Section I.   through Section V.   No change.

Section VI. Technology Fees

A.   Connectivity Fees
Market participants are required to connect to the BOX network
(including cross-connects)[16] through datacenters owned and operated
by third-party vendors. While BOX does not assess connectivity fees;
fees are assessed by the datacenters and will be billed directly to the
market participant. Connectivity fees can include one-time set-up
fees, monthly charges, and other fees charged by the third-party
vendor in exchange for the services provided to the market
participant.

There are currently two datacenters where market participants can
connect to the BOX network: NY4, owned and operated by Equinix;
and 65 Broadway, owned and operated by 365 Main. The connectivity
fees associated with these locations are listed below:

	NY4		65 Broadway	
Connection Type	One-time set-up	Monthly	One-time set-up	Monthly
POTS	$100	$25	$50	$25
Ethernet	N/A	N/A	$250	$175
T1	$500	$245[$100]	$250	$175
Cat 5/6	$500	$245	$250	$175
COAX	$500	$245	$250	$200
Single & Multi Mode Fiber	$500	$350	$500	$250
Extended Cross Connect	N/A[$1000]	N/A[$750]	$500	$400
Intra-Customer Cross Connect	$500	$0	N/A	N/A

B. No change.

Section VII.   through Section IX.   No change.

---

[16] A "cross connect" occurs when the affected third-party system is located at the same datacenter where
BOX systems are located, and the third-party connects to BOX through the datacenter.
