This is in reference to : SEC File No. 4-500

We, the American investing public, need your help. Please make the necessary changes to protect our country. If left unchecked, Naked Short Selling will bring down the financial wing of this great country. Does that sound too strong? There is ONE company on the pink sheets that to rectify the "short" will cost Billions of dollars. And sadly that is just ONE company. There are hundreds of companies in the Pink Sheets that the SEC has ALLOWED the Markert Makers and the off-shore hedge funds to Naked Short to astronomical figures.

The SEC has to accept its position of authority and put an end to the illegal practice of allowing naked short selling, the counterfieting of shares is a 100 percent commision ,with no tax liability, ripoff of the American people. For the President to encourage the American public to invest in such a corrupt system, at this time, is dangerous to their financial well being.

Thank you for your time and assitance in this hour of need.

R. Douglas Olson
