6 The term “Firm” refers to a firm participating in a transaction marked by a Participant in the Firm range for clearing purposes at OCC.

7 The term “NOM Market Maker” is a Participant that has registered as a Market Maker on NOM pursuant to Chapter VII, Section 2, and must also remain in good standing pursuant to Chapter VII, Section 4. In order to receive NOM Market Maker pricing in all securities, the Participant must be registered as a NOM Market Maker in at least one security.

8 The term “Broker-Dealer” refers to a broker or dealer participating in a transaction when such transaction is not subject to transaction fees applicable to specific categories of transaction participants (other than brokers and dealers).

10 A QMM is a NASDAQ member that makes a significant contribution to market quality by providing liquidity at the national best bid and offer (“NBBO”) in a large number of stocks for a significant portion of the day. In addition, the
Participants that qualify for the Tier 8 rebate **and** add Customer, Professional, Firm, Non-NOM Market Maker and/or Broker-Dealer liquidity in Penny Pilot Options and/or Non- Penny Pilot Options of 1.25% or more of total industry customer equity and ETF option ADV of contracts traded in a month today also receive an additional $0.02 per contract Penny Pilot Options Customer Rebate to Add Liquidity for each transaction which adds liquidity in Penny Pilot Options in that month.\(^{11}\)

The Exchange is proposing to expand eligibility for this additional incentive under the Tier 8 Customer rebate by amending the qualification as follows: “Participants that add Customer, Professional, Firm, Non-NOM Market Maker and/or Broker-Dealer liquidity in Penny Pilot Options and/or Non- Penny Pilot Options of 1.15% or more of total industry customer equity and ETF option ADV contracts per day in a month will receive an additional $0.02 per contract Penny Pilot Options Customer Rebate to Add Liquidity for each transaction which adds liquidity in Penny Pilot Options in that month.” By lowering the percentage of total industry customer equity and ETF options ADV of contracts in a month required to be reached in order to qualify for the additional $0.02 per

contract rebate, the Exchange expects that a greater number of Participants qualifying for the Tier 8 rebate will also receive the added incentive.

The Exchange expects that expanded eligibility for this incentive will encourage Participants to add greater liquidity to NOM. While the changes proposed herein are effective upon filing, the Exchange has designated such changes to become operative on August 3, 2015.

2. Statutory Basis

NASDAQ believes that the proposed rule change is consistent with the provisions of Section 6 of the Act,\textsuperscript{13} in general, and with Section 6(b)(4) and 6(b)(5) of the Act,\textsuperscript{14} in particular, in that it provides for the equitable allocation of reasonable dues, fees and other charges among members and issuers and other persons using any facility or system which NASDAQ operates or controls, and is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange’s proposal to expand incentive eligibility is reasonable because it will incentivize Participants to add liquidity in Penny Pilot Options and/or Non-Penny Pilot Options. Participants that qualify for the Tier 8 rebate may choose to add greater liquidity to NOM because of the lower percentage qualifier (1.25% to 1.15%) to obtain the additional $0.02 per contract Customer rebate.

The Exchange’s proposal to expand incentive eligibility is equitable and not unfairly discriminatory because all eligible Participants may qualify for the Tier 8 Customer Penny Pilot Options Rebate to Add Liquidity, provided they have the requisite

volume. The added $0.02 per contract incentive will be uniformly paid in addition to the Tier 8 rebate. Customer liquidity is critically important to the market and all market participants. Greater customer liquidity benefits all market participants by providing more trading opportunities, which attracts market makers. An increase in the activity by market makers in turn facilitates tighter spreads and further order flow.

B. Self-Regulatory Organization's Statement on Burden on Competition

The proposed rule change will not impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The proposed expanded incentive will incentivize market participants to add greater liquidity on NOM to obtain the added $0.02 per contract Customer rebate. Customer liquidity is critically important to the market and benefits all market participants. Greater customer liquidity benefits all market participants by providing more trading opportunities and attracting greater participation by specialists and market makers. An increase in the activity of these market participants in turn facilitates tighter spreads. All Participants are eligible for the rebates if they transact the requisite volume.

The Exchange operates in a highly competitive market in which many sophisticated and knowledgeable market participants can readily and do send order flow to competing exchanges if they deem fee levels or rebate incentives at a particular exchange to be excessive or inadequate. These market forces ensure that the Exchange’s fees and rebates remain competitive with the fee structures at other trading platforms.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

No written comments were either solicited or received.
III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act.¹⁵

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.
