of the Securities Exchange Act of 1934 [15 U.S.C. 78b, 78k-1(a)(1)(B), 78n(d)(4), 78o(c)(3), 78o(c)(6), 78q-1(a), 78q-1(d)(1) and 78w(a)]. The Commission believes that Rule 17Ad-14 is necessary for the protection of investors and is consistent with the public interest.

Congress, in the Securities Acts Amendments of 1975, found, among other things, that the prompt and accurate clearance and settlement of securities transactions, including the transfer of record ownership, was necessary for the protection of investors and that inefficient clearance and settlement procedures imposed unnecessary costs on investors and persons facilitating transactions on behalf of investors. Congress also found that uniform standards and procedures for clearance and settlement would reduce those costs and increase protection for investors and persons facilitating transactions on behalf of investors.⁷⁰

As part of the Securities Acts Amendments of 1975, Congress also enacted Section 17A(d)(1) of the Act, which prohibits registered transfer agents and registered clearing agencies from engaging in any activity in contravention of such rules and regulations as the Commission may prescribe as necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. In light of the need to further the purposes of Section 17A(a)(1) of the Act in the context of tender offers and the need for increased investor protection when processing transactions in securities of the subject company during tender offers,⁷¹ the Commission believes that it is appropriate to adopt Rule 17Ad-14.

In addition, the Commission believes that Rule 17Ad-14 will help maintain fair and orderly markets in the trading

of the subject company's securities during a tender offer.⁷² Because clearance and settlement mechanisms will be less strained during a tender offer, market liquidity for those securities should be enhanced.

Finally, Section 14(d)(4) authorizes the Commission to prescribe rules regarding solicitations or recommendations to accept or a reject a tender offer or requests or invitations for tenders. In soliciting tenders and acceptances of an offer, the bidder through its tender agent will need to provide for deposit and delivery of the subject company's securities at qualified registered securities depositories by establishing accounts with those depositories.

The Commission believes that the costs, if any, to bidders of complying with Rule 17Ad-14 will be minimal. Currently, bidders do not incur any DTC charges when using the voluntary offering program. Instead, costs for operating that program are allocated among DTC participants using these services. The Commission anticipates that depositories offering these programs will continue to assess tender offer service charges on participants on the basis of participant usage.⁷³ Moreover, the Commission believes that elimination of a substantial percentage of physical certificate tenders should actually reduce tender agent costs.

In addition, to simplify and expedite the granting of exemptions under paragraph (d) of Rule 17Ad-14, the Commission is amending its Rules Delegating Functions to Division Directors, Regional Administrators, and the Secretary of the Commission (17 CFR 200.30-1 *et seq.*) to delegate that function to the Director of the Division of Market Regulation, as provided below. The Commission is adopting this amendment pursuant to Pub. L. 87-592, 17 stat. 394, 15 U.S.C. 78d-1, d-2.

List of Subjects

17 CFR Part 200

Administrative practice and procedure, Freedom of Information, Privacy, Securities.

17 CFR Part 240

Reporting and recordkeeping requirements, Securities.

⁷² See Section 2 of the Act

⁷³ In order to obtain Commission approval as a qualified registered securities depository under Rule 17Ad-14, each securities depository will be required to submit to the Commission as part of its tender offer processing plan filed under Section 19 of the Act a schedule of fees to be charged participants. Any changes to those fees will have to be refiled pursuant to Section 19(b) of the Act and Rule 19b-4 thereunder [17 CFR 240.19b-4]

VI. Text of Rule

In accordance with the foregoing, the Commission hereby amends Chapter II of Title 17 of the Code of Federal Regulations as follows:

PART 200—[AMENDED]

1. By adding paragraph (a)(43) to § 200.30-3 as follows:

§ 200.30-3 Delegation of Authority to Director of Division of Market Regulation.

* * * * *

(a) * * *

(43) To grant or deny exemptions from Rule 17Ad-14 [§ 240.17Ad-14 of this chapter], pursuant to Rule 17Ad-14(d) [§ 240.17Ad-14(d) of this chapter]. (Pub. L. 87-592, 76 Stat. 394, 15 U.S.C. 78d-1, 78d-2).

* * * * *

PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

2. By adding § 240.17Ad-14 to read as follows:

§ 240.17Ad-14 Tender agents.

(a) *Establishing book-entry depository accounts.* When securities of a subject company have been declared eligible by one or more qualified registered securities depositories for the services of those depositories at the time a tender or exchange offer is commenced, no registered transfer agent shall act on behalf of the bidder as a depository, in the case of a tender offer, or an exchange agent, in the case of an exchange offer, in connection with a tender or exchange offer, unless that transfer agent has established, within two business days after commencement of the offer, specially designated accounts. These accounts shall be maintained throughout the duration of the offer, including protection periods, with all qualified registered securities depositories holding the subject company's securities, for purposes of receiving from depository participants securities being tendered to the bidder by book-entry delivery pursuant to transmittal letters and other documentation and for purposes of allowing tender agents to return to depository participants by book-entry movement securities withdrawn from the offer.

(b) *Exclusions.* The rule shall not apply to tender or exchange offers (1) that are made for a class of securities of a subject company that has fewer than (i) 500 security holders of record for that class, or (ii) 500,000 shares of that class outstanding; or (2) that are made

⁷⁰ See Section 17A(a)(1) of the Act

⁷¹ See also Section 17A(b)(3)(A) (safeguarding funds and securities), 17A(b)(3)(F) (safeguarding funds and securities and removing impediments to a national clearance and settlement system) and 17A(e) of the Act (immobilization of certificates for settlement purposes)

exclusively to security holders of fewer than 100 shares of a class of securities.

(c) *Definitions.* For purposes of this rule (1) the terms "subject company," "business day," "security holders," and "transmittal letter" shall be given the meanings provided in § 240.14d-1(b) (2) unless the context otherwise requires; a tender or exchange offer shall be deemed to have commenced as specified in § 240.14d-2 (3) the term "bidder" shall mean any person who makes a tender or exchange offer or on whose behalf a tender or exchange offer is made (4) a "qualified registered securities depository" shall mean a registered clearing agency having rules and procedures approved by the Commission pursuant to Section 19 of the Securities Exchange Act of 1934 to enable book-entry delivery of the securities of the subject company to and return of those securities from the transfer agent through the facilities of that securities depository; and (5) the term "depository" refers to that agent of the bidder receiving securities from tendering depository participants and paying those participants for shares tendered. The term "exchange agent" refers to the agent performing like functions in connection with an exchange offer.

(d) *Exemptions.* The Commission may exempt from the provisions of this rule either unconditionally or on specified terms and conditions any registered transfer agent tender or exchange offer or class of tender or exchange offers if the Commission determines that an exemption is consistent with the public interest, the protection of investors, the prompt and accurate clearance and settlement of securities transactions, the maintenance of fair and orderly markets, or the removal of impediments to a national clearance and settlement system.

VII Regulatory Flexibility Act

Pursuant to 15 U.S.C. 605(b) the Chairman of the Commission in the Proposing Release certified that Rule 17Ad-14 if adopted would not have a significant economic impact on a substantial number of small entities. The Commission received no comments on that certification. Accordingly, the Commission believes that the rule as adopted will not have a significant impact on a substantial number of small entities.

VIII Burden on Competition

In accordance with Section 23(a)(2) of the Act, the Commission has considered whether Rule 17Ad-14 will impose a burden on competition not necessary or appropriate in furtherance of the Act. As

discussed in detail in this release, the Commission believes that Rule 17Ad-14 (1) will reduce processing costs for the financial community and for the public; (2) will tend to eliminate secondary market inefficiencies; and (3) will apply equally to all registered securities depositories and registered transfer agents. Accordingly, the Commission believes that Rule 17Ad-14 will facilitate the establishment of a national system for the prompt and accurate clearance and settlement of securities transactions, pursuant to Section 17A(a)(1)(2) of the Act, and will not impose a burden on competition that is not necessary or appropriate to further the Act.

18 CFR Part 270

(Docket No. RM80-33-001, Order No. 356)

Interpretive Rule for Btu Measurement Standard Under the Natural Gas Policy Act of 1978

Issued January 19 1984

AGENCY: Federal Energy Regulatory Commission (DOE)

ACTION: Interpretive rule

SUMMARY: The Federal Energy Regulatory Commission (Commission) is amending its Btu measurement regulations for gas sold under the Natural Gas Policy Act of 1978 (NGPA). These regulations are intended to implement the District of Columbia Circuit Court of Appeals decision in *Interstate Natural Gas Association of America v. Federal Energy Regulatory Commission*. The Commission is amending its regulations in § 270.204 to require that the maximum lawful price for gas sold under the NGPA must be calculated based on the Btu content of gas measured under the standard test conditions defined by the Commission.

EFFECTIVE DATE: January 19 1984

FOR FURTHER INFORMATION CONTACT: Nancy M. Rizzo, Office of General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street, NE, Washington, DC 20426. (202) 377-8033.

SUPPLEMENTARY INFORMATION:

I. Introduction

The Federal Energy Regulatory Commission (Commission) is amending its regulations for determining for pricing purposes the quantity of heat energy involved in a first sale of natural gas pursuant to the Natural Gas Policy Act of 1978 (NGPA). In so doing, the Commission is implementing the decision in *Interstate Natural Gas Association of America v. Federal Energy Regulatory Commission* (7NG 11)¹ in which the court vacated § 270.204 of the Commission's regulations.

The Commission is amending § 270.204(c) of its regulations to specify that the number of Btu's determined under the "standard test conditions" set forth in § 270.204 (a) and (b) must be used for establishing the maximum lawful payment for gas sold in a first sale. Briefly stated, this amendment establishes that the Btu content of gas sold in a first sale under the NGPA must be determined on the basis of the natural gas being saturated with water vapor at 60 degrees Fahrenheit at a pressure of 14.73 psia, regardless of the actual delivery conditions.

II. Background

The energy value of natural gas is expressed in terms of British thermal units (Btu's) each Btu representing the amount of heat energy needed to raise the temperature of one pound of water one degree Fahrenheit.

Under the Natural Gas Act (NGA), the Commission established prices per thousand cubic feet (Mcf) for natural gas sold in the interstate market. The Commission permitted upward and downward adjustments to these rates to reflect the Btu content of the gas determined under certain "standard test conditions."² These adjustments were

¹764 F.2d 1 (D.C. Cir. 1984). The United States Court of Appeals for the District of Columbia Circuit issued its mandate in *Interstate Natural Gas Association of America v. Federal Energy Regulatory Commission* on December 8 1984. On December 30 1984 Chief Justice Burger denied without prejudice requests for stay of the mandate filed by the Commission and other parties. On January 17 1984 the Commission filed a petition for writ of certiorari and a motion to stay the mandate with the United States Supreme Court.

²More specifically, the "standard test conditions" determine or impute the number of Btu's produced by the combustion at constant pressure of the amount of gas which would occupy a volume of 10 cubic feet at a temperature of 60 Fahrenheit saturated with water vapor and under a pressure equivalent to that of 30.00 inches of mercury at 32 Fahrenheit and under standard gravitation of force (980.665 centimeters per second squared) with air of the same temperature and pressure as the gas when the products of combustion are cooled to the initial temperature of the gas and air and when the water from the combustion is condensed to the liquid state. 18 CFR 270.204 (c) (1) (i) (ii) (iii) (iv) (1984).
