

**Exhibit X**

- 37. Attach as Exhibit X any specifications, qualifications, or other criteria required of any person, including but not limited to, regulators, market participants, market infrastructures, venues from which data could be submitted to the applicant, and third party service providers, who request access to data maintained by the applicant.**

Any entity seeking access to data maintained by DDR must comply with basic technical and functional requirements, as well as complete customer documentation and pass OFAC and other global watch lists sanctions screening. An entity seeking access to data maintained by DDR must have internet connectivity and be able to log onto to a secure website and download their data in CSV files.

Access by Market Participants to non-public swap data maintained by DDR is generally prohibited by regulation. However, access to data related to a particular swap by either counterparty to that swap or by an entity that submitted the swap is permissible. In addition, if specifically authorized by the User, or counterparty, third party service providers that submit data on behalf of Users may be granted limited access to data.

Regulator access to data maintained by DDR is provided to the regulator to whom the data is being submitted, in this case the Securities and Exchange Commission, and may be granted to other regulators and entities as permitted by the primary regulator or applicable regulation or law. Similar to other Users, regulators must have internet connectivity and be able to log onto a secure website and download data they are entitled to view.
