4758. Order Routing
(a) Order Routing Process

(1) The Order Routing Process shall be available to Participants from 7:00 a.m. until 8:00 p.m. Eastern Time, and shall route orders as described below. All routing of orders shall comply with Rule 611 of Regulation NMS under the Exchange Act.

(A) The System provides a variety of routing options. Routing options may be combined with all available order types and times-in-force, with the exception of order types and times-in-force whose terms are inconsistent with the terms of a particular routing option. The System will consider the quotations only of accessible markets. The term "System routing table" refers to the proprietary process for determining the specific trading venues to which the System routes orders and the order in which it routes them. Nasdaq reserves the right to maintain a different System routing table for different routing options and to modify the System routing table at any time without notice. The System routing options are:

(i)-(vii) No change.

(viii) SOLV is a routing option under which orders may either (i) route to the NASDAQ OMX BX Equities Market and NASDAQ OMX PSX, check the System, and then route to other destinations on the System routing table, or (ii) may check the System first and then route to destinations on the System routing table. If shares remain un-executed after routing, they are posted to the book. Once on the book, should the order subsequently be locked or crossed by another accessible market center, the System shall route the order to the locking or crossing market center.

[(viii)] (ix) "Directed Orders" are routed orders described in Rule 4751.

[(ix)] (x) LIST is a routing option under which an order, if received before the security has opened on its primary listing market, will be routed to the primary listing market for participation in that market’s opening process. After the security has opened on its primary listing market, unexecuted shares will be returned to the NASDAQ system. Thereafter, the order will check the System for available shares before being sent to destinations on the System routing table. Any remaining shares will be posted on the book. In addition, LIST orders entered after the security has opened on the primary listing market (but before 3:58 p.m.) will check the System for available shares before

1 The text of Rule 7018 reflects the text of the rule available at http://nasdaq.cchwallstreet.com/, as amended by SR-NASDAQ-2011-004 (January 24, 2011) and SR-NASDAQ-2011-017 (January 27, 2011). SR-NASDAQ 2011-004 and NASDAQ-SR 2011-017 were filed on an immediately effective basis, but the Commission has not yet issued a notice of the proposed rule changes.
being sent to destinations on the System routing table, with remaining shares posted on
the book. Once on the book, if the order is subsequently locked or crossed by another
market center, the System will not route the order to the locking or crossing market
center. At 3:58pm, all LIST orders will be cancelled on the System and any remaining
shares will route to the security’s primary listing market for participation in its closing
process. LIST orders received at or after 3:58 p.m. will check the
System for available shares before being sent to destinations on the System routing table,
and remaining shares will be routed to the security’s primary listing market to
participate in its closing process. Shares unexecuted in the closing process will be
posted to the NASDAQ book. LIST orders received after 4:00 p.m. will be posted to the
NASDAQ book. If trading in the security is stopped across all markets, LIST orders
will be sent to the primary listing market to participate in the re-opening process. When
normal trading resumes, unexecuted shares will be cancelled off of the primary and
posted on the NASDAQ book. LIST orders may not be designated as MGTC or SGTC.

Orders that do not check the System for available shares prior to routing may not be sent to a
facility of an exchange that is an affiliate of Nasdaq, except for orders that are sent to the
NASDAQ OMX BX Equities Market or to the NASDAQ OMX PSX facility of NASDAQ OMX
PHLX.

(B) Priority of Routed Orders. Regardless of the routing option selected, orders sent by the
System to other markets do not retain time priority with respect to other orders in the System and
the System shall continue to execute other orders while routed orders are away at another market
center. Once routed by the System, an order becomes subject to the rules and procedures of the
destination market including, but not limited to, order cancellation. If a routed order is
subsequently returned, in whole or in part, that order, or its remainder, shall receive a new time
stamp reflecting the time of its return to the System.

(b) No change
