Rule 5.5. Series of Option Contracts Open for Trading

(a) – (c) No change.

(d) Short Term Option Series Program. After an option class has been approved for listing and trading on the Exchange, the Exchange may open for trading on any Thursday or Friday that is a business day (“Short Term Option Opening Date”) series of options on that class that expire at the close of business on each of the next five Fridays that are business days and are not Fridays in which monthly options series or Quarterly Options Series expire (“Short Term Option Expiration Dates”). The Exchange may have no more than a total of five Short Term Option Expiration Dates. If the Exchange is not open for business on the respective Thursday or Friday, the Short Term Option Opening Date will be the first business day immediately prior to that respective Thursday or Friday. Similarly, if the Exchange is not open for business on the Friday of the following business week, the Short Term Option Expiration Date will be the first business day immediately prior to that Friday. Regarding Short Term Option Series:

(1) Classes. The Exchange may select up to [thirty] fifty currently listed option classes on which Short Term Option Series may be opened on any Short Term Option Opening Date. In addition to the [thirty] fifty-option class restriction, the Exchange also may list Short Term Option Series on any option classes that are selected by other securities exchanges that employ a similar program under their respective rules. For each option class eligible for participation in the Short Term Option Series Program, the Exchange may open up to 30 Short Term Option Series for each expiration date in that class. The Exchange may also open Short Term Option Series that are opened by other securities exchanges in option classes selected by such exchanges under their respective short term option rules.

(2) No changes.

(3) Initial Series. The Exchange may open up to 20 initial series for each option class that participates in the Short Term Option Series Program. The strike price of each Short Term Option Series will be fixed at a price per share, with approximately the same number of strike prices being opened above and below the value of the underlying security at about the time that the Short Term Option Series are initially opened for trading on the Exchange (*e.g.*, if seven series are initially opened, there will be at least three strike prices above and three strike prices below the value of the underlying security). Any strike prices listed by the Exchange shall be [within thirty percent (30%) above or below the closing price of the underlying security] reasonably close to the price of the underlying equity security (which underlying security price

shall be determined in accordance with subparagraph (a)(i) of Rule 5.5A) and within the following parameters: (i) if the price of the underlying is less than or equal to \$20, strike prices shall be not more than one hundred percent (100%) above or below the price of the underlying security; and (ii) if the price of the underlying security is greater than \$20, strike prices shall be not more than fifty percent (50%) above or below the price of the underlying security.

(4) Additional Series. The Exchange may open up to 10 additional series for each option class that participates in the Short Term Option Series Program when the Exchange deems it necessary to maintain an orderly market, to meet customer demand or when the market price of the underlying security moves substantially from the exercise price or prices of the series already opened. Any additional strike prices listed by the Exchange shall be [within thirty percent (30%) above or below the current price of the underlying security] reasonably close to the price of the underlying equity security (which underlying security price shall be determined in accordance with subparagraph (a)(i) of Rule 5.5A) and within the following parameters: (i) if the price of the underlying is less than or equal to \$20, additional strike prices shall be not more than one hundred percent (100%) above or below the price of the underlying security; and (ii) if the price of the underlying security is greater than \$20, additional strike prices shall be not more than fifty percent (50%) above or below the price of the underlying security. The Exchange may also open additional strike prices of Short Term Option Series that are more than [30]50% above or below the current value of the underlying security (if the price is greater than \$20); provided that demonstrated customer interest exists for such series, as expressed by institutional, corporate or individual customers or their brokers. Market-Makers trading for their own account shall not be considered when determining customer interest under this provision. In the event that the underlying security has moved such that there are no series that are at least 10% above or below the current price of the underlying security and all existing series have open interest, the Exchange may list additional series, in excess of the thirty series per class limit set forth in Rule 5.5(d)(1), that are between 10% and 30% above or below the price of the underlying security. The opening of the new Short Term Option Series shall not affect the series of options of the same class previously opened. Notwithstanding any other provisions in this Rule 5.5, Short Term Option Series may be added up to and including on the Short Term Option Expiration Date for that options series.

(5) Strike Interval. The interval between strike prices on Short Term Option Series may be: (i) \$0.50 or greater where the strike price is less than \$75, and \$1 or greater where the strike price is between \$75 and \$150 for all classes that participate in the Short Term Option Series Program; [or] (ii) \$0.50 for classes that trade in one dollar increments in non-Short Term Options and that participate in the Short Term Option Series Program; or (iii) \$2.50 or greater where the strike price is above \$150. A non-Short Term Option that is on a class that has been selected to participate in the Short Term Option Series Program is referred to as a "Related non-Short Term Option."

(6) Delisting. In the event that the underlying security has moved such that there are no series that are at least 10% above or below the current price of the underlying security, the Exchange will delist any series with no open interest in both the call and the put series having a: (i) strike higher than the highest price with open interest in the put and/or call series for a given expiration

week; and (ii) strike lower than the lowest strike price with open interest in the put and/or the call series for a given expiration week[, so as to list series that are at least 10% but not more than 30% above or below the current price of the underlying security].

Related non-Short Term Option series shall be opened during the week prior to the week that such Related non-Short Term Option series expire in the same manner as permitted in Rule 5.5(d) and in the same strike price intervals that are permitted in this Rule 5.5(d)(5).

Rule 5.5A Select Provisions of Options Listing Procedures Plan

(a) - (b) No change.

(i) Exercise Price Range Limitations - Except as provided in subparagraphs (ii) through (iv) below, if the price of the underlying security is less than or equal to \$20, the Exchange shall not list new option series with an exercise price more than 100% above or below the price of the underlying security. However, the foregoing restriction shall not prohibit the listing of at least three exercise prices per expiration month in an option class. Except as provided in Rule 5.5(d)(4), [I]f the price of the underlying security is greater than \$20, the Exchange shall not list new option series with an exercise price more than 50% above or below the price of the underlying security.

The price of the underlying security is measured by: (1) for intra-day add-on series and next-day series additions, the daily high and low of all prices reported by all national securities exchanges; (2) for new expiration months, the daily high and low of all prices reported by all national securities exchanges on the day the Exchange determines its preliminary notification of new series; and (3) for option series to be added as a result of pre-market trading, the most recent share price reported by all national securities exchanges between 7:45 a.m. and 8:30 a.m. (Chicago time).

Rule 24.9. Terms of Index Option Contracts

(a) General.

(1) – (2) No change.

(A) Short Term Option Series Program. Notwithstanding the preceding restriction, after an index option class has been approved for listing and trading on the Exchange, the Exchange may open for trading on any Thursday or Friday that is a business day (“Short Term Option Opening Date”) series of options on that class that expire at the close of business on each of the next five Fridays that are business days and are not Fridays in which monthly options series or Quarterly Options Series expire (“Short Term Option Expiration Dates”). The Exchange may have no more than a total of five Short Term Option Expiration Dates. If the Exchange is not open for business on the respective Thursday or Friday, the Short Term Option Opening Date will be the first business day immediately prior to that respective Thursday or Friday. Similarly, if the Exchange is not open for business on the

Friday of the following business week, the Short Term Option Expiration Date will be the first business day immediately prior to that Friday. Regarding Short Term Option Series:

(i) Classes. The Exchange may select up to [thirty] fifty currently listed option classes on which Short Term Option Series may be opened on any Short Term Option Opening Date. In addition to the [thirty] fifty-option class restriction, the Exchange also may list Short Term Option Series on any option classes that are selected by other securities exchanges that employ a similar program under their respective rules. For each index option class eligible for participation in the Short Term Option Series Program, the Exchange may open up to 30 Short Term Option Series on index options for each expiration date in that class. The Exchange may also open Short Term Option Series that are opened by other securities exchanges in option classes selected by such exchanges under their respective short term option rules.

(ii) –(iv) No change.
