Footnotes (Continued):	
Footnote Number	Description
37	Extended Trading Hours ("ETH") is a separate trading session from Regular Trading Hours ("RTH") for VIX, SPX, SPXw and SPX(w)pm only. ETH commences at 2:00AM CST and terminates at 8:15AM CST, and is conducted on an all-electronic trading model with no open outcry capability. ETH is a segregated trading session from RTH, requiring separate access permits and connectivity than RTH, and there is no market interaction between the two sessions.
38	For SPX and VIX, [i]if an LMM (1) provides continuous electronic quotes in at least the lesser of 99% of the non-adjusted series or 100% of the non-adjusted series minus one call-put pair in an ETH allocated class (excluding intra-day add-on series on the day during which such series are added for trading) during ETH in a given month and (2) ensures an opening of the same percentage of series by 2:05 a.m. for at least 90% of the trading days during ETH in a given month, the LMM will receive a rebate for that month and will receive a pro-rata share of a compensation pool equal to \$25,000 times the number of LMMs in that class. For example, if three LMMs are appointed in SPX, a compensation pool will be established each month totaling \$75,000. If each LMM meets the heightened continuous quoting standard in SPX during a month, each will receive \$25,000. If two LMM's meet the heightened continuous quoting standard in SPX during a month, those two LMM's would each receive \$37,500 and the third LMM would receive nothing. If only one LMM meets the heightened continuous quoting standard in SPX during a month, that LMM would receive \$75,000 and the other two would receive nothing.
39	For SPXpm, if an LMM (1) provides continuous electronic quotes in at least the lesser of 99% of the non-adjusted series or 100% of the non-adjusted series minus one call-put pair in an ETH allocated class (excluding intra-day add-on series on the day during which such series are added for trading) during ETH in a given month and (2) ensures an opening of the same percentage of series by 2:05 a.m. for at least 90% of the trading days during ETH in a given month, the LMM will receive a rebate of \$1,000 for that month.
